Subject to the provisions of the Principal Agreement between the parties of even date and without waiving or modifying any rights of either party contained therein, Meter Readers will be expected to perform meter reading work regardless of weather conditions. However, supervisory personnel are to endeavor to rearrange work assignments to avoid insofar as practicable unnecessary exposure to severe stormy weather or unusually cold weather. Ten degrees Fahrenheit temperature or lower is to be considered unusually cold weather. Walking meter reading routes will be suspended when the outside air temperature is 10 degrees Fahrenheit or below. Riding and Van Routes will continue regardless of the outside air temperature. The temperature recorded at each service center will be the benchmark, except for Mass Ave South Routes, which will use the recorded temperature at the Walpole Service Center. If the Meter Readers have been ordered to work and if, in the opinion of the Steward, they should not have been so ordered, the Steward may immediately appeal to his/her Supervisor and if necessary to his/her Division Head and Department Head. If the decision is not satisfactory to the Steward, the employees shall continue to work, but the Steward may file a grievance under Article XXXII and Arbitration under Article XXXIII and the Business Agent of the Local may proceed with this grievance to the Human Resources Organization for immediate decision.

STIPULATION #19

Joint Benefits Review Committee

During the 2000 contract negotiations, the Company and the Union spent considerable time in addressing pension and health care costs. While the parties were able to reach agreement on a multi-year agreement, both expressed an interest in ongoing discussions of these issues. Accordingly, agreement was reached on the formulation of a Joint Benefits Review Committee.

The Company and the Union agree that, within sixty (60) days of the execution of the Contract, a Joint Benefits Review Committee will be established and begin discussions. The Committee shall consist of no more than six (6) members – three (3) from management and three (3) from the Local. Outside resources may be utilized to enrich the review process.

The purpose of the Committee will be to discuss pension and health care costs and explore alternatives to existing programs. The Committee will meet monthly over an eighteen (18) month period and may make changes to programs by mutual agreement. Following this period, the Committee will dissolve unless extended by mutual agreement.

Re: Six (6) Month Work Assignments for OT&P Positions

Dear Mr. Hurley:

It is mutually agreed by and between the parties hereto that travel time premiums in connection with out-of-area work assignments will be paid, or not paid, as follows:

1. Normally, an employee will be entitled to travel time premiums when assigned to report to work outside his/her permanent work area unless authorized to travel during posted work hours.
2. Employees may be assigned to any out-of-area assignments without the payment of travel time premiums provided the assignment is for six (6) or more months.
3. If, at the time the out-of-area work assignment is made, management has information that would indicate that the assignment may be for six (6) months or more, they will so inform the steward; and the employee will not receive travel time premiums. In the event the work assignment does not last for six (6) or more months, the employee will be retroactively adjusted and paid the applicable travel time premiums.
4. In no event will travel time premiums be paid in connection with permanent work location changes.

MEMORANDUM OF AGREEMENT

GRID MODERNIZATION

In accordance with the provisions of the principal agreement between the parties dated June 2, 2018 and without waiving or modifying the rights of either party contained therein, except as specifically provided herein, the Company (Eversource Energy), and Local 369, UWUA, AFL-CIO agree as follows:

1. The terms and conditions outlined herein will remain in effect for the term of the collective bargaining agreement.

2. The Company anticipates performing a major project, defined as follows:

   Grid Modernization - Included in the 2017 Eversource Massachusetts rate case in response to a regulatory docket DPU 15-122/1213 created by the Massachusetts DPU. If this project is approved this work will be additional to the Company's normal capital plan and will require additional resources to accomplish.

   In order to meet the staffing demands required by this project, the Company agrees to allocate a portion of the postings referenced in the parties May, 2018 contract extension agreement as follows:

   - Post and train 30 Engineers.

   To better facilitate the hiring of the above classifications, the Company and the Local agree to partner with a learning institution(s), to create a pipeline for qualified candidates.

3. As a result of the work associated with the project outlined in section 2, the parties agree that the Company may need to employ contractors to perform work on this project.

   In consideration for this contractor agreement, for all work associated with Grid Mod, the Company will offer overtime opportunities when contractors are on the system. For overtime planning purposes when contractors are on the system, overhead resources will be utilized as follows:

   Contractors in the central area – quid for Somerville/Hyde Park
   Contractors in the Metro West – quid for Waltham/Southborough/Walpole
   Contractors in the South – quid for Plymouth/New Bedford
   Contractors in the Cape – quid for Yarmouth/Martha's Vineyard

   It is understood that the primary offer for planned overtime will be eight (8) hours on Saturday's however, extended day overtime may be offered on certain work requiring shorter engagement periods.

4. For classifications outside of the Overhead, that do not already have contractor agreements in place, (e.g. Underground, Sub-Stations, Engineering, etc.) It is understood that the primary offer for planned overtime will be eight (8) hours on Saturdays or eight (8) hours on the first regular scheduled day of relief (e.g. shift workers) for the affected area.

5. The Company and the Local agree to form a committee to discuss training opportunities for work associated with Grid Modernization.

6. In addition, to facilitate the onboarding of new employees, the Company and the Union agree to create a new Overhead Leader/Training position. Employees eligible for this new position will be required to meet the minimum qualifications of the Leader Overhead Lines and candidates for this position will be selected dependent on review and approval of a four (4) person committee, as outlined in the job description. (see attached job description)

   Once selected, these employees will be upgraded to this new position, as if it was a permanent promotion.

   It is agreed that a maximum of 6 leaders (3 North and 3 South) will be utilized in this capacity and that additional resources will come from outside resources, including Power for America.

This agreement sets no precedent and may not be used or cited in any other proceeding between Eversource and Local 369 except the one contained herein.

MEMORANDUM OF AGREEMENT

BENEFITS

In accordance with the provisions of the principal agreement between the parties dated June 2, 2018 and without waiving or modifying the rights of either party contained therein, except as specifically provided herein, the Company (Eversource Energy), and Local 369, UWUA, AFL-CIO agree as follows:

1. **Implement the standard Eversource Disability Plan for all new hires after December 31, 2018.**

   a. All 369 employees will be eligible for up to 10 sick days per year at 100 percent of pay for absences from work due to non-occupational illness or injury, as of 1/1/19. Sick days cannot be carried over from one year to the next nor are sick days paid out at termination.

   b. Short-Term Disability Benefit – In the case of illnesses that exceed five consecutive work days, qualifying employees will be eligible for short-term disability (STD) benefits. Disability benefits are payable for up to 25 weeks, for each injury or illness after an employee has been out of work for more than five consecutive work days. The first five consecutive working days of an extended absence is considered an "elimination period." Employees must use available sick time to satisfy the elimination period. Following a period of five consecutive sick days, the next twelve (12) weeks of absence under the STD benefit will be paid at 100 percent of base pay. Up to thirteen (13) additional weeks of STD will be paid at 67percent of base pay.

   c. Upon exhaustion of STD an employee who qualifies will move to Long-Term Disability. LTD benefits are payable at 50 percent of base pay. Employees will have the option to buy-up with pre-tax contributions to an LTD benefit of 67 percent of base pay.

2. **Payment of Benefits while on LTD** - All employees who receive a LTD benefit and participate in the Eversource Employee health and welfare benefit plans will have payments deducted from their LTD check rather than being billed for participation in said benefit plans.

3. **Vacation Eligibility – Local 369 employees hired after December 31, 2018 will be eligible for vacation as follows:**

Years of Service	Vacation Entitlement
Less than one year of service:	
Start date January 1 – March 31	15 days
Start date April 1 – June 30	10 days
Start date July 1 – September 30	5 days
Start date October 1 – December 31	No vacation days
One year but less than 10 years	15 days per year
10 years but less than 20 years	20 days per year
20 years or more	25 days per year

   a. Existing 369 employees may opt into the new hire vacation schedule without opting into the Eversource Disability Plan for new hires

   b. 369 Employee hired between the signing of this agreement and December 31, 2018 will have the option to enroll in the existing 369 vacation schedule or the new hire vacation schedule.

   c. Existing 369 employees with more than 10 years of service, but less than 15, who do not opt into the new hire vacation schedule, will receive their fourth week of vacation effective June 2, 2018.

4. For 369 employees who opt into the High Deductible Health Plan (currently designed as the Saver Plan) effective 1/1/19 and existing participants, the Company agrees to the following HSA contributions: $1250.00 for Family and $625.00 for Individual. The Eversource provided HSA Contribution amounts will be prorated for new entrants into the High Deductible Plan during the year 2019. The following year the Everesource contribution amounts will return to $1000.00 For Family and $500.00 For Individual.

This agreement sets no precedent and may not be used or cited in any other proceeding between Eversource and Local 369 except the one contained herein.

Dated: May 8, 2018

Memorandum of Agreement between, NSTAR Electric Company and NSTAR Gas Company, d/b/a Eversource Energy, and Utility Workers Union of America, A.F.L. - C.I.O. and Local 369, U.W.U., A.F.L. - C.I.O.

The following matters have been agreed to by the parties identified above and constitute settlement of the 2021 collective bargaining negotiations:

1. **Term** - The term of the next collective bargaining agreement shall be four (4) years, commencing June 2, 2021 and continuing in effect to and including June 1, 2025.

2. **Wages** - General Wage increases as follows:

   - June 2, 2021 – 3.0%
   - June 2, 2022 – 3.0%
   - June 2, 2023 – 3.0%
   - June 2, 2024 – 3.0%

3. **Sub-Committee Agreements** - M.O.A. Local 369 Gas.

4. **Benefits** - If an active employee dies and is eligible for retiree medical on his or her date of death:

   Continue (current practice) to provide coverage for surviving dependents on the active group plan, at active rates (spouse until Medicare eligible, child up to age 26, etc.)

   Upon the surviving spouse reaching Medicare eligibility, allow the surviving spouse to begin participating in the Eversource Group Health & Welfare Benefits Plan for Retirees – HRA subsidy. Any eligible dependent children will also be eligible to participate in the HRA subsidy, until age 26. Note, upon the surviving spouse's transition to the retiree plan, any enrolled dependents will also transition to the retiree plan at the same time, if applicable.

5. **Direct Deposit** - Direct Deposit will be required for all new hires as well as existing members of the bargaining unit, effective the date of this agreement. (existing members of the unit, not already signed up for Direct Deposit, will be required to sign up, no later than the last pay period of December 2021)

6. **IVR for Sick Calls** - Effective January 1, 2022, all Employees in the Bargaining Unit will be required to call HR Connect each and every day they are out sick. After January 1,2022, employees will no longer need to call HR-Connect to return from being out sick.

7. **Craft Movement** - For new hires only, employee in the Underground, Overhead and Sub-Stations cannot bid out of their positions within twelve (12) months of being hired.

8. **Meal Allowance** - Increase by $.25, effective 6/2/2021, 6/2/2022, 6/2/2023, & 6/2/2024.

9. **Shift Differential** - Increase by $.10, effective 6/2/2021, 6/2/2022, 6/2/2023, & 6/2/2024.

10. **New Lead ECSD Position** - The parties agree to meet and discuss the details including, roles and responsibilities, minimum qualifications, and the rate of pay.

11. **Martha's Vineyard Premium** – The following employees, permanently assigned to work on the Island of Martha's Vineyard, will be eligible for the MV premium, as outlined in paragraph #5 of M.O.A. Martha's Vineyard Service Center, dated June 1, 2015: (Gregory Williamson #009749, Linda Coutinho #005806, Robert Davey #002089, Tracy Elliott #010548 and Valerie Veiga #012238)

12. **Use of Non-Traditional Employees during ERP** - The parties agree to meet and discuss the details.

13. **Sub-Committees** – the parties agree to the following Sub-Committees to meet and discuss: (***these Sub-Committees will dissolve 90 days after the effective date of this agreement, unless mutually agreed to***)

- **Overhead**
  On-Call - RSO (use of OH Trouble Shooters)
  NEAT Program (for training of OH Lineworkers)
- **Sub-Stations**
  SWAT Process - New Construction Agreement - New Hire Retention and Central Shop.
- **Underground**
  Efficiency of Underground crews for single pipe and the potential for C.I.C. in the UG North.
  Duties of Conduit Inspector A and B positions.
- **Materials and Logistics**
  Assignment of the Mail Bus for inter office mail.
- **Facility Operations**
  Duties of Office Cleaners and Utility A & B positions.

14. **Grievance Procedure** – Remove the language in paragraph b. from article XXXV and insert "Subject to approval by the Local Executive Board' into what will be re-labeled paragraph b. (former paragraph c.)

15. **Bulk Power Dispatch Appendix** - The Company agrees to add the Bulk Power Dispatchers to the Local 369 P&M Pay Schedule, with the wage increases outlined in paragraph #2 of this agreement and increase the annual shift and turnover Stipend (outlined in Article X, of the Appendix for Bulk Power Dispatch dated October 15, 2019) by $500.00, effective 6/2/2021, 6/2/2022, 6/2/2023, & 6/2/2024.

16. **Jobs** - The Company will post 200 new OT&P/P&M jobs, over the term of this agreement, through June 1, 2024. The Company may post additional OT&P/P&M jobs during the last year of the contract, depending on the success of the Sub-Committees outlined above.

All other terms of the collective bargaining agreement remain unchanged and are extended into the new contract term.

This Memorandum of Agreement is subject to ratification by the bargaining unit membership. The Executive Board of the Local will unanimously recommend to the membership that this agreement be ratified.

GENDER CLAUSE

Whenever used in this agreement, a masculine pronoun shall be deemed to include the masculine and feminine gender, and a singular word shall be deemed to include the singular and plural, unless the context clearly indicates otherwise.

AGREEMENT

PARTIES AND DATE

THIS AGREEMENT, DATED APRIL 1, 2017 between NSTAR Electric & Gas Corporation, d.b.a. Eversource Energy, (hereinafter the "Company") and the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied-Industrial and Service Workers International Union, AFL-CIO/CLC on behalf of Local 12004, United Steel, Paper and Forestry, Rubber Manufacturing, Energy, Allied- Industrial and Service Workers International Union, AFL-CIO/CLC (hereinafter called the "Union")

WITNESSETH

GENERAL PURPOSE

Whereas, the parties hereto have reached an Agreement as a result of collective bargaining and for the purpose of facilitating the peaceful adjustment of differences that may arise from time to time, and to promote harmony and efficiency to the end that the Employees, the Company and the General Public may be benefited, the Parties hereto contract and agree with the other as follows:

Compliance and Applicability of Laws

Section 1. Compliance with Laws
The parties hereto shall comply with the provisions of all applicable laws and all lawful regulations, orders and directives issued thereunder relating to rates of pay, wages, hours of employment and other conditions of employment during the term of this Agreement.

Section 2. Applicability of Laws
It is agreed that the provisions, if any, contained in this Agreement which are in conflict with the provisions of any Federal or any state laws and lawful regulations orders and directives shall not be enforceable.

ARTICLE I

GENERAL

SECTION 1

RECOGNITION OF UNION FOR CERTAIN DEPARTMENT

Pursuant to, and in conformance with, the National Labor Relations Act, the Company recognizes the Union as the sole collective bargaining agency in behalf of all Regular employees in the Office and Clerical Workers, Payroll*, Dispatch, Commercial, Buildings and Grounds, Distribution, Meter Repair, Production, Stores, Transportation, Customer Service and Instrumentation and Regulation Departments, to whom this Agreement applies for the purpose of bargaining in respect to wages, hours and conditions of employment.

"EMPLOYEE" DEFINITIONS

Wherever used in this Agreement, the words "employee" or "employees" shall refer only to those employees to whom this Agreement is applicable.

*Subject to the Memorandum of Understanding, dated December 4, 1974.

SECTION 2

CLASSES OF EMPLOYEES AND ELIGIBILITY

The provisions of this Agreement shall apply only to regular employees as defined in Article I, Section 1. The term "Regular Employees" means those holding regular positions so authorized by the Company.

It is agreed, however, that the following regular employees are excluded from the terms of this Agreement, and that they shall not be eligible for Membership in the Union:

Officers, Directors, Managers, Superintendents, Secretaries to the above, Engineers, Accountants, Buyers, Supervisors, Foremen, Guards, Salesmen, Payroll*, Meter Readers, Automated Meter Reader and Sales Clerks. Definitions of Supervisors and Foremen will be as defined in the National Labor Relations Act.

*Subject to the Memorandum of Understanding, dated December 4, 1974.

The following not being regular employees are, therefore, excluded from the application of the terms of this Agreement and except as noted in Article 1, Section 3, shall not be members of the Union:

(A) TEMPORARY EMPLOYEES

Those hired to fill temporary jobs such as seasonal construction work or temporary maintenance work. Any such employee who shall have worked twelve (12) consecutive months for the Company shall thereby become a regular employee, providing regular jobs are available.

The Company will not establish different hours for temporary employees other than those already established for regular employees.

(B) PROBATIONARY EMPLOYEES

Those hired on six (6) months' trial to fill regular authorized positions which are open or expected to be open. It is understood that if such probationary employees are found satisfactory, and if the positions are still open, they will become regular employees.

SECTION 3

UNION SECURITY

Subject to the provisions of Sections 1 and 2 of this Article, it shall be a condition of employment that all employees of the Company covered by this Agreement and hired on or after September 1, 1973 or who are members of Local Union No. 12004, United Steelworkers, AFL-CIO-CLC in good standing on the execution date of this Agreement shall, on the thirtieth (30th) day following the execution date of this Agreement, become and remain members in good standing in the Union for the balance of the term of this Agreement.

It shall also be a condition of employment, subject to the provisions of Sections 1 and 2 of this Article, that all probationary employees who are hired on or after its execution date, and who thereafter become regular employees, shall, on the thirtieth (30th) day following the beginning of such employment, become and remain members in good standing in the Union for the balance of the term of this Agreement.

During the six (6) month probationary period, the Company shall determine the suitability of said new employee for acceptance as a regular employee. The decision as to the retention by the Company of any probationary employee as a regular employee subsequent to the completion of his probationary period of employment is one which is within the sole discretion of the Company and if the Company for any reason terminates said probationary employee from its employ at any time prior to or at the completion of his probationary employment, such action shall not be subject to the Grievance Procedure or to Arbitration under this Agreement, nor shall such action form the basis of any claim whatsoever under this Agreement.

In the event a probationary employee bids and is awarded another position within the Company, such employee will not be transferred to the new position until his probationary period is completed. Additionally, probationary employees will not be eligible for the Appendix F for the duration of their probationary period.

ARTICLE II

SECTION 1

UNION AGREEMENT ON CONTINUITY OF WORK

During the term of this Agreement or any extension thereof, there shall be no authorized or sanctioned cessation, retarding or stoppage of work because of any dispute which may result from an interpretation of this Agreement, or from any cause whatsoever. It is further agreed that any employee represented by the Union and/or subject to the terms and conditions of this Agreement who, without the authority or sanction of the Union, voluntarily absents himself or herself from work because of any dispute or demand may be denied further employment or suspended at the option of the Company, provided, however, the Union may use the grievance and arbitration procedure as contained in Article III of this Agreement on the sole question whether such employee absents himself or herself from work because of a dispute or demand.

COMPANY AGREEMENT ON NO LOCKOUT

The Company agrees that during the life of this Agreement there will be no lockout.

MANAGEMENT FUNCTIONS

Being among the usual functions of Management, it is agreed (subject as limited and stated in this Contract to review procedure in certain cases and to rules of seniority where applicable), that the Company has the sole right at all times to employ, promote, transfer, and discharge employees, and to determine the number and qualifications of employees. Nothing in this paragraph is to be construed as a statement of limitations of Management.

COURT OR SIMILAR ACTION

In further consideration of the mutual promises contained herein, the parties expressly agree that neither shall bring, or cause to be brought, any court, or other legal or administrative action against the other until after the dispute, claim, grievance or complaint has been brought to the attention of the Party against whom it was made and the said Party after actual notice of same, has within reasonable time, failed to take steps to correct the cause or circumstances giving rise to such dispute, claim, grievance or complaint.

SECTION 2

MUTUAL DESIRE FOR UNINTERRUPTED SERVICE

It is the desire of both Parties to provide for uninterrupted and continuous service. Nothing herein is intended, however, to prevent the resignation or discharge of individuals, the discharge being subject to review under the conditions and in the manner hereinafter specified in Article III, and Article IV.

SECTION 3

UNION DESIRE TO PROMOTE COMPANY'S WELFARE

The union agrees that its members will individually and collectively perform loyal and efficient work and service, use their influence and best efforts to protect the property of the company and the Company's interests, assist in promoting the sale of the company's products, and cooperate with the Company and the employees of all departments in promoting and advancing the welfare of the Company and its service at all times.

COMPANY TO COOPERATE WITH UNION FOR HARMONY AND EFFICIENCY

The Company agrees that it will cooperate with the Union in its effort to promote harmony and efficiency among all the Company's employees.

SECTION 4

AGREEMENT CONCERNING DISCRIMINATION AGAINST CERTAIN EMPLOYEES

The Company agrees not to interfere with the rights of its employees to become members of the Union. There shall be no discrimination, interference, restraint or coercion by the Company, or any of its agents against any employee because of Membership in the Union. The Union, agrees collectively and individually for its members and agents, not to intimidate or coerce employees into Membership and not to solicit memberships, distribute pamphlets or discuss Union matters during working hours. The Union further agrees for its members not to discriminate against any employee of the Company because of non-membership in the Union or to intimidate, coerce or refuse to work cooperatively with any employee or workman not a member of this Union, or to refuse to work upon or with materials furnished by the Company. The Union agrees that because of the nature of the Company's business, its members will promptly and loyally obey a request of a Company Supervisor where such request has direct connection with the work of the Company and is not contrary to Company Safety Rules; and in that they will promptly, loyally and carefully follow operating and safety rules. It being agreed, however, that any orders given shall be by Company Supervisors and will not be in violation of the Safety Rules as applicable.

ARTICLE III

SECTION 1

SHOP STEWARD SELECTION

Notification will be made by the Union as to the identity of the Grievance Committeemen and Shop Stewards within thirty (30) days of the signing of the Agreement. The Company will be notified of any changes in position within seven (7) days. The Grievance Committeemen selected by the Union shall have the right to participate with any department Shop

Steward in the various steps of the grievance procedure.

SECTION 2

EMPLOYEE GRIEVANCE PROCEDURE

In the event of any dispute between the Union and the Company as to the meaning, application or intent of the provisions of this Agreement, the procedure of settlement shall be as follows:

1st A discussion of the grievance between the aggrieved employee with his Shop Steward and his immediate Supervisor. If no satisfactory settlement is made, the Department Head and the Grievance Committeeman will be called in to the discussion at the first convenient opportunity.

2nd A meeting between the Shop Steward, a member of the Grievance Committee and the Department Head. At this stage, the grievance shall be presented in writing on a form mutually agreed to between the Company and the Union. The Department Head will give his answer in writing within seven (7) days unless the period is extended by mutual agreement. This step must be initiated within thirty (30) days of knowledge by the Union of the incident that caused the dispute.

NOTE: In making investigation under paragraph 1 and 2 above, the employees concerned shall first receive permission from the Department Superintendent or someone designated by him, to absent themselves from their work.

3rd A Meeting between the Grievance Committee and the President of the Company or his duly authorized representative. If a meeting between the parties is to be held it will be requested no later than thirty (30) days after the date of the Department Head's written answer in the second step. The Grievance Committee may be accompanied by a representative of the United Steelworkers, AFL-CIO-CLC. The parties agree to schedule quarterly meeting dates for 3rd step grievances hearings at the start of each year. However, in the case of termination, the parties agree to hold a Step 3 hearing within thirty (30) days of the Step 2 hearing or at the quarterly meeting, whichever comes first.

If not, the Local shall be notified in writing, giving the reason for delay. In the event that no satisfactory settlement of the dispute is reached by the foregoing procedure then such matter may be referred to a Board of Arbitration. If arbitration is not so requested within forty-five (45) days of the first meeting of this step, it shall be deemed abandoned unless said period is extended in writing by mutual agreement of the Grievance Committee and the Company.

4th In the event that arbitration is required, one arbitrator will be appointed within thirty (30) days of the request. The Arbitrator shall be chosen as follows: The Company and the Union will each designate a representative to choose the arbitrator. If the Arbitrator cannot be mutually agreed upon within ten (10) days of the initial request then said Arbitrator is to be appointed by the American Arbitration Association. No Arbitrator shall have the power to add or subtract from or modify any of the Terms of this Agreement or pass upon or decide any question except the grievance submitted to the Arbitrator in accordance with the foregoing provisions. The Arbitrator will be instructed to render a decision within thirty (30) days from receipt of all materials pertinent to the case. The award of this appointed Arbitrator shall be final and binding on both the Company and the Union. The Company and the Union shall bear the expense equally of the Arbitrator.

Mutually agreed upon extensions will automatically extend the time within the steps of the grievance procedure.

ARTICLE IV
WORKING CONDITIONS

SECTION 1

CONDITIONS NOT COVERED

Working conditions which were in operation on the effective date of the Agreement and which are not covered by this Agreement shall remain in effect unless changed by mutual consent of both parties to this Agreement. The Union agrees to not unreasonably withhold such consent when the change in question may interfere with the efficient operation of the Company; provided, however, that such change is not detrimental to the employees involved.

SECTION 2

SENIORITY DETERMINATION

Seniority shall be determined from the date of the beginning of the last continuous period of employment. In determining length of service for the purpose of seniority, absence from the Company's service for less than six (6) months shall be disregarded. Absence for more than six (6) months, but less than one (1) year, shall be deducted from length of service. Absence of more than one (1) year shall forfeit all seniority previously established, except two (2) years in case of lay-off. An absence due to any employee's resignation from the Company's service shall forfeit all seniority previously established. The only exceptions to this method of determining length of service shall be leave of absence in writing granted by an Officer of the Company, illness attested to by a Physician's Certificate, leave of absence for the transaction of Union business as provided for in Article IV, Section 4, or service in the Military Forces of the United States, or the Commonwealth of Massachusetts.

TEMPORARY TRANSFERS

Transfers may be made at the option of the Company on a temporary basis for a period not to exceed forty (40) worked days for any one transfer. Temporary transfers shall be limited to sickness/accident, vacations, restricted duty, job hold over and workload. Temporary transfers due to workload will be for the following areas: Meter Service(SNOPs), Gas Meter Shop (Meter Technician and ERTs) and snow removal in Facilities (B&G).

There will be no 40-day transfers from a department while the Company has outside contractors performing work in that department, with the exception of someone who is on restricted duty. An employees' restrictions will determine their eligibility for a temporary transfer. An employee on restricted duty cannot displace an unrestricted employee in his department. The Company will endeavor, first, to find work in his department and report area. If no such work is available, the Company will then attempt to find work in another department within his report area prior to transferring him. The practice of banking overtime associated with Appendix F, where applicable, will be for a period not to exceed thirty (30) days.

Temporary transfers beyond forty (40) worked days shall be mutually agreed upon. An employee may be subject to a Temporary Transfer twice in any calendar year. On a voluntary basis an employee may be transferred an unlimited number of times, with prior agreement from the Union. This will not affect the number of transfers which are mutually agreed to between the Company and the Union. (A permanent transfer of over forty (40) worked days shall be covered by Article IV, Section 5).

When a 40-day transfer occurs between two calendar years, the year in which the majority of time worked will determine what year the 40-day transfer is charged to; if split evenly (20 days/20 days), it will charged to the year the transfer ends.

SENIORITY STATUS WHEN INTERDEPARTMENT TRANSFER OCCURS

An employee transferred on a temporary basis shall continue to accrue seniority in the original department. The affected chief stewards and department stewards shall be notified of such transfers.

An employee permanently transferred to another department or job shall retain his seniority in his former department or departments, but not accumulate further seniority in such department, as of the date of transfer, if the transfer is to another department, but shall begin seniority in his new department as of that date.

LAY-OFF AND RECALL

Lay-off and Recall after Lay-off of employees shall be made initially within each department according to Company seniority, namely, length of service in the Company, but subject to the qualifications of the employees involved to do the work required. An employee laid off from a particular department under the foregoing shall have the option of returning to the last job he held in the department from which transferred. An employee laid off who has worked in one department only, or whose last job in the department from which transferred has been abolished will, where other jobs are available, have the option, without displacement of other employees, to transfer to such available jobs if qualified and able to perform the work required, otherwise he shall have the option of replacing an employee with the least Company seniority in a labor classification.

Employees who have been laid off from the Company shall be returned to work in the inverse order in which they have been laid off, provided they are qualified and have the ability to perform the work available, before any new employees are hired. The right to be recalled shall cease after three (3) years from the date of layoff. A laid off employee, who is notified by registered mail to return to work, must report to the Human Resources Organization with seventy-two (72) hours after such notice has been received by him/her and, when reporting, he/she shall advise said Company whether or not he/she will return. Said Company will send notification to the last known address. Should the letter be returned undeliverable or the employee fails to advise the Human Resources Organization within seventy-two (72) hours that he/she will return to work or fails to return to work within fourteen (14) days after advising the Company that he/she will do so, the next employee shall be called.

PROMOTIONS AND VACANCIES

Promotions and transfers to fill vacancies may be made both within departments and from one department to any other. In filling vacancies or making promotion, other qualifications being equal, Company seniority shall prevail. The word "qualifications" as used in this section, shall include such matters as experience, physical fitness, skill, knowledge, efficiency, and responsibility.

It is agreed that if a vacancy is to be filled that the past practice of posting or filling position without undue delay will be continued.

REVIEW RIGHTS RE NON-PROMOTION, LAY-OFF, OR NON-REEMPLOYMENT

If an employee has not been promoted, or has been laid off and not reemployed, such employee shall have the right to have his case reviewed, provided he requests such review within two (2) weeks, in accordance with Article III. If a Union member receives an unfavorable decision in regard to this paragraph, he may within six (6) months have the matter reopened for consideration upon the discovery of newly obtained evidence and facts.

If an employee is discharged for any reason, such discharge or demotion may be reviewed under the grievance procedure set forth in Article III, provided a request for such review is made within two (2) weeks. The Company shall then furnish him with the reason for his discharge or demotion. If upon investigation such employee has been found to have been unjustly discharged or demoted, he shall be reinstated and shall be paid for any time he may have lost at his regular rate of pay.

Any dispute arising out of the operation of seniority shall be settled as provided elsewhere in this Agreement for the settlement of all grievances or disputes.

SECTION 3

BULLETIN BOARDS

The Company shall provide bulletin boards at locations mutually agreed upon for the purpose of posting official Union

notices only. Said notices shall not be of a controversial or political nature as determined by the Company's designated representative. Said bulletin boards shall be glass-enclosed, and the Union Secretary shall be responsible for the posting of any notice in accordance with the foregoing.

SECTION 4

RIGHT OF EMPLOYEES TO SERVE UNION AS OFFICIALS

The Company agrees to grant to employees of the Company who are members of the Union such reasonable leaves of absence for transacting business of the Union or any Affiliated Union Organization in such numbers and for such length of time as the Company shall determine. An employee shall not be entitled to be paid by the Company during any such leave of absence.

Any member of the Union granted a written leave of absence and employed in any official capacity by the Union, or any Affiliated Union Organization, shall not lose his seniority in the department in which he was employed. Such employee of the Company permanently employed by the Union in any official capacity, or by an Affiliated Union Organization, shall, upon being relieved of his official position with the Union, be entitled to be reinstated in the position he held at the time of taking such official position.

The Company further agrees that time lost by an employee when transacting authorized Company-Union business, such as negotiation or grievance proceedings, shall be paid for by the Company.

(a) Grievance proceedings reimbursement at Step 3 meetings will be limited to a maximum of eight (8) members.

(b) Arbitration proceedings reimbursement will be limited to a maximum of three (3) bargaining unit members.

(c) Negotiation proceedings reimbursement will be limited to a maximum of eight (8) members.

SECTION 5

JOB POSTING

When an existing or a new job classification which falls within the range of jobs covered by the Bargaining Unit is to or has become vacant or is to be filled, notice of such Job Classification is to be posted for a period of ten (10) calendar days. The notice is to state the name of the job, the name of the person to whom applications for such job are to be made, and the date and time before which such applications must be made in order to be considered. The "open" job will not be filled until the time specified in the posted notice except if the Company deems it necessary, it may fill such job on a temporary basis. No "posting" will be made, however, to cover the usual filling of jobs temporarily vacant due to such conditions as sickness, accidents, vacation, etc. Within two (2) weeks after expiration of the posting period, the vacancy will be filled by the accepted applicant, but if there is no applicant who is qualified, the Company shall have the right to hire a new employee to fill such vacancy within 60 days of the expiration of the original posting date, after which time the job will be re-posted if it is to be filled. The employee will be transferred no later than the third Sunday following the Award Posting. Any employee assigned to a posted job with a progression of 24 months or less, shall have forty-five (45) "worked" days in which to qualify. If the posted job has a progression of more than 24 months, the employee shall have sixty (60) "worked" days in which to qualify. If he is unable to qualify, he may return to the classification from which he came without loss of seniority rating therein. The resulting vacancy will be offered to the next qualified bidder from the original posting. If there are no other qualified bidders, the Company shall repost the job if it is to be filled. All other provisions of this Contract not inconsistent with this paragraph are to apply concerning the filling of a job classification, except for employees who have not made application in compliance with this job posting provision.

Employees away from work because of vacation, illness or other legitimate reasons one or two days during the posting period will have an additional one or two days, as appropriate, to bid the job once they have returned to work, assuming it is within two (2) weeks of the date of the job award.

Employees senior to the successful applicant away from work because of vacation, illness or other legitimate reason for the entire posting period may within two (2) weeks of the date of the job award question the award.

The company will notify the Union in writing as to whom the applicants were and who was the successful applicant.

Job Posting and Bidding Sheet formats will not be changed without mutual consent.

ARTICLE V
HOURS AND WAGES

SECTION 1

SCHEDULE OF WAGE RATES

The Union and the Company agree that subject to conditions of the Contract, the wage rates in effect for the term of this Agreement shall be in accordance with the schedule marked SCHEDULE OF WAGES, in Appendix A which is made a part hereof. It is further agreed to hire at a rate of pay no more than the negotiated rates, which are effective at the end of the first six (6) months of employment.

SECTION 2

NORMAL WORK WEEK DEFINED

The normal work week for all employees covered by this Agreement shall consist of forty (40) hours being five (5) consecutive days of eight (8) hours.

SECTION 3

WORKING SCHEDULE STIPULATIONS

A stated hour for reporting for work, and a stated schedule of working time shall be given each employee, and except in cases of emergency, forty-eight (48) hours' notice of any change in such schedule shall be given to him, except where employees request and it is agreed to schedule two (2) shifts in one day (department payroll day) in order for the employee to obtain more consecutive or convenient time off. Each employee shall keep the Company informed in regard to changes in his address or telephone number. Address changes shall be reported to the Union Recording Secretary in writing by the Company. If for good cause an employee is unable to report for work, reasonable notice of such fact should be given to the Company.

An employee will not be required to work outside his report area zone except as outlined in Article V, Sections 13 and 14.

SECTION 4

CALL-IN DEFINITIONS AND STIPULATIONS

RECALL TO WORK

A recall to work occurs during non-scheduled hours when an employee is called back to work and is released before his next scheduled hours.

EARLY CALL IN

An early call in occurs when an employee is called in before his regularly scheduled shift and continues working into that shift.

TRAVEL TIME

Travel time is one (1) hour's pay, allowed to cover time coming to and going from work, and applies only to "Recall to Work". One-half (1/2) hour's pay will be paid as travel time on an "Early Call In".

STIPULATIONS

RECALL TO WORK

If an employee is "Recalled to Work" during non-scheduled hours, such work time plus an allowance of one hour for travel time shall be overtime. In no such case shall this total be less than five (5) hours. For Mark-Outs in no such case shall this total be less than (4) four hours.

EARLY CALL IN

"Early Call In" will be paid for at overtime rates for time worked prior to regular starting time.

SECTION 5

OVERTIME STIPULATIONS

1. An employee shall be credited with overtime for all work in excess of eight (8) hours worked in any one (1) day except where employees request and it is agreed to schedule two (2) shifts in one day (departmental payroll day) in order for the employee to obtain more consecutive or convenient time off, or in excess of forty (40) hours worked in any one (1) payroll week at one and one-half times his base wage rate.

2. Employees covered by this Agreement shall receive pay at time and one-half their base wage rate for all work that does not occur within their regularly scheduled work day or work week (except whenever the opportunity is offered employees to make up their forty (40) hour week, after having lost work due to conditions beyond the Company's control, such time shall be paid for at the straight time rate).

This paragraph shall not be construed to change in any way the present holiday, sick pay policy or equalization of overtime policy.

3. An hourly paid employee who may be required to report to work at regular starting time is to be allowed a minimum of four (4) hours pay when, in the Company's opinion, conditions prevent work being performed.

4. It is agreed to continue the present policy on posting lists for the equalization of overtime.

5. The following will apply for off-hours call outs of Maintenance, Meter Services and Instrumentation and Regulation personnel.

   The Company will make two attempts to reach the individuals necessary to respond to a call out by area.

   If the number of individuals required for Distribution call outs is not reached by using the area call out list, the Company will make one attempt to reach the individuals required by utilizing the call out list from the report area in that region:

Region 1	Somerville, Hyde Park
Region 2	Southborough, Worcester

   The existing practice of calling qualified individuals from other Instrumentation and Regulation report areas will continue.

   Individuals called from these lists will report directly to the location or the report area as directed by the supervisor.

If unable to obtain the required number of people, supervisory and/or contractor personnel will be utilized.

The past practice regarding call outs for specialized personnel will continue.

Affected personnel will indicate at the beginning of each workday their availability to work continuous overtime and their availability for off-hours call outs.

SECTION 6

HOLIDAY STIPULATIONS

1. The following days shall be recognized as holidays on the day on which they are observed: New Year's, Martin Luther King Day (can be substituted for a Floating Holiday), Washington's, Memorial Day, Floating Holiday, Independence Day, Labor Day, Columbus Day, Veteran's Day, Thanksgiving Day and Christmas*.

   Bunker Hill Day will be replaced with a Floating Holiday, which must be selected and approved prior to November 1, in the year for which it applies. For those wishing to substitute Martin Luther King Day for a Floating Holiday must make that selection by November 1st of the preceding year. Subject to operational needs, the Company will attempt to accommodate the employee's request. Employees shall not receive both sick pay and holiday pay on any normally scheduled workday.

   If any employee is required to work on a floating holiday which had been scheduled and approved, said employee will have the option of being paid according to Article V, Section 6 or paid at straight time and reschedule the floating holiday.

   If the holiday cannot be rescheduled within the year for which it applies, the employee must schedule it within sixty (60) days from the first day of the following year or it will be forfeited.

2. If an employee is not required to work on the holiday, said employee shall be paid a holiday allowance equivalent to eight (8) hours pay at his regular base rate of pay.

3. a) If an employee is required to work on a holiday, he shall receive time and one-half for the first eight (8) scheduled hours worked, plus holiday allowance as set out above. For all hours worked in excess of eight (8) hours he shall receive pay at the rate of two and one-half times his regular base rate of pay.

   b) In a week in which one of the holidays listed in 1. above is observed, if prior to the holiday it was understood that the employee would not be required to work on such holiday but he is notified on the holiday that work will be required that day, he will be paid a minimum of five (5) hours, at the applicable rate provided in paragraph (a) above, for his work on such holiday, plus the Holiday Allowance referred to in paragraph 2.

   c) If an employee is required to work on Christmas Day, he shall receive double time (2) for the first eight (8) scheduled hours worked, plus holiday allowance as set out above. For all hours worked in excess of eight (8) hours, he shall receive pay at the rate of two and one-half times his regular base rate of pay.

   d) In the event of a call into work on Christmas Day, the employee will be paid two (2) times their hourly rate for all hours worked.

   * If the Company observes Christmas on the day before or the day after December 25th, employees who work on the observed day will receive regular overtime rate of one and one-half (1 ½) .

4. With the exception of employees on Union business, no employee covered under this Agreement shall be eligible for any holiday allowance as set forth above if such employee is not receiving pay for the payroll week in which the holiday occurs.

5. Any holiday as set forth in this contract which falls on a Saturday will be observed on the preceding Friday.

6. Nothing in this contract shall be construed to provide for the pyramiding of overtime or premium pay.

SECTION 7

SUNDAY PREMIUM STIPULATION

A premium of 35% will apply to all regularly scheduled hours of work on scheduled shifts, the major portion of which shifts fall between 12 Midnight Saturday and 12 Midnight Sunday. This premium applies to basic hourly wage rates only, it being understood that the payment of such premium is limited to straight time worked.

SECTION 8

SHIFT DIFFERENTIAL

1. Shift differential or premium pay shall be in addition to the affected job classification base rates and shall be payable for regularly scheduled rotating shift jobs whenever and for such periods, other than "day" shift, as scheduled and shall be figured at the rate of one dollar and seventy-five cents ($1.85) per hours worked during "afternoon" shift and one dollar and seventy-five cents ($1.85) per hours worked during "night" shift. Effective April 1, 2018, the one dollar and seventy-five ($1.85) per hour shall be increased to one dollar and ninety-five cents ($1.95). Effective April 1, 2019, the one dollar and ninety-five cents ($1.95) per hour shall be increased to two dollars and five cents ($2.05).

2. Such pay shall not apply under the following policies: sickness, accident, vacation, holiday, leave of absence.

3. "Day", "afternoon", and "night" shifts shall be defined as follows:

   (a) "Day" shifts shall include all shifts scheduled to start between 7:00 a.m. and 9:00 a.m.

   (b) "Afternoon" shifts shall include all shifts scheduled to start between 12:00 p.m. and 5:00 p.m.

   (c) "Night" shifts shall include all shifts scheduled to start between 10:00 p.m. and 12:00 a.m.

   (d) Classifications required to work shifts will be defined in Appendix C and Appendix J.

4. If an employee is not entitled to a shift differential during his REGULARLY SCHEDULED hours, he will not receive a shift differential during overtime hours.

5. If an employee works into a shift preceding or succeeding his regularly scheduled shift, he will carry the premium or shift differential (if any) which corresponds with his regularly scheduled shift. This premium or shift differential (if payable) shall on overtime hours be multiplied by one and one-half. The past practice regarding shift differential on overtime worked on days of relief will continue.

6. SHIFT ASSIGNMENTS

   Seniority within the department roster will be the determining factor in the assignment of shifts. The junior individuals will be required to work the shifts not volunteered for by the senior individuals. All voluntary shifts will be on a permanent basis. An individual who volunteers to work a permanent shift will only be permitted to change said shift if another individual volunteers to take that shift on a permanent basis after posting within the affected department report area, or it shall be assigned to an individual who was not in the roster at the time it was accepted on a permanent basis.

SECTION 9

PAYMENT FOR WORKING SECOND DAY OF RELIEF

An employee who is required to work on the 2nd day of relief in any consecutive 7-day period and having worked one hour of his 1st day of relief and all of his scheduled hours during such period shall be paid double time his regular base rate of pay for hours worked on said 2nd day of relief. An employee who has earned premium in accordance with this provision will not be entitled to another such premium until he has again qualified for it, on the basis of work performed in another 7-day period.

SECTION 10

MEAL STIPULATIONS

If an employee is required to work ten (10) consecutive hours or more, he shall receive a meal reimbursement not to exceed eight dollars and fifty cents ($9.00). If the employee continues working beyond the tenth hour, he shall receive an additional meal reimbursement not to exceed eight dollars and fifty cents ($9.00) to be paid for each additional four (4) hours of continuous overtime work thereafter. Effective April 1, 2018 the nine dollars ($9.00) will be increased to nine dollars and twenty-five cents ($9.25). Effective April 1, 2019, the nine dollars and twenty-five cents ($9.25) will be increased to nine dollars and fifty cents ($9.50).

If an employee is recalled to work and is required to work four (4) or more hours, he shall receive a meal reimbursement not to exceed nine dollars ($9.00), except that effective April 1, 2018, the meal reimbursement will be increased to nine dollars and twenty-five cents ($9.25) and effective April 1, 2014 the meal reimbursement will be increased to nine dollars and fifty cents ($9.50).

It is agreed that this section does not apply where employees work overtime through courtesy to fellow employees.

SECTION 11

REST PERIOD STIPULATIONS

If an employee is required to work sixteen or more consecutive hours, he will be allowed a period of nine hours off before returning to work unless an emergency arises which makes it necessary for the Company to call him back to work before the expiration of the nine-hour period. Any part of the nine-hour period, which extends into the employee's normal work schedule will be paid for at basic straight time rates. If such paid time shall carry him to within two (2) hours of the end of his normal work schedule, he shall be excused without loss of pay from his normal work schedule. Time allowed off for meals will not prevent the hours worked from being considered consecutive.

If an employee continues to work for more than twenty-four (24) consecutive hours, he will receive the appropriate overtime rate for all consecutive hours worked after his original shift.

SECTION 12

RATE OF PAY WHEN ASSIGNED TO ANOTHER JOB CLASSIFICATION

Employees assigned temporarily to a higher rated job for periods of three (3) hours or less but more than one-half (1/2) hour shall receive the higher rate of pay for actual time worked on the higher rated job that day. Such time shall be calculated on a cumulative basis.

Employees assigned temporarily to a higher rated job for periods of more than three (3) hours shall receive the higher rate of pay for all straight time worked that day.

Employees temporarily assigned to a lower rated position shall retain their regular rate of pay.

Selection of employee to be transferred shall be in accordance with Article IV, Section 2, Promotions and Vacancies.

SECTION 13

EMERGENCY WORK PREMIUM

When an employee is assigned to work outside his normal report area for a period of more than 24 continuous hours, including travel time, the method of payment will be as follows:

a) The employee so assigned will be paid for working time at the applicable overtime rate, and for rest time at their regular straight time rate.

b) The Rest Period Policy will not apply during this emergency work when employees are being paid under (a), but every effort will be made to give employees adequate rest time.

c) If a holiday occurs during this assignment, working time shall be paid for at the applicable holiday rate and rest time at the regular straight time rate.

d) When the assignment is completed, and the employees have returned to their own Report Area, the normal method of payment and rest time procedures will be in effect.

e) Employees covered by this Agreement, in like classifications, in the areas to which outside crews have been assigned in excess of 24 continuous hours, will be paid according to the same premium method as the assigned crews covered by this Agreement. The rest period application will be the same beginning at the time the first outside crew arrives in the area and continuing until outside crews have left the area when the normal method of payment and rest procedures will be in effect.

f) If employees in other classifications are assigned and become working participants in the area of the service interruption for a period in excess of 24 continuous hours including rest time, the above provisions will apply.

g) Employees once assigned under the above conditions will not be reassigned to circumvent this Agreement.

SECTION 14

ASSIGNMENT OUTSIDE REGULAR REPORT AREA

When an employee is required to work outside his normal report area, at the start of the day, the following will apply

a) Without forty-eight (48) hours' notice, the employee has the option of reporting directly to his re-assigned location or his normal report area. Should an employee choose to report to his normal report area, he will be transported by the Company to and from the re-assigned location. In no case will an employee be required to travel on his own time or provide his own transportation on such an assignment. If an employee elects to report directly to his re-assigned location, he will be compensated in accordance with paragraph b) outlined below.

b) With forty-eight (48) hours' notice, the employee may be required to report directly to his re-assigned location. If such is the case, the employee will be required to travel on his own time and provide his own transportation. An employee will receive an allowance equal to one (1) hour of his straight time base rate for each way of the required travel.

c) The Company will solicit for volunteers based on Company seniority. In the event there are no volunteers, the qualified junior employee will be assigned.

d) Distribution Support Technician – Assigned Outside Regular Repot Area shall only apply when employees move East to West or West to East.

SECTION 15

RETROGRESSION PAY PLAN

Where an employee of ten years or more of continuous service, because of disability, is or becomes unable to continue to perform assigned duties based on classification as of the date of disability, the rights of such employee and the obligations of the Company under such circumstances shall be determined in accordance with memorandum entitled "Disability Retrogression Pay Plan" which memorandum of said "Disability Retrogression Pay Plan" marked Appendix B is hereby incorporated by reference in this Agreement.

SECTION 16

EFFECT OF LAW ON OVERTIME PROVISIONS

All overtime provisions are subject to modification by the Company in the event of changes in Federal or State laws whether by statute or decision.

ARTICLE VI

SECTION 1

VACATION STIPULATIONS

All regular employees shall receive two (2) weeks vacation with pay in the calendar year provided their continuous regular employment preceded January 1st of the current vacation year, otherwise employees hired July 1 through December 31 are entitled to five (5) days vacation after becoming regular; employees hired after January 1 would receive one day of vacation, after becoming regular, for each full month of service through June 30th.

Month of Employment	Number of Vacation Days Employee is Eligible for Once Becoming Regular
July	5
August	5
September	5
October	5
November	5
December	5
January	5
February	4
March	3
April	2
May	1
June	0

Rate of compensation will be based on scheduled work week of each employee (calculated at the equivalent straight time rate) where employee is eligible for full two (2) weeks vacation.

On partial vacations where employees have less than two (2) weeks vacation, the rate of compensation will be based on scheduled work day (calculated at the equivalent straight time rate).

Effective January 1, 1981 the rate of compensation for one week's vacation pay will be based on the prior year W-2 earnings divided by the number of pay periods in the year, or 40 hours at the basic straight time rate in effect at the time of the vacation, whichever is higher. (On one-day vacations the weekly figure based on W-2 earnings will be multiplied by 1/5).

Each regular full-time employee who on the anniversary date of his last employment has been continuously in the employ of the Company five (5) or more years, ten (10) or more years, twenty (20) or more years or thirty (30) or more years, shall have a total vacation with pay equivalent to three (3) weeks of 40 hours each at straight time wage rates for the five (5) years service employee, four (4) weeks on a similar basis for the ten (10) year service employee, five (5) weeks on a similar basis for the twenty (20) year service employee, or six (6) weeks on a similar basis for the thirty (30) or more year service employee.

In addition to the above, each regular full-time employee who on the anniversary date of his last employment has been continuously in the employ of the company twenty-six (26) through twenty-nine (29) years shall receive additional vacation days as follows:

26 years	1 day
27 years	2 days
28 years	3 days
29 years	4 days

The third, fourth, fifth or sixth week, and twenty-six through twenty-nine days of vacation, as the case may be, will be available to such employee only on or after the above-mentioned respective anniversary date is to be completed within that calendar year by either time off or equivalent pay.

Employees will be allowed to carry over one (1) week vacation. Employees must notify Company by April 1st if they intend to carry over a week and it must be taken by December 1st of the following year. Employees will receive pay in lieu of if unable to take carry-over week in this time frame.

Employees required to work during their assigned vacation shall receive, in addition to their vacation pay, time and one-half their base rate of pay for all time worked. Vacation time worked and paid for under this clause will not be rescheduled.

Vacations will be granted according to schedules approved by the Company.

In choosing vacations within a department roster Company seniority shall govern.

In the event of a holiday falling within a vacation period, an employee shall have the option of receiving pay for the holiday in addition to his regular vacation pay or be given an additional day off with pay.

In the event that an employee becomes ill while on vacation, such time will not be considered vacation time but fall under Sick Pay Benefits if a doctor's certificate is presented.

Vacation payment of wages will be paid in advance unless otherwise notified by the employee.

The past practice on the scheduling of vacations will continue.

In the Somerville Report Area Gas Services Department - vacations will be granted according to Section 9 of the Memorandum of Agreement dated March 8, 1984.

VACATION STIPULATIONS FOR EMPLOYEES HIRED AFTER April 1, 2017

Added for employees hired after April 1, 2017 and optional for employees with less than five (5) years of service as of April 1, 2017:

Years of Service	Vacation Entitlement
Less than one year of service:	
Start date January 1 - March 31	15 days
Start date April 1 - June 30	10 days
Start date July 1 - September 30	5 days
Start date October 1 - December 31	No vacation days
One year but less than 10 years	15 days per year
10 years but less than 20 years	20 days per year
20 years or more	25 days per year

TERMINATION AND RETIREMENT

a) Each Regular employee whose service is terminated prior to receiving the current year's vacation shall receive pay for one forty-hour week at his regular rate of pay plus one day's pay at his regular rate of pay for each month of service prior to January 1, but not to exceed a total of ten working days.

b) Each Regular employee whose service is terminated as above and who has had five or more years of continuous service shall receive pay for one normal work week in addition to that provided for in the preceding paragraph.

c) Each Regular employee whose service is terminated as above and who has had ten or more years of continuous service shall receive pay for one forty-hour week in addition to that provided for in a) and b).

d) Each Regular employee whose service is terminated as above and who has had twenty or more years of continuous service shall receive pay for one forty-hour week in addition to that provided for in a), b), and c).

e) Each Regular employee whose service is terminated as above and who has had thirty or more years of continuous service shall receive pay for one forty-hour week in addition to that provided for in a), b), c) and d).

f) In addition to the above, each Regular employee whose service is terminated as above and who has had twenty-six (26) through twenty-nine (29) years of continuous service shall receive pay for additional days as follows:

26 years	1 day
27 years	2 days
28 years	3 days
29 years	4 days

g) Termination for the purpose of a), b), c), d), e) and f) shall include retirement, death and any other termination of service.

h) For retirement purposes, any vacation allowable under this policy in the calendar year of retirement may be taken as paid time off or cash on retirement at employee's option.

Effective January 1, 1981 the rate of compensation for one week's vacation pay will be based on the prior year W-2 earnings divided by the number of pay periods in the year, or 40 hours at the basic straight time rate in effect at the time of the vacation, whichever is higher. (On one-day vacations the weekly figure based on W-2 earnings will be multiplied by 1/5).

SECTION 2- EMPLOYEE BENEFITS

NSTAR Savings Plan

Eligible employees may participate in the NSTAR Savings Plan which is incorporated herein, and which will continue in effect according to the terms of the Plan, so long as this Agreement shall be in effect.

NSTAR Pension Plan

Eligible employees will participate in the NSTAR Pension Plan which is incorporated herein and which will continue in effect according to the terms of the Plan, so long as this Agreement shall be in effect. . Benefits for eligible employees will be determined under the terms and conditions outlined in the Plan document entitled "Pension Plan for Employees of Commonwealth Energy System and Subsidiary Companies" and eligible employees hired after March 31, 2006 will be entitled to new hire Pension Equity Plan provisions as described in the Plan.

Group Insurance

Eligible employees will be covered under NSTAR's Basic Group Life Plan, Accidental Death and Dismemberment Plan and Business Travel Accident Plan as are listed in the Group Welfare Benefits Plan for employees of NSTAR, which will continue in effect according to the terms of the Plan, so long as this Agreement shall be in effect. Eligible employees, and their eligible dependents, may participate in NSTAR's Supplemental Life Plan, Dependent Life Plan, and Personal and Family Accident Plan as are listed in the Group Welfare Benefits Plan for employees of NSTAR, which will continue in effect according to the terms of the Plan so long as this Agreement shall be in effect.

Health Plans

Eligible employees, and their eligible dependents, may participate in NSTAR's Medical, Prescription Drug, Vision and Dental Plans as are listed in the Group Welfare Benefits Plan for employees of NSTAR, which will continue in effect according to the terms of the Plan, so long as this Agreement shall be in effect.

Affordable Care Act Re-Opener Language

The parties agree to monitor the impact of the Excise Tax on High Cost Health Plans under the ACA (the "Excise Tax") and work collaboratively to overturn or otherwise mitigate the adverse impacts of ACA and the Excise Tax on Eversource. The parties agree to a limited re-opener which can be invoked by the Company if it makes the reasonable assumption based on regulatory guidance that it will be exposed to the Tax. The re-opener negotiations will be for the sole purpose of:

- Working together to design and implement options to the existing health insurance coverage for employees represented by USW Local 12004 (includes health plans such as medical, prescription drug, dental, vision, HSA, FSA, and other plans that may be subject to the Excise Tax) by making changes to existing plans, adopting a full replacement health plan or such other changes as the parties may agree are necessary to avoid or mitigate the Excise Tax; and
- Revisiting and potentially adjusting the cost borne by the Company and the employees including but not limited to payroll contributions, benefit levels or other forms of compensation.

If, at any time if after the parties have concluded re-opener negotiations and before December 31, 2019 the Company is relieved of the burden of the Excise Tax , then (absent any other negotiated result) the parties shall revert to the status quo preceding the agreements reached in the reopener.

During re-opener negotiations, the provisions of Article II, Section 1, Union Agreement on Continuity of Work and Company Agreement on No Lockout, of the collective bargaining agreement shall not apply and shall not limit the parties' respective rights under law. All disputes between the parties unrelated to the re-opener subjects will remain subject to the dispute resolution process contained in Article III, Section 2, during any period of re-opener negotiations.

Section 125 Plans

Eligible employees may participate in NSTAR's Dependent Care Plan, Flexible Spending Account and Health Savings Accounts, as are listed in the Group Welfare Benefits Plan for employees of NSTAR, which will continue in effect according to the terms of the Plan, so long as this Agreement shall be in effect.

Other Benefit Plans

Eligible employees may receive Employee Assistance, Adoption Assistance and Education Benefits. The provisions of these benefits are summarized in the "Other Benefits" section of NSTAR's Spectrum of Benefits binder and are incorporated by reference herein.

SICK AND ACCIDENT PLAN

Sick and Accident Benefits will be in accordance with Appendix D.

The Company reserves the right to provide the same benefits under another plan(s) or provider(s) if it so desires regarding those benefits described in Section 2.

ARTICLE VII

PAYROLL DUES DEDUCTION

The Company agrees to deduct weekly from earned wages, dues, and initiation fees, each as designated by the International Treasurer of the Union on the basis of and for the term of individually signed voluntary check-off authorization cards heretofore and hereafter submitted to the Company.

The Company shall promptly remit once a month any and all amounts that are deducted to the International Treasurer of the Union, 5 Gateway Center, Pittsburgh, Pennsylvania 15222.

The Union shall indemnify and save the Company harmless against any and all claims, demands, suits or other forms of liability that may arise out of or by reason of action taken by the Company with regard to this Article.

ARTICLE VIII

NON-DISCRIMINATION

Neither the Company nor the Union will discriminate or harass any employee because of such employee's race, color, religion, national origin, sex, age, disability, gender identity, sexual orientation, genetic information, ancestry, veteran status, or military service, or any other basis protected from discrimination under state or federal law.

ARTICLE IX

DURATION OF AGREEMENT

This agreement shall continue in full force and effect until midnight March 31, 2020.

During the term of this Agreement should any provision or part thereof become illegal, the rest of the Agreement will continue in full force and effect.

This Agreement shall bind and inure to the benefit of the parties hereto and to their respective successors and assigns:

and the words "COMPANY" and "UNION" respectively shall be construed to include their respective successors and assigns.

SIGNATURES TO AGREEMENT

IN WITNESS WHEREOF the parties hereto have caused this Agreement to be signed and their seals to be hereto affixed by their duly authorized officers, the day and year first above written.

UNITED STEELWORKERS, AFL-CIO-CLC

APPENDIX A

NSTAR ELECTRIC & GAS CORPORATION

LOCAL UNION NO. 12004

SCHEDULE OF WAGES AND PROGRESSION

The basic wage rates of all employees covered by this Agreement shall be in effect as of April 1, 2017 as indicated by the base hourly rates listed below.
Effective April 1, 2017, the basic wage rates of all employees covered by this Agreement shall be increased three (%3.00) percent adjusted to the nearest whole cent.
Effective April 1, 2018 the basic wage rates of all employees covered by this Agreement shall be increased two and three quarters and a quarter (%2.75) percent adjusted to the nearest whole cent.
Effective April 1, 2019 the basic wage rates of all employees covered by this Agreement shall be increased two and three quarters (%2.50) percent adjusted to the nearest whole cent.

The policies in regard to promotions, wages and step increases as applied to all employees and job classifications covered by this Contract by and between NSTAR Electric & Gas Corporation and the United Steelworkers, AFL-CIO-CLC in behalf of Local Union No. 12004, United Steelworkers, AFL-CIO-CLC are shown on subsequent pages.

GENERAL CONSIDERATIONS

Promotions or step increases will occur on a time progression basis subject to the following requirements, duties and accomplishments:

a) Supervisors will make every effort to train employees and the employees are to cooperate in the training program, so that they may be qualified for promotion or for step increases on the dates as later scheduled.

b) Any employee with two (2) years of service as a regular employee who qualifies in a job where the progression is from "Trainee" to an "A" rate will be paid the "C" rate but will be classified as a Trainee and follow the progression as outlined on the subsequent pages.

c) Prior to time of scheduled progression of employee, his record will be reviewed to determine if his progress and qualifications are satisfactory to warrant the progression in and to the job classifications as generally but not exclusively set forth in the attached job descriptions. If it is determined that the employee's progress and qualifications are not satisfactory to warrant progression, he shall remain in his present step and be eligible for review after three (3) months have elapsed.

d) If an employee in any department fails to pass a promotional exam in any progression step, he will remain in his present step and will be eligible to retake the exam after three (3) months have elapsed.

e) Employees who previously attained the "A" rate in a classification where the progression is from "Trainee" to "A", and who have not been in subject classification for five (5) years or longer, will, upon re-entering subject classification, be paid the "B" rate and following forty-five (45) "worked" days become eligible for the "A" rate.

f) All promotional exams in any progression step will be given within ten (10) "worked" days of the employees' eligibility date. Failure in giving the progression exam within the ten (10) "worked" days period will result in that employee progressing to the next step in rate. Exceptions to the above time limits must be mutually agreed.

g) At the end of the 1st six months of employment, which will be a test and probationary period, and if the Company upon review has designated the employee to become a regular employee, he will be classified in the suitable classification and rate as negotiated with the Union.

EFFECTIVE APRIL 01, 2017

WAGE AND STEP INCREASE POLICY IS AS FOLLOWS:

APPENDIX B

MEMORANDUM REGARDING

DISABILITY RETROGRESSION PAY PLAN

I NON-COMPENSABLE DISABILITY

In the event an employee becomes unable to perform his normal duties because of a disability for which he is not receiving Workers' Compensation benefits, and if the Company is able to provide him with work which he is capable of performing, he will be assigned to such work. His ADJUSTED pay rate shall be determined by the PLAN shown below.

(A) FUTURE RETROGRESSIONS

1. Less than ten full years of continuous service at time of retrogression.

   a) An employee with less than ten full years of continuous service with the Company at the time of retrogression shall receive the ultimate base rate of his new job classification.

   b) The new rate shall become effective at the time of such retrogression.

2. Ten full years or more of continuous service at time of retrogression.

   An employee with ten full years or more of continuous service with the Company at the time of retrogression shall receive no reduction in his basic rate of pay.

II COMPENSABLE DISABILITY

In the event an employee becomes unable to perform his normal duties because of a disability for which he is receiving Workmen's Compensation benefits, and if the Company is able to provide him with work which he is capable of performing, he will be assigned to such work. His pay rate shall be determined as set forth above, except that the following shall apply:

(a) If, at the time of retrogression, the employee is receiving compensation for partial disability, the Company will pay such amounts so that the employee's total compensation from the Company and from such Disability Benefits will equal the new (as determined by I (A) above) pay rate.

(b) The date the employee commences work at his lower classification shall be considered as the date of retrogression.

III GENERAL PROVISIONS APPLICABLE TO I AND II ABOVE

a) In all computations, only FULL YEARS of service shall be used.

b) An employee with ten or more full years of continuous service shall hold the title of his new job classification with the word "SPECIAL" appended thereto.

c) The Medical Representative of the Company in all cases shall consult with such employee's family physician and in the event of disagreement as to the employee's condition and/or ability to perform the work of any particular class, the case shall be referred to a recognized specialist or clinic in the field of medicine involved, whose opinion will be final and binding upon all parties.

d) No change in GROUP INSURANCE shall result from such retrogression.

e) An employee transferred to a lower classification under this PLAN shall be assigned without posting the job.

f) Reference to continuous service in the Company shall include service with other subsidiary companies of the same System.

g) If an employee who is being compensated under the provisions of this PLAN is again transferred to one or more lower classifications, his new rate shall be as if the employee had been transferred to such lower classification initially, using all factors applicable at the time of the first retrogression. The resultant rate shall reflect all wage adjustments, which were made in such lower classification since the date of initial retrogression.

h) The Company, may in its discretion, withhold the provisions of this PLAN for employees who also engage in work for other than the Company or its affiliates.

APPENDIX C

CLASSIFICATION QUALIFICATIONS AND SPECIFIC CONDITIONS

JOB DUTIES

See Job Postings for job duties as presented and agreed upon.

SCHEDULE OF HOURS AND SCHEDULE

See Appendix J.

FACILITIES DEPARTMENT

The Company and the Union agree to form a sub-committee to meet and discuss the current and future Buildings and Grounds manpower.

QUALIFICATIONS TO ENTER THE ROSTER FOR MAINTENANCE PERSON

1. Be physically fit.
2. Possess a valid Massachusetts Driver's License.
3. Pass the Bennett Test with a raw score of 24.

QUALIFICATIONS TO ENTER THE ROSTER FOR BUILDINGS MAINTENANCE MECHANIC

1. Must be able to perform moderate physical work in all types of weather and emergency conditions.
2. Possess a valid Massachusetts Driver's License.
3. Pass the Bennett Test with a raw score of 24.
4. Must have a minimum of five (5) years industrial experience in facilities related positions. This shall include troubleshooting HVAC systems and other mechanical systems pertaining to operating and maintaining large industrial buildings. Performs other non-mechanical work within the department as required.
5. Must possess and maintain a certificate in Basic Refrigeration.
6. Must obtain within eighteen (18) months of being awarded the position of Buildings Maintenance Mechanic, a certification/diploma for Refrigeration System Repair (HVAC Refrigeration) and be EPA certified in the recovery and charging of refrigeration gases.

QUALIFICATIONS TO ENTER THE ROSTER FOR BUILDINGS MAINTENANCE ELECTRICIAN

1. Must be able to perform moderate physical work in all types of weather and emergency conditions.
2. Possess a valid Massachusetts Driver's License.
3. Pass a Bennett Test with a raw score of 24.
4. Must have a minimum of five (5) years industrial experience in facilities related positions. This shall include troubleshooting, repairs and installation work of moderate scope of lighting, electrical, communications, data and electromechanical systems and control circuits associated with building power systems, HVAC systems and other control systems. Performs other non-electrical work within the department as required.
5. Must possess and maintain a Massachusetts Journeyman Electrician's License.

QUALIFICATIONS TO ENTER THE ROSTER FOR CLERK.

1. Be Physically fit.
2. Pass job related tests.
3. The Plan call for Clerks to do any job in their respective departments and any Clerk in any department may be temporarily assigned to help out in another department during vacations, meal periods, rest periods, illness and other reasonable absences within their report area.

MAINTENANCE DEPARTMENT

QUALIFICATIONS TO ENTER THE ROSTER

DISTRIBUTION MECHANIC

1. Be physically fit.

2. Hold a valid Class-A Massachusetts Commercial Driver's License or be willing to train and qualify for it after assignment to the classification.

3. Pass the Bennett Test with a raw score of 24.

4. Pass pre-qualification test administered by the training department.

5. Hold a valid hoisting license or be willing to train and qualify for it after assignment to the classifications.

6. If the applicant has prior experience in Construction or Maintenance the company may start the employee at the Mechanic C rate.

   Examples of prior experience:
   1) Minimum of 1-year experience in gas facility installation or maintenance
   2) Minimum of 1-year experience in utility installation or maintenance
   3) Valid CDL license
   4) Be operator qualified and or pipe joining qualified
   5) General construction background including excavation

EXAMS

Exams will be required between all progression steps in the Distribution Mechanic classification. These exams will be job-related and be given orally, written and/or by field demonstration to determine the individual's ability to perform the work. Said exams will contain only subject matter on which the individual has been trained. A score of at least 70% is required to progress to the next step. If the employee does not obtain a test score of 70%, the employee will not advance to the next step. The employee will not be eligible to retake another qualifying exam for a period of three months. It is understood that the content of the exam will be mutually agreed upon by the Company and the Union. During the administration of these exams a designated Union representative will be present.

QUALIFICATIONS TO ENTER THE ROSTER
WELDER/DISTRIBUTION MECHANIC

1. Be physically fit.
2. Hold a valid Class A Massachusetts Commercial Driver's License, or be willing to train and qualify for it after assignment to the classification.
3. Pass the Bennett Test with a raw score of 24.
4. Pass pre-qualification test administered by the training department.
5. If the applicant has prior Construction or Maintenance experience the company may start the employee at the Mechanic C rate.
6. Hold qualifications according to the latest edition of API 1104, Section 3, Standard for Welding Pipelines and Related Facilities or be willing to train and qualify for it after assignment to the classification.

WELDER

An applicant who has not held the Distribution Mechanic's classification will progress through the skill progression steps as outlined. In order to progress to the A rate of Welder, an individual must have at least 12 months in progression as a

Distribution or Construction Mechanic plus 18 months in the Distribution Mechanic's or Welder/Distribution Mechanic's classification, but in no case, will the total be less than 30 months, or be certified for multiple qualifications according to the latest edition of API 1104, Section 3, Standard for Welding Pipelines and Related Facilities. Once certified, a Welder must maintain the certification either by having one weld satisfactorily X-Ray inspected once every 6 months or by recertifying according to Section 3 of API 1104 once every 12 months. It is understood that these standards are subject to change mandated by Regulatory requirements.

MEMORANDUM OF AGREEMENT
WELDER TRAINING

In accordance with the provisions of the principal agreement between the parties dated April 1, 2013 and without waiving or modifying the rights of either party contained therein, except as specifically provided herein, the Company and the Local agree as follows:

The parties have agreed to provide on the clock training for successful bidders of the welder classification. The training will be uninterrupted with the exception of "B" and "C" school training for four weeks each. The Welder Training Coordinator will provide and oversee the training and an external qualified welding instructor will supplement the training and evaluate the trainees' progress towards securing the welding certification.

Training will be provided in the welding shop. After 16 weeks (4 months) of training, the trainee will be evaluated by the qualified instructor and the Training Coordinator to determine readiness to pass the API 1104 Pipe Welding Certification. Determination will be made by mutual agreement between the two. If the trainee takes the test and fails or if it is determined that the trainee is not prepared to pass the welding test, he/she will be afforded 12 additional weeks (3 months) of in shop training. At the conclusion of the 12 additional weeks of training, the trainee will be given the API 1104 Pipe Welding Certification test.

If the trainee obtains the API 1104 Certification, he/she must then pass all OJT (On the Job Training Addendum Attached) modules within 20 weeks (6 months) of obtaining the certification. Employees will be eligible to attend applicable continuing education courses to enhance his/her studies and reimbursement will be handled according to the current contract language.

If a trainee fails the test or the OJT, he/she will return to their previous position in Gas Operations. If that position was is another department other than Gas Operations, he/she will be placed in a position in Gas Operations.

_____ _____
NSTAR USW, Local 12004

_____
DATE

Welder OJT's

1. Demonstrate how to set up a welding machine
2. Demonstrate how to set up and safely use oxyfuel metal cutting torch
3. Learn the type and classification of welding rods and how they apply to pipe welding
4. Basic Arc welding procedures including cleaning/grinding operations
5. Weld stringers on flat plate develop weave and overlap
6. Horizontal fillet weld (2F position)
7. Vertical fillet weld (3F position)
8. Overhead fillet weld (4F position)
9. Learn to align and clamp the pipe in place and gap before tacking
10. Weld stringer beads on the outside of a pipe vertical up and down 6" or larger
11. Learn to weld pipe in a flat (1G-rotated position)
12. Learn to weld pipe in a horizontal (2G position)
13. Learn to weld pipe in a multiple (5G position)
14. Learn to weld pipe in a multiple inclined (6G position)
15. Learn to cut and fit 12" tee for weld test
16. Demonstrate how to cut and bevel with a torch
17. Demonstrate how to use a grinder including to bevel pipe with it
18. Learn to cut pipe with a bench chop saw
19. Learn to cut and bevel pipe utilizing the beveling tool
20. Learn and understand welding terms
21. Lear to show proficiency in utilizing tools for the welding trade TBD

WELDER TRAINING COORDINATOR

The Company agrees to establish two (2) Distribution Welder Technician Training Coordinators, to be determined by department seniority. One (1) will be assigned to the West Division and one (1) will be assigned to the East Division. The Distribution Welder Technician Training Coordinators will be paid seven percent (7%) above the current rate of pay when engaged in training, certifying and recertification of welders.

BACKHOE OPERATOR

An applicant who is in the Distribution Mechanic's classification will be inserted into the Backhoe Operator progression step equal to his Distribution Mechanic's progression as a Backhoe Operator "B", but in no case will the rate be less than he is presently receiving. Hold a valid Class A Massachusetts Commercial Driver's License, or be willing to train and qualify for it after assignment to the classification. In order to progress to the "A" rate of Backhoe Operator, an individual must have at least thirty-six (36) months in the progression as a Backhoe Operator or in the Distribution Mechanic's classification, and have a minimum of One Hundred and Sixty (160) hours of training as a Backhoe Operator, and hold a valid Massachusetts Department of Public Safety Hoisting machinery License for Gas and Diesel Front-End Loader with Backhoe attachment, a valid Class A Massachusetts Commercial Driver's License and qualify as a Distribution Mechanic "A".

BACKHOE OPERATOR – SPARE

The holders of the Spare classification will work and be paid in their regular Distribution Mechanic classification except when assigned as a Backhoe Operator, at which time they will receive the rate of the Backhoe Operator classification for which they qualify. Vacancy in the Backhoe Operator classification will be awarded from the Backhoe Operator Spare list before other regular employees within the department. Outside roster applicants will enter the Distribution Mechanic's classification and progress accordingly; however, they will be paid as above when operating the Backhoe.
All Maintenance Distribution employees will have the option of backhoe training to obtain a Public Safety Hoisting

Machinery License for Gas and Diesel Front-End Loader with Backhoe attachment. Employees will receive training based on order of seniority and the training department's schedule.

WORKING LEADER-DISTRIBUTION

Qualified applicants must meet Distribution Mechanic A requirements and pass all applicable Operator Qualification testing. Must meet the Company's driver's test requirements and possess and maintain a Class A Massachusetts driver's license or be willing to train and qualify for it after assignment to the classification.

FIELD TRAINER-DISTRIBUTION

Qualified applicants must meet specific knowledge-based requirements, candidates selected as best qualified approved through joint union/management agreement. Applicants must meet Distribution Mechanic A requirements and pass all applicable Operator Qualification testing. Must meet the Company's driver's test requirements and possess and maintain a Class A Massachusetts driver's license or be willing to train and qualify for it after assignment to the classification.

PREMIUM – TAPPING AND STOPPING

Effective April 1, 2017, two dollars, twenty-five cents ($2.25) per hour for day for crew when performing job on tapping, drilling, and/or stopping 6" thru 12". When tapping, drilling and/or stopping ½" thru 4" the "PREMIUM – TAPPING AND STOPPING" will not apply.

SPECIFIC CONDITIONS

Employees will not return to their report areas for their meal period but will remain in the general vicinity of the job site and be allowed a paid lunch period not to exceed twenty (20) minutes.

SPECIFIC CONDITIONS – SOMERVILLE REPORT AREA

1. There will be no change in the present policy regarding the scheduling of crews on Thanksgiving, Christmas and New Year's Day.
2. There will be a minimum of three men recalled to work on calls that require digging the pavement. There will be a minimum of two men called in when doing patchwork.

INCLEMENT WEATHER

If the Union Steward does not concur in the decision of the Supervisor or Department Head regarding whether or not they should work under particular weather conditions, a member of the Union's Executive board or in their absence, the Department Steward may ask the Director of Maintenance or his duly authorized representative for a final decision

QUALIFICATIONS TO ENTER THE ROSTER
TOOL MECHANIC

1. Be physically fit.

2. Hold a valid Class-A Massachusetts Commercial Driver's License, or be willing to train and qualify for it after assignment to the classification.

3. Pass the Bennett Test with a raw score of 24.

4. Pass pre-qualification test administered by the training department.

SPECIFIC CONDITIONS

The position will also perform the maintenance and repair of any/all tools and equipment related to the Gas Service Departments. The Tool Mechanic will also be responsible for dual locations, East and West. East Tool Mechanic will be responsible for the Somerville and Hyde Park areas and; the West Tool Mechanic will be responsible for the Southboro and Worcester areas. Tool Mechanics can be reassigned to all locations to cover absences, vacations or to assist other Tool Mechanics with training or workload. Portal to Portal will apply, the reporting areas for the East is Somerville and for the West is Southboro.
The following tasks are to be performed and tracked on a monthly basis.

1. Perform inspection of all Self Contained Breathing Apparatus (SCBA) equipment in the Maintenance Vehicles. Fill out appropriate maintenance forms associated with SCBA equipment. Document and maintain applicable records.
2. Perform inspections of all Maintenance Department Fire extinguishers. Document and coordinate replacement of spent or low charge extinguishers. Document and maintain applicable records.
3. Perform inspections of all Hydraulic and Manual Squeeze off tools. Coordinate repairs with vendors as needed. Document and maintain applicable records.
4. Perform inspections and test operation of all pneumatic pipe cutting tools. Repair or coordinate repairs with vendor. Document and maintain applicable records.
5. Perform inspections and calibration tests of all Torque Wrenches, replace or repair as needed. Document and maintain applicable records.
6. Perform inspections of all pavement/concrete cutting saws. Clean and inspect all components to ensure safe operation of each saw. Repair or coordinate repairs with vendor. Document and maintain applicable records.
7. Perform inspections on shoring equipment. Clean and check hydraulic components. Coordinate repairs with vendor as needed. Document and maintain applicable records.
8. Assist Maintenance personnel with CGI meter calibrations. Document and maintain applicable records. Assist with the coordination of repairs.

- Management will be responsible for tracking monthly inspections and adherence to the Tool Mechanic duties and responsibilities.
- All previously agreed duties and responsibilities will remain in effect.

QUALIFICATIONS TO ENTER THE ROSTER
FIELD TRAINER

1. Be physically fit.

2. Hold a valid Class-A Massachusetts Commercial Driver's License or be willing to train and qualify for it after assignment to the classification.

3. Pass pre-qualification test administered by the training department.

4. Applicants will meet specific knowledge-based requirements, candidates will be selected through joint union/management agreement

5. Technical knowledge, field experience required, communication skills, skills to conduct field and classroom training/instruction

SPECIFIC CONDITIONS

Duties:

- Conduct field assessments of internal crews to determine proficiency, knowledge of all applicable job requirements/standards/procedures and compliance
- Perform on the job, yard-based training as necessary
- Responsible for insuring all construction and maintenance work done under their direction is performed in accordance with Company procedures and policies, State and Federal regulations
- Support new employee assessments
- Direct and guide multiple crews of trainees during their initial field OJT period
- Instruct, train and direct all personnel working on assigned crew(s)
- Complete all required timesheets, activity reports and sketches and any other records
- Train and evaluate new employees as they progress through lower classifications
- Identify supplemental training requirements/needs for internal crews
- Communicates and coordinates with area Planning and Scheduling personnel
- Assist in development and deployment of new/revised standards, procedures, work methods, regulations
- Assist in assessing, deploying new tools, equipment
- Support QA/QC in dissemination of audit results, communicating key messages and lessons learned
- Provide extension of classroom technical training to support, reinforce training programs
- Aid in delivery of compliance related training
- Operate Aries/ ULC main cameras to assist maintenance crews in locating blockages or water intrusion into gas mains.
- Operation of drip truck to pump drips and capture excessive amounts of water found in mains and services causing poor pressure problems.
- Operate large travel saws to allow for the removal of large diameter pipe.
- Assist with the operation of the horizontal directional drilling equipment in the in-house installation of mains and services.
- Operate super purge equipment – high volume diesel inert purge
- Operate draw down compressor used to evacuate the gas from a main that is coming out of service and placing the gas back into the live side.
- Perform routine checks and maintenance to above equipment to ensure all items are ready to work.
- Field Trainer may be required at times to assist Eversource crews or other Field Trainers with the above tasks outside of the Field Trainers local.
- Perform all duties of lower classification

QUALIFICATIONS TO ENTER THE ROSTER FOR PLANNERS

1. Be physically fit.

2. Possess a valid Massachusetts Driver's License.

3. Possess an Associate's Degree in Computer-Aided Design Technology (CAD) or the equivalent certificate from a technical school of collegiate grade; or the equivalent combination of education and experience which includes two (2) years of AutoCad/GIS experience

QUALIFICATIONS TO ENTER THE ROSTER FOR GAS OPERATIONS CLERK

1. Must be physically fit to perform all job duties.

2. Must pass job related tests.

3. Must draw to the satisfaction of the supervisor.

4. Must possess and maintain a valid state driver's license

GAS SERVICES DISPATCH DEPARTMENT

Job Description - Duties

- Plans, schedules, and coordinates work assignments for field personnel to efficiently meet workload requirements.
- Operates computer aided dispatch system and scheduling system to dispatch work, gas leaks and customer appointments.
- Continually monitor the effectiveness of Field personnel work completion and makes appropriates changes to ensure customer appointments are satisfied.
- Receives, logs and dispatches emergency and regular service orders to appropriate field personnel for action on 24/7 basis.
- Creates and schedules customer and internal requests for emergency and routine service related orders using the Customer Information system CIS and C2.
- Reviews and documents completed emergency orders for accuracy and completeness.
- Operates and monitors multiple systems including, but not limited to: a base radio, CAD, CIS, C2, ARCOS, Pager system and other Windows applications.
- Provides emergency restoration assistance to Field Operations personnel, as necessary, during gas interruptions.
- Make decisions for the assignment of appropriate field personnel, monitor work progress. Make appropriate adjustments to field personnel assignments as needed.
- Assist in providing instruction and guidance of new and less experienced Dispatchers in the performance of job duties.
- Maintain communication with other departments such as Meters and Service, Maintenance, Construction, Pressure Management, Instrumentation (I&R), System On-Call, Corporate Communications, Field Collections, Customer Information Center, and all other on-call personnel.

QUALIFICATIONS TO ENTER THE ROSTER

1. Be physically fit

2. Be able to do related clerical work and other duties applicable to this classification

Exams

Exams will be required between progression steps in the Dispatcher's Classification to B and A. These exams will be job-related and be given orally and by field demonstration.

Said exams will contain only subject matter on which the individual has been trained.

A score of at least 80% is required to progress to the next step. If the employee does not obtain a test score of 80% the employee will not advance to the next step.

An employee who enters the department as a Probationary employee will be given the rated Dispatcher's exam after 6 months in the department. Employees who entered the department at the "C" rate will be given the rated Dispatcher's exam after 3 months in the department.

If, for any reason, the applicant is unable to continue the training program satisfactorily or cannot pass the examination at the end of the training period, he/she shall have the option to be reinstated in his/her former classification under

existing policies. The content of the exam will be mutually agreed upon by the Company and the Union. During the administration of these exams a designated Union representative may be present.

Purpose

Implement a formal process for training and qualification of Gas Services Dispatchers. The program will provide Trainees an opportunity to learn the skills and gain the knowledge necessary to become Rated dispatchers. The Program is comprised of On-the-job training and testing.

Roles and Responsibility

- Supervision
  Management representatives will evaluate the candidate by direct observations of completed tasks and the individuals understanding the use of the business systems. Throughout the progression period the Trainee will be provided feedback and additional training as necessary to satisfactorily perform the tasks assigned.

- Trainee
  The trainee will work under the direction of supervision and work with rated dispatchers learning and practicing the work assignments of their given classifications. Trainees will perform and satisfactorily complete the tasks associated with each progression step.

  PROGRESSION SCHEDULE

- **For an External Hire:**
  The progression period is fifteen (15) months. This period shall be divided into the following:
  - A six (6) month probationary/Trainee period;
  - The Trainee will then be promoted to a "C" Dispatcher;
  - After a three (3) month (or earlier by mutual agreement) "C" Dispatcher period;
  - The Dispatcher will take the "B" exam, if the Dispatcher successfully passes;
  - The Dispatcher will be promoted and enter a six (6) month period (or earlier by mutual agreement) as a "B" Dispatcher;
  - After this period the Dispatcher will take the "A" exam, if the Dispatcher successfully passes;
  - The Dispatcher will be promoted to an "A" Dispatcher and select an open shift at that time.

- **For an Internal Hire:**
  The progression period is nine (9) months. This period shall be divided into the following:
  - The employee enters a three (3) month "C" Dispatcher period, then;
  - After a three (3) month (or earlier by mutual agreement) "C" Dispatcher period;
  - The Dispatcher will take the "B" exam, if the Dispatcher successfully passes;
  - The Dispatcher will be promoted and enter a six (6) month period (or earlier by mutual agreement) as a "B" Dispatcher;
  - After this period the Dispatcher will take the "A" exam, if the Dispatcher successfully passes;
  - The Dispatcher will be promoted to an "A" Dispatcher and select an open shift at that time.

  Exams will be taken by personnel to demonstrate their knowledge before being promoted to "B" and "A" Dispatcher rates.
  - Existing Southboro dispatchers will be solicited for training on the CT dispatch system by 5/1/17.
  - The CT dispatchers transferring to Southboro will be polled to select shifts by seniority from the 12004 CBA.
  - The existing vacation schedule for MA dispatchers is two (2) during the months of June, July and August and one (1) for the remainder of the year. CT dispatchers will follow this schedule.
  - When both the CT and MA dispatchers are cross trained the vacation, schedules will be four (4) during the months of June, July and August and two (2) for the remainder of the year.
  - A one-time lump sum payment of $1250.00 will be made to all existing Southboro dispatchers.

The practice of providing a rest area in Westwood will be discontinued.

METER SERVICES DEPARTMENT

QUALIFICATIONS TO ENTER THE ROSTER

1. Be physically fit
2. Possess a valid Driver's License
3. Pass the Bennett Test with a raw score of 24
4. Pass pre-qualification tests administered by Training Department
5. Exams and evaluations will be required between all progression steps in the Meter Services Department (C, B, A). These exams will be job-related and be given orally, written and by field demonstration to determine the individual's ability to perform the work. Said exams will contain only subject matter on which the individual has been trained.

   A score of at least 70% is required to progress to the next step. If the employee does not obtain a test score of 70% the employee will not advance to the next step.

   The employee will not be eligible to retake another qualifying exam and will be reevaluated for a period of three months. It is understood that the content of the exam will be mutually agreed upon by the Company and the Union. During the administration of these exams a designated Union representative may be present.

Purpose

Implement a formal process for training and qualification of Meter Services technicians. The program will provide Trainees an opportunity to learn the skills and gain the knowledge necessary to become Rated technicians. The Program is comprised of On-the-job training, classroom training and testing.

Roles and Responsibility

- Field Supervision

The program will assist Supervisors in determining both a Trainee's qualifications and their proficiency in Meter Services work.

Management representatives will evaluate the candidate using field observations of completed tasks. Throughout the program the Trainee will be evaluated based on the ability to satisfactorily perform the tasks outlined.

Work completion evaluations and test results will create a recommendation for allowing the Trainee to continue through their progression or as necessary delay the progression until additional skills can be obtained through coaching and On-the-job training to continue with the progression.

Trainees will be assigned appropriate work and supervision will ensure that all Trainees go out on their own as soon as possible after entering the roster, but in no case later than nine (9) months after entering the roster. The company will ensure that the Trainees gain the appropriate knowledge by having the Trainees work with supervisors, Rated Technicians and Leads during the first nine (9) months. The immediate supervisor and with assistance from the Meter Services Leads will monitor the Trainees progress and assure that all tasks are completed within the specifics steps outlined when working with Leads and Rated technicians.

- Rated Meter Services Technicians/Leads

These technicians will assist with instructing and coaching in the tasks associated with the steps of the Trainee's progression. The goal is to insure the Trainee can comprehend and safely perform the day to day operations of their

respective classifications.

- Trainee

The trainee will work under the direction of the Rated technicians and Leads learning and practicing the work assignments of their given classifications. Trainees will perform and satisfactorily complete the tasks associated with each progression step.

- Training Department

The Training department will provide formalized training and testing of Trainees and assist in the evaluation of the Trainee.

TRAINING PROGRAM

- **For an External Hire:**

The Program duration is a thirty-six (36) month term. The term shall be divided into the following:

- A six (6) month probationary period
- A six (6) month Trainee period
- Then the Trainee will attend a two (2) week training and qualification session, if the Trainee successfully passes then;
  - The Trainee will be promoted and enter a twelve (12) month period as a C Technician
- Then the Trainee will attend a two (2) week training and qualification session, if the Trainee successfully passes then;
  - The Trainee will be promoted and enter a twelve (12) month period as a B Technician
- Then the Trainee will attend a one (1) week training and qualification session, if the Trainee successfully passes then;
  - The Trainee will be promoted to an A Technician

- **For an Internal Hire:**

The Program duration is a thirty (30) month term. The term shall be divided into the following:

- A six (6) month Trainee period
- Then the Trainee will attend a two (2) week training and qualification session, if the Trainee successfully passes then;
  - The Trainee will be promoted and enter a twelve (12) month period as a C Technician
- Then the Trainee will attend a two (2) week training and qualification session, if the Trainee successfully passes then;
  - The Trainee will be promoted and enter a twelve (12) month period as a B Technician
- Then the Trainee will attend a one (1) week training and qualification session, if the Trainee successfully passes then;
  - The Trainee will be promoted to an A Technician

At the end of each progression step the Training department and Supervision shall examine the progress of the Trainee in relation to the on the job training performance and formal training as outlined. Attend classroom training and demonstrate their knowledge by testing and qualification.

The job specifications listed at the beginning of each step are not intended to cover every detail of the Trainee's work, but rather set reasonable standards required for qualification. Typical tasks are mentioned to serve as an illustration of the level of know-how and responsibility required; it is not intended that these specifications cover every task that the position will include.

The Classroom Training Course provides a general outline of the type of classroom training necessary to support the desired on-the-job performance.

The On-the-job training guide at the end of each step, which lists training experiences the Trainee will receive, is not a list of everything the Trainee will learn. As work requirements may differ between work areas. Therefore, the guide identifies potential areas for learning in each field.

On–the–job training is accomplished by assigning the Trainee to assist a Rated Meter Services Technicians and Leads in performing the day–to–day tasks. It is expected that through this form of training the Trainee will become more proficient in the job duties.

Prescreening for the Meter Services Technician position will require the following items to be satisfactorily completed. Leather work gloves will be provided for tasks requiring hand protection.

Overview

At least one (1) person administering the prescreening will be from the Gas Training Department.
Pre-screenings will be video-taped.

Instructions and demonstrations will be given for all tasks. Candidates will have the opportunity to have the demonstration repeated. Once the candidate begins the tasks, no further demonstrations for that task will be done.

