80435171	RC PAD 1091 INSTALL NEW UG TEMP SER	We would like to create an annual to replace the batteries at Wells 38 when we go to perform the major maintenance next year. The batteries are marine 12v batteries. Last time replaced was in 2018. And we have corrosion and leakage at the terminals. Approx. $300 each. We would require 6 of them. I have attached the quote here for your review as well. This would be planned distribution. We would require 16 man hours and the price of the batteries. Batteries will be replaced with similar units. $6,385.00	Rents + Leases-J00	107010	1

81268353	Baldwin 13F – Remove 4.8kV Equipmen	Removal of the de-energized 4.8kV equipment and perform environmental waste characterization at Baldwin 13F substation, located in Waterbury, CT, in accordance with Eversource Procedure TD230. The 4.8kV yard at Baldwin 13F was de-energized in August 2023 under Distribution Line project CD00781, after all 4.8kV load had been converted over to 13.8kV feeders. Eversource is required to remove the de-energized substation equipment, foundations, and potential environmental liabilities when retiring a portion of a substation. Eversource will not be retiring the full substation and will be performing environmental waste characterization and remediation activities only in the area pertaining to the de-energized 4.8kV equipment. <!-- RICH TEXT -->	Rents + Leases-J00	107010	1
