CLP-OCC-01

The Office of Consumer Counsel **Witness: David J. Garrett**

Docket No. 26-05-10

Date Submitted: November 10, 2026

CLP-OCC-01

Please provide all source documents used to develop the testimony and exhibits DG-2 through DG-16, submitted by OCC Witness David J. Garrett as part of his testimony in this docket regarding The Connecticut Light and Power Company ("CL&P" or the "Company"), dated October 21, 2026 ("OCC Garrett Testimony"). Source documents should include but are not limited to: Value Line reports; original source data from Yahoo, Zacks, and S&P growth rates; and the underlying data and electronic files that support the figures relied on in the OCC Garrett Testimony and exhibits.

Response:

Assuming the reference to Exhibits "DG-2 through DG-16" is intended to refer to Exhibits DJG-2 through DJG-16, please see the native ROE workpapers and responsive source materials produced with this response. The workpapers contain the calculations underlying the exhibits and identify the principal data sources relied upon. Mr. Garrett has produced the responsive source materials that he used and retained in preparing those exhibits.

CLP-OCC-02

The Office of Consumer Counsel **Witness: David J. Garrett**

Docket No. 26-05-10

Date Submitted: November 10, 2026

CLP-OCC-02

Please provide all cited sources referenced in OCC Garrett Testimony.

Response:

Please see the source materials produced with this response and the sources cited in the OCC Garrett Testimony. Mr. Garrett maintains electronic copies or excerpts of many of the publications and other materials that he regularly cites in his testimony, and those responsive materials in his possession have been produced. To the extent a cited source is publicly available and Mr. Garrett does not maintain a separate electronic copy, the citation and, where applicable, electronic source identified in his testimony provide the source relied upon.

CLP-OCC-03

The Office of Consumer Counsel **Witness: David J. Garrett**

Docket No. 26-05-10

Date Submitted: November 10, 2026

CLP-OCC-03

Please provide the workpapers used to create all figures and tables in the OCC Garrett Testimony. Please include original source documents and all electronic files with formulas, figures, and calculations.

Response:

Please see the native ROE and depreciation workpapers produced with this response. These workpapers contain the formulas, calculations, and data used to prepare the figures and tables in the OCC Garrett Testimony. See also the responses to CLP-OCC-01, CLP-OCC-02, and CLP-OCC-05.

CLP-OCC-04

The Office of Consumer Counsel **Witness: David J. Garrett**

Docket No. 26-05-10

Date Submitted: November 10, 2026

CLP-OCC-04

Please provide copies of all cost of capital studies and testimony prepared by Mr. Garrett for electric and/or natural gas utilities over the time-period from 2020 through 2025.

Response:

Please see filed with Mr. Garrett's testimony Exhibit Eversource-Garrett Exhibits d4 -Final (pdf p. 47 – Exhibit DJG-1, p.3), which includes all cases in which Mr. Garrett has filed testimony and the information needed to obtain the testimony documents, which are all publicly available at the respective commission websites.

CLP-OCC-05

The Office of Consumer Counsel **Witness: David J. Garrett**

Docket No. 26-05-10

Date Submitted: November 10, 2026

CLP-OCC-05

Please provide, in native electronic format, all workpapers, calculations, analyses, supporting schedules, and other materials prepared or relied upon in the OCC Garrett Testimony to develop, evaluate, or support his depreciation recommendations in this proceeding. For spreadsheets, please provide files with all formulas, cell references, links, and other functional elements intact.

The response should include all calculations and supporting workpapers used to develop Mr. Garrett's remaining life estimates, including any generation arrangement or equivalent calculation showing the calculated remaining life for each vintage or age. Please also provide any supporting data, assumptions, curve selections, and intermediate calculations necessary to reproduce those results.

Response:

Please see the native depreciation workpapers produced with this response. Those workpapers contain the calculations supporting Mr. Garrett's depreciation recommendations, including parameter selections, curve-fitting analyses, depreciation-rate development, and supporting calculations. Please also see the remaining-life development output produced with this response, which shows the calculated remaining life by vintage/age for the applicable accounts. The remaining-life development output is the equivalent calculation maintained by Mr. Garrett; he did not prepare a separate additional remaining-life calculation beyond the materials produced.