The candidate will complete the first task before demonstration of next task.

1. **Tool Identification**

Purpose: Test the candidate's ability to identify commonly used tools.

Setup: 12 common tools will be laid out on a table. Index cards with the names of the tools will be provided. Candidates will have 10 minutes to complete the task.

Task: The candidate will place the index card with the name of the tool on the tool.

12" Pipe Wrench	12" adjustable wrench
Open end wrench	¾" socket and ½" drive ratchet
Box wrench	Torque wrench
Sledge hammer	Phillips head screw driver
File	Slotted head screw driver
Slip joint Pliers	Chisel

Scoring: Task will be used as ice-breaker exercise and will not be scored.

10 MINUTES ALOTTED

START TIME: _____ FINISH TIME: _____

10 Points needed to pass. Circle or check one. Pass _____ Fail _____

2. Identification and assembly of threaded steel pipe and fittings (Example below)

Purpose: To test the candidate's mechanical aptitude and ability to join threaded pipe and to use hand tools as required

Setup: The candidate will be given the necessary tools and threaded steel nipples and elbow fittings and be required to assemble them as shown.

Tools List: 2 of each. 14", 18", 24" pipe wrench's

Fittings List: TBD

Task: In the work area will be an example or drawing of the assembly to be recreated. Candidate will be shown how to assemble fittings.
Candidate will assemble fittings and tighten assemblies, wrench tight, to duplicate the example.

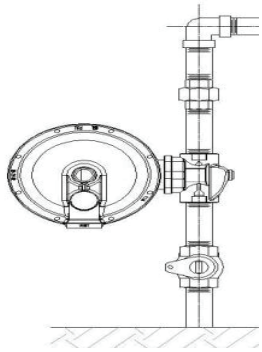
Assemble "Riser Assembly" Tighten all fittings wrench tight.

Scoring: Screw riser valve onto nipple on service tee _____ 1 Point
Screw nipple into riser valve _____ 1 Point
Install regulator on nipple _____ 1 Point
Screw nipple into regulator _____ 1 Point
Screw in lower half of union onto nipple _____ 1 Point
Install upper half of union _____ 1 Point
Total _____ 6 Points

10 MINUTES ALOTTED FOR ASSEMBLY

START TIME: _____ FINISH TIME: _____

Six (6) Points needed to pass. Circle or Check one. Pass _____ Fail _____



CLASSROOM TRAINING COURSE
C - Rate

1. Gas 101
   - Origin of Natural Gas
   - Source of Natural Gas
   - Gathering
   - Processing
   - Transmission
   - Meter Services
   - Utilization
   - Properties of Natural Gas

2. Safety

A. Gas 102 - General Review of the Safety & Health Hand Book
   - Personal Protective Equipment (PPE)
   - Housekeeping
   - Personal conduct
   - Work performed on customer's premises
   - General safety instructions for the gas industry
   - Approved tools
   - Static electricity
   - Abnormal Operating Conditions

B. Human Performance – reducing errors while performing physical tasks

C. Driving Safety (eg. Decision Driving or Smith Driving)

D. OSHA Compliance Training - eLearning
   - Respiratory Protection
   - PPE
   - Blood borne Pathogens
   - Job Safety Briefing
   - Electrical Hazard Awareness
   - Rigging Safety
   - Asbestos Awareness
   - Fire Protection & Safety
   - Lead Safety
   - Ladder Safety
   - Work Area Protection
   - Hazardous Communication

CLASSROOM TRAINING COURSE
C - Rate

E. OSHA Compliance Training – Instructor Led Training (ILT)
- Respirator Fit Test
- Portable Fire Extinguisher
- Medic First Aid/CPR

F. Eversource eLearning
- Gate Station Awareness
- Odor Intensity Testing
- Implementation of the Eversource Gas OQ Plan

3. Handling Gas Meters
A. Gas Meter Identification (all sizes used at EVERSOURCE)
B. Read a meter
- Visual
- Electronic / Automated
- Understanding ERT's
- Understanding MPA's
- Meter Constants & Pressure Factors
- Temperature Correction

C. Storage & Handling of meters
D. Tour of Meter Test Shop
E. Meter Turn On
- Clock the meter

F. Meter Turn Off
G. Identifying theft of service

4. Introduction to Gas Regulators
A. Discuss gas regulator applications and selection.
B. Explain gas regulator fundamentals.
C. Name gas regulator basic elements
D. Identify gas regulator types
E. Discuss over pressure protection

5. Piping
A. Measure
B. Cut & Thread Pipe
C. Make threaded joints
D. Make flanged joints
E. Interpret piping diagrams
F. Sketching piping diagrams

CLASSROOM TRAINING COURSE
C - Rate

6. Installing New Meter Assemblies in accordance with Construction Standards
   A. Proper location
   B. Proper protection:
      - From physical damage
      - From customer's equipment
      - From over-pressurization
   C. Proper support of piping
   D. Proper venting of regulators

7. CAD Operation
   A. Login
   B. Basic Navigation
   C. Order Completion
   D. Timesheet Completion

8. Power Assisted Fastener Gun
   A. Cartridge Operated Fastener Gun
   B.Operate

OQ Requirements

Tasks #
- 70 - Properties of Natural Gas & Abnormal Operating Conditions
- 72 – Installation of Customer Meters & Regulators

Before a Meter Services Technician is promoted to the next step, the employee must pass classroom examinations and OQ evaluations. The tests consist of performance evaluations and written tests.

ON-THE-JOB TRAINING GUIDE
FOR
C - RATE

	Initials	
Check List	Trainee	Technician
Work Center Orientation: Introduce to fellow employees (Supervisor) Explain: Meter Services Technician Training Program Safety Program General Duties (Review Job Specifications)		
The Supervisor shall make sure the employee has the following items (as applicable): • Safety Handbook		
• Hard Hat		
• Work Gloves		
• Safety Glasses		
• Face Shields		
• Goggles		
• Safety Shoes		
• Ear Protectors		
• Tool & equipment Bag		
• Clip Board (for orders)		
• Flashlight – Hard Hat spotlight		
• Rain Gear (Rain boots)		
• Respiratory equipment/Fit Test		
• Vest		
• FR Clothing / Uniforms		
• Uniforms		
• Distribute: Construction Standards		
Allow Employee to observe for a few hours - explain generally what is taking place. Assure Employee that you expect questions. Inform Employee of Meter Services Standards and other manuals pertaining to operations and inform the Employee that such manuals are available.		
Show and explain the use of all tools on truck. Demonstrate the use of tools such as, but not limited to, those listed below Tool List: • Automated Meter Reading Device		
• Bits (Various types)		
• Bolts (Various types and sizes)		
• Brushes (Various types)		
• CAD operation		
• Chisels		
• Compounds o Cold o Pipe joint o Duxseal		
• Connectors – Lugs (Various sizes)		
• Cords – Extension		
• Cutters		
• Drills		
• E-Z Outs		
• Files (all types)

Explain the operation of the following: • Customer Gas Meters (Various)		
• Pressure Regulator (Various)		
Explain the function, purpose and operation of the following physical infrastructure: • Gate Station		
• Regulator Vault		
• Customer Meter Sets (Various)		
• Critical Valves		
Identify and explain the basic function and purpose of the following customer service components: • Curb Valves		

• Meter Valves		
• Meter		
• Regulator		

ON-THE-JOB TRAINING GUIDE
FOR
C - RATE

	Initials	
Check List	Trainee	Technician
Identify and explain the function and purpose of Gas Utilization equipment (appropriate for step)		
Explain the different operating pressure systems at Eversource (applicable for area)		
Explain the different customer delivery pressures (applicable for area)		
Demonstrate the service order process involving both CAD & company paper forms		
Demonstrate the correct storage & handling of meters, equipment & materials		
Demonstrate and explain the purpose and applicability of Red Tags		
Explain and demonstrate the purpose of:		
• Compression joints		
• Flare fittings		
The Employee shall observe and assist (O&A) a fully rated Meter Services Technician with the following tasks:		
O&A: Reading a meter		
• Standard index		
• Temperature compensating / correcting instruments (explain the purpose of factors)		
• Utilizing an automated meter reading device		
O&A: Disconnecting a gas meter		
O&A: Removing a gas meter		
• From a single meter manifold		
• From a multiple meter manifold		
O&A: Drawing & Interpreting simple gas diagrams or photographs		
• Gas service pipes & manifolds		
• Gas meter connections & shut-offs		
• Gas diversion diagrams		
O&A: Cutting & Threading Pipe		
• By hand		
• By machine		
O&A: Joining Pipe		
• Make threaded joints		
• Make new flanged joints		
O&A: Building Gas Meter Manifolds		
• Read & interpret the print		
• Build the manifold		
O&A: Investigating a mixed metering situation.		
The Employee shall identify types and basic operation of the following:		
• Customer Meters		
• Pressure Regulator		
The Employee shall demonstrate basic navigation of CAD		
The Employee shall demonstrate the correct storage and handling of meters, equipment and materials		

The following individual has satisfactorily completed all skill & knowledge requirements of the C Technician position and can progress to the next progression step.

Employee's Name:

_____

Supervisor's Name: _____ Date: _____

CLASSROOM TRAINING COURSE
B - RATE

1. Introduction to Emergency Response
   - A. Understanding the company's role & responsibilities to various gas emergencies
   - B. Gas Odor and/or Leakage Investigation
     - Operate a Combustible Gas Indicator (CGI)
     - Perform Initial Investigation
     - Use the plunger bar ergonomically
     - Documenting survey on a barhole sketch
   - C. Carbon Monoxide Investigation
     - Operate a CGI
     - Perform Initial Investigation
     - Take appropriate action

2. Mapping
   - A. On CAD and GIS , identify
     - Curb valve
     - Operating Pressure
     - General locations of facilities

3. Sizing a Gas Meter
   - A. Identify customer load
   - B. Identify necessary utilization pressure
   - C. Identify allowable pressure drop through meter
   - D. Select meter

4. Measuring Gas Pressure
   - A. Discuss standard delivery pressures
   - B. Use a Manometer
   - C. Use a Spring Gauge
   - D. Use a Recording Gauge

5. Corrosion
   - A. Recognizing atmospheric corrosion
   - B. Determining if facility can be repaired or if it must be replaced
   - C. Cleaning and coating above ground facilities / piping
   - D. Installing Insulators

6. Basic Electricity
   - A. Explain Ohms & Watts Laws
   - B. Explain basic electrical circuit symbols
   - C. Explain simple electrical circuit diagrams
   - D. Explain series, parallel & series parallel circuit diagrams

CLASSROOM TRAINING COURSE
B - RATE

7. Application & Proper Use of Test Equipment
   - A. Voltmeters
   - B. Ammeters
   - C. Ohmmeters
   - D. Multimeters

8. Introduction to Gas Codes
   - A. National Fuel Gas Code NFPA 54

9. Relighting Natural Gas Appliances
   - A. Identify various gas ignition systems & distinguish between relighting methods
   - B. State safety requirements
   - C. Perform pilot relighting
   - D. Perform electronic ignition relighting

10. Gas Water Heaters
    - A. Identify various types
    - B. Discuss Controls
    - C. State safety requirements
    - D. Operate

11. Gas Space Heaters
    - A. Identify various types
    - B. Discuss Controls
    - C. Discuss vented vs. unvented set-ups
    - D. State safety requirements
    - E. Operate

12. Gas Central Heating
    - A. Identify various types
      - Hydronic
      - Hot Air
      - Steam
    - B. Discuss Controls
    - C. State safety requirements
    - D. Operate

CLASSROOM TRAINING COURSE
B - RATE

13. Field / Site Visits

For example, but not limited to:

A. Dispatch
B. Customer Call Center
C. Gas Control
D. LNG Plant
E. Gate Station
F. Distribution Crew during leak investigation

OQ Requirements

Tasks #

- 6/8B - Inspecting for atmospheric corrosion & Visually inspecting for internal corrosion
- 20B – Gas Leak Investigation
- 45B - Restore service

Before a Meter Services Technician is promoted to the next step, the employee must pass classroom examinations and OQ evaluations. The tests consist of performance evaluations and written tests.

Check List	Trainee	Technician
B Rate requirements		
Following are operations the Employee is to be trained to perform through instructor demonstration and specific steps or methods in these operations which are to be emphasized. Also listed are tools and equipment which are shown and demonstrated to the Employee		
The Employee shall observe and assist a fully rated technician investigate a gas odor complaint including but not limited to the following investigation methods: • Combustible Gas Indicator		
• CO Investigation		
• Leak detection soap		
• Clocking a gas meter		
• Perform a bar hole test		
• Manometer		
The Employee shall observe and assist a fully rated Technician insulate gas services: • Identifying insulating fittings o Unions		
o Flanges/Kits		
o Couplings		
o Meter swivels		
• Installing insulating fittings/Insulating flange kits		
The Employee shall observe and assist a fully rated Technician lubricate gas service valves at: • Service valve		
• Meter shutoff		
The Employee shall observe and assist a fully rated Technician in the use of a Combustible Gas Indicator to do the following: • Inspection – prior to use		
• Calibration and adjustment (monthly)		
• Scale Interpretation o Multi Scale LEL/UEL/Carbon Monoxide		
o LEL and percent		
• Use of charcoal & water filters		
The Employee shall observe and assist a fully rated Technician in locating and turning off gas at curb. • Locate curb box by using: o Tape measure		
o Curb box locator / Metal Detector		
o Demonstrate the use of all available curb valve wrenches		
The Employee shall observe and assist a fully rated Technician set & reconnect gas meters • Check pressure test records/requirements in accordance with local town requirements if applicable		
• Install manifold		
• Insulate service		
• Set Meter o Record meter number		
o Record meter reading		
o Record automated meter reading device - Use		
o Record meter location - Document		
The Employee shall observe and assist a fully rated Technician in relighting residential appliances, to include but not limited to: • Gas space heater		
• Gas water heater		
• Gas range		
• Gas furnace		
• Gas boiler		

ON-THE-JOB TRAINING GUIDE FOR B - RATE

	Trainee	Technician
• Gas conversion burner ○ Atmospheric		
○ Power		
• Gas clothes dryer		
• Gas fireplace		
The Employee shall observe and assist a fully rated Technician in installing a gas service regulator: • Install inlet fitting		
• Install outlet fitting		
• Install vent pipe to remote location		
The Employee shall observe and assist a fully rated Technician with adjusting a gas service regulator		
The Employee shall observe and assist a fully rated Technician with a red tag procedure		
The Employee shall demonstrate the proper use of the following: • Gas Pressure Gauges		
○ Manometer		
○ Spring gauge a. Inches W.C b. PSIG		
○ Recording gauges		
The Employee shall identify and explain gas system pressures: • Low pressure (under 2 PSIG)		
• Intermediate pressure (2 PSIG to 60 PSIG)		
• High pressure (60 PSIG thru 100 PSIG)		
• Extra high pressure (≥ 100 PSIG)		
The Employee shall demonstrate the ability to clock a gas meter for appliance BTU input • Read test dial		
• Application of formula		
• Apply pressure factor if applicable		
The Employee shall demonstrate the ability to install a manifold and insulate the service in accordance with the company service entrance requirements.		
The Employee shall demonstrate the ability to insulate gas services: • Identifying insulating fittings ○ Unions		
○ Flanges/Kits		
○ Couplings		
○ Meter swivels		
• Installing insulating fittings/Insulating flange kits		
The Employee shall demonstrate the ability to lubricate gas service valves at: • Service valve / riser valve		
• Meter shutoff		
The Employee shall demonstrate the ability to use of a Combustible Gas Indicator to do the following: • Inspection – prior to use		
• Calibration and adjustment (monthly)		
• Scale Interpretation ○ Multi Scale LEL/UEL/Carbon Monoxide		
○ LEL and percent		
• Use of charcoal & water filters		
The Employee shall demonstrate the ability to locate and turn off gas at curb. • Locate curb box by using: ○ Tape measure		

○ Curb box locator / Metal Detector		
○ Demonstrate the use of all available curb valve wrenches

The Employee shall demonstrate the ability to adjust a gas service regulator		
The Employee shall observe and assist a fully rated Technician relight commercial appliances in commercial applications.		

* Observe and assist task – Required OQ Qualifications

The following individual has satisfactorily completed all skill & knowledge requirements of the B Technician position and can progress to the next progression step.

Employee's Name: _____

Supervisor's Name: _____ Date: _____

CLASSROOM TRAINING COURSE
A - RATE

1. Investigating a High Bill Complaint
   - A. Read & interpret an Eversource bill
   - B. Discuss common causes of high consumption, including but not limited to:
     - Poor heating equipment combustion efficiency
     - Increase in number of persons in household
     - Heating unit short cycling
     - Room air outlets blocked by draperies or furniture
   - C. Discuss common ways to investigate customer usage, including but not limited to:
     - Verifying customer piping from meter to appliances
     - Clocking the meter to verify customer equipment inputs
     - Checking operating pressure on customer equipment

2. Identify Theft of Service from Gas Facilities
   - A. Define Theft of Service
   - B. Define meter conditions which would qualify for Theft of Service
   - C. Identify normal gas meter conditions
   - D. Identify Theft of Service from gas meters
   - E. Report theft

3. Over Pressure Protection
   - A. Discuss requirements
   - B. Methods for achieving over pressure protection
     - Relief valve
     - Monitor regulator
     - Automatic shut-off

4. Diagnosing & Correcting Gas Pressure Problems
   - A. Delivery pressure (from EVERSOURCE)
     - Discuss common problems & troubleshooting for various EVERSOURCE standard regulators, including but not limited to:
       - Leaking by
       - Lock-up failure
       - Surging
       - Foreign matter
       - Freeze-up
       - Filters & Strainers
       - Water in service
     - Discuss sizing of regulators & associated vent piping
     - Discuss common regulator repair actions
       - Clear vent
       - Clean orifice and/or seat
       - Adjust regulator
       - Replace seat, orifice and/or spring
   - B. Incorrectly sized fuel lines
     - Discuss sizing of customer fuel lines

CLASSROOM TRAINING COURSE
A - RATE

C. Utilization pressure at appliances
- Discuss common problems & troubleshooting for various common appliance regulators
- Discuss 2 psi delivery & Maxitrol regulators (in particular)

5. Red-tagging Customer Appliances

A. Recognizing code compliance in accordance with National Fuel Gas Code
- Flexible Gas Connectors
- Vent connectors
- Vents
- Appliances in confined spaces
- Electrical service disconnect requirements
- Gas utilization equipment locations
- Gas Piping
- Draft hood / draft control devices
- Ventless equipment

B.Complete red tag & customer service order

	Trainee	Technician
The Employee shall demonstrate the ability to recognize and / or explain code compliance requirements related but not limited to:		
○ Flexible Gas Connectors		
○ Adaptors		
○ Location (through walls & floors)		
○ Vent Connectors		
○ Slope		
○ Clearance from combustibles		
○ Location (through walls & floors and in attics)		
○ 2 or more appliances with a common vent connector		
○ Support		
○ Vents		
○ Single wall		
○ Type B		
○ Type BW		
○ Clearance from combustibles		
○ Location (through walls & floors, in attics and outdoors)		
○ Termination		
○ Appliances in Confined Spaces		
○ Air for combustion & ventilation		
○ Gas water heater in bathroom or bedroom		
• Gas utilization equipment in garages		

METER REPAIR DEPARTMENT

QUALIFICATIONS TO ENTER THE ROSTER FOR METER REPAIR TECHNICIAN AND SPECIAL METER MAINTENANCE TECHNICIAN

1. Be physically fit.
2. Pass the Bennett Test with a raw score of 24.
3. Possess a valid Massachusetts Driver's License.

QUALIFICATIONS TO ENTER THE ROSTER FOR CLERK UTILITY

1. Be physically fit.
2. Pass job related clerical tests.

INSTRUMENTATION AND REGULATION DEPARTMENT

QUALIFICATIONS TO ENTER THE ROSTER FOR INSTRUMENT TECHNICIAN

1. Be physically fit.
2. Pass the Bennett Test with a raw score of 24.
3. Possess a valid Massachusetts Driver's License.
4. Pass the General Technician Tests.

QUALIFICATIONS TO ENTER THE ROSTER FOR GENERAL TECHNICIAN

1. Be physically fit.
2. Pass the Bennett Test with a raw score of 24.
3. Possess a valid Massachusetts Driver's License.
4. Pass the General Technician Tests.

QUALIFICATIONS TO ENTER THE ROSTER FOR MAINTENANCE TECHNICIAN

1. Be physically fit.
2. Pass the Bennett Test with a raw score of 24.
3. Possess a valid Massachusetts Driver's License.

PASSING SCORES FOR THE GENERAL TECHNICIAN TESTS

Algebra	60%
Arithmetic Reasoning	Raw Score of 5
Minnesota Paper Form Board Test	Raw Score of 38

GENERAL TECHNICIAN TEST:

Sections 1-2-F-G	60%
Sections A through E	50%

SPECIFIC CONDITIONS

Employees will not return to their report areas for their meal period but will remain in the general vicinity of the job site and be allowed a paid lunch period not to exceed twenty (20) minutes.

WAREHOUSE DEPARTMENT

QUALIFICATIONS TO ENTER THE ROSTER FOR STOCKHANDLER

1. Be physically fit.
2. Possess a valid Massachusetts Driver's License and be capable and willing to get a Massachusetts Commercial Driver's License (CDL).
3. Pass job related tests.

FLEET DEPARTMENT

QUALIFICATIONS TO ENTER THE ROSTER FOR GARAGE ATTENDANT

1. Be physically fit.
2. Possess a valid Massachusetts Driver's License and be capable and willing to get a Massachusetts Commercial Driver's License (CDL).
3. Pass the Bennett Test with a raw score of 24.

QUALIFICATIONS TO ENTER THE ROSTER FOR MECHANIC

1. Be physically fit.
2. Possess a valid Massachusetts Driver's License and be capable and willing to get a Massachusetts Commercial Driver's License (CDL).
3. Pass the Bennett Test with a raw score of 24.
4. Must have completed 4 years of Technical School training in auto mechanics or two years of on-the-job training.

Employees who do not fulfill Qualification 4 above will enter the 42-month Mechanic progression as described in Appendix A, assuming they fulfill all other requirements.

SPECIFIC CONDITIONS

In order to progress to the "B" rate the employee must obtain a Class A Massachusetts Commercial Driver's License, after receiving training in the same.

In order to progress to the "A" rate the employee must pass a basic Welding Skills test, after receiving training in the same.

STIPULATION FOR SHIFT ASSIGNMENT

There must be at least one rated man on shift in the report area.

APPENDIX D

SICK AND ACCIDENT POLICY

All employees of the Company, after thirty (30) days of full-time employment, who are absent from regularly scheduled work because of sickness, non-occupational accident, or occupational accident, shall receive in total, from whatever source, full straight time pay for such absence subject to the following conditions:

a) An employee will receive a total full pay benefit not to exceed six (6) months of straight time pay for each illness or accident, exclusive of accrued vacation pay.

b) An employee continuously absent due to sickness, occupational accident, or non-occupational accident for a period of six (6) months would be transferred to the Long-Term Disability Program if he meets the requirements of said Plan.

c) The Company will require a doctor's certification from the employee for any illness or accident after such employee has accumulated more than three (3) incidents of absence due to illness or accident during the calendar year. Such employee will not receive pay benefits if that employee does not furnish a doctor's certificate for the fourth or more incidents of illness or accident during the calendar year. An absence due to illness or accident of two weeks or more shall not count as an incident. Employees with 20 or more years of service will not be required to furnish a doctor's certification for payment of sick benefits except as noted in (e) below. Continuing absences of four (4) or more working days the employee is required to contact the company's third-party vendor to initiate an extended illness. Continuing absences due to illness or disability require a doctor's certification every 30 days if payment is to be made.

d) All benefits under this policy will be determined on the basis of normal pay for forty (40) hour week at straight time rates.

e) Absence shall be paid for at full normal straight time pay for the first three (3) or less consecutive working days without a doctor's certification. Absence due to illness or disability which exceeds three (3) work days requires an doctor's certification if payment is to be made. Absence due to an accident requires an doctor's certification for the first day of disability if payment is to be made.

f) Successive periods of absence separated by less than two (2) weeks of continuous active work on a full-time basis shall be considered one (1) continuous period of absence unless the subsequent period of absence is due to an injury or disease entirely unrelated to the injury or disease which caused the previous absence and commences after return to work on a full time basis. If you have been receiving benefits under the LTD Plan, return to work, and subsequently suffer a second disability, the following will apply: If your second disability is due to the same or related causes as the first, and your return to active work period is less than 3 months, then the Plan will resume its benefit payments without the six-month waiting period applying again. If your second disability is due to causes Unrelated to the first, then the Plan will resume its benefit after a six-month waiting period.

g) Full straight time pay benefits will not be allowed under this program for illness or accident caused as a result of willful intention to injure oneself or another person, or commission of any crime, or as a consequence of working for an employer other than this Company, or any other work for wage or profit.

h) Dentistry, optical, and physical examination are not considered as absences payable under this program. Doctor's appointments for pre-natal care will be covered, provided after hour appointments are not available. The employee will schedule said appointments for the start or end of her work day.

i) All cases of illness or injury must be bona fide. False claims for payment under this program will subject an employee to disciplinary action. As a result, the Company reserves the right to have, at any time, a legally qualified physician or physician's assistant examine the person of an absent employee when and so often as may be reasonably required during a benefit period.

j) Prompt notification of sickness or accident is required. It is essential that the employee or someone on the employee's behalf give notice to the Company as close as possible to the employee's normal starting time.

APPENDIX E

JOB SECURITY

The Company agrees that regular employees with five (5) or more years of service will not be laid off or reduced in pay due to lack of work during the term of this Agreement.

It is further understood that in the event that it becomes necessary to have a layoff and the Company is prevented from laying off as many employees as it deems necessary due to this Agreement, it is understood that it may be necessary for the Company to retrain and/or relocate employees without any restrictions to maintain an efficient operation.

APPENDIX F

OUTSIDE CONTRACTORS

1. If an outside contractor works for the Company on Saturday, Sunday or a holiday, the following will apply:

   a) Employees who normally perform like work and are on Monday through Friday schedule will be offered work on that Saturday, Sunday or that holiday

   b) Employees who normally perform like work and are on a Tuesday through Saturday schedule will be afforded a sixth day at overtime rates within the following three-week period.

2. It is agreed that the use of outside contractors will not be extended into areas where they are not presently being used.

3. It is agreed that if there is a curtailment of work, presently being done exclusively by Union employees, the Company will retrieve sufficient work from outside contractors, to avoid any reduction in straight time hours or lay-off of Union employees.

4. It is the Company's intent not to accelerate the use of contractors in the Company.

5. The following will apply to the Gas Services and Clerks effective April 1, 1993. When the Company considers it necessary to have Outside Contractors perform any work for the Company normally performed by bargaining unit employees, the Company will notify the Union of the type of work to be performed before the contractor starts work and the following provisions will apply:

   a) When a contractor or contractors are engaged in any work normally performed by bargaining unit employees, in any week, an eight-hour day shall be scheduled for the succeeding Saturday for the employees in the affected Report Area Department. Such an eight-hour day shall be paid for at the appropriate overtime rate.

   b) Employees who are on other than a Monday to Friday schedule will be afforded a 6th day at overtime rates within the following two-week period.

   c) The application of paragraph 5 a) and b) as it applies to Clerks will be based on the affected sections determined by the individual overtime rosters.

   d) Exemptions to the application of paragraphs 5 a) and b) will be:

      (1) Work that requires a license that no one holds in the bargaining unit within the Customer Service Department.

      (2) New or replacement water heater light ups.

6. When pipeline contractors or corrosion contractors are scheduled to work during the normal work hours Monday through Friday, normal meaning first shift, the Company will notify the Union of the type of work to be performed before the contractor starts and the following provisions will apply:

   a) All employees in the affected report area Maintenance Department with the exception of Distribution Support Technician will be offered sixty (60) minutes overtime on the day the contractor has worked except when contractors are installing new services, 4" and below (including services in developments from the curb cock to the riser), and commencing on January 1, 2007, corrosion repairs on services and mains, all employees in the affected report area, Maintenance Department, will be offered ninety (90) minutes overtime for such work. The pipeline and corrosion contractors will be off the road at 4:30 p.m. The last one half (1/2) hours of the workday (4:00 p.m. – 4:30 p.m.) will consist of sweeping the jobsite and setting barricades for neatness and safety. Such overtime will be paid at the appropriate overtime rate.

   b) When a pipeline contractor or corrosion contractors are scheduled to work a shift other than the first shift, three man crews in that report area, Maintenance Department, with the exception of Distribution Support Technician, will be offered overtime equal to the number of contractor crews that have worked. This overtime will be scheduled on the following Saturday, unless weather conditions are such that rescheduling would be necessary.

   c) The provisions of paragraphs 6 a) and b) only apply to pipeline and corrosion contractors.

   d) Exemptions to paragraphs 6 a) and b) will be:
      - Installation of steel mains or services 8" and larger in diameter
      - Installation of steel mains for bridge crossings
      - When performing corrosion repairs on exposed piping on bridges

If a pipeline contractor, working on 8" steel or larger as described in "Exemptions" in Appendix F, works beyond the normal working hours to install pipe then overtime will be offered to an amount of Distribution Mechanics in the affected report area that is equal to the number of personnel on the pipeline contractor crew. The overtime will be equal to the amount of time the pipeline contractor works beyond the normal work hours.

If/when pipeline contractors working on these projects are instructed by the Company to work beyond 4 PM the paragraph above will take effect. If pipeline contractors working on these projects are delayed while Company crews are performing live gas work the above paragraph is not applicable.

Construction Agreement

Construction Crews
This document is for discussion purposes and tied to Company Proposals 11, 12 and 13.

a.) The Company and the Union agree to meet each year prior to the construction season to discuss planned work and allocation of resources.

b.) Internal Construction crew staffing fourteen (14)

c.) Construction crews may be utilized to perform the following activities:

Examples of work that may be performed:

1. New growth services
2. New growth mains
3. Service replacements
4. Main connections
5. Main replacements
6. Service replacements associated with main replacements
7. Public work projects

8. System enhancements
9. Meter fitting work (Flexibility agreement)
10. Affected cast iron encroachments
11. Main & service taps

d.) The Company will have the ability to change the scheduled hours for employees assigned to Construction in order to meet customer and project needs. For example; If a municipality issues a permit with restricted hours or off hours the Company will notify the Union of schedule changes and provide the employees as much notice as possible however not less than 5 days (120 hours).

e.) The Company will strive to keep Construction employees working as much of the year as possible. Construction crews will start each year on or before April 1st and be completed on or after December 1st. The Company will determine start and end dates. If the Company determines inclement weather, work load in Maintenance or other factors that delay or end the construction crews prior to December 1st the Company will notify the Union. Construction employees will then be redeployed to perform maintenance work during these periods and winter months.

f.) Performance Measurements - The use of employees for Construction will be measured. The Company will track the following items to determine the employee's ability to perform the assigned work safely, productively and cost effectively. The Company and the Union will review performance results on a regular basis.

1. Health and Safety
    - OSHA recordable incidents
    - DART recordable incidents
    - PMVA recordable incidents
    - Absence rate
2. Quality
    - Percentage compliance in QA/QC program
    - DPU/Regulatory violations or findings
    - Customer Satisfaction
3. Productivity
    - Cost per units
    - Cost per foot
    - Feet of pipe installed per day
    - Number of services installed per day

g.) If targets are not met, the Company and Union agree to engage in cooperative efforts to make the necessary performance improvements. If after discussions with the Union, targets continue to no be met the Company crew will be replaced with another Company crew. If the second crew does not meet the performance measures the crew will be reassigned to other activities within the Maintenance department.

The Company and the Union will review and discuss construction crew performance. If the Company and Union agree that performance targets are being met, then further discussions between the parties will be conducted to determine if additional crews will be added.

Staffing:
Crews will be staffed with existing or additional employees as needed.

(Table 1)	Main Crew	Service Crew	Main (open trench)	Service (open trench)
Distribution Tech A/Crew Leader	1	1	1	1
Distribution Tech B/C	2	1	1	1
Trainee or Temporary employee	1	1	1	
Total	**4**	**3**	**3**	**2**

(Table 2)	# of crews	** # of employees
Main Crew		
Service Crew		
Total		

** Crew size will be determined by Table #1

- Temporary employees may be used for absence, vacation or additional man power.
- Crew configuration and crew counts, as well as report locations may be altered to deliver optimal results depending on job type, work site conditions, absences, vacations, etc.
- Crews will not be moved from their report areas unless there is a curtailment of work or the Company needs to address workload. The Company will notify the Union prior to moving crews.
- All work will be scheduled at the Company's discretion.
- Crews may respond to class 1 leaks and emergencies if other crews are unavailable.

APPENDIX G

MISCELLANEOUS POLICIES

ADOPTION BENEFIT

Benefit Amount

The adoption benefit is 100% of the first $4,000 of eligible expenses for the adoption of each child under the age of 18. Only the expenses you actually incur are eligible for reimbursement.

The benefit is payable when the adoption is final. An adoption is final when a decree of adoption is entered by the court. Reimbursement will be provided when the Company receives proof of adoption and proof of payment of eligible expenses.

Eligible Expenses

The following expenses are eligible for payment:
- Adoption agency fees
- Legal fees
- Court fees
- Travel expenses
- A child's initial medical examination
- The pregnancy out-of-pocket medical expenses of the natural mother (to the extent these expenses are not eligible for reimbursement under another medical plan)

How to File a Claim

When your child's adoption is final, send original receipts and documentation to the Benefit's Department.

ADOPTION LEAVE

Eligibility

You are eligible for Company-paid adoption leave after you complete three (3) months of employment with NSTAR. Your pay during the duration of your adoption leave will be based on your base pay in effect on the day your leave starts.

You must give your supervisor at least three (3) months written notice of the date your leave will start and when you expect to return to work. If you are also eligible for FMLA leave, time taken for adoption leave will also count as FMLA leave.

Duration

Adoption leave begins on the date the child is received into your home. The maximum duration of an adoption leave depends on the age of the adopted child according to the following schedule:

Age of Adopted Child	Maximum Amount of Leave
6 years old or younger	*8 weeks*
At least 7 years old but less than 13 years old	*4 weeks*
At least 13 years old but less than 19 years old	*2 weeks*

Returning to Work

You generally have the right to return to the same position or an equivalent job with equivalent pay, benefits and working conditions at the conclusion of the leave. Moreover, employees have no greater right to restoration than if they had been continuously employed.

UNIFORMS AND RAINGEAR

- Rental uniforms that are supplied by the Company will be cleaned and maintained by the Company.
- Replacement rental garments will be issued as needed and upon return of old clothing to the Company.
- All employees who receive uniforms or are enrolled in the FR program will wear them during Company paid hours.
- Employees will not wear uniforms or FR clothing other than on Company business.
- One fire resistant coverall will be issued to Maintenance and I&R Department employees as part of their personal protective equipment and maintained by them.

The Company will supply rental uniforms to:

Garage Mechanics
Garage Attendants
Building Maintenance Person
Building Maintenance Mechanic
Building Electrician
Meter Repair Department
Tool Mechanic

The Company will supply raingear to:

Facilities
Fleet
Meter Services
Maintenance
Instrument & Regulation
SMMT

The Company will supply rubber footwear to:

Meter Services
Maintenance
Instrumentation & Regulation

The following classification will be enrolled in the FR program:

Meter Services Technicians
Distribution Mechanic
Instrumentation & Regulation (All)
SMMT
Distribution Mechanic

- The initial allowance is $1,450.00.
- Each year thereafter the allowance is $800.00 deposited into employee's clothing account in January. Any unused amount of the allowance cannot be used for the following year's acquisition of clothing.
- In 2017 each employee enrolled in the FR program will receive an additional $200.00 allowance.

The practice of the Company issuing t-shirts will discontinue for employees enrolled in the FR program.

SAFETY SHOES

The employee, after producing a receipt for cost of safety shoes, will be reimbursed for one-half (1/2) the cost.

The following Classifications will be excluded:

1. All employees who fall under the Clerical Progression and Pay Plan.

2. Dispatchers.

LICENSES

The Company agrees to reimburse employees, including renewals, for licensing and certification fees for the following: hoisting license, welding certification, electrician license (if required) and Class A & B Driver's Licenses. (The Company agreed that all grandfather agreements now in effect will remain in effect.

EXAMS

The Human Resources Department after consulting with the Union President will appoint a representative of the Union who may review with a member of the Human Resources Department, the results of exams affecting job appointments. The Company will notify the Union in writing of the name of proposed appointee. Only the exams pertaining to that specific appointment may be reviewed.

All exams will be the same as those viewed by the Union during negotiations.

A Union designate will be present during the administration of all job-qualifying exams.

DOG REPELLANT

Dog repellant will be supplied any individual requesting it.

DISCIPLINARY ACTION SLIPS

If an employee has received no disciplinary action slips for a period of three (3) years, all slips prior to that period will be removed from his file and returned to the employee.

APRONS

The Company will provide aprons for personnel working in the Meter Repair Department.

Aprons will be supplied to the crew trucks in the Maintenance Department.

PRESCRIPTION GLASSES

The Company will pay for one pair of prescription glasses per year, which are pitted or damaged due to welding or cutting during the performance of Company duties.

DIVISION AREAS

The NSTAR Electric & Gas Corporation is divided into two division areas - East and West. These divisions are sub-divided into four report areas namely, Somerville, Dedham, Southboro and Worcester. There will be no change in the divisions or the report areas unless mutually agreed upon by Union and Company. Failure to reach agreement will result in the implementation of the change by the Company subject to the contract grievance procedure. During the term of this contract, the foregoing procedures concerning Divisions and Report Areas will take precedent over the management functions clause in Article II of the contract.

DAYLIGHT SAVINGS TIME

On the day when Daylight Savings Time is established, all employees working said shift will be paid eight (8) hours at their base rate.

When Daylight Savings Time reverts back to Eastern Standard Time, all employees working said shift will receive one (1) hour at the appropriate overtime rate in addition to their basic straight time rate.

SAFETY AND HEALTH

The Company will continue to make reasonable regulations for the safety and health of its employees during their hours of employment. Representatives of the Company and the union shall meet from time to time at the request of either party to discuss such regulations and other matters pertaining to safety.

Safety rules and practices and all applicable State and Federal Laws governing health and safety shall be complied with, by the Company and employees.

APPENDIX H

LEAVE OF ABSENCE

JURY DUTY

When an employee, except a temporary employee, is called to jury duty, he shall be excused from such of his regular scheduled work as is necessary to fulfill the jury duty, and the Company agrees to pay his base pay. The employee's schedule during the week of such absence for jury duty shall be deemed to be 8:00 A.M. to 4:30 P.M., Monday thru Friday.

The individual on jury duty will not be denied the opportunity to work overtime.

It is understood that employees will report for work if not called on a given day for jury duty or if released prior to 10:30 a.m.

SUBPOENAED WITNESS

The Company will allow necessary paid time off to an employee subpoenaed as a witness if the employee is not a defendant in the case or bringing action against the Company or its contractors.

FAMILY LEAVE

A regular employee shall be granted a leave of absence without pay up to 90 calendar days for the following reasons: care of a newborn or adopted child, care of an ill child, parent or spouse. Such leave may be extended by the Company.

A request must be made in writing to the Manager, Employee Relations within one week of expected date of the leave, if possible. Employee benefits will continue for a maximum of 30 calendar days from the beginning of the family leave of absence. If the employee chooses to continue such leave of absence beyond 30 calendar days, employee benefits will be continued in compliance with the law.

If the parent, child or spouse should die during said leave of absence, the employee shall be entitled to benefits as outlined in Appendix H, Funeral Leave.

Said employee shall return to the job and shift held prior to the leave.

The period granted as leave of absence will not constitute a break in the employee's service record if he returns to work upon its completion.

EMERGENCY LEAVE POLICY

Any employee required to remain away from the job on a regularly scheduled workday because of an emergency existing at home which requires his personal attention to make arrangements for care of such emergency, shall suffer no loss of base pay for that day provided he makes every effort to inform the Company, he reports for work as soon as is reasonably possible, and he works at least four (4) hours of that day. However, any employee after having reported for work on a regularly scheduled work day, and is then required to leave because of an emergency existing at home which requires his personal attention to make suitable arrangements for the care of such emergency, shall suffer no loss of base pay for that day.

FUNERAL LEAVE

When a death in the immediate family occurs, an employee will be allowed time off paid for at straight time rates to attend to the necessary funeral arrangements to a total of three (3) consecutive calendar days, if such days fall within his regularly scheduled work week. In special cases when a 4th day is required, it may be allowed at the discretion of the Area Manager or his delegate. In no case shall time off extend beyond the next scheduled workday after the funeral.

The immediate family means spouse, son, daughter, mother or father, sister or brother of the employee affected. In special cases, a relative with whom one lives in the same household may be allowed as in the immediate family at the discretion of the Area Manager or his delegate.

In the event of a death of an employee's mother-in-law or father-in-law, an employee will be allowed time off paid for at straight time rates to attend to the necessary funeral arrangements to a total of 3 consecutive calendar days, if such days fall within his regularly scheduled work week, but in no case to extend beyond the day after the funeral.

In the event of the death of a grandparent, aunt, uncle, brother-in-law, sister-in-law, stepchild, stepparent or grandchild, and if the day of the funeral falls on the employee's regular scheduled workday, the employee will be allowed that day off at straight time rates if the employee attends the funeral.

If a holiday occurs as one of the days in this funeral period, holiday allowance only will be paid for that day in accordance with our regular holiday policy.

Past practices concerning a representative group of members of the Union will be continued.

The foregoing policy will not operate to extend any Paid Leave Policy except if a death should occur during an employee's vacation, the provisions and practices of this section shall apply, and the employee shall receive, if so requested, a re-assignment of those vacation days that were committed to the necessary funeral services and arrangements.

PERSONAL LEAVE OF ABSENCE

At the discretion of the Manager, Employee Relations, a Regular employee may be granted a leave of absence without pay for personal reasons not covered by other policies.

Each application for personal leave will be considered on the merits of the individual case. The Company will give the decision in writing within one (1) week of the request.

The period granted as leave of absence will not constitute a break in the employee's service record if he returns to work upon its completion.

Employee benefits will be continued for a maximum of 30 working days from the beginning of the Personal Leave of Absence.

MILITARY LEAVE

1. Service in Armed Forces Reserve Components

The Company approves the enrollment of employees in the National Guard Officers and Enlisted Reserve Corps of the United States Army, Air Corps and Navy and Marine Corps Reserves, and will grant military leaves of absence as specified.

2. Short Period Active Duty Training

A leave of absence up to a maximum of fifteen (15) working days in any calendar year for the purpose of active duty training will be granted to any employee who is a duly qualified member of a reserve component of the Armed Forces on receipt of written notice of dates of departure and return. Such leave of absence shall not affect the employee's right to his normal vacation, sick leave, or advancement. However, any portion of such leave of absence may be taken coincident with the employee's vacation if he so chooses.

- On receipt of a properly completed application, the Company will pay the difference between the employee's military pay plus allowances (except travel allowances) and employee's normal rate of pay for each day of scheduled work lost up to a maximum of five (5) working days in any calendar week. The computation will be based on a five (5) day work week.
- Military leave pay, when authorized, is subject to the normal deductions and to withholdings required by law.
- Leaves of absence under the above paragraphs will not interrupt purchases of pension, insurance, or health benefits if for less than one-month duration.
- No PR 2 is required for military leaves of absence of less than one month's duration, but the leave shall be indicated on the time card and the employee's request for leave, approved by his Department Head, shall accompany the first time card within the leave period.

(e) Standard forms for notification of proposed performance of active duty training and request for military leave pay may be obtained through the Payroll Department.

(f) Requests for leave of absence to attend service schools, or tours of duty for other than training will be considered as individual cases, on their merits.

3. Basic Training Periods for Reservist Enlistees

Active duty periods of three to six months are being required of some enlistees in reserve components of the Armed Forces. A leave of absence of up to six months plus necessary travel days will be granted, without pay, to any regular employee who, as a duly qualified member of a reserve component of the Armed Forces, is required to go on active duty for basic training as a condition of his service, on receipt of written notice with dates of departure and return. The period granted as leave of absence for this service shall not constitute a break in the employee's service record if he satisfactorily completes his tour of duty and returns to work upon its completion.

(a) The Group Life and Accidental Death Insurance and Employee Savings Plan participation of such employee will be suspended as of the first day of the month following his leaving the Company to enter the Armed Forces. They

will be reinstated upon his return to work. His supervisor will secure from the employee his certificates for such group coverage and will hold them during the employee's absence in the service.

(b) If the Company is providing medical coverage for the employee and/or his dependents, such coverage will be subject to suspension during the period of absence, except if the employee requests in writing that the coverage be kept alive. This will apply whether the coverage is for the employee only or for employee and dependents. The employee will be expected to use the health care that his branch of the service provides for himself and his dependents.

(c) If the employee is a participant in the Pension Plan, benefits will accrue to him during such leave of absence based upon his rate of compensation as of the January 1st next preceding the commencement of his leave of absence provided he returns to work within 90 days of his discharge from Military Service.

(d) If the employee is entitled to a vacation before the date of his leave of absence, he may be given it then or it may be postponed until the end of the leave of absence. If he is not entitled to a vacation at the time he starts on his leave of absence, but would be so on the date of his return, he may then be given the vacation to which entitled if he had worked through the leave period, upon evidence of satisfactory completion of his tour of active duty.

4. Voluntary Enlistment or Service Under Effective Selective Service Acts

All pertinent provisions of Section 3. above will apply to employees occupying positions who are called for service in the Armed Forces under the provisions of the effective Selective Service Act, or who voluntarily enlist in the regular components, thereof.

(a) Leave of absence for such employees will be for the period for which called or enlisted, plus 90 days from the date on which released from such service, or from hospitalization continuing after discharge for not over one year.

(b) The employee must apply for re-employment with the Company within 90 days from his discharge or hospitalization as aforesaid, and present certificate of satisfactory completion of his period of training and service.

(c) If the Company is providing any medical coverage for the employee and/or his dependents, such coverage will be subject to suspension during the period of absence, except if the employee requests in writing that the coverage be kept alive. This will apply whether the coverage is for the employee only or for employee and dependents.

The employee will be expected to use the health care that his branch of the service provides for himself and his dependents.

5. General Provisions

An employee on military leave will not be entitled to pay for holidays or days sick occurring during his leave. Vacation with pay will depend on length of absence and time of year occurring.

An employee who is so injured while on military leave as to be unable to perform his Company assignment, or who will require further hospitalization after his normal release date, should not accept release from active service until he is able to resume work. He will not be accepted for work or be eligible for Company health benefits until certified as able to work by a Company doctor.

APPENDIX I

EDUCATIONAL AID

TUITION ASSISTANCE PROGRAM POLICY

Under the tuition assistance program, you may be reimbursed up to $4,000. per year for undergraduate degree work or up to $5,250. per year for graduate degree work for approved courses. Reimbursement will be made only if you receive a final grade of “C” or higher. The actual dollars reimbursed will vary with the grade received: A=100%, B=90%, C=80%. In the case of a pass/fail course, reimbursement will be made only if you pass. Books and other materials are not covered under this policy.

For a course to be approved, it must be related to the work you perform for the Company or the related work that you could reasonable be expected to perform for the Company in the future. Courses that lead to law degrees or PhD’s are

not approved for reimbursement unless pre-approved by the Senior Vice President of Human Resources at NSTAR, or an authorized delegate.

APPENDIX K

G.I. BILL APPRENTICE PROGRAM

The Company agrees on a voluntary Basis to participate in the Apprentice Program under the G.I. Bill.

Upon reasonable notice to the any affected employees, the Company reserves the right unilaterally to end participation in this program should the Company in its sole discretion decide that this is an appropriate step.

APPENDIX L

EDUCATIONAL ASSISTANCE

Confirming agreement reached during recent contract negotiation, the Company will provide up to $48,000 (up to $12,000 per year) for the purpose of an educational assistance plan for each dependent child of an employee who dies as a result of an accident on the job. This plan will be administered solely by the company and payment will be made upon submission to it of bills from the college in connection with room and board, fees, registration, tuition and books.

APPENDIX M

DEPENDENT DEATH BENEFIT

Confirming the agreement reached during recent contract negotiations, dependents of employees who die, as a result of an accident on the job, shall receive hospital, dental and vision care benefits. Coverage for spouse will cease with remarriage, reaching age 65 or become covered under another group plan. Coverage for dependent children will cease same as active employees. Benefits to be paid at 100% by the Company.

MEMORANDUM OF Agreement

This shall be considered a Memorandum of Agreement between the Company and the United Steelworkers Union regarding the establishment of a Distribution Support Technician (DST) Classification.

1. The job specification of Distribution Support Technician is accepted at the rate of pay outlined below and will become effective on April 2, 2010.

2. Rate of Pay:
   Trainee: $20.00
   6 Months: $22.00
   12 Months: $23.50

3. HOURS: Distribution Department, Monday- Friday 7:30 am – 3:30 pm, from first Sunday in May through last Saturday in October.

4. Hours: Meter Services Department, Monday-Friday 1:00 pm – 9:00 pm, except for period listed above.

5. Locations: 0-4 DST's in EAST (Somerville & Hyde Park) in 2010
   0-4 DST's in the West (Southborough & Worcester) in 2010
   Total for 2010: 0-8 DST's

   0-6 DST's in East (Somerville & Hyde Park) in 2011 & 2012
   0-6 DST's in West (Southborough & Worcester) in 2011 & 2012
   Total for 2011, 2012: 0-12 DST's

6. This classification will be excluded from Appendix F Unless,
a. At the Company's discretion, an employee is upgraded to a Distribution Mechanic C to cover a vacation of any duration, sickness or restricted (light) duty over 5 days: or
b. By mutual agreement, other circumstances result in the upgrade.

7. Article V – Hours and Wages, Section 14 – Assignment Outside Regular Report Area shall only apply when employees move East to West or West to East.
8. The Distribution Support Technician is responsible for successfully completing all training, OJT tasks and examinations as required.

Memorandum of Agreement

This shall be considered a Memorandum of Agreement between the Company and the United Steelworkers Union regarding the establishment of a Service Technician D Classification in the Meter Services Department

1.The job specification of Service Technician D is accepted at the rate of pay outlined below prior to the April 1, 2010 General Wage Increase.

2.The Service Meter Technician (SMT) Classification converts to a Service Technician D classification, effective April 2, 2010.

3. Service Technician D

Trainee:	$22.17 (6) months
Step 1:	$24.98 (6) months
Step 2:	$27.33 (6) months
Step 3:	$29.13

4. Current SMT'S may elect to be grandfathered at their present location and present work schedule, as Service Technicians D without progression.

5 No more than three (3) Service Technicians D will be scheduled on a Monday-Friday, 1pm-9pm shift in each area. Selection criteria for the shift:
(a). Volunteers by seniority for the Service Technician D in the area.
(b). Junior (non-grandfathered) Service Technician D in the area will be forced.

6.There will be no more than a total of twenty (20) Service Technicians D across all four (4) areas.

7.There will be no more than five (5) Service Technicians D in each of the four (4) areas.

8. Areas = Hyde Park, Somerville, Southborough and Worcester.

9. The Company and Local will work together to develop and implement a Service Technician Training Program, similar to the Distribution Training Program.

10. The Company will determine the progression from Service Technician D to C.
(a)If employed as a Local 12004 Service Technician D for 18 months or longer, training time to advance will be: 12 months from C to B, 9 months from B TO A, contingent upon successful completion of required classes and OJT.
(b)If employed as a Local 12004 Service Technician D for less than 18 months, the standard training times will apply according to present contract language, contingent upon successful completion of the required classes an OJT.
(c)Selection criteria for Service Technician C:

- Existing Service Technicians already in the progression C/B/A will have first option to select a new report area, before other represented employees. The Company and the Union will work together in the event that more than one (1) Service Technician leaves the area.
- Volunteer by seniority- All Service Technician D
- Former Service Technicians will have first options to bid this position before forcing area-junior (non-grandfathered) Service Technician D.
- Forced by area-junior (non-grandfathered) Service Technician D.

MEMORANDUM OF Agreement, Distribution Support Mechanic

This shall be considered a Memorandum of Agreement between the Company and the United Steelworkers Union.

1. The job specification of Distribution Support Mechanic is accepted at the rate of pay outlined below and will become effective on March 29, 2017.

2. Rate of Pay: Trainee: $24.26 6 Months: $26.65 12 Months: $28.40

3. HOURS: Maintenance Department, Monday- Friday 7:30 am – 3:30 pm, from first Sunday in May through last Saturday in October.

4. Hours: Meter Services Department Monday-Friday 8:00AM – 4:00PM pm. All incumbents in the DSM classification as of 4/1/17 will have the option of working 1:00PM – 9:00PM or 8:00AM – 4:00PM.

5. Total FTE's will not exceed twelve (12). The company will determine report locations.

6. This classification will be excluded from Appendix F Unless,
a. At the Company's discretion, an employee is upgraded to a Distribution Mechanic C to cover a vacation of any duration, sickness or restricted (light) duty over 5 days: or
b. By mutual agreement, other circumstances result in the upgrade.

7. Article V – Hours and Wages, Section 14 – Assignment Outside Regular Report Area shall only apply when employees move East to West or West to East.

8. The Distribution Support Mechanic is responsible for successfully completing all training, OJT tasks and examinations as required.

9. Distribution Support Mechanic will complete activity reports associated with tasks they perform.

10. Distribution Support Mechanic can make safe in accordance with first responder training, such as, evacuating and standing by for Service Technician.

11. At second cycle in the Meter Services Department or one (1) year of service, The Distribution Mechanic can isolate and after calling for a Service Technician, determine if he can leave the job before the Service Technician arrives.

12. The DSM classification will perform repairs on gate boxes. Types of repairs include roadway projects, paving projects, municipal and state projects and any and all work associated with G.L. C. 164 116B. Gate box repairs requested by other departments will be performed by DSM's as long as it is scheduled work. Any emergency type work will be performed by the Gas Maintenance department.

2013 Contract Negotiations

LEGAL REPRESENTATION

NSTAR Electric & Gas Corporation agrees to provide Local 12004 with legal representation for all its members who require this assistance as a result of any act or acts in connection with:

the business of the Company

This assistance will be provided only when the employee is acting within the scope of his/her authority and meets the above-stated test.

NEW HIRES

New Hires to EVERSOURCE will be given an opportunity to meet with the USW Local 12004 Administrator for one-half (1/2) hour during their orientation with the Company.

DISTRIBUTION MECHANICS

The Company and Union agree that twelve Distribution Mechanics will be transferred each year from January thru March to perform ATM inspections. Transferred employees from Distribution will be offered all applicable Appendix F overtime.

DISTRIBUTION WELDER TECHNICIAN TRAINING COORDINATOR

The Company agrees to establish two (2) Distribution Welder Technician Training Coordinators, to be determined by department seniority. One (1) will be assigned to the West Division and one (1) will be assigned to the East Division. The Distribution Welder Technician Training Coordinators will be paid seven percent (7%) above the current rate of pay when engaged in training, certifying and recertification of welders. The Company agrees to work with the local to develop a welder training program no later than September 1, 2013.

SERVICE TECHNICIAN – D

Service Technicians D can make safe in accordance with the first responder training, such as evacuating and standing by for a Service Technician.

Once the Service Technician attains the B rate in his progression, he can isolate, red tag, and after calling for a Service Technician, determine if he can leave the job before the Service Technician arrives.

Service Technician D can repair leaks on the work he performs and other incidental leaks, i.e. swivels, unions or tightening the nuts.

2013 Contract Negotiations

DISTRIBUTION SUPPORT TECHNICIAN

Distribution Support Technicians will complete activity reports associated with tasks they perform.

Distribution Support Technicians can make safe in accordance with first responder training, such as, evacuating and standing by for a Service Technician.

At second cycle in the Meter Services Department or one (1) year of service, the Distribution Support Technician can isolate and after calling for a Service Technician, determine if he can leave the job before the Service Technician arrives.

The rate of pay will increase by fifty ($.50) cents on the rate effective April 1, 2013, prior to the general wage increase.

INSTRUMENTATION AND REGULATION DEPARTMENT

Instrumentation and Regulation Department will perform critical valve inspections at gate stations and pressure regulating facilities.

Instrumentation and Regulation Department will conduct joint project review committee sessions during the1st and 3rd quarter of each year to discuss upcoming projects for the department. At said sessions, one (1) designated Local 12004 Instrumentation and Regulation representative from each area and one (1) union officer, appointed by the President of the Local will attend.

The rate of pay for the following will increase as stated, effective April 1, 2013:

- Instrument Technician $.60 per hour
- General Technician $.55 per hour
- Maintenance Technician $.55 per hour

GENDER CLAUSE

Whenever used in this agreement, a masculine pronoun shall be deemed to include the masculine and feminine gender, and a singular word shall be deemed to include the singular and plural, unless the context clearly indicates otherwise.

AGREEMENT

PARTIES AND DATE

THIS AGREEMENT, DATED APRIL 1, 2020 between NSTAR Electric & Gas Corporation, d.b.a. Eversource Energy, (hereinafter the "Company") and the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied-Industrial and Service Workers International Union, AFL-CIO/CLC on behalf of Local 12004, United Steel, Paper and Forestry, Rubber Manufacturing, Energy, Allied- Industrial and Service Workers International Union, AFL-CIO/CLC (hereinafter called the "Union")

WITNESSETH

GENERAL PURPOSE

Whereas, the parties hereto have reached an Agreement as a result of collective bargaining and for the purpose of facilitating the peaceful adjustment of differences that may arise from time to time, and to promote harmony and efficiency to the end that the Employees, the Company and the General Public may be benefited, the Parties hereto contract and agree with the other as follows:

Compliance and Applicability of Laws

Section 1. Compliance with Laws
The parties hereto shall comply with the provisions of all applicable laws and all lawful regulations, orders and directives issued thereunder relating to rates of pay, wages, hours of employment and other conditions of employment during the term of this Agreement.

Section 2. Applicability of Laws
It is agreed that the provisions, if any, contained in this Agreement which are in conflict with the provisions of any Federal or any state laws and lawful regulations orders and directives shall not be enforceable.

ARTICLE I

GENERAL

SECTION 1

RECOGNITION OF UNION FOR CERTAIN DEPARTMENT

Pursuant to, and in conformance with, the National Labor Relations Act, the Company recognizes the Union as the sole collective bargaining agency in behalf of all Regular employees in the Office and Clerical Workers, Payroll*, Dispatch, Commercial, Buildings and Grounds, Distribution, Meter Repair, Production, Stores, Transportation, Customer Service and Instrumentation and Regulation Departments, to whom this Agreement applies for the purpose of bargaining in respect to wages, hours and conditions of employment.

"EMPLOYEE" DEFINITIONS

Wherever used in this Agreement, the words "employee" or "employees" shall refer only to those employees to whom this Agreement is applicable.

*Subject to the Memorandum of Understanding, dated December 4, 1974.

SECTION 2

CLASSES OF EMPLOYEES AND ELIGIBILITY

The provisions of this Agreement shall apply only to regular employees as defined in Article I, Section 1. The term "Regular Employees" means those holding regular positions so authorized by the Company.

It is agreed, however, that the following regular employees are excluded from the terms of this Agreement, and that they shall not be eligible for Membership in the Union:

Officers, Directors, Managers, Superintendents, Secretaries to the above, Engineers, Accountants, Buyers, Supervisors, Foremen, Guards, Salesmen, Payroll*, Meter Readers, Automated Meter Reader and Sales Clerks. Definitions of Supervisors and Foremen will be as defined in the National Labor Relations Act.

*Subject to the Memorandum of Understanding, dated December 4, 1974.

The following not being regular employees are, therefore, excluded from the application of the terms of this Agreement and except as noted in Article 1, Section 3, shall not be members of the Union:

(A) TEMPORARY EMPLOYEES

Those hired to fill temporary jobs such as seasonal construction work or temporary maintenance work. Any such employee who shall have worked twelve (12) consecutive months for the Company shall thereby become a regular employee, providing regular jobs are available.

The Company will not establish different hours for temporary employees other than those already established for regular employees.

(B) PROBATIONARY EMPLOYEES

Those hired on six (6) months' trial to fill regular authorized positions which are open or expected to be open. It is understood that if such probationary employees are found satisfactory, and if the positions are still open, they will

become regular employees.

SECTION 3

UNION SECURITY

Subject to the provisions of Sections 1 and 2 of this Article, it shall be a condition of employment that all employees of the Company covered by this Agreement and hired on or after September 1, 1973 or who are members of Local Union No. 12004, United Steelworkers, AFL-CIO-CLC in good standing on the execution date of this Agreement shall, on the thirtieth (30th) day following the execution date of this Agreement, become and remain members in good standing in the Union for the balance of the term of this Agreement.

It shall also be a condition of employment, subject to the provisions of Sections 1 and 2 of this Article, that all probationary employees who are hired on or after its execution date, and who thereafter become regular employees, shall, on the thirtieth (30th) day following the beginning of such employment, become and remain members in good standing in the Union for the balance of the term of this Agreement.

During the six (6) month probationary period, the Company shall determine the suitability of said new employee for acceptance as a regular employee. The decision as to the retention by the Company of any probationary employee as a regular employee subsequent to the completion of his probationary period of employment is one which is within the sole discretion of the Company and if the Company for any reason terminates said probationary employee from its employ at any time prior to or at the completion of his probationary employment, such action shall not be subject to the Grievance Procedure or to Arbitration under this Agreement, nor shall such action form the basis of any claim whatsoever under this Agreement.

In the event a probationary employee bids and is awarded another position within the Company, such employee will not be transferred to the new position until his probationary period is completed. Additionally, probationary employees will not be eligible for the Appendix F for the duration of their probationary period.

ARTICLE II

SECTION 1

UNION AGREEMENT ON CONTINUITY OF WORK

During the term of this Agreement or any extension thereof, there shall be no authorized or sanctioned cessation, retarding or stoppage of work because of any dispute which may result from an interpretation of this Agreement, or from any cause whatsoever. It is further agreed that any employee represented by the Union and/or subject to the terms and conditions of this Agreement who, without the authority or sanction of the Union, voluntarily absents himself or herself from work because of any dispute or demand may be denied further employment or suspended at the option of the Company, provided, however, the Union may use the grievance and arbitration procedure as contained in Article III of this Agreement on the sole question whether such employee absents himself or herself from work because of a dispute or demand.

COMPANY AGREEMENT ON NO LOCKOUT

The Company agrees that during the life of this Agreement there will be no lockout.

MANAGEMENT FUNCTIONS

Being among the usual functions of Management, it is agreed (subject as limited and stated in this Contract to review procedure in certain cases and to rules of seniority where applicable), that the Company has the sole right at all times to employ, promote, transfer, and discharge employees, and to determine the number and qualifications of employees. Nothing in this paragraph is to be construed as a statement of limitations of Management.

COURT OR SIMILAR ACTION

In further consideration of the mutual promises contained herein, the parties expressly agree that neither shall bring, or cause to be brought, any court, or other legal or administrative action against the other until after the dispute, claim, grievance or complaint has been brought to the attention of the Party against whom it was made and the said Party after actual notice of same, has within reasonable time, failed to take steps to correct the cause or circumstances giving rise to such dispute, claim, grievance or complaint.

SECTION 2

MUTUAL DESIRE FOR UNINTERRUPTED SERVICE

It is the desire of both Parties to provide for uninterrupted and continuous service. Nothing herein is intended, however, to prevent the resignation or discharge of individuals, the discharge being subject to review under the conditions and in the manner hereinafter specified in Article III, and Article IV.

SECTION 3

UNION DESIRE TO PROMOTE COMPANY'S WELFARE

The union agrees that its members will individually and collectively perform loyal and efficient work and service, use their influence and best efforts to protect the property of the company and the Company's interests, assist in promoting the sale of the company's products, and cooperate with the Company and the employees of all departments in promoting and advancing the welfare of the Company and its service at all times.

COMPANY TO COOPERATE WITH UNION FOR HARMONY AND EFFICIENCY

The Company agrees that it will cooperate with the Union in its effort to promote harmony and efficiency among all the Company's employees.

SECTION 4

AGREEMENT CONCERNING DISCRIMINATION AGAINST CERTAIN EMPLOYEES

The Company agrees not to interfere with the rights of its employees to become members of the Union. There shall be no discrimination, interference, restraint or coercion by the Company, or any of its agents against any employee because of Membership in the Union. The Union, agrees collectively and individually for its members and agents, not to intimidate or coerce employees into Membership and not to solicit memberships, distribute pamphlets or discuss Union matters during working hours. The Union further agrees for its members not to discriminate against any employee of the Company because of non-membership in the Union or to intimidate, coerce or refuse to work cooperatively with any employee or workman not a member of this Union, or to refuse to work upon or with materials furnished by the Company. The Union agrees that because of the nature of the Company's business, its members will promptly and loyally obey a request of a Company Supervisor where such request has direct connection with the work of the Company and is not contrary to Company Safety Rules; and in that they will promptly, loyally and carefully follow operating and safety rules. It being agreed, however, that any orders given shall be by Company Supervisors and will not be in violation of the Safety Rules as applicable.

ARTICLE III

SECTION 1

SHOP STEWARD SELECTION

Notification will be made by the Union as to the identity of the Grievance Committeemen and Shop Stewards within thirty

(30) days of the signing of the Agreement. The Company will be notified of any changes in position within seven (7) days. The Grievance Committeemen selected by the Union shall have the right to participate with any department Shop Steward in the various steps of the grievance procedure.

SECTION 2

EMPLOYEE GRIEVANCE PROCEDURE

In the event of any dispute between the Union and the Company as to the meaning, application or intent of the provisions of this Agreement, the procedure of settlement shall be as follows:

1st A discussion of the grievance between the aggrieved employee with his Shop Steward and his immediate Supervisor. If no satisfactory settlement is made, the Department Head and the Grievance Committeeman will be called in to the discussion at the first convenient opportunity.

2nd A meeting between the Shop Steward, a member of the Grievance Committee and the Department Head. At this stage, the grievance shall be presented in writing on a form mutually agreed to between the Company and the Union. The Department Head will give his answer in writing within seven (7) days unless the period is extended by mutual agreement. This step must be initiated within thirty (30) days of knowledge by the Union of the incident that caused the dispute.

NOTE: In making investigation under paragraph 1 and 2 above, the employees concerned shall first receive permission from the Department Superintendent or someone designated by him, to absent themselves from their work.

3rd A Meeting between the Grievance Committee and the President of the Company or his duly authorized representative. If a meeting between the parties is to be held it will be requested no later than thirty (30) days after the date of the Department Head's written answer in the second step. The Grievance Committee may be accompanied by a representative of the United Steelworkers, AFL-CIO-CLC. The parties agree to schedule quarterly meeting dates for 3rd step grievances hearings at the start of each year. However, in the case of termination, the parties agree to hold a Step 3 hearing within thirty (30) days of the Step 2 hearing or at the quarterly meeting, whichever comes first.

If not, the Local shall be notified in writing, giving the reason for delay. In the event that no satisfactory settlement of the dispute is reached by the foregoing procedure then such matter may be referred to a Board of Arbitration. If arbitration is not so requested within forty-five (45) days of the first meeting of this step, it shall be deemed abandoned unless said period is extended in writing by mutual agreement of the Grievance Committee and the Company.

4th In the event that arbitration is required, one arbitrator will be appointed within thirty (30) days of the request. The Arbitrator shall be chosen as follows: The Company and the Union will each designate a representative to choose the arbitrator. If the Arbitrator cannot be mutually agreed upon within ten (10) days of the initial request then said Arbitrator is to be appointed by the American Arbitration Association. No Arbitrator shall have the power to add or subtract from or modify any of the Terms of this Agreement or pass upon or decide any question except the grievance submitted to the Arbitrator in accordance with the foregoing provisions. The Arbitrator will be instructed to render a decision within thirty (30) days from receipt of all materials pertinent to the case. The award of this appointed Arbitrator shall be final and binding on both the Company and the Union. The Company and the Union shall bear the expense equally of the Arbitrator.

Mutually agreed upon extensions will automatically extend the time within the steps of the grievance procedure.

ARTICLE IV
WORKING CONDITIONS

SECTION 1

CONDITIONS NOT COVERED

Working conditions which were in operation on the effective date of the Agreement and which are not covered by this Agreement shall remain in effect unless changed by mutual consent of both parties to this Agreement. The Union agrees to not unreasonably withhold such consent when the change in question may interfere with the efficient operation of the Company; provided, however, that such change is not detrimental to the employees involved.

SECTION 2

SENIORITY DETERMINATION

Seniority shall be determined from the date of the beginning of the last continuous period of employment. In determining length of service for the purpose of seniority, absence from the Company's service for less than six (6) months shall be disregarded. Absence for more than six (6) months, but less than one (1) year, shall be deducted from length of service. Absence of more than one (1) year shall forfeit all seniority previously established, except two (2) years in case of lay-off. An absence due to any employee's resignation from the Company's service shall forfeit all seniority previously established. The only exceptions to this method of determining length of service shall be leave of absence in writing granted by an Officer of the Company, illness attested to by a Physician's Certificate, leave of absence for the transaction of Union business as provided for in Article IV, Section 4, or service in the Military Forces of the United States, or the Commonwealth of Massachusetts.

TEMPORARY TRANSFERS

Transfers may be made at the option of the Company on a temporary basis for a period not to exceed forty (40) worked days for any one transfer. Temporary transfers shall be limited to sickness/accident, vacations, restricted duty, job hold over and workload. Temporary transfers due to workload will be for the following areas: Meter Service(SNOPs), Gas Meter Shop (Meter Technician and ERTs) and snow removal in Facilities (B&G).

There will be no 40-day transfers from a department while the Company has outside contractors performing work in that department, with the exception of someone who is on restricted duty. An employees' restrictions will determine their eligibility for a temporary transfer. An employee on restricted duty cannot displace an unrestricted employee in his department. The Company will endeavor, first, to find work in his department and report area. If no such work is available, the Company will then attempt to find work in another department within his report area prior to transferring him. The practice of banking overtime associated with Appendix F, where applicable, will be for a period not to exceed thirty (30) days.

Temporary transfers beyond forty (40) worked days shall be mutually agreed upon. An employee may be subject to a Temporary Transfer twice in any calendar year. On a voluntary basis an employee may be transferred an unlimited number of times, with prior agreement from the Union. This will not affect the number of transfers which are mutually agreed to between the Company and the Union. (A permanent transfer of over forty (40) worked days shall be covered by Article IV, Section 5).

When a 40-day transfer occurs between two calendar years, the year in which the majority of time worked will determine what year the 40-day transfer is charged to; if split evenly (20 days/20 days), it will charged to the year the transfer ends.

SENIORITY STATUS WHEN INTERDEPARTMENT TRANSFER OCCURS

An employee transferred on a temporary basis shall continue to accrue seniority in the original department. The affected chief stewards and department stewards shall be notified of such transfers.

An employee permanently transferred to another department or job shall retain his seniority in his former department or departments, but not accumulate further seniority in such department, as of the date of transfer, if the transfer is to another department, but shall begin seniority in his new department as of that date.

LAY-OFF AND RECALL

Lay-off and Recall after Lay-off of employees shall be made initially within each department according to Company seniority, namely, length of service in the Company, but subject to the qualifications of the employees involved to do the work required. An employee laid off from a particular department under the foregoing shall have the option of returning to the last job he held in the department from which transferred. An employee laid off who has worked in one department only, or whose last job in the department from which transferred has been abolished will, where other jobs are available, have the option, without displacement of other employees, to transfer to such available jobs if qualified and able to perform the work required, otherwise he shall have the option of replacing an employee with the least Company seniority in a labor classification.

Employees who have been laid off from the Company shall be returned to work in the inverse order in which they have been laid off, provided they are qualified and have the ability to perform the work available, before any new employees are hired. The right to be recalled shall cease after three (3) years from the date of layoff. A laid off employee, who is notified by registered mail to return to work, must report to the Human Resources Organization with seventy-two (72) hours after such notice has been received by him/her and, when reporting, he/she shall advise said Company whether or not he/she will return. Said Company will send notification to the last known address. Should the letter be returned undeliverable or the employee fails to advise the Human Resources Organization within seventy-two (72) hours that he/she will return to work or fails to return to work within fourteen (14) days after advising the Company that he/she will do so, the next employee shall be called.

PROMOTIONS AND VACANCIES

Promotions and transfers to fill vacancies may be made both within departments and from one department to any other. In filling vacancies or making promotion, other qualifications being equal, Company seniority shall prevail. The word “qualifications” as used in this section, shall include such matters as experience, physical fitness, skill, knowledge, efficiency, and responsibility.

It is agreed that if a vacancy is to be filled that the past practice of posting or filling position without undue delay will be continued.

REVIEW RIGHTS RE NON-PROMOTION, LAY-OFF, OR NON-REEMPLOYMENT

If an employee has not been promoted, or has been laid off and not reemployed, such employee shall have the right to have his case reviewed, provided he requests such review within two (2) weeks, in accordance with Article III. If a Union member receives an unfavorable decision in regard to this paragraph, he may within six (6) months have the matter reopened for consideration upon the discovery of newly obtained evidence and facts.

If an employee is discharged for any reason, such discharge or demotion may be reviewed under the grievance procedure set forth in Article III, provided a request for such review is made within two (2) weeks. The Company shall then furnish him with the reason for his discharge or demotion. If upon investigation such employee has been found to have been unjustly discharged or demoted, he shall be reinstated and shall be paid for any time he may have lost at his regular rate of pay.

Any dispute arising out of the operation of seniority shall be settled as provided elsewhere in this Agreement for the settlement of all grievances or disputes.

SECTION 3

BULLETIN BOARDS

The Company shall provide bulletin boards at locations mutually agreed upon for the purpose of posting official Union notices only. Said notices shall not be of a controversial or political nature as determined by the Company's designated representative. Said bulletin boards shall be glass-enclosed, and the Union Secretary shall be responsible for the posting of any notice in accordance with the foregoing.

SECTION 4

RIGHT OF EMPLOYEES TO SERVE UNION AS OFFICIALS

The Company agrees to grant to employees of the Company who are members of the Union such reasonable leaves of absence for transacting business of the Union or any Affiliated Union Organization in such numbers and for such length of time as the Company shall determine. An employee shall not be entitled to be paid by the Company during any such leave of absence.

Any member of the Union granted a written leave of absence and employed in any official capacity by the Union, or any Affiliated Union Organization, shall not lose his seniority in the department in which he was employed. Such employee of the Company permanently employed by the Union in any official capacity, or by an Affiliated Union Organization, shall, upon being relieved of his official position with the Union, be entitled to be reinstated in the position he held at the time of taking such official position.

The Company further agrees that time lost by an employee when transacting authorized Company-Union business, such as negotiation or grievance proceedings, shall be paid for by the Company.

(a) Grievance proceedings reimbursement at Step 3 meetings will be limited to a maximum of eight (8) members.

(b) Arbitration proceedings reimbursement will be limited to a maximum of three (3) bargaining unit members.

(c) Negotiation proceedings reimbursement will be limited to a maximum of eight (8) members.

SECTION 5

JOB POSTING

When an existing or a new job classification which falls within the range of jobs covered by the Bargaining Unit is to or has become vacant or is to be filled, notice of such Job Classification is to be posted for a period of ten (10) calendar days. The notice is to state the name of the job, the name of the person to whom applications for such job are to be made, and the date and time before which such applications must be made in order to be considered. The "open" job will not be filled until the time specified in the posted notice except if the Company deems it necessary, it may fill such job on a temporary basis. No "posting" will be made, however, to cover the usual filling of jobs temporarily vacant due to such conditions as sickness, accidents, vacation, etc. Within two (2) weeks after expiration of the posting period, the vacancy will be filled by the accepted applicant, but if there is no applicant who is qualified, the Company shall have the right to hire a new employee to fill such vacancy within 60 days of the expiration of the original posting date, after which time the job will be re-posted if it is to be filled. The employee will be transferred no later than the third Sunday following the Award Posting. Any employee assigned to a posted job with a progression of 24 months or less, shall have forty-five (45) "worked" days in which to qualify. If the posted job has a progression of more than 24 months, the employee shall have sixty (60) "worked" days in which to qualify. If he is unable to qualify, he may return to the classification from which he came without loss of seniority rating therein. The resulting vacancy will be offered to the next qualified bidder from the original posting. If there are no other qualified bidders, the Company shall repost the job if it is to be filled. All other provisions of this Contract not inconsistent with this paragraph are to apply concerning the filling of a job classification, except for employees who have not made application in compliance with this job posting provision.

Employees away from work because of vacation, illness or other legitimate reasons one or two days during the posting period will have an additional one or two days, as appropriate, to bid the job once they have returned to work, assuming it is within two (2) weeks of the date of the job award.

Employees senior to the successful applicant away from work because of vacation, illness or other legitimate reason for the entire posting period may within two (2) weeks of the date of the job award question the award.

The company will notify the Union in writing as to whom the applicants were and who was the successful applicant.

Job Posting and Bidding Sheet formats will not be changed without mutual consent.

ARTICLE V
HOURS AND WAGES

SECTION 1

SCHEDULE OF WAGE RATES

The Union and the Company agree that subject to conditions of the Contract, the wage rates in effect for the term of this Agreement shall be in accordance with the schedule marked SCHEDULE OF WAGES, in Appendix A which is made a part hereof. It is further agreed to hire at a rate of pay no more than the negotiated rates, which are effective at the end of the first six (6) months of employment.

SECTION 2

NORMAL WORK WEEK DEFINED

The normal work week for all employees covered by this Agreement shall consist of forty (40) hours being five (5) consecutive days of eight (8) hours.

SECTION 3

WORKING SCHEDULE STIPULATIONS

A stated hour for reporting for work, and a stated schedule of working time shall be given each employee, and except in cases of emergency, forty-eight (48) hours' notice of any change in such schedule shall be given to him, except where employees request and it is agreed to schedule two (2) shifts in one day (department payroll day) in order for the employee to obtain more consecutive or convenient time off. Each employee shall keep the Company informed in regard to changes in his address or telephone number. Address changes shall be reported to the Union Recording Secretary in writing by the Company. If for good cause an employee is unable to report for work, reasonable notice of such fact should be given to the Company.

An employee will not be required to work outside his report area zone except as outlined in Article V, Sections 13 and 14.

SECTION 4

CALL-IN DEFINITIONS AND STIPULATIONS

RECALL TO WORK

A recall to work occurs during non-scheduled hours when an employee is called back to work and is released before his next scheduled hours.

EARLY CALL IN

An early call in occurs when an employee is called in before his regularly scheduled shift and continues working into that shift.

TRAVEL TIME

Travel time is one (1) hour's pay, allowed to cover time coming to and going from work, and applies only to "Recall to Work". One-half (1/2) hour's pay will be paid as travel time on an "Early Call In".

STIPULATIONS

RECALL TO WORK

If an employee is "Recalled to Work" during non-scheduled hours, such work time plus an allowance of one hour for travel time shall be overtime. In no such case shall this total be less than five (5) hours. For Mark-Outs in no such case shall this total be less than (4) four hours.

EARLY CALL IN

"Early Call In" will be paid for at overtime rates for time worked prior to regular starting time.

SECTION 5

OVERTIME STIPULATIONS

1. An employee shall be credited with overtime for all work in excess of eight (8) hours worked in any one (1) day except where employees request and it is agreed to schedule two (2) shifts in one day (departmental payroll day) in order for the employee to obtain more consecutive or convenient time off, or in excess of forty (40) hours worked in any one (1) payroll week at one and one-half times his base wage rate.

2. Employees covered by this Agreement shall receive pay at time and one-half their base wage rate for all work that does not occur within their regularly scheduled work day or work week (except whenever the opportunity is offered employees to make up their forty (40) hour week, after having lost work due to conditions beyond the Company's control, such time shall be paid for at the straight time rate).

This paragraph shall not be construed to change in any way the present holiday, sick pay policy or equalization of overtime policy.

3. An hourly paid employee who may be required to report to work at regular starting time is to be allowed a minimum of four (4) hours pay when, in the Company's opinion, conditions prevent work being performed.

4. It is agreed to continue the present policy on posting lists for the equalization of overtime.

5. The following will apply for off-hours call outs of Maintenance, Meter Services and Instrumentation and Regulation personnel.

   The Company will make two attempts to reach the individuals necessary to respond to a call out by area.

   If the number of individuals required for Distribution call outs is not reached by using the area call out list, the Company will make one attempt to reach the individuals required by utilizing the call out list from the report area in that region:

Region 1	Somerville, Hyde Park
Region 2	Southborough, Worcester

The existing practice of calling qualified individuals from other Instrumentation and Regulation report areas will continue.

Individuals called from these lists will report directly to the location or the report area as directed by the supervisor.

If unable to obtain the required number of people, supervisory and/or contractor personnel will be utilized.

The past practice regarding call outs for specialized personnel will continue.

Affected personnel will indicate at the beginning of each workday their availability to work continuous overtime and their availability for off-hours call outs.

SECTION 6

HOLIDAY STIPULATIONS

1. The following days shall be recognized as holidays on the day on which they are observed: New Year's, Martin Luther King Day (can be substituted for a Floating Holiday), Washington's, Memorial Day, Floating Holiday, Independence Day, Labor Day, Columbus Day, Veteran's Day, Thanksgiving Day and Christmas*.

   Bunker Hill Day will be replaced with a Floating Holiday, which must be selected and approved prior to November 1, in the year for which it applies. For those wishing to substitute Martin Luther King Day for a Floating Holiday must make that selection by November 1st of the preceding year. Subject to operational needs, the Company will attempt to accommodate the employee's request. Employees shall not receive both sick pay and holiday pay on any normally scheduled workday.

   If any employee is required to work on a floating holiday which had been scheduled and approved, said employee will have the option of being paid according to Article V, Section 6 or paid at straight time and reschedule the floating holiday.

   If the holiday cannot be rescheduled within the year for which it applies, the employee must schedule it within sixty (60) days from the first day of the following year or it will be forfeited.

2. If an employee is not required to work on the holiday, said employee shall be paid a holiday allowance equivalent to eight (8) hours pay at his regular base rate of pay.

3. a) If an employee is required to work on a holiday, he shall receive time and one-half for the first eight (8) scheduled hours worked, plus holiday allowance as set out above. For all hours worked in excess of eight (8) hours he shall receive pay at the rate of two and one-half times his regular base rate of pay.

   b) In a week in which one of the holidays listed in 1. above is observed, if prior to the holiday it was understood that the employee would not be required to work on such holiday but he is notified on the holiday that work will be required that day, he will be paid a minimum of five (5) hours, at the applicable rate provided in paragraph (a) above, for his work on such holiday, plus the Holiday Allowance referred to in paragraph 2.

   c) If an employee is required to work on Christmas Day, he shall receive double time (2) for the first eight (8) scheduled hours worked, plus holiday allowance as set out above. For all hours worked in excess of eight (8) hours, he shall receive pay at the rate of two and one-half times his regular base rate of pay.

   d) In the event of a call into work on Christmas Day, the employee will be paid two (2) times their hourly rate for all

hours worked.

* If the Company observes Christmas on the day before or the day after December 25th, employees who work on the observed day will receive regular overtime rate of one and one-half (1 ½) .

4. With the exception of employees on Union business, no employee covered under this Agreement shall be eligible for any holiday allowance as set forth above if such employee is not receiving pay for the payroll week in which the holiday occurs.

5. Any holiday as set forth in this contract which falls on a Saturday will be observed on the preceding Friday.

6. Nothing in this contract shall be construed to provide for the pyramiding of overtime or premium pay.

SECTION 7

SUNDAY PREMIUM STIPULATION

A premium of 35% will apply to all regularly scheduled hours of work on scheduled shifts, the major portion of which shifts fall between 12 Midnight Saturday and 12 Midnight Sunday. This premium applies to basic hourly wage rates only, it being understood that the payment of such premium is limited to straight time worked.

SECTION 8

SHIFT DIFFERENTIAL

1. Shift differential or premium pay shall be in addition to the affected job classification base rates and shall be payable for regularly scheduled rotating shift jobs whenever and for such periods, other than "day" shift, as scheduled and shall be figured at the rate of two dollars and fifteen cents ($2.15) per hours worked during "afternoon" shift and two dollars and fifteen cents ($2.15) per hours worked during "night" shift. Effective April 1, 2021, the amount shall be increased to two dollars and twenty-five cents ($2.25). Effective April 1, 2022, the amount shall be increased to two dollars and thirty-five cents ($2.35). Effective April 1, 2023, the amount shall be increased to two dollars and forty-five cents ($2.45).

2. Such pay shall not apply under the following policies: sickness, accident, vacation, holiday, leave of absence.

3. "Day", "afternoon", and "night" shifts shall be defined as follows:

   (a) "Day" shifts shall include all shifts scheduled to start between 7:00 a.m. and 9:00 a.m.

   (b) "Afternoon" shifts shall include all shifts scheduled to start between 12:00 p.m. and 5:00 p.m.

   (c) "Night" shifts shall include all shifts scheduled to start between 10:00 p.m. and 12:00 a.m.

   (d) Classifications required to work shifts will be defined in Appendix C and Appendix J.

4. If an employee is not entitled to a shift differential during his REGULARLY SCHEDULED hours, he will not receive a shift differential during overtime hours.

5. If an employee works into a shift preceding or succeeding his regularly scheduled shift, he will carry the premium or shift differential (if any) which corresponds with his regularly scheduled shift. This premium or shift differential (if payable) shall on overtime hours be multiplied by one and one-half. The past practice regarding shift differential on overtime worked on days of relief will continue.

6. SHIFT ASSIGNMENTS

Seniority within the department roster will be the determining factor in the assignment of shifts. The junior individuals will be required to work the shifts not volunteered for by the senior individuals. All voluntary shifts will be on a permanent basis. An individual who volunteers to work a permanent shift will only be permitted to change said shift if another individual volunteers to take that shift on a permanent basis after posting within the affected department report area, or it shall be assigned to an individual who was not in the roster at the time it was accepted on a permanent basis.

SECTION 9

PAYMENT FOR WORKING SECOND DAY OF RELIEF

An employee who is required to work on the 2nd day of relief in any consecutive 7-day period and having worked one hour of his 1st day of relief and all of his scheduled hours during such period shall be paid double time his regular base rate of pay for hours worked on said 2nd day of relief. An employee who has earned premium in accordance with this provision will not be entitled to another such premium until he has again qualified for it, on the basis of work performed in another 7-day period.

SECTION 10

MEAL STIPULATIONS

If an employee is required to work ten (10) consecutive hours or more, he shall receive a meal reimbursement not to exceed nine dollars and seventy-five cents ($9.75). If the employee continues working beyond the tenth hour, he shall receive an additional meal reimbursement not to exceed nine dollars and seventy-five cents ($9.75) to be paid for each additional four (4) hours of continuous overtime work thereafter. Effective April 1, 2021 the amount will be increased to teen dollars ($10.00). Effective April 1, 2022, the amount will be increased to ten dollars and twenty-five cents ($10.25). Effective April 1, 2023 the amount will be increased to ten dollars and fifty cents ($10.50).

If an employee is recalled to work and is required to work four (4) or more hours, he shall receive a meal reimbursement not to exceed nine dollars and seventy-five cents ($9.75), except that effective April 1, 2021, the meal reimbursement will be increased to ten dollars ($10.00) and effective April 1, 2022 the meal reimbursement will be increased to ten dollars and twenty-five cents ($10.25), and effective April 1, 2023 the meal reimbursement will be increased to ten dollars and fifty cents ($10.50).

It is agreed that this section does not apply where employees work overtime through courtesy to fellow employees.

SECTION 11

REST PERIOD STIPULATIONS

If an employee is required to work sixteen or more consecutive hours, he will be allowed a period of nine hours off before returning to work unless an emergency arises which makes it necessary for the Company to call him back to work before the expiration of the nine-hour period. Any part of the nine-hour period, which extends into the employee's normal work schedule will be paid for at basic straight time rates. If such paid time shall carry him to within two (2) hours of the end of his normal work schedule, he shall be excused without loss of pay from his normal work schedule. Time allowed off for meals will not prevent the hours worked from being considered consecutive.

If an employee continues to work for more than twenty-four (24) consecutive hours, he will receive the appropriate overtime rate for all consecutive hours worked after his original shift.

SECTION 12

RATE OF PAY WHEN ASSIGNED TO ANOTHER JOB CLASSIFICATION

Employees assigned temporarily to a higher rated job for periods of three (3) hours or less but more than one-half (1/2) hour shall receive the higher rate of pay for actual time worked on the higher rated job that day. Such time shall be calculated on a cumulative basis.

Employees assigned temporarily to a higher rated job for periods of more than three (3) hours shall receive the higher rate of pay for all straight time worked that day.
Employees temporarily assigned to a lower rated position shall retain their regular rate of pay.

Selection of employee to be transferred shall be in accordance with Article IV, Section 2, Promotions and Vacancies.

SECTION 13

EMERGENCY WORK PREMIUM

When an employee is assigned to work outside his normal report area for a period of more than 24 continuous hours, including travel time, the method of payment will be as follows:

a) The employee so assigned will be paid for working time at the applicable overtime rate, and for rest time at their regular straight time rate.

b) The Rest Period Policy will not apply during this emergency work when employees are being paid under (a), but every effort will be made to give employees adequate rest time.

c) If a holiday occurs during this assignment, working time shall be paid for at the applicable holiday rate and rest time at the regular straight time rate.

d) When the assignment is completed, and the employees have returned to their own Report Area, the normal method of payment and rest time procedures will be in effect.

e) Employees covered by this Agreement, in like classifications, in the areas to which outside crews have been assigned in excess of 24 continuous hours, will be paid according to the same premium method as the assigned crews covered by this Agreement. The rest period application will be the same beginning at the time the first outside crew arrives in the area and continuing until outside crews have left the area when the normal method of payment and rest procedures will be in effect.

f) If employees in other classifications are assigned and become working participants in the area of the service interruption for a period in excess of 24 continuous hours including rest time, the above provisions will apply.

g) Employees once assigned under the above conditions will not be reassigned to circumvent this Agreement.

SECTION 14

ASSIGNMENT OUTSIDE REGULAR REPORT AREA

When an employee is required to work outside his normal report area, at the start of the day, the following will apply

a) Without forty-eight (48) hours' notice, the employee has the option of reporting directly to his re-assigned location or his normal report area. Should an employee choose to report to his normal report area, he will be transported by the Company to and from the re-assigned location. In no case will an employee be required to travel on his own time or provide his own transportation on such an assignment. If an employee elects to report directly to his re-assigned location, he will be compensated in accordance with paragraph b) outlined below.

b) With forty-eight (48) hours' notice, the employee may be required to report directly to his re-assigned location. If such is the case, the employee will be required to travel on his own time and provide his own transportation. An employee will receive an allowance equal to one (1) hour of his straight time base rate for each way of the required travel.

c) The Company will solicit for volunteers based on Company seniority. In the event there are no volunteers, the qualified junior employee will be assigned.

d) Distribution Support Technician – Assigned Outside Regular Repot Area shall only apply when employees move East to West or West to East.

