80306781	Still River 55G New Distru substati	Still River 55G - The initial funding request of $375K is to develop a new Burrville 29J 2-62.5MVA 115kV/23kV bulk station which will, in part, replace the existing Burrville distribution station in Torrington, CT. The existing Burrville 29J distribution station will then be decommissioned after completion of the new station. This project will include two (2) 115kV transmission circuits from Weingart Junction (3.7 miles south of existing the Burrville 29J substation), proposed in an overhead (OH) design in an existing right-of-way (ROW) to the vicinity of the existing distribution station, depending on the location of the new substation. The transmission and distribution costs will be tracked separately at the work order level.	Rents + Leases-J00	107010	1