Docket No. 26-05-10

Date Submitted: November 10, 2026

CLP-OCC-06

Identify each instance known to Mr. Garrett in which a state public utility commission or other utility regulatory authority has approved, adopted, or expressly accepted an O3 Iowa survivor curve for determining depreciation rates for utility property. For each instance, please identify the following:

a. the utility;
b. the regulatory jurisdiction;
c. the docket number or other proceeding identifier;
d. the plant account or property group to which the curve was applied;
e. the average service life associated with the curve; and
f. the order, decision, testimony, exhibit, or other document evidencing the approval, adoption, or express acceptance, including the date and specific page, paragraph, or other relevant citation, if available.

Please provide copies of the identified orders, decisions, or other supporting documents, or provide a publicly accessible electronic link to each document. If the curve was adopted subject to conditions or as part of a settlement, please identify those circumstances.

Response:

Mr. Garrett does not maintain a database, compilation, or other record of regulatory determinations involving O3 Iowa survivor curves, and he did not conduct or rely upon a survey of such determinations in preparing his testimony in this proceeding. He therefore cannot reliably identify from memory each instance that might fall within this request without undertaking new research. His recommendation of an O3 curve for Account 373 was based on the Company's retirement data, actuarial analysis, current parameters, and other evidence discussed in his testimony and workpapers. Accordingly, Mr. Garrett has no existing compilation or supporting documents responsive to this request beyond the materials already cited and produced in support of his testimony.

Docket No. 26-05-10

Date Submitted: November 10, 2026

CLP-OCC-07

For each instance known to Mr. Garrett in which a state public utility commission or other utility regulatory authority has approved, adopted, or expressly accepted an L0 Iowa survivor curve for determining depreciation rates for an electric utility pole account, please identify the following:

a. the utility;
b. the regulatory jurisdiction;
c. the docket number or other proceeding identifier;
d. the specific plant account or property group covering electric utility poles;
e. the average service life associated with the curve; and
f. the order, decision, testimony, exhibit, or other document evidencing the approval, adoption, or express acceptance, including the date and specific page, paragraph, or other relevant citation, if available.

Please provide copies of the identified orders, decisions, or other supporting documents, or provide a publicly accessible electronic link to each document. If the curve was approved or adopted subject to conditions or as part of a settlement, please identify those circumstances.

Response:

Mr. Garrett does not maintain a database, compilation, or other record of regulatory determinations involving L0 Iowa survivor curves for electric utility pole accounts, and he did not conduct or rely upon a survey of such determinations in preparing his testimony in this proceeding. He therefore cannot reliably identify from memory each instance that might fall within this request without undertaking new research. His recommendation of an L0-53 curve for Account 364 was based on the Company's retirement data, actuarial analysis, the Company's current 53-year average life, and other evidence discussed in his testimony and workpapers. Accordingly, Mr. Garrett has no existing compilation or supporting documents responsive to this request beyond the materials already cited and produced in support of his testimony.

CLP-OCC-08

The Office of Consumer Counsel **Witness: David J. Garrett**

Docket No. 26-05-10

Date Submitted: November 10, 2026

CLP-OCC-08

For each instance known to Mr. Garrett in which a state public utility commission or other utility regulatory authority has approved, adopted, or expressly accepted an L0 Iowa survivor curve for determining depreciation rates for an electric utility underground conductors and devices account, please identify the following:

a. the utility;

b. the regulatory jurisdiction;

c. the docket number or other proceeding identifier;

d. the specific plant account or property group covering underground conductors and devices;

e. the average service life associated with the curve; and

f. the order, decision, testimony, exhibit, or other document evidencing the approval, adoption, or express acceptance, including the date and specific page, paragraph, or other relevant citation, if available.

Please provide copies of the identified orders, decisions, or other supporting documents, or provide a publicly accessible electronic link to each document. If the curve was approved or adopted subject to conditions or as part of a settlement, please identify those circumstances.

Response:

Mr. Garrett does not maintain a database, compilation, or other record of regulatory determinations involving L0 Iowa survivor curves for electric utility underground conductors and devices accounts, and he did not conduct or rely upon a survey of such determinations in preparing his testimony in this proceeding. He therefore cannot reliably identify from memory each instance that might fall within this request without undertaking new research. His recommendation of an L0-55 curve for Account 367 was based on the Company's retirement data, actuarial analysis, current parameters, and other evidence discussed in his testimony and workpapers. Accordingly, Mr. Garrett has no existing compilation or supporting documents responsive to this request beyond the materials already cited and produced in support of his testimony.