SECTION 15

RETROGRESSION PAY PLAN

Where an employee of ten years or more of continuous service, because of disability, is or becomes unable to continue to perform assigned duties based on classification as of the date of disability, the rights of such employee and the obligations of the Company under such circumstances shall be determined in accordance with memorandum entitled "Disability Retrogression Pay Plan" which memorandum of said "Disability Retrogression Pay Plan" marked Appendix B is hereby incorporated by reference in this Agreement.

SECTION 16

EFFECT OF LAW ON OVERTIME PROVISIONS

All overtime provisions are subject to modification by the Company in the event of changes in Federal or State laws whether by statute or decision.

ARTICLE VI

SECTION 1

VACATION STIPULATIONS

All regular employees shall receive two (2) weeks vacation with pay in the calendar year provided their continuous regular employment preceded January 1st of the current vacation year, otherwise employees hired July 1 through December 31 are entitled to five (5) days vacation after becoming regular; employees hired after January 1 would receive one day of vacation, after becoming regular, for each full month of service through June 30th.

Month of Employment	Number of Vacation Days Employee is Eligible for Once Becoming Regular
July	5
August	5
September	5
October	5
November	5
December	5
January	5
February	4
March	3
April	2
May	1
June	0

Rate of compensation will be based on scheduled work week of each employee (calculated at the equivalent straight time rate) where employee is eligible for full two (2) weeks vacation.

On partial vacations where employees have less than two (2) weeks vacation, the rate of compensation will be based on scheduled workday (calculated at the equivalent straight time rate).

Effective January 1, 1981 the rate of compensation for one week's vacation pay will be based on the prior year W-2 earnings divided by the number of pay periods in the year, or 40 hours at the basic straight time rate in effect at the time of the vacation, whichever is higher. (On one-day vacations the weekly figure based on W-2 earnings will be multiplied by 1/5).

Each regular full-time employee who on the anniversary date of his last employment has been continuously in the employ of the Company five (5) or more years, ten (10) or more years, twenty (20) or more years or thirty (30) or more years, shall have a total vacation with pay equivalent to three (3) weeks of 40 hours each at straight time wage rates for the five (5) years service employee, four (4) weeks on a similar basis for the ten (10) year service employee, five (5) weeks on a similar basis for the twenty (20) year service employee, or six (6) weeks on a similar basis for the thirty (30) or more year service employee.

In addition to the above, each regular full-time employee who on the anniversary date of his last employment has been continuously in the employ of the company twenty-six (26) through twenty-nine (29) years shall receive additional vacation days as follows:

26 years	1 day
27 years	2 days
28 years	3 days
29 years	4 days

The third, fourth, fifth or sixth week, and twenty-six through twenty-nine days of vacation, as the case may be, will be available to such employee only on or after the above-mentioned respective anniversary date is to be completed within that calendar year by either time off or equivalent pay.

Employees will be allowed to carry over one (1) week vacation. Employees must notify Company by April 1st if they intend to carry over a week and it must be taken by December 1st of the following year. Employees will receive pay in lieu of if unable to take carry-over week in this time frame.

Employees required to work during their assigned vacation shall receive, in addition to their vacation pay, time and one-half their base rate of pay for all time worked. Vacation time worked and paid for under this clause will not be rescheduled.

Vacations will be granted according to schedules approved by the Company.

In choosing vacations within a department roster Company seniority shall govern.

In the event of a holiday falling within a vacation period, an employee shall have the option of receiving pay for the holiday in addition to his regular vacation pay or be given an additional day off with pay.

In the event that an employee becomes ill while on vacation, such time will not be considered vacation time but fall under Sick Pay Benefits if a doctor's certificate is presented.

Vacation payment of wages will be paid in advance unless otherwise notified by the employee.

The past practice on the scheduling of vacations will continue.

In the Somerville Report Area Gas Services Department - vacations will be granted according to Section 9 of the Memorandum of Agreement dated March 8, 1984.

VACATION STIPULATIONS FOR EMPLOYEES HIRED AFTER April 1, 2017

Added for employees hired after April 1, 2017 and optional for employees with less than five (5) years of service as of April 1, 2017:

Years of Service	Vacation Entitlement
Less than one year of service:	
Start date January 1 - March 31	15 days
Start date April 1 - June 30	10 days
Start date July 1 - September 30	5 days
Start date October 1 - December 31	No vacation days
One year but less than 10 years	15 days per year
10 years but less than 20 years	20 days per year
20 years or more	25 days per year

TERMINATION AND RETIREMENT

a) Each Regular employee whose service is terminated prior to receiving the current year's vacation shall receive pay for one forty-hour week at his regular rate of pay plus one day's pay at his regular rate of pay for each month of service prior to January 1, but not to exceed a total of ten working days.

b) Each Regular employee whose service is terminated as above and who has had five or more years of continuous service shall receive pay for one normal work week in addition to that provided for in the preceding paragraph.

c) Each Regular employee whose service is terminated as above and who has had ten or more years of continuous service shall receive pay for one forty-hour week in addition to that provided for in a) and b).

d) Each Regular employee whose service is terminated as above and who has had twenty or more years of continuous service shall receive pay for one forty-hour week in addition to that provided for in a), b), and c).

e) Each Regular employee whose service is terminated as above and who has had thirty or more years of continuous service shall receive pay for one forty-hour week in addition to that provided for in a), b), c) and d).

f) In addition to the above, each Regular employee whose service is terminated as above and who has had twenty-six (26) through twenty-nine (29) years of continuous service shall receive pay for additional days as follows:

26 years	1 day
27 years	2 days
28 years	3 days
29 years	4 days

g) Termination for the purpose of a), b), c), d), e) and f) shall include retirement, death and any other termination of service.

h) For retirement purposes, any vacation allowable under this policy in the calendar year of retirement may be taken as paid time off or cash on retirement at employee's option.

Effective January 1, 1981 the rate of compensation for one week's vacation pay will be based on the prior year W-2 earnings divided by the number of pay periods in the year, or 40 hours at the basic straight time rate in effect at the time of the vacation, whichever is higher. (On one-day vacations the weekly figure based on W-2 earnings will be multiplied by 1/5).

SECTION 2- EMPLOYEE BENEFITS

NSTAR Savings Plan

Eligible employees may participate in the NSTAR Savings Plan, which is incorporated herein, and which will continue in effect according to the terms of the Plan, so long as this Agreement shall be in effect.

NSTAR Pension Plan

Eligible employees will participate in the NSTAR Pension Plan which is incorporated herein, and which will continue in effect according to the terms of the Plan, so long as this Agreement shall be in effect. . Benefits for eligible employees will be determined under the terms and conditions outlined in the Plan document entitled "Pension Plan for Employees of Commonwealth Energy System and Subsidiary Companies" and eligible employees hired after March 31, 2006 will be entitled to new hire Pension Equity Plan provisions as described in the Plan.

Group Insurance

Eligible employees will be covered under NSTAR's Basic Group Life Plan, Accidental Death and Dismemberment Plan and Business Travel Accident Plan as are listed in the Group Welfare Benefits Plan for employees of NSTAR, which will continue in effect according to the terms of the Plan, so long as this Agreement shall be in effect. Eligible employees, and their eligible dependents, may participate in NSTAR's Supplemental Life Plan, Dependent Life Plan, and Personal and Family Accident Plan as are listed in the Group Welfare Benefits Plan for employees of NSTAR, which will continue in effect according to the terms of the Plan so long as this Agreement shall be in effect.

Health Plans

Eligible employees, and their eligible dependents, may participate in NSTAR's Medical, Prescription Drug, Vision and Dental Plans as are listed in the Group Welfare Benefits Plan for employees of NSTAR, which will continue in effect according to the terms of the Plan, so long as this Agreement shall be in effect.

Affordable Care Act Re-Opener Language

The parties agree to monitor the impact of the Excise Tax on High Cost Health Plans under the ACA (the "Excise Tax") and work collaboratively to overturn or otherwise mitigate the adverse impacts of ACA and the Excise Tax on Eversource. The parties agree to a limited re-opener which can be invoked by the Company if it makes the reasonable assumption based on regulatory guidance that it will be exposed to the Tax. The re-opener negotiations will be for the sole purpose of:

- Working together to design and implement options to the existing health insurance coverage for employees represented by USW Local 12004 (includes health plans such as medical, prescription drug, dental, vision, HSA, FSA, and other plans that may be subject to the Excise Tax) by making changes to existing plans, adopting a full replacement health plan or such other changes as the parties may agree are necessary to avoid or mitigate the Excise Tax; and
- Revisiting and potentially adjusting the cost borne by the Company and the employees including but not limited to payroll contributions, benefit levels or other forms of compensation.

If, at any time if after the parties have concluded re-opener negotiations and before December 31, 2019 the Company is relieved of the burden of the Excise Tax , then (absent any other negotiated result) the parties shall revert to the status quo preceding the agreements reached in the reopener.

During re-opener negotiations, the provisions of Article II, Section 1, Union Agreement on Continuity of Work and Company Agreement on No Lockout, of the collective bargaining agreement shall not apply and shall not limit the parties' respective rights under law. All disputes between the parties unrelated to the re-opener subjects will remain subject to the dispute resolution process contained in Article III, Section 2, during any period of re-opener negotiations.

Section 125 Plans

Eligible employees may participate in NSTAR's Dependent Care Plan, Flexible Spending Account and Health Savings Accounts, as are listed in the Group Welfare Benefits Plan for employees of NSTAR, which will continue in effect according to the terms of the Plan, so long as this Agreement shall be in effect.

Other Benefit Plans

Eligible employees may receive Employee Assistance, Adoption Assistance and Education Benefits. The provisions of these benefits are summarized in the "Other Benefits" section of NSTAR's Spectrum of Benefits binder and are incorporated by reference herein.

SICK AND ACCIDENT PLAN

Sick and Accident Benefits will be in accordance with Appendix D.

The Company reserves the right to provide the same benefits under another plan(s) or provider(s) if it so desires regarding those benefits described in Section 2.

ARTICLE VII

PAYROLL DUES DEDUCTION

The Company agrees to deduct weekly from earned wages, dues, and initiation fees, each as designated by the International Treasurer of the Union on the basis of and for the term of individually signed voluntary check-off authorization cards heretofore and hereafter submitted to the Company.

The Company shall promptly remit once a month any and all amounts that are deducted to the International Treasurer of the Union, 5 Gateway Center, Pittsburgh, Pennsylvania 15222.

The Union shall indemnify and save the Company harmless against any and all claims, demands, suits or other forms of liability that may arise out of or by reason of action taken by the Company with regard to this Article.

ARTICLE VIII

NON-DISCRIMINATION

Neither the Company nor the Union will discriminate or harass any employee because of such employee's race, color, religion, national origin, sex, age, disability, gender identity, sexual orientation, genetic information, ancestry, veteran status, or military service, or any other basis protected from discrimination under state or federal law.

ARTICLE IX

DURATION OF AGREEMENT

This agreement shall continue in full force and effect until midnight March 31, 2024.

During the term of this Agreement should any provision or part thereof become illegal, the rest of the Agreement will continue in full force and effect.

This Agreement shall bind and inure to the benefit of the parties hereto and to their respective successors and assigns: and the words "COMPANY" and "UNION" respectively shall be construed to include their respective successors and assigns.

SIGNATURES TO AGREEMENT

IN WITNESS WHEREOF the parties hereto have caused this Agreement to be signed and their seals to be hereto affixed by their duly authorized officers, the day and year first above written.

APPENDIX A

NSTAR ELECTRIC & GAS CORPORATION

LOCAL UNION NO. 12004

SCHEDULE OF WAGES AND PROGRESSION

The basic wage rates of all employees covered by this Agreement shall be in effect as of April 1, 2020 as indicated by the base hourly rates listed below:

Effective April 1, 2020, the basic wage rates of all employees covered by this Agreement shall be increased three (3.00%) percent adjusted to the nearest whole cent.
Effective April 1, 2021 the basic wage rates of all employees covered by this Agreement shall be increased three (3.00%) percent adjusted to the nearest whole cent.
Effective April 1, 2022 the basic wage rates of all employees covered by this Agreement shall be increased three (3.00%) percent adjusted to the nearest whole cent.
Effective April 1, 2023 the basic wage rates of all employees covered by this Agreement shall be increased three (3.00%) percent adjusted to the nearest whole cent.

*** New Technology Agreement*** An additional one-time increase of .25% was added to the general wage increase effective April 1, 2020 (See New technology Agreement on Page 87.

The policies in regard to promotions, wages and step increases as applied to all employees and job classifications covered by this Contract by and between NSTAR Electric & Gas Corporation and the United Steelworkers, AFL-CIO-CLC in behalf of Local Union No. 12004, United Steelworkers, AFL-CIO-CLC are shown on subsequent pages.

GENERAL CONSIDERATIONS

Promotions or step increases will occur on a time progression basis subject to the following requirements, duties and accomplishments:

a) Supervisors will make every effort to train employees and the employees are to cooperate in the training program, so that they may be qualified for promotion or for step increases on the dates as later scheduled.

b) Any employee with two (2) years of service as a regular employee who qualifies in a job where the progression is from "Trainee" to an "A" rate will be paid the "C" rate but will be classified as a Trainee and follow the progression as outlined on the subsequent pages.

c) Prior to time of scheduled progression of employee, his record will be reviewed to determine if his progress and qualifications are satisfactory to warrant the progression in and to the job classifications as generally but not exclusively set forth in the attached job descriptions. If it is determined that the employee's progress and

qualifications are not satisfactory to warrant progression, he shall remain in his present step and be eligible for review after three (3) months have elapsed.

d) If an employee in any department fails to pass a promotional exam in any progression step, he will remain in his present step and will be eligible to retake the exam after three (3) months have elapsed.

e) Employees who previously attained the "A" rate in a classification where the progression is from "Trainee" to "A", and who have not been in subject classification for five (5) years or longer, will, upon re-entering subject classification, be paid the "B" rate and following forty-five (45) "worked" days become eligible for the "A" rate.

f) All promotional exams in any progression step will be given within ten (10) "worked" days of the employees' eligibility date. Failure in giving the progression exam within the ten (10) "worked" days period will result in that employee progressing to the next step in rate. Exceptions to the above time limits must be mutually agreed.

g) At the end of the 1st six months of employment, which will be a test and probationary period, and if the Company upon review has designated the employee to become a regular employee, he will be classified in the suitable classification and rate as negotiated with the Union.

EFFECTIVE APRIL 01, 2020
WAGE AND STEP INCREASE POLICY IS AS FOLLOWS:

APPENDIX B

MEMORANDUM REGARDING

DISABILITY RETROGRESSION PAY PLAN

I NON-COMPENSABLE DISABILITY

In the event an employee becomes unable to perform his normal duties because of a disability for which he is not receiving Workers' Compensation benefits, and if the Company is able to provide him with work which he is capable of performing, he will be assigned to such work. His ADJUSTED pay rate shall be determined by the PLAN shown below.

(A) FUTURE RETROGRESSIONS

1. Less than ten full years of continuous service at time of retrogression.

   a) An employee with less than ten full years of continuous service with the Company at the time of retrogression shall receive the ultimate base rate of his new job classification.

   b) The new rate shall become effective at the time of such retrogression.

2. Ten full years or more of continuous service at time of retrogression.

   An employee with ten full years or more of continuous service with the Company at the time of retrogression shall receive no reduction in his basic rate of pay.

II COMPENSABLE DISABILITY

In the event an employee becomes unable to perform his normal duties because of a disability for which he is receiving Workmen's Compensation benefits, and if the Company is able to provide him with work which he is capable of performing, he will be assigned to such work. His pay rate shall be determined as set forth above, except that the following shall apply:

(a) If, at the time of retrogression, the employee is receiving compensation for partial disability, the Company will pay such amounts so that the employee's total compensation from the Company and from such Disability Benefits will equal the new (as determined by I (A) above) pay rate.

(b) The date the employee commences work at his lower classification shall be considered as the date of retrogression.

III GENERAL PROVISIONS APPLICABLE TO I AND II ABOVE

a) In all computations, only FULL YEARS of service shall be used.

b) An employee with ten or more full years of continuous service shall hold the title of his new job classification with the word "SPECIAL" appended thereto.

c) The Medical Representative of the Company in all cases shall consult with such employee's family physician and in the event of disagreement as to the employee's condition and/or ability to perform the work of any particular class, the case shall be referred to a recognized specialist or clinic in the field of medicine involved, whose opinion will be final and binding upon all parties.

d) No change in GROUP INSURANCE shall result from such retrogression.

e) An employee transferred to a lower classification under this PLAN shall be assigned without posting the job.

f) Reference to continuous service in the Company shall include service with other subsidiary companies of the same System.

g) If an employee who is being compensated under the provisions of this PLAN is again transferred to one or more lower classifications, his new rate shall be as if the employee had been transferred to such lower classification initially, using all factors applicable at the time of the first retrogression. The resultant rate shall reflect all wage adjustments, which were made in such lower classification since the date of initial retrogression.

h) The Company, may in its discretion, withhold the provisions of this PLAN for employees who also engage in work for other than the Company or its affiliates.

APPENDIX C

CLASSIFICATION QUALIFICATIONS AND SPECIFIC CONDITIONS

JOB DUTIES

See Job Postings for job duties as presented and agreed upon.

SCHEDULE OF HOURS AND SCHEDULE

See Appendix J.

FACILITIES DEPARTMENT

The Company and the Union agree to form a sub-committee to meet and discuss the current and future Buildings and Grounds manpower.

QUALIFICATIONS TO ENTER THE ROSTER FOR MAINTENANCE PERSON

1. Be physically fit.

2. Possess a valid Massachusetts Driver's License.

3. Pass the Bennett Test with a raw score of 24.

QUALIFICATIONS TO ENTER THE ROSTER FOR BUILDINGS MAINTENANCE MECHANIC

1. Must be able to perform moderate physical work in all types of weather and emergency conditions.

2. Possess a valid Massachusetts Driver's License.

3. Pass the Bennett Test with a raw score of 24.

4. Must have a minimum of five (5) years industrial experience in facilities related positions. This shall include troubleshooting HVAC systems and other mechanical systems pertaining to operating and maintaining large industrial buildings. Performs other non-mechanical work within the department as required.

5. Must possess and maintain a certificate in Basic Refrigeration.

6. Must obtain within eighteen (18) months of being awarded the position of Buildings Maintenance Mechanic, a certification/diploma for Refrigeration System Repair (HVAC Refrigeration) and be EPA certified in the recovery and charging of refrigeration gases.

QUALIFICATIONS TO ENTER THE ROSTER FOR BUILDINGS MAINTENANCE ELECTRICIAN

1. Must be able to perform moderate physical work in all types of weather and emergency conditions.

2. Possess a valid Massachusetts Driver's License.

3. Pass a Bennett Test with a raw score of 24.

4. Must have a minimum of five (5) years industrial experience in facilities related positions. This shall include troubleshooting, repairs and installation work of moderate scope of lighting, electrical, communications, data and electromechanical systems and control circuits associated with building power systems, HVAC systems and other control systems. Performs other non-electrical work within the department as required.

5. Must possess and maintain a Massachusetts Journeyman Electrician's License.

CLERICAL

QUALIFICATIONS TO ENTER THE ROSTER FOR CLERK.

1. Be Physically fit.

2. Pass job related tests.

3. The Plan call for Clerks to do any job in their respective departments and any Clerk in any department may be temporarily assigned to help out in another department during vacations, meal periods, rest periods, illness and other

reasonable absences within their report area.

CLASSIFICATION AND LOCATION BY REPORT AREA

Title	Location				
Clerk:	Somerville	Hyde Park	Southboro	Worcester	Westwood
Dispatch:					
Distribution:	Somerville	Hyde Park	Southboro	Worcester	Westwood
Gas Services:	Somerville	Hyde Park	Southboro	Worcester	
Fleet:			Southboro		
Meter Repair:			Southboro		
Facilities:			Southboro		

MAINTENANCE DEPARTMENT

QUALIFICATIONS TO ENTER THE ROSTER

DISTRIBUTION MECHANIC

1. Be physically fit.

2. Hold a valid Class-A Massachusetts Commercial Driver's License or be willing to train and qualify for it after assignment to the classification.

3. Pass the Bennett Test with a raw score of 24.

4. Pass pre-qualification test administered by the training department.

5. Hold a valid hoisting license or be willing to train and qualify for it after assignment to the classifications.

6. If the applicant has prior experience in Construction or Maintenance the company may start the employee at the Mechanic C rate.

   Examples of prior experience:
   1) Minimum of 1-year experience in gas facility installation or maintenance
   2) Minimum of 1-year experience in utility installation or maintenance
   3) Valid CDL license
   4) Be operator qualified and or pipe joining qualified
   5) General construction background including excavation

EXAMS

Exams will be required between all progression steps in the Distribution Mechanic classification. These exams will be job-related and be given orally, written and/or by field demonstration to determine the individual's ability to perform the

work. Said exams will contain only subject matter on which the individual has been trained. A score of at least 70% is required to progress to the next step. If the employee does not obtain a test score of 70%, the employee will not advance to the next step. The employee will not be eligible to retake another qualifying exam for a period of three months. It is understood that the content of the exam will be mutually agreed upon by the Company and the Union. During the administration of these exams a designated Union representative will be present.

Gate Box Work

Contractors performing municipal, city, state, federal (Chapter 90) or town project work may repair, replace and adjust any gate-boxes associated with said project. Company inspectors will not be utilized for oversight of the above listed gate-box work. This work is excluded from Appendix F. Any gate box work requiring a Company audit will be performed by the bargaining unit.

Meter Protection Work (Backlog)

The Company may utilize contractors to reduce the backlog of meter protection work. The backlog will include any meter protection work prior to December 1, 2019.

Distribution Support Technicians (DST's)

DST's may work for either the Maintenance Department or the Service Department at the discretion of the Company based on workload volume.

DST's will perform meter protection installations when assigned.

QUALIFICATIONS TO ENTER THE ROSTER WELDER/DISTRIBUTION MECHANIC

1. Be physically fit.
2. Hold a valid Class A Massachusetts Commercial Driver's License, or be willing to train and qualify for it after assignment to the classification.
3. Pass the Bennett Test with a raw score of 24.
4. Pass pre-qualification test administered by the training department.
5. If the applicant has prior Construction or Maintenance experience the company may start the employee at the Mechanic C rate.
6. Hold qualifications according to the latest edition of API 1104, Section 3, Standard for Welding Pipelines and Related Facilities or be willing to train and qualify for it after assignment to the classification.

WELDER

An applicant who has not held the Distribution Mechanic's classification will progress through the skill progression steps as outlined. In order to progress to the A rate of Welder, an individual must have at least 12 months in progression as a Distribution or Construction Mechanic plus 18 months in the Distribution Mechanic's or Welder/Distribution Mechanic's classification, but in no case, will the total be less than 30 months, or be certified for multiple qualifications according to the latest edition of API 1104, Section 3, Standard for Welding Pipelines and Related Facilities. Once certified, a Welder must maintain the certification either by having one weld satisfactorily X-Ray inspected once every 6 months or by recertifying according to Section 3 of API 1104 once every 12 months. It is understood that these standards are subject to change mandated by Regulatory requirements.

MEMORANDUM OF AGREEMENT
WELDER TRAINING

In accordance with the provisions of the principal agreement between the parties dated April 1, 2013 and without waiving or modifying the rights of either party contained therein, except as specifically provided herein, the Company and the Local agree as follows:

The parties have agreed to provide on the clock training for successful bidders of the welder classification. The training will be uninterrupted with the exception of "B" and "C" school training for four weeks each. The Welder Training Coordinator will provide and oversee the training and an external qualified welding instructor will supplement the training and evaluate the trainees' progress towards securing the welding certification.

Training will be provided in the welding shop. After 16 weeks (4 months) of training, the trainee will be evaluated by the qualified instructor and the Training Coordinator to determine readiness to pass the API 1104 Pipe Welding Certification. Determination will be made by mutual agreement between the two. If the trainee takes the test and fails or if it is determined that the trainee is not prepared to pass the welding test, he/she will be afforded 12 additional weeks (3 months) of in shop training. At the conclusion of the 12 additional weeks of training, the trainee will be given the API 1104 Pipe Welding Certification test.

If the trainee obtains the API 1104 Certification, he/she must then pass all OJT (On the Job Training Addendum Attached) modules within 20 weeks (6 months) of obtaining the certification. Employees will be eligible to attend applicable continuing education courses to enhance his/her studies and reimbursement will be handled according to the current contract language.

If a trainee fails the test or the OJT, he/she will return to their previous position in Gas Operations. If that position was is another department other than Gas Operations, he/she will be placed in a position in Gas Operations.

_____ _____
NSTAR USW, Local 12004

_____
DATE

Welder OJT's

1. Demonstrate how to set up a welding machine
2. Demonstrate how to set up and safely use oxyfuel metal cutting torch
3. Learn the type and classification of welding rods and how they apply to pipe welding
4. Basic Arc welding procedures including cleaning/grinding operations
5. Weld stringers on flat plate develop weave and overlap
6. Horizontal fillet weld (2F position)
7. Vertical fillet weld (3F position)
8. Overhead fillet weld (4F position)
9. Learn to align and clamp the pipe in place and gap before tacking
10. Weld stringer beads on the outside of a pipe vertical up and down 6" or larger
11. Learn to weld pipe in a flat (1G-rotated position)
12. Learn to weld pipe in a horizontal (2G position)

13. Learn to weld pipe in a multiple (5G position)
14. Learn to weld pipe in a multiple inclined (6G position)
15. Learn to cut and fit 12" tee for weld test
16. Demonstrate how to cut and bevel with a torch
17. Demonstrate how to use a grinder including to bevel pipe with it
18. Learn to cut pipe with a bench chop saw
19. Learn to cut and bevel pipe utilizing the beveling tool
20. Learn and understand welding terms
21. Lear to show proficiency in utilizing tools for the welding trade TBD

WELDER TRAINING COORDINATOR

The Company agrees to establish two (2) Distribution Welder Technician Training Coordinators, to be determined by department seniority. One (1) will be assigned to the West Division and one (1) will be assigned to the East Division. The Distribution Welder Technician Training Coordinators will be paid seven percent (7%) above the current rate of pay when engaged in training, certifying and recertification of welders.

BACKHOE OPERATOR

An applicant who is in the Distribution Mechanic's classification will be inserted into the Backhoe Operator progression step equal to his Distribution Mechanic's progression as a Backhoe Operator "B", but in no case will the rate be less than he is presently receiving. Hold a valid Class A Massachusetts Commercial Driver's License, or be willing to train and qualify for it after assignment to the classification. In order to progress to the "A" rate of Backhoe Operator, an individual must have at least thirty-six (36) months in the progression as a Backhoe Operator or in the Distribution Mechanic's classification, and have a minimum of One Hundred and Sixty (160) hours of training as a Backhoe Operator, and hold a valid Massachusetts Department of Public Safety Hoisting machinery License for Gas and Diesel Front-End Loader with Backhoe attachment, a valid Class A Massachusetts Commercial Driver's License and qualify as a Distribution Mechanic "A".

BACKHOE OPERATOR – SPARE

The holders of the Spare classification will work and be paid in their regular Distribution Mechanic classification except when assigned as a Backhoe Operator, at which time they will receive the rate of the Backhoe Operator classification for which they qualify. Vacancy in the Backhoe Operator classification will be awarded from the Backhoe Operator Spare list before other regular employees within the department. Outside roster applicants will enter the Distribution Mechanic's classification and progress accordingly; however, they will be paid as above when operating the Backhoe.
All Maintenance Distribution employees will have the option of backhoe training to obtain a Public Safety Hoisting Machinery License for Gas and Diesel Front-End Loader with Backhoe attachment. Employees will receive training based on order of seniority and the training department's schedule.

WORKING LEADER-DISTRIBUTION

Qualified applicants must meet Distribution Mechanic A requirements and pass all applicable Operator Qualification testing. Must meet the Company's driver's test requirements and possess and maintain a Class A Massachusetts driver's license or be willing to train and qualify for it after assignment to the classification.

FIELD TRAINER-DISTRIBUTION

Qualified applicants must meet specific knowledge-based requirements, candidates selected as best qualified approved through joint union/management agreement. Applicants must meet Distribution Mechanic A requirements and pass all

applicable Operator Qualification testing. Must meet the Company's driver's test requirements and possess and maintain a Class A Massachusetts driver's license or be willing to train and qualify for it after assignment to the classification.

PREMIUM – TAPPING AND STOPPING

Effective April 1, 2017, two dollars, twenty-five cents ($2.25) per hour for day for crew when performing job on tapping, drilling, and/or stopping 6" thru 12". When tapping, drilling and/or stopping ½" thru 4" the "PREMIUM – TAPPING AND STOPPING" will not apply.

SPECIFIC CONDITIONS

Employees will not return to their report areas for their meal period but will remain in the general vicinity of the job site and be allowed a paid lunch period not to exceed twenty (20) minutes.

SPECIFIC CONDITIONS – SOMERVILLE REPORT AREA

1. There will be no change in the present policy regarding the scheduling of crews on Thanksgiving, Christmas and New Year's Day.
2. There will be a minimum of three men recalled to work on calls that require digging the pavement. There will be a minimum of two men called in when doing patchwork.

INCLEMENT WEATHER

If the Union Steward does not concur in the decision of the Supervisor or Department Head regarding whether or not they should work under particular weather conditions, a member of the Union's Executive board or in their absence, the Department Steward may ask the Director of Maintenance or his duly authorized representative for a final decision

QUALIFICATIONS TO ENTER THE ROSTER
TOOL MECHANIC

1. Be physically fit.

2. Hold a valid Class-A Massachusetts Commercial Driver's License or be willing to train and qualify for it after assignment to the classification.

3. Pass the Bennett Test with a raw score of 24.

4. Pass pre-qualification test administered by the training department.

SPECIFIC CONDITIONS

The position will also perform the maintenance and repair of any/all tools and equipment related to the Gas Service Departments. The Tool Mechanic will also be responsible for dual locations, East and West. East Tool Mechanic will be responsible for the Somerville and Hyde Park areas and; the West Tool Mechanic will be responsible for the Southboro and Worcester areas. Tool Mechanics can be reassigned to all locations to cover absences, vacations or to assist other Tool Mechanics with training or workload. Portal to Portal will apply, the reporting areas for the East is Somerville and for the West is Southboro.
The following tasks are to be performed and tracked on a monthly basis.

1. Perform inspection of all Self-Contained Breathing Apparatus (SCBA) equipment in the Maintenance Vehicles. Fill out appropriate maintenance forms associated with SCBA equipment. Document and maintain applicable records.
2. Perform inspections of all Maintenance Department Fire extinguishers. Document and coordinate replacement of spent or low charge extinguishers. Document and maintain applicable records.
3. Perform inspections of all Hydraulic and Manual Squeeze off tools. Coordinate repairs with vendors as needed. Document and maintain applicable records.
4. Perform inspections and test operation of all pneumatic pipe cutting tools. Repair or coordinate repairs with vendor. Document and maintain applicable records.
5. Perform inspections and calibration tests of all Torque Wrenches, replace or repair as needed. Document and maintain applicable records.
6. Perform inspections of all pavement/concrete cutting saws. Clean and inspect all components to ensure safe operation of each saw. Repair or coordinate repairs with vendor. Document and maintain applicable records.
7. Perform inspections on shoring equipment. Clean and check hydraulic components. Coordinate repairs with vendor as needed. Document and maintain applicable records.
8. Assist Maintenance personnel with CGI meter calibrations. Document and maintain applicable records. Assist with the coordination of repairs.

- Management will be responsible for tracking monthly inspections and adherence to the Tool Mechanic duties and responsibilities.
- All previously agreed duties and responsibilities will remain in effect.

QUALIFICATIONS TO ENTER THE ROSTER
FIELD TRAINER

1. Be physically fit.

2. Hold a valid Class-A Massachusetts Commercial Driver's License or be willing to train and qualify for it after assignment to the classification.

3. Pass pre-qualification test administered by the training department.

4. Applicants will meet specific knowledge-based requirements, candidates will be selected through joint union/management agreement

5. Technical knowledge, field experience required, communication skills, skills to conduct field and classroom training/instruction

SPECIFIC CONDITIONS

Duties:

- Conduct field assessments of internal crews to determine proficiency, knowledge of all applicable job requirements/standards/procedures and compliance
- Perform on the job, yard-based training as necessary
- Responsible for ensuring all construction and maintenance work done under their direction is performed in accordance with Company procedures and policies, State and Federal regulations
- Support new employee assessments

- Direct and guide multiple crews of trainees during their initial field OJT period
- Instruct, train and direct all personnel working on assigned crew(s)
- Complete all required timesheets, activity reports and sketches and any other records
- Train and evaluate new employees as they progress through lower classifications
- Identify supplemental training requirements/needs for internal crews
- Communicates and coordinates with area Planning and Scheduling personnel
- Assist in development and deployment of new/revised standards, procedures, work methods, regulations
- Assist in assessing, deploying new tools, equipment
- Support QA/QC in dissemination of audit results, communicating key messages and lessons learned
- Provide extension of classroom technical training to support, reinforce training programs
- Aid in delivery of compliance related training
- Operate Aries/ ULC main cameras to assist maintenance crews in locating blockages or water intrusion into gas mains.
- Operation of drip truck to pump drips and capture excessive amounts of water found in mains and services causing poor pressure problems.
- Operate large travel saws to allow for the removal of large diameter pipe.
- Assist with the operation of the horizontal directional drilling equipment in the in-house installation of mains and services.
- Operate super purge equipment – high volume diesel inert purge
- Operate draw down compressor used to evacuate the gas from a main that is coming out of service and placing the gas back into the live side.
- Perform routine checks and maintenance to above equipment to ensure all items are ready to work.
- Field Trainer may be required at times to assist Eversource crews or other Field Trainers with the above tasks outside of the Field Trainers local.
- Perform all duties of lower classification

QUALIFICATIONS TO ENTER THE ROSTER FOR PLANNERS

1. Be physically fit.

2. Possess a valid Massachusetts Driver's License.

3. Possess an Associate's Degree in Computer-Aided Design Technology (CAD) or the equivalent certificate from a technical school of collegiate grade; or the equivalent combination of education and experience which includes two (2) years of AutoCad/GIS experience

QUALIFICATIONS TO ENTER THE ROSTER FOR GAS OPERATIONS CLERK

1. Must be physically fit to perform all job duties.

2. Must pass job related tests.

3. Must draw to the satisfaction of the supervisor.

4. Must possess and maintain a valid state driver's license

GAS SERVICES DISPATCH DEPARTMENT

Job Description - Duties

- Plans, schedules, and coordinates work assignments for field personnel to efficiently meet workload requirements.
- Operates computer aided dispatch system and scheduling system to dispatch work, gas leaks and customer appointments.
- Continually monitor the effectiveness of Field personnel work completion and makes appropriates changes to ensure customer appointments are satisfied.
- Receives, logs and dispatches emergency and regular service orders to appropriate field personnel for action on 24/7 basis.
- Creates and schedules customer and internal requests for emergency and routine service related orders using the Customer Information system CIS and C2.
- Reviews and documents completed emergency orders for accuracy and completeness.
- Operates and monitors multiple systems including, but not limited to: a base radio, CAD, CIS, C2, ARCOS, Pager system and other Windows applications.
- Provides emergency restoration assistance to Field Operations personnel, as necessary, during gas interruptions.
- Make decisions for the assignment of appropriate field personnel, monitor work progress. Make appropriate adjustments to field personnel assignments as needed.
- Assist in providing instruction and guidance of new and less experienced Dispatchers in the performance of job duties.
- Maintain communication with other departments such as Meters and Service, Maintenance, Construction, Pressure Management, Instrumentation (I&R), System On-Call, Corporate Communications, Field Collections, Customer Information Center, and all other on-call personnel.

QUALIFICATIONS TO ENTER THE ROSTER

1. Be physically fit

2. Be able to do related clerical work and other duties applicable to this classification

Exams

Exams will be required between progression steps in the Dispatcher's Classification to B and A. These exams will be job-related and be given orally and by field demonstration.

Said exams will contain only subject matter on which the individual has been trained.

A score of at least 80% is required to progress to the next step. If the employee does not obtain a test score of 80% the employee will not advance to the next step.

An employee who enters the department as a Probationary employee will be given the rated Dispatcher's exam after 6 months in the department. Employees who entered the department at the "C" rate will be given the rated Dispatcher's exam after 3 months in the department.

If, for any reason, the applicant is unable to continue the training program satisfactorily or cannot pass the examination at the end of the training period, he/she shall have the option to be reinstated in his/her former classification under existing policies. The content of the exam will be mutually agreed upon by the Company and the Union. During the administration of these exams a designated Union representative may be present.

Purpose

Implement a formal process for training and qualification of Gas Services Dispatchers. The program will provide Trainees an opportunity to learn the skills and gain the knowledge necessary to become Rated dispatchers. The Program is comprised of On-the-job training and testing.

Roles and Responsibility

- Supervision
  Management representatives will evaluate the candidate by direct observations of completed tasks and the individuals understanding the use of the business systems. Throughout the progression period the Trainee will be provided feedback and additional training as necessary to satisfactorily perform the tasks assigned.

- Trainee
  The trainee will work under the direction of supervision and work with rated dispatchers learning and practicing the work assignments of their given classifications. Trainees will perform and satisfactorily complete the tasks associated with each progression step.

PROGRESSION SCHEDULE

- **For an External Hire:**
  The progression period is fifteen (15) months. This period shall be divided into the following:
  - A six (6) month probationary/Trainee period.
  - The Trainee will then be promoted to a "C" Dispatcher;
  - After a three (3) month (or earlier by mutual agreement) "C" Dispatcher period;
  - The Dispatcher will take the "B" exam, if the Dispatcher successfully passes;
  - The Dispatcher will be promoted and enter a six (6) month period (or earlier by mutual agreement) as a "B" Dispatcher;
  - After this period the Dispatcher will take the "A" exam, if the Dispatcher successfully passes;
  - The Dispatcher will be promoted to an "A" Dispatcher and select an open shift at that time.

- **For an Internal Hire:**
  The progression period is nine (9) months. This period shall be divided into the following:
  - The employee enters a three (3) month "C" Dispatcher period, then;
  - After a three (3) month (or earlier by mutual agreement) "C" Dispatcher period;
  - The Dispatcher will take the "B" exam, if the Dispatcher successfully passes;
  - The Dispatcher will be promoted and enter a six (6) month period (or earlier by mutual agreement) as a "B" Dispatcher;
  - After this period the Dispatcher will take the "A" exam, if the Dispatcher successfully passes;
  - The Dispatcher will be promoted to an "A" Dispatcher and select an open shift at that time.

Exams will be taken by personnel to demonstrate their knowledge before being promoted to "B" and "A" Dispatcher rates.

- Existing Southboro dispatchers will be solicited for training on the CT dispatch system by 5/1/17.
- The CT dispatchers transferring to Southboro will be polled to select shifts by seniority from the 12004 CBA.
- The existing vacation schedule for MA dispatchers is two (2) during the months of June, July and August and one (1) for the remainder of the year. CT dispatchers will follow this schedule.
- When both the CT and MA dispatchers are cross trained the vacation, schedules will be four (4) during the months of June, July and August and two (2) for the remainder of the year.
- A one-time lump sum payment of $1250.00 will be made to all existing Southboro dispatchers.

The practice of providing a rest area in Westwood will be discontinued.

METER SERVICES DEPARTMENT

QUALIFICATIONS TO ENTER THE ROSTER

1. Be physically fit
2. Possess a valid Driver's License
3. Pass the Bennett Test with a raw score of 24
4. Pass pre-qualification tests administered by Training Department

5. Exams and evaluations will be required between all progression steps in the Meter Services Department (C, B, A). These exams will be job-related and be given orally, written and by field demonstration to determine the individual's ability to perform the work. Said exams will contain only subject matter on which the individual has been trained.

   A score of at least 70% is required to progress to the next step. If the employee does not obtain a test score of 70% the employee will not advance to the next step.

   The employee will not be eligible to retake another qualifying exam and will be reevaluated for a period of three months. It is understood that the content of the exam will be mutually agreed upon by the Company and the Union. During the administration of these exams a designated Union representative may be present.

Contractors will perform all Leak Survey work. However, whenever company employees are assigned to work in a customer premises, they will continue to perform the ATM inspection. In exchange for this the company will increase the hourly rate of the following classifications by 2% effective 4/1/20:

Service Technician Service Technician/Fitter
Fitter A Service Technician D
Service Department/Working Leader

Purpose

Implement a formal process for training and qualification of Meter Services technicians. The program will provide Trainees an opportunity to learn the skills and gain the knowledge necessary to become Rated technicians. The Program is comprised of On-the-job training, classroom training and testing.

Roles and Responsibility

- Field Supervision

The program will assist Supervisors in determining both a Trainee's qualifications and their proficiency in Meter Services work.

Management representatives will evaluate the candidate using field observations of completed tasks. Throughout the program the Trainee will be evaluated based on the ability to satisfactorily perform the tasks outlined.

Work completion evaluations and test results will create a recommendation for allowing the Trainee to continue through their progression or as necessary delay the progression until additional skills can be obtained through coaching and On-the-job training to continue with the progression.

Trainees will be assigned appropriate work and supervision will ensure that all Trainees go out on their own as soon as possible after entering the roster, but in no case later than nine (9) months after entering the roster. The company will ensure that the Trainees gain the appropriate knowledge by having the Trainees work with supervisors, Rated Technicians and Leads during the first nine (9) months. The immediate supervisor and with assistance from the Meter Services Leads will monitor the Trainees progress and assure that all tasks are completed within the specifics steps outlined when working with Leads and Rated technicians.

- Rated Meter Services Technicians/Leads

These technicians will assist with instructing and coaching in the tasks associated with the steps of the Trainee's progression. The goal is to insure the Trainee can comprehend and safely perform the day to day operations of their respective classifications.

- Trainee

The trainee will work under the direction of the Rated technicians and Leads learning and practicing the work assignments of their given classifications. Trainees will perform and satisfactorily complete the tasks associated with each progression step.

- Training Department

The Training department will provide formalized training and testing of Trainees and assist in the evaluation of the Trainee.

TRAINING PROGRAM

- **For an External Hire:**

The Program duration is a thirty-six (36) month term. The term shall be divided into the following:

- A six (6) month probationary period
- A six (6) month Trainee period
- Then the Trainee will attend a two (2) week training and qualification session, if the Trainee successfully passes then;
  - The Trainee will be promoted and enter a twelve (12) month period as a C Technician
- Then the Trainee will attend a two (2) week training and qualification session, if the Trainee successfully passes then;
  - The Trainee will be promoted and enter a twelve (12) month period as a B Technician
- Then the Trainee will attend a one (1) week training and qualification session, if the Trainee successfully passes then;
  - The Trainee will be promoted to an A Technician

- **For an Internal Hire:**

The Program duration is a thirty (30) month term. The term shall be divided into the following:

- A six (6) month Trainee period
- Then the Trainee will attend a two (2) week training and qualification session, if the Trainee successfully passes then;
  - The Trainee will be promoted and enter a twelve (12) month period as a C Technician
- Then the Trainee will attend a two (2) week training and qualification session, if the Trainee successfully passes then;
  - The Trainee will be promoted and enter a twelve (12) month period as a B Technician
- Then the Trainee will attend a one (1) week training and qualification session, if the Trainee successfully passes then;
  - The Trainee will be promoted to an A Technician

At the end of each progression step the Training department and Supervision shall examine the progress of the Trainee in relation to the on the job training performance and formal training as outlined. Attend classroom training and demonstrate their knowledge by testing and qualification.

The job specifications listed at the beginning of each step are not intended to cover every detail of the Trainee's work, but rather set reasonable standards required for qualification. Typical tasks are mentioned to serve as an illustration of the level of know-how and responsibility required; it is not intended that these specifications cover every task that the position will include.

The Classroom Training Course provides a general outline of the type of classroom training necessary to support the desired on-the-job performance.

The On-the-job training guide at the end of each step, which lists training experiences the Trainee will receive, is not a list of everything the Trainee will learn. As work requirements may differ between work areas. Therefore, the guide identifies potential areas for learning in each field.

On–the–job training is accomplished by assigning the Trainee to assist a Rated Meter Services Technicians and Leads in performing the day–to–day tasks. It is expected that through this form of training the Trainee will become more proficient in the job duties.

Prescreening for the Meter Services Technician position will require the following items to be satisfactorily completed. Leather work gloves will be provided for tasks requiring hand protection.

Overview

At least one (1) person administering the prescreening will be from the Gas Training Department.
Pre-screenings will be video-taped.

Instructions and demonstrations will be given for all tasks. Candidates will have the opportunity to have the demonstration repeated. Once the candidate begins the tasks, no further demonstrations for that task will be done.

The candidate will complete the first task before demonstration of next task.

1. **Tool Identification**

Purpose: Test the candidate's ability to identify commonly used tools.

Setup: 12 common tools will be laid out on a table. Index cards with the names of the tools will be provided. Candidates will have 10 minutes to complete the task.

Task: The candidate will place the index card with the name of the tool on the tool.

12" Pipe Wrench	12" adjustable wrench
Open end wrench	¾" socket and ½" drive ratchet
Box wrench	Torque wrench
Sledgehammer	Phillips head screwdriver
File	Slotted head screwdriver
Slip joint Pliers	Chisel

Scoring: Task will be used as ice-breaker exercise and will not be scored.

10 MINUTES ALOTTED

START TIME: _____ FINISH TIME: _____

10 Points needed to pass. Circle or check one. Pass _____ Fail _____

2. **Identification and assembly of threaded steel pipe and fittings (Example below)**

Purpose: To test the candidate's mechanical aptitude and ability to join threaded pipe and to use hand tools as required

Setup: The candidate will be given the necessary tools and threaded steel nipples and elbow fittings and be required to assemble them as shown.

Tools List: 2 of each. 14", 18", 24" pipe wrench's

Fittings List: TBD

Task: In the work area will be an example or drawing of the assembly to be recreated. Candidate will be shown how to assemble fittings.
Candidate will assemble fittings and tighten assemblies, wrench tight, to duplicate the example.

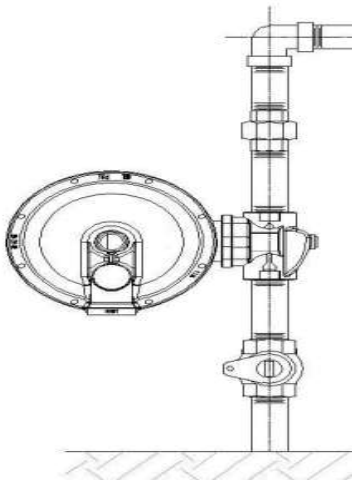
Assemble "Riser Assembly" Tighten all fittings wrench tight.

Scoring: Screw riser valve onto nipple on service tee _____ 1 Point
Screw nipple into riser valve _____ 1 Point
Install regulator on nipple _____ 1 Point
Screw nipple into regulator _____ 1 Point
Screw in lower half of union onto nipple _____ 1 Point
Install upper half of union _____ 1 Point
Total _____ 6 Points

10 MINUTES ALOTTED FOR ASSEMBLY

START TIME: _____ FINISH TIME: _____

Six (6) Points needed to pass. Circle or Check one. Pass _____ Fail _____



CLASSROOM TRAINING COURSE
C - Rate

1. Gas 101
   - Origin of Natural Gas
   - Source of Natural Gas

- Gathering
- Processing
- Transmission
- Meter Services
- Utilization
- Properties of Natural Gas

2. Safety

A. Gas 102 - General Review of the Safety & Health Hand Book
- Personal Protective Equipment (PPE)
- Housekeeping
- Personal conduct
- Work performed on customer's premises
- General safety instructions for the gas industry
- Approved tools
- Static electricity
- Abnormal Operating Conditions

B. Human Performance – reducing errors while performing physical tasks

C. Driving Safety (eg. Decision Driving or Smith Driving)

D. OSHA Compliance Training - eLearning
- Respiratory Protection
- PPE
- Blood borne Pathogens
- Job Safety Briefing
- Electrical Hazard Awareness
- Rigging Safety
- Asbestos Awareness
- Fire Protection & Safety

- Portable Fire Extinguisher
- Medic First Aid/CPR

F. Eversource eLearning
- Gate Station Awareness
- Odor Intensity Testing
- Implementation of the Eversource Gas OQ Plan

3. Handling Gas Meters
   A. Gas Meter Identification (all sizes used at EVERSOURCE)
   B. Read a meter
      - Visual
      - Electronic / Automated
      - Understanding ERT's
      - Understanding MPA's
      - Meter Constants & Pressure Factors
      - Temperature Correction
   C. Storage & Handling of meters
   D. Tour of Meter Test Shop
   E. Meter Turn On
      - Clock the meter
   F. Meter Turn Off
   G. Identifying theft of service

4. Introduction to Gas Regulators
   A. Discuss gas regulator applications and selection.
   B. Explain gas regulator fundamentals.
   C. Name gas regulator basic elements
   D. Identify gas regulator types
   E. Discuss over pressure protection

5. Piping
   A. Measure
   B. Cut & Thread Pipe
   C. Make threaded joints
   D. Make flanged joints
   E. Interpret piping diagrams
   F. Sketching piping diagrams

CLASSROOM TRAINING COURSE
C - Rate

6. Installing New Meter Assemblies in accordance with Construction Standards
   A. Proper location
   B. Proper protection:
      - From physical damage
      - From customer's equipment

- From over-pressurization

C. Proper support of piping
D. Proper venting of regulators

7. CAD Operation
   A. Login
   B. Basic Navigation
   C. Order Completion
   D. Timesheet Completion

8. Power Assisted Fastener Gun
   A. Cartridge Operated Fastener Gun
   B.Operate

OQ Requirements

Tasks #

- 70 - Properties of Natural Gas & Abnormal Operating Conditions
- 72 – Installation of Customer Meters & Regulators

Before a Meter Services Technician is promoted to the next step, the employee must pass classroom examinations and OQ evaluations. The tests consist of performance evaluations and written tests.

• By machine		
O&A: Joining Pipe		
• Make threaded joints		
• Make new flanged joints		
O&A: Building Gas Meter Manifolds		
• Read & interpret the print		
• Build the manifold		
O&A: Investigating a mixed metering situation.		
The Employee shall identify types and basic operation of the following: • Customer Meters		
• Pressure Regulator		
The Employee shall demonstrate basic navigation of CAD		
The Employee shall demonstrate the correct storage and handling of meters, equipment and materials		

The following individual has satisfactorily completed all skill & knowledge requirements of the C Technician position and can progress to the next progression step.

Employee's Name:

_____

Supervisor's Name: _____ Date: _____

CLASSROOM TRAINING COURSE
B - RATE

1. Introduction to Emergency Response
   - A. Understanding the company's role & responsibilities to various gas emergencies
   - B. Gas Odor and/or Leakage Investigation
     - Operate a Combustible Gas Indicator (CGI)
     - Perform Initial Investigation
     - Use the plunger bar ergonomically
     - Documenting survey on a barhole sketch
   - C. Carbon Monoxide Investigation
     - Operate a CGI
     - Perform Initial Investigation
     - Take appropriate action

2. Mapping
   A. On CAD and GIS , identify
      - Curb valve
      - Operating Pressure
      - General locations of facilities

3. Sizing a Gas Meter
   A. Identify customer load
   B. Identify necessary utilization pressure
   C. Identify allowable pressure drop through meter
   D. Select meter

4. Measuring Gas Pressure
   A. Discuss standard delivery pressures
   B. Use a Manometer
   C. Use a Spring Gauge
   D. Use a Recording Gauge

5. Corrosion
   A. Recognizing atmospheric corrosion
   B. Determining if facility can be repaired or if it must be replaced
   C. Cleaning and coating above ground facilities / piping
   D. Installing Insulators

6. Basic Electricity
   A. Explain Ohms & Watts Laws
   B. Explain basic electrical circuit symbols
   C. Explain simple electrical circuit diagrams
   D. Explain series, parallel & series parallel circuit diagrams

B Rate requirements		
Following are operations the Employee is to be trained to perform through instructor demonstration and specific steps or methods in these operations which are to be emphasized. Also listed are tools and equipment which are shown and demonstrated to the Employee		
The Employee shall observe and assist a fully rated technician investigate a gas odor complaint including but not limited to the following investigation methods: • Combustible Gas Indicator		
• CO Investigation		
• Leak detection soap		
• Clocking a gas meter		
• Perform a bar hole test		
• Manometer		
The Employee shall observe and assist a fully rated Technician insulate gas services: • Identifying insulating fittings o Unions		
o Flanges/Kits		
o Couplings		
o Meter swivels		
• Installing insulating fittings/Insulating flange kits		
The Employee shall observe and assist a fully rated Technician lubricate gas service valves at: • Service valve		
• Meter shutoff		
The Employee shall observe and assist a fully rated Technician in the use of a Combustible Gas Indicator to do the following: • Inspection – prior to use		
• Calibration and adjustment (monthly)		
• Scale Interpretation o Multi Scale LEL/UEL/Carbon Monoxide		
o LEL and percent		
• Use of charcoal & water filters		
The Employee shall observe and assist a fully rated Technician in locating and turning off gas at curb. • Locate curb box by using: o Tape measure		
o Curb box locator / Metal Detector		
o Demonstrate the use of all available curb valve wrenches		
The Employee shall observe and assist a fully rated Technician set & reconnect gas meters • Check pressure test records/requirements in accordance with local town requirements if applicable		
• Install manifold		
• Insulate service		
• Set Meter o Record meter number		
o Record meter reading		
o Record automated meter reading device - Use		
o Record meter location - Document		
The Employee shall observe and assist a fully rated Technician in relighting residential appliances, to include but not limited to: • Gas space heater		
• Gas water heater		
• Gas range		

• Gas furnace		
• Gas boiler

The Employee shall demonstrate the proper use of the following: • Gas Pressure Gauges		
o Manometer		
o Spring gauge a. Inches W.C b. PSIG		
o Recording gauges		
The Employee shall identify and explain gas system pressures: • Low pressure (under 2 PSIG)		
• Intermediate pressure (2 PSIG to 60 PSIG)		
• High pressure (60 PSIG thru 100 PSIG)		
• Extra high pressure (≥ 100 PSIG)		
The Employee shall demonstrate the ability to clock a gas meter for appliance BTU input • Read test dial		
• Application of formula		
• Apply pressure factor if applicable		
The Employee shall demonstrate the ability to install a manifold and insulate the service in accordance with the company service entrance requirements.		
The Employee shall demonstrate the ability to insulate gas services: • Identifying insulating fittings o Unions		
o Flanges/Kits		
o Couplings		
o Meter swivels		
• Installing insulating fittings/Insulating flange kits		
The Employee shall demonstrate the ability to lubricate gas service valves at: • Service valve / riser valve		
• Meter shutoff		
The Employee shall demonstrate the ability to use of a Combustible Gas Indicator to do the following: • Inspection – prior to use		
• Calibration and adjustment (monthly)		
• Scale Interpretation o Multi Scale LEL/UEL/Carbon Monoxide		
o LEL and percent		
• Use of charcoal & water filters		

The Employee shall demonstrate the ability to locate and turn off gas at curb. • Locate curb box by using: o Tape measure		
o Curb box locator / Metal Detector		
o Demonstrate the use of all available curb valve wrenches

The Employee shall demonstrate the ability to set & reconnect gas meters		
• Set Meter o Record meter number		
o Record meter reading		
o Record automated meter reading device – Use		
o Record meter location – Document		
The Employee shall demonstrate the ability to lubricate gas service valves at: • Service valve		
• Meter shutoff		
The Employee shall demonstrate the ability to relight residential appliances, to include but not limited to: • Gas space heater		
• Gas water heater		
• Gas range		
• Gas furnace		
• Gas boiler		
• Gas conversion burner o Atmospheric		
o Power		
• Gas fireplace		
The Employee shall demonstrate the ability to install a gas service regulator: • Install inlet fitting		
• Install outlet fitting		
• Install vent pipe to remote location		
The Employee shall demonstrate the ability to adjust a gas service regulator		
The Employee shall observe and assist a fully rated Technician relight commercial appliances in commercial applications.		

* Observe and assist task – Required OQ Qualifications

The following individual has satisfactorily completed all skill & knowledge requirements of the B Technician position and can progress to the next progression step.

Employee's Name: _____

Supervisor's Name: _____ Date: _____

CLASSROOM TRAINING COURSE
A - RATE

1. Investigating a High Bill Complaint
   - A. Read & interpret an Eversource bill
   - B. Discuss common causes of high consumption, including but not limited to:
     - Poor heating equipment combustion efficiency
     - Increase in number of persons in household
     - Heating unit short cycling
     - Room air outlets blocked by draperies or furniture
   - C. Discuss common ways to investigate customer usage, including but not limited to:
     - Verifying customer piping from meter to appliances
     - Clocking the meter to verify customer equipment inputs
     - Checking operating pressure on customer equipment

2. Identify Theft of Service from Gas Facilities
   - A. Define Theft of Service
   - B. Define meter conditions which would qualify for Theft of Service
   - C. Identify normal gas meter conditions
   - D. Identify Theft of Service from gas meters
   - E. Report theft

3. Over Pressure Protection
   - A. Discuss requirements
   - B. Methods for achieving over pressure protection
     - Relief valve
     - Monitor regulator
     - Automatic shut-off

4. Diagnosing & Correcting Gas Pressure Problems
   - A. Delivery pressure (from EVERSOURCE)
     - Discuss common problems & troubleshooting for various EVERSOURCE standard regulators, including but not limited to:
       - Leaking by
       - Lock-up failure
       - Surging
       - Foreign matter
       - Freeze-up
       - Filters & Strainers
       - Water in service
     - Discuss sizing of regulators & associated vent piping
     - Discuss common regulator repair actions
       - Clear vent
       - Clean orifice and/or seat
       - Adjust regulator
       - Replace seat, orifice and/or spring
   - B. Incorrectly sized fuel lines

- Discuss sizing of customer fuel lines

CLASSROOM TRAINING COURSE
A - RATE

C. Utilization pressure at appliances
- Discuss common problems & troubleshooting for various common appliance regulators
- Discuss 2 psi delivery & Maxitrol regulators (in particular)

5. Red-tagging Customer Appliances

A. Recognizing code compliance in accordance with National Fuel Gas Code
- Flexible Gas Connectors
- Vent connectors
- Vents
- Appliances in confined spaces
- Electrical service disconnect requirements
- Gas utilization equipment locations
- Gas Piping
- Draft hood / draft control devices
- Ventless equipment

B.Complete red tag & customer service order

The Employee shall observe and assist a fully rated Technician determine the required size of: • Commercial & Industrial gas meters		
• Commercial & Industrial gas regulators & vent lines (if applicable)		
• Commercial gas piping		
• Appliance vent connectors		
• Appliance gas piping		
The Employee shall observe and assist a fully rated Technician assemble all types of residential, commercial & industrial gas meter installations.		
• Select proper materials		
• Assemble manifolds		
• Install manifold		
• Install meter		
The Employee shall observe and assist a fully rated Technician complete a high bill investigation.		
The Employee shall observe and assist a fully rated Technician correct a gas pressure problem.		
• Appliance regulators		
○ Clean vent		
○ Replace appliance regulator		
• Repair a gas service regulator		

○ Clean orifice		
○ Replace orifice		
○ Replace seat		
• Clean pipe – remove restriction		
• Clean vent pipe		
The Employee shall demonstrate the ability to interpret:		
• Gas meter installation standards		
The Employee shall demonstrate the ability to investigate a gas odor complaint including but not limited to the following investigation methods: • Combustible Gas Indicator/GMI		
• CO Investigation		
• Leak detection soap		
• Clocking a gas meter		
• Perform a bar hole test		
• Manometer		
The Employee shall demonstrate the ability to determine the required size of: • Commercial & Industrial gas meters		
• Commercial & Industrial gas regulators & vent lines (if applicable)		
• Commercial gas piping		
• Appliance vent connectors		
• Appliance gas piping		
The Employee shall demonstrate the ability to assemble all types of residential, commercial & industrial gas meter installations.

METER REPAIR DEPARTMENT

QUALIFICATIONS TO ENTER THE ROSTER FOR METER REPAIR TECHNICIAN AND SPECIAL METER MAINTENANCE TECHNICIAN

1. Be physically fit.
2. Pass the Bennett Test with a raw score of 24.
3. Possess a valid Massachusetts Driver's License.

QUALIFICATIONS TO ENTER THE ROSTER FOR CLERK UTILITY

1. Be physically fit.
2. Pass job related clerical tests.

INSTRUMENTATION AND REGULATION DEPARTMENT

QUALIFICATIONS TO ENTER THE ROSTER FOR INSTRUMENT TECHNICIAN

1. Be physically fit.
2. Pass the Bennett Test with a raw score of 24.
3. Possess a valid Massachusetts Driver's License.
4. Pass the General Technician Tests.

QUALIFICATIONS TO ENTER THE ROSTER FOR GENERAL TECHNICIAN

1. Be physically fit.
2. Pass the Bennett Test with a raw score of 24.
3. Possess a valid Massachusetts Driver's License.
4. Pass the General Technician Tests.

QUALIFICATIONS TO ENTER THE ROSTER FOR MAINTENANCE TECHNICIAN

1. Be physically fit.

2. Pass the Bennett Test with a raw score of 24.

3. Possess a valid Massachusetts Driver's License.

PASSING SCORES FOR THE GENERAL TECHNICIAN TESTS

Algebra	60%
Arithmetic Reasoning	Raw Score of 5
Minnesota Paper Form Board Test	Raw Score of 38

GENERAL TECHNICIAN TEST:

Sections 1-2-F-G	60%
Sections A through E	50%

SPECIFIC CONDITIONS

Employees will not return to their report areas for their meal period but will remain in the general vicinity of the job site and be allowed a paid lunch period not to exceed twenty (20) minutes.

WAREHOUSE DEPARTMENT

QUALIFICATIONS TO ENTER THE ROSTER FOR STOCKHANDLER

1. Be physically fit.

2. Possess a valid Massachusetts Driver's License and be capable and willing to get a Massachusetts Commercial Driver's License (CDL).

3. Pass job related tests.

FLEET DEPARTMENT

QUALIFICATIONS TO ENTER THE ROSTER FOR GARAGE ATTENDANT

1. Be physically fit.

2. Possess a valid Massachusetts Driver's License and be capable and willing to get a Massachusetts Commercial Driver's License (CDL).

3. Pass the Bennett Test with a raw score of 24.

QUALIFICATIONS TO ENTER THE ROSTER FOR MECHANIC

1. Be physically fit.

2. Possess a valid Massachusetts Driver's License and be capable and willing to get a Massachusetts Commercial Driver's License (CDL).

3. Pass the Bennett Test with a raw score of 24.

4. Must have completed 4 years of Technical School training in auto mechanics or two years of on-the-job training.

Employees who do not fulfill Qualification 4 above will enter the 42-month Mechanic progression as described in Appendix A, assuming they fulfill all other requirements.

SPECIFIC CONDITIONS

In order to progress to the "B" rate the employee must obtain a Class A Massachusetts Commercial Driver's License, after receiving training in the same.

In order to progress to the "A" rate the employee must pass a basic Welding Skills test, after receiving training in the same.

STIPULATION FOR SHIFT ASSIGNMENT

There must be at least one rated man on shift in the report area.

APPENDIX D

SICK AND ACCIDENT POLICY

All employees of the Company, after thirty (30) days of full-time employment, who are absent from regularly scheduled work because of sickness, non-occupational accident, or occupational accident, shall receive in total, from whatever source, full straight time pay for such absence subject to the following conditions:

a) An employee will receive a total full pay benefit not to exceed six (6) months of straight time pay for each illness or accident, exclusive of accrued vacation pay.

b) An employee continuously absent due to sickness, occupational accident, or non-occupational accident for a period of six (6) months would be transferred to the Long-Term Disability Program if he meets the requirements of said Plan.

c) The Company will require a doctor's certification from the employee for any illness or accident after such employee has accumulated more than three (3) incidents of absence due to illness or accident during the calendar year. Such employee will not receive pay benefits if that employee does not furnish a doctor's certificate for the fourth or more incidents of illness or accident during the calendar year. An absence due to illness or accident of two weeks or more shall not count as an incident. Employees with 20 or more years of service will not be required to furnish a doctor's certification for payment of sick benefits except as noted in (e) below. Continuing absences of four (4) or more working days the employee is required to contact the company's third-party vendor to initiate an extended illness. Continuing absences due to illness or disability require a doctor's certification every 30 days if payment is to be made.

d) All benefits under this policy will be determined on the basis of normal pay for forty (40) hour week at straight time rates.

e) Absence shall be paid for at full normal straight time pay for the first three (3) or less consecutive working days without a doctor's certification. Absence due to illness or disability which exceeds three (3) workdays requires an doctor's certification if payment is to be made. Absence due to an accident requires an doctor's certification for the first day of disability if payment is to be made.

f) Successive periods of absence separated by less than two (2) weeks of continuous active work on a full-time basis shall be considered one (1) continuous period of absence unless the subsequent period of absence is due to an injury or disease entirely unrelated to the injury or disease which caused the previous absence and commences after return to work on a full time basis. If you have been receiving benefits under the LTD Plan, return to work, and subsequently suffer a second disability, the following will apply: If your second disability is due to the same or related causes as the

first, and your return to active work period is less than 3 months, then the Plan will resume its benefit payments without the six-month waiting period applying again. If your second disability is due to causes Unrelated to the first, then the Plan will resume its benefit after a six-month waiting period.

g) Full straight time pay benefits will not be allowed under this program for illness or accident caused as a result of willful intention to injure oneself or another person, or commission of any crime, or as a consequence of working for an employer other than this Company, or any other work for wage or profit.

h) Dentistry, optical, and physical examination are not considered as absences payable under this program. Doctor's appointments for pre-natal care will be covered, provided after hour appointments are not available. The employee will schedule said appointments for the start or end of her workday.

i) All cases of illness or injury must be bona fide. False claims for payment under this program will subject an employee to disciplinary action. As a result, the Company reserves the right to have, at any time, a legally qualified physician or physician's assistant examine the person of an absent employee when and so often as may be reasonably required during a benefit period.

i) Prompt notification of sickness or accident is required. It is essential that the employee or someone on the employee's behalf give notice to the Company as close as possible to the employee's normal starting time.

New Hire Sick / Disability Plan

Disability plan for all new hires after January 1, 2020:

All 12004 employees hired after January 1, 2020 will be eligible for up to 10 sick days per year at 100 percent of pay for absences from work due to non-occupational illness or injury, as of 1/1/20. Sick days cannot be carried over from one year to the next nor are sick days paid out at termination.

Short-Term Disability Benefit - In the case of illnesses that exceed five consecutive workdays, qualifying employees will be eligible for short-term disability (STD) benefits. Disability benefits are payable for up to 25 weeks, for each injury or illness after an employee has been out of work for more than five consecutive workdays. The first five consecutive working days of an extended absence is considered an "elimination period." Employees must use available sick time to satisfy the elimination period. Following a period of five consecutive sick days, the next twelve (12) weeks of absence under the STD benefit will be paid at 100 percent of base pay. Up to thirteen (13) additional weeks of STD will be paid at 67percent of base pay.

Long Term Disability Benefit - Upon exhaustion of STD an employee who qualifies will move to Long-Term Disability. LTD benefits are payable at 50 percent of base pay. Employees will have the option to buy-up with pre-tax contributions to an LTD benefit of 67 percent of base pay.

Payment of Benefits while on LTD - All employees who receive a LTD benefit and participate in the Eversource Employee health and welfare benefit plans will have payments deducted from their LTD check rather than being billed for participation in said benefit plan.

APPENDIX E

JOB SECURITY

The Company agrees that regular employees with five (5) or more years of service will not be laid off or reduced in pay

due to lack of work during the term of this Agreement.

It is further understood that in the event that it becomes necessary to have a layoff and the Company is prevented from laying off as many employees as it deems necessary due to this Agreement, it is understood that it may be necessary for the Company to retrain and/or relocate employees without any restrictions to maintain an efficient operation.

APPENDIX F

OUTSIDE CONTRACTORS

1. If an outside contractor works for the Company on Saturday, Sunday or a holiday, the following will apply:

   a) Employees who normally perform like work and are on Monday through Friday schedule will be offered work on that Saturday, Sunday or that holiday

   b) Employees who normally perform like work and are on a Tuesday through Saturday schedule will be afforded a sixth day at overtime rates within the following three-week period.

2. It is agreed that the use of outside contractors will not be extended into areas where they are not presently being used.

3. It is agreed that if there is a curtailment of work, presently being done exclusively by Union employees, the Company will retrieve sufficient work from outside contractors, to avoid any reduction in straight time hours or lay-off of Union employees.

4. It is the Company's intent not to accelerate the use of contractors in the Company.

5. The following will apply to the Gas Services and Clerks effective April 1, 1993. When the Company considers it necessary to have Outside Contractors perform any work for the Company normally performed by bargaining unit employees, the Company will notify the Union of the type of work to be performed before the contractor starts work and the following provisions will apply:

   a) When a contractor or contractors are engaged in any work normally performed by bargaining unit employees, in any week, an eight-hour day shall be scheduled for the succeeding Saturday for the employees in the affected Report Area Department. Such an eight-hour day shall be paid for at the appropriate overtime rate.

   b) Employees who are on other than a Monday to Friday schedule will be afforded a 6th day at overtime rates within the following two-week period.

   c) The application of paragraph 5 a) and b) as it applies to Clerks will be based on the affected sections determined by the individual overtime rosters.

   d) Exemptions to the application of paragraphs 5 a) and b) will be:

      (1) Work that requires a license that no one holds in the bargaining unit within the Customer Service Department.

      (2) New or replacement water heater light ups.

6. When pipeline contractors or corrosion contractors are scheduled to work during the normal work hours Monday through Friday, normal meaning first shift, the Company will notify the Union of the type of work to be performed before the contractor starts and the following provisions will apply:

a) All employees in the affected report area Maintenance Department with the exception of Distribution Support Technician will be offered sixty (60) minutes overtime on the day the contractor has worked except when contractors are installing new services, 4" and below (including services in developments from the curb cock to the riser), and commencing on January 1, 2007, corrosion repairs on services and mains, all employees in the affected report area, Maintenance Department, will be offered ninety (90) minutes overtime for such work. The pipeline and corrosion contractors will be off the road at 4:30 p.m. The last one half (1/2) hours of the workday (4:00 p.m. – 4:30 p.m.) will consist of sweeping the jobsite and setting barricades for neatness and safety. Such overtime will be paid at the appropriate overtime rate.

b) When a pipeline contractor or corrosion contractors are scheduled to work a shift other than the first shift, three man crews in that report area, Maintenance Department, with the exception of Distribution Support Technician, will be offered overtime equal to the number of contractor crews that have worked. This overtime will be scheduled on the following Saturday, unless weather conditions are such that rescheduling would be necessary.

c) The provisions of paragraphs 6 a) and b) only apply to pipeline and corrosion contractors.

d) Exemptions to paragraphs 6 a) and b) will be:
- Installation of steel mains or services 8" and larger in diameter
- Installation of steel mains for bridge crossings
- When performing corrosion repairs on exposed piping on bridges

If a pipeline contractor, working on 8" steel or larger as described in "Exemptions" in Appendix F, works beyond the normal working hours to install pipe then overtime will be offered to an amount of Distribution Mechanics in the affected report area that is equal to the number of personnel on the pipeline contractor crew. The overtime will be equal to the amount of time the pipeline contractor works beyond the normal work hours.

If/when pipeline contractors working on these projects are instructed by the Company to work beyond 4 PM the paragraph above will take effect. If pipeline contractors working on these projects are delayed while Company crews are performing live gas work the above paragraph is not applicable.

Construction Agreement

Construction Crews

a.) The Company and the Union agree to meet each year prior to the construction season to discuss planned work and allocation of resources.

b.) Internal Construction crew staffing fourteen (14)

c.) Construction crews may be utilized to perform the following activities:

Examples of work that may be performed:
1. New growth services
2. New growth mains
3. Service replacements
4. Main connections
5. Main replacements
6. Service replacements associated with main replacements
7. Public work projects
8. System enhancements
9. Meter fitting work (Flexibility agreement)
10. Affected cast iron encroachments
11. Main & service taps

d.) The Company will have the ability to change the scheduled hours for employees assigned to Construction in order to meet customer and project needs. For example; If a municipality issues a permit with restricted hours or off hours the Company will notify the Union of schedule changes and provide the employees as much notice as possible however not less than 5 days (120 hours).

e.) The Company will strive to keep Construction employees working as much of the year as possible. Construction crews will start each year on or before April 1st and be completed on or after December 1st. The Company will determine start and end dates. If the Company determines inclement weather, work load in Maintenance or other factors that delay or end the construction crews prior to December 1st the Company will notify the Union. Construction employees will then be redeployed to perform maintenance work during these periods and winter months.

f.) Performance Measurements - The use of employees for Construction will be measured. The Company will track the following items to determine the employee's ability to perform the assigned work safely, productively and cost effectively. The Company and the Union will review performance results on a regular basis.

1. Health and Safety
    - OSHA recordable incidents
    - DART recordable incidents
    - PMVA recordable incidents
    - Absence rate
2. Quality
    - Percentage compliance in QA/QC program
    - DPU/Regulatory violations or findings
    - Customer Satisfaction
3. Productivity
    - Cost per units
    - Cost per foot
    - Feet of pipe installed per day
    - Number of services installed per day

g.) If targets are not met, the Company and Union agree to engage in cooperative efforts to make the necessary performance improvements. If after discussions with the Union, targets continue to no be met the Company crew will be replaced with another Company crew. If the second crew does not meet the performance measures the crew will be reassigned to other activities within the Maintenance department.

The Company and the Union will review and discuss construction crew performance. If the Company and Union agree that performance targets are being met, then further discussions between the parties will be conducted to determine if additional crews will be added.

Staffing:

(Table 1)	Main Crew	Service Crew	Main (open trench)	Service (open trench)
Distribution Tech A/Crew Leader	1	1	1	1
Distribution Tech B/C	2	1	1	1
Trainee or Temporary employee	1	1	1	
Total	**4**	**3**	**3**	**2**

Crews will be staffed with existing or additional employees as needed.

(Table 2)	# of crews	** # of employees
Main Crew		
Service Crew		
Total		

** Crew size will be determined by Table #1

- Temporary employees may be used for absence, vacation or additional manpower.
- Crew configuration and crew counts, as well as report locations may be altered to deliver optimal results depending on job type, work site conditions, absences, vacations, etc.
- Crews will not be moved from their report areas unless there is a curtailment of work or the Company needs to address workload. The Company will notify the Union prior to moving crews.
- All work will be scheduled at the Company's discretion.
- Crews may respond to class 1 leaks and emergencies if other crews are unavailable.

The Company will add four (4) construction crews as follows:

1 crew in Hyde Park AWC
1 crew in Somerville AWC
1 crew in Southboro AWC
1 crew in Worcester AWC

The crews will operate under the current Gas Construction Agreement. These are not incremental positions. The Company will add the four additional crews to the existing Construction crew compliment starting in 2020.

The construction crews will be selected based on daily work assignment. The practice of using a volunteer list is discontinued.

The parties agree to meet and discuss the implementation of the four new Gas Construction Crews.

Inspectors

1. The parties agree to create a new Inspector position. (see job description attached)
   This position will be paid 7% above the Distribution Technician A rate.

   Full time Inspector positions will be assigned to the locations listed below as follows:

   •Southborough 6
   •Worcester 5
   •Hyde Park 4
   •Somerville 5

   It is understood that the number of Inspectors in each area may be adjusted up based on the number of contractor crews working in an area. However, the number of inspectors in each area will not drop below the minimum number listed above.

In the event future legislation, code changes or a DPU order mandates a ratio different than is defined in this agreement, the parties agree to meet and negotiate changes to this Inspector Agreement. In the event the parties are unable to reach agreement, it is understood that the 7% premium will be discontinued, and the work described in paragraphs 3, 4, and 5 will revert to the bargaining unit.

2. Inspector to contractor crew ratio is planned at 3:1, however, when unplanned absences occur the Inspectors will back fill each other and expand to a 4:1 ratio. Beyond the 4:1 ratio any additional resources will be requested from the gas maintenance (qualified distribution Pool). After the 3-day absence period, the company shall assign additional resources from the gas maintenance group to maintain the 3:1 ratio.

3. If the Company utilizes outside contractors to perform gas pipeline associated work, the contractors will perform all mark-outs associated with said work. If necessary, Company inspectors may assist. The need to utilize Company inspectors in this role will be determined by the Company. If the contractor is unable to access a premise during normal working hours, the contractor will be permitted to perform the mark-out(s) during off hours. Except as described in this paragraph, Appendix F will continue to govern the use of contractors.

4. If the Company utilizes outside contractors to perform work on Company pipeline, the Contractors will be responsible for scheduling their own work. Company inspectors may assist in this process if necessary. The contractor shall notify the Inspector or meter service personnel who will coordinate the remaining scheduled work.

APPENDIX G

MISCELLANEOUS POLICIES

ADOPTION BENEFIT

Benefit Amount

The adoption benefit is 100% of the first $4,000 of eligible expenses for the adoption of each child under the age of 18. Only the expenses you actually incur are eligible for reimbursement.

The benefit is payable when the adoption is final. An adoption is final when a decree of adoption is entered by the court. Reimbursement will be provided when the Company receives proof of adoption and proof of payment of eligible expenses.

Eligible Expenses

The following expenses are eligible for payment:

- Adoption agency fees
- Legal fees
- Court fees
- Travel expenses
- A child's initial medical examination
- The pregnancy out-of-pocket medical expenses of the natural mother (to the extent these expenses are not eligible for reimbursement under another medical plan)

How to File a Claim

When your child's adoption is final, send original receipts and documentation to the Benefit's Department.

ADOPTION LEAVE

Eligibility

You are eligible for Company-paid adoption leave after you complete three (3) months of employment with NSTAR. Your pay during the duration of your adoption leave will be based on your base pay in effect on the day your leave starts.

You must give your supervisor at least three (3) months written notice of the date your leave will start and when you expect to return to work. If you are also eligible for FMLA leave, time taken for adoption leave will also count as FMLA leave.

Duration

Adoption leave begins on the date the child is received into your home. The maximum duration of an adoption leave depends on the age of the adopted child according to the following schedule:

Age of Adopted Child	Maximum Amount of Leave
6 years old or younger	*8 weeks*
At least 7 years old but less than 13 years old	*4 weeks*
At least 13 years old but less than 19 years old	*2 weeks*

Returning to Work

You generally have the right to return to the same position or an equivalent job with equivalent pay, benefits and working conditions at the conclusion of the leave. Moreover, employees have no greater right to restoration than if they had been continuously employed.

UNIFORMS AND RAINGEAR

- Rental uniforms that are supplied by the Company will be cleaned and maintained by the Company.
- Replacement rental garments will be issued as needed and upon return of old clothing to the Company.
- All employees who receive uniforms or are enrolled in the FR program will wear them during Company paid hours.
- Employees will not wear uniforms or FR clothing other than on Company business.
- One fire resistant coverall will be issued to Maintenance and I&R Department employees as part of their personal protective equipment and maintained by them.

The Company will supply rental uniforms to:

Garage Mechanics
Garage Attendants
Building Maintenance Person
Building Maintenance Mechanic
Building Electrician
Meter Repair Department
Tool Mechanic

The Company will supply raingear to:

Facilities
Fleet
Meter Services
Maintenance
Instrument & Regulation
SMMT

The Company will supply rubber footwear to:

Meter Services
Maintenance
Instrumentation & Regulation

The following classification will be enrolled in the FR program:

Garage mechanics will receive an initial allowance of $900.00 and a yearly allowance of $700.00 thereafter.

All other groups enrolled in the FR program:

Meter Services Technicians
Distribution Mechanic
Instrumentation & Regulation (All)
SMMT
Distribution Mechanic
Corrosion Technician

- The initial allowance is $1,450.00.
- Each year thereafter the allowance is $800.00 deposited into employee's clothing account in January. Any unused amount of the allowance cannot be used for the following year's acquisition of clothing.
- In 2017 each employee enrolled in the FR program will receive an additional $200.00 allowance.

The practice of the Company issuing t-shirts will discontinue for employees enrolled in the FR program.

SAFETY SHOES

The employee, after producing a receipt for cost of safety shoes, will be reimbursed for one-half (1/2) the cost.

The following Classifications will be excluded:

1. All employees who fall under the Clerical Progression and Pay Plan.

2. Dispatchers.

LICENSES

The Company agrees to reimburse employees, including renewals, for licensing and certification fees for the following: hoisting license, welding certification, electrician license (if required) and Class A & B Driver's Licenses. (The Company agreed that all grandfather agreements now in effect will remain in effect.

EXAMS

The Human Resources Department after consulting with the Union President will appoint a representative of the Union

who may review with a member of the Human Resources Department, the results of exams affecting job appointments. The Company will notify the Union in writing of the name of proposed appointee. Only the exams pertaining to that specific appointment may be reviewed.

All exams will be the same as those viewed by the Union during negotiations.

A Union designate will be present during the administration of all job-qualifying exams.

DOG REPELLANT

Dog repellant will be supplied any individual requesting it.

DISCIPLINARY ACTION SLIPS

If an employee has received no disciplinary action slips for a period of three (3) years, all slips prior to that period will be removed from his file and returned to the employee.

APRONS

The Company will provide aprons for personnel working in the Meter Repair Department.

Aprons will be supplied to the crew trucks in the Maintenance Department.

PRESCRIPTION GLASSES

The Company will pay for one pair of prescription glasses per year, which are pitted or damaged due to welding or cutting during the performance of Company duties.

DIVISION AREAS

The NSTAR Electric & Gas Corporation is divided into two division areas - East and West. These divisions are sub-divided into four report areas namely, Somerville, Dedham, Southboro and Worcester. There will be no change in the divisions or the report areas unless mutually agreed upon by Union and Company. Failure to reach agreement will result in the implementation of the change by the Company subject to the contract grievance procedure. During the term of this contract, the foregoing procedures concerning Divisions and Report Areas will take precedent over the management functions clause in Article II of the contract.

DAYLIGHT SAVINGS TIME

On the day when Daylight Savings Time is established, all employees working said shift will be paid eight (8) hours at their base rate.When Daylight Savings Time reverts back to Eastern Standard Time, all employees working said shift will receive one (1) hour at the appropriate overtime rate in addition to their basic straight time rate.

SAFETY AND HEALTH

The Company will continue to make reasonable regulations for the safety and health of its employees during their hours of employment. Representatives of the Company and the union shall meet from time to time at the request of either party to discuss such regulations and other matters pertaining to safety.

Safety rules and practices and all applicable State and Federal Laws governing health and safety shall be complied with, by the Company and employees.

APPENDIX H
LEAVE OF ABSENCE

JURY DUTY

When an employee, except a temporary employee, is called to jury duty, he shall be excused from such of his regular scheduled work as is necessary to fulfill the jury duty, and the Company agrees to pay his base pay. The employee's schedule during the week of such absence for jury duty shall be deemed to be 8:00 A.M. to 4:30 P.M., Monday thru Friday.

The individual on jury duty will not be denied the opportunity to work overtime.

It is understood that employees will report for work if not called on a given day for jury duty or if released prior to 10:30 a.m.

SUBPOENAED WITNESS

The Company will allow necessary paid time off to an employee subpoenaed as a witness if the employee is not a defendant in the case or bringing action against the Company or its contractors.

FAMILY LEAVE

A regular employee shall be granted a leave of absence without pay up to 90 calendar days for the following reasons: care of a newborn or adopted child, care of an ill child, parent or spouse. Such leave may be extended by the Company.

A request must be made in writing to the Manager, Employee Relations within one week of expected date of the leave, if possible. Employee benefits will continue for a maximum of 30 calendar days from the beginning of the family leave of absence. If the employee chooses to continue such leave of absence beyond 30 calendar days, employee benefits will be continued in compliance with the law.

If the parent, child or spouse should die during said leave of absence, the employee shall be entitled to benefits as outlined in Appendix H, Funeral Leave.

Said employee shall return to the job and shift held prior to the leave.

The period granted as leave of absence will not constitute a break in the employee's service record if he returns to work upon its completion.

EMERGENCY LEAVE POLICY

Any employee required to remain away from the job on a regularly scheduled workday because of an emergency existing at home which requires his personal attention to make arrangements for care of such emergency, shall suffer no loss of base pay for that day provided he makes every effort to inform the Company, he reports for work as soon as is reasonably possible, and he works at least four (4) hours of that day. However, any employee after having reported for work on a regularly scheduled work day, and is then required to leave because of an emergency existing at home which requires his personal attention to make suitable arrangements for the care of such emergency, shall suffer no loss of base pay for that day.

FUNERAL LEAVE

When a death in the immediate family occurs, an employee will be allowed time off paid for at straight time rates to attend to the necessary funeral arrangements to a total of three (3) consecutive calendar days, if such days fall within his regularly scheduled work week. In special cases when a 4th day is required, it may be allowed at the discretion of the Area Manager or his delegate. In no case shall time off extend beyond the next scheduled workday after the funeral.

The immediate family means spouse, son, daughter, mother or father, sister or brother of the employee affected. In special cases, a relative with whom one lives in the same household may be allowed as in the immediate family at the discretion of the Area Manager or his delegate.

In the event of a death of an employee's mother-in-law or father-in-law, an employee will be allowed time off paid for at straight time rates to attend to the necessary funeral arrangements to a total of 3 consecutive calendar days, if such days fall within his regularly scheduled work week, but in no case to extend beyond the day after the funeral.

In the event of the death of a grandparent, aunt, uncle, brother-in-law, sister-in-law, stepchild, stepparent or grandchild, and if the day of the funeral falls on the employee's regular scheduled workday, the employee will be allowed that day off at straight time rates if the employee attends the funeral.

If a holiday occurs as one of the days in this funeral period, holiday allowance only will be paid for that day in accordance with our regular holiday policy.

Past practices concerning a representative group of members of the Union will be continued.

The foregoing policy will not operate to extend any Paid Leave Policy except if a death should occur during an employee's vacation, the provisions and practices of this section shall apply, and the employee shall receive, if so requested, a re-assignment of those vacation days that were committed to the necessary funeral services and arrangements.

PERSONAL LEAVE OF ABSENCE

At the discretion of the Manager, Employee Relations, a Regular employee may be granted a leave of absence without pay for personal reasons not covered by other policies.

Each application for personal leave will be considered on the merits of the individual case. The Company will give the decision in writing within one (1) week of the request.

The period granted as leave of absence will not constitute a break in the employee's service record if he returns to work upon its completion.

Employee benefits will be continued for a maximum of 30 working days from the beginning of the Personal Leave of Absence.

MILITARY LEAVE

1. Service in Armed Forces Reserve Components

The Company approves the enrollment of employees in the National Guard Officers and Enlisted Reserve Corps of the United States Army, Air Corps and Navy and Marine Corps Reserves, and will grant military leaves of absence as specified.

2. Short Period Active Duty Training

A leave of absence up to a maximum of fifteen (15) working days in any calendar year for the purpose of active duty training will be granted to any employee who is a duly qualified member of a reserve component of the Armed Forces on receipt of written notice of dates of departure and return. Such leave of absence shall not affect the employee's right to his normal vacation, sick leave, or advancement. However, any portion of such leave of absence may be taken coincident with the employee's vacation if he so chooses.

- On receipt of a properly completed application, the Company will pay the difference between the employee's military pay plus allowances (except travel allowances) and employee's normal rate of pay for each day of scheduled work lost up to a maximum of five (5) working days in any calendar week. The computation will be based on a five (5) day work week.
- Military leave pay, when authorized, is subject to the normal deductions and to withholdings required by law.

- Leaves of absence under the above paragraphs will not interrupt purchases of pension, insurance, or health benefits if for less than one-month duration.
- No PR 2 is required for military leaves of absence of less than one month's duration, but the leave shall be indicated on the time card and the employee's request for leave, approved by his Department Head, shall accompany the first time card within the leave period.

(e) Standard forms for notification of proposed performance of active duty training and request for military leave pay may be obtained through the Payroll Department.

(f) Requests for leave of absence to attend service schools, or tours of duty for other than training will be considered as individual cases, on their merits.

3. Basic Training Periods for Reservist Enlistees

Active duty periods of three to six months are being required of some enlistees in reserve components of the Armed Forces. A leave of absence of up to six months plus necessary travel days will be granted, without pay, to any regular employee who, as a duly qualified member of a reserve component of the Armed Forces, is required to go on active duty for basic training as a condition of his service, on receipt of written notice with dates of departure and return. The period granted as leave of absence for this service shall not constitute a break in the employee's service record if he satisfactorily completes his tour of duty and returns to work upon its completion.

(a) The Group Life and Accidental Death Insurance and Employee Savings Plan participation of such employee will be suspended as of the first day of the month following his leaving the Company to enter the Armed Forces. They will be reinstated upon his return to work. His supervisor will secure from the employee his certificates for such group coverage and will hold them during the employee's absence in the service.

(b) If the Company is providing medical coverage for the employee and/or his dependents, such coverage will be subject to suspension during the period of absence, except if the employee requests in writing that the coverage be kept alive. This will apply whether the coverage is for the employee only or for employee and dependents. The employee will be expected to use the health care that his branch of the service provides for himself and his dependents.

(c) If the employee is a participant in the Pension Plan, benefits will accrue to him during such leave of absence based upon his rate of compensation as of the January 1st next preceding the commencement of his leave of absence provided he returns to work within 90 days of his discharge from Military Service.

(d) If the employee is entitled to a vacation before the date of his leave of absence, he may be given it then or it may be postponed until the end of the leave of absence. If he is not entitled to a vacation at the time he starts on his leave of absence, but would be so on the date of his return, he may then be given the vacation to which entitled if he had worked through the leave period, upon evidence of satisfactory completion of his tour of active duty.

4. Voluntary Enlistment or Service Under Effective Selective Service Acts

All pertinent provisions of Section 3. above will apply to employees occupying positions who are called for service in the Armed Forces under the provisions of the effective Selective Service Act, or who voluntarily enlist in the regular components, thereof.

(a) Leave of absence for such employees will be for the period for which called or enlisted, plus 90 days from the date on which released from such service, or from hospitalization continuing after discharge for not over one year.

(b) The employee must apply for re-employment with the Company within 90 days from his discharge or hospitalization as aforesaid, and present certificate of satisfactory completion of his period of training and service.

(c) If the Company is providing any medical coverage for the employee and/or his dependents, such coverage will be subject to suspension during the period of absence, except if the employee requests in writing that the coverage be kept alive. This will apply whether the coverage is for the employee only or for employee and dependents. The employee will be expected to use the health care that his branch of the service provides for himself and his dependents.

5. General Provisions

An employee on military leave will not be entitled to pay for holidays or days sick occurring during his leave. Vacation with pay will depend on length of absence and time of year occurring.
An employee who is so injured while on military leave as to be unable to perform his Company assignment, or who will require further hospitalization after his normal release date, should not accept release from active service until he is able to resume work. He will not be accepted for work or be eligible for Company health benefits until certified as able to work by a Company doctor.

APPENDIX I

EDUCATIONAL AID

TUITION ASSISTANCE PROGRAM POLICY

Under the tuition assistance program, you may be reimbursed up to $4,000. per year for undergraduate degree work or up to $5,250. per year for graduate degree work for approved courses. Reimbursement will be made only if you receive a final grade of "C" or higher. The actual dollars reimbursed will vary with the grade received: A=100%, B=90%, C=80%. In the case of a pass/fail course, reimbursement will be made only if you pass. Books and other materials are not covered under this policy.
For a course to be approved, it must be related to the work you perform for the Company or the related work that you could reasonable be expected to perform for the Company in the future. Courses that lead to law degrees or PhD's are not approved for reimbursement unless pre-approved by the Senior Vice President of Human Resources at NSTAR, or an authorized delegate.

APPENDIX K

G.I. BILL APPRENTICE PROGRAM

The Company agrees on a voluntary Basis to participate in the Apprentice Program under the G.I. Bill.

Upon reasonable notice to the any affected employees, the Company reserves the right unilaterally to end participation in this program should the Company in its sole discretion decide that this is an appropriate step.

APPENDIX L

EDUCATIONAL ASSISTANCE

Confirming agreement reached during recent contract negotiation, the Company will provide up to $48,000 (up to $12,000 per year) for the purpose of an educational assistance plan for each dependent child of an employee who dies as a result of an accident on the job. This plan will be administered solely by the company and payment will be made upon submission to it of bills from the college in connection with room and board, fees, registration, tuition and books.

APPENDIX M

DEPENDENT DEATH BENEFIT

Confirming the agreement reached during recent contract negotiations, dependents of employees who die, as a result of an accident on the job, shall receive hospital, dental and vision care benefits. Coverage for spouse will cease with remarriage, reaching age 65 or become covered under another group plan. Coverage for dependent children will cease same as active employees. Benefits to be paid at 100% by the Company.

MEMORANDUM OF Agreement

This shall be considered a Memorandum of Agreement between the Company and the United Steelworkers Union regarding the establishment of a Distribution Support Technician (DST) Classification.

1. The job specification of Distribution Support Technician is accepted at the rate of pay outlined below and will become effective on April 2, 2010.

2. Rate of Pay:
   Trainee: $20.00
   6 Months: $22.00
   12 Months: $23.50

3. HOURS: Distribution Department, Monday- Friday 7:30 am – 3:30 pm, from first Sunday in May through last Saturday in October.

4. Hours: Meter Services Department, Monday-Friday 1:00 pm – 9:00 pm, except for period listed above.

5. Locations: 0-4 DST's in EAST (Somerville & Hyde Park) in 2010
   0-4 DST's in the West (Southborough & Worcester) in 2010
   Total for 2010: 0-8 DST's

   0-6 DST's in East (Somerville & Hyde Park) in 2011 & 2012
   0-6 DST's in West (Southborough & Worcester) in 2011 & 2012
   Total for 2011, 2012: 0-12 DST's

6. This classification will be excluded from Appendix F Unless,
a. At the Company's discretion, an employee is upgraded to a Distribution Mechanic C to cover a vacation of any duration, sickness or restricted (light) duty over 5 days: or
b. By mutual agreement, other circumstances result in the upgrade.

7. Article V – Hours and Wages, Section 14 – Assignment Outside Regular Report Area shall only apply when employees move East to West or West to East.
8. The Distribution Support Technician is responsible for successfully completing all training, OJT tasks and examinations as required.

Memorandum of Agreement

This shall be considered a Memorandum of Agreement between the Company and the United Steelworkers Union regarding the establishment of a Service Technician D Classification in the Meter Services Department

1.The job specification of Service Technician D is accepted at the rate of pay outlined below prior to the April 1, 2010 General Wage Increase.

2.The Service Meter Technician (SMT) Classification converts to a Service Technician D classification, effective April 2, 2010.

3. Service Technician D

Trainee:	$22.17 (6) months
Step 1:	$24.98 (6) months
Step 2:	$27.33 (6) months
Step 3:	$29.13

4. Current SMT'S may elect to be grandfathered at their present location and present work schedule, as Service Technicians D without progression.

5 No more than three (3) Service Technicians D will be scheduled on a Monday-Friday, 1pm-9pm shift in each area. Selection criteria for the shift:
(a). Volunteers by seniority for the Service Technician D in the area.
(b). Junior (non-grandfathered) Service Technician D in the area will be forced.

6.There will be no more than a total of twenty (20) Service Technicians D across all four (4) areas.

7.There will be no more than five (5) Service Technicians D in each of the four (4) areas.

8. Areas = Hyde Park, Somerville, Southborough and Worcester.

9. The Company and Local will work together to develop and implement a Service Technician Training Program, similar to the Distribution Training Program.

10. The Company will determine the progression from Service Technician D to C.
(a)If employed as a Local 12004 Service Technician D for 18 months or longer, training time to advance will be: 12 months from C to B, 9 months from B TO A, contingent upon successful completion of required classes and OJT.
(b)If employed as a Local 12004 Service Technician D for less than 18 months, the standard training times will apply according to present contract language, contingent upon successful completion of the required classes an OJT.
(c)Selection criteria for Service Technician C:

- Existing Service Technicians already in the progression C/B/A will have first option to select a new report area, before other represented employees. The Company and the Union will work together in the event that more than one (1) Service Technician leaves the area.
- Volunteer by seniority- All Service Technician D
- Former Service Technicians will have first options to bid this position before forcing area-junior (non-grandfathered) Service Technician D.
- Forced by area-junior (non-grandfathered) Service Technician D.

MEMORANDUM OF Agreement, Distribution Support Mechanic

This shall be considered a Memorandum of Agreement between the Company and the United Steelworkers Union.

1. The job specification of Distribution Support Mechanic is accepted at the rate of pay outlined below and will become effective on March 29, 2017.

2. Rate of Pay: Trainee: $24.26 6 Months: $26.65 12 Months: $28.40

3. HOURS: Maintenance Department, Monday- Friday 7:30 am – 3:30 pm, from first Sunday in May through last Saturday in October.

4. Hours: Meter Services Department Monday-Friday 8:00AM – 4:00PM pm. All incumbents in the DSM classification as of 4/1/17 will have the option of working 1:00PM – 9:00PM or 8:00AM – 4:00PM.

5. Total FTE's will not exceed twelve (12). The company will determine report locations.

6. This classification will be excluded from Appendix F Unless,
a. At the Company's discretion, an employee is upgraded to a Distribution Mechanic C to cover a vacation of any duration, sickness or restricted (light) duty over 5 days: or
b. By mutual agreement, other circumstances result in the upgrade.

7. Article V – Hours and Wages, Section 14 – Assignment Outside Regular Report Area shall only apply when employees move East to West or West to East.

8. The Distribution Support Mechanic is responsible for successfully completing all training, OJT tasks and examinations as required.

9. Distribution Support Mechanic will complete activity reports associated with tasks they perform.

10. Distribution Support Mechanic can make safe in accordance with first responder training, such as, evacuating and standing by for Service Technician.

11. At second cycle in the Meter Services Department or one (1) year of service, The Distribution Mechanic can isolate and after calling for a Service Technician, determine if he can leave the job before the Service Technician arrives.

12. The DSM classification will perform repairs on gate boxes. Types of repairs include roadway projects, paving projects, municipal and state projects and any and all work associated with G.L. C. 164 116B. Gate box repairs requested by other departments will be performed by DSM's as long as it is scheduled work. Any emergency type work will be performed by the Gas Maintenance department.

2013 Contract Negotiations

LEGAL REPRESENTATION

NSTAR Electric & Gas Corporation agrees to provide Local 12004 with legal representation for all its members who require this assistance as a result of any act or acts in connection with:

the business of the Company

This assistance will be provided only when the employee is acting within the scope of his/her authority and meets the above-stated test.

NEW HIRES

New Hires to EVERSOURCE will be given an opportunity to meet with the USW Local 12004 Administrator for one-half (1/2) hour during their orientation with the Company.

DISTRIBUTION MECHANICS

The Company and Union agree that twelve Distribution Mechanics will be transferred each year from January thru March to perform ATM inspections. Transferred employees from Distribution will be offered all applicable Appendix F overtime.

DISTRIBUTION WELDER TECHNICIAN TRAINING COORDINATOR

The Company agrees to establish two (2) Distribution Welder Technician Training Coordinators, to be determined by department seniority. One (1) will be assigned to the West Division and one (1) will be assigned to the East Division. The Distribution Welder Technician Training Coordinators will be paid seven percent (7%) above the current rate of pay when engaged in training, certifying and recertification of welders. The Company agrees to work with the local to develop a welder training program no later than September 1, 2013.

SERVICE TECHNICIAN – D

Service Technicians D can make safe in accordance with the first responder training, such as evacuating and standing by for a Service Technician.

Once the Service Technician attains the B rate in his progression, he can isolate, red tag, and after calling for a Service Technician, determine if he can leave the job before the Service Technician arrives.

Service Technician D can repair leaks on the work he performs and other incidental leaks, i.e. swivels, unions or tightening the nuts.

2013 Contract Negotiations

DISTRIBUTION SUPPORT TECHNICIAN

Distribution Support Technicians will complete activity reports associated with tasks they perform.

Distribution Support Technicians can make safe in accordance with first responder training, such as, evacuating and standing by for a Service Technician.

At second cycle in the Meter Services Department or one (1) year of service, the Distribution Support Technician can isolate and after calling for a Service Technician, determine if he can leave the job before the Service Technician arrives.

The rate of pay will increase by fifty ($.50) cents on the rate effective April 1, 2013, prior to the general wage increase.

INSTRUMENTATION AND REGULATION DEPARTMENT

Instrumentation and Regulation Department will perform critical valve inspections at gate stations and pressure regulating facilities.

Instrumentation and Regulation Department will conduct joint project review committee sessions during the1st and 3rd quarter of each year to discuss upcoming projects for the department. At said sessions, one (1) designated Local 12004 Instrumentation and Regulation representative from each area and one (1) union officer, appointed by the President of the Local will attend.

The rate of pay for the following will increase as stated, effective April 1, 2013:

- Instrument Technician $.60 per hour
- General Technician $.55 per hour
- Maintenance Technician $.55 per hour

Eliminate the Boot Mobile on Company property.

GENDER CLAUSE

Whenever used in this agreement, a masculine pronoun shall be deemed to include the masculine and feminine gender, and a singular word shall be deemed to include the singular and plural, unless the context clearly indicates otherwise.

AGREEMENT

PARTIES AND DATE

THIS AGREEMENT, DATED APRIL 1, 2024 between NSTAR Electric & Gas Corporation, d.b.a. Eversource Energy, (hereinafter the "Company") and the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied-Industrial and Service Workers International Union, AFL-CIO/CLC on behalf of Local 12004, United Steel, Paper and Forestry, Rubber Manufacturing, Energy, Allied- Industrial and Service Workers International Union, AFL-CIO/CLC (hereinafter called the "Union")

WITNESSETH

General Purpose

Whereas the parties hereto have reached an Agreement as a result of collective bargaining and for the purpose of facilitating the peaceful adjustment of differences that may arise from time to time, and to promote harmony and efficiency to the end that the Employees, the Company and the General Public may be benefited, the Parties hereto contract and agree with the other as follows:

COMPLIANCE AND APPLICABILITY OF LAWS

Section 1. Compliance with Laws
The parties hereto shall comply with the provisions of all applicable laws and all lawful regulations, orders and directives issued thereunder relating to rates of pay, wages, hours of employment and other conditions of employment during the term of this Agreement.

Section 2. Applicability of Laws
It is agreed that the provisions, if any, contained in this Agreement which are in conflict with the provisions of any Federal or any state laws and lawful regulations orders and directives shall not be enforceable.

ARTICLE I

General

SECTION 1
Recognition of Union for Certain Department

Pursuant to, and in conformance with, the National Labor Relations Act, the Company recognizes the Union as the sole collective bargaining agency in behalf of all Regular employees in the Office and Clerical Workers, Dispatch, Warehouse, Fleet, Facilities, Planning & Scheduling, Maintenance, Service, Distribution, Operations, Meter Repair, Customer Service and Instrumentation & Regulation Departments, to whom this Agreement applies for the purpose of bargaining in respect to wages, hours and conditions of employment.

"Employee" Definitions

Wherever used in this Agreement, the words "employee" or "employees" shall refer only to those employees to whom this Agreement is applicable.

*Subject to the Memorandum of Understanding, dated December 4, 1974.

SECTION 2
Classes Of Employees And Eligibility

The provisions of this Agreement shall apply only to regular employees as defined in Article I, Section 1. The term "Regular Employees" means those holding regular positions so authorized by the Company.

It is agreed, however, that the following regular employees are excluded from the terms of this Agreement, and that they shall not be eligible for Membership in the Union:

Officers, Directors, Managers, Superintendents, Secretaries to the above, Engineers, Accountants, Buyers, Supervisors, Foremen, Guards, Salesmen, Payroll*. Definitions of Supervisors and Foremen will be as defined in the National Labor Relations Act.

*Subject to the Memorandum of Understanding, dated December 4, 1974.

The following not being regular employees are, therefore, excluded from the application of the terms of this Agreement and except as noted in Article 1, Section 3, shall not be members of the Union:

(A) Temporary Employees

Those hired to fill temporary jobs such as seasonal construction work or temporary maintenance work. Any such employee who shall have worked twelve (12) consecutive months for the Company shall thereby become a regular employee, providing regular jobs are available.

The Company will not establish different hours for temporary employees other than those already established for regular employees.

(B) Probationary Employees

Those hired on six (6) months' trial to fill regular authorized positions which are open or expected to be open. It is understood that if such probationary employees are found satisfactory, and if the positions are still open, they will become regular employees.

SECTION 3
Union Security

Subject to the provisions of Sections 1 and 2 of this Article, it shall be a condition of employment that all employees of the Company covered by this Agreement and hired on or after September 1, 1973 or who are members of Local Union No. 12004, United Steelworkers, AFL-CIO-CLC in good standing on the execution date of this Agreement shall, on the thirtieth (30th) day following the execution date of this Agreement, become and remain members in good standing in the Union for the balance of the term of this Agreement.

It shall also be a condition of employment, subject to the provisions of Sections 1 and 2 of this Article, that all

probationary employees who are hired on or after its execution date, and who thereafter become regular employees, shall, on the thirtieth (30th) day following the beginning of such employment, become and remain members in good standing in the Union for the balance of the term of this Agreement.

During the six (6) month probationary period, the Company shall determine the suitability of said new employee for acceptance as a regular employee. The decision as to the retention by the Company of any probationary employee as a regular employee subsequent to the completion of his probationary period of employment is one which is within the sole discretion of the Company and if the Company for any reason terminates said probationary employee from its employ at any time prior to or at the completion of his probationary employment, such action shall not be subject to the Grievance Procedure or to Arbitration under this Agreement, nor shall such action form the basis of any claim whatsoever under this Agreement.

In the event a probationary employee bids and is awarded another position within the Company, such employee will not be transferred to the new position until his probationary period is completed. Additionally, probationary employees will not be eligible for the Appendix F for the duration of their probationary period.

ARTICLE II

SECTION 1
Union Agreement On Continuity Of Work

During the term of this Agreement or any extension thereof, there shall be no authorized or sanctioned cessation, retarding or stoppage of work because of any dispute which may result from an interpretation of this Agreement, or from any cause whatsoever. It is further agreed that any employee represented by the Union and/or subject to the terms and conditions of this Agreement who, without the authority or sanction of the Union, voluntarily absents himself or herself from work because of any dispute or demand may be denied further employment or suspended at the option of the Company, provided, however, the Union may use the grievance and arbitration procedure as contained in Article III of this Agreement on the sole question whether such employee absents himself or herself from work because of a dispute or demand.

Company Agreement On No Lockout

The Company agrees that during the life of this Agreement there will be no lockout.

Management Functions

Being among the usual functions of Management, it is agreed (subject as limited and stated in this Contract to review procedure in certain cases and to rules of seniority where applicable), that the Company has the sole right at all times to employ, promote, transfer, and discharge employees, and to determine the number and qualifications of employees. Nothing in this paragraph is to be construed as a statement of limitations of Management.

Court Or Similar Action

In further consideration of the mutual promises contained herein, the parties expressly agree that neither shall bring, or cause to be brought, any court, or other legal or administrative action against the other until after the dispute, claim, grievance or complaint has been brought to the attention of the Party against whom it was made and the said Party after actual notice of same, has within reasonable time, failed to take steps to correct the cause or circumstances giving rise to such dispute, claim, grievance or complaint.

SECTION 2
Mutual Desire For Uninterrupted Service

It is the desire of both Parties to provide for uninterrupted and continuous service. Nothing herein is intended, however, to prevent the resignation or discharge of individuals, the discharge being subject to review under the conditions and in the manner hereinafter specified in Article III, and Article IV.

SECTION 3
Union Desire To Promote Company's Welfare

The union agrees that its members will individually and collectively perform loyal and efficient work and service, use their influence and best efforts to protect the property of the company and the Company's interests, assist in promoting the sale of the company's products, and cooperate with the Company and the employees of all departments in promoting and advancing the welfare of the Company and its service at all times.

Company To Cooperate With Union For Harmony And Efficiency

The Company agrees that it will cooperate with the Union in its effort to promote harmony and efficiency among all the Company's employees.

SECTION 4
Agreement Concerning Discrimination Against Certain Employees

The Company agrees not to interfere with the rights of its employees to become members of the Union. There shall be no discrimination, interference, restraint, or coercion by the Company, or any of its agents against any employee because of Membership in the Union. The Union agrees collectively and individually for its members and agents, not to intimidate or coerce employees into Membership and not to solicit memberships, distribute pamphlets or discuss Union matters during working hours. The Union further agrees for its members not to discriminate against any employee of the Company because of non-membership in the Union or to intimidate, coerce or refuse to work cooperatively with any employee or workman not a member of this Union, or to refuse to work upon or with materials furnished by the Company. The Union agrees that because of the nature of the Company's business, its members will promptly and loyally obey a request of a Company Supervisor where such request has direct connection with the work of the Company and is not contrary to Company Safety Rules; and in that they will promptly, loyally, and carefully follow operating and safety rules. It being agreed, however, that any orders given shall be by Company Supervisors and will not be in violation of the Safety Rules as applicable.

ARTICLE III

SECTION 1
Shop Steward Selection

Notification will be made by the Union as to the identity of the Grievance Committeemen and Shop Stewards within thirty (30) days of the signing of the Agreement. The Company will be notified of any changes in position within seven (7) days. The Grievance Committeemen selected by the Union shall have the right to participate with any department Shop Steward in the various steps of the grievance procedure.

SECTION 2
Employee Grievance Procedure

In the event of any dispute between the Union and the Company as to the meaning, application or intent of the provisions of this Agreement, the procedure of settlement shall be as follows:

1st A discussion of the grievance between the aggrieved employee with his Shop Steward and his immediate Supervisor. If no satisfactory settlement is made, the Department Head and the Grievance Committeeman will be called in to the discussion at the first convenient opportunity.

2nd A meeting between the Shop Steward, a member of the Grievance Committee and the Department Head. At this stage, the grievance shall be presented in writing on a form mutually agreed to between the Company and the Union. The Department Head will give his answer in writing within seven (7) days unless the period is extended by mutual agreement. This step must be initiated within thirty (30) days of knowledge by the Union of the incident that caused the dispute.

NOTE: In making investigation under paragraph 1 and 2 above, the employees concerned shall first receive permission from the Department Superintendent or someone designated by him, to absent themselves from their work.

3rd A Meeting between the Grievance Committee and the President of the Company or his duly authorized representative. If a meeting between the parties is to be held it will be requested no later than thirty (30) days after the date of the Department Head's written answer in the second step. The Grievance Committee may be accompanied by a representative of the United Steelworkers, AFL-CIO-CLC. The parties agree to schedule quarterly meeting dates for 3rd step grievances hearings at the start of each year. However, in the case of termination, the parties agree to hold a Step 3 hearing within thirty (30) days of the Step 2 hearing or at the quarterly meeting, whichever comes first.

If not, the Local shall be notified in writing, giving the reason for delay. In the event that no satisfactory settlement of the dispute is reached by the foregoing procedure then such matter may be referred to a Board of Arbitration. If arbitration is not so requested within forty-five (45) days of the first meeting of this step, it shall be deemed abandoned unless said period is extended in writing by mutual agreement of the Grievance Committee and the Company.

4th In the event that arbitration is required, one arbitrator will be appointed within thirty (30) days of the request. The Arbitrator shall be chosen as follows: The Company and the Union will each designate a representative to choose the arbitrator. If the Arbitrator cannot be mutually agreed upon within ten (10) days of the initial request, then said Arbitrator is to be appointed by the American Arbitration Association. No Arbitrator shall have the power to add or subtract from or modify any of the Terms of this Agreement or pass upon or decide any question except the grievance submitted to the Arbitrator in accordance with the foregoing provisions. The Arbitrator will be instructed to render a decision within thirty (30) days from receipt of all materials pertinent to the case. The award of this appointed Arbitrator shall be final and binding on both the Company and the Union. The Company and the Union shall bear the expense equally of the Arbitrator.

Mutually agreed upon extensions will automatically extend the time within the steps of the grievance procedure.

ARTICLE IV

Working Conditions

SECTION 1
Conditions Not Covered

Working conditions which were in operation on the effective date of the Agreement, and which are not covered by this Agreement shall remain in effect unless changed by mutual consent of both parties to this Agreement. The Union agrees to not unreasonably withhold such consent when the change in question may interfere with the efficient operation of the Company; provided, however, that such change is not detrimental to the employees involved.

SECTION 2
Seniority Determination

Seniority shall be determined from the date of the beginning of the last continuous period of employment. In determining length of service for the purpose of seniority, absence from the Company's service for less than six (6) months shall be disregarded. Absence for more than six (6) months, but less than one (1) year, shall be deducted from length of service. Absence of more than one (1) year shall forfeit all seniority previously established, except two (2) years in case of lay-off. An absence due to any employee's resignation from the Company's service shall forfeit all seniority previously established. The only exceptions to this method of determining length of service shall be leave of absence in writing granted by an Officer of the Company, illness attested to by a Physician's Certificate, leave of absence for the transaction of Union business as provided for in Article IV, Section 4, or service in the Military Forces of the United States, or the Commonwealth of Massachusetts.

Temporary Transfers

Transfers may be made at the option of the Company on a temporary basis for a period not to exceed forty (40) worked days for any one transfer. Temporary transfers shall be limited to sickness/accident, vacations, restricted duty, job hold over and workload. Temporary transfers due to workload will be for the following areas: Meter Service (SNOPs), Gas Meter Shop (Meter Technician and ERTs) and snow removal in Facilities (B&G).

There will be no 40-day transfers from a department while the Company has outside contractors performing work in that department, with the exception of someone who is on restricted duty. An employees' restrictions will determine their eligibility for a temporary transfer. An employee on restricted duty cannot displace an unrestricted employee in his department. The Company will endeavor, first, to find work in his department and report area. If no such work is available, the Company will then attempt to find work in another department within his report area prior to transferring him. The practice of banking overtime associated with Appendix F, where applicable, will be for a period not to exceed thirty (30) days.

Temporary transfers beyond forty (40) worked days shall be mutually agreed upon. An employee may be subject to a Temporary Transfer twice in any calendar year. On a voluntary basis an employee may be transferred an unlimited number of times, with prior agreement from the Union. This will not affect the number of transfers which are mutually agreed to between the Company and the Union. (A permanent transfer of over forty (40) worked days shall be covered by Article IV, Section 5).

When a 40-day transfer occurs between two calendar years, the year in which the majority of time worked will

determine what year the 40-day transfer is charged to; if split evenly (20 days/20 days), it will be charged to the year the transfer ends.

Seniority Status When Interdepartmental Transfer Occurs

An employee transferred on a temporary basis shall continue to accrue seniority in the original department. The affected chief stewards and department stewards shall be notified of such transfers.

An employee permanently transferred to another department or job shall retain his seniority in his former department or departments, but not accumulate further seniority in such department, as of the date of transfer, if the transfer is to another department, but shall begin seniority in his new department as of that date.

Lay-Off And Recall

Lay-off and Recall after Lay-off of employees shall be made initially within each department according to Company seniority, namely, length of service in the Company, but subject to the qualifications of the employees involved to do the work required. An employee laid off from a particular department under the foregoing shall have the option of returning to the last job he held in the department from which transferred. An employee laid off who has worked in one department only, or whose last job in the department from which transferred has been abolished will, where other jobs are available, have the option, without displacement of other employees, to transfer to such available jobs if qualified and able to perform the work required, otherwise he shall have the option of replacing an employee with the least Company seniority in a labor classification.

Employees who have been laid off from the Company shall be returned to work in the inverse order in which they have been laid off, provided they are qualified and have the ability to perform the work available, before any new employees are hired. The right to be recalled shall cease after three (3) years from the date of layoff. A laid off employee, who is notified by registered mail to return to work, must report to the Human Resources Organization with seventy-two (72) hours after such notice has been received by him/her and, when reporting, he/she shall advise said Company whether or not he/she will return. Said Company will send notification to the last known address. Should the letter be returned undeliverable, or the employee fails to advise the Human Resources Organization within seventy-two (72) hours that he/she will return to work or fails to return to work within fourteen (14) days after advising the Company that he/she will do so, the next employee shall be called.

Promotions And Vacancies

Promotions and transfers to fill vacancies may be made both within departments and from one department to any other. In filling vacancies or making promotion, other qualifications being equal, Company seniority shall prevail. The word “qualifications” as used in this section, shall include such matters as experience, physical fitness, skill, knowledge, efficiency, and responsibility.

It is agreed that if a vacancy is to be filled that the past practice of posting or filling position without undue delay will be continued.

Review Rights Re Non-Promotion, Lay-Off, Or Non-Reemployment

If an employee has not been promoted, or has been laid off and not reemployed, such employee shall have the right to have his case reviewed, provided he requests such review within two (2) weeks, in accordance with

Article III. If a Union member receives an unfavorable decision in regard to this paragraph, he may within six (6) months have the matter reopened for consideration upon the discovery of newly obtained evidence and facts.

If an employee is discharged for any reason, such discharge or demotion may be reviewed under the grievance procedure set forth in Article III, provided a request for such review is made within two (2) weeks. The Company shall then furnish him with the reason for his discharge or demotion. If upon investigation such employee has been found to have been unjustly discharged or demoted, he shall be reinstated and shall be paid for any time he may have lost at his regular rate of pay.

Any dispute arising out of the operation of seniority shall be settled as provided elsewhere in this Agreement for the settlement of all grievances or disputes.

SECTION 3
Bulletin Boards

The Company shall provide bulletin boards at locations mutually agreed upon for the purpose of posting official Union notices only. Said notices shall not be of a controversial or political nature as determined by the Company's designated representative. Said bulletin boards shall be glass-enclosed, and the Union Secretary shall be responsible for the posting of any notice in accordance with the foregoing.

SECTION 4
Right Of Employees To Serve Union As Officials

The Company agrees to grant to employees of the Company who are members of the Union such reasonable leaves of absence for transacting business of the Union or any Affiliated Union Organization in such numbers and for such length of time as the Company shall determine. An employee shall not be entitled to be paid by the Company during any such leave of absence.

Any member of the Union granted a written leave of absence and employed in any official capacity by the Union, or any Affiliated Union Organization, shall not lose his seniority in the department in which he was employed. Such employee of the Company permanently employed by the Union in any official capacity, or by an Affiliated Union Organization, shall, upon being relieved of his official position with the Union, be entitled to be reinstated in the position he held at the time of taking such official position.

The Company further agrees that time lost by an employee when transacting authorized Company-Union business, such as negotiation or grievance proceedings, shall be paid for by the Company.

(a) Grievance proceedings reimbursement at Step 3 meetings will be limited to a maximum of eight (8) members.
(b) Arbitration proceedings reimbursement will be limited to a maximum of three (3) bargaining unit members.
(c) Negotiation proceedings reimbursement will be limited to a maximum of eight (8) members.

SECTION 5
Job Posting

When an existing or a new job classification which falls within the range of jobs covered by the Bargaining Unit is to or has become vacant or is to be filled, notice of such Job Classification is to be posted for a period of ten (10) calendar days. The notice is to state the name of the job, the name of the person to whom applications

for such job are to be made, and the date and time before which such applications must be made in order to be considered. The "open" job will not be filled until the time specified in the posted notice except if the Company deems it necessary, it may fill such job on a temporary basis. No "posting" will be made, however, to cover the usual filling of jobs temporarily vacant due to such conditions as sickness, accidents, vacation, etc. Within two (2) weeks after expiration of the posting period, the vacancy will be filled by the accepted applicant, but if there is no applicant who is qualified, the Company shall have the right to hire a new employee to fill such vacancy within 60 days of the expiration of the original posting date, after which time the job will be re-posted if it is to be filled. The employee will be transferred no later than the third Sunday following the Award Posting. Any employee assigned to a posted job with a progression of 24 months or less, shall have forty-five (45) "worked" days in which to qualify. If the posted job has a progression of more than 24 months, the employee shall have sixty (60) "worked" days in which to qualify. If he is unable to qualify, he may return to the classification from which he came without loss of seniority rating therein. The resulting vacancy will be offered to the next qualified bidder from the original posting. If there are no other qualified bidders, the Company shall repost the job if it is to be filled. All other provisions of this Contract not inconsistent with this paragraph are to apply concerning the filling of a job classification, except for employees who have not made application in compliance with this job posting provision.

Employees away from work because of vacation, illness or other legitimate reasons one or two days during the posting period will have an additional one or two days, as appropriate, to bid the job once they have returned to work, assuming it is within two (2) weeks of the date of the job award.

Employees senior to the successful applicant away from work because of vacation, illness or other legitimate reason for the entire posting period may within two (2) weeks of the date of the job award question the award.

The company will notify the Union in writing as to whom the applicants were and who was the successful applicant.

Job Posting and Bidding Sheet formats will not be changed without mutual consent.

ARTICLE V

Hours And Wages
SECTION 1
Schedule Of Wage Rates

The Union and the Company agree that subject to conditions of the Contract, the wage rates in effect for the term of this Agreement shall be in accordance with the schedule marked SCHEDULE OF WAGES, in Appendix A which is made a part hereof. It is further agreed to hire at a rate of pay no more than the negotiated rates, which are effective at the end of the first six (6) months of employment.

SECTION 2
Normal Work Week Defined

The normal work week for all employees covered by this Agreement shall consist of forty (40) hours being five (5) consecutive days of eight (8) hours.

SECTION 3
Working Schedule Stipulations

A stated hour for reporting for work, and a stated schedule of working time shall be given each employee, and except in cases of emergency, forty-eight (48) hours' notice of any change in such schedule shall be given to him, except where employees request and it is agreed to schedule two (2) shifts in one day (department payroll day) in order for the employee to obtain more consecutive or convenient time off. Each employee shall keep the Company informed in regard to changes in his address or telephone number. Address changes shall be reported to the Union Recording Secretary in writing by the Company. If for good cause an employee is unable to report for work, reasonable notice of such fact should be given to the Company.

An employee will not be required to work outside his report area zone except as outlined in Article V, Sections 13 and 14.

SECTION 4
Call-In Definitions And Stipulations

Recall To Work
A recall to work occurs during non-scheduled hours when an employee is called back to work and is released before his next scheduled hours.

Early Call In
An early call in occurs when an employee is called in before his regularly scheduled shift and continues working into that shift.

Travel Time
Travel time is one (1) hour's pay, allowed to cover time coming to and going from work, and applies only to "Recall to Work". One-half (1/2) hour's pay will be paid as travel time on an "Early Call In".

Stipulations

Recall To Work
If an employee is "Recalled to Work" during non-scheduled hours, such work time plus an allowance of one hour for travel time shall be overtime. In no such case shall this total be less than five (5) hours. For Mark-Outs in no such case shall this total be less than (4) four hours.

Early Call In
"Early Call In" will be paid for at overtime rates for time worked prior to regular starting time.

SECTION 5
Overtime Stipulations

1. An employee shall be credited with overtime for all work in excess of eight (8) hours worked in any one (1) day except where employees request and it is agreed to schedule two (2) shifts in one day (departmental payroll day) in order for the employee to obtain more consecutive or convenient time off, or in excess of forty (40) hours worked in any one (1) payroll week at one and one-half times his base wage rate.

2. Employees covered by this Agreement shall receive pay at time and one-half their base wage rate for all work that does not occur within their regularly scheduled work day or work week (except whenever the opportunity is offered employees to make up their forty (40) hour week, after having lost work due to conditions beyond the Company's control, such time shall be paid for at the straight time rate).

This paragraph shall not be construed to change in any way the present holiday, sick pay policy or equalization of overtime policy.

3. An hourly paid employee who may be required to report to work at regular starting time is to be allowed a minimum of four (4) hours pay when, in the Company's opinion, conditions prevent work being performed.

4. It is agreed to continue the present policy on posting lists for the equalization of overtime.

5. The following will apply for off-hours call outs of Maintenance, Meter Services and Instrumentation and Regulation personnel.

The Company will make two attempts to reach the individuals necessary to respond to a call out by area.

If the number of individuals required for Distribution call outs is not reached by using the area call out list, the Company will make one attempt to reach the individuals required by utilizing the call out list from the report area in that region:

Region 1: Somerville, Hyde Park
Region 2: Southborough, Worcester

The existing practice of calling qualified individuals from other Instrumentation and Regulation report areas will continue.

Individuals called from these lists will report directly to the location or the report area as directed by the supervisor.

If unable to obtain the required number of people, supervisory and/or contractor personnel will be utilized.

The past practice regarding call outs for specialized personnel will continue.

Affected personnel will indicate at the beginning of each workday their availability to work continuous overtime and their availability for off-hours call outs.

SECTION 6
Holiday Stipulations

1. The following days shall be recognized as holidays on the day on which they are observed:

New Year's Day	Labor Day
Martin Luther King, Jr. Day	Columbus Day
President's Day	Veterans' Day
Memorial Day	Thanksgiving Day
Independence Day	Christmas Day*

In addition to the above holidays, employees are entitled to two (2) Floating Holidays annually. An employee may elect to take Floating Holidays at any time, providing he/she submits a request thirty (30) days prior to the day/days he/she is requesting and said request is approved by the employee's Department Manager. Subject to operational needs, the Company will attempt to accommodate the employee's request. Employees shall not receive both sick pay and holiday pay on any normally scheduled workday.

If any employee is required to work on a floating holiday which had been scheduled and approved, said employee will have the option of being paid according to Article V, Section 6 or paid at straight time and reschedule the floating holiday.

If the holiday cannot be rescheduled within the year for which it applies, the employee must schedule it within sixty (60) days from the first day of the following year or it will be forfeited.

2. If an employee is not required to work on the holiday, said employee shall be paid a holiday allowance equivalent to eight (8) hours pay at his regular base rate of pay.

3. a) If an employee is required to work on a holiday, he shall receive time and one-half for the first eight (8) scheduled hours worked, plus holiday allowance as set out above. For all hours worked in excess of eight (8) hours he shall receive pay at the rate of two and one-half times his regular base rate of pay.

   b) In a week in which one of the holidays listed in 1. above is observed, if prior to the holiday it was understood that the employee would not be required to work on such holiday but he is notified on the holiday that work will be required that day, he will be paid a minimum of five (5) hours, at the applicable rate provided in paragraph (a) above, for his work on such holiday, plus the Holiday Allowance referred to in paragraph 2.

   c) If an employee is required to work on Christmas Day, he shall receive double time (2) for the first eight (8) scheduled hours worked, plus holiday allowance as set out above. For all hours worked in excess of eight (8) hours, he shall receive pay at the rate of two and one-half times his regular base rate of pay.

   d) In the event of a call into work on Christmas Day, the employee will be paid two (2) times their hourly rate for all hours worked.

   * If the Company observes Christmas on the day before or the day after December 25th, employees who work on the observed day will receive regular overtime rate of one and one-half (1 ½).

4. With the exception of employees on Union business, no employee covered under this Agreement shall be eligible for any holiday allowance as set forth above if such employee is not receiving pay for the payroll week in which the holiday occurs.

5. Any holiday as set forth in this contract which falls on a Saturday will be observed on the preceding Friday.

6. Nothing in this contract shall be construed to provide for the pyramiding of overtime or premium pay.

SECTION 7
Sunday Premium Stipulation

A premium of 35% will apply to all regularly scheduled hours of work on scheduled shifts, the major portion of which shifts fall between 12 Midnight Saturday and 12 Midnight Sunday. This premium applies to basic hourly wage rates only, it being understood that the payment of such premium is limited to straight time worked.

SECTION 8
Shift Differential

1. Shift differential or premium pay shall be in addition to the affected job classification base rates and shall be payable for regularly scheduled rotating shift jobs whenever and for such periods, other than "day" shift, as scheduled and shall be figured at the rate of two dollars and fifty-five cents ($2.55) per hours worked during "afternoon" shift and two dollars and fifty-five cents ($2.55 per hours worked during "night" shift). Shift Differential will be increased by $.10 cents each year of the contract.

   April 1, 2024: $2.55
   April 1, 2025: $2.65
   April 1, 2026: $2.75
   April 1, 2027: $2.85

2. Such pay shall not apply under the following policies: sickness, accident, vacation, holiday, leave of absence.

3. "Day", "afternoon", and "night" shifts shall be defined as follows:

   (a) "Day" shifts shall include all shifts scheduled to start between 7:00 a.m. and 9:00 a.m.

   (b) "Afternoon" shifts shall include all shifts scheduled to start between 12:00 p.m. and 5:00 p.m.

   (c) "Night" shifts shall include all shifts scheduled to start between 10:00 p.m. and 12:00 a.m.

   (d) Classifications required to work shifts will be defined in Appendix C and Appendix J.

4. If an employee is not entitled to a shift differential during his REGULARLY SCHEDULED hours, he will not receive a shift differential during overtime hours.

5. If an employee works into a shift preceding or succeeding his regularly scheduled shift, he will carry the premium or shift differential (if any) which corresponds with his regularly scheduled shift. This premium or shift differential (if payable) shall on overtime hours be multiplied by one and one-half. The past practice regarding shift differential on overtime worked on days of relief will continue.

Shift Assignments

Seniority within the department roster will be the determining factor in the assignment of shifts. The junior individuals will be required to work the shifts not volunteered for by the senior individuals. All voluntary shifts

will be on a permanent basis. An individual who volunteers to work a permanent shift will only be permitted to change said shift if another individual volunteers to take that shift on a permanent basis after posting within the affected department report area, or it shall be assigned to an individual who was not in the roster at the time it was accepted on a permanent basis.

SECTION 9
Payment For Working Second Day Of Relief

An employee who is required to work on the 2nd day of relief in any consecutive 7-day period and having worked one hour of his 1st day of relief and all of his scheduled hours during such period shall be paid double time his regular base rate of pay for hours worked on said 2nd day of relief. An employee who has earned premium in accordance with this provision will not be entitled to another such premium until he has again qualified for it, on the basis of work performed in another 7-day period.

SECTION 10
Meal Stipulations

If an employee is required to work ten (10) consecutive hours or more, he shall receive a meal reimbursement not to exceed ten dollars and seventy-five cents ($10.75). If the employee continues working beyond the tenth hour, he shall receive an additional meal reimbursement not to exceed ten dollars and seventy-five cents ($10.75 to be paid for each additional four (4) hours of continuous overtime work thereafter. Effective April 1, 2024 the amount will be increased by $.25 cents each year of the contract.
If an employee is recalled to work and is required to work four (4) or more hours, he shall receive a meal reimbursement not to exceed ten dollars and seventy-five cents ($10.75) except that effective April 1, 2024, the meal reimbursement will be increased by $.25 cents each year of the contract.

April 1, 2024: $10.75
April 1, 2025: $11.00
April 1, 2026: $11.25
April 1, 2027: $11.50

It is agreed that this section does not apply where employees work overtime through courtesy to fellow employees.

SECTION 11
Rest Period Stipulations

If an employee is required to work sixteen or more consecutive hours, he will be allowed a period of nine hours off before returning to work unless an emergency arises which makes it necessary for the Company to call him back to work before the expiration of the nine-hour period. Any part of the nine-hour period, which extends into the employee's normal work schedule will be paid for at basic straight time rates. If such paid time shall carry him to within two (2) hours of the end of his normal work schedule, he shall be excused without loss of pay from his normal work schedule. Time allowed off for meals will not prevent the hours worked from being considered consecutive.

If an employee continues to work for more than twenty-four (24) consecutive hours, he will receive the appropriate overtime rate for all consecutive hours worked after his original shift.

SECTION 12

Rate Of Pay When Assigned To Another Job Classification

Employees assigned temporarily to a higher rated job for periods of three (3) hours or less but more than one-half (1/2) hour shall receive the higher rate of pay for actual time worked on the higher rated job that day. Such time shall be calculated on a cumulative basis.

Employees assigned temporarily to a higher rated job for periods of more than three (3) hours shall receive the higher rate of pay for all straight time worked that day.
Employees temporarily assigned to a lower rated position shall retain their regular rate of pay.

Selection of employee to be transferred shall be in accordance with Article IV, Section 2, Promotions and Vacancies.

SECTION 13
Emergency Work Premium

When an employee is assigned to work outside his normal report area for a period of more than 24 continuous hours, including travel time, the method of payment will be as follows:

a) The employee so assigned will be paid for working time at the applicable overtime rate, and for rest time at their regular straight time rate.

b) The Rest Period Policy will not apply during this emergency work when employees are being paid under (a), but every effort will be made to give employees adequate rest time.

c) If a holiday occurs during this assignment, working time shall be paid for at the applicable holiday rate and rest time at the regular straight time rate.

d) When the assignment is completed, and the employees have returned to their own Report Area, the normal method of payment and rest time procedures will be in effect.

e) Employees covered by this Agreement, in like classifications, in the areas to which outside crews have been assigned in excess of 24 continuous hours, will be paid according to the same premium method as the assigned crews covered by this Agreement. The rest period application will be the same beginning at the time the first outside crew arrives in the area and continuing until outside crews have left the area when the normal method of payment and rest procedures will be in effect.

f) If employees in other classifications are assigned and become working participants in the area of the service interruption for a period in excess of 24 continuous hours including rest time, the above provisions will apply.

g) Employees once assigned under the above conditions will not be reassigned to circumvent this Agreement.

SECTION 14
Assignment Outside Regular Report Area

When an employee is required to work outside his normal report area, at the start of the day, the following will apply

a) Without forty-eight (48) hours' notice, the employee has the option of reporting directly to his re-assigned

location or his normal report area. Should an employee choose to report to his normal report area, he will be transported by the Company to and from the re-assigned location. In no case will an employee be required to travel on his own time or provide his own transportation on such an assignment. If an employee elects to report directly to his re-assigned location, he will be compensated in accordance with paragraph b) outlined below.

b) With forty-eight (48) hours' notice, the employee may be required to report directly to his re-assigned location. If such is the case, the employee will be required to travel on his own time and provide his own transportation. An employee will receive an allowance equal to one (1) hour of his straight time base rate for each way of the required travel.

c) The Company will solicit for volunteers based on Company seniority. In the event there are no volunteers, the qualified junior employee will be assigned.

d) Distribution Support Technician – Assigned Outside Regular Report Area shall only apply when employees move East to West or West to East.

Parties agree to form a Mutual Aid subcommittee (2024 negotiations).

SECTION 15
Retrogression Pay Plan

Where an employee of ten years or more of continuous service, because of disability, is or becomes unable to continue to perform assigned duties based on classification as of the date of disability, the rights of such employee and the obligations of the Company under such circumstances shall be determined in accordance with memorandum entitled "Disability Retrogression Pay Plan" which memorandum of said "Disability Retrogression Pay Plan" marked Appendix B is hereby incorporated by reference in this Agreement.

SECTION 16
Effect Of Law On Overtime Provisions

All overtime provisions are subject to modification by the Company in the event of changes in Federal or State laws whether by statute or decision.

ARTICLE VI

SECTION 1
Vacation Stipulations

The amount of vacation time you are eligible for depends on your years of service. Additional weeks are awarded as of January 1 of the year in which you reach the milestone.

Years of Service	Vacation Entitlement for Full Time Employees
Less than one year:	
• Start date January 1 to March 31	15 days
• Start date April 1 to June 30	10 days
• Start date July 1 to September 30	5 days
• Start date October 1 to December 31	No vacation days
1-5 years	15 days per year
6 years	16 days per year
7 years	17 days per year
8 years	18 days per year
9 years	19 days per year
10-19 years	20 days per year
20+ years	25 days per year

Employees Hired before 4/1/2017 will receive the following:

- 26 years: 26 Days
- 27 Years: 27 Days
- 28 Years: 28 Days
- 29 Years: 29 Days
- 30+ Years: 30 Days

If you are a part-time employee Who typically works more than 20 but less than 40 hours per week, you are entitled to a prorated amount of vacation time based on your years of service. Employees who typically work fewer than 20 hours per week are not eligible for vacation time.

Rate of compensation will be based on scheduled work week of each employee (calculated at the equivalent straight time rate) where employee is eligible for full two (2) weeks' vacation.

On partial vacations where employees have less than two (2) weeks' vacation, the rate of compensation will be based on scheduled workday (calculated at the equivalent straight time rate).

Effective January 1, 1981 the rate of compensation for one week's vacation pay will be based on the prior year W-2 earnings divided by the number of pay periods in the year, or 40 hours at the basic straight time rate in effect at the time of the vacation, whichever is higher. (On one-day vacations the weekly figure based on W-2 earnings will be multiplied by 1/5). Employees will be allowed to carry over one (1) week vacation. Employees must notify Company by April 1st if they intend to carry over a week and it must be taken by December 1st of the following

year. Employees will receive pay in lieu of if unable to take carry-over week in this time frame.

Employees required to work during their assigned vacation shall receive, in addition to their vacation pay, time and one-half their base rate of pay for all time worked. Vacation time worked and paid for under this clause will not be rescheduled.

Vacations will be granted according to schedules approved by the Company.

In choosing vacations within a department roster Company seniority shall govern.

In the event of a holiday falling within a vacation period, an employee shall have the option of receiving pay for the holiday in addition to his regular vacation pay or be given an additional day off with pay.

In the event that an employee becomes ill while on vacation, such time will not be considered vacation time but fall under Sick Pay Benefits if a doctor's certificate is presented.

Vacation payment of wages will be paid in advance unless otherwise notified by the employee. The past practice on the scheduling of vacations will continue.

In the Somerville Report Area Gas Services Department - vacations will be granted according to Section 9 of the Memorandum of Agreement dated March 8, 1984.

Termination And Retirement For Employees Hired Before 4/1/2017

a) Each Regular employee whose service is terminated prior to receiving the current year's vacation shall receive pay for one forty-hour week at his regular rate of pay plus one day's pay at his regular rate of pay for each month of service prior to January 1, but not to exceed a total of ten working days.

b) Each Regular employee whose service is terminated as above and who has had five or more years of continuous service shall receive pay for one normal work week in addition to that provided for in the preceding paragraph.

c) Each Regular employee whose service is terminated as above and who has had ten or more years of continuous service shall receive pay for one forty-hour week in addition to that provided for in a) and b).

d) Each Regular employee whose service is terminated as above and who has had twenty or more years of continuous service shall receive pay for one forty-hour week in addition to that provided for in a), b), and c).

e) Each Regular employee whose service is terminated as above and who has had thirty or more years of continuous service shall receive pay for one forty-hour week in addition to that provided for in a), b), c) and d).

f) In addition to the above, each Regular employee whose service is terminated as above and

who has had twenty-six (26) through twenty-nine (29) years of continuous service shall receive pay for additional days as follows:

26 years	1 day
27 years	2 days
28 years	3 days
29 years	4 days

g) Termination for the purpose of a), b), c), d), e) and f) shall include retirement, death and any other termination of service.

h) For retirement purposes, any vacation allowable under this policy in the calendar year of retirement may be taken as paid time off or cash on retirement at employee's option.

Effective January 1, 1981 the rate of compensation for one week's vacation pay will be based on the prior year W-2 earnings divided by the number of pay periods in the year, or 40 hours at the basic straight time rate in effect at the time of the vacation, whichever is higher. (On one-day vacations the weekly figure based on W-2 earnings will be multiplied by 1/5).

Termination And Retirement For Employees Hired After 4/1/2017

If you terminate employment and you are age 55 or older with 10 or more years of service, you will receive a payout for the entire amount of your unused vacation time.

For all other terminations, you will receive the payout unused vacation time that is prorated based on your termination date.

Termination Between	**Amount of Vacation To Be Paid**
January 1- March 31	One third of total vacation entitlement less any vacation time already taken
April 1- June 30	Two- Thirds of total vacation entitlement less any vacation time already taken
July 1 or after	Full entitlement less any vacation time already taken

SECTION 2
Employee Benefits

Nstar Savings Plan
Eligible employees may participate in the NSTAR Savings Plan, which is incorporated herein, and which will continue in effect according to the terms of the Plan, so long as this Agreement shall be in effect.

Nstar Pension Plan
Eligible employees will participate in the NSTAR Pension Plan, which is incorporated herein, and which will continue in effect according to the terms of the Plan, so long as this Agreement shall be in effect. Benefits for eligible employees will be determined under the terms and conditions outlined in the Plan document entitled "Pension Plan for Employees of Commonwealth Energy System and Subsidiary Companies" and eligible employees hired after March 31, 2006 will be entitled to new hire Pension Equity Plan provisions as described in the Plan.

Group Insurance
Eligible employees will be covered under NSTAR's Basic Group Life Plan, Accidental Death and Dismemberment Plan and Business Travel Accident Plan as are listed in the Group Welfare Benefits Plan for employees of NSTAR, which will continue in effect according to the terms of the Plan, so long as this Agreement shall be in effect. Eligible employees, and their eligible dependents, may participate in NSTAR's Supplemental Life Plan, Dependent Life Plan, and Personal and Family Accident Plan as are listed in the Group Welfare Benefits Plan for employees of NSTAR, which will continue in effect according to the terms of the Plan so long as this Agreement shall be in effect.

Health Plans
Eligible employees, and their eligible dependents, may participate in NSTAR's Medical, Prescription Drug, Vision and Dental Plans as are listed in the Group Welfare Benefits Plan for employees of NSTAR, which will continue in effect according to the terms of the Plan, so long as this Agreement shall be in effect.

Current Employee Contribution Percentages:

- PPO100 – 22% Employee Contribution
- PPO90 – 20% Employee Contribution
- Savers Plan – 10% Employee Contribution

Affordable Care Act Re-Opener Language
The parties agree to monitor the impact of the Excise Tax on High-Cost Health Plans under the ACA (the "Excise Tax") and work collaboratively to overturn or otherwise mitigate the adverse impacts of ACA and the Excise Tax on Eversource. The parties agree to a limited re-opener which can be invoked by the Company if it makes the reasonable assumption based on regulatory guidance that it will be exposed to the Tax. The re-opener negotiations will be for the sole purpose of:

- Working together to design and implement options to the existing health insurance coverage for employees represented by USW Local 12004 (includes health plans such as medical, prescription drug, dental, vision, HSA, FSA, and other plans that may be subject to the Excise Tax) by making changes to existing plans, adopting a full replacement health plan or such other changes as the parties may agree are necessary to avoid or mitigate the Excise Tax; and
- Revisiting and potentially adjusting the cost borne by the Company and the employees including but not limited to payroll contributions, benefit levels or other forms of compensation.

If, at any time if after the parties have concluded re-opener negotiations and before December 31, 2019 the Company is relieved of the burden of the Excise Tax, then (absent any other negotiated result) the parties shall revert to the status quo preceding the agreements reached in the reopener.

During re-opener negotiations, the provisions of Article II, Section 1, Union Agreement on Continuity of Work and Company Agreement on No Lockout, of the collective bargaining agreement shall not apply and shall not limit the parties' respective rights under law. All disputes between the parties unrelated to the re-opener subjects will remain subject to the dispute resolution process contained in Article III, Section 2, during any period of re-opener negotiations.

Section 125 Plans
Eligible employees may participate in NSTAR's Dependent Care Plan, Flexible Spending Account and Health Savings Accounts, as are listed in the Group Welfare Benefits Plan for employees of NSTAR, which will continue in effect according to the terms of the Plan, so long as this Agreement shall be in effect.

Other Benefit Plans
Eligible employees may receive Employee Assistance, Adoption Assistance and Education Benefits. The provisions of these benefits are summarized in the "Other Benefits" section of NSTAR's Spectrum of Benefits binder and are incorporated by reference herein.

Sick And Accident Plan (See Appendix D)
Sick and Accident Benefits will be in accordance with Appendix D.

The Company reserves the right to provide the same benefits under another plan(s) or provider(s) if it so desires regarding those benefits described in Section 2.

Retiree Medical

If an active employee dies and is eligible for retiree medical on his/her date of death:

Continue (current practice to provide coverage for surviving dependents on the active group plan, at active rates (spouse until Medicare eligible, child up to age 26, etc.). Upon the surviving spouse reaching medical eligibility, allow the surviving spouse to begin participating in the Eversource Group Health and Welfare Benefits Plan for Retirees - HRA subsidy. Any eligible dependent children will also be eligible to participate in the HRA subsidy, until age 26. Note, upon the surviving spouses' transition to the retiree, plan, any enrolled dependents will also transition the retiree plan at the same time, if applicable.

Wellness

All members are eligible to participate in the Eversource Wellness Program (managed by Personify Health) and earn up to $200.00 annually in rewards. Program is available for both employee and spouse ($400.00 total).

ARTICLE VII

Payroll Dues Deduction

The Company agrees to deduct weekly from earned wages, dues, and initiation fees, each as designated by the International Treasurer of the Union on the basis of and for the term of individually signed voluntary check-off authorization cards heretofore and hereafter submitted to the Company.

The Company shall promptly remit once a month any and all amounts that are deducted to the International Treasurer of the Union, 60 Blvd of the Allies, Pittsburgh, Pennsylvania 15222.

The Union shall indemnify and save the Company harmless against any and all claims, demands, suits or other forms of liability that may arise out of or by reason of action taken by the Company with regard to this Article.

ARTICLE VIII

Non-Discrimination

Neither the Company nor the Union will discriminate or harass any employee because of such employee's race, color, religion, national origin, sex, age, disability, gender identity, sexual orientation, genetic information, ancestry, veteran status, or military service, or any other basis protected from discrimination under state or federal law.

ARTICLE IX

Duration Of Agreement

This agreement shall continue in full force and effect until midnight March 31, 2028.

During the term of this Agreement should any provision or part thereof become illegal, the rest of the Agreement will continue in full force and effect.

This Agreement shall bind and inure to the benefit of the parties hereto and to their respective successors and assigns: and the words "COMPANY" and "UNION" respectively shall be construed to include their respective successors and assigns.

APPENDIX A

NSTAR ELECTRIC & GAS CORPORATION
LOCAL UNION NO. 12004

Schedule Of Wages And Progression

The basic wage rates of all employees covered by this Agreement shall be in effect as of April 1, 2024 as indicated by the base hourly rates listed below:

Effective April 1, 2024, the basic wage rates of all employees covered by this Agreement shall be increased three (3.00%) percent adjusted to the nearest whole cent.

Effective April 1, 2025, the basic wage rates of all employees covered by this Agreement shall be increased three (3.00%) percent adjusted to the nearest whole cent.

Effective April 1, 2026, the basic wage rates of all employees covered by this Agreement shall be increased three (3.00%) percent adjusted to the nearest whole cent.

Effective April 1, 2027, the basic wage rates of all employees covered by this Agreement shall be increased three (3.00%) percent adjusted to the nearest whole cent.

New Technology Agreement: an additional one time increase of .25% was added to the general wage increase effective April 1, 2020.

The policies in regard to promotions, wages and step increases as applied to all employees and job classifications covered by this Contract by and between NSTAR Electric & Gas Corporation and the United Steelworkers, AFL-CIO-CLC on behalf of Local Union No. 12004, United Steelworkers, AFL-CIO-CLC are shown on subsequent pages.

General Considerations
Promotions or step increases will occur on a time progression basis subject to the following requirements, duties and accomplishments:

a) Supervisors will make every effort to train employees and the employees are to cooperate in the training program, so that they may be qualified for promotion or step increases on the dates as later scheduled.

b) Any employee with two (2) years of service as a regular employee who qualifies in a job where the progression is from "Trainee" to an "A" rate will be paid the "C" rate but will be classified as a Trainee and follow the progression as outlined on the subsequent pages.

c) Prior to time of scheduled progression of employee, his record will be reviewed to determine if his progress and qualifications are satisfactory to warrant the progression in and to the job classifications as generally but not exclusively set forth in the attached job descriptions. If it is determined that the employee's progress and qualifications are not satisfactory to warrant progression, he shall remain in his present step and be eligible for review after three (3) months have elapsed.
d) If an employee in any department fails to pass a promotional exam in any progression step, he will remain in his present step and will be eligible to retake the exam after three (3) months have elapsed.

e) Employees who previously attained the "A" rate in a classification where the progression is from "Trainee" to "A", and who have not been in subject classification for five (5) years or longer, will, upon re-entering subject classification, be paid the "B" rate and following forty-five (45) "worked" days become eligible for the "A" rate.

f) All promotional exams in any progression step will be given within ten (10) "worked" days of the employees' eligibility date. Failure in giving the progression exam within the ten (10) "worked" days period will result in that employee progressing to the next step in rate. Exceptions to the above time limits must be mutually agreed.

g) At the end of the 1st six months of employment, which will be a test and probationary period, and if the Company upon review has designated the employee to become a regular employee, he will be classified in the suitable classification and rate as negotiated with the Union.

Effective April 01, 2024
Wage And Step Increase Policy Is As Follows:

Basic Hourly Rates

Corrosion Techs to receive 1% pay increase above the General Contract Increase (2024 Contract).

All red circled employees will remain red circled in their present classifications. An employee who is red circled will have the right to return to his original report area without any loss of pay on a one-time basis.

APPENDIX B

Memorandum Regarding Disability Retrogression Pay Plan

I. NON-COMPENSABLE DISABILITY

In the event an employee becomes unable to perform his normal duties because of a disability for which he is not receiving Workers' Compensation benefits, and if the Company is able to provide him with work which he is capable of performing, he will be assigned to such work. His ADJUSTED pay rate shall be determined by the PLAN shown below.

a. FUTURE RETROGRESSIONS

1. Less than ten full years of continuous service at time of retrogression.

a) An employee with less than ten full years of continuous service with the Company at the time of retrogression shall receive the ultimate base rate of his new job classification.
b) The new rate shall become effective at the time of such retrogression.

2. Ten full years or more of continuous service at time of retrogression.

An employee with ten full years or more of continuous service with the Company at the time of retrogression shall receive no reduction in his basic rate of pay.

II. COMPENSABLE DISABILITY

In the event an employee becomes unable to perform his normal duties because of a disability for which he is receiving Workmen's Compensation benefits, and if the Company is able to provide him with work which he is capable of performing, he will be assigned to such work. His pay rate shall be determined as set forth above, except that the following shall apply:

(a) If, at the time of retrogression, the employee is receiving compensation for partial disability, the Company will pay such amounts so that the employee's total compensation from the Company and from such Disability Benefits will equal the new (as determined by I (A) above) pay rate.

(b) The date the employee commences work at his lower classification shall be considered as the date of retrogression.

III. GENERAL PROVISIONS APPLICABLE TO I AND II ABOVE

a) In all computations, only FULL YEARS of service shall be used.

b) An employee with ten or more full years of continuous service shall hold the title of his new job classification with the word "SPECIAL" appended thereto.

c) The Medical Representative of the Company in all cases shall consult with such employee's family physician and in the event of disagreement as to the employee's condition and/or ability to perform the work of any particular class, the case shall be referred to a recognized specialist or clinic in the field

of medicine involved, whose opinion will be final and binding upon all parties.

d) No change in GROUP INSURANCE shall result from such retrogression.

e) An employee transferred to a lower classification under this PLAN shall be assigned without posting the job.

f) Reference to continuous service in the Company shall include service with other subsidiary companies of the same System.

g) If an employee who is being compensated under the provisions of this PLAN is again transferred to one or more lower classifications, his new rate shall be as if the employee had been transferred to such lower classification initially, using all factors applicable at the time of the first retrogression. The resultant rate shall reflect all wage adjustments, which were made in such lower classification since the date of initial retrogression.

h) The Company, may in its discretion, withhold the provisions of this PLAN for employees who also engage in work for other than the Company or its affiliates.

APPENDIX C

Classification Qualifications And Specific Conditions

Job Duties

See Job Postings for job duties as presented and agreed upon.

Schedule Of Hours And Schedule

See Appendix J.

Facilities Department

Qualifications To Enter The Roster For Maintenance Person

1. Be physically fit.
2. Possess a valid Massachusetts Driver's License.
3. Pass the Bennett Test with a raw score of 24.

Qualifications To Enter The Roster For Buildings Maintenance Mechanic

1. Must be able to perform moderate physical work in all types of weather and emergency conditions.
2. Possess a valid Massachusetts Driver's License.
3. Pass the Bennett Test with a raw score of 24.
4. Must have a minimum of five (5) years industrial experience in facilities related positions. This shall include troubleshooting HVAC systems and other mechanical systems pertaining to operating and maintaining large industrial buildings. Performs other non-mechanical work within the department as required.

5. Must possess and maintain a certificate in Basic Refrigeration.
6. Must obtain within eighteen (18) months of being awarded the position of Buildings Maintenance Mechanic, a certification/diploma for Refrigeration System Repair (HVAC Refrigeration) and be EPA certified in the recovery and charging of refrigeration gases.

Qualifications To Enter The Roster For Buildings Maintenance Electrician

1. Must be able to perform moderate physical work in all types of weather and emergency conditions.
2. Possess a valid Massachusetts Driver's License.
3. Pass a Bennett Test with a raw score of 24.
4. Must have a minimum of five (5) years industrial experience in facilities related positions. This shall include troubleshooting, repairs and installation work of moderate scope of lighting, electrical, communications, data and electromechanical systems and control circuits associated with building power systems, HVAC systems and other control systems. Performs other non-electrical work within the department as required.
5. Must possess and maintain a Massachusetts Journeyman Electrician's License.

Clerical

Qualifications To Enter The Roster For Clerk

1. Be Physically fit.
1. Pass job related tests.
2. The Plan call for Clerks to do any job in their respective departments and any Clerk in any department may be temporarily assigned to help out in another department during vacations, meal periods, rest periods, illness and other reasonable absences within their report area.

Classification And Location By Report Area

Title	**Location**				
Clerk:	Somerville	Hyde Park	Southboro	Worcester	Westwood
Dispatch:					
Distribution:	Somerville	Hyde Park	Southboro	Worcester	Westwood
Gas Service:	Somerville	Hyde Park	Southboro	Worcester	
Fleet:			Southboro		
Meter Repair:			Southboro		
Facilities:			Southboro		

Maintenance Department

Qualifications To Enter The Roster of Distribution Mechanic

1. Be physically fit.
2. Hold a valid Class-A Massachusetts Commercial Driver's License or be willing to train and qualify for it after assignment to the classification.
3. Pass the Bennett Test with a raw score of 24.
4. Pass pre-qualification test administered by the training department.
5. Hold a valid hoisting license or be willing to train and qualify for it after assignment to the classifications.
6. If the applicant has prior experience in Construction or Maintenance the company may start the employee at the Mechanic C rate.

   Examples of prior experience:
   1) Minimum of 1-year experience in gas facility installation or maintenance
   2) Minimum of 1-year experience in utility installation or maintenance
   3) Valid CDL license
   4) Be operator qualified and or pipe joining qualified
   5) General construction background including excavation

Exams

Exams will be required between all progression steps in the Distribution Mechanic classification. These exams will be job-related and be given orally, written and/or by field demonstration to determine the individual's ability to perform the work. Said exams will contain only subject matter on which the individual has been trained. A score of at least 70% is required to progress to the next step. If the employee does not obtain a test score of 70%, the employee will not advance to the next step. The employee will not be eligible to retake another qualifying exam for a period of three months. It is understood that the content of the exam will be mutually agreed upon by the Company and the Union. During the administration of these exams a designated Union representative will be present.

Gate Box Work

Contractors performing municipal, city, state, federal (Chapter 90) or town project work may repair, replace and adjust any gate-boxes associated with said project. Company inspectors will not be utilized for oversight of the above listed gate-box work. This work is excluded from Appendix F. Any gate box work requiring a Company audit will be performed by the bargaining unit.

Distribution Support Technicians (DST's)

1. DST's may work for either the Maintenance Department or the Service Department at the discretion of the Company based on workload volume.

    a) Hours: Distribution Department, Monday- Friday 7:30 am - 3:30 pm.
    b) Hours: Gas Service Department, Monday-Friday 8:00PM - 4:00PM pm.

2. Total FTE's will not exceed twelve (12). The company will determine report locations.
3. This classification will be excluded from Appendix F.
4. Article V- Hours and Wages, Section 14-Assignment Outside Regular Report Area shall only apply when employees move East to West or West to East.
5. The Distribution Support Technician is responsible for successfully completing all training, OJT tasks and examinations as required.
6. Distribution Support Mechanic will complete activity reports associated with tasks they perform.
7. While performing and ATM inspection, Distribution Support Mechanic can make safe in accordance with first responder training, such as, evacuating and standing by for Service Technician.
8. At second cycle in the Gas Service Department or one (1) year of service, The Distribution Support Technician can isolate at the curb valve to 'make safe' and, after calling for a Service Technician, determine if he can leave the job before the Service Technician arrives.
9. The DST classification will perform repairs on gate boxes. Types of repairs include roadway projects, paving projects, municipal and state projects and any and all work associated with G.L. C. 164116B. Gate box repairs requested by other departments will be performed by DSM's as long as it is scheduled work. Any emergency type work will be performed by the Gas Distribution Department.
10. DST's will perform meter protection installations when assigned.
11. The parties agree to remove previously existing DST language from the 2020 -2024 contract book on Pages 82, 84, 86, and 35.

Qualifications To Enter The Roster Welder/Distribution Mechanic

1. Be physically fit.
2. Hold a valid Class A Massachusetts Commercial Driver's License or be willing to train and qualify for it after assignment to the classification.
3. Pass the Bennett Test with a raw score of 24.
4. Pass pre-qualification test administered by the training department.
5. If the applicant has prior Construction or Maintenance experience the company may start the employee at the Mechanic C rate.
6. Hold qualifications according to the latest edition of API 1104, Section 3, Standard for Welding Pipelines and Related Facilities or be willing to train and qualify for it after assignment to the classification.

Welder

An applicant who has not held the Distribution Mechanic's classification will progress through the skill progression steps as outlined. In order to progress to the A rate of Welder, an individual must have at least 12 months in progression as a Distribution or Construction Mechanic plus 18 months in the Distribution Mechanic's or Welder/Distribution Mechanic's classification, but in no case, will the total be less than 30 months, or be certified for multiple qualifications according to the latest edition of API 1104, Section 3, Standard for Welding Pipelines and Related Facilities. Once certified, a Welder must maintain the certification either by having one weld satisfactorily X-Ray inspected once every 6 months or by recertifying according to Section 3 of API 1104 once every 12 months. It is understood that these standards are subject to change

mandated by Regulatory requirements.

- Effective April 1, 2024, one (1) Welder to be added to the Auburn AWC.
- Effective April 1, 2024, increase Welder classification pay by 3% before the General Contract Increase.

MEMORANDUM OF AGREEMENT WELDER TRAINING

In accordance with the provisions of the principal agreement between the parties dated April 1, 2013, and without waiving or modifying the rights of either party contained therein, except as specifically provided herein, the Company and the Local agree as follows:

The parties have agreed to provide on the clock training for successful bidders of the welder classification. The training will be uninterrupted with the exception of "B" and "C" school training for four weeks each. The Welder Training Coordinator will provide and oversee the training and an external qualified welding instructor will supplement the training and evaluate the trainees' progress towards securing the welding certification. Training will be provided in the welding shop. After 16 weeks (4 months) of training, the trainee will be evaluated by the qualified instructor and the Training Coordinator to determine readiness to pass the API 1104 Pipe Welding Certification. Determination will be made by mutual agreement between the two. If the trainee takes the test and fails or if it is determined that the trainee is not prepared to pass the welding test, he/she will be afforded 12 additional weeks (3 months) of in shop training. At the conclusion of the 12 additional weeks of training, the trainee will be given the API 1104 Pipe Welding Certification test.

If the trainee obtains the API 1104 Certification, he/she must then pass all OJT (On the Job Training Addendum Attached) modules within 20 weeks (6 months) of obtaining the certification. Employees will be eligible to attend applicable continuing education courses to enhance his/her studies and reimbursement will be handled according to the current contract language.

If a trainee fails the test or the OJT, he/she will return to their previous position in Gas Operations. If that position was is another department other than Gas Operations, he/she will be placed in a position in Gas Operations.

_____ _____

NSTAR USW, Local 12004

_____

DATE

Welder OJT's

1. Demonstrate how to set up a welding machine
2. Demonstrate how to set up and safely use oxyfuel metal cutting torch
3. Learn the type and classification of welding rods and how they apply to pipe welding
4. Basic Arc welding procedures including cleaning/grinding operations
5. Weld stringers on flat plate develop weave and overlap
6. Horizontal fillet weld (2F position)
7. Vertical fillet weld (3F position)
8. Overhead fillet weld (4F position)
9. Learn to align and clamp the pipe in place and gap before tacking
10. Weld stringer beads on the outside of a pipe vertical up and down 6" or larger
11. Learn to weld pipe in a flat (1G-rotated position)
12. Learn to weld pipe in a horizontal (2G position)
13. Learn to weld pipe in a multiple (5G position)
14. Learn to weld pipe in a multiple inclined (6G position)
15. Learn to cut and fit 12" tee for weld test
16. Demonstrate how to cut and bevel with a torch
17. Demonstrate how to use a grinder including to bevel pipe with it
18. Learn to cut pipe with a bench chop saw
19. Learn to cut and bevel pipe utilizing the beveling tool
20. Learn and understand welding terms
21. Lear to show proficiency in utilizing tools for the welding trade TBD

Backhoe Operator

An applicant who is in the Distribution Mechanic's classification will be inserted into the Backhoe Operator progression step equal to his Distribution Mechanic's progression as a Backhoe Operator "B", but in no case will the rate be less than he is presently receiving. Hold a valid Class A Massachusetts Commercial Driver's License or be willing to train and qualify for it after assignment to the classification. In order to progress to the "A" rate of Backhoe Operator, an individual must have at least thirty-six (36) months in the progression as a Backhoe Operator or in the Distribution Mechanic's classification, and have a minimum of One Hundred and Sixty (160) hours of training as a Backhoe Operator, and hold a valid Massachusetts Department of Public Safety Hoisting machinery License for Gas and Diesel Front-End Loader with Backhoe attachment, a valid Class A Massachusetts Commercial Driver's License and qualify as a Distribution Mechanic "A".

Backhoe Operator – Spare

The holders of the Spare classification will work and be paid in their regular Distribution Mechanic classification except when assigned as a Backhoe Operator, at which time they will receive the rate of the Backhoe Operator classification for which they qualify. Vacancy in the Backhoe Operator classification will be awarded from the Backhoe Operator Spare list before other regular employees within the department. Outside roster applicants will enter the Distribution Mechanic's classification and progress accordingly; however, they will be paid as above when operating the Backhoe.
All Maintenance Distribution employees will have the option of backhoe training to obtain a Public Safety Hoisting Machinery License for Gas and Diesel Front-End Loader with Backhoe attachment. Employees will receive training based on order of seniority and the training department's schedule.

Working Leader-Distribution

Qualified applicants must meet Distribution Mechanic A requirements and pass all applicable Operator Qualification testing. Must meet the Company's driver's test requirements and possess and maintain a Class A Massachusetts driver's license or be willing to train and qualify for it after assignment to the classification.

Field Trainer-Distribution

Qualified applicants must meet specific knowledge-based requirements, candidates selected as best qualified approved through joint union/management agreement. Applicants must meet Distribution Mechanic A requirements and pass all applicable Operator Qualification testing. Must meet the Company's driver's test requirements and possess and maintain a Class A Massachusetts driver's license or be willing to train and qualify for it after assignment to the classification.

Premium – Tapping And Stopping

Effective April 1, 2017, two dollars, twenty-five cents ($2.25) per hour for day for crew when performing job on tapping, drilling, and/or stopping 6" thru 12". When tapping, drilling and/or stopping ½" thru 4" the "PREMIUM – TAPPING AND STOPPING" will not apply.

Specific Conditions

Employees will not return to their report areas for their meal period but will remain in the general vicinity of the job site and be allowed a paid lunch period not to exceed twenty (20) minutes.

Specific Conditions – Somerville Report Area

1. There will be no change in the present policy regarding the scheduling of crews on Thanksgiving, Christmas and New Year's Day.
2. There will be a minimum of three men recalled to work on calls that require digging the pavement. There will be a minimum of two men called in when doing patchwork.

Inclement Weather

If the Union Steward does not concur in the decision of the Supervisor or Department Head regarding whether or not they should work under particular weather conditions, a member of the Union's Executive board or in their absence, the Department Steward may ask the Director of Maintenance or his duly authorized representative for a final decision

Qualifications To Enter The Roster Tool Mechanic

1. Be physically fit.
2. By mutual agreement of the parties, the Tool Mechanic can train for and obtain a CDL license.
3. Pass the Bennett Test with a raw score of 24.
4. Pass pre-qualification test administered by the training department.

Specific Conditions

Current employees in the Distribution Department (from any area) will have the first right to bid on and be awarded the Tool Tech position before applicants form the rest of the Local.

The position will also perform the maintenance and repair of any/all tools and equipment related to the Gas Distribution Departments. The Tool Mechanic will also be responsible for dual locations, East and West. East Tool Mechanic will be responsible for the Somerville and Hyde Park areas and the West Tool Mechanic will be responsible for the Southboro and Worcester areas. Tool Mechanics can be reassigned to all locations to cover absences, vacations or to assist other Tool Mechanics with training or workload. Portal to Portal will apply, the reporting areas for the East is Somerville and for the West is Southboro.

The following tasks are to be performed and tracked on a monthly basis. Management will be responsible for reviewing all monthly inspections and adherence to Tool Mechanic's duties and responsibilities.

1. Maintain all records for monthly Self-Contained Breathing Apparatus (SCBA) equipment inspections.
2. Perform inspections of all Maintenance Department Fire extinguishers. Document and coordinate replacement of spent or low charge extinguishers. Document and maintain applicable records.
3. Perform inspections of all Hydraulic and Manual Squeeze off tools. Coordinate repairs with vendors as needed. Document and maintain applicable records.

4. Perform inspections and calibration tests of all Torque Wrenches, replace or repair as needed. Document and maintain applicable records.
5. Perform inspections on shoring equipment. Clean and check hydraulic components. Coordinate repairs with vendor as needed. Document and maintain applicable records.
6. Assist Maintenance personnel with CGI meter calibrations. Document and maintain applicable records. Assist with the coordination of repairs.
7. Any additional calibrations or regulatory inspections that arise out of updates to WP OP-107 Inspection and Maintenance of Equipment, that impact Gas Distribution.

In addition to the monthly task listed above, daily tasks will include but are not limited to:

- Issue, receive, and track critical items to include, but not limited to, plastic tapping systems, main cameras, pneumatic window cutters, diaphragm water pumps, 3-inch TDW Equipment, and any other critical items that are shared between crews within the Distribution Department.
- Repair or coordinate repairs of all pneumatic equipment with vendor. Document and maintain applicable records.
- Perform inspections of all pavement/concrete cutting saws. Clean and inspect all components to ensure safe operation of each saw. Repair or coordinate repairs with vendor. Document and maintain applicable records.
- Fill, or coordinate with vendor to fill, all oxygen tanks associated with Supplied Air/
- SCBA systems as needed.
- Deliver stock to job sites as directed.
- May assist in organization and management of stock in each of the AWCs

All previously agreed duties and responsibilities will remain in effect.

Company agrees to add one (1) Tool Mechanic with a reporting location of Auburn (2024 Negotiations).

<u>Qualifications To Enter The Roster Field Trainer</u>

1. Be physically fit.
2. Hold a valid Class-A Massachusetts Commercial Driver's License or be willing to train and qualify for it after assignment to the classification.
3. Pass pre-qualification test administered by the training department.
4. Applicants will meet specific knowledge-based requirements, candidates will be selected through joint union/management agreement
5. Technical knowledge, field experience required, communication skills, skills to conduct field and classroom training/instruction

<u>Specific Conditions</u>

<u>Duties:</u>

- Conduct field assessments of internal crews to determine proficiency, knowledge of all applicable job requirements/standards/procedures and compliance
- Perform on the job, yard-based training as necessary

- Responsible for ensuring all construction and maintenance work done under their direction is performed in accordance with Company procedures and policies, State and Federal regulations
- Support new employee assessments
- Direct and guide multiple crews of trainees during their initial field OJT period
- Instruct, train and direct all personnel working on assigned crew(s)
- Complete all required timesheets, activity reports and sketches and any other records
- Train and evaluate new employees as they progress through lower classifications
- Identify supplemental training requirements/needs for internal crews
- Communicates and coordinates with area Planning and Scheduling personnel
- Assist in development and deployment of new/revised standards, procedures, work methods, regulations
- Assist in assessing, deploying new tools, equipment
- Support QA/QC in dissemination of audit results, communicating key messages and lessons learned
- Provide extension of classroom technical training to support, reinforce training programs
- Aid in delivery of compliance related training
- Operate Aries/ ULC main cameras to assist maintenance crews in locating blockages or water intrusion into gas mains.
- Operation of drip truck to pump drips and capture excessive amounts of water found in mains and services causing poor pressure problems.
- Operate large travel saws to allow for the removal of large diameter pipe.
- Assist with the operation of the horizontal directional drilling equipment in the in-house installation of mains and services.
- Operate super purge equipment – high volume diesel inert purge
- Operate draw down compressor used to evacuate the gas from a main that is coming out of service and placing the gas back into the live side.
- Perform routine checks and maintenance to above equipment to ensure all items are ready to work.
- Field Trainer may be required at times to assist Eversource crews or other Field Trainers with the above tasks outside of the Field Trainers local.
- Perform all duties of lower classification

Qualifications To Enter The Roster For Planners

1. Be physically fit.
2. Possess a valid Massachusetts Driver's License.
3. Possess an associate degree in computer-Aided Design Technology (CAD) or the equivalent certificate from a technical school of collegiate grade; or the equivalent combination of education and experience which includes two (2) years of AutoCad/GIS experience.
4. Two Year (2) Progression WITH Qualifications: (Planner should not be going to AWC until C Rate going to a B Rate)
    - 6 Month as Probationary
    - 6 Months as a C Rate trainee
    - 6 Months as a C Rate
    - 6 Months as a B Rate
    - Progress to A Rate

Planners will manage all aspects Docuware:

- The planners will not manage the venders work in Docuware, this will remain their task.
- The planners will now have the rights to edit documentation, add sketches/pages to existing DAR's in Docuware, modify annotations, and to index missing DAR's.

Qualifications To Enter The Roster For Gas Operations Clerk

1. Must be physically fit to perform all job duties.
2. Must pass job related tests.
3. Must draw to the satisfaction of the supervisor.
4. Must possess and maintain a valid state driver's license

Gas Services Dispatch Department

Job Description - Duties

- Plans, schedules, and coordinates work assignments for field personnel to efficiently meet workload requirements.
- Operates computer aided dispatch system and scheduling system to dispatch work, gas leaks and customer appointments.
- Continually monitor the effectiveness of Field personnel work completion and makes appropriates changes to ensure customer appointments are satisfied.
- Receives, logs and dispatches emergency and regular service orders to appropriate field personnel for action on 24/7 basis.
- Creates and schedules customer and internal requests for emergency and routine service-related orders using the Customer Information system CIS and C2.
- Reviews and documents completed emergency orders for accuracy and completeness.
- Operates and monitors multiple systems including, but not limited to: a base radio, CAD, CIS, C2, ARCOS, Pager system and other Windows applications.
- Provides emergency restoration assistance to Field Operations personnel, as necessary, during gas interruptions.

- Make decisions for the assignment of appropriate field personnel, monitor work progress. Make appropriate adjustments to field personnel assignments as needed.
- Assist in providing instruction and guidance of new and less experienced Dispatchers in the performance of job duties.
- Maintain communication with other departments such as Meters and Service, Maintenance, Construction, Pressure Management, Instrumentation (I&R), System On-Call, Corporate Communications, Field Collections, Customer Information Center, and all other on-call personnel.

Qualifications To Enter The Roster

1. Be physically fit
2. Be able to do related clerical work and other duties applicable to this classification

Exams

Exams will be required between progression steps in the Dispatcher's Classification to B and A. These exams will be job-related and be given orally and by field demonstration.

Said exams will contain only subject matter on which the individual has been trained.

A score of at least 80% is required to progress to the next step. If the employee does not obtain a test score of 80% the employee will not advance to the next step.

An employee who enters the department as a Probationary employee will be given the rated Dispatcher's exam after 6 months in the department. Employees who entered the department at the "C" rate will be given the rated Dispatcher's exam after 3 months in the department.

If, for any reason, the applicant is unable to continue the training program satisfactorily or cannot pass the examination at the end of the training period, he/she shall have the option to be reinstated in his/her former classification under existing policies. The content of the exam will be mutually agreed upon by the Company and the Union. During the administration of these exams a designated Union representative may be present.

Purpose

Implement a formal process for training and qualification of Gas Services Dispatchers. The program will provide Trainees an opportunity to learn the skills and gain the knowledge necessary to become Rated dispatchers. The Program is comprised of On-the-job training and testing.

Roles and Responsibility

- Supervision
  Management representatives will evaluate the candidate by direct observations of completed tasks and the individuals understanding the use of the business systems. Throughout the progression period the Trainee will be provided feedback and additional training as necessary to satisfactorily perform the tasks assigned.

- Trainee
  The trainee will work under the direction of supervision and work with rated dispatchers learning and practicing the work assignments of their given classifications. Trainees will perform and satisfactorily complete the tasks associated with each progression step.

PROGRESSION SCHEDULE

For an Internal/External Hire WITH experience:
The progression period is four (4) to six (6) months. This period shall be divided into the following:

- Dispatcher C for a period of 2 months, not to exceed 3 months, employee will be eligible to take the Dispatcher B exam, if successful
- Dispatcher B for a period of 2 months, not to exceed 3 months, employee will be eligible to take Dispatcher A exam, if successful
- Dispatcher will become a Dispatcher A and will select an open shift at that time

For an Internal/External Hire WITHOUT experience:
The progression period is six (6) months. This period shall be divided into the following:

- Dispatcher C for a period of 3 months, not to exceed 3 months, employee will be eligible to take the Dispatcher B exam, if successful
- Dispatcher B for a period of 3 months, not to exceed 3 months, employee will be eligible to take Dispatcher A exam, if successful
- Dispatcher will become a Dispatcher A and will select an open shift at that time

*Eligible candidates with 'experience' will be defined as follows:

→ 2+ years emergency dispatching experience – EMS/Police/Fire/Gas or Electric Utility
→ 2+ years of meter service experience as a rated technician working for Eversource
→ 2+ years of call center experience working for Eversource

Probationary period runs concurrent with C-B-A progression.

Exams will be taken by personnel to demonstrate their knowledge before being promoted to "B" and "A" Dispatcher rates.

- Existing Southboro dispatchers will be solicited for training on the CT dispatch system by 5/1/17.
- The CT dispatchers transferring to Southboro will be polled to select shifts by seniority from the 12004 CBA.
- The existing vacation schedule for MA dispatchers is two (2) during the months of June, July and August and one (1) for the remainder of the year. CT dispatchers will follow this schedule.
- When both the CT and MA dispatchers are cross trained the vacation, schedules will be four (4) during the months of June, July and August and two (2) for the remainder of the year.
- A one-time lump sum payment of $1250.00 will be made to all existing Southboro dispatchers (2017 contract).

The practice of providing a rest area in Westwood will be discontinued.

*See Brockton Dispatch Agreement MOA dated 1/29/25 for Dispatcher Training Program Structure.

Meter Services Department

Qualifications To Enter The Roster

1. Be physically fit
2. Possess a valid Driver's License
3. Pass the Bennett Test with a raw score of 24
4. Pass pre-qualification tests administered by Training Department
5. Exams and evaluations will be required between all progression steps in the Meter Services Department (C, B, A). These exams will be job-related and be given orally, written and by field demonstration to determine the individual's ability to perform the work. Said exams will contain only subject matter on which the individual has been trained.

   A score of at least 70% is required to progress to the next step. If the employee does not obtain a test score of 70% the employee will not advance to the next step.

   The employee will not be eligible to retake another qualifying exam and will be reevaluated for a period of three months. It is understood that the content of the exam will be mutually agreed upon by the Company and the Union. During the administration of these exams a designated Union representative may be present.

Pipefitter's License
Service Technicians will be offered the chance to obtain their Pipefitter's License. The company will write off their apprentice hours.

Working Leader/Service
The need for additional working leaders in a reporting area will be determined at the discretion of the company.

Fitter Classification

1. A Fitter classification will be created within the Meter Service Department and will be responsible for all fitting associated with the Construction work, including:
   - GSEP work
   - Reliability work
   - Growth work
   - Municipal work
   - Service Replacements

2. Staffing:
   a. 2024 – 8 positions (two (2) each area) *incremental
   b. 2025 – 8 positions may be added (two (2) each area) *non-incremental
   c. The Company and the Union agree to meet and discuss future staffing needs above or below four (4) per area.
   d. The Company and the Union will meet, discuss, and develop the Fitter classification job description.
   e. The Fitter classification will remain in the Meter Service Department.
   f. There will be no Fitting license requirement for the position unless required by the State.
   g. Fitters will not be eligible for Meter Service shifts Monday through Friday.
   h. Shifts:

- 8:00A-4:00P Monday through Friday
- 8:00A-4:00P Tuesday through Saturday

3. Off hours fitting will be offered by the department OT list including the new Fitting classification.
4. Service Tech/Fitters within the Department roster will supplement fitting work when assigned.
5. Fitters will be responsible for light ups associated with their work.
6. Fitters will make safe any situations associated with jobs they are on.
7. Fitters will investigate any leaks found on associated jobs they are performing.
8. Bidding for the Fitter classification is as follows:
    1. Internal to the local area Service Department
    2. Entire Local
    3. External

*Incremental – if a current Meter Service employee bids and accepts an open Fitters position, the company agrees to backfill his/her position as part of the eight (8) initial postings. If an employee outside Meter Service Department bids and accepts a Fitters position, the company is not obligated to backfill his/her position.

*Non-incremental – not an addition to the roster.

Memorandum of Agreement
Eversource Energy/USW Local 12004
Fitter Position Work Rules
December 23, 2024

In accordance with the provisions of the principal agreement dated April 1, 2024, and without waiving or modifying the rights of either party thereto, except as specifically provided herein, the Company and USW Local 12004 agree as follows:

Fitter Position:

1. During Fitter's regular scheduled hours (8-4 Mon-Fri or 8-4 Tues – Sat): Fitters only perform construction work listed in the fitter agreement.
2. Outside of Fitter's regular scheduled hours (8-4 Mon-Fri or 8-4 Tues – Sat): Fitters are eligible for everything.
   Examples:
   a. Fitters are eligible for AH service hold.
   b. Fitters are eligible for 4-9 fill.
   c. Fitters can take callouts. (For everything)
   d. Fitters are eligible for holiday service coverage. (according to local area Holiday Rules)
   e. Fitters are eligible for AH fitting holds, including all fitting work. (leak repairs, regulator replacement, etc)
   f. Monday- Friday Fitters are eligible for service shifts on Saturday and Sunday. Not eligible for service shifts Monday-Friday.
   g. Tuesday- Saturday Fitters are eligible for service shifts on Sunday and Monday. Not eligible for service shifts Tuesday-Saturday.
   h. Fitters can take a fitting OT any day of the week.
3. Fitters cannot respond to emergency calls during their regular scheduled 8-4 fitting shift. (Fitters will make safe any situations associated with jobs they are on. Fitters will investigate any leaks found on associated jobs they are performing.)
4. Fitters will not perform service work during their regular scheduled 8-4 fitting shift. (Except light ups associated with jobs they are performing.)
5. Fitters will not repair leaks, make repairs, change/repair faulty residential regulators, or anything that arises due to an emergency during their regular scheduled 8-4 fitting shift.
6. Fitters may perform work on a scheduled service replacement job (ATM) during their regular scheduled 8-4 fitting shift. Fitters do not perform work on jobs that arise due to emergencies, class 1 leaks, immediate hazards, etc.
7. The fitter may perform sales work. (Example: Upgrade a meter size, add a fit, hang a 3 bar for new business.)
8. Fitters are eligible for Mutual Aid. Fitters will be offered mutual aid after all service techs have been exhausted.

9. There will be one single OT list for the local area service department. Fitters will be on this list. Fitters will only be chalked/charged for what they are eligible for.
10. Fitters may be required/forced based upon department seniority of the local service department (based on local area rules). Fitters will only be forced for work they are eligible for.
11. Bidding for the Fitter positions in 2024 will be as follows:
    1. Internal to the local area Service Department
    2. Entire Local
    3. External
12. The 2025 Fitter positions will be posted internally to the local area Service Department. Junior available may be forced onto the shift at the company's discretion.
13. A Tech cannot hold the working leader/spare working leader and fitter position at the same time.
14. If someone is forced onto the fitter shift, they will move back to their previous shift when another rated tech comes into the department.
15. Fitter can bid off the fitter shift when there is an open shift in the department. (Example: someone gets rated, bids out of department, retires etc.)
16. Fitters will not be in the mix for shift fill. (Examples: filling for vacation, vacant shift etc)
17. Fitters do not get first bidding rights on another fitting shift.
18. Fitters will receive same OQ's that service techs hold.
19. Fitters are eligible to swap with service techs. Service techs will assume the fitter's responsibilities and vice versa.
20. If a fitter is absent, the company will not backfill the fitter shift by forcing another tech onto the shift.
21. The fitter will follow the same progression/training as service tech.

For Eversource Labor Relations

For USW Local 12004

For Eversource Operations

Contractors will perform all Leak Survey work. However, whenever company employees are assigned to work in a customer premises, they will continue to perform the ATM inspection. In exchange for this the company will increase the hourly rate of the following classifications by 2% effective 4/1/20:

Service Technician Service Technician/Fitter
Fitter A Service Technician D
Service Department/Working Leader

Purpose

Implement a formal process for training and qualification of Meter Services technicians. The program will provide Trainees an opportunity to learn the skills and gain the knowledge necessary to become Rated technicians. The Program is comprised of On-the-job training, classroom training and testing.

Roles and Responsibility

- Field Supervision
  The program will assist Supervisors in determining both a Trainee's qualifications and their proficiency in Meter Services work.

  Management representatives will evaluate the candidate using field observations of completed tasks. Throughout the program the Trainee will be evaluated based on the ability to satisfactorily perform the tasks outlined.

  Work completion evaluations and test results will create a recommendation for allowing the Trainee to continue through their progression or as necessary delay the progression until additional skills can be obtained through coaching and On-the-job training to continue with the progression.

  Trainees will be assigned appropriate work and supervision will ensure that all Trainees go out on their own as soon as possible after entering the roster, but in no case later than nine (9) months after entering the roster. The company will ensure that the Trainees gain the appropriate knowledge by having the Trainees work with supervisors, Rated Technicians and Leads during the first nine (9) months. The immediate supervisor and with assistance from the Meter Services Leads will monitor the Trainees progress and assure that all tasks are completed within the specific steps outlined when working with Leads and Rated technicians.

- Rated Meter Services Technicians/Leads
  These technicians will assist with instructing and coaching in the tasks associated with the steps of the Trainee's progression. The goal is to ensure the Trainee can comprehend and safely perform the day-to-day operations of their respective classifications.

- Trainee
  The trainee will work under the direction of the Rated technicians and Leads learning and practicing the work assignments of their given classifications. Trainees will perform and satisfactorily complete the tasks associated with each progression step.

- Training Department
  The Training department will provide formalized training and testing of Trainees and assist in the evaluation of the Trainee.

Training Program

The Service Training Progression period as a "B" rate will be shortened from one (1) year to six (6) months.

For an External Hire:
The Program duration is a **thirty (30)** month term. The term shall be divided into the following:

- A six (6) month probationary period
- A six (6) month Trainee period
- Then the Trainee will attend a two (2) week training and qualification session, if the Trainee successfully passes then;
  - The Trainee will be promoted and enter a twelve (12) month period as a C Technician
- Then the Trainee will attend a two (2) week training and qualification session, if the Trainee successfully passes then;
  - The Trainee will be promoted and enter a **six (6)** month period as a B Technician
- Then the Trainee will attend a one (1) week training and qualification session, if the Trainee

successfully passes then;
- The Trainee will be promoted to an A Technician

For an Internal Hire:

The Program duration is twenty-four (24) month term. The term shall be divided into the following:

- A six (6) month Trainee period
- Then the Trainee will attend a two (2) week training and qualification session, if the Trainee successfully passes then;
  - The Trainee will be promoted and enter a twelve (12) month period as a C Technician
- Then the Trainee will attend a two (2) week training and qualification session, if the Trainee successfully passes then;
  - The Trainee will be promoted and enter a **six (6)** month period as a B Technician
- Then the Trainee will attend a one (1) week training and qualification session, if the Trainee successfully passes then;
  - The Trainee will be promoted to an A Technician

At the end of each progression step the Training department and Supervision shall examine the progress of the Trainee in relation to the on-the-job training performance and formal training as outlined. Attend classroom training and demonstrate their knowledge by testing and qualification.

The job specifications listed at the beginning of each step are not intended to cover every detail of the Trainee's work, but rather set reasonable standards required for qualification. Typical tasks are mentioned to serve as an illustration of the level of know-how and responsibility required; it is not intended that these specifications cover every task that the position will include.

The Classroom Training Course provides a general outline of the type of classroom training necessary to support the desired on-the-job performance.

The On-the-job training guide at the end of each step, which lists training experiences the Trainee will receive, is not a list of everything the Trainee will learn. As work requirements may differ between work areas. Therefore, the guide identifies potential areas for learning in each field.

On–the–job training is accomplished by assigning the Trainee to assist a Rated Meter Services Technicians and Leads in performing the day–to–day tasks. It is expected that through this form of training the Trainee will become more proficient in the job duties.

Progression Skill Assessment

1. The Company will send employees to progression school as necessary to meet the progression timelines. The Company and Bargaining Unit agree that an On-the-Job Training (OJT) book will be developed to align with a Technician's schooling, training and the testing of their OQ's within their progression.

2. The Training Department will offer progression schooling every six months. The Training Department will coordinate with leadership from Meter Services and the Bargaining Unit to ensure all Technicians attend schooling within their progression timeline.

3. If an employee is not able to attend the required schooling, it will be on an exception basis.

The exception process is listed below:

a. The employee has all skills within the OJT signed off
b. The OJT book will be kept and managed by the employee.
c. An employee will have OJT skills signed off by a Company representative and the Working Leader for their particular AWC.
d. The OJT book will be used to provide assurance that the employee can perform the required skills within their progression.
e. The completed OJT book will be reviewed by the Company and bargaining unit.
f. The Department Director will review the exception and sign off that the employee has demonstrated the ability to progress.
g. The employee shall attend the next required schooling within progression.

Prescreen

Prescreening for the Meter Services Technician position will require the following items to be satisfactorily completed. Leather work gloves will be provided for tasks requiring hand protection.

The pre-screening test will be conducted by the Training Department within two (2) weeks after the expiration of the posting period. If the Training Department is unable to conduct the pre-screening within the required two (2) week time, the Local AWC Manager and Working Leader will conduct the prescreening as soon as possible. If the test is not given within the two (2) week period, the employee's seniority will begin in the new department as if the test was given within the two (2) week period.

Overview

At least one (1) person administering the prescreening will be from the Gas Training Department.
Pre-screenings will be videotaped.

Instructions and demonstrations will be given for all tasks. Candidates will have the opportunity to have the demonstration repeated. Once the candidate begins the tasks, no further demonstrations for that task will be done.

The candidate will complete the first task before demonstration of next task.

1. Tool Identification

   Purpose: Test the candidate's ability to identify commonly used tools.

   Setup: 12 common tools will be laid out on a table. Index cards with the names of the tools will be provided. Candidates will have 10 minutes to complete the task.

   Task: The candidate will place the index card with the name of the tool on the tool.

12" Pipe Wrench	12" adjustable wrench
Open end wrench	¾" socket and ½" drive ratchet
Box wrench	Torque wrench
Sledgehammer	Phillips head screwdriver
File	Slotted head screwdriver
Slip joint Pliers	Chisel

Scoring: Task will be used as ice-breaker exercise and will not be scored.

10 MINUTES ALOTTED

START TIME: _____ FINISH TIME: _____

10 Points needed to pass. Circle or check one. Pass _____ Fail _____

2. Identification and assembly of threaded steel pipe and fittings (Example below)

Purpose: To test the candidate's mechanical aptitude and ability to join threaded pipe and to use hand tools as required

Setup: The candidate will be given the necessary tools and threaded steel nipples and elbow fittings and be required to assemble them as shown.

Tools List: 2 of each. 14", 18", 24" pipe wrench's

Fittings List: TBD

Task: In the work area will be an example or drawing of the assembly to be recreated. Candidate will be shown how to assemble fittings.
Candidate will assemble fittings and tighten assemblies, wrench tight, to duplicate the example.

Assemble "Riser Assembly" Tighten all fittings wrench tight.

Scoring:

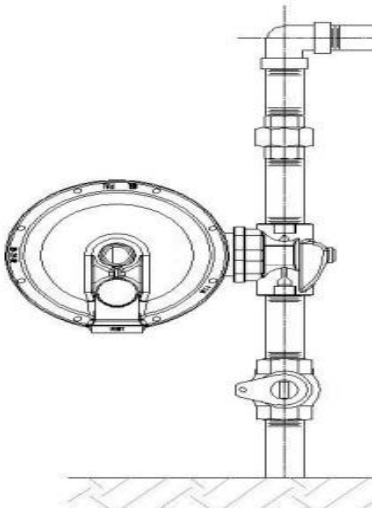
Screw riser valve onto nipple on service tee	_____ 1 Point
Screw nipple into riser valve	_____ 1 Point
Install regulator on nipple	_____ 1 Point
Screw nipple into regulator	_____ 1 Point
Screw in lower half of union onto nipple	_____ 1 Point
Install upper half of union	_____ 1 Point

Total _____ 6 Points

10 MINUTES ALOTTED FOR ASSEMBLY

START TIME: _____ FINISH TIME: _____

Six (6) Points needed to pass. Circle or Check one. Pass _____ Fail _____



Meter Repair Department

Qualifications To Enter The Roster For Working Leader SMTT Gas Meter Shop

Minimum Qualifications:

1. Must pass DOT physical.
2. Qualified applicants must pass all applicable Operator Qualification Testing.
3. Must possess and maintain a valid driver's license.
4. Must be able to operate a forklift and possess the license to do so.
5. Vacancies will be filled in accordance with provisions of the Collective Bargaining Agreement Article IV, Section 2, Promotions and Vacancies.

This Working Leader/Training SMMT Coordinator will report to the Southboro Meter Shop. The hours of the position will be from 7:30am - 4:00pm. This position is not eligible for any weekly shift fills. An alternate can be selected at the company's discretion.
Interested applicants will be interviewed and chosen by seniority within the SMMT classification. Interviews will be conducted by the Meter Shop supervisor, and Meter Shop Manager. Must pass entrance exam on technical abilities, leadership, and demonstrate training abilities.

Job Summary:
This position is self-directed under general supervision and is responsible for training and evaluation of skills and abilities of employees as they progress and work within the department. This position will be responsible for assisting supervision with coordination, scheduling, and assignment of daily work along with the safe conduct of all employees in their work assignments for maintaining a positive, productive, and professional work environment. This position will assume normal SMMT duties in addition to the Working Leader role.

Duties:

- This position will encompass all the illustrative duties listed under the Special Meter Maintenance Technician position (Job Code J2433)
- In addition to the duties listed above, additional duties may include, but are not limited to:
    - Performing illustrative duties of a lower classification.
    - Directs and trains employees of a lower classification in application of standards and safety requirements.
        - Office & field work
        - Residential and Commercial meter testing
        - Instrument and ERT programming, set-up, repair, troubleshooting, and testing
        - Commercial meter and regulator set-up, repair, and troubleshoot
        - Sensing line bending and installation
        - Monitor/Controller installation, adjustment, and troubleshoot
        - Instrumented meter field audit forms
        - EC-350 programing and diagnostics
    - Provides training assistance for employees in the field during ongoing work assignments

and scheduled training times.
- Evaluates skills of employees in training and develops work plans for improvements when needed.
- Communicates with area supervisors, other departments, sales department, and outside vendors to coordinate and assign work.
- Providing an additional level of quality assurance with meters and regulators being deployed out into the field by spot checking work done by other SMMT's.

Call Out Duties:

- This position will be eligible to accept after hours call-outs.
- Responds to call-out situations as directed by on-call supervisor.
- Performs repairs.
- Completes required paperwork.

Working Conditions:

Work in this classification is performed both indoors and outdoors, as is the current practice, dependent on the work assignment. Work is performed on company and customer premises, in streets, roadways and in rights-of-way in variable weather conditions. Work performed requires frequent bending, lifting, and repetitive motion.

Qualifications To Enter The Roster For Meter Repair Technician And Special Meter Maintenance Technician

1. Be physically fit.
2. Pass the Bennett Test with a raw score of 24.
3. Possess a valid Massachusetts Driver's License.

Qualifications To Enter The Roster For Clerk Utility

1. Be physically fit.
2. Pass job related clerical tests.

Instrumentation And Regulation Department

Qualifications To Enter The Roster For Instrument Technician

1. Be physically fit.
2. Pass the Bennett Test with a raw score of 24.
3. Possess a valid Massachusetts Driver's License.
4. Pass the General Technician Tests.

Qualifications To Enter The Roster For General Technician

1. Be physically fit.
2. Pass the Bennett Test with a raw score of 24.
3. Possess a valid Massachusetts Driver's License.
4. Pass the General Technician Tests.

Qualifications To Enter The Roster For Maintenance Technician

1. Be physically fit.
2. Pass the Bennett Test with a raw score of 24.
3. Possess a valid Massachusetts Driver's License.

Passing Scores For The General Technician Tests

Algebra	60%
Arithmetic Reasoning	Raw Score of 5
Minnesota Paper Form Board Test	Raw Score of 38

General Technician Test:

Sections 1-2-F-G	60%
Sections A through E	50%

Specific Conditions

Employees will not return to their report areas for their meal period but will remain in the general vicinity of the job site and be allowed a paid lunch period not to exceed twenty (20) minutes.

Instrumentation and Regulation Department will perform critical valve inspections at gate stations and pressure regulating facilities.

Instrumentation and Regulation Department will conduct joint project review committee sessions during the1st and 3rd quarter of each year to discuss upcoming projects for the department. At said sessions, one (1) designated Local 12004 Instrumentation and Regulation representative from each area and one (1) union officer, appointed by the President of the Local will attend.

The rate of pay for the following will increase as stated, effective April 1, 2013:

- Instrument Technician $.60 per hour
- General Technician $.55 per hour
- Maintenance Technician $.55 per hour

Warehouse Department

Qualifications To Enter The Roster For Stockhandler

1. Be physically fit.
2. Possess a valid Massachusetts Driver's License and be capable and willing to get a Massachusetts Commercial Driver's License (CDL).
3. Pass job related tests.

Fleet Department

Qualifications To Enter The Roster For Mechanic

1. Be physically fit.
2. Possess a valid Massachusetts Driver's License and be capable and willing to get a Massachusetts Commercial Driver's License (CDL).
3. Pass the Bennett Test with a raw score of 24.
4. Must have completed 4 years of Technical School training in auto mechanics or two years of on-the-job training.

Employees who do not fulfill Qualification 4 above will enter the 42-month Mechanic progression as described in Appendix A, assuming they fulfill all other requirements.

Specific Conditions

In order to progress to the "B" rate the employee must obtain a Class A Massachusetts Commercial Driver's License, after receiving training in the same.

In order to progress to the "A" rate the employee must pass a basic Welding Skills test, after receiving training in the same.

Stipulation For Shift Assignment

There must be at least one rated man on shift in the report area.

Corrosion Department

Union Represented Employee

Local 12004

Position: Corrosion Technician

Department: Corrosion Control

Reporting Location: Various

Organization: Gas Operations

Job Code: J1350

Effective Date: April 1, 2024

I. Job Summary:
Performs a variety of technical assignments associated with the corrosion control program for the Company's natural gas distribution facilities in 12004. Monitors and maintains the corrosion control facilities by performing testing, inspections and troubleshooting of these facilities. Initiates work orders for recommended improvements and maintenance of corrosion control facilities to ensure compliance with Federal regulations.

II. Illustrative Duties:
a. Perform testing and inspections of corrosion control systems to ensure compliance with Federal and State regulations where applicable.
b. Evaluate and provide updates of corrosion circuit records, corrosion control facilities, and mapping records to GIS Department and other record keeping systems as necessary.
c. Work Independently to complete assignments and track work related to corrosion control to meet various state and federal regulatory compliance requirements.
d. Operate and maintain specialized corrosion instruments to obtain field data under a wide variety of conditions.
e. Provide corrosion control expertise within Eversource' s standards and practices to Capital Construction team and Gas Operations group for corrosion control as requested.
f. Troubleshoot cathodic protection systems and initiate appropriate corrective action for the installation and maintenance of corrosion control facilities.
g. Direct, monitor and inspect the work of corrosion contractors performing facility installations and repair, as needed.
h. Perform assessment and guidance for corrosion control installation practices on new steel gas line construction in adherence to Eversource Construction Corrosion practices as needed.
i. Perform inspections of factory applied and field coating applications on new Eversource gas piping upon request.
j. Inspection of inside customer meter sets while on-site for corrosion control related work.

III. Reporting Relationships:
This position reports to the Supervisor of Corrosion Control

IV. Working Conditions:
Schedule 7:30 a.m. to 3:30 p.m. Monday through Friday.
A primarily field position, frequently exposed to high traffic, construction site hazards and hazards on

customer premises. This is a safety sensitive position requiring random drug testing. Federal Operator Qualification rules apply.

V. Minimum Qualifications:
Education and Experience: High school diploma and possess a valid motor vehicle operator's license. Experience in Gas Field Operations would be preferred.

Knowledge, Skills and Abilities: The ability to understand electrical theory, basic chemistry principles and corrosion theory. Thorough knowledge of gas maintenance operations and construction. The ability to work independently. The ability to pass the applicable Eversource Operator Qualification tests and any time Merit Progression steps to be a fully Qualified Corrosion Technician within 3 years.

Thorough knowledge of Federal and State codes related to corrosion control. Thorough knowledge of the company's work management system, working knowledge of the company's GIS.

Skills testing: Ability to pass the Corrosion Control Math Skills Test

Operator Qualification (OQ) Failures

a) If any employee is in a job classification that requires operator qualifications and fails three (3) attempts of any given OQ test consecutively, the employee will be locked out from testing for a period defined by the company OQ plan. During the lockout period, the employee will be assigned to an instructor-led review session prior to testing again, and be considered "not-qualified" for the purposes of their call out roster.

b) If an employee fails a required operator qualification task a fourth time after the lock-out period following the third failure, the employee will be assigned to an instructor-led review session prior to testing again. The employee will have 90 (ninety) days to look for a job in any classification that does not require the OQ which they failed a fourth time. During that 90-day period, they may test a fifth time. If they pass the test, they will remain in their job classification. If they fail the test and do not find an open position for which they are qualified at the end of the 90-day period, the company will find, and place the employee into, an open position that does not require that qualification. If that position is in a different report location, portal to portal will not apply. The pay rate and progression in the new position will prevail. After the fifth failure, whether the employee bids into the new position or the company places them, they will remain in that position for a period of 12 months.

The parties agree to form a subcommittee to discuss the Operator Qualification program. The company agrees to meet quarterly unless the parties mutually agree on a different timeframe.

APPENDIX D

Sick And Accident Policy

All employees of the Company, after thirty (30) days of full-time employment, who are absent from regularly scheduled work because of sickness, non-occupational accident, or occupational accident, shall receive in total, from whatever source, full straight time pay for such absence subject to the following conditions:

a) An employee will receive a total full pay benefit not to exceed six (6) months of straight time pay for each illness or accident, exclusive of accrued vacation pay. If Employee goes back out within 6-month period for the same condition, then the benefit would start back up where it left off.

- Example 1: Out of Work for 4 months
    - If employee goes back out for the same condition within a 6-month period (6 months from return-to-work date), Employee would only have 2 months left under illness benefit, then move to LTD
- Example 2: Out of Work for 6 months
    - If employee goes back out for same condition within 6-month period (6 months from return-to-work date) employee would move into LTD.

b) An employee continuously absent due to sickness, occupational accident, or non-occupational accident for a period of six (6) months would be transferred to the Long-Term Disability Program if he meets the requirements of said Plan.

c) The Company will require a doctor's certification from the employee for any illness or accident after such employee has accumulated more than three (3) incidents of absence due to illness or accident during the calendar year. Such employee will not receive pay benefits if that employee does not furnish a doctor's certificate for the fourth or more incidents of illness or accident during the calendar year. An absence due to illness or accident of two weeks or more shall not count as an incident. Employees with 20 or more years of service will not be required to furnish a doctor's certification for payment of sick benefits except as noted in (e) below. Continuing absences of four (4) or more working days the employee is required to contact the company's third-party vendor to initiate an extended illness. Continuing absences due to illness or disability require a doctor's certification every 30 days if payment is to be made.

d) All benefits under this policy will be determined on the basis of normal pay for forty (40) hour week at straight time rates.

e) Absence shall be paid for at full normal straight time pay for the first three (3) or less consecutive working days without a doctor's certification. Absence due to illness or disability which exceeds three (3) workdays requires an doctor's certification if payment is to be made. Absence due to an accident requires an doctor's certification for the first day of disability if payment is to be made.

f) Successive periods of absence separated by less than two (2) weeks of continuous active work on a full-time basis shall be considered one (1) continuous period of absence unless the subsequent period of absence is due to an injury or disease entirely unrelated to the injury or disease which caused the previous absence and commences after return to work on a full-time basis. If you have been receiving benefits under the LTD Plan, return to work, and subsequently suffer a second disability, the following will apply: If your second disability is due to the same or related causes as the first, and your return to active work period is less than 3 months, then the Plan will resume its benefit payments without the six-month waiting period applying again. If your second disability is due to causes Unrelated to the first, then the Plan will resume its benefit after a six-month waiting period.

g) Full straight time pay benefits will not be allowed under this program for illness or accident caused as a result of willful intention to injure oneself or another person, or commission of any crime, or as a consequence of working for an employer other than this Company, or any other work for wage or profit.

h) Dentistry, optical, and physical examination are not considered as absences payable under this program. Doctor's appointments for pre-natal care will be covered, provided after hour appointments

are not available. The employee will schedule said appointments for the start or end of her workday.

i) All cases of illness or injury must be bona fide. False claims for payment under this program will subject an employee to disciplinary action. As a result, the Company reserves the right to have, at any time, a legally qualified physician or physician's assistant examine the person of an absent employee when and so often as may be reasonably required during a benefit period.

j) Prompt notification of sickness or accident is required. It is essential that the employee or someone on the employee's behalf give notice to the Company as close as possible to the employee's normal starting time.

k) LTD Language change (2024 Negotiations) change from 24 month 'any job (occupation)' to 24 month 'own job (occupation)'.

New Hire Sick / Disability Plan

Disability plan for all new hires after January 1, 2020:

All 12004 employees hired after January 1, 2020 will be eligible for up to 10 sick days per year at 100 percent of pay for absences from work due to non-occupational illness or injury, as of 1/1/20. Sick days cannot be carried over from one year to the next nor are sick days paid out at termination.

Short-Term Disability Benefit - In the case of illnesses that exceed five consecutive workdays, qualifying employees will be eligible for short-term disability (STD) benefits. Disability benefits are payable for up to 25 weeks, for each injury or illness after an employee has been out of work for more than five consecutive workdays. The first five consecutive working days of an extended absence is considered an "elimination period." Employees must use available sick time to satisfy the elimination period. Following a period of five consecutive sick days, the next twelve (12) weeks of absence under the STD benefit will be paid at 100 percent of base pay. Up to thirteen (13) additional weeks of STD will be paid at 67percent of base pay.

- ***Effective January 1, 2024. Re-Occurrence Clause: if an employee goes back out within 6 months of returning, the new occurrence could be associated back to original disability claim pending medical support/documentation. If it is considered a re-open of original disability claim, the employee would only be eligible for the balance of what was left when he/she returned from the original claim. Both incidences would count towards the LTD elimination period.***

Long Term Disability Benefit - Upon exhaustion of STD an employee who qualifies will move to Long-Term Disability. LTD benefits are payable at 50 percent of base pay. Employees will have the option to buy-up with pre-tax contributions to an LTD benefit of 67 percent of base pay.

Payment of Benefits while on LTD - All employees who receive a LTD benefit and participate in the Eversource Employee health and welfare benefit plans will have payments deducted from their LTD check rather than being billed for participation in said benefit plan.

APPENDIX E

Job Security

The Company agrees that regular employees with five (5) or more years of service will not be laid off or

reduced in pay due to lack of work during the term of this Agreement.

It is further understood that in the event that it becomes necessary to have a layoff and the Company is prevented from laying off as many employees as it deems necessary due to this Agreement, it is understood that it may be necessary for the Company to retrain and/or relocate employees without any restrictions to maintain an efficient operation.

APPENDIX F

Outside Contractors

For the term of this contract, the Company and the Union will meet and discuss the use of outside contractors in the Meter Service and Clerk areas. During the term of this contract, unless mutually agreed, the company will not use outside contractors in the Meter Service Department and Clerks.

1. If an outside contractor works for the Company on Saturday, Sunday or a holiday, the following will apply:

    a) Employees who normally perform like work and are on Monday through Friday schedule will be offered work on that Saturday, Sunday or that holiday

    b) Employees who normally perform like work and are on a Tuesday through Saturday schedule will be afforded a sixth day at overtime rates within the following three-week period.

2. It is agreed that the use of outside contractors will not be extended into areas where they are not presently being used.

3. It is agreed that if there is a curtailment of work, presently being done exclusively by Union employees, the Company will retrieve sufficient work from outside contractors, to avoid any reduction in straight time hours or lay-off of Union employees.

4. It is the Company's intent not to accelerate the use of contractors in the Company.

5. The following will apply to the Gas Services and Clerks effective April 1, 1993. When the Company considers it necessary to have Outside Contractors perform any work for the Company normally performed by bargaining unit employees, the Company will notify the Union of the type of work to be performed before the contractor starts work and the following provisions will apply:

    a) When a contractor or contractors are engaged in any work normally performed by bargaining unit employees, in any week, an eight-hour day shall be scheduled for the succeeding Saturday for the employees in the affected Report Area Department. Such an eight-hour day shall be paid for at the appropriate overtime rate.

    b) Employees who are on other than a Monday to Friday schedule will be afforded a 6th day at overtime rates within the following two-week period.

    c) The application of paragraph 5 a) and b) as it applies to Clerks will be based on the affected sections determined by the individual overtime rosters.

    d) Exemptions to the application of paragraphs 5 a) and b) will be:

(1) Work that requires a license that no one holds in the bargaining unit within the Customer Service Department.

(2) New or replacement water heater light ups.

6. When pipeline contractors or corrosion contractors are scheduled to work during the normal work hours Monday through Friday, normal meaning first shift, the Company will notify the Union of the type of work to be performed before the contractor starts and the following provisions will apply:

a) All employees in the affected report area Maintenance Department with the exception of Distribution Support Technician will be offered sixty (60) minutes overtime on the day the contractor has worked except when contractors are installing new services, 4" and below (including services in developments from the curb cock to the riser), and commencing on January 1, 2007, corrosion repairs on services and mains, all employees in the affected report area, Maintenance Department, will be offered ninety (90) minutes overtime for such work. The pipeline and corrosion contractors will be off the road at 4:30 p.m. The last one half (1/2) hours of the workday (4:00 p.m. – 4:30 p.m.) will consist of sweeping the jobsite and setting barricades for neatness and safety. Such overtime will be paid at the appropriate overtime rate.

b) When a pipeline contractor or corrosion contractors are scheduled to work a shift other than the first shift, all employees scheduled in that report area, Maintenance Department, with the exception of Distribution Support Technician, will be offered man for man overtime equal to the number of contractors that have worked. This overtime will be offered daily in two (2) hour blocks on weekdays starting the following Monday until the hours are exhausted. These hours will be in addition to Appendix F hours in paragraph a). *"Man for Man" hours are calculated as hours worked by the contractors, multiplied by that contractor crew's headcount, divided by the Distribution headcount for that area. The resulting number will correspond to the hours owed per member of the local Distribution roster.*

Example:

Distribution Roster = 20

Five (5) man contractor crew works 8 hours

(5 contractors x 8 hours worked) / 20 Distribution Techs = two (2) hours owed per Distribution Technician)

1. Upon mutual agreement of the parties, Saturdays can be worked to catch up on hours owed from paragraph b) but will not replace the process of paying off the owed hours in two (2) hour increments during the week.
2. Any hours worked by internal crews in response to emergencies while owed hours are being paid off will run concurrently with-pay off hours. No additional hours will be owed to those employees.

.

c) The provisions of paragraphs 6 a) and b) only apply to pipeline and corrosion contractors.

d) Exemptions to paragraphs 6 a) and b) will be:
- Installation of steel mains or services 8" and larger in diameter

- Installation of steel mains for bridge crossings
- When performing corrosion repairs on exposed piping on bridges

If a pipeline contractor, working on 8" steel or larger as described in "Exemptions" in Appendix F, works beyond the normal working hours to install pipe then overtime will be offered to an amount of Distribution Mechanics in the affected report area that is equal to the number of personnel on the pipeline contractor crew. The overtime will be equal to the amount of time the pipeline contractor works beyond the normal work hours.

If/when pipeline contractors working on these projects are instructed by the Company to work beyond 4 PM the paragraph above will take effect. If pipeline contractors working on these projects are delayed while Company crews are performing live gas work the above paragraph is not applicable.

Construction Agreement

Construction Crews

a) The Company and the Union agree to meet each year prior to the construction season to discuss planned work and allocation of resources.

b) Internal Construction crew staffing fourteen (14)

c) Construction crews may be utilized to perform the following activities:

Examples of work that may be performed:

1. New growth services
2. New growth mains
3. Service replacements
4. Main connections
5. Main replacements
6. Service replacements associated with main replacements
7. Public work projects
8. System enhancements
9. Meter fitting work (Flexibility agreement)
10. Affected cast iron encroachments
11. Main & service taps

d) The Company will have the ability to change the scheduled hours for employees assigned to Construction in order to meet customer and project needs. For example, If a municipality issues a permit with restricted hours or off hours the Company will notify the Union of schedule changes and provide the employees as much notice as possible however not less than 5 days (120 hours).

e) The Company will strive to keep Construction employees working as much of the year as possible. Construction crews will start each year on or before April 1st and be completed on or after December 1st. The Company will determine start and end dates. If the Company determines inclement weather,

workload in Maintenance or other factors that delay or end the construction crews prior to December 1st , the Company will notify the Union. Construction employees will then be redeployed to perform maintenance work during these periods and winter months.

f) Performance Measurements - The use of employees for Construction will be measured. The Company will track the following items to determine the employee's ability to perform the assigned work safely, productively and cost effectively. The Company and the Union will review performance results on a regular basis.

12. Health and Safety
    - OSHA recordable incidents
    - DART recordable incidents
    - PMVA recordable incidents
    - Absence rate
13. Quality
    - Percentage compliance in QA/QC program
    - DPU/Regulatory violations or findings
    - Customer Satisfaction
14. Productivity
    - Cost per units
    - Cost per foot
    - Feet of pipe installed per day
    - Number of services installed per day

g) If targets are not met, the Company and Union agree to engage in cooperative efforts to make the necessary performance improvements. If after discussions with the Union, targets continue to no be met the Company crew will be replaced with another Company crew. If the second crew does not meet the performance measures the crew will be reassigned to other activities within the Maintenance department.

The Company and the Union will review and discuss construction crew performance. If the Company and Union agree that performance targets are being met, then further discussions between the parties will be conducted to determine if additional crews will be added.

Staffing:

(Table 1)	Main Crew	Service Crew	Main (open trench)	Service (open trench)
Distribution Tech A/Crew Leader	1	1	1	1
Distribution Tech B/C	2	1	1	1
Trainee or Temporary employee	1	1	1	
Total	**4**	**3**	**3**	**2**

Crews will be staffed with existing or additional employees as needed.

(Table 2)	# of crews	** # of employees

Main Crew		
Service Crew		
Total		

** Crew size will be determined by Table #1

- Temporary employees may be used for absence, vacation or additional manpower.
- Crew configuration and crew counts, as well as report locations may be altered to deliver optimal results depending on job type, work site conditions, absences, vacations, etc.
- Crews will not be moved from their report areas unless there is a curtailment of work, or the Company needs to address workload. The Company will notify the Union prior to moving crews.
- All work will be scheduled at the Company's discretion.
- Crews may respond to class 1 leaks and emergencies if other crews are unavailable.

The Company will add four (4) construction crews as follows:

1 crew in Hyde Park AWC
1 crew in Somerville AWC
1 crew in Southboro AWC
1 crew in Worcester AWC

The crews will operate under the current Gas Construction Agreement. These are not incremental positions. The Company will add the four additional crews to the existing Construction crew compliment starting in 2020.

The construction crews will be selected based on daily work assignment. The practice of using a volunteer list is discontinued.

The parties agree to meet and discuss the implementation of the four new Gas Construction Crews.

<u>Inspectors</u>

1. The parties agree to create a new Inspector position. (see job description attached)
    - This position will be paid 7% above the Distribution Technician A rate.

    Full time Inspector positions will be assigned to the locations listed below as follows:
    - Southborough 6
    - Worcester 5
    - Hyde Park 4
    - Somerville 5

    It is understood that the number of Inspectors in each area may be adjusted up based on the number of contractor crews working in an area. However, the number of inspectors in each area will not drop below the minimum number listed above.

    In the event future legislation, code changes or a DPU order mandates a ratio different than is defined in this agreement, the parties agree to meet and negotiate changes to this Inspector Agreement. In the

event the parties are unable to reach agreement, it is understood that the 7% premium will be discontinued, and the work described in paragraphs 3, 4, and 5 will revert to the bargaining unit.

2. Inspector to contractor crew ratio is planned at 3:1, however, when unplanned absences occur the Inspectors will back fill each other and expand to a 4:1 ratio. Beyond the 4:1 ratio any additional resources will be requested from the gas maintenance (qualified distribution Pool). After the 3-day absence period, the company shall assign additional resources from the gas maintenance group to maintain the 3:1 ratio.

3. If the Company utilizes outside contractors to perform gas pipeline associated work, the contractors will perform all mark-outs associated with said work. If necessary, Company inspectors may assist. The need to utilize Company inspectors in this role will be determined by the Company. If the contractor is unable to access a premise during normal working hours, the contractor will be permitted to perform the mark-out(s) during off hours. Except as described in this paragraph, Appendix F will continue to govern the use of contractors.

4. If the Company utilizes outside contractors to perform work on Company pipeline, the Contractors will be responsible for scheduling their own work. Company inspectors may assist in this process if necessary. The contractor shall notify the Inspector or meter service personnel who will coordinate the remaining scheduled work.

5. The Contractors will be responsible for all documentation for the projects that they are assigned. Such documentation will be subject to the approval of an Inspector in a timely manner.

6. The current practice of scheduling police details and obtaining permits will remain with the bargaining unit.

7. The company will have the ability to change the scheduled shift hours for Construction Inspectors to 7:30 p.m. to 3:30 a.m. if they are unable to acquire a regular daytime permit due to factors outside their control (example: a municipality will only issue a permit with restricted or off hours).

    a. The company will make every effort to keep all work scheduled during regular scheduled daytime hours.
    b. The company will notify the union of scheduled changes and provide the employees as much notice as possible, not less than 2 days (48 hours).
    c. Normal shift differential rules will apply.
    d. Night work will be a 2:1 ratio (no more than 2 crews per 1 inspector)
    e. Any hours worked outside this shift will be paid at applicable overtime rates. Inspectors will be eligible for all OT.
    f. Scheduled shift changes will be for *no more than 5 consecutive shifts* (Sunday through Thursday), unless mutually agreed upon by both parties.
    g. A Construction Inspectors' shift may also be changed for other reasons if mutually agreed upon by the union and company.

h. Shifts will be filled on a voluntary basis among Construction Inspectors, by department seniority and who possess Procedure Supervisor OQs. If no one accepts, the junior Construction Inspector will be forced on the shift. Appendix F hours will be worked at start of shift.

APPENDIX G

Miscellaneous Policies

Adoption Benefit

How Adoption Reimbursement Works

- Eversource will reimburse up to $15,950 (indexed by IRS to $16,810 for 2024) of eligible expenses for the adoption of each child under the age of 18.
- The adoption benefit is payable when the adoption is final (when a decree of adoption is entered by the court).
- You may not receive benefits under this program if you are receiving assistance under the Eversource Surrogacy Assistance program with respect to the same child.
- If you or your spouse (or partner/the other parent) both work at Eversource, only one of you is eligible to submit expenses for reimbursement.

Benefit Amount

The adoption benefit is 100% of the first $4,000 of eligible expenses for the adoption of each child under the age of 18. Only the expenses you actually incur are eligible for reimbursement.

The benefit is payable when the adoption is final. An adoption is final when a decree of adoption is entered by the court. Reimbursement will be provided when the Company receives proof of adoption and proof of payment of eligible expenses.

Eligible Expenses

The following expenses are eligible for payment:

- Adoption agency fees
- Legal fees
- Court fees
- Travel expenses
- A child's initial medical examination
- The pregnancy out-of-pocket medical expenses of the natural mother (to the extent these expenses are not eligible for reimbursement under another medical plan)

How to File a Claim

When your child's adoption is final, send original receipts and documentation to the Benefit's Department.

Adoption Leave

Eligibility

You are eligible for Company-paid adoption leave after you complete three (3) months of employment with NSTAR. Your pay during the duration of your adoption leave will be based on your base pay in effect on the

day your leave starts.

You must give your supervisor at least three (3) months written notice of the date your leave will start and when you expect to return to work. If you are also eligible for FMLA leave, time taken for adoption leave will also count as FMLA leave.

Duration

Adoption leave begins on the date the child is received into your home. The maximum duration of an adoption leave depends on the age of the adopted child according to the following schedule:

Age of Adopted Child	Maximum Amount of Leave
6 years old or younger	*8 weeks*
At least 7 years old but less than 13 years old	*4 weeks*
At least 13 years old but less than 19 years old	*2 weeks*

Returning to Work

You generally have the right to return to the same position or an equivalent job with equivalent pay, benefits and working conditions at the conclusion of the leave. Moreover, employees have no greater right to restoration than if they had been continuously employed.

Surrogacy Assistance

How Surrogacy Reimbursement Works

- Eversource will reimburse up to a total of $16,810.00 per child per year for qualifying expenses that you've incurred resulting in a fully completed and Valid Surrogacy Contract through a bona fide agency.
    - A Valid Surrogacy Contract is one that is legal in the state in which the parties enter into it and is between the party who has agreed to become impregnated, carry and give birth to a child and the intended parent(s) of such child.
    - A completed Valid Surrogacy Contract is one that results in an Eligible Employee being recognized as the parent of a child on a birth certificate, court order of adoption, post-birth court order, or other court order recognizing the Eligible Employee's parental rights under applicable law.

Note: A surrogacy contract that fails to result in a live birth, or results in a live birth but the Eligible Employee is not recognized as the parent of a child on a birth certificate, court order of adoption, post- birth court order, or order recognizing the Eligible Employee's parental rights under applicable law, shall not be a Valid Surrogacy Contract and no reimbursement benefits will be paid under this Program.

Clothing

FR Program

- The initial allowance is $1,450.00
- Increased the annual allowance by $25.00 each year of the contract
    - 4/1/24 - $1,450
    - 1/1/25 - $1,475
    - 1/1/26 - $1,500
    - 1/1/27 - $1,525

- Each year thereafter will be $800.00 deposited into the employee's clothing account in January.
    - 4/1/24 - $800
    - 1/1/25 - $825
    - 1/1/26 - $850
    - 1/1/27 - $875
- Any unused amount of the allowance cannot be used for the following year's acquisition of clothing.
- The practice of the Company issuing t-shirts will discontinue for employees enrolled in the FR program.
- Employees enrolled in the FR Program:
    - **Meter Services**
    - **Distribution (Including Tool Tech)**
    - **Instrumentation & Regulation**
    - **Meter Shop**
    - **Corrosion**

Hybrid FR/Non-FR Program

- Initial allowance will be $900.00
- Increased the annual allowance by $25.00 each year of the contract
    - 4/1/24 - $900
    - 1/1/25 - $925
    - 1/1/26 - $950
    - 1/1/27 - $975
- Each year thereafter will be $700.00 deposited into the employee's clothing account in January.
    - 4/1/24 - $700
    - 1/1/25 - $725
    - 1/1/26 - $750
    - 1/1/27 - $775
- Any unused amount of the allowance cannot be used for the following year's acquisition of clothing.
- The practice of the Company issuing t-shirts will discontinue for employees enrolled in the FR program.
- Employees enrolled in the Hybrid FR/Non-FR Program:
    - **Fleet**
    - **Facilities**

Rental Uniforms and Raingear

- Rental uniforms that are supplied by the Company will be cleaned and maintained by the Company.
- Replacement rental garments will be issued as needed and upon return of old clothing to the Company.
- All employees who receive uniforms or are enrolled in the FR program will wear them during Company paid hours.
- Employees will not wear uniforms or FR clothing other than on Company business.
- Employees who will receive Rental Uniforms:
    - **Fleet**
- Employees who will receive Raingear:
    - **Facilities**
    - **Fleet**
    - **Meter Services**
    - **Maintenance**
    - **Instrument & Regulation**
    - **SMMT**
    - **Corrosion**

- One fire resistant coverall will be issued to **Maintenance** and **I&R Department** employees as part of their personal protective equipment and maintained by them.

Safety Footwear

- The company will provide an annual allowance of up to $300.00 per year. Eligible employees may purchase safety footwear through Tyndale or submit a receipt after purchase. Employees must purchase safety footwear that meet all safety requirements.
- Any unused amount of the allowance cannot be used for the following year's acquisition of safety footwear.
- Employees who will receive Safety Footwear:
    - **All employees (excluding Dispatchers)**

Rubber Footwear

- Employees who will receive Rubber Footwear:
    - **Meter Services**
    - **Maintenance**
    - **Instrumentation & Regulation**

Licenses

The Company agrees to reimburse employees, including renewals, for licensing and certification fees for the following: hoisting license, welding certification, electrician license (if required) and Class A & B Driver's Licenses. (The Company agreed that all grandfather agreements now in effect will remain in effect.

Exams

The Human Resources Department after consulting with the Union President will appoint a representative of the Union who may review with a member of the Human Resources Department, the results of exams affecting job appointments. The Company will notify the Union in writing of the name of proposed appointee. Only the exams pertaining to that specific appointment may be reviewed.

All exams will be the same as those viewed by the Union during negotiations.

A Union designate will be present during the administration of all job-qualifying exams.

Dog Repellant

Dog repellant will be supplied any individual requesting it.

Disciplinary Action Slips

If an employee has received no disciplinary action slips for a period of three (3) years, all slips prior to that period will be removed from his file and returned to the employee.

Aprons

The Company will provide aprons for personnel working in the Meter Repair Department.

Aprons will be supplied to the crew trucks in the Maintenance Department.

Prescription Glasses

The Company will pay for one pair of prescription glasses per year, which are pitted or damaged due to welding or cutting during the performance of Company duties.

Division Areas

The NSTAR Electric & Gas Corporation is divided into two division areas - East and West. These divisions are sub-divided into four report areas namely, Somerville, Dedham, Southboro and Worcester. There will be no change in the divisions or the report areas unless mutually agreed upon by Union and Company. Failure to reach agreement will result in the implementation of the change by the Company subject to the contract grievance procedure. During the term of this contract, the foregoing procedures concerning Divisions and Report Areas will take precedent over the management functions clause in Article II of the contract.

Daylight Savings Time

On the day when Daylight Savings Time is established, all employees working said shift will be paid eight (8) hours at their base rate. When Daylight Savings Time reverts back to Eastern Standard Time, all employees working said shift will receive one (1) hour at the appropriate overtime rate in addition to their basic straight time rate.

Safety And Health

The Company will continue to make reasonable regulations for the safety and health of its employees during their hours of employment. Representatives of the Company and the union shall meet from time to time at the request of either party to discuss such regulations and other matters pertaining to safety.

Safety rules and practices and all applicable State and Federal Laws governing health and safety shall be complied with, by the Company and employees.

New Technology

To better meet the level of service expected by our customers, the company will be utilizing new technology. The company and the Local have agreed that employees will use new technology, computers, mobile devices and future technologies in connection with the illustrative duties listed in their respective job specifications. The company will notify the Local of its intent to utilize any new technology and agrees to provide training on any new systems and/or devices issued by the company. Company agrees to add .25% to the general wage increase effective January 1, 2020.

Legal Representation

NSTAR Electric & Gas Corporation agrees to provide Local 12004 with legal representation for all its members who require this assistance as a result of any act or acts in connection with:

the business of the Company

This assistance will be provided only when the employee is acting within the scope of his/her authority and meets the above-stated test.

New Hires

New Hires to EVERSOURCE will be given an opportunity to meet with the USW Local 12004 Administrator for one-half (1/2) hour during their orientation with the Company.

APPENDIX H

Leave Of Absence

Jury Duty
When an employee, except a temporary employee, is called to jury duty, he shall be excused from such of his regular scheduled work as is necessary to fulfill the jury duty, and the Company agrees to pay his base pay. The employee's schedule during the week of such absence for jury duty shall be deemed to be 8:00 A.M. to 4:30 P.M., Monday thru Friday.

The individual on jury duty will not be denied the opportunity to work overtime.

It is understood that employees will report for work if not called on a given day for jury duty or if released prior to 10:30 a.m.

Subpoenaed Witness
The Company will allow necessary paid time off to an employee subpoenaed as a witness if the employee is not a defendant in the case or bringing action against the Company or its contractors.

Family Leave
A regular employee shall be granted a leave of absence without pay up to 90 calendar days for the following reasons: care of a newborn or adopted child, care of an ill child, parent or spouse. Such leave may be extended by the Company.

A request must be made in writing to the Manager, Employee Relations within one week of expected date of the leave, if possible. Employee benefits will continue for a maximum of 30 calendar days from the beginning of the family leave of absence. If the employee chooses to continue such leave of absence beyond 30 calendar days, employee benefits will be continued in compliance with the law.

If the parent, child or spouse should die during said leave of absence, the employee shall be entitled to benefits as outlined in Appendix H, Funeral Leave.

Said employee shall return to the job and shift held prior to the leave.

The period granted as leave of absence will not constitute a break in the employee's service record if he returns to work upon its completion.

Emergency Leave Policy
Any employee required to remain away from the job on a regularly scheduled workday because of an emergency existing at home which requires his personal attention to make arrangements for care of such emergency, shall suffer no loss of base pay for that day provided he makes every effort to inform the Company, he reports for work as soon as is reasonably possible, and he works at least four (4) hours of that day. However, any employee after having reported for work on a regularly scheduled workday and is then required

to leave because of an emergency existing at home which requires his personal attention to make suitable arrangements for the care of such emergency, shall suffer no loss of base pay for that day.

Bereavement/Funeral Leave

Eversource offers paid time off to grieve following the death of a family or household member.

Family Member	Days of Paid Leave
Spouse	5 days
Child	
Parent	
Father/Mother-in-law	
Son/Daughter in-law	
Grandchild	
Grandparent	
Sibling	
Brother/Sister in-law	3 days
A person who was a member of and lived in your household	
Aunt/Uncle	2 days

If you or your spouse should experience a miscarriage or still birth, please open an Ask HR Ticket to Inquire about bereavement leave.

If a holiday occurs as one of the days in this funeral period, holiday allowance only will be paid for that day in accordance with our regular holiday policy.

Past practices concerning a representative group of members of the Union will be continued.

The foregoing policy will not operate to extend any Paid Leave Policy except if a death should occur during an employee's vacation, the provisions and practices of this section shall apply, and the employee shall receive, if so requested, a re-assignment of those vacation days that were committed to the necessary funeral services and arrangements.

Personal Leave Of Absence

At the discretion of the Manager, Employee Relations, a Regular employee may be granted a leave of absence without pay for personal reasons not covered by other policies.

Each application for personal leave will be considered on the merits of the individual case. The Company will give the decision in writing within one (1) week of the request.

The period granted as leave of absence will not constitute a break in the employee's service record if he returns to work upon its completion.

Employee benefits will be continued for a maximum of 30 working days from the beginning of the Personal Leave of Absence.

Paid Parental Leave

Employees who become parents on or after April 1, 2024.

Under the program, eligible employees - both birth parent and non-birth parent - will receive 6 weeks (to be used in one block) of paid parental leave at 100% of base pay. Eligible births are those that occur on or after April 1, 2024.

Parental leave may be taken to bond with a new child during the first year after a birth, adoption or foster placement. Paid parental leave will coordinate with any available state and company leaves and will be an offset of any benefits paid under those plans.

Note that for the birth parent, paid parental leave will be available following their disability benefits period. The program will be administered by Lincoln Financial.

Military Leave

1. Service in Armed Forces Reserve Components

The Company approves the enrollment of employees in the National Guard Officers and Enlisted Reserve Corps of the United States Army, Air Corps and Navy and Marine Corps Reserves, and will grant military leaves of absence as specified.

2. Short Period Active-Duty Training

A leave of absence up to a maximum of fifteen (15) working days in any calendar year for the purpose of active-duty training will be granted to any employee who is a duly qualified member of a reserve component of the Armed Forces on receipt of written notice of dates of departure and return. Such leave of absence shall not affect the employee's right to his normal vacation, sick leave, or advancement. However, any portion of such leave of absence may be taken coincident with the employee's vacation if he so chooses.

- On receipt of a properly completed application, the Company will pay the difference between the employee's military pay plus allowances (except travel allowances) and employee's normal rate of pay for each day of scheduled work lost up to a maximum of five (5) working days in any calendar week. The computation will be based on a five (5) day work week.
- Military leave pay, when authorized, is subject to the normal deductions and to withholdings required by law.
- Leaves of absence under the above paragraphs will not interrupt purchases of pension, insurance, or health benefits if for less than one-month duration.
- No PR 2 is required for military leaves of absence of less than one month's duration, but the leave shall be indicated on the timecard and the employee's request for leave, approved by his Department Head, shall accompany the first timecard within the leave period.
  a) Standard forms for notification of proposed performance of active-duty training and request for military leave pay may be obtained through the Payroll Department.
  b) Requests for leave of absence to attend service schools, or tours of duty for other than training will be considered as individual cases, on their merits.

3. Basic Training Periods for Reservist Enlistees

Active-duty periods of three to six months are being required of some enlistees in reserve components of the Armed Forces. A leave of absence of up to six months plus necessary travel days will be granted, without pay, to any regular employee who, as a duly qualified member of a reserve component of the Armed Forces, is required to go on active duty for basic training as a condition of his service, on receipt of written notice with

dates of departure and return. The period granted as leave of absence for this service shall not constitute a break in the employee's service record if he satisfactorily completes his tour of duty and returns to work upon its completion.

a) The Group Life and Accidental Death Insurance and Employee Savings Plan participation of such employee will be suspended as of the first day of the month following his leaving the Company to enter the Armed Forces. They will be reinstated upon his return to work. His supervisor will secure from the employee his certificates for such group coverage and will hold them during the employee's absence in the service.
b) If the Company is providing medical coverage for the employee and/or his dependents, such coverage will be subject to suspension during the period of absence, except if the employee requests in writing that the coverage be kept alive. This will apply whether the coverage is for the employee only or for employee and dependents. The employee will be expected to use the health care that his branch of the service provides for himself and his dependents.
c) If the employee is a participant in the Pension Plan, benefits will accrue to him during such leave of absence based upon his rate of compensation as of the January 1st next preceding the commencement of his leave of absence provided, he returns to work within 90 days of his discharge from Military Service.
d) If the employee is entitled to a vacation before the date of his leave of absence, he may be given it then or it may be postponed until the end of the leave of absence. If he is not entitled to a vacation at the time he starts on his leave of absence but would be so on the date of his return, he may then be given the vacation to which entitled if he had worked through the leave period, upon evidence of satisfactory completion of his tour of active duty.

4. Voluntary Enlistment or Service Under Effective Selective Service Acts

All pertinent provisions of Section 3. above will apply to employees occupying positions who are called for service in the Armed Forces under the provisions of the effective Selective Service Act, or who voluntarily enlist in the regular components, thereof.

a) Leave of absence for such employees will be for the period for which called or enlisted, plus 90 days from the date on which released from such service, or from hospitalization continuing after discharge for not over one year.
b) The employee must apply for re-employment with the Company within 90 days from his discharge or hospitalization as aforesaid, and present certificate of satisfactory completion of his period of training and service.
c) If the Company is providing any medical coverage for the employee and/or his dependents, such coverage will be subject to suspension during the period of absence, except if the employee requests in writing that the coverage be kept alive. This will apply whether the coverage is for the employee only or for employee and dependents.

The employee will be expected to use the health care that his branch of the service provides for himself and his dependents.

5. General Provisions

An employee on military leave will not be entitled to pay for holidays or days sick occurring during his leave. Vacation with pay will depend on length of absence and time of year occurring.
An employee who is so injured while on military leave as to be unable to perform his Company assignment, or who will require further hospitalization after his normal release date, should not accept release from active service until he is able to resume work. He will not be accepted for work or be eligible for Company health benefits until certified as able to work by a Company doctor.

APPENDIX I

Educational Aid

Tuition Assistance Program Policy

Tuition assistance program highlights:

- Provides 100 percent reimbursement up to $10,000 annually {$5,250 non-taxable and $4,750 taxable) for successful completion of pre-approved courses.
- Part-time employees working 20 or more hours per week are reimbursed at 100 percent reimbursement up to $5,000 annually {$2,650 non-taxable and $2,350 taxable).
- Eligible expenses include tuition, lab, registration, technology, online, general service, matriculation, graduate, and resource fees.
- Fees that are excluded from reimbursement are: Books, computer software, tools, license fees, withdrawal, deferred payments, late fees, parking, meals, travel, room, and student activity fees.
- Only work- or business-related undergraduate and graduate courses and degree programs taken at fully accredited colleges and universities are eligible.
- A grade "C" or above for undergraduate courses is required for reimbursement.
- A grade "B" or above for master's program courses is required for reimbursement.
- Courses that lead to law degrees, medical degrees or PH. Ds are not eligible.

Employees are eligible immediately upon their first day of work. However, the employee must be an active employee prior to the start of the class and upon completion of the class.

Your nontaxable tuition reimbursement is processed through the Workday expense module and is reimbursed separately from your normal payroll, following the payment elections for expense reimbursement established on your personal record. You can view or edit this by selecting the "Pay" worklet from the Workday homepage, and then selecting "Payment Elections".

Any taxable reimbursement received in accordance with IRS tax guidelines will be included in your normal payroll and follow the payment elections established for your regular payroll payments.

Tuition reimbursement is not provided if:

- The course is not completed within the required time;
- The employee terminates employment before completing the course;
- Pre-approval is not received from their manager and Human Resources; or
- The request for reimbursement is not received by Human Resources within sixty days from the scheduled completion date of the course.

APPENDIX J

Schedule Of Hours And Schedules

Facilities Department Oct 1 – Mar 31: 7:00 A.M. to 3:30 P.M. Mon. thru Fri. Apr 1 – Sept 30:	All Individuals

6:00 A.M. to 2:30 P.M. Mon. thru Fri. Changes will be made at the beginning of the week closest to the dates or by mutual agreement. Shift Differential will be not be in effect for this agreement.	
Clerical 7:00 A.M. to 3:30 P.M. Mon. thru Fri.	All Individuals
Maintenance Department* 3:30 P.M. To 11:30 P.M. Mon. Thru Fri	
*Each of the four AWCs will have a three (3) person night shift to include an Operator. Two of these personnel should be fully qualified. Work will be assigned to the night shift at the company's discretion. If an employee assigned to the shift is unavailable for three days or less, the company will determine the need to backfill the position on the night shift. In no case where there be any less than two fully qualified personnel to staff the shift. The past practice regarding two-person work will prevail in each area. Night shift crews will not be moved from their AWC with the exception of back up emergency response (East to East/West to West), unless mutually agreed upon between the parties. If the area night shift is engaged in an emergency response, a call out shall be performed for any additional emergencies.

APPENDIX K

G.I. Bill Apprentice Program

The Company agrees on a voluntary Basis to participate in the Apprentice Program under the G.I. Bill.

Upon reasonable notice to the any affected employees, the Company reserves the right unilaterally to end participation in this program should the Company in its sole discretion decide that this is an appropriate step.

APPENDIX L

Educational Assistance

Confirming agreement reached during recent contract negotiation, the Company will provide up to $48,000 (up to $12,000 per year) for the purpose of an educational assistance plan for each dependent child of an employee who dies as a result of an accident on the job. This plan will be administered solely by the company and payment will be made upon submission to it of bills from the college in connection with room and board, fees, registration, tuition and books.

APPENDIX M

Dependent Death Benefit

Confirming the agreement reached during recent contract negotiations, dependents of employees who die, as a result of an accident on the job, shall receive hospital, dental and vision care benefits. Coverage for spouse will cease with remarriage, reaching age 65 or become covered under another group plan. Coverage for dependent children will cease same as active employees. Benefits to be paid at 100% by the Company.

MEMORANDUMS OF AGREEMENT

Memorandum of Agreement
Establishment of a Service Technician D Classification in the Meter Services Department

This shall be considered a Memorandum of Agreement between the Company and the United Steelworkers Union regarding the establishment of a Service Technician D Classification in the Meter Services Department.

1. The job specification of Service Technician D is accepted at the rate of pay outlined below prior to the April 1, 2010 General Wage Increase.

2. The Service Meter Technician (SMT) Classification converts to a Service Technician D classification, effective April 2, 2010.

3. Service Technician D
   Trainee: $22.17 (6) months
   Step 1: $24.98 (6) months
   Step 2: $27.33 (6) months
   Step 3: $29.13

4. Current SMT'S may elect to be grandfathered at their present location and present work schedule, as Service Technicians D without progression.

5. No more than three (3) Service Technicians D will be scheduled on a Monday-Friday, 1pm-9pm shift in each area. Selection criteria for the shift:

   a) Volunteers by seniority for the Service Technician D in the area.
   b) Junior (non-grandfathered) Service Technician D in the area will be forced.

6. There will be no more than a total of twenty (20) Service Technicians D across all four (4) areas.

7. There will be no more than five (5) Service Technicians D in each of the four (4) areas.

8. Areas = Hyde Park, Somerville, Southborough and Worcester.

9. The Company and Local will work together to develop and implement a Service Technician Training Program, similar to the Distribution Training Program.

10. The Company will determine the progression from Service Technician D to C.

    a) If employed as a Local 12004 Service Technician D for 18 months or longer, training time to advance will be: 12 months from C to B, 9 months from B TO A, contingent upon successful completion of required classes and OJT.
    b) If employed as a Local 12004 Service Technician D for less than 18 months, the standard training times will apply according to present contract language, contingent upon successful completion of the required classes an OJT.

11. Service Technicians D can make safe in accordance with the first responder training, such as evacuating and standing by for a Service Technician.

12. Once the Service Technician attains the B rate in his progression, he can isolate, red tag, and after calling for a Service Technician, determine if he can leave the job before the Service Technician arrives.

13. Service Technician D can repair leaks on the work he performs and other incidental leaks, i.e. swivels, unions or tightening the nuts.

RE: Grievance #022-084-001G – Contractor/Sewer

Dear Ms. Laflash:

In full and final settlement of grievance #022-084-001G, the Company and Local 12004 agree to the following:

a. If a pipeline contractor is utilized to repair a damaged underground utility after hours at the request of the Company, the Local 12004 Distribution Department will be offered "man for man" overtime hours equivalent to the hours worked by the pipeline contractor.

b. Paragraph A will remain in effect for a period not to exceed 12 months following the pipeline contractor's completion of the work that caused the damage to the sewer facility.

c. All emergency mark-out's associated with the sewer facility repair will remain with the Local 12004 bargaining unit.

d. The parties agree this will be a full and final settlement of Grievance 022-084-001G

Clerk Polling Process MOA

MEMORANDUM OF AGREEMENT

REVISED Gas Operations Clerk Polling Process

In accordance with the provisions of the principal agreement between NSTAR Gas Company d/b/a Eversource Energy (the "Company") and United Steelworkers, Local 12004 (the "Union") dated April 1, 2020, to March 31, 2024, and without waiving or modifying the rights of either party contained therein, except as specifically provided herein, the Company and the Local agree as follows:

1. In area work centers that have clerks reporting to more than a single department, vacancies will be filled in the following manner. Existing clerks in the departments outside of the department that has a vacancy will be offered the vacant position through a polling process based upon Union seniority prior to the job being posted.

2. If there are no area work centers that have clerks reporting to more than a single department, vacancies will be filled in the following manner. Existing clerks will be offered the vacant position through a polling process based upon Union seniority prior to the job being posted.

3. After the polling process in paragraphs 1 and 2 above is completed, the resulting vacant position will be posted internally by the department that has the vacancy.

4. Any vacancy remaining after paragraphs 1, 2 and 3 above have been completed will then be posted for external hire.

5. This Agreement applies to all local 12004 area work centers.

The parties agree this agreement is executed on a non-practice and non-precedent setting basis and may not be cited in any other case or settlement agreement.

Geothermal Pilot MOA

MEMORANDUM OF AGREEMENT
GEOTHERMAL PILOT

In accordance with the provisions of the principal agreement between NSTAR Gas Company d/b/a Eversource Energy (the "Company") and United Steelworkers, Local 12004 (the "Union") dated April 1, 2020 to March 31, 2024, and without waiving or modifying the rights of either party contained therein, except as specifically provided herein, the Company and the Union agree as follows:

On May 2, 2021, The Company submitted an implementation plan for the Pilot for the DPU's review (D.P.U. 21-53); and

The Company views the purpose of the Pilot is to yield information about and advance the knowledge of geothermal networks; and

The Parties view the Pilot as a key component to assist in meeting the Commonwealth and Company's climate goals; and

Recognizing that the Pilot is a first-of-its-kind in the country initiative, the Company is still assessing what trades and qualifications may be required to install AND operate/maintain a networked geothermal system.

NOW, THEREFORE, the parties hereto will agree to the following:

1. The Pilot in Framingham MA, will be installed, maintained, and operated by the Company's contractors for a period of two years following the completion of the installation.

2. The Company will utilize its existing represented work force to conduct any mark outs associated with the Pilot.

3. Where represented GIS Technicians currently perform GIS mapping of the Company gas facilities, the mapping of the Pilot will be conducted by those individuals. In all other areas, GIS drafting practices will remain unchanged.

4. The Company agrees to conduct field observations with Union Representatives to observe and understand the installation and maintenance requirements of the Pilot.

5. The Company will continue to meet with the Union to discuss and evaluate areas where current work force qualifications and capabilities may apply to the installation and maintenance of the networked geothermal program at the Company, pending regulatory approval of such program. The parties will also discuss future requirements of training and skill sets required to perform maintenance and installation of Geothermal systems.

The parties agree this agreement is executed on a non-practice and non-precedent setting basis and may not be cited in any other case or settlement agreement.

Service Relays-Dual Mains (10 Services) MOA

MEMORANDUM OF AGREEMENT
Service Re-Lays Grievances 019-210-002D and 020-077-001G

In accordance with the provisions of the principal agreement between NSTAR Gas Company d/b/a Eversource Energy (the Company) and USW Local 12004, The United Steelworkers, (the Union) dated April 1, 2020, and without waiving or modifying the rights of either party contained therein, except as specifically provided herein, the Company and the Union agree as follows:

1. The Union will have a right of first refusal for any streets associated with a project involving the transfer of existing gas services from one existing gas main to another existing gas main, regardless of the source of funding, where the services on a street within the project in totality involves the transfer of ten or fewer services from one existing gas main to another existing gas main.

2. The Company will notify the Union prior to assigning a contractor to transfer services from one existing main to another existing main regardless of the scope of the project.

3. The right of first refusal will be administered by the Company providing reasonable advance notice to the Union of upcoming projects. The parties anticipate that this reasonable advance notice will consist of local management advising the Chief Steward (or a designee) of an upcoming project in the ordinary course of work planning and scheduling.

4. This agreement does not otherwise alter the usual assignments made to the bargaining unit or to contractors, including the usual assignments associated with any project of ten services or fewer that is the subject of this agreement.

5. This agreement is a full and final settlement of all issues arising from Grievances No. 019-210-002D and 020-077-001G. The Union will withdraw those grievances with prejudice as fully and finally settled. Once withdrawn, none of the jobs provided by the Company or the Union included in these grievances will be used as past practice by either party in future disputes regarding the practices herein.

6. This agreement expires March 31, 2024 and can be renewed by mutual agreement of the parties.

7. This agreement sets no precedent and cannot be cited in any other matter except one specifically involving the interpretation or application of its terms.

RE: Grievance #020-321-001D Sunken Trench

Dear Ms. Laflash:

The parties, the Company and Local 12004, have met and agree to settle the above referenced Grievance as follows:

As a result of this hearing the parties agree that:

1. Contractors can make repairs to a sunken/failed trench during normal working hours, with an assigned inspector, including any hours associated with Appendix F. Any repairs to a sunken/failed trench outside of the Distribution Department's normal working hours, including any hours associated with Appendix F that requires mechanized equipment, will be performed by Local 12004. Any work performed by contractors under this agreement must be completed within the hours specified above.

2. Contractors can perform trench repairs up to 5 years from the completion of the project, excluding grinding and inlays.

3. This agreement applies only to sunken trenches that are a result of assigned contractor work. Sunken trenches which occur as a result of 12004 work will always be repaired by 12004.

This agreement is in full settlement of the above referenced grievance.

Very truly yours,

Peter Lewis

Worcester Agreement MOA

MEMORANDUM OF AGREEMENT

Grievance Settlement

In accordance with the provisions of the principal agreement between NSTAR Gas Company d/b/a Eversource Energy (the "Company") and United Steelworkers, Local 12004 (the "Union") dated April 1, 2020 to March 31, 2024, and without waiving or modifying the rights of either party contained therein, except as specifically provided herein, the Company and the Local agree as follows:

In full and final settlement of the following Grievances:

020-212-001W
020-143-001W
020-142-001W
020-132-001W

The parties hereby agree to the following:

1. A pilot program, exclusive to the Auburn work center, commencing the 1st of April 2022 and terminating on the 31st of December 2022. This pilot may be terminated by either party with 30-day written notice.

2. The Construction Inspector's primary role will be Contractor crew oversight. Tie in work (#3 in this agreement) will not interfere with the construction inspectors' duties of contractor crew oversight.

3. Worcester construction inspectors will participate in, but not be limited to:
   a. Main connections.
   b. Plastic to plastic tie ins up to 8", union has first refusal.
   c. Main retirements up to 8" using plastic poly valves, union has first refusal.

4. The Company and the Local will meet and create a list of tools which will support the execution of tapping, cutting, squeezing pipe, tie ins/connections and purging for Local 12004 Construction Inspectors. This tooling will be independent of the tooling provided for Auburn maintenance.

(Worcseter Agreeent, pg. 1 of 2)

(Worcester Agreement, pg. 2 of 2)

5. Contractors can perform the following:

a) Contractors can tap LP plastic services tees ½ - 2" in size.
b) Contractors can tap IP plastic tees ½ "- 1 ¼".
c) Contractors can assist with tapping equipment, exclusively the air drill on low pressure.
d) Contractors can exercise service valves while replacing or installing new or relayed services.
e) Contractors can stop the flow of gas through the service tee (shell cutter).
f) Contractors can purge services in and out of service.
g) Plastic service and main poly-valves are considered full stops and can be tied into. This will not be considered live gas. The use of Williamson, Mueller, and Kleiss equipment remains with the bargaining unit and will be considered live gas.
h) The following shall apply when tapping mains and services:

- Low Pressure Tapping
  - Plastic – ½ - 2" (contractors or 12004).
  - Steel and Cast Iron – 1 ¼ and 2." (contractors can assist with air drill).
- Intermediate Tapping
  - Plastic – ½"– 1 ¼" (contractors or 12004).
  - Plastic – 1 ¼" HVT - 2" HVT - (12004).
  - Steel and Cast Iron - ½" - 1" – (contractors or 12004).
  - Steel and Cast Iron – 1 ¼" - 2" (12004).

This agreement sets no precedent and may not be used or cited in any other proceeding between Eversource and Local 12004 except the one contained herein.

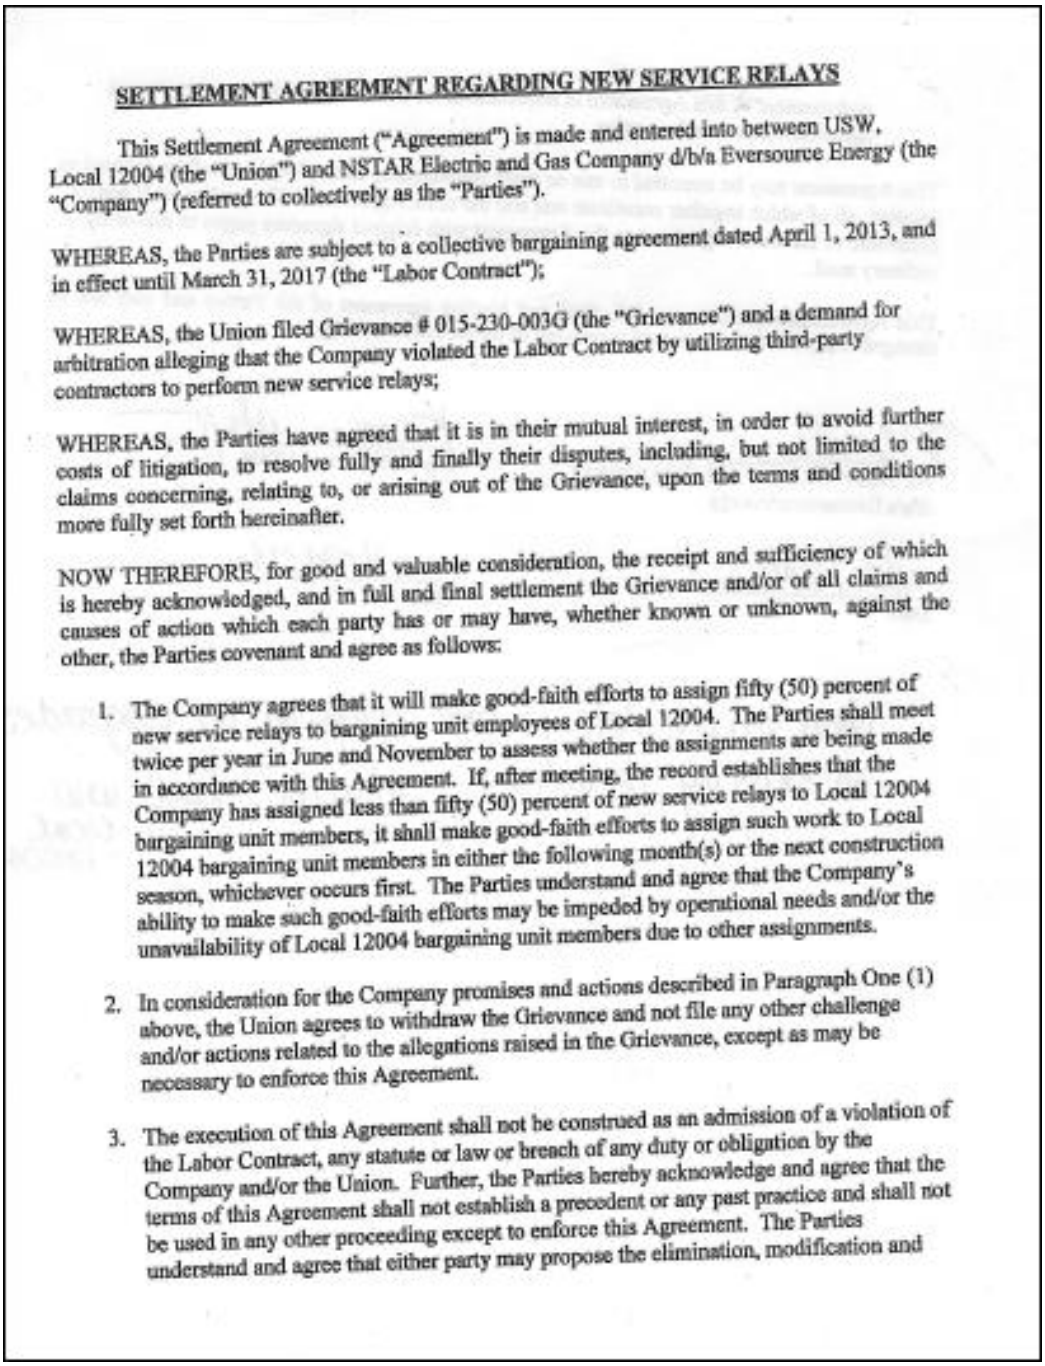
New Service Relays Settlement Agreement



SETTLEMENT AGREEMENT REGARDING NEW SERVICE RELAYS

This Settlement Agreement ("Agreement") is made and entered into between USW, Local 12004 (the "Union") and NSTAR Electric and Gas Company d/b/a Eversource Energy (the "Company") (referred to collectively as the "Parties").

WHEREAS, the Parties are subject to a collective bargaining agreement dated April 1, 2013, and in effect until March 31, 2017 (the "Labor Contract");

WHEREAS, the Union filed Grievance # 015-230-003G (the "Grievance") and a demand for arbitration alleging that the Company violated the Labor Contract by utilizing third-party contractors to perform new service relays;

WHEREAS, the Parties have agreed that it is in their mutual interest, in order to avoid further costs of litigation, to resolve fully and finally their disputes, including, but not limited to the claims concerning, relating to, or arising out of the Grievance, upon the terms and conditions more fully set forth hereinafter.

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, and in full and final settlement the Grievance and/or of all claims and causes of action which each party has or may have, whether known or unknown, against the other, the Parties covenant and agree as follows:

1. The Company agrees that it will make good-faith efforts to assign fifty (50) percent of new service relays to bargaining unit employees of Local 12004. The Parties shall meet twice per year in June and November to assess whether the assignments are being made in accordance with this Agreement. If, after meeting, the record establishes that the Company has assigned less than fifty (50) percent of new service relays to Local 12004 bargaining unit members, it shall make good-faith efforts to assign such work to Local 12004 bargaining unit members in either the following month(s) or the next construction season, whichever occurs first. The Parties understand and agree that the Company's ability to make such good-faith efforts may be impeded by operational needs and/or the unavailability of Local 12004 bargaining unit members due to other assignments.

2. In consideration for the Company promises and actions described in Paragraph One (1) above, the Union agrees to withdraw the Grievance and not file any other challenge and/or actions related to the allegations raised in the Grievance, except as may be necessary to enforce this Agreement.

3. The execution of this Agreement shall not be construed as an admission of a violation of the Labor Contract, any statute or law or breach of any duty or obligation by the Company and/or the Union. Further, the Parties hereby acknowledge and agree that the terms of this Agreement shall not establish a precedent or any past practice and shall not be used in any other proceeding except to enforce this Agreement. The Parties understand and agree that either party may propose the elimination, modification and

(New Service Relays pg. 1 of 2)

(New Service Relays pg. 2 of 2)

endorsement of this Agreement at negotiations for a successor collective bargaining agreement between the parties.

This Agreement may be executed in one or more counterparts, each of which shall be deemed as original, all of which together constitute one and the same Agreement. The parties shall accept electronic or facsimile signatures to the Agreement with original signature pages to follow by ordinary mail.

This Agreement represents the full, final and binding agreement of the Parties and may not be changed orally but only by mutual agreement of the parties in writing.

QA-QC Re-Dig Settlement MOA

MEMORANDUM OF AGREEMENT

QA/QC Re-Dig Settlement

In accordance with the provisions of the principal agreement between NSTAR Gas Company d/b/a Eversource Energy (the "Company") and United Steelworkers, Local 12004 (the "Union") dated April 1, 2017 to March 31, 2020, and without waiving or modifying the rights of either party contained therein, except as specifically provided herein, the Company and the Local agree as follows:

1. This Memorandum of Agreement is a full and final settlement of the arbitration case which arose from Grievance # 015-352-004G. Upon execution of this Memorandum of Agreement the Union will withdraw said case, with prejudice, as settled.

2. The Company and the Union agree that the Company's QA/QC re-dig program will continue to operate in its current capacity. However, going forward the parties agree to the following:

   a. The Distribution Department will provide an Inspector to QA/QC re-digs. The current practice of performing inspection duties regarding oversight on crews will continue.

   b. Calling in Digsafes, obtaining permits, Inspector lining up work, and scheduling police details which is usually done by bargaining unit employees will be done by the QA/QC contractor.

3. This agreement will be entered into on a no-practice non-precedent setting basis.

Meter Exchange Appointments MOA

MEMORANDUM OF AGREEMENT
Meter Exchange Appointments

In accordance with the provisions of the principal agreement between NSTAR Gas Company d/b/a Eversource Energy (the "Company") and United Steelworkers, Local 12004 (the "Union") dated April 1, 2020 to March 31, 2024, and without waiving or modifying the rights of either party contained therein, except as specifically provided herein, the Company and the Union agree as follows:

1. The Company will continue to send out high-volume batch letters in order to make meter exchange appointments.
2. If additional appointments need to be made, or appointments need to be rescheduled, the following order will be utilized:
   a. Local 12004 clerks
   b. Local 12004 Dispatchers

The parties agree this agreement is executed on a non-practice and non-precedent setting basis and may not be cited in any other case or settlement agreement.

Segmented Cutouts MOA

MEMORANDUM OF AGREEMENT
Grievance Settlement
#022-046-001G

In accordance with the provisions of the principal agreement between NSTAR Gas Company d/b/a Eversource Energy (the "Company") and United Steelworkers, Local 12004 (the "Union") dated April 1, 2020, to March 31, 2024, and without waiving or modifying the rights of either party contained therein, except as specifically provided herein, the Company and the Local agree as follows:

In settlement of the following Grievance: **#022-046-001G**

The parties hereby agree to the following:

1. When a government authority (Federal, State, Municipal) initiates a project that results in a requirement to relocate a segment, or multiple segments, of an Eversource gas main in a Local 12004 territory, the bargaining unit will have the right to first refusal for all associated work if the nominal diameter is 4 inches or below. If the Local waives this right, it will be upon mutual consent of the Area Operations Manager and the Local's Chief Steward, or their designees.

2. If the main to be relocated has a nominal diameter of 6 inches or above, the Company may assign the associated work to a pipeline contractor, or the bargaining unit if any street within the project includes five (5) or more relocations. If there are four (4) or less relocations on an assigned street within the scope of the project, the work, in totality will remain with the bargaining unit.

3. If, in any scenario, pipeline contractors install the pipe, the tie-in work will remain with the bargaining unit.

4. This agreement has no impact on the existing practices regarding the use of contractors under the affected cast iron program.

5. This agreement will remain in effect until 2034. Upon expiration of this agreement, the parties agree that the Local does not waive its rights under the CBA to grieve and arbitrate any and all work associated with this MOA. In any future arbitration proceedings concerning main relocations, the use of contractors pursuant to this agreement shall not be considered in determining the parties past practice.

RE: Grievance #022-033-001G I&R Area Change

Dear Mr. McGrail:

The parties, the Company and Local 12004, have met and agree to settle the above referenced Grievance. The parties agree to the following area coverage changes for the I&R Department:

1. The Auburn AWC I&R group will service:

   a. The regulator pit at Lake Street in Shrewsbury
   b. The regulator pit at South Street in Shrewsbury
   c. The telemeter on North Main Street in Northbridge
   d. The telemeter on Quaker Highway in Uxbridge
   e. The telemeter (TBD) in Douglas
   f. Sutton Take station

2. The Southboro AWC I&R group will service:

   a. Milford take station
   b. Hopedale take station
   c. The telemeter on Harris Street in Milford
   d. The telemeter on South Main Street in Milford
   e. The telemeter on Pleasant Street in Upton

This agreement is in full settlement of the above referenced grievance and is agreed upon by the parties on a one time non precedent setting basis.

Very truly yours,

Peter Lewis
Sr. Labor Relations Consultant

Brockton Dispatch Agreement

Memorandum of Agreement

Eversource Energy/U.S.W. Local 12004

Brockton Dispatch Agreement

January 29, 2025

In accordance with the provisions of the principal agreement date April 1, 2025, and without waiving or modifying the rights of either party thereto, except as specifically provided herein, the Company and USW Local 12004 agree as follows:

1. The Company agrees that the current dispatch employees in the Brockton AWC will become dues paying members and be represented by Local 12004 and will be covered under the local's bargaining agreement with the company as soon as practically possible after the signing of this agreement.

2. Union seniority will begin the date this agreement goes into effect. New members seniority within the Dispatch Department will be their start date as a Dispatcher. Company date of hire will used for purposes of picking vacation time.

3. New members pay rate will be adjusted to existing 12004 Dispatch rates effective the first pay period following the signing of this agreement.

4. Two separate dispatch units will be maintained in Brockton and Southborough and continue with their current duties until the groups move and consolidate into one Dispatch group. Once all employees from both groups are merged there will be a re-bid of all shifts based on Dispatch Department seniority and all employees will be under 12004 job responsibilities.

5. The Union agrees that the Clerk and Planner work currently being performed by Local 12004 employees within the 369 Plymouth and New Bedford service area will transfer to local 369 represented employees as soon as practically possible after the signing of this agreement. (An example of the Clerk and Planner work is attached).

6. The parties agree to a new Gas Dispatch Progression. Eligible candidates with "experience" will be defined as follows:

    - 2+ years Emergency Dispatching Experience - EMS/Police/Fire/Gas or Electric Utility
    - 2+ years of Meter Service Experience as a rated Technician working for Eversource
    - 2+ years of Call Center Experience working for Eversource

    A. Internal/external hire with experience

Brockton Dispatch Agreement continued

- Dispatcher C for a period of 2 months, not to exceed 3 months, employee will be eligible to take the Dispatcher B exam, if successful
- Dispatcher B for a period of 2 months, not to exceed 3 months, employee will be eligible to take Dispatcher A exam, if successful
- Dispatcher will become a Dispatcher A and will select an open shift at that time

B. Internal/external hire without experience

- Dispatcher C for a period of 3 months, not to exceed 3 months, employee will be eligible to take the Dispatcher B exam, if successful
- Dispatcher B for a period of 3 months, not to exceed 3 months, employee will be eligible to take Dispatcher A exam, if successful
- Dispatcher will become a Dispatcher A and will select an open shift at that time

(see training plan p. 5-10 attached.)

7. The Company will create a new Dispatch Trainer position represented by the union and will be an incremental addition to the Dispatcher roster. The rate of pay will be 7% over the top Dispatcher rate. The trainer will only perform training duties during their regularly scheduled shift and may perform or be required to perform Dispatcher duties outside of his/his regular schedule. Job Description attached

It is further agreed by both parties that this agreement sets no precedent and may not be cited in any other proceeding unless to enforce the term of this agreement.

Brockton Dispatch Agreement continued

9/6/24 SHEENA SEAN PAUL LLOYD ~~DAN~~ PLANNER WORK TO 369

1 of 2

1. These are the individual tasks that 12004 GIS Planners do in the territory of the 369 GIS Planners.

   A. Request for gas plans from approved recipients (Engineering and Survey Firms)
   B. Work Order Prep
   C. Main Closeouts as-builts

1-29-25

2. Estimated quantity/work volume associated with each task.

   A. 50-75 per year. Using GIS to ensure the area is updated with the latest records. If it is, then the GIS planner will have to create a PDF or multiple PDFs, depending on the size of the area, and then email the PDFs to the approved recipient. If the GIS is not updated, we will have to wait until it is completed and then create PDFs and email them. Then, a letter is prepared by the Clerks for the recipient to let them know that there is a cost to this process.
   B. 100 per year. The GIS Planners create a folder for each work order in our Planners' documents and attach all prep documents for each work order. First, we do an overview map and save it as a PDF. Second, we get a customer accounts list from CIS. Third, we get all the existing records for the area in the work order, then attach all the documents mentioned in the steps above to the work order in Maximo and save the documents in the folder.
   C. 65 per year. The GIS Planners must check if the project is pinned in GIS. Then check to see if we have all the DARs associated with the work performed and that we have all either pinned or in Docuware and/or in Maximo in the Work Order. If not, we go back to Gas Ops to retrieve them to complete our mapping. We will need to calculate the footage on the DARs to see if it matches the total footage written on the Capital Project Closeout Form. We compare that footage to GIS if the project has already been completed in GIS. We then need to calculate retired footage, separating them by materials type, size, and installed year. Compare that footage to the Capital Project Closeout Form and GIS. Make any corrections or further research if they are not a close match.

3. Calculate the number of person-hours to complete each task.

   A. 20 min. per request or about 17-25 person-hours
   B. 30-40 min. per Work Order or about about 50-67 person-hours
   C. 60-70 min. per Main Closeout or about 65-76 person-hours

Dispatch Training Rules

This notice is to confirm the department and union have agreed upon the following terms for Dispatch Training Rules:

- When there is no C Rates in training the following shift minimums will apply…
  - Monday-Friday on first shift minimum is 3 A-Rates, (CT/MA)
  - Second shift is 2 A-Rate, (CT/MA)
  - Third shift is 1 A-Rate in each area (CT/MA).
  - Holidays (Monday-Friday) Must maintain 1 A Rate dispatcher on all shifts. B Rate dispatcher can work only if no other A Rate dispatchers have accepted, (CT/MA.)
    - 2 dispatchers first shift. Second and Third shifts will keep the same minimums as bullet 2 and 3 above, (CT/MA).
  - If the minimums are not met, they must be required.
- For the first week as B Rated dispatcher, an A Rated dispatcher will be required on second shift and weekends.
- Dispatch must maintain 3 A rated dispatcher minimums on shifts when a C Rate dispatcher is working.
- An extra A Rated dispatcher will be added to the shift to support the C Rate dispatcher.
- The C Rate will follow their training schedule for the Area Work Centers and train with the respective A-Rate dispatcher for that area.

After a callout has been conducted and there are no available dispatchers that can be required, through mutual agreement with the Chief steward and Management, the dispatch minimums can be changed due to unforeseen circumstances.

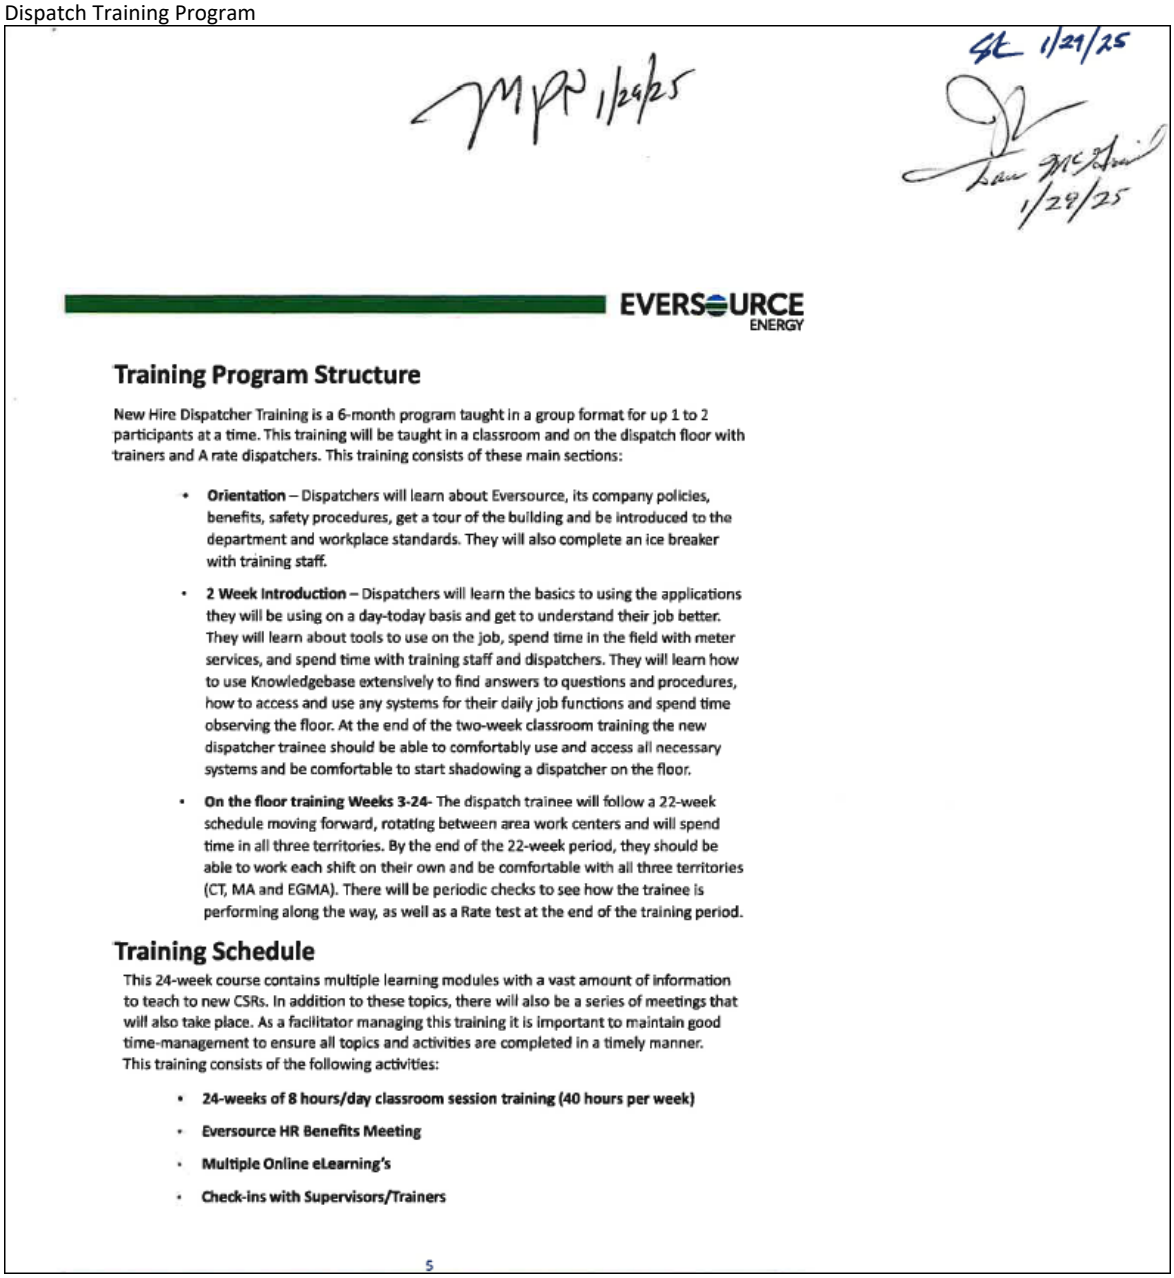
Dispatch Training Program



EVERSOURCE ENERGY

Training Program Structure

New Hire Dispatcher Training is a 6-month program taught in a group format for up 1 to 2 participants at a time. This training will be taught in a classroom and on the dispatch floor with trainers and A rate dispatchers. This training consists of these main sections:

- **Orientation** – Dispatchers will learn about Eversource, its company policies, benefits, safety procedures, get a tour of the building and be introduced to the department and workplace standards. They will also complete an ice breaker with training staff.
- **2 Week Introduction** – Dispatchers will learn the basics to using the applications they will be using on a day-today basis and get to understand their job better. They will learn about tools to use on the job, spend time in the field with meter services, and spend time with training staff and dispatchers. They will learn how to use Knowledgebase extensively to find answers to questions and procedures, how to access and use any systems for their daily job functions and spend time observing the floor. At the end of the two-week classroom training the new dispatcher trainee should be able to comfortably use and access all necessary systems and be comfortable to start shadowing a dispatcher on the floor.
- **On the floor training Weeks 3-24**- The dispatch trainee will follow a 22-week schedule moving forward, rotating between area work centers and will spend time in all three territories. By the end of the 22-week period, they should be able to work each shift on their own and be comfortable with all three territories (CT, MA and EGMA). There will be periodic checks to see how the trainee is performing along the way, as well as a Rate test at the end of the training period.

Training Schedule

This 24-week course contains multiple learning modules with a vast amount of information to teach to new CSRs. In addition to these topics, there will also be a series of meetings that will also take place. As a facilitator managing this training it is important to maintain good time-management to ensure all topics and activities are completed in a timely manner. This training consists of the following activities:

- **24-weeks of 8 hours/day classroom session training (40 hours per week)**
- **Eversource HR Benefits Meeting**
- **Multiple Online eLearning's**
- **Check-ins with Supervisors/Trainers**

5

- **Live Call Practice** – On day 15, Dispatch trainees will get a chance to take live calls to put in action what they have learned. Support and feedback will be provided.
- **OJT Support** – During the week following the -week training, trainers will provide support to the new CSRs while they take live calls on-the-job.
- **Knowledge Checks** - There will be knowledge checks placed throughout the training period to check the knowledge that was retained and learned after each area.

Weeks 3-24:

The dispatch trainee will rotate shifts based on the 6-month Breakdown. Please see your supervisor or Trainer for 6 months breakdown of shifts. The dispatch trainee will be assigned an AWC each week (refer to schedule) and will sit side by side with an A Rate Dispatcher. The dispatcher in training will be responsible for dispatching duties. The A Rate dispatcher will review information with the dispatcher and provide other scenarios for the trainee to simulate. The trainee will work on a variety of skills as logged on the first tab and monitor, incoming email updates, teams' chats and communicate with the other dispatchers and Dispatch Management, as necessary. The dispatch trainee will be given an AWC for a certain period. Depending on the size and difficulty of the AWC they may spend more or less time in each AWC. Please refer to the 6-month breakdown for a more in-depth training schedule for the dispatch trainee.
The dispatcher trainee will work a variety of shifts but will work 8 hours a day for 40 hours per week. Please see the 6-month breakdown below:

10

Training Coordinator, Gas Dispatch

EVERSOURCE ENERGY

POSITION PROFILE **Revised Date: November 7th, 2024**

Title:	Training Coordinator, Gas Dispatch	**Job Family**	Gas Operations

Role and Scope of Position:
In conjunction with management, the Dispatch Training Coordinator will work to develop and conduct the technical training program(s) to ensure the safe and effective performance of Gas Dispatch employees. Training includes both classroom and on-the-job training and would incorporate both conceptual and simulated instructional methods. Responsibilities also include participation in testing and evaluation of new tools, materials, and technology, the ongoing revision and maintenance of standards and procedures, multi state cross training requirements, as well as conducting of quality assurance reviews and provide feedback to assist with the certification of dispatch employees. Coordinates training and communication needs with others on behalf of the Gas Dispatch organization.

Essential Functions:

- Works with field personnel and supervisors to analyze job tasks and current field performance to determine training needs and program content.
- Effectively implements training program and quality audit program.
- Directs and instructs Dispatchers during classroom and on-the-job training assignments.
- Evaluates performance during training and follows up on students learning through observations, call monitoring and refresher training.
- Develops, implements. updates and incorporates new procedures and revisions into training programs and reviews with all impacted stakeholders including but not limited to, Dispatch Center, Customer Contact Center, technical experts, and field personnel
- Performs emergency Storm Duty as assigned/ERP assignments.

Working Conditions:

- Work is performed primarily in an office environment which requires mobility, and ability to use computers and telephones.
- Travel to other company locations between MA and CT may be required. Travel to other non-company locations to attend training may also be required.
- *This position is categorized as safety-sensitive for the purpose of drug testing. Successful applicants shall be subject to a pre-assignment drug test if the individual is currently in a non-safety sensitive position. As an employee in this position the individual shall be subject to random drug testing. A positive drug test will result in disciplinary action.*

Technical Knowledge/Skill/Experience:

- 5 years experience as a rated Dispatcher.
- Requires knowledge of gas utility, metering, regulations and safety standards and business processes.
- Demonstrated leadership and coaching abilities with the capability to direct the work of others.
- Ability to work in a high-pressure environment.
- Knowledge of customer service activities and customer relations.
- Good working knowledge of, or ability to learn, C2, CIS, Cognos, CAD systems, Clickschedule, ARCOS, OMNI, CalAMP and any other current or future Dispatch Related Programs.
- Excellent communication skills, ability to present concepts, as well as provide technical instruction with clarity, confidence and enthusiasm.
- Ability to use PC desktop applications and work with other systems that impact gas operations (e.g. Microsoft Office, Sharepoint and Power BI).

Training Coordinator, Gas Dispatch continued

EVERSOURCE ENERGY

POSITION PROFILE **Revised Date: November 7th, 2024**

Leadership Behaviors/Competencies:	
Set and Communicate Direction and Priorities	• Know the business plan and how your role connects to it • Identify problems, issues; take responsibility for resolution • Maintain high standards for self; deliver quality performance • Raise ideas for improvement • Effective communication
Build Trusting Relationships	• Follow through on commitments made to manager, colleagues, and customers. • Address difficult or controversial issues and encourage others to do the same. • Have honest dialogue with others
Manage and Develop People	• Works with Management to set performance goals that align with department and company goals • Meet regularly with your supervisor/manager to discuss your performance • Seek opportunities to develop skills and gain knowledge through on the job opportunities, i.e. working on projects, attending meetings, etc.
Foster Teamwork and Cross-functional Collaboration	• Work collaboratively within and across the organization to achieve "One Company" and other goals • Recognize and address cross functional implications of your work
Create a Diverse, Inclusive Workforce	• Incorporate the diverse ideas and perspectives of team, colleagues, and customers in your work
Lead Change	• Proactively seek out opportunities to improve business performance and customer service. • Respond positively to new demands or circumstances • Exhibit a "can-do" attitude to support changes in priorities and work processes
Focus on the Customer	• Deliver superior service to our customers, both internal and external, in a reliable, attentive, courteous, quality, proactive and timely manner

Dispatch Cross Training Rules

EVERSOURCE ENERGY

247 Station Drive
Westwood, Massachusetts 02090

August 23, 2024

Dispatch Cross Training Rules

This notice is to confirm the department and union have agreed upon the following terms for Cross Training Rules:

- A-rate dispatchers in cross training on first shift, will be assigned to an A-rate dispatcher while training on either MA or CT side. The A-rate dispatcher assigned to the trainee will NOT be assigned an area, only the area the A rated cross training dispatcher is working.
  - For example, if you have a minimum of 3 A rates for the first shift you DO NOT need to force an A-rate for the A-rate dispatcher in cross training.
- When a cross-trained dispatcher is moved to the other State (shift for shift) and a dispatcher is unavailable for their shift, the other dispatcher must go back to their home state and a call out will be conducted for the absentee dispatcher's home state.
  - Example: CT shift 7 for MA shift 7. If MA shift 7 is unavailable, CT shift 7 will return to CT and a call out will be conducted for MA shift 7. If no volunteers, the required overtime will be issued for MA.
- In the event the minimum is not satisfied on any shift after a callout has been conducted, and there is an A Rate dispatcher in cross training or in a shift rotation, and when possible, they must return to home state and the dispatcher that was training the dispatcher in cross training will cover the vacant area if they are trained in that area.
- During cross training a maximum of 2 weeks shift for shift rotation will be allowed to maintain state to state knowledge.
  - This is between states MA/CT not AWC (area work center)

After a callout has been conducted and there are no available dispatchers that can be required, through mutual agreement with the Chief steward and Management, the dispatch minimums can be changed due to unforeseen circumstances.

Dispatch Days of Relief

EVERSOURCE ENERGY

247 Station Drive
Westwood, Massachusetts 02090

August 23, 2024

REQUIRING ON DAY(S) OF RELIEF – 12004/GAS DISPATCH

This notice is to confirm the department and the union have agreed upon the following terms for requiring days of relief.

When all dispatchers (MA and CT) have completed the 8-week cross training program, the company will follow these guidelines pertaining to requiring on a day(s) of relief:

- The company will not require dispatchers to work on their day(s) of relief.
- Overtime hours must be offered to all eligible dispatchers.
- If the overtime shift is not accepted, the company will require a junior A rated dispatcher on the shift day.
- If the junior A rated dispatcher on shift has already worked 16 hours, the company will require the next junior A rated dispatcher on shift that has not worked 16 hours consecutively.
- The union agrees there may be extenuating circumstances that may result in requiring an A rated dispatcher on their day(s) of relief when all other options have been exhausted.

Re: Dispatch Scheduling Change

Dear Mr. McGrail:

As previously discussed, this letter is to confirm the following agreed upon upcoming scheduling changes in Dispatch will be in effect January 5, 2025:

- One combined overtime list.
- Schedule change from an 8am-4pm model to a 7am-3pm model.
- A schedule re-bid.

As usual, polling will be done in advance of the changes.

Respectfully,

Sean P. Keohan
Sr. Labor Relations Consultant

Dispatch Skipped Overtime Process

EVERSOURCE ENERGY

247 Station Drive
Westwood, Massachusetts 02090

November 7, 2024

Gas Dispatch Skipped Overtime Process

This notice is to confirm the department and union have agreed upon the following terms for a skipped overtime process:

The dispatch supervisors shall follow the overtime process in awarding overtime for open shifts. In the event a dispatcher was skipped in the overtime process these are the steps to follow.

- The dispatch manager must be contacted immediately by the dispatch supervisor, when discovered an employee was skipped in the overtime process.
- The dispatch supervisor must fill out the information on the "skipped overtime spreadsheet" in SharePoint/Teams with all documented information.
  - All dispatchers will have "read only" access in SharePoint/Teams.
  - Only the dispatch supervisors will add/edit the information.
- The dispatcher and the dispatch supervisors will work together to schedule the dispatcher who was skipped to work the shift.
  - Once the skip was identified and brought to the attention of the dispatcher and supervisor the shift must be scheduled within 2 weeks.
  - The shift must be worked no later than 8 weeks from the date identified and brought to the attention of the dispatcher and supervisor.
    - Special circumstance may arise that prevent the 8-week deadline, and these should be handled on a case-by-case basis.
- If the shift is not worked within 8 weeks from the date the dispatch supervisor approves the skip will be forfeited by the employee.
- The owed overtime can't be work in less than 2-hour increments unless the amount remaining is less than 2 hours. If the amount remaining is less than 2 hours, all hours must be worked in one shift and can't be split.

When a dispatcher is working on owed/skipped overtime and a scheduled dispatcher calls out last minute, dispatch will follow the current process for replacing that dispatcher, including a force or a hold. The dispatcher working on owed/skipped overtime is not to be used to replace an open overtime shift unless all options have been exhausted.
Skipped overtime hours will be charged to the employee the same as all overtime hours are charged.

Welder Guideline Agreement

Eversource Energy/USW Local 12004
Welding Guideline Agreement
December 23, 2004

In accordance with the provisions of the principal agreement dated April 1, 2024, and without waiving or modifying the rights of either party thereto, except as specifically provided herein, the Company and USW Local 12004 agree as follows:

1. REPAIRS – All welding associated with Gas Piping repair work to an existing I&R facility (i.e. leaks, severe corrosion repairs, etc.) that requires welding will be executed by L12004 welders.

2. STATION INSTALLATIONS & REPLACEMENTS – When a Gas Regulating station is replaced in its entirety, or a new facility is installed, the company retains the right to utilize Local 12004 or contract welders for station fabrication work.

3. UPGRADE PROJECTS – When any District Regulator is upgraded, and welding work is required, the following provisions apply:

a. When gas piping modifications are necessary for equipment changes, flange by flange spool pieces necessary to complete the projects will be first offered to Local 12004 Welders.

b. The company agrees to review the work plan annually with the welders. If any of the work requires on-site fabrication, the company will distribute the jobs such that a minimum of 50% are assigned to Local 12004 Welders per year. This includes installation of third regulator vaults.

c. In all instances, off-site prefabrication of vaults and associated piping within the vault can be assigned to either Local 12004 welders or contractors.

4. All welded fittings for tie-ins to live gas mains will be performed by L12004 welders subject to the provisions of the current CBA.

RE: Grievance #021-069-001W Pre-Fab Meter Fits

Dear Ms. Laflash:

A meeting took place at the Southboro area work center on October 13, 2021. President K. Laflash, Vice President D. McGrail and Secretary M. Auclair represented Local. Vice President C. Hall, Director M. Needham, Director D. Henry, Director K. Richey and the undersigned represented the Company.

As a result of this hearing the parties agree that:

1. The Company may purchase and use prefabricated meter fits.
2. The practice of fabricating, assembling and installing meter fits in Southboro and Auburn will remain with Local 12004 Welders. However, if the Company determines that a prefabricated meter fit is required due to operational constraints the Company may utilize one.

This agreement is in full settlement of the above referenced grievance.

Very truly yours,

Peter Lewis
Sr. Labor Relations Consultant

General

Section 1. The Company recognizes Local 420 as the exclusive collective bargaining representative with respect to rates of pay, hours of employment and other conditions of employment for employees in the former Torrington bargaining unit of The Hartford Electric Light Company who were on the eligibility list for voting in the NLRB election in case number 1-RC-5243 and any employee hired or permanently transferred to replace any such employee and any additional personnel covered by the provisions of Section 2 hereof.

Section 2. If (a) additional personnel are hired for, or Company personnel are transferred permanently to, classifications included in the bargaining unit description in case number 1-RC-5243 or classifications added to the coverage of this Agreement, and (b) such personnel are assigned to the same reporting headquarters as any employee on said eligibility list or a reporting headquarters within the Towns of Torrington, New Hartford, Burlington, Thomaston or Plymouth, Connecticut, they shall become members of the bargaining unit and shall be added to the group referred to in Section 1 hereof, as of their date of hire, if newly hired, or as of their date of transfer, if permanently transferred. Nothing in this Article shall be deemed to require the hiring or transfer of personnel.

Section 3. An employee covered by Section 1 above who is permanently transferred to any reporting headquarters of the Company which was not the reporting headquarters of any of the employees on said eligibility list or to any position not included in the classifications set forth in Appendix A of this Agreement, shall cease to be a member of the bargaining unit as of the date of such transfer, but such employee shall retain seniority rights in the event of layoff for one year as provided in Section 4 of Article V. If a currently recognized reporting headquarters within the Torrington Bargaining Unit is relocated in the Towns of Torrington, New Hartford, Burlington, Thomaston or Plymouth, Connecticut, recognition herein will extend to all employees at such reporting headquarters with respect to job classifications appearing in Appendix A, Nomenclature, or in any other classification added to the Unit by agreement of the parties.

Section 4. By way of example as to the application of this Article, employees now or hereafter covered by Section 1 hereof who are permanently transferred to any service center located outside the above-mentioned town will cease to be members of the bargaining unit in accordance with Section 3 hereof. Similarly, a meter shop repairman now covered by Section 1 hereof who is permanently transferred to the Company's meter shop in Hartford where it is contemplated to centralize meter repair work, will cease to be a member of the bargaining unit. There shall be no personnel added to the bargaining unit in connection with either such change in the Company's operations. By way of further example, in the event of a change in the reporting headquarters in Torrington, from one location to another within the Towns of Torrington, New Hartford, Burlington, Thomaston or Plymouth, Connecticut, the employees permanently transferred from their present reporting headquarters in Torrington to such new reporting headquarters will not result in such employees ceasing to be members of the bargaining unit.

Section 5. In the event of any dispute between the parties as to whether an individual is a member of the bargaining unit or not, such dispute shall be handled under the grievance procedure of this Agreement except that if the grievance shall not have been satisfactorily disposed of after the meeting with the Grievance Committee under Section 4 of Article IV of this

Agreement, instead of proceeding to arbitration as therein provided, the dispute shall be resolved by joint submission of the bargaining unit issue to the National Labor Relations Board through the filing of a Motion for Clarification on the Certification.

ARTICLE I
New London
General

The Company recognizes Local 457, IBEW as the exclusive representative of all employees in the former New London bargaining unit of The Hartford Electric Light Company, as were certified by proper authorities for the purpose of collective bargaining in respect to rates of pay, wages, hours of employment or other conditions of employment.

Middletown

This Agreement, dated as of June 1, 2016, is between The Connecticut Light and Power Company, hereinafter referred to as the Company, as the Successor to The Hartford Electric Light Company and Local 457 of the International Brotherhood of Electrical Workers, AFL-CIO, hereinafter referred to as the Union, in respect to the bargaining unit certified by the National Labor Relations Board on April 2, 1959, in case number 1-RC-5240, and which is described under Article I below and hereafter referred to as the "Middletown Bargaining Unit."

ARTICLE I
Middletown
General

Section 1. The Company recognizes the Union as the exclusive collective bargaining representative of those employees who were on the eligibility list for voting in the NLRB election in case number 1-RC-5240 and any employee hired or permanently transferred to replace any such employee and any additional personnel covered by the provisions of Section 2 hereof.

Section 2. If (a) additional personnel are hired for, or Company personnel are transferred permanently to, classifications included in the bargaining unit description in case number 1-RC-5240 or classifications added to the coverage of this Agreement, and (b) such personnel are assigned to the same reporting headquarters as any employee on said eligibility list or a reporting headquarters within the Towns of Middletown, Middlefield, Durham, Haddam, Portland, or Cromwell, Connecticut, they shall become members of the bargaining unit and shall be added to the group referred to in Section 1 hereof, as of their date of hire, if newly hired, or

as of their date of transfer, if permanently transferred. Nothing in this Article shall be deemed to require the hiring or transfer of personnel.

Section 3. An employee covered by Section 1 above who is permanently transferred to any reporting headquarters of the Company which was not the reporting headquarters of any of the employees on said eligibility list or to any position not included in the classifications set forth in Article V of this Agreement, shall cease to be a member of the bargaining unit as of the date of such transfer, but such employee shall retain seniority rights in the event of layoff for one year as provided in Section 4 of Article V. It is understood that the designation of a new or different reporting headquarters within the Towns of Middletown, Middlefield, Durham, Haddam, Portland, or Cromwell, for any of the employees on said eligibility list shall not be deemed a reporting headquarters which was not the headquarters of any of the employees on said eligibility list.

Section 4. By way of example as to the application of this Article, employees now or hereafter covered by Section 1 hereof who are permanently transferred to any service center located outside the above-mentioned towns will cease to be members of the bargaining unit in accordance with Section 3 hereof. Similarly, a meter shop repairman now covered by Section 1 hereof who is permanently transferred to the Company's meter shop in Hartford where it is contemplated to centralize meter repair work, will cease to be a member of the bargaining unit. There shall be no personnel added to the bargaining unit in connection with either such change in the Company's operations. By way of further example in the event of a change in the reporting headquarters in Middletown, from one location to another within the Towns of Middletown, Middlefield, Durham, Haddam, Portland, or Cromwell, the employees permanently transferred from their present reporting headquarters in Middletown to such new reporting headquarters will not result in such employees ceasing to be members of the bargaining unit.

Section 5. In the event of any dispute between the parties as to whether an individual is a member of the bargaining unit or not, such dispute shall be handled under the grievance procedure of this Agreement, except that if the grievance shall not have been satisfactorily disposed of after the meeting with the Grievance Committee under Section 4 of Article IV of this Agreement, instead of proceeding to arbitration as therein provided, the dispute shall be resolved by joint submission of the bargaining unit issue to the National Labor Relations Board through the filing of a Motion for Clarification on the Certification.

1.(l.) **The Company recognizes Local 420-IBEW as the sole collective bargaining representative with respect to wages, hours, and other conditions of employment for all full-time and regular part-time Division Administration Representative A and Senior Division Administration Representative employees employed by the Employer at its Norwalk, Connecticut facility; but excluding all other employees, and guards, professional employees and supervisors as defined in the Act. Recognition is granted pursuant to the Stipulation of Representation dated October 11, 2016 (case number 01-RC-185500).**

Definition of an employee

1. The word "employee" as used in this Agreement refers only to regular employees in the bargaining unit. Regular employees are employees hired on a full-time or part-time basis for continuing nontemporary work in an established job classification.

2. A temporary employee is one hired for a special project of limited duration not to exceed twelve (12) months, unless a longer period is agreed to by the Company and the Union. Employees changed from temporary to regular employee status shall have their Teal Book Seniority count from the first date of their most recent employment as a temporary employee. Any time served as a temporary employee shall be considered as a part of the probationary time required.

ARTICLE I
Engineering Designer and Distribution Design Engineer Units

The Company recognizes the Union as the sole collective bargaining representative with respect to wages, hours, and other conditions of employment for all full-time and regular part-time senior circuit owners, circuit owners and large and complex construction engineers, senior engineers, assistant engineers, associate engineers, engineering technologists, associate engineering technologists, senior engineering technologists, engineering specialists, and senior field technicians, employed by Connecticut Light & Power Company throughout the State of Connecticut, excluding guards, clerical and confidential employees, and supervisors as defined in the Act. Recognition is granted pursuant to the Certificate of Representative of the National Labor Relations Board in case number 01-RC-112451 dated December 13, 2013.

ARTICLE IA
General

Section 1. The Union agrees that its members who are employees of the Company will individually and collectively perform efficient work and service, and that they will avoid and discourage waste of materials, time and manpower, and that they will use their influence and best efforts to protect the property of the Company and its interests and to prevent loss of tools and materials, and that they will cooperate with the Company in promoting and advancing the welfare of the Company and the service at all times.

Section 2. Employees who were members of the Union in Stamford on June 21, 1968, in New London on May 22, 1968, in Torrington and Middletown on July 1, 1976, or who later become members, will as a condition of employment be required to maintain their membership for the duration of this Agreement.

(a) Employees hired or transferred into the Bargaining Unit in Stamford after June 21, 1968, in New London after May 22, 1968, in Torrington and Middletown after July 1, 1976 will be required as a condition of employment to join or make application to join the Union thirty days from their date of employment or transfer or thirty days after the date this Agreement is executed, whichever is later.

(b) Stamford employees on June 21, 1968, New London employees on May 22, 1968 or Torrington and Middletown employees on July 1, 1976 who were not members of the Union in their respective areas are exempt from the provisions of Article II, Section 3 above.

(c) If the Union refuses to accept as a member or refuses to continue the membership of any employee for any reasons other than the failure to pay or tender payment of required initiation fees and periodic dues, the employee shall be exempt from the provisions of Article II, Section 3 above. It shall be the responsibility of the Union to solicit the membership of employees who are required to join the Union under Article II, Section 3. Should the Union fail to solicit the membership of an employee within the time period prescribed in Article II, Section 3, that employee shall be exempt from the provisions of Article II,

Section 3 until the first day of the calendar month within which the employee's membership is first solicited by the Union.

(d) Should an employee fail or refuse to join the Union or maintain membership therein as hereinbefore provided, the Union may request the Company to discharge such employee. The request shall be submitted in writing to the Director-Labor Relations. Two weeks from the date of receipt of the request, unless the Company has notified the Union that the matter is in dispute, the employee will be discharged. If during the two week period the employee complies with the Union membership provisions of this Article, the Company will not be obliged to discharge the employee.

(e) If a dispute arises under Article II, Section 3 hereof concerning the discharge of an employee, the Director-Labor Relations and the Business Manager of the Union shall ascertain the facts and endeavor to settle the dispute. Pending settlement of the dispute, the Company will not suspend or discharge the employee concerned. If the dispute is not settled within thirty calendar days, (subject to extension by mutual agreement), from date of receipt of the Union's written request for discharge as provided in Article II, Section 3 hereof, either party may, within the next ten calendar days following the thirty calendar day period, submit the dispute to Arbitration for final settlement as provided in Article IV.

Section 3. Each new employee shall upon the commencement of employment be given a copy of the collective bargaining Agreement, informed that the Company has recognized the local Union as the exclusive bargaining representative of all employees in the bargaining unit, and introduced to the Union steward or other Union official employed in the same department or unit.

ARTICLE II
Recognition And Union Membership

Section 1. Recognition of Union

1. (a) The Company recognizes the Union as the exclusive bargaining agent for all employees in job classifications listed in Appendix "A" of this Agreement.

1. (b) The Company and Union agree to continue their cooperative efforts to promote safety, efficiency and harmony among all the employees and to promote and advance the welfare of the Company and the service at all times.

The Union agrees that its members, who are employees of the Company, will individually and collectively continue to avoid and discourage waste of materials, time, and manpower, and that they will use their influence and best efforts to protect the property of the Company.

1. (c) Each Local Union shall notify the Company in writing of the identity of its elected and appointed representatives and, in the event of a change of any representative, shall notify the Company of such change promptly. Notices to the Company under this provision shall be directed to the Director - Labor Relations.

Section 2. Exclusive Bargaining Agent for New Job Classifications

If at any time during the term of this Agreement, or any renewals or extensions hereof, the Company shall recognize the Union as the exclusive bargaining agent of the employees in any job classification in addition to those specified in Section 1.(a) of this Article, all of the provisions of this Agreement shall become applicable to the employees in such job classification as though such job classification had been originally designated herein, except that the rates of pay applicable to such job classification shall be such as may be agreed upon between the Company and the Union.

Section 3. Union Membership Requirements

The following provisions will apply to employees in job classifications covered by this Agreement:

3. (a) Employees who are members of the Union or its predecessor Union on June 1, 2009, or who later become members, will as a condition of employment be required to maintain their membership for the duration of this Agreement.

3. (b) Employees hired or transferred into the bargaining unit will be required as a condition of employment to join or make application to join the Union thirty days from their date of employment or transfer or thirty days after the date this Agreement is executed, whichever is later. Employees hired for temporary summer assignment are excluded from this requirement for an additional sixty-day period in that summer and in any subsequent summers of temporary employment from their date of employment.

3.(c) If the Union refuses to accept as a member or refuses to continue the membership of any employee for any reasons other than the failure to pay or tender payment of uniformly required initiation fees and periodic dues, the employee shall be exempt from the provisions of (a) and (b) above. It shall be the responsibility of the Union to solicit the membership of employees who are required to join the Union under Section 3.(b). Should the Union fail to solicit the membership of an employee within the time period prescribed in (b), that employee shall be exempt from the provisions of (b) until the first day of the calendar month within which the employee's membership is first solicited by the Union.

3.(d) Should an employee fail or refuse to join the Union or maintain membership therein as hereinbefore provided, the Union may request the Company to discharge such employee. The request shall be submitted in writing to the Director-Labor Relations. Two weeks from the date of receipt of the request, unless the Company has notified the Union that the matter is in dispute, the employee will be discharged, provided that, if during the two week period the employee complies with the Union membership provisions of this Section 3., the Company will not be obliged to discharge the employee.

3.(e) If a dispute arises under Section 3.(d) hereof concerning the discharge of an employee, the Director-Labor Relations and the respective Business Manager of the Union shall ascertain the facts and endeavor to settle the dispute. Pending settlement of the dispute, the Company will not suspend or discharge the employee concerned. If the dispute is not settled within thirty calendar days, (subject to extension by mutual agreement), from date of receipt of the Union's written request for discharge as provided in Section 3.(d) hereof, either party may, within the next ten calendar days following the thirty calendar day period, submit the dispute to Arbitration for final settlement as provided in Article IV.

Section 4. Union Dues and Initiation Fees

4.(a) Each Local Union shall notify the Company in writing of its required amounts of membership initiation fees and monthly dues. In the event such fees or dues are to be changed during the term of this Agreement, the Local Union concerned shall give the Company written notice in advance of such change. Notices to the Company under this provision shall be directed to the Director-Labor Relations.

4.(b) Upon receipt of individual written authorization and assignment from employees in job classifications listed in Appendix "A" the Company will make a single deduction for the required initiation fee and in addition will deduct required monthly Union dues from the employees' wages on a pay period basis and remit monthly to the Local Union Officers designated in writing by each Local Union. Authorizations shall be submitted in the form and language shown in Appendix **"**B**"** attached hereto and made a part of this Agreement. If an employee is transferred out of the bargaining unit, the employee's authorization for the payroll deduction of Union dues will automatically become void at the end of the calendar month within which the employee's transfer is effective.

4.(c) The Company will deduct from the wages of each employee on a pay period basis from whom it receives written authorization, voluntary contributions to the Union's COPE fund. Such deductions shall be remitted to the financial secretary of the Union monthly, along with a list of employees and amounts so deducted.

Section 5. Nondiscrimination Clause

It is agreed that neither the Company nor the Union will discriminate against any employee in application of any of the terms of this Agreement because of race, color, religion, sex, national origin, age, ancestry, marital status, familial status, sexual orientation, disability/handicap, military status, genetic information, Vietnam era veterans, disabled veterans, and other veterans.

ARTICLE III
The Functions Of Management

In order that the Company may discharge its obligations as a public utility and furnish dependable and satisfactory service to its customers, it is mutually agreed that the Company shall exercise the functions of management, including among other things the determination of the number and the qualifications of the employees required to perform the work, the direction of the working forces, the right to hire, suspend or discharge for just cause, promote, demote, transfer, discipline and lay off employees. In exercising these rights the Company will act in accordance with the provisions of this Agreement.

ARTICLE IV
Grievances

Section 1. Weingarten

Employees have the right to have a union representative present during any investigatory interview/meeting which the employee reasonably believes may result in disciplinary action.

Section 2. Open-Door Policy

Management will discuss problems or potential problems with Business and Assistant Business Managers. In a letter to the Local Union the Company stated it has always believed in an "open-door" policy regarding its treatment of employee problems and contemplates no change in that policy. Under such a policy, an employee or an employee's representative in the person of a Union Business Manager or Assistant Business Manager is welcome to discuss problems or potential problems with management at any reasonable time.

The Company agrees with the Union that it is mutually advantageous to avoid grievances whenever possible by prompt investigation and appropriate adjustment where indicated.

Section 3. Introduction to Grievance Procedure

Any complaint made by an employee to the employee's immediate Supervisor concerning the employee's wages, hours or working conditions which is accompanied by a request for an answer will be considered as a grievance for the purpose of this Article. Grievances should be presented as promptly as possible following the incidents that caused them. At such times as are mutually agreeable, an aggrieved employee and, if requested by the Business Manager of the Local concerned, an employee from within the Local area concerned, other than the aggrieved, will be allowed time to discuss grievances with management in Steps One, Two or Three without loss of pay for normal schedule work hours providing overtime replacement is not required. This same provision will apply also for a Steward, Business Manager or Assistant Business Manager if the employee wishes one to appear with the employee in Step One, or for a Business Manager or the employee's designated representative or an Assistant Business Manager in Step Two, or for a Business Manager or the employee's designated representative in Step Three.

In order that any grievance by an employee or group of employees may be promptly and satisfactorily settled, the procedure outlined below shall be followed:

Section 4. Step One

The aggrieved employee or employees in person, who may be accompanied by a Steward, Business Manager or Assistant Business Manager, shall present the grievance to the immediate Supervisor as promptly as possible following the incident which caused it. The immediate Supervisor will endeavor to settle it by giving an answer as promptly as possible and within seven calendar days of the date of presentation. If an answer is given and accepted in this Step, the grievance is to be considered closed. If an answer is not given, or is not acceptable, it may be taken to Step Two within fifteen calendar days, (subject to extension by mutual agreement), from date of presentation in this Step.

Section 5. Step Two

The Business Manager or Assistant Business Manager shall forward the grievance in writing to the Manager concerned stating its nature, specifying the provision(s) of the Agreement on which it is based and giving a brief description of the circumstances causing it. The Manager concerned or the employee's designated representative will investigate the grievance and answer it as promptly as possible. If a meeting is held in this Step, it shall be attended by the Business Manager or Assistant Business Manager who presented the grievance, the Manager

concerned or the employee's designated representative, other management representatives if concerned and, at the option of either the Company or the Union, the aggrieved employee(s) shall be present. At this Step in the procedure, there also may be present either an International Representative of the Union in an advisory capacity to the Local Union, or a Representative of the Labor Relations Department of the Company, or both.

In the event a Business Manager has factual and reasonable evidence that the Company has violated a provision(s) of this Agreement and the employee(s) affected fails to present a grievance in Step One, then the Business Manager, having first notified the employee(s) affected, may initiate a grievance in this Step at any time within a period not in excess of thirty calendar days, (subject to extension by mutual agreement), from the date of the claimed violation.

The Company will furnish written answers to the Union for grievances which are concluded with adjustment in Step Two. When grievances are concluded in Step Two without adjustment, the Union will so-notify the Company in writing.

If a grievance is not settled within ten calendar days from date of receipt in this step, it may be taken to Step Three within twenty-five calendar days, (subject to extension by mutual agreement), from date of such receipt.

Section 6. Step Three

The Business Manager shall forward a copy of the written grievance identified as being in Step Three, to the Director - Labor Relations. The latter shall refer the grievance to a joint committee consisting of:

(A) three representatives appointed by the Company, and
(B) three representatives appointed by the Union, one shall be the Business Manager of the Local Union concerned, and/or the employee's designated representatives. In addition an International Representative may be present in this Step in an advisory capacity to the Local Union.

6.(a) **Designee to Appear for the International Representative** - An International Representative may designate an alternate representative to appear for the employee in Step Three grievance meetings with the Company, provided advance confirmation of this arrangement is set forth in letters to be exchanged by the International Vice-President of the International Brotherhood of Electrical Workers, second district, and the Director of Labor Relations, of the Company. Such letters shall confirm the status of the alternate representative, who shall be a bargaining-unit employee of the Company, as having authority to represent the International Union. The alternate representative will, at such times as are mutually convenient, be excused from the employee's normal work assignment without pay from the Company for the purpose of discussing Step Three grievances with Company representatives.

The Joint Committee shall endeavor to meet within fifteen calendar days from the date the grievance is received by the Director - Labor Relations. It shall be the duty of the Joint Committee to investigate all of the circumstances surrounding the grievance and endeavor to settle it on a factual basis, including the method and manner of complying with decision.

6.(b) **Notifications Required When Grievances are Concluded** - The Company will furnish written answers to the Union for grievances which are concluded with

adjustment in Step Three. When grievances are concluded in Step Three without adjustment, the Union will so-notify the Company in writing.

6.(c) **Filing of a Union or Company Grievance** - At this Step in the grievance procedure, a "Union Grievance" or a "Company Grievance" may be initiated. Such a grievance shall consist of a claim or charge by the Union or the Company, in writing, that a specified provision of this Agreement, involving the status, rights, privileges, or duties of the Union as an organization or of the Company as management has been violated. If a "Union Grievance" is presented, it shall be forwarded in the manner specified in the first paragraph of this Step. If a "Company Grievance" is initiated, it shall be forwarded by the Director - Labor Relations to the Business Manager of the Local Union concerned and the International Representative who shall refer the grievance for settlement to a joint committee as provided in this Step.

If the grievance is not settled within thirty calendar days from the date of receipt in this Step, either party may take it to arbitration in accordance with and subject to the provisions of Article IV hereof within forty calendar days, (subject to extension by mutual agreement), from the date of receipt in this Step.

Section 7. Time Off For Grievance

Employees will be allowed necessary time off without loss of pay for attending scheduled grievance discussions with the Company at the second or third step. In addition to the time allowed above, the Assistant Business Manager or, in the employee's absence, the employee's designated representative, will, upon specific request, be allowed necessary time off to assemble data for scheduled grievance meetings.

Additional time off without pay will be allowed to not more than two representatives each from the **Torrington Unit, Stamford Unit, New London Unit, Falls Village Unit, Simsbury Unit, Hartford Unit, Middletown Unit, Madison, Torrington Blue, East Hampton, Tolland, Danielson, Cheshire, Newtown, Waterbury, Greenwich, Norwalk, Berlin, Eastern Projects, Central Projects, Western Projects, General Operations, Transmission Harbor Avenue, Transmission Mattatuck Heights, Transmission Sequin Drive** and two additional representative at large (upon written request by the Union) for the time required to attend state, regional, and national labor conventions.

Section 8. Grievance Committee/ Major Policy Changes

The Company and Union shall have the right to use Section 3 of this Article of the grievance procedure including arbitration, to settle any alleged violation or dispute over the interpretation or application of any provision of this Agreement. In such case, if the matter in question is one of major policy and Companywide application, and if the provisions in question are identical in all Agreements, the Grievance Committee may, by mutual consent, be increased to eight persons representing the Union and eight persons representing the Company. This clause shall not be used to circumvent the grievance procedure as provided in Section 1 hereof, which must be followed in any matter which involves individual employees.

Section 9. Failure To Pursue Or Respond

Any grievance not presented or followed up through the grievance procedure above outlined shall be deemed waived. If at any step in the grievance procedure the Company fails

to give its answer within the prescribed time, the grievance will automatically proceed to the next step unless the time is extended by mutual consent.

Section 10. Precedent Setting

Where either party so states in writing in the disposition of a matter not submitted to arbitration under the grievance procedure, the acceptance of the action or disposition shall not be binding on either party as a precedent for the future on the same or related matters.

Section 11. Agreements Concerning Grievance

In the event any Agreement affecting the interpretation or application of this Agreement is reached with any local Union, a copy of such Agreement shall be sent immediately to the Business Manager of those local Unions not participating therein. In the event the Business Manager of such local Union informs the Company in writing within one month that such disposition or Agreement is not acceptable to the employee's local Union, such Agreement shall not be binding on that local Union. This does not apply to awards made as a result of arbitration which shall be binding on all local Unions.

Section 12. Processing of Discharge Grievance

The Company agrees to expedite the processing of grievances involving discharge as rapidly as possible.

Any employee who has been disciplined or discharged and who is subsequently exonerated, shall be reinstated without prejudice or loss of seniority and compensated for any loss in wages, unless the Grievance Committee or the Arbitrator determine otherwise.

Section 13. Grievance Procedure for Berlin Construction Department

Due to work assignments of employees at remote locations, there could be a delay of several days before a grievance could be presented to the supervisor. Supervisors are requested to make arrangements for prompt attention to any grievance, and Union representatives will advise bargaining-unit employees to telephone to request a meeting with the immediate supervisor when they have a grievance.

Section 14. Discipline or Discharge

14.(a) The Company shall, on the same day on which it occurs, orally advise the local Union concerned of any suspension or discharge, and if requested by the Union, the matter shall on the same day, be discussed by the proper Management representative and the Business Manager and/or Assistant Business Manager or designated representative of the local Union concerned. The Company shall advise the Union in writing of any disciplinary action or discharge, which shall only be for just cause, within three (3) working days of its occurrence, specifying the reason therefore. The Company and Union shall designate representatives in each Division who will represent them at each step of the grievance procedure, and both the Company and the Union shall have a person available within the time limits provided for steps 1 and 2 of the grievance procedure.

14.(b) The Union shall have the right to question the propriety of any such disciplinary action or discharge through the grievance procedure herein outlined, including arbitration, but any such grievance shall be filed within fifteen days after receipt by the Union of notification of the Company's action.

Section 15. Submission of Grievance; Selection of Arbitrator

If a grievance is not settled in Step Three of Article IV, and provided the grievance is a dispute involving the interpretation, application or compliance with any provision of this Agreement, either the Union or the Company may, within the time limits specified in Article IV, Step Three, submit the grievance to an impartial arbitrator for final settlement. The arbitrator selection process will be as follows: The local union(s) will submit to the Company on each arbitration case a list of eight (8) arbitrators, of which at least four (4) are members of the American Arbitration Association, the remainder being independent arbitrators. If agreement is not reached on this list of arbitrators, then the Company will submit to the Union a list of eight (8) arbitrators, of which at least four (4) are members of the American Arbitration Association, the remainder being independent arbitrators. In the event that the Company and the Union cannot agree upon a mutually satisfactory arbitrator by use of the above process within the limits specified in Article IV, Step Three, either the Union or the Company may within the next ten calendar days request the State Board of Mediation and Arbitration of the State of Connecticut to arbitrate the grievance. The decision of the arbitrator shall be final and binding on both the Union and the Company for the duration of the Agreement.

Section 16. Payment Of Expenses For Arbitration

It is understood that for the term of this Agreement, where the original position of the Union is upheld by the Arbitrator, the Company will pay such fees charged by the Arbitrator or the American Arbitration Association for any grievance properly processed and properly referred to arbitration under the terms of Article IV.

In any other case such fees will be shared equally by the Company and the Union. In all cases, any costs incurred by either party in its own behalf, such as legal fees, stenographic costs, etc., will be paid by that party.

Section 17. Role of Arbitrator

The parties recognize the proper role of the arbitrator as one of deciding issues submitted by the parties under this Article, after a full and fair hearing, and not as being invested with any authority to participate in matters of collective bargaining.

Section 18. Agreement Changes Nonarbitrable

It is understood and agreed that proposals to add to or change this Agreement shall not be arbitrable and that no proposal to amend or terminate this Agreement may be referred to arbitration under this Article.

ARTICLE V
Seniority

Introduction

Seniority which employees accumulate is of two types:

(a) Total length of continuous time served with Local 420/ 457 legacy CL&P employees shall be known as "Teal Book Seniority."

(b) Except as modified elsewhere in this Agreement, total length of time served within a job classification shall be known as "Classification Seniority."

(c) In addition to Union seniority, an employee accrues other types of service with the Company such as credited service and service recognition as described below:

i. Credited service date is used for pension and severance calculations as well as the three year vesting period for employees on K-Vantage.

ii. Service recognition is used for vacation and sick time eligibility as well as an employee's service anniversary date.

Generally, unless there is a break in service with the Company, an employee's credited service date and service recognition date would be the same.

Definition of an Employee

The term "employee" as used in this Agreement refers only to regular employees in the bargaining unit. Regular employees are employees hired for full-time employment on continuing nontemporary work in an established job classification. During the first six months of employment each such employee will be on a probationary or trial basis. Nonregular employees are employees hired for temporary work whose term of employment will not exceed three months in any twelve month period and whose employment does not affect the advancement of or result in the layoff of a regular employee.

In the application of seniority, as defined in paragraphs (a) and (b) above, to employees having equivalent Classification Seniority, greater Teal Book Seniority shall prevail and when both Classification Seniority and Teal Book Seniority are equivalent, greater seniority shall prevail for the employee having the earlier birth date. The application of seniority as herein provided shall not be applied so as to conflict with any established seniority relationships existing prior to June 1, 1963.

New employees, other than temporary employees, shall be regarded as probationary until they have worked continuously for six months during which period they shall have no seniority status. Any employee who has been continuously employed during the employee's probationary period as defined above shall become a regular employee at the end of the probationary period and the employee's seniority shall start from the date of hiring. Employees hired on a temporary basis for special projects that require not more than twelve months to complete shall acquire no seniority status during such employment. If a temporary employee is

retained as a regular employee, the employee's Teal Book Seniority shall start from the date of hiring and the employee's Classification Seniority shall start on the date the employee became a regular employee. Temporary employees must comply with Article II, Section 3. A regular employee shall lose the employee's seniority status if the employee resigns voluntarily or is discharged for just cause or is laid off for periods in excess of those specified in Section 4 of this Article. Where used in this Article the words "local" and "locality" describe designated areas of Company operations for which the immediate responsibility is directly assigned to an individual Manager or other in charge. Appendix **"**C**"** attached hereto shows a list of designated areas of Company operations which define "Local" seniority areas for application of the provisions of this Article.

Section 1. Promotion

1.(a) Employees will be given preference for training to qualify for promotion within the bargaining unit in descending order of Classification Seniority within normal sequences of promotion on a local departmental basis. Exceptions to such preference may be made only in (1) temporary situations where assigning a more senior employee would involve short notice change of a normal work schedule or unreasonably interfere with the conduct of a particular job assignment or (2) when a senior employee either has qualified previously for promotion or has demonstrated the employee's inability to do so and has been advised accordingly by the Company.

1.(b) When promoting an employee to fill a vacancy in a higher job classification within the bargaining unit, the Company will give first consideration to the qualifications of the employee having greatest Classification Seniority in the normal sequence of promotion on a local or departmental basis. If this employee is qualified as evidenced by the employee's skill, efficiency, knowledge, ability and acceptable performance in training, the employee will be given the promotion. If the employee having greatest Classification Seniority is not qualified, the remaining employees will likewise be considered for the promotion in the order of greatest Classification Seniority on a local or departmental basis. When no employee on a local or departmental basis is qualified, Classification Seniority will be applied secondly on a district basis, thirdly on a regional basis and fourthly on a Companywide basis.

1.(c) Vacancies in the bargaining unit, other than Helper or equivalent job classifications or classifications covered by the Time- Merit Progression Program which are to be filled by promotion will be filled within two weeks from the date of the vacancy excepting in situations when the employee who is to fill a vacancy is temporarily absent from work or requires additional time to complete necessary training. If it is determined that no vacancy exists, the Company will advise the Business Manager of the Local Union concerned in writing.

1.(d) The Company will give preference to its regular bargaining unit employees over hiring new employees when making placements in job openings within the bargaining unit. Notices of available job openings, other than those to be filled by application of any other provision(s) of this Agreement, will be posted on bulletin boards throughout the Company, and a copy will be sent to the Business Manager of each Local Union. Each bulletin board posting will be for a period of not less than seven (7) calendar days during which period interested employees may apply in writing for reassignment to the posted job opening by use of a reassignment application form provided by the Company. The Business Manager, Assistant Business Manager or Steward may submit a reassignment application in the above manner on

behalf of an employee who is absent during the seven-day period by reason of vacation, short-term illness or short-term excused absence. Promptly following the end of a posting period each applicant will be notified within 15 days following the end of that posting period whether or not the employee's application has been accepted, and if rejected, the reason therefore. The Company's determinations of the qualifications of employees applying for reassignment under this Section 1.(d) will be made on the same basis as for hiring new employees. In the event two or more employees with basically equal qualifications apply for one job opening, preference for placement will be determined by greater Teal Book Seniority. If reassignment is postponed following notification of acceptance, the employee's classification seniority will be adjusted upon reassignment to the starting date of the first full week following the date of the acceptance notice.

1.(e) Regular Employees who have been transferred or reassigned prior to June 1, 1979 under Sections 2.(a) or Sections 3, 3.(a) or 3.(b) or rehired under the provisions of 4.(b) of this Article will be considered as having greater Teal Book seniority within the employee's former local seniority area for purposes of Section 1.(d).

If more than one such Employee applies for the same job posting, greater Teal Book seniority will be the determining factor. Such Employee(s) will receive this consideration only if the Employee(s) notes on the job posting application that the employee is applying under this Section of Article V. Further, the Employee(s) affected will be allowed this seniority consideration only until the employee has been selected for one job opening under these provisions. An employee selected for a job posting under this Section 1.(e) will have the employee's rate established in accordance with Section 2.(d) of this Article.

Applicants who are selected for job postings to classifications covered by Time Merit Progression Programs under this Section will be considered for reinstatement rights under the provisions of Section 3.(e) or 4.(a) of this Article for a period of up to two (2) years from the date of transfer.

1.(f)(1) **Understanding Concerning Article V, Section 1.(d)** - When an employee with one year or more of satisfactory Company service is selected to fill a posted job opening, the employee will be transferred into the new position at the second rate step. If the employee has 18 months or more of satisfactory Company service, the employee will start at the third rate step.

If additional training is required, the employee may remain at the step the employee started the employee's new position at up to one year or eighteen months whichever the case may be.

If prior work experiences were directly related to the new duties, the employee may be accelerated through the pay rate steps.

1.(f)(2) Employees accepted for a job posting back to their former Local Seniority Area under Article V, Section 1(e) who have previously been transferred or reassigned under Sections 2(a), 3, 3(a) or 3(b) of Article V, will have their rates established in accordance with Article V, Section 2(d). Application of Article V, Section 2(d) under this Section 2, will be applied only to the initial job posting for which the employee was accepted back to the employee's

former Local Seniority Area and also only to employees who at the time of transfer or reassignment were not offered an option to remain in their Local.

Section 2. Reassignment, Layoff and Demotion

If at any time Company operations require a reduction of the existing working forces, employees in the localities or departments affected will be subject to reassignment in the order of least Teal Book Seniority and in reverse sequence of job progression within the job classifications affected. The Company will reassign employees entitled to reassignment to job classifications for which they are qualified and in accordance with the procedure outlined below:

2.(a) An employee subject to reassignment under the provisions of Section 2. or displaced by the application of this Section 2.(a), may at the employee's option and to the extent the employee's Teal Book Seniority exceeds that of other employees,

(1) either displace the employee having least Teal Book Seniority in the same job classification within the district or region, or
(2) displace the employee having least Teal Book Seniority in the same job classification within the Company, or
(3) displace the employee having least Teal Book Seniority in a lower job classification within the employee's normal sequence of job progression within the locality, or
(4) displace the employee having least Teal Book Seniority within the locality.

If an employee subject to reassignment has insufficient Teal Book Seniority to exercise provisions (1) or (3), then the employee may

(5) displace the employee having least Teal Book Seniority in a lower job classification within the employee's normal sequence of job progression within the District, within the Region or within the Company, or
(6) displace the employee having least Teal Book Seniority firstly, within the District and secondly, within the Region.

If an employee subject to reassignment has insufficient Teal Book Seniority to exercise provisions (1), (2), (3), (4), (5) or (6), then

(7) the employee may displace one of the five employees having least Teal Book Seniority within the Company.

2.(b) An employee subject to reassignment under the provisions of Section 2. or displaced by the application of Section 2(a) of this Article who has insufficient Teal Book Seniority to entitle the employee to reassignment or in lieu of displacing another employee, may elect to be laid off with recall privileges as outlined in Section 4.(b) of this Article.

Prior to being presented with the employee's options, an employee subject to reassignment under the provisions of Section 2. or displaced by the application of Section 2.(a),

of this Article may at the employee's option, after giving the Company at least one weeks' notification, elect to be laid off with recall privileges as outlined in Section 4.(b) of this Article.

2.(c) In the event an employee subject to reassignment does not have sufficient Teal Book Seniority to entitle the employee to job placement, the employee may be laid off with recall privileges as outlined in Section 4.(b) of this Article.

Any employee who has completed one or more years of continuous service and who is laid off because of the permanent elimination of one or more jobs shall be given an allowance of forty hours pay at the employee's straight-time hourly rate for each full year of continuous service with the Company. For any such employee who is fifty years or more of age, the above-mentioned allowance will, instead of forty hours, be sixty hours if the employee has completed at least fifteen years of continuous service, or eighty hours if the employee has completed at least twenty-five years of continuous service. Any laid off employee or employee identified to be laid off, who obtains employment with any of the system companies will not be entitled to terminal pay. Any such employee who accepts terminal pay will thereby relinquish all other rights under this Agreement and will not be eligible for recall under Section 4.(b) of this Article. Any employee who accepts any position or who is offered a position similar to the position the employee held with the Company prior to the sale or lease, or in which the employee has had experience, the wages and benefits for which are reasonably comparable to those earned prior to such sale or lease, with this Company or with the purchaser or lessor, shall not be eligible for severance pay. An employee so affected who has reached the employee‘s fifty-fifth birthday may, in addition to severance pay, make arrangements for applicable annuity benefits under the then existing Annuity Plan.

2.(d) When Company operations require other than a temporary transfer or reassignment of employees under the provisions of Sections 2 of this Article to a job classification in which the employee is unskilled or inexperienced, the employee will be given training on the job and allowed a reasonable period of time to develop sufficient skill and ability to perform satisfactorily in the employee‘s new job classification.

An employee who is reassigned to a job classification with a lower hourly starting rate of pay than the employee‘s present hourly rate a special basic rate of pay will be established for the employee in the following manner:

A. For an employee with less than five years of continuous service:

(1) If the employee‘s present rate is greater than the maximum rate of the employee‘s new classification, the employee will be paid the maximum rate of the new classification.

(2) If the employee‘s present rate is less than the maximum rate of the employee‘s new classification, the employee will retain the employee‘s present rate in the new classification until the employee is qualified for advancement.

B. For an employee with five years but less than fifteen years of continuous service:

(3) If the employee's present rate is greater than the maximum rate of the employee's new classification, twenty-five percent of the difference between the employee's basic rate immediately preceding reassignment and the maximum basic rate of the lower job classification to which the employee is reassigned will be added to the rate for the lower job classification.

(4) If the employee's present rate is less than the maximum rate of the employee's new classification, the employee will retain the employee's present rate in the new classification until the employee is qualified for advancement.

C. For an employee with fifteen or more years of continuous service:

(5) If the employee's present rate is greater than the maximum rate of the employee's new classification, fifty percent of the difference between the employee's basic rate immediately preceding reassignment and the maximum basic rate of the lower job classification to which the employee is reassigned will be added to the rate for the lower job classification.

(6) If the employee's present rate is less than the maximum rate of the employee's new classification, the employee will retain the employee's present rate in the new classification until the employee is qualified for advancement.

Any special rate established under the terms of subsection (3) or (5) of this provision will thereafter not be subject to any rate or general wage adjustments until such time as the maximum rate for the lower job classification equals or exceeds the employee's special rate.

2.(e) If it is definitely established that a regular employee is physically incapable of performing the duties of the employee's assignment, the Company will, in accordance with its past practice, whenever possible and with due consideration given to the Teal Book Seniority of all employees affected, reassign such employee to an available job for which the employee is qualified at a rate which will result in a minimum reduction from the employee's former rate.

2.(f) If an employee is demoted or assigned to a lower job classification or hourly rate of pay (1) at the employee's own request, (2) for disciplinary reasons, (3) for incompetence or (4) because of physical inability to perform the duties of the employee's assignment, the employee's Classification Seniority for the purposes of promotion will retrogress in reverse sequence of classification progression. An employee who is demoted under item number (4), above, will retain the employee's Classification Seniority in the employee's former classification for the purpose of reinstatement as set forth in Section 4.(a) of this Article. Any employee desiring assignment to a lower job classification or hourly rate of pay for a purpose other than

covered by Section 1.(d) of this Article shall make written request to the Manager concerned, with duplicate copy to the Business Manager of the Local Union having jurisdiction over the location involved. Such written request shall state that the employee understands the Classification Seniority provisions of this Agreement.

Section 3. Transfer

When it is necessary for the Company to transfer an employee from one locality, or department to another under circumstances other than those outlined in Sections 2., 3.(a) or 3.(b) of this Article, the Company shall offer the transfer to qualified employees in descending order of Classification Seniority in the job classification affected in the locality or department from which the transfer is to be made provided first that Section 1.(b) is complied with on a local or departmental basis.

3.(a) If at any time there is an excess number of employees in a job classification which is to be retained in a locality or district and concurrently there is a vacancy in the same job classification in another locality the Company may, rather than apply Section 2 of this Article, transfer a qualified employee from the locality where there is an excess to the locality where the vacancy exists provided first that Section 1.(b) of this Article is complied with on a local or departmental basis. Under these circumstances the Company shall offer the transfer to qualified employees in descending order of Teal Book seniority in the job classification affected, from the locality where the excess number exists to the locality where the vacancy exists. If no employee accepts the transfer, the least senior of the employees affected, will be subject to provision (2) of Section 2.(a) of this Article except that when the transfer is from one region to another the employee may displace the employee having least Teal Book Seniority in the same job classification within the region where the employee is employed. Any employee displaced from the same job classification may accept transfer to where the vacancy exists or exercise provision (2) of Section 2.(a) or elect to be laid off with recall privileges as outlined in Section 4.(b) of this Article. Any employee displaced by the application of provision (2) of Section 2.(a) will, if qualified, be required either to accept the promotional transfer or to be laid off with recall privileges as outlined under Section 4.(b). If an employee displaced by this procedure is not qualified for promotional transfer the employee will be subject to provision (3) of Section 2.(a).

3.(b) If at any time Company operations require permanent elimination of a job classification or permanent reduction of the number of employees or both in a locality, under conditions not provided for under Sections 3. or 3.(a) of this Article, and requirement to fill existing or contemplated vacancies elsewhere can reasonably be coordinated with the elimination or reduction, the employees where the job elimination or reduction is to be made will be offered opportunities, consistent with their respective qualifications and seniority, either to remain in their present locality in job classifications remaining available there or to be reassigned to fill available vacancies elsewhere. Under these circumstances offers for available jobs will be made in descending order of Teal Book Seniority to (1) accept promotional transfer, or (2) remain in the present locality, or (3) accept reassignment to a different job classification and locality, or (4) in lieu of applying provisions (1), (2) or (3) of this Section 3.(b) be laid off with recall privileges as outlined under Section 4.(b) of this Article. If the application of provisions (1), (2) or (3) above would result in less favorable job placement for an employee than reassignment under Section 2.(a), then Section 2.(a) will be applicable for that employee. For the purpose of coordinating the permanent elimination of a job classification or the permanent

reduction of the number of employees in a locality with requirement to fill existing or contemplated vacancies elsewhere the provisions of Sections 1.(b) and 1.(c) of this Article will not be applicable and the Company will give written notice of intent to the Business Manager of the Local Union concerned.

3.(c) If an employee is reassigned under provisions (2) or (3) of Section 3.(b) of this Article to a job classification in which the employee is unskilled or inexperienced, the employee will be given training on the job and allowed a reasonable period of time to develop sufficient skill and ability to perform satisfactorily in the employee's new job classification. When by application of provisions (2) or (3) of Section 3.(b) an employee with five or more years of Teal Book Seniority is reassigned to a job classification with a lower hourly rate of pay than the employee's former hourly rate a special basic rate of pay will be established for the employee by application of the formula set forth in Article V, Section 12.(a) of this Agreement. Should such an employee subsequently be promoted to a job classification with a higher hourly rate of pay the employee's basic rate will be the starting rate for the higher job classification or the special basic rate as determined under Article V, Section 12.(a), whichever is higher. When an employee with less than five years of Teal Book Seniority is reassigned to a job classification with a lower hourly rate of pay by application of provisions (2) or (3) of Section 3.(b) the employee will be paid the maximum hourly rate for the lower job classification.

3.(d) In situations when the application of the seniority principles of this Article either involve groups of employees or involve two or more separate localities, plants or departments, the Company may, at its discretion, satisfy its obligation to contact affected employees by giving written notice. Such written notice shall contain information pertinent to the situation at hand and be posted on bulletin boards in the localities where the employees concerned are based. It shall remain posted for a period of not less than one calendar week before the Company takes action affecting the status of employees having direct and reasonable interest in the stated situation. A copy of any written notice under this Section 3.(d) will be forwarded to the Business Manager(s) of the Local(s) concerned and, when it appears desirable to the Company to insure adequate communication, copies may be forwarded to each employee having direct and reasonable interest in a stated situation.

3.(e) When, for reasons other than the employee's own request, an employee is transferred or reassigned under Sections 2.(a) or 2.(b) or Sections 3., 3.(a) or 3.(b) the employee will retain the employee's Classification Seniority in the employee's former location and job classification for purposes of reinstatement and promotion and, if reassigned to a lower job classification within the employee's normal sequence of progression, the employee's Classification Seniority in the lower job classification will be established in reverse sequence of normal progression. When an employee is required by the Company to transfer to another locality, or is transferred to another locality for the mutual convenience of the employee and the Company, and no change in job classification is involved, the employee's Classification Seniority in the employee's former and new locations will be accumulative.

Employees reassigned since January 1, 1978 to another classification by the application of Section 2.(a) of this Article and who are later reinstated to their former classification, will have their Classification Seniority adjusted for a period up to the employee's recall rights had the employee elected layoff to reflect continuous former Classification Seniority.

3.(f) When an employee is transferred or reassigned from one locality, plant or department to another at the employee's own request, the employee's Classification Seniority in the employee's new assignment will begin on the effective date of the transfer and the employee will forfeit the employee's Classification Seniority in all job classifications the employee has held prior to the transfer.

[1]3.(g) An employee who is transferred out of the bargaining unit and who is later transferred back into the bargaining unit will maintain continuous Teal Book Seniority for the purposes of this Article and the employee's Classification Seniority will be determined in accordance with the provisions of this Article. Effective June 1, 1975, Teal Book Seniority for purposes of layoff and transfer only will be the total length of time the employee has served in bargaining unit classifications.

Section 4. Reinstatement and Recall

4.(a) Should opportunity for reinstatement to a higher job classification occur after an employee has been transferred or reassigned to a lower job classification for reasons other than the employee's own request or after demotion because of physical inability to perform the duties of the employee's assignment in accordance with provision (4) in Section 2.(f) of this Article, the employee involved will be reinstated in the higher job classification provided the employee is then able and willing to perform its duties. If more than one employee is involved, reinstatement to the higher job classification will be offered in reverse order to the previous reassignments.

4.(b) Employees with three or more years of continuous service who are laid off will be entitled to recall for a period of three years from the date of layoff. Employees laid off with less than three years but more than six months of continuous service will be entitled to recall for a period of one year from date of layoff. Employees with recall rights will be considered as regular bargaining unit employees for purposes of Section 1(e) of this article.

A certified letter to the Employees' last known address with a copy of the job posting and a reassignment application will be considered proper notification for purposes of this section. The completed reassignment application must be returned to the Company by certified mail within (10) calendar days from the date of the Company's mailing of the posting. In the event an employee is recalled the employee must be available, able, qualified to work and return to work within two weeks.

Laid off employees who are reemployed within their recall period will maintain continuous Teal Book and Classification Seniority status during the period of layoff for the purpose of this Article and the starting rate of pay will be established according to the provisions of Section 2.(d) of this Article.

4.(c) **Vacation and Sick Leave Payment Entitlement Upon Recall from Layoff** - Employees who are recalled, for other than temporary assignments, under Section 4(b) shall not have their eligibility interrupted for purposes of vacation and sick leave payment entitlement. The application of this topic will be effective retroactive to August 1, 1975.

[1] November 22, 2004

Section 5. Adjustment of Classification Seniority

If a qualified employee is bypassed for a promotion in normal sequence to a higher job classification because of absence due to illness at the time the promotion is made and the employee is subsequently promoted to that higher job classification, the employee's Classification Seniority will be adjusted to place the employee in the relative status the employee would have attained in the higher job classification had the employee not been bypassed. If an employee is bypassed for promotion under these circumstances, the Company will advise the Business Manager of the Local Union concerned.

5.(a) In order to prevent an employee from being bypassed in the employee's normal sequence of promotion on or after June 1, 1972 within the locality or department by (1) the lateral transferring of an employee from another seniority area; (2) an employee being accepted for a job posting at other than the starting rate; or (3) by the hiring of an employee at other than the starting rate or starting classification within the promotional sequence; an employee will retain the same Classification Seniority date the employee is assigned at the helper or starting classification within the sequence up through attaining journeyman (effective September 6, 1992, up through Troubleshooter where applicable), but not including the Lead or Chief Classifications. This will also apply to employees presently classified at the starting classification within the promotional sequence on June 1, 1972.

Employees who were classified journeyman prior to June 1, 1972 will have the number "2" immediately preceding their classification seniority date and will show primary seniority except for those employees who have been assigned the number "1" immediately preceding their classification seniority date as referred to in Section 9 (c) of this Article.

Section 6. Troubleshooter Assignments

6.(a) Vacancies in the Troubleshooter classification will be offered to the qualified lineman on a senior to junior classification seniority basis. Classified as a lineman for at least one year will be considered as qualified for promotion and upgrading to the Troubleshooter classification.

6.(b)Junior qualified Line Mechanic will be required to accept unfilled vacancies in the Troubleshooter classification.

6.(c) Troubleshooter can voluntarily elect to be reclassified to a lineman after one year in the Troubleshooter classification without loss of seniority.

6.(d) The Troubleshooter reclassified to lineman will not be required to accept promotion to a Troubleshooter for a period of one year.

6.(e) Employees classified as Troubleshooter on September 6, 1992, will be considered as having greater seniority than employees classified as lineman on that date.

6.(f) For the purpose of this Article, Section 2(a) only, Troubleshooter and Line Mechanic will be considered as the same classification.

Section 7. Employees in Military Service

The Company will reinstate without loss of Teal Book Seniority employees, other than temporary, who have been granted leaves of absence for military service in accordance with federal statutes applicable thereto. In order to effect reinstatement it may be necessary to reassign, transfer or lay off other employees.

Probationary employees, who are reinstated, shall have their Teal Book Seniority adjusted to the hiring date upon completion of their six-month probationary period. Service immediately preceding and immediately following the leave of absence shall be credited to the six-month probationary requirement.

Section 8. Adjustment of Veteran's Seniority

8.(a) If a regular employee is bypassed for a promotion in the employee's normal sequence of job progression because of a military leave of absence and the employee is subsequently promoted to the higher job classification, the employee's Classification Seniority will be adjusted to place the employee in the relative status the employee would have attained in the higher job classification had the employee not been bypassed.

8.(b) A returning veteran will be given credit for time in service plus Company service prior to entering service to determine the employee's rate step. One year of continuous Company and military service will entitle the employee to return at the 2nd rate step and 18 months will entitle the employee to 3rd rate step. Eighteen months is the maximum credit allowed. This does not apply to any veterans returning prior to June 1, 1973.

Section 9. Seniority Lists

9.(a) The Company will prepare and post on bulletin boards seniority lists showing the employee's name, job classification, date employed, Classification Seniority date and date classified. The seniority lists will show the relative Classification Seniority of employees in each job classification on a local, district or department basis.

9.(b) Effective with the June 1, 1963 Agreement, the wage band identification letters "A", "B" or "C", which appeared under the "Rate Per Hour" column of Appendix "A" in preceding Agreements between the parties, were made a part of the respective job classifications for which they previously identified the wage bands. The respective job classifications thereby became either two or three separate job classifications.

When seniority lists were prepared under Section 9.(a) above, job classifications which included the letters "A", or "B" or "C" were established in separate groupings and the Classification Seniority dates of the employees in the separate groupings were retained as they existed immediately preceding the June 1, 1963 Agreement. In some localities this reflected earlier Classification Seniority dates for certain employees in "B" or "C" job classifications than for other employees in higher job classifications within the same normal sequences of promotion. Each employee in the former category will, if promoted in normal sequence to the first available vacancy in the higher job classification, retain the employee's Classification Seniority date for relative position in the higher job classification.

If, under the above-described conditions, a senior employee is not promoted to the first vacancy available, but is promoted to a subsequent vacancy, the Classification Seniority date for that employee will be the effective date of such promotion unless modified by Section 5. or Section 8.(a) of this Article.

9.(c) In order to maintain related classification seniority established under the former classifications Lineman "A" and "B", Electrician "A" and "B" and Splicer "A" and "B", the number "1" immediately preceding the classification date of the new classification of Lineman, Electrician and Splicer will show primary seniority and will be assigned to employees classified Lineman "A", Electrician "A" and Splicer "A" as of May 28, 1966.

For purposes of Section 9.(b) the reclassification from Lineman "B", Electrician "B" and Splicer "B" to Lineman, Electrician and Splicer will be considered a promotion. Employees entitled to retain classification seniority under this Section will be shown in the primary group.

9.(d) Not later than August 1 of each year, the Company shall furnish the Union with an up-to-date District and departmental seniority list for the bargaining unit together with the classification and rate of pay and address of each employee on such list.

Section 10. Assignment of Job Classifications

Each employee will be assigned a job classification, the duties of which the employee is competent to perform and which generally reflects the employee's normal work. Such job classification shall not preclude assignment of the employee for limited periods on work other than that reflected by the employee's job classification in emergencies, for sickness or vacation relief, to meet the Company's service requirements, when the employee's normal work is slack or while the employee is being trained to better fit himself for advancement in grade as vacancies occur.

Section 11. Performing Duties of Higher Job Classifications

[2] [3]11.(a) An employee performing the duties of a higher job classification than the employee's own within the bargaining unit on a Shift, Automotive Equipment Mechanic (Berlin, Waterbury), (Bristol, Greenwich, Mystic, Oxford, Waterbury, Winsted), Construction Equipment Operator (Berlin Construction), Instrument Mechanic (Berlin), shall be paid the minimum rate of the higher job classification for all hours so-assigned on one day, provided the employee works one or more hours in the higher job classification on that day. Stockhandlers performing the duties of Tractor Trailer Driver shall be uprated by one rate progression step (provided such rate does not exceed the maximum rate for Tractor Trailer Driver) for all hours so-assigned on one day, provided the employee works one or more hours in the higher job classification on that day. Temporary upgrades to Chief or Lead will be at the maximum rate. This provision will not apply to an employee who is performing the duties of a higher job classification while being trained under the direction of a qualified employee. Employees who

[2] June 27, 1962
[3] September 14, 1982

are assigned to perform the duties of a higher job classification under this provision shall not acquire Classification Seniority in the higher job classification while so-assigned.

11.(b) **Upgrading of and to Automotive Equipment Mechanic** - When assigned to perform the duties of Chief Garage Mechanic, the Automotive Equipment Mechanic will be upgraded to the maximum pay rate of the Chief Garage Mechanic's job classification.

When upgraded to perform the duties of Automotive Equipment Mechanic, a Garage Mechanic will be upgraded to the maximum pay rate of the Automotive Equipment Mechanic's job classification.

11.(c) Provided a qualified supervisor is not present to direct the work forces in the Berlin Construction Department, the Company will assign a Chief or upgrade a journeyman to the maximum Chief rate of the employee's classification for all hours so-assigned on that day provided the assignment is for one or more hours under the following conditions:

(1) When the work crew consists of three or more bargaining-unit employees and they are assigned to perform work on a specific job assignment, as a work group;

(2) If the work content of the job assignment remains the same and the crew size is reduced from four or five to three.

Upgrading, under this section, will normally be on a classification seniority basis by job location assignment and in the classification that reflects the type of work being performed.

11.(d) When a Berlin Construction crew or crews of six or more employees per crew are assigned to perform work without a supervisor present, the Company will designate a Chief to direct the work forces and the employee will be paid one dollar and seventy five ($1.75) cents per hour in addition to the employee's s basic straight-time hourly rate, or in the absence of a Chief the Company will designate a journeyman to direct the work forces and the employee will be paid one dollar and seventy five ($1.75) cents per hour in addition to the maximum Chief rate of the employee's classification, for all hours so-assigned on that day provided the assignment is for one or more hours.

Upgrading, under this section, will normally be on a classification seniority basis by job location assignment and in the classification that reflects the type of work being performed.

11.(e) If during a Supervisor's absence from work an employee in a Chief job classification is temporarily assigned to direct work forces normally directed by a Supervisor, the employee will be paid one dollar and seventy five ($1.75) cents per hour in addition to the employee's basic straight-time hourly rate for all hours so-assigned on one day provided the assignment is for one or more hours on that day. If a classification other than Chief is assigned, the employee will be paid the maximum Chief rate in addition to one dollar and seventy five ($1.75) cents per hour for all hours so-assigned on one day provided the assignment is for one or more hours on that day. Upgrading under these sections will normally be based on classification seniority basis by job location assignment and in classifications that reflect the type of work being performed.

11.(f) When crews headed by Chiefs are combined, and in the absence of a Supervisor, a single Chief is assigned to direct the work performance of the crews the senior Chief will be upgraded to Supervisor, and the employee will be paid one dollar and seventy five ($1.75) cents per hour in addition to the employee's basic straight-time hourly rate for all hours so-assigned on one day provided the assignment is for one or more hours on that day. Upgrading under these sections will normally be based on classification seniority basis by job location assignment and in classifications that reflect the type of work being performed.

11.(g) If during a Supervisor's absence from work a Stockhandler at the maximum rate is temporarily assigned to conduct the work normally conducted by the Supervisor, the employee will be paid one dollar and seventy five ($1.75) cents per hour in addition to the employee's basic straight-time hourly rate for all hours so-assigned on one day provided the assignment is for one or more hours on that day.

11.(h) If during an Area Stockhandler's absence from work a Stockhandler at the maximum rate is temporarily assigned to conduct the work normally conducted by the Area Stockhandler, the employee will be paid the maximum rate of the Area Stockhandler classification for all hours so assigned on one day, provided the employee works one or more hours in that classification on that day.

11.(i) Meter Readers-AMR Drivers may be temporarily assigned to perform the duties of a collector, as required. If this assignment exceeds a continuous period of one hour, then the employee is entitled for all hours so assigned on one day to be paid at the top of the rate of the collector's rate progression.

11.(j) **Crew Size - Track Machines** - When track machines (digger or bucket) are to be utilized, for work in a District or System Project area, two bargaining unit employees from Transmission (GO) will be utilized.

11.(k) **The Effects on Employees Hired as Transmission Line Mechanic Helper Classification** - All employees who are hired or post for job openings into the Transmission Line mechanic Helper classification after June 1, 1989, will be retained in that classification until the employee's completion of the Transmission Line Mechanic Time Merit Progression program.

Section 12. Retrogression; Wage Rate

If it is definitely established (1) that a regular employee is incapable of performing the duties of the employee's job classification because of an injury sustained in the employ of the Company, or (2) that a regular employee having five or more years of continuous service is incapable of performing the duties of the employee's job classification because of a disability or infirmity arising from natural causes and the employee is assigned to a lower job classification within the employee's ability to perform, a special basic rate of pay will be established for the employee as follows:

12.(a) For an employee with less than twenty years of continuous service at the time of reassignment, the special basic rate will be determined by multiplying the difference between the employee's basic rate immediately preceding reassignment and the maximum basic rate for the lower job classification to which the employee is reassigned by the product of five percent times the employee's years of continuous service and adding the amount so obtained to the maximum basic rate of the lower rated job classification. For an employee with twenty or more years of continuous service there will be no reduction in basic rate when reassigned to a lower rated job classification under this provision. Any special basic rate established under the terms of this provision will thereafter be subject to general wage adjustments made during the term of this Agreement.

12.(b) Should such an employee later qualify for and be promoted to a higher job classification, the employee's basic rate will be the starting rate for the higher job classification or the special rate as determined above, whichever is greater.

12.(c) The above Sections 12.(a) and 12.(b) apply to employees who may be reassigned to a lower rated job classification for reasons stated in Section 12 on or after June 1, 1973.

[4] [5] [6] [7]**Section 13. Job Classification Change Notices to Union**

In order that the Union may maintain its records of bargaining unit employees the Company will periodically notify the Union of job classification changes. Such notification will provide the name, job classification and location for each bargaining unit employee hired, reclassified, transferred or separated from the Company. The information will be directed to the Business Manager of the Local Union having jurisdiction over the location involved. If an employee within the bargaining unit is discharged, the Company will notify the Business Manager of the Local Union concerned as promptly as possible.

13.(a) If an employee is retrogressed, it will be communicated in writing to the Business Manager of the Local Union having jurisdiction over the location involved.

13.(b) If a regular bargaining unit employee is suspended or discharged the local management of the Company will notify the Local Union representative on the same day of occurrence. If requested by the Union, the matter shall be discussed on that day by management representatives and the Local Union in the area concerned.

Section 14. Time-Merit Progression Programs and Job Specifications

A list of Time-Merit Progression Programs and Job Specifications that are currently in effect are included in Appendix D, TOPIC: Time-Merit Progression Programs in Effect and TOPIC: Job Specifications.

[5] July 1, 1973 #2
[6] Topic: New Hires (B)
[7] Topic: Meter Service Installers

ARTICLE VI
Hours of Work, Rates of Pay and Overtime

Section 1. The minimum wage rate for each job classification shall be in accordance with a schedule entitled "Schedule of Regular Hourly Rates" appended hereto and to be signed by both parties to this Agreement.

This rate schedule shall not be construed so as to require a cut in the existing hourly wage of any employee now paid in excess of the schedule.

[8]**Section 2.**

(a) For the purpose of computing overtime, the workweek shall start at 12:01 a.m. Sunday and end at 12 midnight the following Saturday.

(b) For the purpose of this Agreement, employees are composed of shift, day and scheduled workers. (1) A shift employee is defined as one who works at a seven-day operation or service, on a rotating or shift schedule. (2) A day worker is one whose basic work week is Monday through Friday, or Tuesday through Saturday between the hours of 6 a.m. and 6 p.m. for 8 hours a day or ten (10) hours; if applicable. (3) A scheduled worker is an employee, other than a shift worker or day worker, who works according to a schedule of hours at different times of the day or night and/or on different days of the week including Saturdays and Sundays.

If the Company changes or modifies working schedules in a department, plant or district of the Company, in a manner which the Union considers arbitrary or unnecessary, the new schedule shall be worked subject to adjustment through the grievance procedure up to and including arbitration.

(c) **Establishing New Schedules** - The establishing of any new schedule for scheduled employees shall be discussed with the appropriate Local Business Manager in advance of making such schedule effective.

(d) **Saturday Work** - Saturday Work requirements will be minimized. The Company will continue its efforts to reduce the number of employees who are required to work on Saturday as a part of their normal work schedules.

(e) It will be within the discretion of the supervisor to excuse an employee from overtime for good cause where such overtime is not due to an emergency, is not a special job, and does not involve work at the end of a day's shift.

[9] [10]**Section 3. Computing Overtime**

All hours worked in excess of eight or ten hours in one day of twenty-four, except for shift employees as scheduled, or forty hours in one workweek or on an employee's regularly scheduled day off shall be paid for at the overtime rate of one and one-half times the regular

[8] Topic: J schedules- Meter Service
[9] July 1, 1966 B.2.

rate. Employees with Sunday as a regularly scheduled day off in any calendar week shall be paid double time for work on that Sunday, and at time and one-half for work on the other regularly scheduled day off in that calendar week. Employees regularly scheduled to work on Sunday in any calendar week shall receive time and one-half for work on the first regularly scheduled day off and double time for work on the second regularly scheduled day off in that calendar week. Overtime rates shall not be applied more than once to any particular hour of work, nor shall they apply to scheduled changes of shift.

Section 4. Planned Overtime

4.(a) Planned overtime shall be defined as overtime work for which at least seventy-two hours advance notice has been given and will be assigned among employees as equally as possible. Records of overtime hours and "on-call" hours shall be posted on the Company bulletin boards each month and a copy given to the Union. In selecting employees for assignment to planned overtime, the Company will excuse employees who do not want the assignment provided the required number of qualified employees are available. Where additional help is needed beyond the number desiring the overtime assignment, additional assignments will be made among qualified employees in inverse order of the amount of overtime worked. Non-regular employees shall not be used unless regular employees are not available. Among employees in a given classification, those who have more than six months of service will be given preference for planned overtime assignments over those who are still on a probationary basis. Except in the case of the unforeseen absence of another employee if an employee is required to work overtime on a scheduled day off, or on an observed holiday, with less than seventy-two hours' notice, the employee shall be paid travel time as defined in Section 8 of this Article VI. Records of distribution of overtime work will be made available to designated Union representatives upon their request and also posted on a weekly basis.

4.(b) Where an employee first reports for planned overtime on a scheduled day off, or on an observed holiday, the employee shall receive a minimum of four hours work or pay or, if the work exceeds four continuous hours, a minimum of eight hours work or pay at the applicable overtime rate. For each time thereafter that the employee reports for planned overtime work on that same day, the employee shall receive a minimum of three hours' work or pay at the applicable overtime rate. Employees, at the time they are notified of the assignment shall be informed as to the estimated duration of the work. When an employee is advised on less than 15 hrs notice not to report for such prearranged overtime, the employee will be paid for 2 hrs at the employee's straight time rate except that when the prearranged overtime immediately precedes or follows the employees normal schedule hours and would amount to less than 2 hrs, the employee will be paid at the employee's basic straight time rate for the actual amount of prearranged overtime. In any case where an employee is given an opportunity to work planned overtime on the employee's scheduled day off in accordance with the full minimum provided under this paragraph, but is excused at the employee's own request from working that full minimum, the employee will be paid only for actual hours worked.

Section 5. Equitable Distribution of Overtime

Insofar as practicable overtime work will be equitably distributed among suitably qualified employees who are in the job classifications in the area in which the work is to be performed. Records of distribution of overtime work will be made available to designated Union representatives upon their request and also posted on a weekly basis. Overtime lists will be furnished to the Business Manager on a monthly basis.

[11]**Section 6. Rest Time**

6.(a) Except in case of emergency or the case of unforeseen absence of other employees, employees shall not be required to work more than twelve hours in any one twenty-four hour period. If an employee is required to work beyond sixteen hours in any twenty-four hour period, the employee will be paid at double the employee's straight time rate for those hours worked beyond sixteen. An employee required to work more than sixteen hours during any twenty-four hour period shall, once released, be allowed a period of eight hours off before returning to work. If this period extends into the employee's regular scheduled working hours, the employee shall lose no pay thereby. If an employee is required to work outside of the employee's normal schedule for more than one hour (more than two hours with advanced notice) during the eight-hour period**, 10 hour period for 10 hour workers, 12 hour period for 12 hour workers,** immediately preceding the starting time of the employee's next normal schedule, the employee will, whenever possible be allowed rest time during that normal schedule without loss of normal wages. If an employee is called out without advance notice to work more than one hour (including travel time) during the eight hour period**, 10 hour period for 10 hour workers, 12 hour period for 12 hour workers,** immediately preceding the starting time of the employee's next normal schedule, the employee will, where service requirements permit, be allowed equivalent rest time during the employee's basic scheduled hours on that day without loss of normal wages, except that eight hours rest time will be provided if an employee is required to work six consecutive hours [for employees working a four day, 10 hour regular work week schedule, 10 hours rest time will be allowed if required to work 8 consecutive hours. **For employees working a 12 hour shift, 12 hours rest time will be allowed if required to work 10 consecutive hours**]. The above does not apply to "call-outs" occurring one hour before the start of the employee's regular schedule. The rest time provided in the above two paragraphs will be scheduled by the supervisor. The rest time shall be equivalent to the sum of the time worked and any time allowed off for meals during the above eight-hour period except that eight hours rest time will be provided if an employee is required to work six consecutive hours. Time allowed off for meals will be counted in determining "more than one hour" (more than two hours for prearranged overtime) for the purpose of this Section. When service requirements will not permit scheduling such time off, the equivalent hours will be paid for at two times the regular rate instead of straight time. Similarly, an employee called out without advance notice to work more than one hour (more than two hours with advanced notice), including travel time during the eight-hour period immediately preceding the starting time of a planned overtime assignment on the employee's scheduled day off, said employee will, when service requirements permit, be allowed equivalent rest time at straight time rates during such planned overtime assignment hours-the maximum hours so paid being either the announced minimum hours guaranteed or the average hours actually worked on the assignment by other employees of the same classification, whichever is greater, except that eight hours rest time will be provided if an employee is required to work six consecutive hours. The above does not apply to "call-outs" occurring one hour before the start of the employee's regular schedule. The rest time provided for above will be scheduled by the supervisor. When service requirements will not permit scheduling such time off, the equivalent hours will be paid for at straight time rates in addition to the applicable overtime rate.

6.(b) **Payment For Rest Time Worked On A Holiday.** Employees who are eligible for rest time and are required to work through their rest time on a Company recognized holiday that they were scheduled to work, will receive double and one half times the employee's straight time rate for the actual rest time hours worked.

[11] July 22, 1976 #2

Section 7. Work Beyond 16 Hours

If an employee is required to work beyond sixteen consecutive hours, the employee will be paid at double the employee's straight time rate for those hours worked beyond sixteen, until the employee is allowed eight consecutive hours off. Time allowed off, for meals will be counted in determining sixteen consecutive hours for the purpose of this Section.

[12]**Section 8. Call Out**

An employee is considered to be called out (1) when the employee is called in when not on duty and without advance notice, to report immediately for overtime work or, (2) when the employee is given advance notice to report for overtime work on a regularly scheduled working day when the overtime work is prior to or after and not continuous with the employee's regular scheduled working hours. Employees called in for work outside their regular working hours shall be paid time and one-half. Such pay shall be computed from the time the employee reports to work to the time of completion of the employee's work and their return to designated headquarters, to which time shall be added one-half hour for travel to work and one-half hour for travel from work. Time off shall not be considered as repayment for such work done. An employee called in for work under the terms of this paragraph will receive a minimum of two hours' pay including the above travel time at time and one-half for each time the employee is called away from their home, except that if an employee is called in for work which continues into the employee's regular working schedule, the employee shall be paid the overtime rate only for actual time worked and the half hour travel time to work. In the case of an employee who receives a call between the hours of midnight and 6 a.m., or between 8:00 a.m. and 2:00 p.m. for permanent 2nd shift garage mechanics, to report immediately, the minimum shall be three hours instead of the two hours referred to in the previous sentence, and the same conditions will apply. An employee will be considered on Company time while traveling directly to work after being called out, but paid no more than the amount specified herein.

When normal means of transportation are not available to an employee required to work overtime without advance notice, the Company will provide transportation to the employee's home.

[13] [14] [15] [16]**Section 9. On Call**

Employees may be placed on-call outside their normal schedule hours for one or more consecutive 24-hour periods, or less than 24 hour periods. Employees, except Troubleshooters, who are assigned by the Company to be on-call will be paid either 1.5 hours at basic straight-time rates or 3 hours at basic straight-time rates for each 24 hour period (or less than a 24 hour period) that they are required to be on call as follows:

(i) If the majority of the 24 hour on-call period (or less than a 24 hour assignment) is served during a weekday (Monday through Friday), employees will receive 1.5 hours at basic straight-time rates;

[15] November 22, 2004
[16] November 3, 2010

(ii) If the majority of the 24 hour on-call period, (or less than a 24 hour assignment) is served during a holiday, weekend (Saturday or Sunday), or the employee's scheduled day off (only for employees working a shift or special schedule), employees will receive 3 hours at basic straight-time rates. With the exception of weekend on-call periods containing Company-recognized holidays, employees will receive no more than two 3 hour payments and one 1.5 hour payment for a weekend on-call assignment (e.g., 3 p.m. Friday until 7 a.m. Monday.).

Time worked under Sections 9 and 12 will be computed from the time of receipt of each call out, and unless the time extends into the employee's scheduled work time, until return to place of receipt of the call out.

One on–call payment will be made for each 24-hour period regardless whether such 24-hour period extends over two calendar days. With the exception of seven day on-call weeks containing company recognized holidays, or weeks containing an employee's scheduled day off (only for employees working a shift or special schedule), employees will receive no more than five payments of 1.5 hours and two payments of 3 hours for an on-call assignment of seven consecutive 24-hour periods (e.g., 3 p.m. Tuesday until 7 a.m. Tuesday) even though such period might extend over eight calendar days.

In addition, the employee will receive pay, when appropriate, in accordance with Section 8 of this Article VI. Where employees have been placed "on-call," they shall be called before or concurrently with other employees in case of emergency work which they are qualified to do.

An employee not scheduled for "on-call" who is given advance notice to report for overtime work on a regularly scheduled working day when the overtime work is prior to or after and not continuous with the employee's regular scheduled working hours, shall be paid for being "on-call" in accordance with Section 9 of this Article.

Employees not regularly assigned to "on-call" who are required to hold themselves available so that they may be contacted within one-half hour in anticipation of an emergency or to return to work following the completion of their regular shift shall be paid in the same manner as a person assigned to "on-call" for the day on which such an assignment is made and paid under Section 9.

[17] [18]**Section 10. Excused From On Call**

Such employees shall upon request be excused only from the established annual rotational scheduled "on-call"/Shift assignment for a period of not less than twelve months provided the employee has reached 45 years of age, has greater departmental seniority than other employees who make the same request, and the granting and/or continued compliance with the request does not subject the remaining employees on the employee's particular "on-call" schedule to a normal "on-call" schedule assignment frequency greater than one out of four. Nothing contained in this Article shall restrict the Company's right to assign any employee

[17] Topic: New Hires (A)
[18] October 23, 2012 & August 29, 2005

(whether or not excused from participating in the annual on-call schedule) to be on call for unscheduled emergency situations, such as the forecast of a storm. Any employee so excused will be excluded from the provisions of Article VI, Section 5. However, the Company will attempt to equalize scheduled overtime to the extent possible without keeping dual overtime records.

For the purpose of unplanned overtime, the overtime list will be followed as per normal practice.

For the purposes of planned overtime, the administrative 2000 hours figure will be disregarded.

The Company will utilize the following process to assign personnel to unscheduled on-call:

(i) The Company will ask for volunteers, including employees who have requested to be excused from on-call assignment of this Article by overtime standing in accordance with Article VI section 5.

(ii) If there is an insufficient number of volunteers to meet on call staffing needs the company will first assign employees who have not requested to be excused for on call assignment of this Article, by overtime standing in accordance with Article VI section 5.

(iii) If steps 1 and 2 above do not provide a sufficient number of volunteers or assigned personnel to meet on call staffing needs the company will assign employees who have requested to be excused from on call assignment of this Article by Classification Seniority.

(iv) The Company may, upon the conditions of the work, assign personnel who are available at the facility including employees who have requested to be excused from on call assignment of this Article to stand call until steps 1-3 can be satisfied. The Company will attempt to find replacements for the excused employees who have been assigned. If a sufficient number of volunteers and assigned personnel are available to meet on-call staffing needs, the employees who have requested to be excused from on call assignment may be excused by Classification Seniority.

Section 11. Trouble Call

11.(a) The Company and Union agree to continue their cooperative efforts to enhance customer service by improving response time during customer outages. In keeping with this mutual goal, the parties agree to the formation of an A list of employees who wish to be designated to take trouble calls.

11.(b) All employees in the following classifications will be eligible to participate in the A response list:

Chief Line Mechanic,	Chief Electrician	Chief Splicer
Lead Line Mechanic	Electrician	Splicer
Troubleshooter	Lead Electrician	Lead Splicer
Line Mechanic		

11.(c) The Company seeks 100% participation of all eligible employees, but requires 25% within each of the ten (10) participating classifications. If the required participation is not obtained on a voluntary basis, assignment to the A list will be made on a junior to senior basis. Employees not participating in the A list may elect to participate on a weekly basis.

11.(d) Overtime Rotation - A separate overtime rotation list will be maintained for A list participants. Prearranged overtime will be distributed from a combined list.

11.(e) Employees who have removed themselves from the scheduled call rotation under this Article will have 2000 hours added to their overtime hours on the overtime list.

For the purpose of unplanned overtime, the overtime list will be followed as per normal practice.

For the purposes of planned overtime, the administrative 2000 hours figure will be disregarded.

Section 12. Troubleshooters Assigned to Call

Troubleshooters who are assigned by the Company to take trouble calls outside their normal schedule hours will be so-assigned for either (1) eight hours immediately preceding, or (2) eight hours immediately following, or (3) a total not in excess of eight hours both immediately preceding and immediately following their normal schedule hours each day they work. Troubleshooters will be paid for one hour at basic straight-time rate for each eight hours they are assigned to trouble call duty except that, when assigned on a recognized holiday they will be paid for two hours at basic straight-time rate for each eight hours so-assigned. If called upon to perform work, in addition to the call-time pay they will be paid for the time worked at the rate applicable but not less than two hours for each time called out, except they will be paid not less than three hours at the applicable rate for each time called out between the hours of 12:00 midnight and 6:00 a.m.

Section 13. Assignment of Vehicles for Call

13.(a) Employees, except troubleshooters, who are assigned by the Company to take trouble calls outside their normal schedule will, whenever practical, be assigned a Company motor vehicle for all hours assigned to call, provided that there are no conflicts with local zoning regulations.

13.(b) When an employee is assigned to call as a member of a crew, one member of the crew complement will be assigned a motor vehicle under the provisions outlined above.

13.(c) This provision will also apply to troubleshooters where arrangements suitable to the Company can be made to return the vehicle to a suitable location following the call assignment. Troubleshooters who use their personally owned vehicle, while responding to trouble calls during the hours of call assignment, will be paid mileage in accordance with Article XII, Section 4.

13.(d) The Company agrees that it will give consideration to valid reasons of an employee who requests that the employee be excused from taking an assigned Company vehicle home during hours of call.

Section 14. Paging Device for Use During Call Assignments

When an employee is assigned to call, they will be provided with a paging device ("beeper"), when practicable, as an alternate means of contact during the normal call schedule. It will be the responsibility of that employee to ensure that they are within the signal range and the "beeper" is in operating order as indicated by the testing procedure or to provide other means to be contacted as is presently practiced.

[19]**Section 15. Meals And Meal Allowances**

After an employee has had one and one-half hours of overtime work which is continuous with the employee's regular scheduled working hours and which forces the employee to miss their regular meal hour (other than breakfast as provided for below), or after five hours of overtime work since being called out, and after each additional five hours of overtime work, the Company will either provide a meal for the employee or pay the employee $10.00 on account of such meal.

An allowance of $20.00 shall be made for evening meals only (4:00 p.m. to 12 midnight). The eight hour period following completion of the normal work schedule is applicable for shift workers. A meal allowance shall be given to shift employees who are required to report for work starting one hour or more before their next normal schedule starting time without having been given twelve hours advance notice.

An allowance of $10.00 shall be made for breakfast in any case where an employee is required to report for work on the day shift one hour or more before the employee's usual starting time, even though prior notice had been given of such work. Meals eaten on the job to avoid interruption of work during such overtime or emergency will be eaten on Company time. As far as operating requirements permit, each such employee shall be allowed reasonable time off to eat such meal, except for the special case of the breakfast meal provided for above. Such reasonable time off up to three-quarters of an hour shall be included in the hours of overtime work. An employee entitled to a meal and/or time off under this Section shall, if the overtime assignment continues, become entitled to additional meals and/or time off therefore at five-hour intervals. Although exact scheduling of meals will depend on requirements of the job, it is intended that an employee be allowed to eat a meal within a reasonable time after the employee becomes entitled to it under this Section. However, if the employee is not given time off but works through to complete the job, the employee will be paid three-quarters of an hour for each meal for which the employee qualified. An employee called out for one and one-half hours or more but less than five hours of actual overtime work, who thereby misses a regular meal hour, will be provided with a meal or paid for the meal at the rate of $10.00 for breakfast, lunch, and $20.00 for evening meals only (4:00 p.m. to 12 midnight), and in which case there would be a time allowance for eating. On a day when an employee is not scheduled to work, the "regular meal hour" for the purpose of this Section will include any part of the one hour period beginning at 7:00 a.m., 12:00 noon, and 5:00 p.m. For prearranged work, the meal allowances would be

[19] July 15, 1971 #5

the same as on a regular workday. An employee on the day shift who is called to come immediately to work one hour or more in advance of the employee's regular starting time and who is not released for at least half an hour prior to starting the employee's day's work will be provided with a breakfast or paid $10.00 for purchase of same and, if the employee does not have the opportunity to provide the employee's own lunch in these circumstances, the employee will be provided with a lunch or paid $10.00 for the purchase of same.

In the event a shift employee is called back with less than eight hours' notice to work a second full shift within a twenty-four hour period or is assigned with less than four hours' notice to work a full shift on the employee's day off, the employee shall receive two meal allowances for the shift.

Except where the Company has scheduled an employee for a straight eight (8)-hour day**,** normal lunch periods should be observed whenever practicable and those cases where it is necessary to delay lunch periods should be kept at a minimum. When the work requirements make it necessary to postpone a lunch period for an hour or more, the practice will be to pay the employee time and one-half for the lunch period so that the employee will be considered to be on continuous duty from the start to the finish of the workday, eating when the employee can find the opportunity without any stated meal period. Employees scheduled for a straight eight (8)-hour day will not have a lunch period designated but will be expected to eat on the fly.

Section 16. Schedules of Normal Work Coverage

The Company will prepare and post on bulletin boards schedules of normal work coverage for the employees in various departments, plants and districts of the Company. The purpose of the schedules is to inform the employee of the employee's normal hours of work which shall consist of not more than ten hours per day or forty hours per week. Employees may be required to work a straight eight (8) hour schedule without a designated lunch period. The work week shall consist of four or five consecutive days except for shift or scheduled workers. All hours worked in excess of eight or ten hours per day or the basic forty hours per week, or outside of the employee's normal schedule, will be paid for at one and one-half straight-time rates except when other overtime rates, premium rates or holiday rates are applicable as herein provided.

Section 17. No Duplication of Rates

When two or more rates may be applicable, the higher rate shall be applied. There shall be no duplication in the application of regular, overtime or premium rates of pay for the same hours worked.

Section 18. Schedules of Shift Employees, Shift Premium and Sunday Premium

18.(a) The schedules of normal work coverage for employees who are assigned as shift or scheduled workers are made to meet the continuous nature of the Company's operations. It is the purpose of the Company to arrange such schedules to conform with the wishes of 60% or more of the employees involved, provided the shifts are adequately covered without unnecessary overtime payments. The job classifications of employees who normally are assigned as shift or scheduled workers are identified by the prefix "S" in the Schedule of Job Classifications and Basic Straight-Time Hourly Rates Appendix "A" of this Agreement.

18.(b) Upon request from shift or scheduled workers, the Company may, at its discretion with respect to extended hours of work and the numbers of simultaneous requests or extended periods of exchange, permit such employees to exchange their scheduled hours of normal work coverage within a work week provided the shifts are adequately covered without involving payment of overtime or upgraded rates. When such exchanges of scheduled work hours are permitted, the advance notice requirements of Section 19 of this Article shall not be applicable. No other such exchanges of scheduled hours of normal work coverage will be permitted, except for employees on a Tuesday through Saturday schedule.

18.(c) When an employee in any job classification is assigned to work on an afternoon or night schedule of normal work coverage, a premium of two dollars and fifty cents ($2.50) per hour will be added to the employee's basic straight-time rate for all hours worked within that schedule. For the purpose of this shift premium provision, afternoon and night schedules of normal work coverage are defined as those which include normal schedule hours of work preceding 6:00 a.m., or following 6:00 p.m. **An employee regularly assigned to a shift schedule will receive shift adder for all paid time off.**

18.(d) A premium of twenty-five percent of the basic straight-time rate per hour will be added to the basic straight-time rates for time worked on Sundays on a normal schedule by shift or scheduled workers. This Section will not be applicable to time worked at double straight-time rates under the provisions of Section 20 of this Article.

Section 19. Change In Normal Work Schedules

The work and "on-call" schedules in effect for the different departments at the time of the execution of this Agreement will be furnished to the Union by the Company.

19.(a) When possible, employees will be given not less than seventy-two hours advance notice of changes in their normal work schedules. In any case of a change of normal work schedule, the employee(s) affected must be advised of the change in advance of the starting time of the new normal work schedule for the purposes of the premium rate and rest time provisions of this Article.

19.(b) When an employee's normal work schedule is changed with less than seventy-two hours advance notice, any time worked within the new normal schedule which was not normal work time under the old schedule will be paid for at one and one-half straight-time rates until the advance-notice period has expired, except when other rates are applicable, and excepted further that when an employee's normal work schedule is changed to provide relief coverage because of sickness or other unexpected absences of employees, forty-eight hours shall be the advance-notice period for application of greater than straight-time rates. An employee may be returned to the employee's previous normal schedule without forty-eight hours advance notice after serving a relief coverage assignment as described herein.

19.(c) When operating or maintenance requirements make it necessary to change the normal work schedule of a day work employee, (other than a shift or scheduled worker), to an afternoon or night normal schedule, for other than relief assignments to normal schedules of shift or scheduled workers, the employee will be paid at one and one-half times the employee's straight-time hourly rate for all time worked on the afternoon or night normal schedule which was not normal work time on the employee's daytime schedule provided the period of assignment is for three or less consecutive workdays. When the period of assignment

is more than three consecutive workdays, the change of normal work schedule will be made in accordance with 19.(b) above. This Section will not be used to change the normal work schedules of day work employees from daytime to afternoon or night normal schedules except when the work to be done is necessitated by operating or maintenance requirements which must be continued on at least a two-shift basis or when it cannot be performed during daytime normal schedule hours. A day work employee may be returned to a daytime normal work schedule without seventy-two hours advance notice.

19.(d) Whenever possible, employees will request permission for planned absence at least seventy-two hours in advance of such absence.

Section 20. Sunday or Second Scheduled Day Off

20.(a) A Shift or scheduled worker will be paid double the straight-time rate for all hours worked on Sunday outside the employee's normal schedule.

20.(b) Employees with Sunday as a normal scheduled day off in any calendar week shall be paid double time for work on that Sunday, and at time and one-half for work on the other normal scheduled day off in that calendar week. Employees required to work on a Sunday within their normal schedule in any calendar week shall receive time and one-half for work on the first normal scheduled day off and double time for work on the second normal scheduled day off in that calendar week.

ARTICLE VII
Vacations, Holidays and Leaves of Absences

[20] [21]**Section 1. Vacation Allowance**

a) Regular Employees will be allowed the following vacation periods annually with basic straight-time pay:

- For employees with less than one year of service and hired between January 1 and March 31 of the current calendar year will be allowed three weeks of vacation.
- For employees with less than one year of service and hired between April 1 and June 30 of the current calendar year will be allowed two weeks of vacation.
- For employees with less than one year of service and hired between July 1 and September 30 of the current calendar year will be allowed one week of vacation.
- For employees with less than one year of service and hired between October 1 and December 31 of the current calendar year will not be granted vacation for that period.

Employees who are expected to complete at least one year of continuous service by December 31 of a calendar year will be allowed three weeks' vacation in that and each succeeding calendar year until eligible for four weeks' vacation under 1.(c) below.

[20] July 24, 1970 #1
[21] Topic: Vacations

Employees who are expected to complete 10 years of continuous service by December 31 of a calendar year will be allowed four weeks' vacation in that and each succeeding calendar year until eligible for five weeks' vacation under 1.(d) below.

Employees who are expected to complete 20 or more years of continuous service by December 31 of a calendar year will be allowed five weeks' vacation in that and each succeeding calendar year.

Less than one year of service	Start date January 1 through March 31 – 15 days
	Start date April 1 through June 30 – 10 days
	Start date July 1 through September 1 – 5 days
	Start date October 1 or later – no vacation accrued.
One year but less than 10 years	15 days per year
10 years but less than 20 years	20 days per year
20 years or more	25 days per year

All vacations must be completed within the calendar year and are not cumulative. The Company must afford opportunity for the employee to take the employee's vacation within the calendar year. The period of continuous service, for vacation purposes only, is not interrupted by leave of absence or temporary layoff.

(b) An employee's vacation begins at the end of his/her last scheduled work day.

(c) The vacation allowance per week will be based on the number of hours in the scheduled workweek generally in effect throughout the Division at the time the employee takes the employee's vacation, with overtime rates applying to hours in excess of forty hours per week. For the term of this Agreement, the minimum vacation allowance per week will be forty hours' straight time pay unless some public authority orders a shorter workweek.

(d) Employees will be allowed one additional week of vacation following attainment of age 62. This one additional week of vacation sunsets at the end of the contract and will no longer be available.

Section 2. Employee Returns Before June 1

An employee who returns before June 1 of any calendar year from leave of absence or temporary layoff of more than six months' duration shall be entitled to the employee's full vacation for that calendar year. For any such employee returning after June 1, the vacation for that calendar year will be computed at one-tenth of the amount provided under Section 1 above for each month (including the month of the employee's return) remaining in the calendar year.

[22]**Section 3**. **Choice Of Vacation**

Consistent with the Company's service obligations, vacation periods will be scheduled to meet and suit the convenience of employees. Insofar as practicable, employees will be granted preference in selecting vacation periods in descending order of Teal Book Seniority on a local, plant or departmental basis as involved. Such preference for selection will be granted in the following order: (1) for all vacation periods under 1(a) 1. above, (2) for all third week vacation periods, (3) for all fourth week vacation periods, (4) for all fifth week vacation periods (5) for each additional week following attainment of age 62 and (6) for any additional vacation days granted because of recognized holidays falling within vacation periods. Each district, department and plant will, not later than April 1st, prepare and post on appropriate bulletin boards schedules showing the time of vacation periods granted. In order that the Company will be able to prepare and post vacation schedules by April 1st, it will be necessary for employees to make their selections of vacation periods promptly. In the event an employee fails to make the employee's selection within a reasonable period of time, the employee will forfeit the employee's turn until all other employees involved have made their selections. Should any employee fail to make the employee's selection(s) by March 1st, the Company, at its discretion, may schedule that employee's vacation period. Changes in any scheduled vacation period may be made with mutual consent of employees involved and the Company. When choice of vacation period has been granted, it will not be interfered with except in emergencies.

[23]**Section 4**. **Vacation**

The vacation period shall be between January 1 and December 31. Each employee shall be permitted to take a vacation between May 1 and October 31, subject to the provisions of Section 3. An employee entitled to more than two weeks of vacation shall be permitted to take a two-week vacation between May 1 and October 31 and may take the employee's entire vacation during this period or outside this period, subject to the provisions of Section 3.

Section 5. **Discontinuation Of Employment**

Any employee with more than one year of continuous service who resigns and has given the Company at least two weeks' notice, or who is discharged by the Company, shall, at the time of the termination of the employee's employment, be credited with any vacation pay which the employee has earned but not received, prorated at one-fifth of the employee's total vacation allowance for each full month of full-time, active employment completed between January 1 and June 1 of that year. Any such employee who leaves after June 1 will be entitled to the employee's full vacation or pay for that calendar year.

Any employee who retires after January 1 of any calendar year will be credited with vacation time for any portion of the employee's total vacation allowance for that calendar year which the employee has not already received. However, in the normal case, such employee will be required to schedule the employee's entire vacation prior to the employee's retirement date. An employee retiring on any February 1 who is entitled to more than four weeks of vacation will schedule such vacation during January of that year and in the latter part of December of the preceding year.

[22] Topic: Hartford/ Simsbury/ Falls Village
[23] November 3, 2010

Section 6. **Emergency Recall From Vacation**

An employee who has started the employee's vacation will not be required to return to work during the period of that vacation as scheduled. Any employee who is recalled to work any hours of the employee's regular basic schedule during a week the employee is on vacation shall be paid at two times the employee's regular rate for such work and, in addition, shall receive as soon as practicable thereafter, at the employee's option, either equivalent time off with pay or pay at straight time rates for those hours worked which are within the employee's regular forty-hour basic schedule. Hours worked outside of an employee's usual eight working hours on one of the employee's basic five workdays shall be paid at double time and such hours shall be counted as hours worked for the purpose of equalizing overtime.

[24]**Section 7**. **Holidays (effective January 1, 2017), Time Off Before Christmas**

New Year's Day, Martin Luther King Day, Presidents' Day, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans Day, Thanksgiving Day, and Christmas Day shall be recognized as holidays.

In addition to the 10 federal holidays above, employees will be granted two floating holidays during the calendar year based on operational requirements and supervisory approval. The two floating holidays can be used for any reason and are requested by the employee. In the event of a conflict between employees requesting the same date, seniority shall govern.

Whenever any of such holiday(s) occur upon Sunday, the Monday next following such day shall be recognized as the holiday, except that for those employees who are required to work that Sunday, as part of their normal schedule, the holiday will be observed on Sunday.

Whenever any such holiday(s) occur upon Saturday, the preceding such day shall be recognized as the holiday, except that, for those employees who are required to work that Saturday, as part of their normal schedule, the holiday will be observed on Saturday.

The Company will allow four (4) hours off at the basic straight time rate to all employees who report for work on their last scheduled work day prior to Christmas Day. If Christmas day falls on a weekend day or a Monday, the 4 hours will be allowed in a manner consistent with the rest of the company.

If it is determined by the Company that time off cannot be allowed, the employee in lieu of the time off, will receive an additional four (4) hours pay at the employee's basic straight time rate.

Section 8. **Holiday Pay**

Pay for the holidays listed in this Article will be as follows:

(a) If the holiday is observed on a day when the employee would ordinarily work and if the employee's services are not required, the employee will receive eight hours' pay and the day off.

[24] July 3, 1963 4(b)

(b) If the holiday is observed on an employee's day off or during the employee's vacation, the employee shall receive an additional day off sometime during the calendar year on a day mutually agreeable to the Company and the employee.

(c) If an employee is required to work on a holiday, the employee will receive the eight hours' pay or day off provided under (a) or (b) plus time and one-half for all hours worked within the employee's usual eight working hours and double time for all other hours actually worked or the minimum provided under Article VI, whichever is greater.

(d) The pay provided in this Section 8 shall be in lieu of all other pay for work on holidays. Hours worked on a holiday which are outside of an employee's usual eight working hours shall be counted as hours worked for purpose of equalizing overtime.

Section 9. Shift Adder For Second Shift

A permanent second shift employee, e.g., Garage Mechanic, will be paid holiday and vacation pay at the rate which includes the shift adder.

Section 10. Sick Leave

Continuation of Pay

Incumbent employees as of December 31, 2016 will keep their sick time eligibility in accordance with the following:

Continuous Service – Weeks of Full Pay

From 6 months to 5 years - Up to 6 weeks

For 5 years to 10 years – Up to 10 weeks

For 10 years and upward – Up to 1 week for each year of continuous service

In case of a disability continuing from one calendar year into the succeeding calendar year, the employee is allowed for that disability only the amount of sick leave to the employee's credit as of the beginning of the disability. An employee whose disability is carried over into the succeeding year must return to work in order to establish sick leave benefits for that year.

The Company will notify the Local Union one week prior to the expiration of an employee's sick-leave payments.

Effective September 1, 1963, the Company amended its sick-leave wage payment policy for bargaining-unit employees to suspend the waiting period of one scheduled work day without pay.

Employees hired on January 1, 2017 or after will be under the following Sick Leave Policy:

SICK LEAVE WAGE PAYMENT POLICY

- Non-occupational illness/injury disability lasting more than five days will be managed by Liberty Mutual
- A total of 10 sick days per year at 100% of pay
- In the case of illnesses that exceed five consecutive work days, qualifying employees will be eligible for short term disability
- The first six weeks of short term disability will be paid at 100% of base pay
- Up to 19 additional weeks of short term disability will be paid at 67% of base pay
- Vacation time cannot be used in lieu of 67% pay
- Vacation time cannot be used to extend a short-term disability claim prior to transitioning to long-term disability (LTD)

All Engineering Designers, Senior Engineering Designers, Distribution Design Engineers and Senior Distribution Design Engineers have the same sick leave wage payment benefits listed above as employees hired on or after January 1, 2017.

Section 11. Absence Due to Death in Family.

11.(a) Time off without loss of pay shall be granted to employees in the event of death in the family or step-family as follows: Where the deceased was the father, mother, brother, sister, wife, child, grandparent, or grandchild of the employee, the employee shall be given time off between the death and burial up to a maximum of four calendar days and including the entire calendar day on which the funeral occurs, together with the midnight shift of the next calendar morning, so that the employee may make arrangements for the funeral and attend the services. Where the deceased was the father-in-law or the mother-in-law of the employee, the above maximum time off shall be two calendar days. In case such relative's death and burial takes place at a distant location and the employee does not attend, one day off will be allowed. In case of the death of brother-in-law, sister-in-law, aunt, or uncle, or in case of the death of any relative who is a member of the employee's household, the employee will be allowed one day off to attend the funeral. An employee seeking leave must notify the employee's supervisor of such death and request such leave, which shall be granted unless an emergency exists at the time requiring the employee's services.

Where the supervisor is satisfied that additional time off is needed by the employee to attend the funeral and to make arrangements for which the employee has responsibility, the supervisor may, at the employer's discretion, increase the maximum time allowances specified above to five or three calendar days, respectively.

11.(b) If death occurs to a member of an employee's immediate family, during the employee's scheduled vacation period, that portion of the employee's scheduled vacation from the day of death up to and including the day of the funeral will be rescheduled, but not to exceed three days. The vacation will be rescheduled at the option of the Company to another time during the calendar year. In the event vacation to be rescheduled under this section cannot be rescheduled during the current calendar year, it will be rescheduled as promptly as possible within the first three months of the following calendar year. The immediate

family is defined to include the spouse, son, daughter, father, father-in-law, mother, mother-in-law, grandmother or grandfather, grandchildren, sister, brother, step-relative, or one who is considered a member of the family and living in the employee's home through a tie of obligation or friendship.

Section 12. Jury Duty Wage Payments.

The Company will facilitate wage differential payments to employees on jury duty.

Section 13. Military Leave.

The Company will grant a military leave of absence as required by law and provide certain benefits to an employee granted such a leave. The service record for those who are granted a military leave of absence will continue without interruption.

13.(a) **Short-Term Leave of Absence for National Guard and Active Reserve**

Any employee who is required to report for short military training periods will be granted a Short-Term Military Leave of Absence and must give a copy of the "Ordered Tour of Duty" as soon as possible to his or her supervisor so that arrangements can be made for work assignments in the employee's absence.

Any regular employee who has completed the probationary period, or any temporary employee, will be compensated for the difference between his or her base wages and military pay for a maximum of ten working days per Federal fiscal year (October 1 through September 30 of the next calendar year) if the military pay (taxable income on military pay voucher) is less than the employee's base wages. Payment procedures are as follows:

When an employee is on short-term leave, the weekly or biweekly time report is coded 084 for a maximum of ten working days per Federal fiscal year so that normal base wages can be paid.

Upon return from leave, the employee must submit a military pay voucher or its equivalent to his or her supervisor detailing the amount of payment received from the Government for the tour of duty. The employee's supervisor will attach the voucher to a memorandum addressed to the NUSCO Payroll Department requesting that the proper amounts be deducted from the employee's following pay check.

Company Benefit Plans will remain in force during short-term military leave of absence. When an employee active in the National Guard or Reserves is called for emergency duties, compensation for such a call will be considered at that time.

[25]13.(b) **Long-Term Leave of Absence for Active Duty**

Any employee who enlists, is drafted, or is called to active duty will be granted a Long-Term Military Leave of Absence in accordance with the Uniformed Services Employment

[25] July 24, 1970 #5

and Reemployment Rights Act, 38 U.S.C. §§4301-4333. He/she must give a copy of the orders to his or her supervisor immediately. Employees on military leave for active duty may continue their health care benefits under COBRA, and for an additional six-month period subsequent to the 18-month COBRA period. Employees participating in the Retirement Plan will continue participation. Information on benefits will be provided to employees by Human Resources when HR is notified of the leave.

Upon return from military service, the employee will be reinstated, to the extent required by law, provided the employee: makes application for reinstatement within the required time following release from active duty; is still physically qualified or is able to become re-qualified with reasonable efforts; and if drafted, produces a certificate of satisfactory completion of training and service. An employee who enlisted must produce documentation of honorable discharge to qualify for reinstatement. For temporary employees, is released from military service prior to the end date of his or her temporary assignment or, for bargaining unit employees, prior to being released from the assignment.

In the event the military leave continues for greater than 91 days, the Company will provide a job of like status and pay if an employee's former job is not available.

Section 14. Personal Time

The Company and Union agree that NUP 13 – Personal time, will be extended to the classifications covered in this agreement. The parties also agree that the Company may change the policy / practice outlined in this NUP without negotiation. **Effective January 1, 2017 personal time is eliminated.**

Section 15. Leave of Absence: Union Representative

Upon written request from the Union, the Company will arrange for a leave of absence for up to four employees who are elected or appointed to the office of full-time Union representative for the Local Unions participating in this Agreement. Such arrangement will include a provision for the Local Union to pay all costs required to maintain the employee's benefits during the employee's leave of absence. The arrangement will also include provisions governing the seniority status of the full-time Union representative in such manner as may be mutually agreed upon by the Company and the Union.

ARTICLE VIII
Safety Provisions

Section 1. Policy Statement

It is agreed that the Company and the Union will work together on a continuing program of safety measures for the protection of the employees, the public, of Company property and of its service to customers.

Section 2. Employees; Judgment, Skill and Ability

In job assignments and in assignments to do specific pieces of work only such employees shall be assigned as have the necessary judgment, skill and ability, as generally

reflected by their job classifications and normal assignments, to safely perform the work to be done.

Section 3. Safety Manual

The Company will issue a copy of its "Employee Safety & Health Handbook" to each employee covered by this Agreement. Any changes in the rules in the " Employee Safety & Health Handbook" shall be a matter of discussion between the Parties before becoming effective. Once the Company has made a decision on any such change in a safety regulation the grievance procedure up to and including arbitration may be initiated to determine if the Company acted reasonably in making such change.

Section 4. Company/Union Safety Meetings

Representatives of the Company and two representatives of the Union from each Division and the Local Business Managers shall meet in February and September to discuss safety. Any conclusions reached by this committee will be followed up promptly by the Safety Section and the results will be communicated to the Business Manager and Assistant Business Manager concerned within thirty days. Within five days following any meeting of this joint committee, any Union representative may submit to the President the employee's own report on any safety matters which this representative presented for discussion at the meeting but which did not result in a committee recommendation.

The Union shall be allowed one representative on each divisional or district safety committee.

[26]**Section 5. Company/Union Safety Responsibilities**

The Union agrees to use its best efforts to see that its members employed by the Company shall read and comply with the safety regulations made by the Company, and that its members will wear and use the protective devices and apparel to be provided in accordance with the standard practice of the Company for the protection of employees from injury. The Company agrees to use its best efforts to see that persons who supervise employees read and comply with the safety regulations. The Company agrees also to use its best efforts to see that contractors engaged in work included in bargaining unit classifications observe the Company's safety regulations or equivalent. Safety is a joint responsibility of supervisors and employees. The primary function of a Supervisor is to direct work in a safe manner at all times. Supervisors will endeavor to see that employees observe necessary safety precautions to protect against exposure to danger when working aloft, on live wires, or in other situations of potential hazard and will direct operations in such a manner that safety precautions are observed. Supervisors will refrain from engaging in manual work when such engagement prevents them from giving adequate attention to their responsibilities as outlined in this Section.

Section 6. Protective Equipment Furnished by Company

6.(a) Protective equipment such as safety belts, rubber gloves with protectors and welder's equipment will be furnished by the Company. The Company will furnish coveralls or shirt and pants for painting of a nature where normal painting practices fail to prevent for all

[26] July 24, 1970 #2

practical purposes destruction of the employee's clothing such as painting towers, gas holders or chain link fences. Employees whose duties include handling of acid or assignment to areas where acid producing conditions exist will be provided protective clothing when engaged in this type of work. Where required on the job the Company also will furnish for the use of employees, boots, raincoats, rainhats, heat-protective gloves, working gloves and other protective items which it has customarily furnished in the past. In addition, plastic raincoats will be furnished to collectors, rubbers and gloves to collectors and Meter Readers-AMR Drivers. Protective equipment furnished by the Company shall not be used by employees for purposes other than Company work. Such equipment shall normally be stored on Company property or in other locations authorized by the Company where it will be readily available for use when required. Each employee to whom the foregoing equipment is issued will be expected to exercise reasonable care in its use and to guard it against unnecessary damage or loss.

Replacement of clothing unavoidably destroyed due to abnormal working conditions.

6.(b) The Company shall provide and own all tools used by a gang or crew such as picks, shovels, crowbars, chain hoists and the like as required. The Company also shall provide and own uncommon and infrequently used equipment and tools such as those of larger size than ordinary hand tools or any special tools required for special purposes including body belts with essential accessories and climbers with straps and pads for linemen and other employees as required. In addition, the Company shall provide those hand-tool items which are consumed in use such as files, bits, drills, hacksaw blades and the like.

6.(c) It shall be the responsibility of both the Company and the employees to maintain their respectively owned tools and equipment in good condition at all times and make replacements promptly when required for the safety of employees. The Company shall replace employees' personally owned hand tools if worn out or broken in normal use on the job. Worn out and broken tools replaced in accordance with this provision shall be turned over to and become the property of the Company.

[27]**Section 7. Live Line Practices**

7.(a) Work assignment of employees classified as Line Helpers

When a line helper is in the first three rate steps, the employee may be assigned to perform work on energized circuits of not higher than secondary voltage. When a line helper has attained the fourth rate step, the employee may be assigned, under close supervision, to apply protective equipment on primary conductors necessary to perform work safely on energized conductors not in excess of 600 volts. When a line helper has attained the fifth rate step, the employee may be assigned to perform simple work on poles involving energized primary circuits provided a Lineman is in the work area.

7.(b) Energized primary work at two working levels or cutting in or out slack

Live-wire work involving either transferring of primary wires on poles or cutting in or out slack, or handling energized wire at two working levels shall be carried on by two Linemen or a Lineman and an eligible Line Helper in the sixth, seventh, or eighth rate step, except that the sixth-step helper will not be required to perform the work of cutting in or out of slack on energized wires unless under close supervision.

[27] July 15, 1971 #5

The following is our understanding of operating practices to be observed under paragraph B.

1. For the purposes of this paragraph, the following definitions shall apply:

a. Straight-Line Pole

A pole in line where the energized primary wires are carried on pin-type insulators and the angle of pull is not more than 18 feet (20 degrees).

b. Corner Pole or Angle Pole

A pole located at an angle in excess of the above or where the energized primary wires are carried on disc insulators or the equivalent.

c. Junction Pole

A pole where the energized primary wires extend in three or more directions from the pole, or where the energized wires extend in two directions from the pole and are supported on crossarms attached to the pole at two different levels.

2. The transferring of energized primary wires from a point of support on one pole to a point of support on another pole and where it is necessary to work on both poles at the same time shall be carried out in accordance with the number of qualified line department personnel described in the attached Live-Wire chart. The chart will be interpreted within the following scope:

a. Where the required numbers are two (2) or four (4), one-half (½) of the assigned number must be Linemen or Chief Linemen or a combination of both. The remainder may include Line Helper(s) in the sixth, seventh, or eighth rate steps.

b. Where the required number is three (3), two (2) must be Linemen or Chief Linemen or a combination of both, the remainder may be a Line Helper in the sixth, seventh, or eighth rate step.

3. The cutting in or cutting out of slack in energized primary wires shall be carried out by two Linemen or one Lineman and a Line Helper in the seventh or eighth rate step.

4. It is understood that in the event the transferring of energized wires from one pole to another also involves the cutting in or cutting out of slack or the installation of energized primary taps, or both, the provisions of 3. of this letter shall not require Linemen in addition to those provided for in the chart.

5. The Company may assign more than the specified number of employees to carry out any of the above jobs for expediting the work or for other purposes and the Union agrees that such use of extra employees shall not be considered as establishing a precedent.

6. The installation of energized primary taps on junction poles, and elsewhere where it is current standard practice, shall be carried out by two Linemen or one Lineman and one Line Helper in the sixth, seventh, or eighth rate step.

7. During 1976 contract negotiations discussions of the Company proposals for modifications of the June 18, 1975 live-wire practices letter, the Company explained that it was not its intent to change its method of assigning three-person crews as a result of the redesigning of the required number of personnel with respect to the live-wire practices, as described in the Letter of Understanding and attached chart.

On limited occasions, a line crew consisting of two qualified line department personnel could be assigned to perform jobs listed as 1 through 3 under the heading Personnel Lifting Devices of the live-wire practices letter interpretation chart, where the jobs could be performed without the use of a lifting tong in conjunction with a holding stick.

However, it is recognized that some line functions, other than the assignments listed in the live-wire practices chart, are now performed by and will continue to be performed by a two-person line crew.

LIVE-WIRE CHART

The transferring of energized primary wires from a point of support on one pole to a point of support on another pole and where it is necessary to work on both poles at the same time shall be carried out by:

Type of Pole	Change in Level of Primary Wires	Horizontal Distance Between Pole Surfaces at Level of Primary Wire on Old Pole	No Arerial Device	Personnel Lifting Device	Personnel - Lifting Device & Material Handling or Device or Aerial Derrick	Material Handling or Aerial Derrick
1/				2/	2/	2/
1 Straight Line	No more than 5 ft.	Not more than 18 in.	2	2	2	2
2 Straight Line	No more than 5 ft.	More than 18 in.	3	2	2	2
3 Straight Line	More than 5 ft.	Any distance	3	2	2	2
4 Corner	Not more than 5 ft.	Not more than 18 in.	3	2	2	2
5 Corner	Not more than 5 ft.	More than 18 in.	3	3	2	3
6 Corner	More than 5 ft.	Not more than 18 in.	3	3	2	3
7 Corner	More than 5 ft.	More than 18 in.	4	3	3	3
8 Junction	Not more than 5 ft.	Not more than 18 in.	3	2	2	3
9 Junction	Not more than 5 ft.	More than 18 in.	3	3	3	3
10 Junction	More than 5 ft. but not more than 6 ft.	Not more than 18 in.	3	3	3	3
11 Junction	More than 5 ft. but not more than 6 ft.	More than 18 in.	4	3	3	4
12 Junction	More than 6 ft.	Any distance	4	4	4	4

1/ As defined in Section 7. paragraph (b).
2/ Applicable when personnel lifting devices that can be controlled from the device's work position, or aerial derricks, are used and can be positioned so that both poles can be worked from the same truck position.

Section 8. Company/Union Understanding

Through a memorandum and meetings, supervision will be advised of the Company's intent and understandings with the Union with regard to the following:

A. Reasonable assignments during inclement weather, making particular mention of extremes of heat and cold. The Company agrees to instruct its supervisors to make reasonable assignments in all Departments during extreme cold. Except in the case of emergency or to restore service, employees will not be required to do overhead line work or steel substation structure work when the temperature is 10° or lower at the job site.

B. Inexperienced probationary Line Mechanics limited to simpler work in which they are fully qualified when assigned to two-person line crew and truck.

C. Importance of staying within the limitation provided in the Agreement on work done by supervisors.

D. Assistance will be provided, when requested by employees assigned to service customers, under conditions which present special problems or hazards.

E. Line Mechanics will get help, if requested, when performing switching duties aloft on primary voltage on a planned switching job on a scheduled day off when such switching presents an unsafe working condition.

F. Replacement of clothing unavoidably destroyed due to abnormal working conditions.

[28] [29]**Section 9. Inclement Weather**

9.(a) Except in emergency, no employee shall be required to do outdoor work when weather conditions might make such work unsafe.

9.(b) It will be the policy of the Company to give reasonable consideration to limiting the outside work of Meter Readers-AMR Drivers, when extreme weather conditions exist, providing the nature of the work will permit postponement.

9.(c) Meters installed on the outside of buildings or structures will not be tested in place during rainy or snowy weather unless the meterman is sheltered from rain or snow during the testing operation.

Section 10. Hazardous Tasks

No employee shall be required to perform any hazardous task, with which the employee is not familiar, without proper instruction and close supervision. When working on emergency service restoration, employees shall call the appropriate Company office or person designated by the Company to receive such calls for any assistance that may be required for compliance with safe work practices.

[28] July 1, 1966 B.5.
[29] July 15, 1971 #3

Section 11. Regular On Call Requirements

A Line Mechanic shall not be placed on the regular "on-call" schedule unless the employee shall have had at least six months of service in such classification.

Section 12. Work Assignment Disputes

Where a disputed work assignment clearly involves a violation of the safety rules and such abnormal hazard as to affect a person's life, such work shall not be completed until the dispute is resolved or a temporary solution is reached by the Company and the local Union concerned. This shall not apply to any established practices. This paragraph shall not be so construed as to excuse an employee from performing any established duties of the employee's job classification unless the employee is not familiar with them.

Section 13. Practices and Procedures for Rubber Gloving Energized Conductors above 600v up to three-phase 23kv MGY

1. All standard safety rules in effect shall be followed.

2. Practices and procedures set forth below shall be strictly adhered to.

3. Rubber Gloving energized conductors more than 600 volts up to 23kv MGY will be done by minimum two qualified person crew.

4. No work will be permitted on energized conductors from a pole position (line mechanic spurred into pole or standing on pole steps or other permanent pole attachments).

5. Class 2 (20 kV) gloves and properly tested sleeves shall be used for all pole work while rubber gloving high-voltage energized conductors up to and including the three-phase 23 kV MGY class. A ground-to-ground rubber glove rule shall be enforced for all voltages. Gloves shall be air inflated for testing in the morning and after lunch and at any other time deemed necessary.

6. Employees using bucket trucks shall follow all rules and procedures governing the use of bucket trucks. The insulation portion of the bucket truck shall be inspected and cleaned as necessary before work.

7. a. All energized or grounded parts such as secondaries, neutral conductors, guy wires, telephone wires, cables or CATV cables within reaching distance of the employee shall be covered with approved protective equipment. Company-owned wires and equipment may be floated clear of the pole when practical if work is being done on or near energized conductors. If the neutral conductor is moved, the continuity of all earth grounds including guy grounds shall be maintained.

b. All energized conductors or equipment within reaching distance shall be covered with approved protective equipment, except that portion which is actually being worked on. No handline shall be permitted near an unprotected area.

c. When work is performed on an energized primary conductor, all other conductors, neutrals, grounds, and potential grounds, including crossarms and any

portion of the pole within reaching distance, shall be covered with approved protective equipment.

8. When an energized primary conductor is placed on the crossarm, bracket or against the pole, it shall first be covered with a line hose, and in addition, the crossarm, bracket or pole shall be covered with a rubber blanket or other approved insulation.

9. Work being performed on energized conductors by workers in buckets, and/or by workers working at the same pole or structure, shall be confined to only one phase of any circuit at a time.

10. Work not directly related to rubber glove procedures shall not be performed on the same pole or structure. Tools and materials shall not be handed to or from the pole to a person in a bucket while a Line Mechanic is spurred to the pole or not otherwise isolated from the ground.

11. All jumpers and rubber protective equipment, including gloves, sleeves, blankets, hoods, and line hose shall be inspected before each use and shall be turned in for testing and/or washing in accordance with a Company schedule, or sooner if there is any indication that the equipment may be defective.

12. Bucket trucks shall be tested every six months and at any other time there are indications of damage or electrical leakage.

13. When wet conditions exist, hot sticks will be used or the lines will be deenergized.

Section 14. Safety Shoes

Effective January 17, 2013, the Company will provide up to $250 annual allowance to Operating Department employees towards the purchase of one or more pair(s) of safety footwear that meets the requirements for impact/compression resistance and protection from electrical hazards (EH rated) as described in ASTM F2413-05 (M 1175/C75/Mt75) EH Rated Safety (steel toe or composite) footwear. The employee must furnish a receipt of purchase for reimbursement documenting the purchase of safety shoes which meet the above safety standard and the allowance will be limited to $250 per year. Ordering safety shoes through the Company stock rooms has been discontinued.

[30] [31] [32]**Section 15. Safety Eyeglasses**

The Company will pay the full cost of lenses, frame and carrying case of clear and/or tinted prescription safety eyeglasses**,** for operating department personnel who are required to wear them for their job. Employees will be limited to two (2) pairs of safety glasses (clear and/or tinted) every two years for the term of the agreement. Employees who opt for safety glasses with Photochromatic (photogray) or progressive lenses will not receive a second pair of clear or tinted safety glasses. The Company will pay for the cost of Photochromatic (photogray) or progressive lenses. The Company will provide for the replacement of safety eyeglasses when

[30] July 1, 1969 #3
[31] July 18, 1975 #3 & #4
[32] August 21, 1995

damaged on the job. Replacement will be limited to lenses only if the lenses are damaged or obscured.

The employee will provide the Company with a current (not over two years old) prescription. The Company will also provide replacement lenses if the employee's prescription changes.

When obtaining prescription safety glasses under the Company's current plan with the American Optical Company (or other company approved vendor) employees will pay any costs for eye examinations which are not covered by their chosen medical or vision plan.

The Company will reimburse the employee for all fitting fees.

Section 16. Emergency Equipment on Vehicles

Gas masks, fire extinguishers and first-aid kits will be standard equipment on all trucks where conditions require.

Section 17. Rubber Protective Equipment

Protective rubber gloves and similar equipment are to be maintained in a safe working condition or replaced as frequently as required or when so-requested by employees.

Section 18. Bucket Trucks for Call Person

It is not intended to be normal practice to assign articulating boom bucket trucks for use by employees on-call when working alone at night.

Extendible (telescopic or similar equipment) boom bucket trucks may be assigned to employees on-call when working alone at night.

Section 19. Testing Articulating Boom Bucket Trucks

Two bargaining unit employees will be utilized when testing articulating boom bucket trucks.

Section 20. Assignment for Patrolling Rights of Way

When necessary to patrol lines on foot through rights-of-way at night or during severe weather conditions, employees will be assigned in pairs.

Section 21. Personnel Assignment for Pole-Mounted Transformers

It shall be standard practice to assign suitably qualified bargaining-unit line personnel as follows to install or remove a pole-mounted distribution transformer.

21.(a) During the hours of darkness, three qualified bargaining unit Line personnel may be utilized when high intensity lighting and when material handling bucket trucks of the type that enables the operator to be in the work area or line derrick trucks suitably rated for the load being handled are provided. Additional Line personnel will be made available when the type of

equipment indicated in this Section is not available or when required or requested by the person in charge in order to perform the work safely.

21.(b) Employees assigned shall be suitably qualified bargaining unit Line department personnel. However, under emergency conditions, when the required number of Line department personnel cannot be located or are otherwise unavailable to perform the work, other employees, including wage hour or supervisory, may be assigned to assist available Line department personnel.

Section 22. Personal Security

To enhance personal safety, employees will avoid entering a high-risk area to perform their assigned duties if it appears that their personal safety, or the safety of their personal or company property, may be endangered. Personnel should report such conditions immediately to their supervisor.

District management will request local law enforcement agencies to accompany employees performing an assignment in a high-risk area when the employee has identified the area as imminently dangerous.

Section 23. Fire Retardant Clothing (Effective January 1, 2013)

Increase F.R. allowance to $1,000.00 for a new hire in the first year and $650.00 per year thereafter and for all other incumbents.

ARTICLE IX
General Provisions

Section 1. Bulletin Board for Union Use

1.(a) The Company will furnish suitably identified bulletin boards for use by the Union in such numbers and locations as mutually agreed upon. The purpose of these bulletin boards will be for the posting of notices pertaining to the Union and its members. All Union notices must be signed by an official of the Union and such notices shall contain nothing political, controversial or reflecting upon the Company, Union or any employees. Either the Union or the Company may remove from these bulletin boards any notices posted thereon which do not comply with this Section 1.(a).

1.(b) If a general notice to employees or the public is issued pertaining to a change made in this Agreement it shall be signed jointly by representatives of the Company and the Union.

1.(c) When information pertaining to Company-Union business is to be disseminated to the employees, announcement shall be posted on the official bulletin boards in the department or departments affected, and duplicates submitted to the Business Manager and Assistant Business Manager.

[33] [34]**Section 2. Supervisors Performing Work**

(a) Supervisors shall not act in other than a supervisory capacity while they are actively supervising three or more men working on the same shift with them. They shall in no case act in other than a supervisory capacity for more than twenty percent of the time.

(b) A supervisor is not relieved from the employee's responsibility to protect life and property, nor from giving occasional or emergency assistance.

(c) A supervisor called out in an emergency shall not perform regular work other than shall be immediately required to protect life and property. If any additional regular work is required, the foreman or supervisor shall call out bargaining unit personnel to perform the required work.

Section 3. Contract Work

(a) The Company agrees that it will not have work done by contract which is usually done by employees where such contracts will be accompanied by a layoff or reduction of hours in the working schedule or where men capable of doing the work are on layoff, have recall rights, and are readily available. Where contractors employing I.B.E.W. members are readily available and qualified to perform such work, they will be given any contract involving live wire work, to the extent permitted by law, and, all things being equal, will be given preference for other work usually done by employees, to the extent permitted by law.

(b) **When Contracting Out is Not Allowed**

Work regularly performed by employees covered by this Agreement will not be contracted out if it would result in loss of continuity of employment or opportunities for permanent promotions to job classifications covered by this Agreement.

[35](c) **Use of Contractors – District and Division Managers will advise Union of use of Contractors upon request**

Upon requests made at reasonable intervals by Local Union Business Managers to the Company's Division or District Managers, the Company will advise the Union of tree trimming, major plant maintenance, substation construction and electric line construction contractors working on the Company's facilities and the estimated duration of such work.

Section 4. Definition Of Emergency

An emergency, as referred to in this Agreement, is any unforeseen circumstance which involves the safety of any person, loss of or damage to any property, or interruption of or interference with service or operation.

Section 5. Wages While Negotiating

During negotiations for the amendment or replacement of this Agreement, the Company will pay basic straight-time wages to not more than twenty-four employee representatives of the

[33] July 3, 1963 #4(C)
[34] July 24, 1970 #3
[35] July 1, 1960 #2

Union for time lost from their normal work schedules while attending meetings with Company representatives. If any of these Union representatives is a shift or scheduled worker and the employee's schedule of normal work coverage includes shifts directly preceding and directly following the time during which a negotiation meeting with the Company takes place, the employee will be allowed time off with basic straight-time wages from either the shift directly preceding or the shift directly following, but not both, provided that the period of time elapsing between the end of the shift directly preceding and the beginning of the shift directly following does not exceed sixteen hours.

[36]Section 6. Work Outside of Company Area

It is recognized that the Company may occasionally assign employees covered by this Agreement to work in locations and upon facilities other than those owned or operated by the Company. On such occasions the employees involved, the Union and the Company shall be bound by the provisions of this Agreement except that when emergency assistance to other utility companies is involved, Section 2 of Article XII shall not be applicable. All hours for travel time or work time paid at a straight- time rate under the terms of this Agreement will be paid at double straight-time rates, when employees are assigned to work in locations or upon facilities other than those owned or operated by Eversource Energy.

Section 7. Relative Policy

It is understood and agreed that notwithstanding the provisions of the collective bargaining agreement between the parties, relatives of employees will not be hired, transferred or promoted into situations where the possibility of favoritism or conflicts of interest might exist. These restrictions also apply to a relative who is working on Company property through a contractor or vendor agency. A relative of an employee will not be hired, transferred or promoted into the same department unless the employee reports to a different supervisor. Additionally, a relative of an employee will not be hired, transferred or promoted into a position in which the relative would be in the employee's direct chain of command (no matter how far removed geographically).

Relatives (including Step-relatives) are defined as:

Father	Wife	Uncle
Mother	Father-in-Law	Aunt
Son	Mother-in-Law	Nephew
Daughter	Son-in-Law	Niece
Brother	Daughter-in-Law	Grandfather
Sister	Brother-in-Law	Grandmother
Husband	Sister-in-Law	Grandchild

If any liability is incurred as a result of discrimination charges that directly result from this Relative Policy, the Company will assume said liability.

[36] Topic: Storm Assignment

ARTICLE X
Strikes and Lockouts

Section 1. The Company agrees that there shall be no lockout and the Union agrees that there shall be no strike or stoppage of work during the period of this Contract. The Company agrees that no action will be taken against the Union as an organization, or its officers while acting as such, for any damage which may be sustained as a result of any strike or stoppage of work not countenanced or authorized by the Union.

ARTICLE XI
Employee Benefits

Section 1.

1.(a) The Company agrees to continue in effect for the period of this Agreement the benefits and eligibility requirements which apply to employees and their dependents where applicable under its current Group Life Insurance Plan, and Health Insurance Plan and the current Northeast Utilities Retirement Plan as amended. January 1, 2008, for employees hired prior to January 1, 2010, and to offer the K-Vantage Benefit to employees hired after December 31, 2009. K-Vantage will also be available to employees hired prior to January 1, 2010, who choose K-Vantage before January 1, 2010 in lieu of additional service and earnings credits under the Northeast Utilities Service Company Retirement Plan. Employees originally hired into NU System Companies other than NStar who transfer into the union after January 1, 2010 will retain the same retirement benefit plan elections (under the NUSCO Retirement Plan or K-Vantage) they have immediately prior to the transfer, and will not be given an opportunity to make a new election for either plan. Employees transferred into the union from NStar will be treated as new hires as of their transfer date and will participate in K-Vantage. Previous vesting service from NStar will be recognized for vesting of K-Vantage benefits.

1.(b) Should the Company make any major changes which affect privileges or benefits to employees under any major policy, plan, or program not specifically covered by this Agreement but affecting employees hereunder, the Company shall, if it recognizes such change as significant, notify the Union in writing of such proposed change and the effective date thereof and the Union may, if it so desires, request in writing at any time within thirty days after notice of such change, that a meeting be arranged to discuss the effect of such change on employees and the Company will promptly arrange such a meeting. If notice of such change has not been given, the Company will arrange a meeting for discussing it promptly on request of the Union.

1.(c) It is understood and agreed by the Union and the Company that continuation of benefits provided under the Plans shall, of necessity, be contingent upon the rules and regulations applicable thereto and that the Company and its Plan Carriers will have authority to administer the Plans in accordance with such rules and regulations. Any change in a policy or practice covered by this Section which is not specifically mentioned in this Agreement or any question concerning the Company's application of such policies and practices of the Pension Plan, Group Life Insurance Plan or Health Insurance Plan shall not be subject to grievance procedure or arbitration.

Section 2. Company-Sustained Injury; Total Incapacity

If during the term of this Agreement a regular employee sustains an injury on a Company job which results in total incapacity and which prevents the employee from doing any work and which is compensable under the Worker’s Compensation laws of the State of

Connecticut, the employee shall be paid the differential between the employee's normal basic after-tax wages and Worker's Compensation benefits for the period of total incapacity not in excess of one year from the date of the injury. If it is established that the injury is caused by the negligence of a third party and that third party makes settlement with the injured employee, the Company shall be reimbursed for all wage payments made to the injured employee to the extent that such settlement covers the Company's payments made under the terms of this provision.

Section 3. Employee Benefits – Increase Accidental Death Benefits

3.(a) **Notification to Union** - It is the Company's intention to continue its past practices with respect to employee benefits. Should the Company contemplate any diminution of employee benefits affecting bargaining-unit employees, the matter will be discussed with the Union in advance of the change.

3.(b) **Accidental Death Provision** - In the event any bargaining-unit employee dies as a result of a job-connected injury and benefit is payable under the accidental death provisions of Group Policy No. GC-323337, the Company will provide an additional benefit equal to the amount payable under such accidental death provisions. These benefits are in addition to life insurance coverage provided under Group Policy No. GL-323337.

Section 4. Dutch Point Credit Union

The Company will provide payroll deduction for employees desiring membership in the Dutch Point Credit Union**.**

ARTICLE XII
Expense Allowance

Section 1. Travel Time and Transportation

When required to work distant from their base area, employees will be paid expense and travel allowances as follows:

1.(a) When the Company supplies transportation between the base and work, employees will be allowed travel time at the rate applicable and equal to the time spent en route.

1.(b) When requested to travel by means of specific public transportation, employees will receive the actual fare paid and will be allowed travel time at the rate applicable and equal to the time spent en route.

Section 2. Expense Plans Outside Base Area

Except when Section 1. or Section 3. of this Article is applicable, an employee required to make the employee’s own arrangements to report at a job location including all training assignments outside the employee’s base area (except satellite/line shops or when the job location distance one way is ten (10) miles or less) will be paid a daily expense allowance as provided under one of the following Plans:

Plan A - If the distance one way is twenty-five miles or less; $28.32 per day.

Plan B - If the distance one way is over twenty-five miles but not over forty miles; $50.18 per day.

Plan C - If the distance one way is over forty miles but not over sixty miles; $57.39 per day.

Plan D - If the distance one way is over sixty miles but not over ninety miles; $64.82 per day. When the distance is beyond ninety miles, the employee will be paid mileage at the current NU mileage rate per mile for each mile beyond ninety miles.

2.(a) If on any day an employee travels one way to or returns one way from a job location under the provisions of Section 1. of this Article, the employee will be paid an expense allowance on that day under one of the following Plans:

Plan E - If the distance one way is thirty miles or less, $24.34 per day.

Plan F - If the distance one way is over thirty miles; $33.41 per day.

2.(b) For the purposes of the above Plans, distances shall be measured over highways which are reasonably passable and which provide the shortest routes between the employee's base area headquarters and the job locations involved.

2.(c) If an employee is required to report at two or more job locations outside of the employee's base area on one day the employee will be paid the daily expense allowance provided under the Plan applicable to the job location which is the greatest distance from the employee's base area headquarters. In addition, the employee will be paid mileage at the current Eversource mileage rate per mile one way for the actual distance traveled between the job locations involved on that day. This Section 2.(c) will not be applied to require an employee to report at two or more job locations on one day involving Plans B, C, D, or F except when it is necessary to do so to provide a full day's work or when emergency work is required. Whenever possible, employees will be advised not later than the day preceding requirement to report at a different job location.

2.(d) As part of the 2009 contract negotiations, the company and union agreed that the mileage reimbursement rate for the CL&P Blue Book and Green Book union agreements will be paid at the current Company mileage rate (i.e., the same rate as non-union employees). This rate will be paid to employees who are authorized to use their personal vehicles while on company time, unless the mileage is otherwise addressed as part of the established contractual expense plans.

It is understood by all parties that the company may change the mileage rate at its sole discretion without notice to, or negotiation with, the union. Changes or modifications to the rate will also not be subject to the grievance and arbitration procedure.

Section 3. Berlin Construction, Work in Central Division

An employee of the Berlin Construction Department assigned to Waterbury who is required to report for work on the job within the towns of Middlebury, Naugatuck, Prospect, Thomaston, Watertown, Wolcott, or Waterbury will be paid mileage at the current Eversource mileage rate per mile to and from the job in lieu of the provisions of Section 2 of this Article.

An employee of the Berlin Construction Department assigned to Newington who is required to report for work on the job within the towns of Berlin, Farmington, Hartford, New Britain, Rocky Hill, West Hartford, Wethersfield, or Newington will be paid mileage at the current Eversource mileage rate per mile to and from the job in lieu of the provisions of Section 2 of this Article.

[37]Section 4. Mileage Allowance for Personal Vehicle

An employee authorized to make occasional use of the employee's personally owned vehicle for Company business during working hours and for which the employee is not being paid a travel expense allowance under other provisions of this Article will be paid for such use at the current Eversource mileage rate per mile. Employees will be paid a daily mileage allowance of at the current Eversource mileage rate per mile to and from the job in lieu of the provisions of Section 2 of this Article if the distance one way to the job location is ten miles or less from the home base or satellite.

Section 5. Company Furnished Meals or Lodgings

During times of emergency when employees cannot be released long enough to make arrangements for their meals or lodgings, the Company at its expense will make suitable arrangements for same. Under such conditions the provisions of Section 5. of this Article shall not apply. For the purpose of this Section meals will be furnished at five-hour intervals unless a majority of the employees concerned in a work group agree to extend the five-hour interval. (See Article VI, Section 15 concerning time off for meals furnished under this Section 5).

Section 6. Transfer Expense Allowance

6.(a) When at the Company's request an employee is reassigned or transferred under the provisions of Article V and a change of residence is required, the employee will be reimbursed for mileage between the employee's former reporting base and the new reporting base and will be paid mileage at the current Eversource mileage rate per mile.

The following conditions apply to above temporary expense allowance:

(1) The expense allowance will be applied for each day the employee provides the employee's own transportation to travel to and/or from the employee's new reporting base.

(2) The amount of expense allowance will be based upon the actual distance in miles between the former and new reporting bases as measured over streets and highways that are reasonably passable and provide the most direct route.

6.(b) In lieu of the expense allowance outlined in Section 6.(a) the Company may either provide the employee with transportation or require the employee to live in the employee's new base area and make arrangements for the employee's meals and lodgings at Company expense.

[37] Letter- mileage

6.(c) Payment of the expense allowance or provision of transportation or meals and lodging under this Section 6 will be limited to the first thirteen weeks from the effective date of assignment at the new reporting base or until the effective date of the employee's change of residence, whichever occurs earlier.

Section 7. Review of Expense Allowances

When in the judgment of the Company the expense allowances provided in this Article are insufficient to cover reasonable expenses it may, upon review of any particular case, make an additional allowance to cover expenses actually incurred. When an employee is assigned to work in another District, arrangements will be made either directly with the employee or through the employee's supervisor to meet the employee's reasonable expenses and the Business Manager and/or Assistant Business Manager will be advised.

Section 8. Change in Current Practices or Privilege

If, during the term of this Agreement, the Company contemplates changing a current practice or privilege, not specifically covered in this Agreement, which, if changed, would result in a significant increase in employees' personal expenses, the Business Manager or an Assistant Business Manager of the Local Union concerned will be advised in advance of the change as soon as practicable. Upon request of either party, Union and Company representatives will meet for discussion of such change.

[38]**Section 9. Tool Allowance**

The Company will provide an annual tool upgrade allowance of up to **$375.00** per year for Garage Mechanics. The employee must furnish a receipt of purchase for reimbursement documenting the purchase of job specific tools.

Any new or replacement tools required by the Company for performance of any job will be furnished by the Company except that the employee will be responsible for any tools lost or damaged through the employee's own negligence.

Effective June 1, 1986 new hires and transferees to the Garage Mechanic Classification shall provide and own all ordinary hand tools commonly required in the employee's regular assignment. The Company shall replace employees' personally owned hand tools if worn out or broken in normal use on the job. Worn out and broken tools replaced in accordance with this provision shall be turned over to and become the property of the Company.

If an employee's tools are stolen, they will be replaced by the Company, if, in the Company's opinion a valid and justifiable claim exists.

[39]**Section 10. Commercial Driver's License**

The Company will pay applicable costs associated with obtaining a Commercial Driver's License required by the duties performed of the classification.

Applicable costs Include:

[38] Topic: Replacement of employee's tools when stolen
[39] Topic: Commercial Driver's License

(a) endorsements
(b) various test fees
(c) issuance of permit

In addition, the Company will pay the cost difference between the employee's license fee and the license fee of the job-required CDL.

Section 11. Storm Assignment Or Other Emergency Situation

If an employee is assigned to an out of district storm assignment or other emergency situation that may require an overnight stay, and the assignment is made during the employee's regular work hours, the Company will provide ½ hour early dismissal, without loss of wages. In the event that the employee was not provided ½ hour early dismissal, the Company will provide a one-time $25.00 payment to the employee for that overnight storm or emergency event.

ARTICLE XIII
Compliance With Law

No provision in this Agreement shall be deemed to require the Company or the Union to disregard existing or future laws affecting the relations of the Company, the Union and employees. All provisions of this Agreement are subject to all applicable laws now or hereafter in effect and to the lawful regulations, rulings and orders of regulatory bodies having jurisdiction. If any such laws, regulations, rulings or orders shall conflict with any provision of this Agreement, the Company and the Union shall confer to negotiate a lawful modification. The lawful invalidating of any provision shall not affect the remaining provisions of this Agreement and it shall not constitute a grievance for the purposes of Article IV.

ARTICLE XIV
Letters of Understanding

Incorporated herein and made a part hereof by reference are confirming letters of understanding from the Company to the Union which pertain to:

1. **System Projects** – System Projects which is dated March 16, 1998. This letter can be found in Appendix D.

ARTICLE XV
Duration

This Agreement constitutes the entire Agreement of the parties except such amendments or supplementary Agreements as are reduced to writing and signed by the parties hereto.

This Agreement supersedes all previous agreements and shall continue in force from the first day of June 1, 2016 until June 1, 2019 and thereafter for periods of one year unless canceled by advance notice in writing by either party to the other, the advance notice to be given at any time during a thirty-day period, the beginning of which period is ninety days prior to June 1, 2019 or June 1st of any year thereafter.

If either party desires to amend this Agreement on June 1, 2019 anniversary date or on June 1st of any year thereafter, a list of all proposed changes shall be submitted to the other party in writing prior to March 1st of the year involved. The party receiving the proposed changes shall have until March 10th to submit additional proposed changes to the other party. The Company and the Union agree to meet promptly thereafter in the period between the 90th and 61st day prior to the anniversary date of the Agreement to discuss the proposed changes and endeavor to reach an understanding on them. If all proposed changes are not thus disposed of in a mutually satisfactory manner, (1) the proposed changes remaining in dispute may, by mutual agreement, be submitted to arbitration or (2) either party prior to May 1st of that year may serve notice of cancellation of the Agreement if such action is deemed desirable. If all proposed changes are disposed of in a mutually satisfactory manner, the amendments mutually agreed upon shall take effect on the following June 1st, unless the parties agree upon a different effective date.

If notice is given as provided for above it shall be by registered mail addressed to, respectively:

Director-Labor Relations
The Connecticut Light and Power Company
P.O. Box 270, Hartford, Connecticut 06141-0270

or

Recording Secretary
Local Union No. 420
550 Wolcott Street
Waterbury, Connecticut 06705

and

Recording Secretary
Local Union No. 457
2590 Berlin Turnpike, Suite 1
Berlin, Connecticut 06037

This Agreement shall become effective when signed by the authorized representatives of the parties.

In witness whereof we have attached our hand and seal.

FOR THE UNION:

_____ Date_____
Joseph A. Malcarne
Business Manager, Local 420

_____ Date_____
John Fernandes
Business Manager, Local 457

FOR THE COMPANY:

_____ Date_____
Joseph C. Picone
Manager- Labor Relations

APPROVED FOR THE INTERNATIONAL OFFICE OF THE UNION:

_____ Date_____
Lonnie R. Stephenson
International President

[40]ARTICLE XVI
Contract Period and Renewal

(a) This Agreement shall be effective from the first day of June 2016 and shall remain in full force and effect until the first day of June 2019 and from year to year thereafter unless changed in a manner later provided.

(b) Either party desiring to cancel the Agreement or to make changes in it must notify the other in writing at least sixty (60) days prior to the expiration date of the Agreement or any extension thereof.

	Utility Worker	As Assigned	+	$24.12	$37.21

s Shift or scheduled workers

* Rate bands designated with "*" provide minimum rates which are probationary for one year and maximum rates which are paid after the probationary period to qualified workers who regularly perform the grade of work specified for the rate band.

x Rate bands designated with "x" provide minimum rates which are probationary for six months and maximum rates which are paid after the probationary period to qualified workers who regularly perform the grade of work specified for the rate band.

y Rate bands designed with “y” provide for increases at approximately six- month intervals to employees who make satisfactory progress.

z Rate bands designated with "z" provide minimum and maximum rates and intermediate rates which will be based upon an employee's relative skill, efficiency and ability to perform the work assigned. After one year of satisfactory performance of the grade of work required for the job classification, employees will be paid the maximum rate of the band applicable to the job classification.

† Rate bands designated by "†" cover the range starting with the new employee or beginner and finishing with an experienced and fully qualified worker or helper in the respective job classifications. Increases within these bands are made at approximately six-month intervals to employees who make satisfactory progress. The hourly rate step increases applicable to the job classifications are as follows:

1(a) When an employee in any job classification is assigned to work on a shift which includes one hour or more between the hours of 6:00 p.m. and 6:00 a.m. of the following day, will receive an additional payment of $2.50 per hour.

1(b) When an employee in any job classification is assigned to work on a shift which includes one hour or more on a Sunday, the employee will receive a premium of 25 percent of the employee’s basic straight time rate in addition to the employee’s basic straight time rate.

APPENDIX "A" -

s Shift or scheduled workers

* Rate bands designated with "*" provide minimum rates which are probationary for one year and maximum rates which are paid after the probationary period to qualified workers who regularly perform the grade of work specified for the rate band.

x Rate bands designated with "x" provide minimum rates which are probationary for six months and maximum rates which are paid after the probationary period to qualified workers who regularly perform the grade of work specified for the rate band.

y Rate bands designed with “y” provide for increases at approximately six- month intervals to employees who make satisfactory progress.

z Rate bands designated with "z" provide minimum and maximum rates and intermediate rates which will be based upon an employee's relative skill, efficiency and ability to perform the work assigned. After one year of satisfactory performance of the grade of work required for the job classification, employees will be paid the maximum rate of the band applicable to the job classification.

† Rate bands designated by "†" cover the range starting with the new employee or beginner and finishing with an experienced and fully qualified worker or helper in the respective job classifications. Increases within these bands are made at approximately six-month intervals to employees who make satisfactory progress. The hourly rate step increases applicable to the job classifications are as follows:

1(a) When an employee in any job classification is assigned to work on a shift which includes one hour or more between the hours of 6:00 p.m. and 6:00 a.m. of the following day, will receive an additional payment of $2.50 per hour.

1(b) When an employee in any job classification is assigned to work on a shift which includes one hour or more on a Sunday, the employee will receive a premium of 25 percent of the employee’s basic straight time rate in addition to the employee’s basic straight time rate.

APPENDIX "A" -

ATTENTION: DIRECTOR - LABOR RELATIONS

I hereby authorize The Connecticut Light & Power Company to make a single initiation fee deduction and in addition to deduct from my wages each month union membership dues in Local 420 and Local 457 of the International Brotherhood of Electrical Workers in such sums as from time to time the secretary/treasurer of Local 420 and Local 457 of the International Brotherhood of Electrical Workers may certify. Initiation fees and dues covered by this authorization are not deductible as charitable contributions for federal income tax purpose.

I further direct the Company to remit the amount deducted to the Union Officer designated by the Union to receive such payments.

This authorization shall be effective for the duration of any written agreement or extension thereof between The Connecticut Light & Power Company and Local Union Nos. 420 and 457 of the International Brotherhood of Electrical Workers, et al unless canceled in writing by me.

PROVISIONS PERTAINING EXCLUSIVELY TO TEST/TECH EMPLOYEES (FORMERLY TECHNICAL CONTRACT)

WAGES

1.(a) Appendix “A” attached hereto and made a part hereof lists the job classifications covered by this agreement for non-exempt individuals. Appendix “A” shows the basic straight-time hourly rates of pay applicable to each job classification effective as of **May 29, 2016, June 1, 2017 and June 1, 2018,** for employees who are employed in the listed job classifications on the date this Agreement is signed by authorized representatives.

1.(b) Effective **May 29, 2016, June 1, 2017 and June 1, 2018,** each exempt individual's current salary will be adjusted based on their latest performance rating as follows:

Performance Rating	**Percent Ranges**
Top Achiever	0% - 8%
High Contributor	0% - 6%
Successful Contributor or Developing	0% - 6%
Improvement Needed to be a Successful Contributor	0%
Did Not Meet Performance Expectations	0%

When to pay lump sum:

Performance	**Relationship to Band Max**
Top Achiever	100% or greater
High Contributor	97.5% or greater
Successful Contributor or Developing	95% or greater
Improvement Needed to be a Successful Contributor	No lump sum or pay increase

Did Not Meet Performance Expectations	No lump sum or pay increase

1.(c) The Company will determine an individual's salary adjustment amount based on the pay increase percent ranges of Section 1.(a) and 1.(b).

2. All employees will be reviewed annually on the effective date of wages as to their progress within the rate range of the job based on their most recent performance review.

3. The Company's determination on such reviews shall not be subject to grievance or arbitration.

4. The job classifications within the respective wage rates shall be as provided in Appendix "B".

OVERTIME – FOR TEST ONLY

a. Insofar as practicable overtime work will be equitably distributed among suitably qualified employees who are in the job classifications in the area in which the work is to be performed. Overtime distribution for Lead Test Advisor assigned to a project is described in section 11.b. below. Records of distribution of overtime work will be made available to designated Union representatives upon their request and also posted on a weekly basis. Overtime lists will be furnished to the Business Manager on a monthly basis.

b. Lead Test Advisor Project Overtime Distribution

1. Insofar as necessary for a project where periods of extended overtime is involved; job classifications in the area in which the work is to be performed and the overtime list will be used in the selection of the lead test advisor for a project.

2. The lead test advisor shall be afforded all overtime hours associated with the project. The lead test advisor’s overtime hours will be evaluated every 2 months to maintain equitable distribution of overtime in accordance with Article 11, Section a.

3. In the event the lead test advisor assigned to the project is unavailable to work overtime and there is a second qualified test person assigned to the project, this person will be afforded the first right to assume the lead test advisor position for a limited time.

CALLOUT

Travel Time

Employees utilizing company supplied transportation, who have completed their scheduled workday and are called out without advanced notice will be paid at the rate applicable and equal to the time spent en route to and from work location.

LEAVES OF ABSENCE

1. The Company, at its discretion, may grant leaves of absence for personal reasons.

2. Requests for leaves of absence, including any extensions, must be submitted in writing as far in advance of the requested period of absence as is possible, shall designate the period of the leave and its purpose.

3. Written requests for leaves of absence shall be considered on a case-by-case basis.

4. Leaves of absence that are granted by the Company will be in writing, shall designate the period of the leave and its purpose.

5. An employee's seniority shall cease and such employee will be terminated as an employee if such employee fails to return to work upon termination of the leave of absence.

TOPIC: EXEMPT PAY PROVISIONS

Central Region Distribution Test Unit
Eastern Region Distribution Test Unit
Western Region Transmission Test Unit
Western Region Distribution Test Unit
Eastern Region Transmission Test Unit

These pay provisions apply to all union employees covered by this contract who are designated "exempt" under the Fair Labor Standards Act (FLSA). These pay provisions supersede all other pay provisions of this contract.

Work Day - Work Week

Exempt employees are paid an annual salary (paid biweekly) and are expected to work those hours necessary to complete the assignments of their job. Exempt employees are not normally compensated for working hours in excess of the normal scheduled work day or work week. The normal scheduled work week shall be five (5) days, Monday through Friday.

Salary

The negotiated Time Merit Progression with rates of pay shall be provided in Appendix A.

The job Classifications shall be provided in Appendix B.

All exempt employees will have their performance reviewed annually. Their progress within the range of the job will be based on their most recent performance review. The Company's determination on such reviews shall not be subject to grievance or arbitration.

An exempt employee whose current base salary is at or above the going rate of their salary grade, will receive any pay increase as a lump sum amount.

An exempt employee whose current base salary is below the going rate of their salary grade will receive a salary adjustment up to a maximum of the going rate, and any amount of the increase that would be over the going rate will be paid as a lump sum amount.

Overtime

Exempt employees will be paid an annual salary (paid biweekly). This salary will cover the regular work schedule and a reasonable amount of hours outside of the regular schedule. The normal work schedule will consist of five days.

When exempt employees are assigned to work outside their regular work schedule or on Saturdays, Sundays, or holidays, it will normally be without additional salary, unless it is authorized overtime and a four-hour weekly corridor will be applied, or during an emergency. During an emergency, exempt employees will be paid in accordance with Company policy for exempt pay during Storm Restoration (See Storm Restoration Guide below).

Exempt employees are not subject to the pay provisions of this contract concerning overtime pay (Article 11), callout pay (Article 12), rest time pay (Article 13), meal time pay (Article 14-paragraph 2), or jury duty (Article 20). Exempt employees not serving an on-call rotation assignment are not normally eligible for on-call pay. (See Storm Restoration Guide below.)

Records of distribution of overtime work for exempt employees will be made available to designated union representatives upon request and also posted on a weekly basis.

Storm Restoration

When assigned for storm restoration to other utility companies outside of the State of Connecticut, which are not within the NU System, an exempt employee will receive compensation at approximately two times salary, paid biweekly.

During storms within the NU System, an exempt employee will receive a special overtime rate in accordance with the NU System Emergency Restoration Guide.

NU System Emergency Restoration Guide

Exempt employees are expected to participate in NU System Emergency Restoration as needed. A System emergency is one created by natural or technological disasters that interrupt electric service to NU customers.

Exempt employees assigned to NU System Emergency Restoration duty will be paid a flat rate per hour for each hour worked: 1) over and above their regular work schedule, or 2) after the first eight hours worked each day (time code 232). During such Storm Restoration Assignments, exempt employees are paid from first hour worked over and above their regular work schedule. Exempt employees are not paid for travel time to their assigned emergency location.

Qualified on-call supervisors (normally serve an on-call rotation assignment) who are assigned to the supervision of line/electrical craft workers during Emergency Storm Restoration will be paid at

an overtime rate of 1.4 times their hourly flat rate for all hours worked 1) outside their regular work schedule, or 2) after the first eight hours worked each day (time code 208). Such an on-call supervisor, if placed on-call, is required to remain fit for duty, near the reporting area, and to be continuously available for duty as assigned.

Exempt employees will be reimbursed for personal vehicle use during NU System Emergency Restoration at the standard flat rate per mile in accordance with Article 14-paragraph 4. Out-of-pocket meal expenses, when accompanied by a receipt, will be reimbursed for the reasonable cost of such meal.

TOPIC: UPGRADING – PROJECT TEST SPECIALIST / TEST SPECIALIST 3 or 4

Central Region Distribution Test Unit
Eastern Region Distribution Test Unit
Western Region Transmission Test Unit
Western Region Distribution Test Unit
Eastern Region Transmission Test Unit

In the absence of a supervisor for an extended period of time (e.g., vacation, illness), when a Project Test Specialist / Test Specialist 3 or 4 is specifically assigned supervisory responsibilities, the employee will be upgraded and will be paid two dollars and fifty cents ($2.50) per hour in addition to their basic straight-time hourly rate for all hours so-assigned.

Upgrade to supervisor will normally be offered on a senior to junior departmental seniority basis.

When a Project Test Specialist is assigned to a major/complex project (as defined below) ** to temporarily provide Lead Advisory direction in their specific area of expertise, the employee at the job location/satellite will be upgraded and will be paid two dollars ($2.00) per hour in addition to their basic straight-time hourly rate for all hours so-assigned.

When a Test Specialist 3 or 4 is assigned to a project to temporarily provide Lead Advisory direction in their specific area of expertise, the employee at the job location/satellite will be upgraded and will be paid two dollars ($2.00) per hour in addition to their basic straight-time hourly rate for all hours so-assigned. Test Specialists 3 or 4 cannot be forced to take an upgrade.

Upgrade to Lead Test Advisor will normally be offered on a senior to junior departmental seniority basis or by Article 11.b (Lead Test Advisor Project Overtime Distribution) where extended overtime is involved.

**The definition of eligible jobs which qualify for Lead Advisory upgrade is shown by the following examples:

Examples of prior major/complex jobs are:

Branford Substation Conversion Project (Ref. 1997 work)
AMTRAC (Ref. 1999 work)
Simsbury Substation (Ref. 1998/1999 work)
Williams Street Substation (Ref. 1999 work)
Cheshire Industrial Park (Ref. RSAM Project 1997/1998)
23kV conversion - Cheshire/Madison (Ref. 1997/ 1998 work)
Stepstone Substation (2008)
Rood Avenue Substation (2009)

Bloomfield Substation Breaker and Relay Refurbishment (2010)
Southington 345.115 Autotransformer LTC Control (2012)
Westside Substation Project (2010)
Boehringer/Ingelhiem VISTA gear with SEL protective relays (2011)
Middlesex Hospital Co-Gen (2012)

Major/complex job assignments typically include several of the following elements:

Advance job planning
Major/complex equipment installation
Major/complex field reengineering/redesign
Coordination of multiple work group disciplines
Coordination of work schedules for multiple work entities, i.e., contractors, customers.
Potential for major customer exposure

Examples of jobs that do not qualify for upgrade include:

Doble Testing
Battery Testing
Cable Testing
Recloser Testing
Timer Testing
Bucket Truck Testing
Distribution Relay Testing
Transmission Relay testing
Insulation Testing
Ground Testing
Cable Fault location
Radio/TV interference
Troubleshooting equipment failures
Power Quality investigations
Stray Voltage investigations
Records management

Jobs which would normally not qualify for upgrade, but depending on the complexity and size of a specific job, would be evaluated by the supervisor on a case-by-case basis:

Mobil Transformer Installation
Commission Auto Loop System
Substation/Distribution Disturbance Analysis
Commissioning NUGs/Cogens

TOPIC: PROJECT TEST SPECIALIST UPGRADE

MEMORANDUM OF UNDERSTANDING

Project Test Specialist/Test Specialist 3 or 4 Upgrade

One test person Project Test Specialist/Test Specialist 3 or 4) per construction project will receive a double upgrade for providing technical support to contractors for complex substation construction electrical wiring projects where the scope of the job includes:

- Sequencing of work, work plan development and job planning functions, and
- Leading the contractors with translating the schemes, wiring changes, device identification and functionality, and
- Providing technical direction although not supervisory direction for the job.

Note: the testing services for these construction projects would be provided by the Regional Test personnel.

/s/ Theresa Kmetetz, Assistant Business Manager 12/11/01
Local 457

/s/ Raymond C. DiCenso, Sr HR Consultant 12/10/01
Labor Relations

TOPIC: UPGRADE TO ELECTRIC SERVICE DESIGNER SPECIALIST

When a fully qualified top step Electric Service Designer is specifically assigned by his/her supervisor to perform work on a network system, primary metering or mentoring, the employee will be upgraded to the first step rate of the Electric Service Designer Specialist for those hours assigned to perform the upgraded work.

TOPIC: ON-CALL ASSIGNMENTS – ELECTRIC SERVICE DESIGNERS AND ELECTRIC SERVICE DESIGNER SPECIALISTS

The Company will extend the Teal Book on-call rate to Electric Service Designers and Electric Service Designer Specialists, who have agreed to be put on-call at the request of the Company. All of the provisions and requirements of on-call will apply to employees who have volunteered to be placed on-call.

Exempt Employees

Exempt employees whose job requirements include assignment to take trouble calls outside of normal scheduled hours will use on-call pay codes and will be paid in accordance with Company policy.

PROVISIONS PERTAINING EXCLUSIVELY TO ENGINEERING DESIGNERS AND DISTRIBUTION DESIGN ENGINEERS

Engineering Designers and Senior Engineering Designers

Engineering Designers and Senior Engineering Designers whose base rate is above the Engineering Designer III, Step 4 rate will receive the negotiated contractual wage increase in the form of a lump sum until the Engineering Designer III, Step 4 rate catches up to their respective

base rate. See Appendix A. In addition, Engineering Designers and Senior Engineering Designers will be eligible for overtime compensation in accordance with the contract.

Engineering Designers

Engineering Designers III will receive a $1.75 per hour upgrade to their base rate for those hours specifically assigned by his/her supervisor to:

- Act on behalf of Engineering Supervisor in his/her absence
- Act as team lead in project assignments in which multiple designers are needed
- Provide engineering training and technical leadership for more than one hour

Distribution Design and Senior Distribution Design Engineers

This group of employees will not be eligible for overtime or any other premium pay cited in Article VI and VII of the Teal contract.

The Pay for Performance methodology will remain in effect with respect to wage increases for this group. Effective June 1, 2017 and June 1, 2018, each exempt individual's current salary will be adjusted based on their latest performance rating as follows:

Performance Rating	**Percent Ranges***
Top Achiever	0% - 6%
High Contributor	0% - 5%
Successful Contributor or Developing	0% - 4%
Improvement Needed to be a Successful Contributor	0%
Did Not Meet Performance Expectations	0%

*If a merit increase budget is awarded, employees rated Successful Contributor, High Contributor or Top Achiever will receive a dollar amount increase in their base salary and/or lump sum.

APPENDIX "D"

TOPICS

TOPIC: Labor/Management Committee

The Company and Union agree to establish a joint labor/management committee to meet periodically (quarterly) during the term of the agreement to identify opportunities and develop plans to improve the quality and performance of our operations.

The Committee shall be composed of five bargaining unit employees and five management employees. The first meeting will be scheduled in September 2016 (or any other mutually agreed date).

The topics and issues to be addressed may include but not be limited to:

- "State of the Company" session including Business Plan and objectives
- Safety/Training
- Opportunities to partner on specific initiatives
- New technology (engineering)
- Employee engagement

Topic: Expanded Loading Duties for Stockhandlers

EVERSOURCE ENERGY

107 Selden Street
Berlin, CT 06037

May 25, 2016

This confirms an agreement reached between The Connecticut Light & Power dba Eversource Energy and IBEW Locals 420 and 457 for the expanded loading duties for the Stockhandlers:

1. The Company will expand the current practice of loading by the Stockhandlers, to include material and equipment such as but not limited to, cable reels and transformers onto Company vehicles.
2. It is not the intent of the Company to remove loading duties from any classification that presently performs these duties, nor is it the intent to give any classification exclusivity to the duties associated with loading and unloading.
3. The Company will train Stockhandlers on equipment necessary to perform the expanded loading duties.
4. The Company may need to reassign Stockhandlers to schedules between the hours of 6:00 AM to 6:00 PM to perform the expanded loading duties.
5. The Company will agree to post and fill 5 Stockhandler positions, locations to be determined.
6. $1.00 adder to incumbent employee base rate that obtains and maintains CDL (B).
7. New hires must be able to obtain and maintain valid CDL (B).

Sincerely,

Manager, Labor Relations

Agreed:

Joe Malcarne
Business Manager, IBEW, Local 420

John Fernandes
Business Manager, IBEW, Local 457

TOPIC: Training of Cadets – It is not the intent to train Cadets for Supervisor positions or for the acquisition of manual skills.

Company Intent – It is the Company's intent to accomplish the training of Cadet Engineers without adversely affecting training or promotional opportunity for helpers and classified workers covered by the Union Agreement and the Company will not exclude helpers and classified workers from consideration for appointment to the position of Engineering Assistant in training. Cadet Engineers will not be assigned as substitutes for helpers or classified workers to avoid employing helpers and classified workers needed to meet the Company's work requirements. Engineering Assistants may be assigned to assist supervisors in the performance of their duties by preparing and transmitting work orders, inspecting work progress and such other specific tasks which they may, in the management's opinion, be capable of performing.

TOPIC: Vacations

(A) With reference to discussion of Article VII –Vacations, it is the Company's intention to continue to administer vacation policies in accordance with Employee Relations Instruction No. 9314 and 9904 as set forth in The Connecticut Light and Power Company Manual of Procedures. Should the Company contemplate any change in these instructions affecting bargaining-unit employees, the matter will be discussed with the union in advance of the change.

(B) Illness or Injury Immediately Preceding or During Scheduled Vacation.

(C) In the event that an employee becomes incapacitated immediately preceding or during the employee's scheduled vacation, due to illness or injury, and the employee notifies the employee's supervisor of such illness or injury as soon as possible, that portion of the employee's vacation period during which the employee is incapacitated may be rescheduled, at the option of the Company, to another time during the calendar year.

(D) In determining whether the employee's vacation should be rescheduled due to illness or injury, occurring immediately preceding or during the employee's scheduled vacation, the Company may request from the employee verification from the attending physician.

(E) In the event vacation to be rescheduled under paragraph 3.(D) cannot be rescheduled during the current calendar year, it will be rescheduled (up to eighty hours), in accordance with Article VII, Section 3, within the following calendar year.

(F) When a former employee of the Company is re-employed and completes five years of continuous service, such prior service will be included in the employee's total length of service for the purpose of determining the amount of vacation eligibility, provided such prior service had been for a period of six months or more and other than on a temporary basis.

(G) Granting of credit for prior service for vacation eligibility will not change an employee's company or classification seniority date.

TOPIC: Replacement of Employee's Tools when Stolen and Garage Mechanic Tool Allowance. (Effective January 1, 2010)

If an employee's tools are stolen, they will be replaced by the Company, if, in the Company's opinion a valid and justifiable claim exists.

The Company will provide an annual tool upgrade allowance of up to $250.00 per year for Garage Mechanics. The employee must furnish a receipt of purchase for reimbursement documenting the purchase of job specific tools.

TOPIC: Subcommittee Agreements with Respect to Line-Tensioning Equipment and Progression Sequence of the Construction Equipment Operator Classification.

The parties agree that line-tensioning equipment that was being operated by construction equipment operators may be operated by any qualified employee(s).

TOPIC: Time-Merit Progression Programs in Effect

Letter of April 26, 1966
Line Helper to Lineman – (effective May 29, 1966, revised September 23, 1985, and January 6, 2005)
Electrician Helper to Electrician – (effective May 29, 1966, revised November 5, 1985 and March 19, 2008)
Splicer Helper to Splicer – (effective May 29, 1966, revised October 25, 1985, and March 19, 2008)

Letter of April 4, 1968
Mechanic Helper to Construction Mechanic – (effective April 1, 1968)
Mechanic Helper to Construction Mechanic (revised January 6, 1986)
Stockhandler – (effective January 5, 1969, revised June 1, 1986 and June 1, 2004)

Letter of January 14, 1970
Garage Mechanic Helper to Garage Mechanic – (effective January 4, 1970, revised November 14, 1985 and August 1, 2005)

Letter of June 3, 1993
Meter Service Mechanic/Installer (effective 1993, revised May 9, 2008)

TOPIC: Executive Instruction No. 18 – Uniforms: Customer Contact Personnel

Once a year the Company will arrange and pay for a complete overhaul and cleaning of all uniforms, at which time any replacements and repairs that may be necessary should be made. This overhaul and cleaning should be arranged for locally and performed without interfering with normal work assignments. In addition, the Company will provide for cleaning every two weeks.

TOPIC: Upgrading to Construction Eq. Op.

An employee upgraded to Construction Equipment Operator will be paid at the rate of $36.11 effective May 31, 2009; $37.19 effective May 30, 2010; $38.31 effective May 29, 2011.

TOPIC: Job Specifications

The following job specifications have been agreed on by the Company and the Union:

Automotive Equipment Mechanic (Berlin and Waterbury only)
Laborer
Building Maintenance Mechanic
Groundman
Survey Party Assistant (Berlin)
Instrument Mechanic (Berlin)
Chief of Party (Berlin) (Revised April 19, 1987)
Carpenter
URD Equipment Operator
Tester – Electric Meter Laboratory Helper – Tester – Electric Meter Laboratory Meter-Service Mechanic Helper – Electric – Meter-Service Mechanic – Electric (Revised June 1, 1989)
Meter Service Installer (Revised June 1, 1993)

TOPIC: Employee Progress Reports

In the future Employees will be furnished with a copy of their progress reports.

TOPIC: URD Construction Crew

URD Construction Crews will consist of one, two, three or more qualified personnel. The number of employees assigned will be dependent on the work to be done, and will be made from the Line, Splicer, or Electrical classifications. Additional Groundman, Line Electric or Splicer classified personnel will be supplied whenever required or requested by the person in charge in order to perform the work safely.

TOPIC: Installation of Submersible Transformers in Energized Silos

The scheduled installation or removal of submersible transformers in energized silos will be performed by URD crews equipped with corner-mounted derricks or other equipment assigned to the department involved.

TOPIC: Summer Employees Working Overtime

The Company will not assign temporary summer employees to prearranged overtime work on a day outside of their normal schedule when other employees capable of performing the work are available.

TOPIC: Berlin Construction, Jackson Street and 3333 Employees, Nuclear Plant Assignments

Berlin Construction employees from Jackson Street or 3333 who accept assignment to work nuclear plants, including radiation controlled areas, will be required to accept assignment for a period of not less than one year.

TOPIC: The Effect on Employees of the Establishment of Building 3333

1. It is anticipated that the Company would transfer the following classifications and numbers of employees to Newington Building 3333 during the term of the Agreement.

(1) Chief Construction Mechanic

(3) Construction Mechanics

(3) Carpenters

(2) Utility Workers

(8) Construction Equipment Operators

(2) Construction Welders

2. These transfers of Berlin Construction personnel would be offered on a volunteer basis. If the requirements above are not met on a volunteer basis in the time required, then such transfers will be required on a junior to senior basis in the classifications involved.

3. Additional required numbers of Berlin Construction employees will be reassigned to Newington Building 3333 on a volunteer basis. If the Company is unable to meet its requirements on this basis, then the Company and the Union will discuss the matter and attempt to work out a satisfactory solution. Should a satisfactory solution not be arrived at, the subject will be discussed during the next Company/Union Negotiations.

4. Present Berlin Construction employees headquartered at Jackson Street, Waterbury transferred under Paragraph 2 above, or who are reassigned to Newington Building 3333 either through voluntary action, in

response to job posting or transfer, will have their per diem base "grandfathered" for one year from the date of reassignment.

5. Present Berlin Construction employees reassigned from Jackson Street, Waterbury to Newington Building 3333 will be eligible for moving expenses for the period of one year from the date of their reassignment. Moving expenses include the following:

a. Packing of household furniture and personal effects.

b. Disconnection of major appliances.

c. $100.00 for incidental expenses.

d. Insurance coverage for the move. Employee may suggest mover. Company will engage the mover and make the arrangements with the mover.

6. If the Berlin Construction workload requires, the Company will post and hire into Building 3333.

7. The Company Proposal made on "mileage towns" dated August 9, 1977 is part of this Proposal. Any questions on distance from Newington Building 3333 to work locations will be worked out as they occur.

TOPIC: Seniority – Berlin Construction – Jackson Street (Waterbury)

Employees assigned to Jackson Street (Waterbury) as of August 1, 1982 and are reduced will have available, in addition to their options as stated in Article V, the option to displace the least senior employee within the employee's classification at 3333 or Myrock Avenue.

TOPIC: Berlin Construction

All employees hired into Berlin Construction after May 30, 1982 will be required to work at Connecticut Yankee and/or Millstone when so assigned.

TOPIC: J Schedules-Meter Service Department

J Schedules will not be utilized during the term of the Agreement in the Meter Service Department.

TOPIC: Commercial Driver's License

The Company will pay applicable costs associated with obtaining a Commercial Driver's License required by the duties performed of the classification.

Applicable costs Include:

a) endorsements
b) various test fees
c) issuance of permit

In addition, the Company will pay the cost difference of the employee's license fee and the license fee of the job-required CDL.

TOPIC: METER SERVICE INSTALLERS

Meter Service Installers will progress in their respective districts to Meter Service Mechanic without a job posting providing there is an approved vacancy to be filled and they have successfully passed the CAST test.

TOPIC: STORM ASSIGNMENT OR OTHER EMERGENCY SITUATION

If an employee is assigned to an out of district storm assignment or other emergency situation that may require an overnight stay, and the assignment is made during the employee's regular work hours, the Company will provide ½ hour early dismissal, without loss of wages. In the event that the employee was not provided ½ hour early dismissal, the Company will provide a one time $25.00 payment to the employee for that overnight storm or emergency event. (Code 029).

TOPIC: SYSTEM PROJECTS

The Company agrees to maintain the existence of a System Projects Group through the term of the Agreement.

TOPIC: GROUND RULES

The Company and Union agree to establish ground rules prior to future negotiations. In addition, the parties will start negotiations six months prior to the expiration date and conduct negotiations in such a manner that ensures conclusion by contract expiration.

TOPIC: PATH OF PROGRESSION (SILO SENIORITY)

This letter confirms our understanding reached concerning the merging of the Blue and Green Books. Seniority will be Grandfathered separately for the purpose of promotion only. Any vacancy to be filled by promotion from a former Green Book employee leaving will be offered to the senior qualified former Green Book

Employee. Any vacancy to be filled by promotion as a result of a former Blue Book employee leaving will be offered to the Senior Qualified Blue Book employee. Any vacancy to be filled by promotion that cannot be identified as a former Blue/Green position will be offered to the senior qualified employee.

In the event displaced employees from a district or locality that is closed are reassigned to more than one district such displaced employees shall retain their promotional sequence rights from their former district or locality (Blue or Green).

In the event a displaced employee has no promotional sequence in the district that he is reassigned to, the promotional sequence from his former district will apply for wage purposes only.

Retrogression drops in reverse sequence of classification progression.

Promotion to Teal means any promotion slots in at junior most position in said classification.

Promotional sequence will not apply to any District/ AWC not listed under this Topic.

All former Local 457 Blue/ Green locations, for example, are the former Green locations of Hartford, New London, Middletown and the former Blue locations of Tolland, Mystic, Madison, East Hampton, Danielson, Cheshire, and System Projects East and Central.

All former Local 420 Blue/ Green locations, for example, are the former Green locations of Stamford, Torrington, Falls Village, Simsbury and the former Blue locations of Greenwich, Newtown, Norwalk, Waterbury, New Milford, Waterbury/ Oxford, System Projects West, Torrington, Mattatuck Heights, Berlin Construction/ G.O, and Norwalk Transmission Electricians.

TOPIC: Hartford/ Simsbury/ Windsor/ Stamford Meter Readers- Green Vacation Choice Seniority

This letter confirms our understanding reached concerning the merger of the Blue and Green Books. Seniority for the purposes of selection of vacation periods will be grandfathered for existing employees in Hartford, Simsbury, Windsor and Stamford Meter Readers. Existing Hartford, Simsbury, Windsor and Stamford Meter Reading employees will be granted preference in selecting vacation periods in descending order of Teal Book seniority on a departmental basis as involved.

In the event of an employee transferring to Hartford, Simsbury, Windsor or Stamford Meter Reading their vacation preference will be based on Teal Book seniority.

In the event of an existing Hartford, Simsbury, Windsor or Stamford Meter Reader employee transferring to another district (other than Hartford, Simsbury, Windsor or Stamford Meter Reader), whether voluntary or displaced, their vacation preference will be based on Teal Book seniority in relation to other employees in their new district.

TOPIC: ADOPTION ASSISTANCE BENEFIT

The adoption benefit is offered to help employees meet some of the expenses related to adopting a child.

The adoption benefit provides reimbursement of up to $5,000 of eligible expenses for the adoption of each child under the age of 18. Only the expenses employees actually incur are eligible for reimbursement. The benefit is payable when the adoption is final (when a decree of adoption is entered by the court) and applies to expenses incurred on or after January 1, 2015.

Eligible expenses include: adoption agency fees, legal fees, court fees, travel expenses, the child's initial medical exam and certain out-of-pocket medical expenses for the natural mother.

Adoption Leave

Employees are eligible for company-paid adoption leave after completing three months of employment with Eversource. An employee's pay during the duration of his or her adoption leave will be based on his or her base pay in effect on the day the leave starts.

An employee must give his or her supervisor at least three months written notice of the date the leave will start and when the employee expects to return to work. If an employee is also eligible for Family Medical Leave Act (FMLA) leave, time taken for adoption leave will also count as FMLA leave.

Duration of Leave

Adoption leave begins on the date the child is received into an employee's home. The maximum duration of an adoption leave depends on the age of the adopted child according to the following schedule:

Age of Adopted Child	**Maximum Amount of Leave***
6 years old or younger	8 weeks
At least 7 years old but less than 13 years old	4 weeks
At least 13 years old but less than 18 years old	2 weeks

TOPIC: ON CALL ASSIGNMENTS (ADMINISTRATIVE SUPPORT UNITS ONLY)

Employees who volunteer to be placed on-call at the request of the Company may be placed on-call outside their normal schedule hours for one or more consecutive 24-hour periods, or less than 24 hour periods. Employees who volunteer and are assigned for

such on-call will be paid either 1.5 hours at basic straight-time rates or 3 hours at basic straight-time rates for each 24 hour period (or less than a 24 hour period) that they are on call as follows:

(i) if the majority of the 24 hour on-call period (or less than a 24 hour assignment) is served during a weekday (Monday through Friday), employees will receive 1.5 hours at basic straight time rates;

(ii) if the majority of the 24 hour on-call period (or less than a 24 hour assignment) is serviced during a holiday, weekend (Saturday or Sunday), or the employees day off (only for employees working a shift or special schedule), employees will receive 3 hours at basic straight time rates. With the exception of weekend on-call periods containing Company recognized holidays employees will receive no more than two 3 hour payments and one 1.5 hour payment for a weekend on-call assignment (e.g., 3 p.m. Friday until 7 a.m. Monday).

If called upon to perform work, in addition to the call-time pay they will be paid for the time worked at the rate applicable but not less than two hours for each time called out, except that they will be paid not less than three hours at the applicable rate for each time called out between 12:00 midnight and 6:00 a.m.

Article V- Employee Option Sheet Example:

6/23/2016

ARTICLE V SECTION 3(b) TRANSFER

In accordance with Article V of the current Agreement, I, _____have been offered the following options: _____, and I elect option number _____.

1. Displace the employee having least Teal Book Seniority in my classification:

A. _____ District B. _____ Region

2. Displace the employee having least Teal Book Seniority in my classification:

_____ Company

3. Displace the employee having least Teal Book Seniority in a lower job classification within my normal sequence of job progression within the locality:

_____ Classification

4. If qualified, displace the employee having least Teal Book Seniority within the locality:

_____ Classification

If an employee subject to reassignment has insufficient Teal Book Seniority to exercise provisions (1) or (3) then the employee may:

5. Displace the employee having least Teal Book Seniority in a lower job classification within my normal sequence of job progression:

A. _____ Classification-District B. _____ Classification-Region C. _____ Classification-Company

6. If qualified, displace the employee having least Teal Book Seniority:

A. _____ District-Classification B. _____ Region-Classification

If an employee subject to reassignment has insufficient Teal Book Seniority to exercise provisions (1),(2), (3), (4), (5), or (6):

7. If qualified, displace one of the five employees having least Teal Book Seniority within the Company:

A. _____ Classification-Location B. _____ Classification-Location C. _____ Classification-Location
D. _____ Classification-Location E. _____ Classification-Location

8. If qualified, layoff with recall rights.

9. If qualified, layoff with severance pay without recall rights.

10. If qualified, displace least senior excess employee in the same job classification in the same locality.

11. Elect vacancy of _____ listed on back of option sheet.

_____ Employee's Signature and Date _____ Present Classification and Location

_____ Displaced Employee _____ Classification _____ Seniority Date _____ Location

THE HARTFORD ELECTRIC LIGHT COMPANY

and

Local 1419, I.B.E.W.

Effective as of July 1, 1960

In addition to matters agreed upon and incorporated in the collective bargaining Agreement of even date between the parties, the following are agreements and understandings reached concurrently with such collective bargaining Agreement.

1. *** Obsolete

2. While the collective bargaining Agreement between the parties provides that there will be no other restriction on the Company's use of outside contractors, this will confirm our understanding in respect to the use of outside contractors so far as it involves or affects work in classifications in the bargaining unit.

When contractors employing I.B.E.W. members are readily available and qualified to perform live wire work usually done by employees in the bargaining unit, they will be given any contracts involving live wire work and, all things being equal, will be given preference for other work usually done by employees in the bargaining unit. It is understood that this limitation does not apply to the kinds of work other than live wire work customarily given to outside contractors in the past such as tree trimming and group replacement of streetlights.

Also, the Company, all things being equal, will not have work done by contract which is usually done by employees in the bargaining unit when this would cause a layoff of such employees. This will in no way apply to the use of nonbargaining unit personnel in the employ of the Company which is covered in a separate memorandum.

3. It is understood that any part-time employees of the Company currently performing work in classifications in the bargaining unit are excluded from the bargaining unit and that the Company will not add to the number of such employees.

4. *** Obsolete

5. *** Superceded

This memorandum shall be considered to be a part of the collective bargaining Agreement between the parties although not incorporated physically therein and shall be effective for the duration of said collective bargaining Agreement.

Witness: Harold P. Meyer

June 27, 1962

Mr. Chester Reynolds
Business Manager, Local 383, I.B.E.W.
345 Riverside Avenue
Torrington, Connecticut

Dear Mr. Reynolds:

This is to confirm yesterday's discussion as to our reasons for eliminating from the Agreement we signed, Item 11 which was a new Section 12 to be included under Article X and which is found in the Agreement with Locals 468, 469, and 1419. This Section was left out, not because we expect the Agreement to operate very differently on this subject from those we have with the other Locals, but rather because Local 383 had some concern as to its meaning and application and preferred not to have it in their Agreement. Rather than hold up proceedings, we have agreed to remove it with the understanding that it is the intent of our Agreement that temporary assignments to higher classifications may be made occasionally under circumstances where there is no vacancy and where there is no employee absent. Along with this understanding, the Union reserves the right to bring up a claim of vacancy if, in their judgment, they feel that temporary assignments of this special nature are so frequent as to indicate a need for additional full-time help. Please indicate your acceptance of this by signing and returning the copy of this letter which is enclosed.

Very truly yours,

THE HARTFORD ELECTRIC LIGHT COMPANY
/s/ R. H. Pearson

AGREEMENT

between

THE HARTFORD ELECTRIC LIGHT COMPANY

and

LOCAL 383, I.B.E.W.

as of July 1, 1963

*** Paragraph Obsolete

We have also agreed to the following interpretations and applications of Section II of Article VI concerning temporary assignments to a higher classification:

1. That it is the intent of our Agreement that temporary assignments to higher classifications may be made occasionally under circumstances where there is no vacancy and where there is no employee absent. Along with this understanding, the Union reserves the right to bring up a claim of vacancy if, in their opinion, temporary assignments of this special nature are so frequent as to indicate the need for additional help.

2. Although the Agreement only requires the Company to rotate temporary assignments among qualified employees in order of seniority where such assignments exceed two weeks, it is the intent that in any case where assignment to a given classification occurs frequently that such assignments be rotated even though they be less than a week's duration, provided the largest share of such assignments are given to the senior employee.

IN TESTIMONY WHEREOF:

The parties hereto have executed this Agreement the day and year first above written.

INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS
Local 1419

By: /s/ Charles F. McBrien

Witness: /s/ Richard Krivanec

July 3, 1963

Mr. Chester Reynolds, Business Manager, Local 383, I.B.E.W.

Mr. Charles McBrien, Business Manager,
Local 1419, I.B.E.W.

This is to confirm certain statements of intent made by the Company during our recent negotiation meetings and certain understandings which are not a part of the Agreement itself.

1. *** Obsolete

2. Superceded (June 1, 1980)

3. *** Implemented

4. The Company plans to hold meetings with supervisors for the purpose of reviewing the terms of the Agreement and to emphasize the following points:

a. *** In Contract

b. That every effort will be made to give a shift employee as much advance notice as is practicable when the employee is to be given a holiday off. Further, that when such a holiday off is scheduled, it will not be interfered with except in case of emergency or the unforeseen absence of another employee.

c. Special mention will be made of the contract limitations on the amount and kinds of work to be performed by supervisors.

5. During the period of our Agreement, the Director of Employee Relations plans to arrange periodic meetings with the representatives of each of the local unions for the purpose of discussing on an informal basis, any subjects of current interest.

Very truly yours,

THE HARTFORD ELECTRIC LIGHT COMPANY
Robert H. Pearson
Director of Employee Relations

MEMORANDUM OF AGREEMENT

between

THE HARTFORD ELECTRIC LIGHT COMPANY

and

LOCAL 1419, I.B.E.W.

This is to confirm understandings reached as a result of our current negotiation discussions.

A. The following policy changes will be made effective as of July 1, 1966:

1. *** Superceded

2. *** Superceded

3. *** Superceded

4. *** In Contract

5. *** In Contract

B. The following practices will be reaffirmed through meetings with supervisors to be held during the month of July:

1. On-call schedules will be posted at least one month in advance, hopefully more, and will cover as long a period as is practicable, recognizing that there will necessarily be later revisions to accommodate unanticipated absences or changes in personnel or in operating requirements.

2. A regular system must be maintained whereby an employee will be notified the actual hours of overtime work recorded as soon as practicable after having worked overtime.

3. If supervision decides a replacement is needed to cover the illness of a person "oncall," it is supervision's responsibility to designate the substitute, giving consideration to the relative amounts of accumulated overtime worked by those qualified for the assignment.

4. Although time required for washing up will vary with circumstances and no set amount can be guaranteed, it is the general practice to try to complete the normal day's work early enough to allow reasonable time for washing up.

5. On days of extremely cold weather, particularly when accompanied by high winds, supervision is expected to use discretion so as to minimize exposure

aloft of any one lineman in the performance of nonemergency work which does not have to be completed that day.

Accepted for the Company:

This is to confirm our understandings on the following matters discussed during our negotiations meetings in connection with a new Agreement to be effective as of July 1, 1969:

1. *** Implemented

2. *** Implemented

3. Under the Company's current plan with the American Optical Company for providing safety glasses where required on the job, the Company will revise its plan to provide for payment of lens for prescription glasses in addition to frames. It will be the responsibility of each employee to furnish to the Company at the employee's own cost, a current prescription.

4. In connection with Article VI, Section 9 "The Company will accept a written application from any employee who believes the employee is qualified, provided such application is received within ten days of the date the notice is posted" it is agreed that the Company may waive such ten day limitation for those employees who are absent from work due to vacation, illness, etc., during the entire original ten day posting period.

5. The Company agreed to discuss with supervision, the results of its discussions with the Union on its intentions with respect to the following items:

a. Introduction of new employees to a Union official.
b. *** Not applicable.
c. Conditions for "call-out" of Stores employees.
d. Reprimanding of employees.
e. Performance of regular work by supervision.
f. Work assignments during extreme heat and cold.
g. Time allowed for funerals.
h. Work on days when assigned to jury duty.

Accepted for the Union:

July 3, 1969 /s/ Clarence L. Fillmore Jr.
Business Manager, Local 1419, I.B.E.W.

July 24, 1970

Mr. Philip A. Lent
Business Manager, Local 383, I.B.E.W.

Mr. Clarence L. Fillmore Jr.
Business Manager, Local 1419, I.B.E.W.

Gentlemen:

This is confirm our understanding on the following matters discussed during our negotiations meetings in connection with a new Agreement to be effective as of July 1, 1970:

1. In the event that an employee suffers a serious verified incapacitating illness or injury during the employee's scheduled vacation, and the employee notifies the employee's supervisor of such illness or injury as soon as possible, that portion the employee's vacation period during which the employee is incapacitated may be rescheduled, at the option of the Company, to another time during the calendar year.

An employee who has been unable to take all of the employee's vacation by December 31 due to verified incapacitating illness or Company operating requirements will have their vacation period extended up to eighty (80) hours until the end of the following year.

In determining whether the employee's vacation should be rescheduled, the Company may request from the employee verification from the attending physician.

2. In connection with the administration of Section 2 of Article IX of the current Agreement, in the event the Union wishes to question whether or not the Company has acted reasonably in making a change in a safety regulation, such issue shall first be referred for review to a committee of two safety specialists, one appointed by the Company and one appointed by the Union. If the two representatives agree as to their decision on the issue submitted, it shall be binding on both parties.

In the event the Committee is unable to agree, then the same issue shall be submitted to arbitration under Article IX of the current Agreement and the Arbitrator may use the two safety specialists as consultants in reaching the employee's decision following a hearing on the issue.

3. This will confirm the Company's intent with respect to the application of paragraph (a) of Section 2, Article X of the current Agreement. In administering Section 2(a), the Company intends to use the twenty percent as a guideline in relation to the Fair Labor Standards Act and not as an authorization for supervisors to do regular work a full twenty percent of the time under normal operating conditions.

Both the Company and the Union plan to follow the administration of this clause very carefully during the period of the contract year.

4. The sentence in paragraph 3 of the Memo of Agreement signed June 30, 1967, which reads, "Similarly, any hours worked but offset by equivalent rest time shall not be recognized," shall be deleted. As a result, paragraph 3 will read:

> "In connection with the revision of Article IV, Section 2(e), the following interpretation is agreed upon. Double the straight time rate will be paid for those hours worked beyond sixteen within any twenty-four hour period but not beyond such twenty-four hour period. Only such hours actually worked shall be recognized for these purposes. It is also agreed that any consecutive hours actually worked beyond sixteen consecutive hours actually worked will be paid at double the straight time rate whether offset by rest time or not." (Amended July 1, 1976)

5. While not part of the Collective Bargaining Agreement, for the duration of the Agreement, it is agreed, in connection with Article VIII, Grievance Procedure, that:

In the event a Business Manager and/or Assistant Business Manager has factual and reasonable evidence that the Company has violated a provision(s) of the Agreement and the employee(s) affected fails to present a grievance in Step One, then the Business Manager and/or Assistant Business Manager having first notified the employee(s) affected, may initiate a grievance in the Second Step at any time within ten working days after the date of the claimed violation. This period will be extended to fifteen working days should the Assistant Business Manager be absent during the original ten-day period.

6. While not part of the Collective Bargaining Agreement, for the duration of the Agreement, it is agreed that in addition to the two weeks Armed Forces training leave provided for in Article X, Section 14, an employee required to report for duty by a Reserve Component of the Armed Forces in the event of civil disturbance or natural disaster shall for an additional maximum of five working days, be paid the difference between the pay received for such service and the employee's regular straight time pay.

7. While not part of the Collective Bargaining Agreement, for the duration of the Agreement, it is agreed in connection with Article X, Section 8(a) that: The Company will not permanently transfer any employee from the Bargaining Unit to positions outside the Bargaining Unit unless the employee himself so desires.

Very truly yours,

R. H. Peterson
Director of Employee Relations

Accepted for the Union:

July 24, 1970 Philip A. Lent

Business Manager, Local 383, I.B.E.W.

Clarence L. Fillmore Jr.
Business Manager, Local 1419, I.B.E.W.

July 24, 1970
Mr. George O. Potter Jr.
Business Manager, Local 468, I.B.E.W.

Mr. Norman N. McPhail
Business Manager, Local 469, I.B.E.W.

Gentlemen:

This is to confirm our understanding on the following matters discussed during our negotiations meetings in connection with a new Agreement to be effective as of July 1, 1970:

1. In the event that an employee suffers a serious verified incapacitating illness or injury during the employee's scheduled vacation, and the employee notifies the employee's supervisor of such illness or injury as soon as possible, that portion of the employee's vacation period during which the employee is incapacitated may be rescheduled, at the option of the Company, to another time during the calendar year.

An employee who has been unable to take all of the employee's vacation by December 31 due to verified incapacitating illness or Company operating requirements will the employee's vacation period extended until the end of the following calendar year.

In determining whether the employee's vacation should be rescheduled, the Company may request from the employee, verification from the attending physician.

2. In connection with the administration of Section 2 of Article IX of the current Agreement, in the event the Union wishes to question whether or not the Company has acted reasonably in making a change in a safety regulation, such issue shall first be referred for review to a committee of two safety specialists, one appointed by the Company and one appointed by the Union. If the two representatives agree as to their decision on the issue submitted, it shall be binding on both parties. In the event the committee is unable to agree, then the same issue shall be submitted to arbitration under Article IX of the current Agreement and the arbitrator may use the two safety specialists as consultants in reaching the employee's decision following a hearing on the issue.

3. This will confirm the Company's intent with respect to the application of paragraph (a) of Section 2, Article X of the current Agreement. In administering Section 2(a), the Company intends to use the twenty percent as a guideline in relation to the Fair Labor Standards Act and not as an authorization for Foremen and other supervisors to do regular work a full twenty percent of the time under normal operating conditions.

Both the Company and the Union plan to follow the administration of this clause very carefully during the period of the contract year.

4. While not part of the Collective Bargaining Agreement, for the duration of the Agreement, it is agreed in connection with Article VIII, Grievance Procedure, that:

In the event a Business Manager and/or Assistant Business Manager has factual and reasonable evidence that the Company has violated a provision(s) of the Agreement and the employee(s) affected fails to present a grievance in Step One, then the Business Manager and/or Assistant Business Manager having first notified the employee(s) affected, may initiate a grievance in the Second Step at any time within ten working days after the date of the claimed violation. This period will be extended to fifteen working days should the Assistant Business Manager be absent during the original ten day period.

5. While not part of the Collective Bargaining Agreement, for the duration of the Agreement, it is agreed that in addition to the two weeks Armed Forces training leave provided for in Article X, Section 14, an employee required to report for duty by a Reserve Component of the Armed Forces in the event of civil disturbance or natural disaster shall for an additional maximum of five working days, be paid the difference between the pay received for such service and the employee's regular straight time pay.

Mr. Norman N. McPhail
Business Manager, Local 469, I.B.E.W.

Gentlemen:

This is confirm our understanding on the following matters discussed during our negotiations meetings in connection with a new Agreement to be effective as of July 1, 1971:

1. Letter of Agreement dated July 24, 1970 (Paragraph 1. In the event that an employee, etc.) is extended until July 1, 1972.

2. *** Deleted

3. Although time required for washing up will vary with circumstances and no set amount can be guaranteed, it is the general practice to try to complete the normal day's work early enough to allow reasonable time for washing up.

4. *** Obsolete

5. That normal lunch periods should be observed whenever practicable and those cases where it is necessary to delay lunch period should be kept at a minimum. Further, that when the work requirements make it necessary to postpone a lunch period for an hour or more, the practice will be to pay the employee time and one-half for the lunch period so that the employee will be considered to be on continuous duty from the start to the finish of the workday, eating when the employee can find the opportunity without any stated meal period.

Mr. Clarence L. Fillmore Jr.
Business Manager, Local 1419, I.B.E.W.

Dear Mr. Fillmore:

This is to confirm our understanding on the following matters discussed during our negotiations meetings in connection with a new Agreement to be effective as of July 1, 1971:

1. The following Letters of Agreement dated July 1, 1970 Agreement are extended until July 1, 1972:

July 24, 1970 (Paragraph 1. In the event that an employee, etc.)

July 3, 1969
June 30, 1967
July 8, 1966
July 3, 1963
July 1, 1963
July 1, 1960

2. *** Deleted

3. The Company agrees to instruct its supervisors to make reasonable assignments in all departments during extreme cold. Except in the case of emergency or to restore service, employees will not be required to do overhead line work or steel substation structure work when the temperature is 10° or lower at the job site.

4. *** Obsolete

5. Line Mechanics will get help, if requested, when performing switching duties aloft on primary voltage on a planned switching job on a scheduled day off when such switching presents an unsafe working condition.

Very truly yours,

R. H. Peterson
Director of Employee Relations

Mr. J. R. Healey, Business Manager, Local 420, I.B.E.W.

Mr. J. R. Kelly, Business Manager, Local 457, I.B.E.W.

Gentlemen:

This is to confirm our understanding on the following matters discussed during our negotiations meetings in connection with a new Agreement to be effective as of June 1, 1995.

1. The Letter of Intent dated July 22, 1976 (page 138 of current Agreement) and other Letters of Intent extended by that Letter are extended until June 1, 1998 except as superseded by paragraphs 2. and 3. below.

2. The Company will pay the full cost of lenses, frame, and case of clear and/or tinted prescription safety eyeglasses for operating department personnel who are required to wear them for their job. Employees will be limited to two (2) pairs of safety glasses (clear and/or tinted) every two years for the term of the agreement. Employees who opt for safety glasses with Photochromatic (photogray) or progressive lenses will not receive a second pair of clear or tinted safety glasses. The company will pay for the cost of Photochromatic (photogray) or progressive lenses. The Company will provide for the replacement of safety eyeglasses when damaged on the job. Replacement will be limited to lenses only if the lenses are damaged or obscured.

The employee will provide the Company with a current (not over two years' old) prescription. The Company will also provide replacement lenses if the employee's prescription changes.

The Company will reimburse the employee for all fitting fees.

Very truly yours,

Business Managers
Locals No. 420 and 457
International Brotherhood of Electrical Workers

Gentlemen:

This letter concerning live-wire practices, referred to in Article XVIII of the June 1, 1989 Agreement, is to confirm our understanding of certain operating practices to be observed in the performance of work on energized primary conductors.

A. Work assignment of employees classified as Line Helpers

When a line helper is in the first three rate steps, the employee may be assigned to perform work on energized circuits of not higher than secondary voltage. When a line helper has attained the fourth rate step, the employee may be assigned, under close supervision, to apply protective equipment on primary conductors necessary to perform work safely on energized conductors not in excess of 600 volts. When a line helper has attained the fifth rate step, the employee may be assigned to perform simple work on poles involving energized primary circuits provided a Lineman is in the work area.

B. Energized primary work at two working levels or cutting in or out slack

Live-wire work involving either transferring of primary wires on poles or cutting in or out slack, or handling energized wire at two working levels shall be carried on by two Linemen or a Lineman and an eligible Line Helper in the sixth, seventh, or eighth rate step, except that the sixth-step helper will not be required to perform the work of cutting in or out of slack on energized wires unless under close supervision.

The following is our understanding of operating practices to be observed under paragraph B.

1. For the purposes of this paragraph, the following definitions shall apply:

a. Straight-Line Pole

A pole in line where the energized primary wires are carried on pin-type insulators and the angle of pull is not more than 18 feet (20 degrees).

b. Corner Pole or Angle Pole

A pole located at an angle in excess of the above or where the energized primary wires are carried on disc insulators or the equivalent.

c. Junction Pole

A pole where the energized primary wires extend in three or more directions from the pole, or where the energized wires extend in two directions from the pole and are supported on crossarms attached to the pole at two different levels.

2. The transferring of energized primary wires from a point of support on one pole to a point of support on another pole and where it is necessary to work on both poles at the same time shall be carried out in accordance with the number of qualified line department personnel described in the attached Live-Wire chart. The chart will be interpreted within the following scope:

a. Where the required numbers are two (2) or four (4), one-half (½) of the assigned number must be Linemen or Chief Linemen or a combination of both. The remainder may include Line Helper(s) in the sixth, seventh, or eighth rate steps.

b. Where the required number is three (3), two (2) must be Linemen or Chief Linemen or a combination of both, the remainder may be a Line Helper in the sixth, seventh, or eighth rate step.

3. The cutting in or cutting out of slack in energized primary wires shall be carried out by two Linemen or one Lineman and a Line Helper in the seventh or eighth rate step.

4. It is understood that in the event the transferring of energized wires from one pole to another also involves the cutting in or cutting out of slack or the installation of energized primary taps, or both, the provisions of 3. of this letter shall not require Linemen in addition to those provided for in the chart.

5. The Company may assign more than the specified number of employees to carry out any of the above jobs for expediting the work or for other purposes and the Union agrees that such use of extra employees shall not be considered as establishing a precedent.

6. The installation of energized primary taps on junction poles, and elsewhere where it is current standard practice, shall be carried out by two Linemen or one Lineman and one Line Helper in the sixth, seventh, or eighth rate step.

7. During 1976 contract negotiations discussions of the Company proposals for modifications of the June 18, 1975 live-wire practices letter, the Company explained that it was not its intent to change its method of assigning three-person crews as a result of the redesigning of the required number of personnel with respect to the live-wire practices, as described in the Letter of Understanding and attached chart.

On limited occasions, a line crew consisting of two qualified line department personnel could be assigned to perform jobs listed as 1 through 3 under the heading Personnel Lifting Devices of the live-wire practices letter interpretation chart, where the jobs could be performed without the use of a lifting tong in conjunction with a holding stick.

However, it is recognized that some line functions, other than the assignments listed in the live-wire practices chart, are now performed by and will continue to be performed by a two-person line crew.

Very truly yours,

Senior Vice President-Human Resources and Administrative Services

CONFIRMED FOR THE UNION:

By _____ Date *August 21, 1995*
Business Manager, Local 420

By _____ Date *August 21, 1995*
Business Manager, Local 457

March 16, 1998

Mr. William Hogg, Assistant Business Manager Local 420 – I.B.E.W.

Ms. Theresa Kmetetz, Assistant Business Manager
Local 457 – I.B.E.W.

Dear Mr. Hogg and Ms. Kmetetz:

This letter serves to confirm understandings reached as a result of our current negotiation discussions regarding the new CL&P Blue Book Department – System Projects.

Scope of System Projects

System Projects work is defined as any assignment that exceeds 120 continuous manhours.

Reporting Locations, Classifications and Population

	East (East Hampton)	West (Newtown)
Chief Lineman (rubber gloving)	3	3
Lineman (rubber gloving)	9	9
Helper	1	1

Hours of Work – Premium Pay – Holidays

All employees transferring into System Projects will be required to work any of the following hours of work:

- Four ten (10) hour days:
  - Eight (8) hour schedules during work weeks that contain holidays.
  - Premium pay will be in accordance with Article VII, Section 13(b).
- Straight eight (8) hour days.
- Eight (8) hour days with an unpaid lunch.

Overtime Rotation

Insofar as practicable, overtime work will be equitably distributed among suitably qualified employees who are assigned to the project in which the overtime work is required on a weekly basis.

Temporary Upgrades

When required, employees will be offered temporary upgrades according to greatest classification seniority on the project.

Work Practices

- Rubber gloving practices and procedures will be in accordance with the Blue Book Topic.

- System Projects line classifications will not perform switching in substations.

- It is not the Company's intention to mix district and System Projects linemen except for conversions. Any other mixing of district and System Projects linemen will be on a voluntary basis.

Incentive Compensation

Company and Union agree to meet and discuss, within 120 days from the date of this Letter of Understanding, the feasibility of adopting an incentive compensation program for System Projects bargaining unit employees.

Company and Union Review Committee

Representatives of the Company and Local Unions shall meet from time to time, at the request of either party to discuss matters pertaining to safety, efficiency and other cooperative efforts.

Storm Restoration Protocol

Available district linemen will be utilized first on storm restoration activities and then available System Projects Linemen, followed by Transmission linemen. If System Projects is working in an area hit by a storm, they may be required to perform storm restoration activities until they are relieved by available outside district crews from the area (as defined in Appendix C).

Seniority

Reassignment and layoff (see attached option sheet).

Appendix C

Department	Local Seniority Area
System Projects	East (East Hampton) West (Newtown)

Training

Training for helpers will be in accordance with the existing Lineman's Time Merit Progression Program. If a "non-rubber gloving" lineman applied for a System Projects position, rubber glove training will be provided.

Inclement Weather

System Projects linemen shall not be required to perform outdoor work when weather conditions might make such work unsafe. Work to be performed during inclement weather will be by mutual agreement.

Job Positions

The Company will give preference to its regular Blue Book bargaining unit employees and then its regular Green Book bargaining unit employees over hiring new employees when making placements within System Projects. Vacancies created by Green Book and Blue Book bargaining unit employees posting into System Projects will be filled in a timely manner, but not necessarily in the same location.

The Company and Union will act in accordance with all other provisions of the Blue Book Agreement.

Very truly yours,

/s/ Raymond C. DiCenso
Sr. Consultant – Labor Relations

RCD/tjk

ACCEPTED FOR THE UNION:

/s/ William Hogg, Assistant Business Manager	3/16/98
Local 420 – I.B.E.W.	Date
/s/ Theresa Kmetetz, Assistant Business Manager	3/16/98
Local 457 – I.B.E.W.	Date

11/10/2003

An agreement on a protocol for assigning CL&P-System Project crews to participate in major storm restoration activities at locations other than those owned or operated by the Company (Northeast Utilities)

The agreement is as follows:

- System Project crews will comprise of approximately 15% of the total number of crews participating in major storm restoration activities
- This agreement does not take effect until a minimum of 10 crews from the Divisions are assigned
- The Company will make an earnest effort to draw these crews from the various system project locations as evenly as practicable
- System Project crews will be selected on the basis of low overtime by location where practicable
- As the determined supervision, System Project line-workers will be mixed with Division line-workers when work requirements dictate (consistent with present practices)

Re: Extension of 'Gold Coast' Program to Local 420 Bargaining Unit Employees

Dennis:

Pursuant to our March 28th telephone call, I am providing our written commitment to extend to your members the subject Gold Coast program. This program, outlined in the attached memorandum, has already been implemented for qualified non bargaining unit employees, and may be discontinued at any time at the discretion of the company.

Please indicate your acceptance of this offer in the space provided below. I will be happy to answer any questions or address any comments you may have on this program.

"Gold Coast" Program (Revised) – June 2016

To support Eversource's efforts of attracting and retaining employees in or near the high-cost, high-traffic area of Connecticut commonly referred to as the "Gold Coast," the Company maintains a program of the same name, which provides additional compensation above and beyond an employee's base salary.

Highlights of the program include:

- The Company will pay an initial Transfer Bonus Payment (or "Anniversary" payment) for new employees being hired and transferees into specific job locations, and an Annual Geographic Adjustment Payment to employees in designated job locations – specifically, the Stamford and Norwalk work centers.
- We will formally relax the 30-minute resident rule to 60-minutes.

The specifics of the plan:

1. Existing employees in the designated job locations as of 06-01-16 who are still in one of those specific locations on 12-31-16 will receive an annual **$3,000** Geographic Adjustment Payment. This will occur every year as long as the Company deems this program necessary. The Company, in its sole discretion, retains the right to end this program at any time. In future years January 1 will be used as the start date.

2. Any employees who transfer or are initially hired into these designated job locations while the program is in effect will receive a one-time, once-in-a-lifetime **$15,000** Transfer Bonus Payment, in the form of **$5,000** after each of the first three anniversaries of such transfer, assuming the employee is still in a qualifying position.

3. The Annual Geographic Adjustment Payment will be payable in February. If an employee transfers out at any point in a calendar year, he/she is ineligible for that year's payment.

4. Should an employee transfer out of these job locations at any time, there is no obligation to repay any of the payments; however, no further payments will be made, and the employee will be ineligible for any additional Transfer Bonus Payments. The only exception is for an employee transferring out to accept a supervisory position; such employee will receive a pro-rated Transfer Bonus Payment for the number of days in the year the employee was assigned to one of the designated job locations. The employee will be eligible for the remainder of the Transfer Bonus Payment if he/she ever transfers back to one of these job locations as a supervisor or above.

5. The Geographic Adjustment Payment is pensionable each year, if the payment is made prior to the last month before your separation from Eversource. The Transfer Bonus Payment is not pensionable.

Q&A's for Proposed Gold Coast Program

Q1 – If I am in the program, assigned to one of the qualifying job locations, and retire during the year, what is the status of the Geographic Adjustment Payment I would have received at year's end?

A – The Geographic Adjustment would be prorated, for the time worked during the year up to the date of retirement, and would be paid out within 30 days after your effective retirement date.

Q2 – What happens if I am currently working in one of the qualifying job locations and I am assigned to a rotational assignment outside any of the qualifying job locations during the year?

A – If the Company assigns you to a temporary assignment at the Company's convenience, and you are expected to return to a qualifying location at the end of the assignment, you will be paid a full Geographic Adjustment Payment at year's end, when the other recipients are paid.

Q3 – What happens if I am currently working in one of the qualifying job locations and am downsized during the year?

A – You would first try to locate another position within Eversource. If you were unable to find another position and were terminated from Eversource employment, a prorated share of the Geographic Adjustment Payment would be paid to you at year's end, in the same time frame as other payment recipients.

Q4 – Are any employees currently assigned to a qualifying job location when the program begins qualified for the one time initial Transfer Bonus Payment?

A – No, only new transfers and new hires into the qualifying job location, with effective dates of assignment after 06-01-16 will qualify for the one-time, once in a lifetime initial payment.

Q5 – Would an employee who transferred into a qualifying job location before the program's inception qualify for the one time initial Transfer Bonus Payment?

A – No. The one time initial Transfer Bonus element of the program only applies to people transferring into a qualifying job location with an effective date after 06-01-16 for the transfer. Employees who were assigned to the qualifying job location prior to 06-01-13 do not qualify for the one-time initial payment. However, they may still qualify for the Annual Geographic Adjustment for each subsequent year they remain in a qualifying job location while the program is in effect.

Q6 – For employees eligible to receive the one time initial Transfer Bonus Payment for transferring into the qualifying job location, would they receive a pro-rated portion of the annual payment for a year in which they retired, or left the area due to, for instance, taking a new position outside the area?

A – The one time initial Transfer Bonus Payment will only be paid out to employees who stay within the qualifying job location for three consecutive years and will be paid in equal increments at the end of each 12 month period, for those three years. If at any time during this three year period they leave the area or retire, they would become ineligible for any additional payments through this part of the program.

Q7 – Do these payments affect benefits or overtime?
A – Both the Transfer Bonus Payment and the Annual Geographic Adjustment Payment will be included as base pay, retrospectively, for the purpose of calculating nonexempt overtime. Neither adjustment will be included in any calculation of e-share or401K. The annual Geographic Adjustment Payments are included in pensionable earnings each year, if paid prior to the last month before your separation from Eversource. The Transfer Bonus Payments are not pensionable.

Q8 – Are these payments taxable?

A – Yes.

Q9 – Who is eligible for the Geographic Adjustment Payment?

A – Active, regular, full time and part time employees permanently assigned in qualifying job locations.

Q10 – If eligible, could employees receive both the Transfer Bonus Payment and the Annual Geographic Payment in the same year?

A – Yes.

Re: 2004 Blue Book & Green Book Announcements

John & Terry:

As part of the 2004 Blue Book and Green Book negotiations the Company announced that it would discontinue certain practices upon expiration of the current contract. Of the seven (7) Blue Book and six (6) Green Book announcements, the Union Locals expressed specific membership concerns regarding the three (3) announcements below, and requested that the Company commit that any future changes to these announcements be negotiated with the Locals.

In agreeing to the Union's request, the Company is agreeing—without precedent and without in any way committing to negotiate with the Locals with respect to any other announcements (whether made in the past, present or future)—to negotiate future modifications of the three (3)
2004 announcements listed below:

- **Announcement** - displaced employees, *who are hired after June 1, 2004*, will be required to successfully pass applicable aptitude tests (i.e., CAST, Tech., etc.) prior to exercising bumping options under Article V, Reassignment, Layoff and Demotion.

- **Announcement** - the Company eliminates the practice of rotating crews after 1½ hours worked for the sole purpose of equitable distribution of overtime. The Company will attempt to change-out crews after 3 hours**.**

- **Announcement** - On-call Prearranged Overtime Practices - with the exception of Saturday and Sunday, the Company eliminates the practice of using the scheduled oncall lineworker for prearranged overtime.

It is also understood and agreed that this agreement in no way affects the Company's management rights, including but not limited to, determining qualifications (including testing), establishing schedules (including establishment of the on-call week, shifts, etc.), and making work assignments.

Re: Resolution of Overtime Distribution Issue – Local 420

John:

Pursuant to our August 24th telephone conversation the Company (CL&P) is agreeing to extend the practice of administratively assigning 2000 hours of overtime to those individuals who have reached the age of 45 and have removed themselves from scheduled on-call as permitted by the Blue Book (Article X) and Green Book (Article IV). This practice, which was originally initiated to accommodate the ACOS callout process, will result in these individuals being placed at the bottom of the overtime list for their area. Overtime assignments will be accomplished as follows:

- For unplanned overtime, ACOS will typically be used to run the entire list pursuant to normal practices. (See Attached).
- For planned overtime, work area supervision will disregard the administrative 2000 hour figure and offer the overtime to the person with the lowest number of net hours. (See Attached).

Implementation of the above process will, upon agreement from Local 420, become effective on September 1, 2005. Affected employees, who meet the aforementioned contract criteria, will be charged 2000 hours as outlined above. Affected employees who wish to return to on-call status will be given the one time opportunity to return to the on-call list without waiting the one year timeframe. Specifically, employees will not be returned to "scheduled on-call" until they have satisfied the earlier of a 12 month waiting period, or the January 1, 2006 calendar date (for establishment of the 2006 on-call schedule), unless there is a less than one in four on-call staffing arrangement in their work area where they can be immediately reintroduced to scheduled on-call work. Even if returned on-call employees are not working scheduled on-call they will be subject to the same overtime offerings as those employees who work scheduled on-call work.

As we have discussed this action (to include the waiving of the waiting period for return to scheduled on-call) is taken without precedence and without prejudice to the company's established position on overtime distribution. Additionally, the Company's action is predicated on the assumption that mathematical errors may occur in the assignment of planned overtime work – due to the need to deduct the 2000 hours. Accordingly, the company and/or the union reserve the right to discontinue this overtime process (i.e., using an administrative 2000 hours) with appropriate notice, if it is determined to be problematic or unmanageable. It is also understood that this agreement will resolve any grievances specific to the distribution of overtime where the adding of 2000 hours may have been a factor.

Please sign below to indicate your agreement on this issue.

Very Truly Yours,

/s/ Robert Lizotte

Agreed: /s/ John Unikas – Business Mgr. Local 420

Letter-2000 Hours Rule

October 23, 2012

Mr. Ed Hammett
Executive Director-Labor Relations Connecticut
Light & Power Co.

Re: Blue Book 2000 Hours Rule-457

Dear Mr. Hammett:

This letter serves to explain, in greater detail, Article X, Section 8(e). The affected employees, who meet the aforementioned contract criteria, will be charged 2000 hours as outlined in Article X, Section 8 (e). Specifically employees will not be returned to "scheduled on-call" until they have satisfied the earlier of a 12 month waiting period, or the April 1st calendar date (for establishment of the next year's on-call schedule), unless there is a less than one in four on-call staffing arrangement in their work area where they can be immediately reintroduced to scheduled on-call work.

Implementation of the above process will, upon agreement, become effective on April 1, 2013. Affected employees, who meet the aforementioned contract criteria, will be charged 2000 hours as outlined above. Affected employees who wish to return to on-call status will be given the one time opportunity to return to the on-call list without waiting the one year timeframe. Specifically, employees will not be returned to "scheduled on-call" until they have satisfied the earlier of a 12 month waiting period, or the March 1, 2014 calendar date (for establishment of the 2013 on-call schedule), unless there is a less than one in four on-call staffing arrangement in their work area where they can be immediately reintroduced to scheduled on-call work. Even if returned on-call employees are not working scheduled on-call they will be subject to the same overtime offerings as those employees who work scheduled on-call work, per the overtime list.

As we have discussed this action (to include the waiving of the waiting period for return to schedule on-call) is taken without precedence and without prejudice to the company's established position on overtime distribution. Additionally, the Company's action is predicated on the assumption that mathematical errors may occur in the assignment of planned overtime work-due to the need to deduct the 2000 hours. Accordingly, the company and/ or the union reserve the right to discontinue this overtime process (i.e., using an administrative 2000 hours) with appropriate notice, if it is determined to be problematic or unmanageable.

The parties hereby agree to the terms above.

Re: Agreement – Scheduling Vacation and On-call

Dear Rich & Frank:

This letter documents our August 2, 2010 agreement in principle and my subsequent discussion with Frank Cirillo regarding the company's development, approval and posting of annual vacation and on-call schedules. This agreement applies to the CL&P Blue Book and Green Book union contracts, the Yankee Gas White Book Contract, and the CL&P Technical Contract and as applicable, modifies the language contained in these contracts on this subject and replaces any side agreements or practices currently in existence regarding this topic. This agreement also applies to the Transmission Group as applicable.

It is also agreed that neither the Union or the Company will use this agreement as part of Local 457's grievance 2010-014 (Company No. 2010-10-457), or the arbitration of that grievance.

Purpose: This agreement reflects an effort by the parties to eliminate unnecessary controversy surrounding conflict between the on-call schedule and the employee's vacation submittal. To date, the company has processed these schedules independently – leaving some employees in a position where their vacation preference has conflicted with their on-call schedule. These employees have often had to swap their on-call schedule with another employee or otherwise modify their vacation plans. This agreement is specific to this conflicting schedule issue. All other vacation requests will continue to be processed in accordance with the applicable union contract (Blue Book and Green Book).

This agreement also documents the company's intent to fill on-call schedule vacancies (e.g., for planned medical absences) as soon as they are made aware of such. To fill short notice vacancies (less than 30 days) the company will seek volunteers, and if none will use the overtime list effective the Monday prior to the vacancy. For longer notice vacancies, the company will use the established on-call schedule rotation and will assign the vacancy to one of the scheduled employees provided the employee does not get back to back on-call schedules.

It is understood that the company may decide not to fill vacancies (particularly short notice absences) if it determines that the existing on-call response resources are appropriate for the anticipated trouble call volume.

Company actions for 2010: Effective November 3, 2010, the company will review the existing on-call schedule to determine if there is a conflict between the approved vacation schedule and the on-call schedule. Identified conflicts will be resolved by filling the vacancy through the overtime list of employees – specifically those employees eligible for scheduled on-call assignment. The company is not obligated to take action on any other vacation request.

Concurrent with its actions on resolving the vacation/on-call scheduling conflicts, the company will extend the current on-call schedule rotation until April 24, 2011. Employees requesting vacation during the period of January 1, 2010 through April 24, 2010, will submit their requests in accordance with the applicable contract language.

Company Actions for 2011 [and Future Years]: Effective April 24, 2011, and every year thereafter, the company will post the on-call schedule by the last Sunday in April. The on-call schedule will be prepared using approved vacation schedules to ensure there is no conflict with the employees approved vacation. Company management will process the employees' vacation preference in accordance with Article IX of the Blue book and Article V of the Green book, Article IX White book, and Article 22 of the Technical Contract as applicable. Once the vacation and on-call schedules are finalized by the Companies the employee (not the company) will be responsible for addressing any swapping or other schedule change, outside of those resulting from illness or disability.

Both parties understand and agree that this agreement will terminate with the expiration of each cited contract and this agreement will be incorporated into the next version of these contracts or will otherwise be dispositioned through the contract negotiations process. Additionally either party may request a revision to this agreement.

Agreed to by the Company:	/s/ R. Lizotte
Agreed to by the Union:	/s/ R. Sank
Agreed to by the Union:	/s/ F. Cirillo

EVERSOURCE ENERGY

107 Selden Street
Berlin, CT 06037

November 30, 2016

Topic: Floating Holiday Protocol

Bargaining unit employees have the ability to choose two floating holidays during the calendar year based on operational requirements and supervisory approval. The two floating holidays can be used for any reason and are requested by the employee. In the event of a conflict between employees requesting the same date, Teal seniority shall govern.

Process

- Employees will make their selection of vacation periods (A,B,C,D....., weeks) by March 1 and vacation schedule will be posted by April 1.
- If an employee wants to use their floating holiday for either – Good Friday and Day after Thanksgiving those days must be selected at the same time as vacation. The total number of bargaining unit employees off for those two days cannot exceed the limits designated by local management. Management will make best effort to be as flexible as possible when designating these local limits.
- On-Call schedule, where applicable, will be prepared using the approved vacation and floating holiday schedules and posted by the last Sunday in April.

Supervisors may require employees to complete a Flexible Holiday Preference form at the start of each year to avoid scheduling conflicts.

Memorandum of Understanding
Between
The Connecticut Light and Power Company dba Eversource Energy and IBEW Locals 420 and 457

Response Specialist - Line

The purpose of this document is to outline the scope and parameters of the newly-established Response Specialist position in Connecticut as agreed to between Connecticut Light and Power dba Eversource Energy (the "Company") and IBEW Local 420 and 457 (the "Union"), collectively referred to herein as the "Parties." In accordance with collective bargaining agreements between the Parties dated June 1, 2016 (the "CBAs"), both Parties agree as follows.

Job Duties and Description
Attachment "A"

Schedule:
The hours of coverage will be 24 hours daily and 7 days per week. See attachment E. The Company commits to maintain the schedule for two years. Subsequent to that, contractual provisions apply.

Holidays:
For the determination of Holiday hours, a Holiday will start at 06:00 hours on the actual day of the holiday and end at 06:00 hours the following day.

There will continue to be twelve (12) paid, eight (8) hour holidays per year. When an employee works a holiday, they will receive eight (8) hours of holiday pay at basic straight time rate and the hours worked will be paid at the applicable rates. Lieu days will continue to be administered per the contract except that in addition to eight (8) hours of holiday pay, at the employee's option, they may elect four (4) hours of "no pay" or four (4) hours of vacation pay to equal a twelve (12) hour day.

Number of positions for the staffing of the Response Specialist:
Range of 81-100 positions. See Attachment D.

Backfilling shift vacancies within the Response Specialist organization:
The Company will determine the need to backfill open shifts and positions based on operational requirements and will be done from within the respective zones. Incremental backfills; will be attempted to be filled from within the zone, if unsuccessful, the company will then utilize the entire Response Specialist roster as appropriate. Scheduled backfills; will be posted and attempted to be filled in the respective zone. All vacancies will be filled in accordance with the overtime list. See Attachment F.

Reporting location(s):
Closest district to home within the zone. See Attachment D *

Coverage area:
The area that is covered by The Connecticut Light And Power Company.

Supervisory Direction (See attached Org Chart):
Response Specialists will be directed through the Systems Operation Center ("SOC"). The ESO organization will consist of a Director, Managers, and ESO/Field Supervision. The Field Supervisor will provide the day-to-day direction for the Response Specialists. When necessary, the local AWC Supervisor- Electric Field Operations will also provide direction, in coordination with ESO management. See Attachment B.

Mutual Aid:
Response Specialists will not be eligible to perform mutual aid assignments off Company property. Company property is defined as any and all property owned by Eversource.

Storm Assignments:
Local AWC personnel, System Projects and Transmission Line will be asked and required prior to Response Specialist being offered to perform Storm assignments on Company property outside of the Connecticut Light and Power service territory.

Training:
The Response Specialist position requires a minimum qualification of Line Mechanic.
The Company will schedule all required ongoing training and updates. See Attachment G.

Response Specialist initial staffing:
Step One
Response Specialist positions will be offered to and filled by the respective districts. The selection of employees will be in accordance with departmental seniority.*

Step Two
Remainder of the vacancies will be filled in accordance with the contractual provisions.

Staffing

- **Internal Candidates –** Hiring process in accordance with contractual provisions.

*Length of service in the Department since date of last employment by the Company shall constitute Department seniority.

- **External Candidates –** Potential candidates to be given a physical skills assessment. Successful candidates to be offered a position within the Response Specialist organization. Candidates who accept a position will receive training/orientation prior to beginning their new role. External hires will start at the minimum Journeyman rate and be held at that rate through their probationary period in accordance with the contract.

Retention

Incumbent qualified employees who elect to accept a position within the Response Specialist classification will be retained for a period of two (2) years from date of transfer and will not be entitled to apply for posted job openings during this period. Exceptions to this two year restriction would be promotions attained through the employee's normal sequence of progression. All others, subsequent to the initial posting, once qualified as a Response Specialist, will remain in the position for a minimum of three (3) years and will not be entitled to apply for posted job openings during this period. Incumbent employees forced into the Response Specialist position will be retained for a minimum of two (2) years.

The initial incumbent employees, who wish to return to their respective districts and classifications, must notify ESO management in writing, at least thirty days prior to their intention to leave the Response Specialist organization. However, an adequate complement of Response Specialists must be maintained to operate the Response Specialist organization. Therefore, an incumbent employee will not be released if the complement would be below a certain threshold, set forth in Attachment D. The Response Specialist reclassified to their previous classification will not be required to accept upgrade to the Response Specialist for a period of two (2) years.

Seniority:

For the purposes of Article V, Section 2 (a) only, Response Specialist and Line Mechanic will be considered as the same classification. In addition, Response Specialists formerly classified as a Lead or Chief Line Mechanic will be treated as a Lead or Chief Line Mechanic respectively for the purposes of Article V, Section 2 (a) only.

Implementation:

Post and fill Response Specialist positions upon contract ratification.

Meals:

Any earned meals will be paid at the contractually higher rate ($20.00).

Attachment A

Eversource Response Specialist Duties

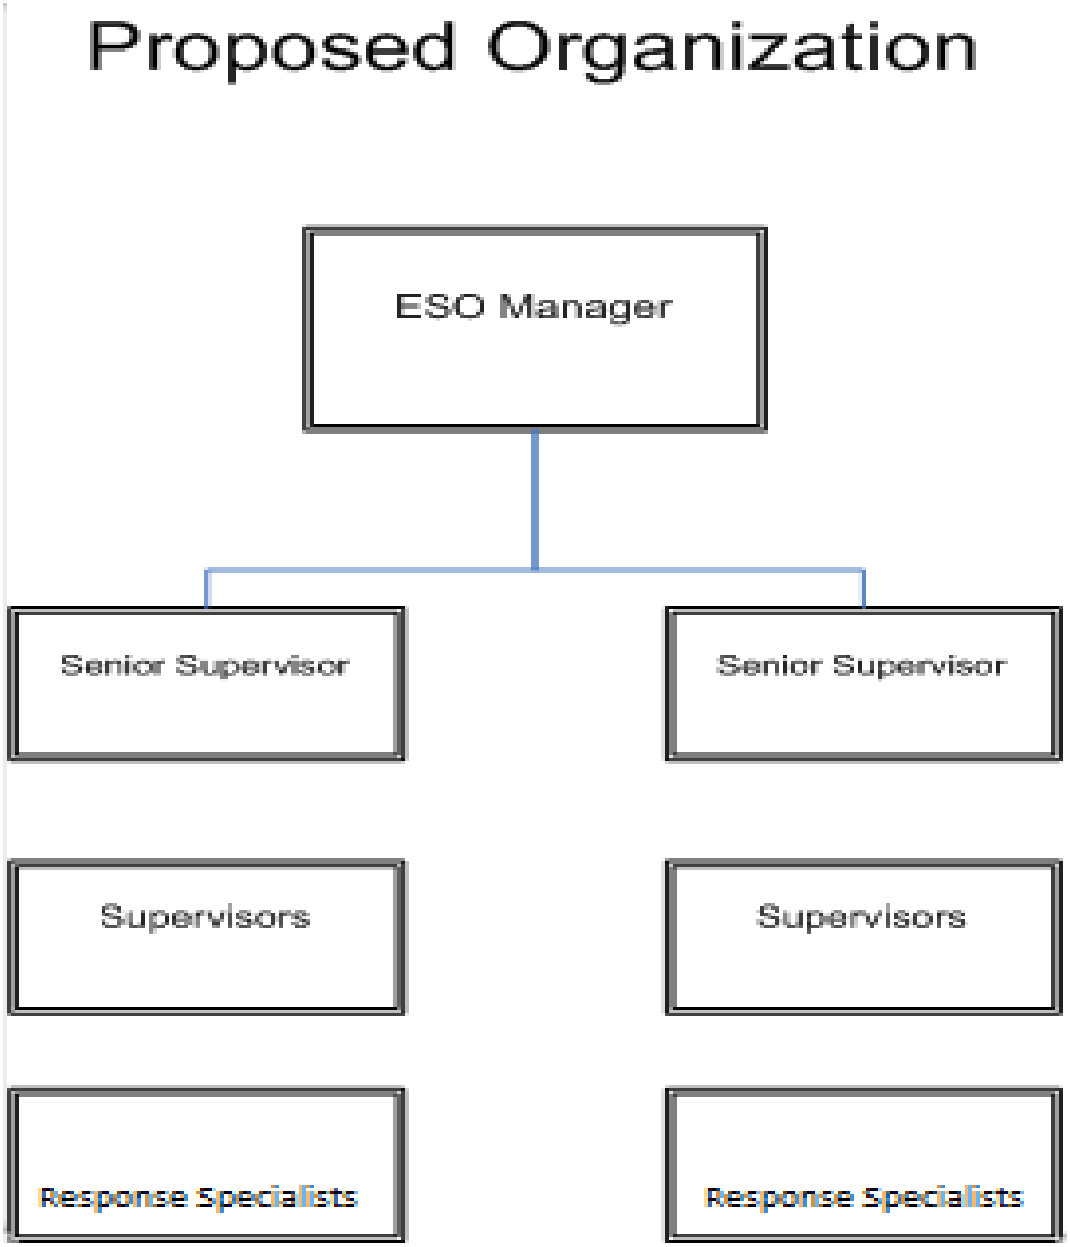
The responsibilities will include, but not be limited to, clearing faulty and unsafe conditions, including maintaining or restoring electrical service, by temporary or permanent means to include replacing or bracing/lashing poles, securing pole tops, floating conductors, extending secondary, or as described in the below listed duties.

The below illustrative duties will be performed as a single-person crew or as a multi-person crew as dictated by the task and applicable work methods.

1. Clearing faulty and unsafe conditions including maintaining or restoring electrical service by temporary or permanent means;
2. Operate primary* and secondary fault locating equipment on URD systems in order to isolate the faulted equipment and restore the customers;
3. Operate switching and control devices on both the overhead and underground systems (pad mounted equipment). See Attachment C for further information;
4. Connect, disconnect, and operate portable transformers and temporary primary jumpers under emergency or urgent conditions;
5. Replace failed transformers with assistance of other qualified employee(s);
6. Replace damaged or faulty equipment during the initial response;
7. Perform street light repair work including replacing defective bulbs, photocells, and heads along with new installations(up to a 250 watt head and under a 12' bracket);
8. Install and remove minimal cover up as needed. This may include primary conductors;
9. Perform secondary overhead and URD service connections associated with connecting customers;
10. Perform overhead distribution system line patrols;
11. Perform URD and overhead equipment inspections;
12. Make current and voltage measurements, as required;
13. Determine and record causes of failures and communicate the findings to the SOC;
14. Communicate the status of outages to the SOC – on-site, restoration projections, ETRs, etc.;
15. Investigate customer concerns, communicate with customer when needed to provide information;
16. Investigate and correct complaints of interference to telephone, radio, or television reception;
17. Document and submit required records and reports associated with trouble, line patrols, equipment inspections, and other related work;
18. Utilize mobile data terminals as they become available;
19. Check substation equipment status and communicate what is visually ascertained with respect to associated targets. Operate GOABs that Line Mechanics operate (excluding GOABs with keyed interlock systems), reclosers and cutouts when needed, as well as other equipment that Line Mechanics currently operate.

*this includes all URD/DB single phase systems and three phase radials

Attachment B



Attachment C

There are two types of pad mounted switchgear in CT. The first is air insulated PMH Gear (Type 3, 5, 8, 9, 11, 12, and 13). The second is SF6 insulated (Vista, Trayer). In addition, there are wall mounted (Elastimold) located in customer vaults (primarily in Stamford and Hartford) that are tied into the UG system. Response Specialists would not normally respond to these outages. However, the Company may train them if they were to be utilized to restore customers while UG personnel are responding to an event.

There are many more types of gear in the industry. Therefore, this is for discussion purposes only and not meant to be all-inclusive.

Response Specialist Training Subjects

- Work site protection
- Auto transformer installation and removal
- Customer interaction
- ETR estimates/importance
- Stray voltage initial response
- Computer/tablet training
- Transformer connections, standard and unusual
- Ferroresonance
- Capacitor operations
- Regulator operations
- Direct buried & grounding
- DB trailer set up
- Von DB Primary fault finding
- Safe excavation practices
- Spitfire and Pin Pointer secondary fault finding
- PMH Switch gear and S&C fuse handling
- Recloser and loop scheme operations
- Substation breakers and target recognition
- Environmental training
    - Oil spill containment, transport and reporting
    - Endangered species nest removal
- Outage prevention – best practices (upgrading the event to prevent future outages)
- Standard SERT subjects will continue to be scheduled through the training department

*This list of subjects may not be all inclusive and could expand as business needs demand.

Memorandum of Understanding
between
The Connecticut Light and Power Company dba Eversource Energy
and
IBEW Locals 420 and 457
Response Specialist – Electrician

The purpose of this document is to outline the scope and parameters of the newly-established Response Specialist position in Connecticut as agreed to between Connecticut Light and Power dba Eversource Energy (the "Company") and IBEW Local 420 and 457 (the "Union"), collectively referred to herein as the "Parties." In accordance with collective bargaining agreements between the Parties dated June 1, 2016 (the "CBAs"), both Parties agree as follows.

Job Duties and Description:

Attachment "A"

Schedule:

The hours of coverage will be 24 hours daily and 7 days per week. See Attachment C. The Company commits to maintain the schedule for two years. Subsequent to that, contractual provisions apply.

Holidays:

For the determination of Holiday hours, a Holiday will start at 06:00 hours on the actual day of the holiday and end at 06:00 hours the following day.

There will continue to be twelve (12) paid, eight (8) hour holidays per year. When an employee works a holiday, they will receive eight (8) hours of holiday pay at basic straight time rate and the hours worked will be paid at the applicable rates. Lieu days will continue to be administered per the contract except that in addition to eight (8) hours of holiday pay, at the employee's option, they may elect four (4) hours of "no pay" or four (4) hours of vacation pay to equal a twelve (12) hour day.

Number of positions for the initial staffing of the Response Specialist- Electrician organization:

24 positions

Backfilling shift vacancies within the Response Specialist – Electrician organization:

The Company will determine the need to backfill open shifts and positions based on operational requirements and will be done from within the respective zones. Incremental backfills; will be attempted to be filled from within the zone, if unsuccessful, the company will then utilize the entire Response Specialist - Electrician roster as appropriate. Scheduled backfills; will be posted and attempted to be filled in the respective zone. All vacancies will be filled in accordance with the overtime list.

Reporting location(s):

Closest district to home within the zone. See Attachment D.

Coverage area:

The area that is covered by The Connecticut Light and Power Company.

Supervisory Direction (See Attachment B):

Response Specialist – Electrician will be directed through the Systems Operation Center ("SOC"). The ESO organization will consist of a Director, Managers, and ESO/Field Supervision. The Field Supervisor will provide the day-to-day direction for the Response Specialist - Electrician. When necessary, the local AWC Supervisor- Electric Field Operations will also provide direction, in coordination with ESO management.

Mutual Aid:

Response Specialist – Electrician will not be eligible to perform mutual aid assignments off Company property. Company property is defined as any and all property owned by Eversource.

Storm Assignments:

Local AWC personnel, General Operating and Central Maintenance will be asked and required prior to Response Specialist - Electrician being offered to perform storm assignments on Company property outside of the Connecticut Light and Power service territory.

Training:

The Response Specialist- Electrician position requires a minimum qualification of Electrician.
The Company will schedule all required ongoing training and updates.

Response Specialist – Electrician Initial Staffing:

Step One
Response Specialist - Electrician positions will be offered to and filled by the respective zones. The selection of employees will be in accordance with Teal Book seniority.

Step Two
Remainder of the vacancies will be posted in accordance with the contractual provisions.

Staffing

- **Internal Candidates –** Hiring process in accordance with contractual provisions.
- **External Candidates –** Potential candidates to be given a physical skills assessment. Successful candidates to be offered a position within the Response Specialist organization. Candidates who accept a position will receive training/orientation prior to beginning their new role. External hires will start at the minimum Journeyman rate and be held at that rate through their probationary period in accordance with the contract.

Retention
Incumbent qualified employees who elect to accept a position within the Response Specialist – Electrician classification will be retained for a period of two (2) years from date of transfer and will not be entitled to apply for posted job openings during this period. Exceptions to this two year restriction would be promotions attained through the employee's normal sequence of progression. All others, subsequent to the initial posting, once qualified as a Response Specialist - Electrician, will remain in the position for a minimum of three (3) years and will not be entitled to apply for posted job openings during this period. Incumbent employees forced into the Response Specialist - Electrical position will be retained for a minimum of two (2) years.

The initial incumbent employees, who wish to return to their respective districts and classification, must notify ESO management in writing, at least thirty days prior to their intention to leave the Response Specialist organization. Any Zone for which a vacancy exists will be offered in descending order of seniority in that Zone. If not filled from within that Zone it will be offered in descending order of seniority in the other Zone. If the opening is not filled from either Zone, the junior qualified Electrician in the Zone with the vacancy will be required to accept the unfilled vacancy in the Response Specialist-Electrician classification. The Response Specialist –Electrician reclassified to their previous classification will not be required to accept upgrade to the Response Specialist – Electrician for a period of two years.

However, an adequate complement of Response Specialists – Electricians must be maintained to operate the Response Specialist organization. Therefore, an incumbent employee will not be released if the complement would be below a certain threshold, set forth in Attachment C.

Seniority:

For the purposes of Article V, Section 2 (a) only, Response Specialist – Electrician and Electrician will be considered as the same classification. In addition, Response Specialist – Electrician formerly classified as a Lead or Chief Electrician will be treated as a Lead or Chief Electrician respectively for the purposes of Article V, Section 2 (a) only.

Implementation:

Post and fill Response Specialist – Electrician positions upon contract ratification.

Meals:

Any earned meals will be paid at the contractually higher rate ($20.00).

Attachment A

Eversource Response Specialist – Electrician Duties

Under general supervision, inspects, maintains repairs and operates substations, and does such similar work in the electric system, performing such duties as:

Performing the duties included in the Time Merit Progression Program for Electrician

Essential Functions:

- Repairing and maintaining circuit breakers, switchgear, transformers, and similar equipment, including the replacing of sub-assemblies;
- Installing circuit breakers, switchgear, transformers, and similar equipment as directed;
- Making all electrical tests using standard test equipment, including but not limited to carrier and transfer tripping equipment testing and battery testing;
- Performing switching operation involving any voltage;
- Is thoroughly familiar with switching and tagging procedures, switchboard facilities, and related apparatus in area of normal assignment;
- Operating substations and network equipment;
- Checking, inspecting, and testing underground system and maintaining equipment;
- Reading and interpreting wiring diagrams, blue prints, etc.;

This Agreement, effective June 1, **2019**, is between Eversource, hereinafter referred to as the Company, as the Successor to The Connecticut Light and Power Company, The Hartford Electric Light Company and Locals 420 and 457 of the International Brotherhood of Electrical Workers, hereinafter jointly referred to as the Union and shall be final and binding on any and all successors and assigns of the employer, whether by sale, transfer, merger, acquisition, consolidation, or otherwise. The employer shall make it a condition of transfer that any such successors or assigns shall be bound by the terms of this Agreement.

ARTICLE I

Torrington
General

Section 1. The Company recognizes Local 420 as the exclusive collective bargaining representative with respect to rates of pay, hours of employment and other conditions of employment for employees in the former Torrington bargaining unit of The Hartford Electric Light Company who were on the eligibility list for voting in the NLRB election in case number 1-RC-5243 and any employee hired or permanently transferred to replace any such employee and any additional personnel covered by the provisions of Section 2 hereof.

Section 2. If (a) additional personnel are hired for, or Company personnel are transferred permanently to, classifications included in the bargaining unit description in case number 1-RC-5243 or classifications added to the coverage of this Agreement, and (b) such personnel are assigned to the same reporting headquarters as any employee on said eligibility list or a reporting headquarters within the Towns of Torrington, New Hartford, Burlington, Thomaston or Plymouth, Connecticut, they shall become members of the bargaining unit and shall be added to the group referred to in Section 1 hereof, as of their date of hire, if newly hired, or as of their date of transfer, if permanently transferred. Nothing in this Article shall be deemed to require the hiring or transfer of personnel.

Section 3. An employee covered by Section 1 above who is permanently transferred to any reporting headquarters of the Company which was not the reporting headquarters of any of the employees on said eligibility list or to any position not included in the classifications set forth in Appendix A of this Agreement, shall cease to be a member of the bargaining unit as of the date of such transfer, but such employee shall retain seniority rights in the event of layoff for one year as provided in Section 4 of Article V. If a currently recognized reporting headquarters within the Torrington Bargaining Unit is relocated in the Towns of Torrington, New Hartford, Burlington, Thomaston or Plymouth, Connecticut, recognition herein will extend to all employees at such reporting headquarters with respect to job classifications appearing in Appendix A, Nomenclature, or in any other classification added to the Unit by agreement of the parties.

Section 4. By way of example as to the application of this Article, employees now or hereafter covered by Section 1 hereof who are permanently transferred to any service center located outside the above-mentioned town will cease to be members of the bargaining unit in accordance with Section 3 hereof. Similarly, a meter shop repairman now covered by Section 1 hereof who is permanently transferred to the Company's meter shop in Hartford where it is contemplated to centralize meter repair work, will cease to be a member of the bargaining unit. There shall be no personnel added to the bargaining unit in connection with either such change in the Company's operations. By way of further example, in the event of a change in the reporting headquarters in Torrington, from one location to another within the Towns of Torrington, New Hartford, Burlington, Thomaston or Plymouth, Connecticut, the employees permanently transferred from their present reporting headquarters in Torrington to such new reporting headquarters will not result in such employees ceasing to be members of the bargaining unit.

Section 5. In the event of any dispute between the parties as to whether an individual is a member of the bargaining unit or not, such dispute shall be handled under the grievance procedure of this Agreement except that if the grievance shall not have been satisfactorily disposed of after the meeting with the Grievance Committee under Section 4 of Article IV of this

Agreement, instead of proceeding to arbitration as therein provided, the dispute shall be resolved by joint submission of the bargaining unit issue to the National Labor Relations Board through the filing of a Motion for Clarification on the Certification.

ARTICLE I
New London
General

The Company recognizes Local 457, IBEW as the exclusive representative of all employees in the former New London bargaining unit of The Hartford Electric Light Company, as were certified by proper authorities for the purpose of collective bargaining in respect to rates of pay, wages, hours of employment or other conditions of employment.

Middletown

This Agreement, dated as of June 1, 2016, is between The Connecticut Light and Power Company, hereinafter referred to as the Company, as the Successor to The Hartford Electric Light Company and Local 457 of the International Brotherhood of Electrical Workers, AFL-CIO, hereinafter referred to as the Union, in respect to the bargaining unit certified by the National Labor Relations Board on April 2, 1959, in case number 1-RC-5240, and which is described under Article I below and hereafter referred to as the "Middletown Bargaining Unit."

ARTICLE I
Middletown
General

Section 1. The Company recognizes the Union as the exclusive collective bargaining representative of those employees who were on the eligibility list for voting in the NLRB election in case number 1-RC-5240 and any employee hired or permanently transferred to replace any such employee and any additional personnel covered by the provisions of Section 2 hereof.

Section 2. If (a) additional personnel are hired for, or Company personnel are transferred permanently to, classifications included in the bargaining unit description in case number 1-RC-5240 or classifications added to the coverage of this Agreement, and (b) such personnel are assigned to the same reporting headquarters as any employee on said eligibility list or a reporting headquarters within the Towns of Middletown, Middlefield, Durham, Haddam, Portland, or Cromwell, Connecticut, they shall become members of the bargaining unit and shall be added to the group referred to in Section 1 hereof, as of their date of hire, if newly hired, or

as of their date of transfer, if permanently transferred. Nothing in this Article shall be deemed to require the hiring or transfer of personnel.

Section 3. An employee covered by Section 1 above who is permanently transferred to any reporting headquarters of the Company which was not the reporting headquarters of any of the employees on said eligibility list or to any position not included in the classifications set forth in Article V of this Agreement, shall cease to be a member of the bargaining unit as of the date of such transfer, but such employee shall retain seniority rights in the event of layoff for one year as provided in Section 4 of Article V. It is understood that the designation of a new or different reporting headquarters within the Towns of Middletown, Middlefield, Durham, Haddam, Portland, or Cromwell, for any of the employees on said eligibility list shall not be deemed a reporting headquarters which was not the headquarters of any of the employees on said eligibility list.

Section 4. By way of example as to the application of this Article, employees now or hereafter covered by Section 1 hereof who are permanently transferred to any service center located outside the above-mentioned towns will cease to be members of the bargaining unit in accordance with Section 3 hereof. Similarly, a meter shop repairman now covered by Section 1 hereof who is permanently transferred to the Company's meter shop in Hartford where it is contemplated to centralize meter repair work, will cease to be a member of the bargaining unit. There shall be no personnel added to the bargaining unit in connection with either such change in the Company's operations. By way of further example in the event of a change in the reporting headquarters in Middletown, from one location to another within the Towns of Middletown, Middlefield, Durham, Haddam, Portland, or Cromwell, the employees permanently transferred from their present reporting headquarters in Middletown to such new reporting headquarters will not result in such employees ceasing to be members of the bargaining unit.

Section 5. In the event of any dispute between the parties as to whether an individual is a member of the bargaining unit or not, such dispute shall be handled under the grievance procedure of this Agreement, except that if the grievance shall not have been satisfactorily disposed of after the meeting with the Grievance Committee under Section 4 of Article IV of this Agreement, instead of proceeding to arbitration as therein provided, the dispute shall be resolved by joint submission of the bargaining unit issue to the National Labor Relations Board through the filing of a Motion for Clarification on the Certification.

Recognition is granted pursuant to the Stipulation of Representation dated October 11, 2016 (case number 01-RC-185500).

Definition of an employee

1. The word "employee" as used in this Agreement refers only to regular employees in the bargaining unit. Regular employees are employees hired on a full-time or part-time basis for continuing nontemporary work in an established job classification.

2. A temporary employee is one hired for a special project of limited duration not to exceed twelve (12) months, unless a longer period is agreed to by the Company and the Union. Employees changed from temporary to regular employee status shall have their Teal Book Seniority count from the first date of their most recent employment as a temporary employee. Any time served as a temporary employee shall be considered as a part of the probationary time required.

ARTICLE I
Engineering Designer and Distribution Design Engineer Units

The Company recognizes the Union as the sole collective bargaining representative with respect to wages, hours, and other conditions of employment for all full-time and regular part-time senior circuit owners, circuit owners and large and complex construction engineers, senior engineers, assistant engineers, associate engineers, engineering technologists, associate engineering technologists, senior engineering technologists, engineering specialists, and senior field technicians, employed by Connecticut Light & Power Company throughout the State of Connecticut, excluding guards, clerical and confidential employees, and supervisors as defined in the Act. Recognition is granted pursuant to the Certificate of Representative of the National Labor Relations Board in case number 01-RC-112451 dated December 13, 2013.

ARTICLE I
Field Communications Unit

The Company recognizes the Union as the sole collective bargaining representative with respect to wages, hours, and other conditions of employment for all full-time and regular part-time Test Technicians, Test Specialists A, Test Specialists B, and Senior Test Specialists in Distribution Automation and Substation Automation employed by Connecticut Light & Power Company at its Berlin, Connecticut area facility, excluding all other employees, guards, professional employees, and supervisors as defined in the Act. Recognition is granted pursuant to the Certificate of Representative of the National Labor Relations Board in case number 01-RC-234774 dated February 20, 2019.

ARTICLE IA
General

Section 1. The Union agrees that its members who are employees of the Company will individually and collectively perform efficient work and service, and that they will avoid and discourage waste of materials, time and manpower, and that they will use their influence and best efforts to protect the property of the Company and its interests and to prevent loss of tools

and materials, and that they will cooperate with the Company in promoting and advancing the welfare of the Company and the service at all times.

Section 2. Employees who were members of the Union in Stamford on June 21, 1968, in New London on May 22, 1968, in Torrington and Middletown on July 1, 1976, or who later become members, will as a condition of employment be required to maintain their membership for the duration of this Agreement.

(a) Employees hired or transferred into the Bargaining Unit in Stamford after June 21, 1968, in New London after May 22, 1968, in Torrington and Middletown after July 1, 1976 will be required as a condition of employment to join or make application to join the Union thirty days from their date of employment or transfer or thirty days after the date this Agreement is executed, whichever is later.

(b) Stamford employees on June 21, 1968, New London employees on May 22, 1968 or Torrington and Middletown employees on July 1, 1976 who were not members of the Union in their respective areas are exempt from the provisions of Article II, Section 3 above.

(c) If the Union refuses to accept as a member or refuses to continue the membership of any employee for any reasons other than the failure to pay or tender payment of required initiation fees and periodic dues, the employee shall be exempt from the provisions of Article II, Section 3 above. It shall be the responsibility of the Union to solicit the membership of employees who are required to join the Union under Article II, Section 3. Should the Union fail to solicit the membership of an employee within the time period prescribed in Article II, Section 3, that employee shall be exempt from the provisions of Article II, Section 3 until the first day of the calendar month within which the employee's membership is first solicited by the Union.

(d) Should an employee fail or refuse to join the Union or maintain membership therein as hereinbefore provided, the Union may request the Company to discharge such employee. The request shall be submitted in writing to the Director-Labor Relations. Two weeks from the date of receipt of the request, unless the Company has notified the Union that the matter is in dispute, the employee will be discharged. If during the two week period the employee complies with the Union membership provisions of this Article, the Company will not be obliged to discharge the employee.

(e) If a dispute arises under Article II, Section 3 hereof concerning the discharge of an employee, the Director-Labor Relations and the Business Manager of the Union shall ascertain the facts and endeavor to settle the dispute. Pending settlement of the dispute, the Company will not suspend or discharge the employee concerned. If the dispute is not settled within thirty calendar days, (subject to extension by mutual agreement), from date of receipt of the Union's written request for discharge as provided in Article II, Section 3 hereof, either party may, within the next ten calendar days following the thirty calendar day period, submit the dispute to Arbitration for final settlement as provided in Article IV.

Section 3. Each new employee shall upon the commencement of employment be given a copy of the collective bargaining Agreement, informed that the Company has recognized the local Union as the exclusive bargaining representative of all employees in the bargaining unit, and introduced to the Union steward or other Union official employed in the same department or unit.

ARTICLE II
Recognition And Union Membership

Section 1. Recognition of Union

1. (a) The Company recognizes the Union as the exclusive bargaining agent for all employees in job classifications listed in Appendix "A" of this Agreement.

1. (b) The Company and Union agree to continue their cooperative efforts to promote safety, efficiency and harmony among all the employees and to promote and advance the welfare of the Company and the service at all times.

The Union agrees that its members, who are employees of the Company, will individually and collectively continue to avoid and discourage waste of materials, time, and manpower, and that they will use their influence and best efforts to protect the property of the Company.

1. (c) Each Local Union shall notify the Company in writing of the identity of its elected and appointed representatives and, in the event of a change of any representative, shall notify the Company of such change promptly. Notices to the Company under this provision shall be directed to the Director - Labor Relations.

Section 2. Exclusive Bargaining Agent for New Job Classifications

If at any time during the term of this Agreement, or any renewals or extensions hereof, the Company shall recognize the Union as the exclusive bargaining agent of the employees in any job classification in addition to those specified in Section 1.(a) of this Article, all of the provisions of this Agreement shall become applicable to the employees in such job classification as though such job classification had been originally designated herein, except that the rates of pay applicable to such job classification shall be such as may be agreed upon between the Company and the Union.

Section 3. Union Membership Requirements

The following provisions will apply to employees in job classifications covered by this Agreement:

3. (a) Employees who are members of the Union or its predecessor Union on June 1, 2009, or who later become members, will as a condition of employment be required to maintain their membership for the duration of this Agreement.

3. (b) Employees hired or transferred into the bargaining unit will be required as a condition of employment to join or make application to join the Union thirty days from their date of employment or transfer or thirty days after the date this Agreement is executed, whichever is

later. Employees hired for temporary summer assignment are excluded from this requirement for an additional sixty-day period in that summer and in any subsequent summers of temporary employment from their date of employment.

3.(c) If the Union refuses to accept as a member or refuses to continue the membership of any employee for any reasons other than the failure to pay or tender payment of uniformly required initiation fees and periodic dues, the employee shall be exempt from the provisions of (a) and (b) above. It shall be the responsibility of the Union to solicit the membership of employees who are required to join the Union under Section 3.(b). Should the Union fail to solicit the membership of an employee within the time period prescribed in (b), that employee shall be exempt from the provisions of (b) until the first day of the calendar month within which the employee's membership is first solicited by the Union.

3.(d) Should an employee fail or refuse to join the Union or maintain membership therein as hereinbefore provided, the Union may request the Company to discharge such employee. The request shall be submitted in writing to the Director-Labor Relations. Two weeks from the date of receipt of the request, unless the Company has notified the Union that the matter is in dispute, the employee will be discharged, provided that, if during the two week period the employee complies with the Union membership provisions of this Section 3., the Company will not be obliged to discharge the employee.

3.(e) If a dispute arises under Section 3.(d) hereof concerning the discharge of an employee, the Director-Labor Relations and the respective Business Manager of the Union shall ascertain the facts and endeavor to settle the dispute. Pending settlement of the dispute, the Company will not suspend or discharge the employee concerned. If the dispute is not settled within thirty calendar days, (subject to extension by mutual agreement), from date of receipt of the Union's written request for discharge as provided in Section 3.(d) hereof, either party may, within the next ten calendar days following the thirty calendar day period, submit the dispute to Arbitration for final settlement as provided in Article IV.

Section 4. Union Dues and Initiation Fees

4.(a) Each Local Union shall notify the Company in writing of its required amounts of membership initiation fees and monthly dues. In the event such fees or dues are to be changed during the term of this Agreement, the Local Union concerned shall give the Company written notice in advance of such change. Notices to the Company under this provision shall be directed to the Director-Labor Relations.

4.(b) Upon receipt of individual written authorization and assignment from employees in job classifications listed in Appendix "A" the Company will make a single deduction for the required initiation fee and in addition will deduct required monthly Union dues from the employees' wages on a pay period basis and remit monthly to the Local Union Officers designated in writing by each Local Union. Authorizations shall be submitted in the form and language shown in Appendix **"**B**"** attached hereto and made a part of this Agreement. If an employee is transferred out of the bargaining unit, the employee's authorization for the payroll deduction of Union dues will automatically become void at the end of the calendar month within which the employee's transfer is effective.

4.(c) The Company will deduct from the wages of each employee on a pay period basis from whom it receives written authorization, voluntary contributions to the Union's COPE

fund. Such deductions shall be remitted to the financial secretary of the Union monthly, along with a list of employees and amounts so deducted.

Section 5. Nondiscrimination Clause

It is agreed that neither the Company nor the Union will discriminate against any employee in application of any of the terms of this Agreement because of race, color, religion, sex, national origin, age, ancestry, marital status, familial status, sexual orientation, disability/handicap, military status, genetic information, Vietnam era veterans, disabled veterans, and other veterans.

ARTICLE III
The Functions Of Management

In order that the Company may discharge its obligations as a public utility and furnish dependable and satisfactory service to its customers, it is mutually agreed that the Company shall exercise the functions of management, including among other things the determination of the number and the qualifications of the employees required to perform the work, the direction of the working forces, the right to hire, suspend or discharge for just cause, promote, demote, transfer, discipline and lay off employees. In exercising these rights the Company will act in accordance with the provisions of this Agreement.

ARTICLE IV
Grievances

Section 1. Weingarten

Employees have the right to have a union representative present during any investigatory interview/meeting which the employee reasonably believes may result in disciplinary action.

Section 2. Open-Door Policy

Management will discuss problems or potential problems with Business and Assistant Business Managers. In a letter to the Local Union the Company stated it has always believed in an "open-door" policy regarding its treatment of employee problems and contemplates no change in that policy. Under such a policy, an employee or an employee's representative in the person of a Union Business Manager or Assistant Business Manager is welcome to discuss problems or potential problems with management at any reasonable time.

The Company agrees with the Union that it is mutually advantageous to avoid grievances whenever possible by prompt investigation and appropriate adjustment where indicated.

Section 3. Introduction to Grievance Procedure

Any complaint made by an employee to the employee’s immediate Supervisor concerning the employee’s wages, hours or working conditions which is accompanied by a request for an answer will be considered as a grievance for the purpose of this Article. Grievances should be presented as promptly as possible following the incidents that caused

them. At such times as are mutually agreeable, an aggrieved employee and, if requested by the Business Manager of the Local concerned, an employee from within the Local area concerned, other than the aggrieved, will be allowed time to discuss grievances with management in Steps One, Two or Three without loss of pay for normal schedule work hours providing overtime replacement is not required. This same provision will apply also for a Steward, Business Manager or Assistant Business Manager if the employee wishes one to appear with the employee in Step One, or for a Business Manager or the employee's designated representative or an Assistant Business Manager in Step Two, or for a Business Manager or the employee's designated representative in Step Three.

In order that any grievance by an employee or group of employees may be promptly and satisfactorily settled, the procedure outlined below shall be followed:

Section 4. Step One

The aggrieved employee or employees in person, who may be accompanied by a Steward, Business Manager or Assistant Business Manager, shall present the grievance to the immediate Supervisor as promptly as possible following the incident which caused it. The immediate Supervisor will endeavor to settle it by giving an answer as promptly as possible and within seven calendar days of the date of presentation. If an answer is given and accepted in this Step, the grievance is to be considered closed. If an answer is not given, or is not acceptable, it may be taken to Step Two within fifteen calendar days, (subject to extension by mutual agreement), from date of presentation in this Step.

Section 5. Step Two

The Business Manager or Assistant Business Manager shall forward the grievance in writing to the Manager concerned stating its nature, specifying the provision(s) of the Agreement on which it is based and giving a brief description of the circumstances causing it. The Manager concerned or the employee's designated representative will investigate the grievance and answer it as promptly as possible. If a meeting is held in this Step, it shall be attended by the Business Manager or Assistant Business Manager who presented the grievance, the Manager concerned or the employee's designated representative, other management representatives if concerned and, at the option of either the Company or the Union, the aggrieved employee(s) shall be present. At this Step in the procedure, there also may be present either an International Representative of the Union in an advisory capacity to the Local Union, or a Representative of the Labor Relations Department of the Company, or both.

In the event a Business Manager has factual and reasonable evidence that the Company has violated a provision(s) of this Agreement and the employee(s) affected fails to present a grievance in Step One, then the Business Manager, having first notified the employee(s) affected, may initiate a grievance in this Step at any time within a period not in excess of thirty calendar days, (subject to extension by mutual agreement), from the date of the claimed violation.

The Company will furnish written answers to the Union for grievances which are concluded with adjustment in Step Two. When grievances are concluded in Step Two without adjustment, the Union will so-notify the Company in writing.

If a grievance is not settled within ten calendar days from date of receipt in this step, it may be taken to Step Three within twenty-five calendar days, (subject to extension by mutual agreement), from date of such receipt.

Section 6. Step Three

The Business Manager shall forward a copy of the written grievance identified as being in Step Three, to the Director - Labor Relations. The latter shall refer the grievance to a joint committee consisting of:

(A) three representatives appointed by the Company, and
(B) three representatives appointed by the Union, one shall be the Business Manager of the Local Union concerned, and/or the employee's designated representatives. In addition an International Representative may be present in this Step in an advisory capacity to the Local Union.

6.(a) Designee to Appear for the International Representative - An International Representative may designate an alternate representative to appear for the employee in Step Three grievance meetings with the Company, provided advance confirmation of this arrangement is set forth in letters to be exchanged by the International Vice-President of the International Brotherhood of Electrical Workers, second district, and the Director of Labor Relations, of the Company. Such letters shall confirm the status of the alternate representative, who shall be a bargaining-unit employee of the Company, as having authority to represent the International Union. The alternate representative will, at such times as are mutually convenient, be excused from the employee's normal work assignment without pay from the Company for the purpose of discussing Step Three grievances with Company representatives.

The Joint Committee shall endeavor to meet within fifteen calendar days from the date the grievance is received by the Director - Labor Relations. It shall be the duty of the Joint Committee to investigate all of the circumstances surrounding the grievance and endeavor to settle it on a factual basis, including the method and manner of complying with decision.

6.(b) Notifications Required When Grievances are Concluded - The Company will furnish written answers to the Union for grievances which are concluded with adjustment in Step Three. When grievances are concluded in Step Three without adjustment, the Union will so-notify the Company in writing.

6.(c) Filing of a Union or Company Grievance - At this Step in the grievance procedure, a "Union Grievance" or a "Company Grievance" may be initiated. Such a grievance shall consist of a claim or charge by the Union or the Company, in writing, that a specified provision of this Agreement, involving the status, rights, privileges, or duties of the Union as an organization or of the Company as management has been violated. If a "Union Grievance" is presented, it shall be forwarded in the manner specified in the first paragraph of this Step. If a "Company Grievance" is initiated, it shall be forwarded by the Director - Labor Relations to the Business Manager of the Local Union concerned and the International Representative who shall refer the grievance for settlement to a joint committee as provided in this Step.

If the grievance is not settled within thirty calendar days from the date of receipt in this Step, either party may take it to arbitration in accordance with and subject to the provisions of Article IV hereof within forty calendar days, (subject to extension by mutual agreement), from the date of receipt in this Step.

Section 7. Time Off For Grievance

Employees will be allowed necessary time off without loss of pay for attending scheduled grievance discussions with the Company at the second or third step. In addition to the time allowed above, the Assistant Business Manager or, in the employee's absence, the employee's designated representative, will, upon specific request, be allowed necessary time off to assemble data for scheduled grievance meetings.

Additional time off without pay will be allowed to not more than two representatives each from the Torrington Unit, Stamford Unit, New London Unit, Falls Village Unit, Simsbury Unit, Hartford Unit, Middletown Unit, Madison, Torrington Blue, East Hampton, Tolland, Danielson, Cheshire, Newtown, Waterbury, Greenwich, Norwalk, Berlin, Eastern Projects, Central Projects, Western Projects, General Operations, Transmission Harbor Avenue, Transmission Mattatuck Heights, Transmission Sequin Drive and two additional representative at large (upon written request by the Union) for the time required to attend state, regional, and national labor conventions.

Section 8. Grievance Committee/ Major Policy Changes

The Company and Union shall have the right to use Section 3 of this Article of the grievance procedure including arbitration, to settle any alleged violation or dispute over the interpretation or application of any provision of this Agreement. In such case, if the matter in question is one of major policy and Companywide application, and if the provisions in question are identical in all Agreements, the Grievance Committee may, by mutual consent, be increased to eight persons representing the Union and eight persons representing the Company. This clause shall not be used to circumvent the grievance procedure as provided in Section 1 hereof, which must be followed in any matter which involves individual employees.

Section 9. Failure To Pursue Or Respond

Any grievance not presented or followed up through the grievance procedure above outlined shall be deemed waived. If at any step in the grievance procedure the Company fails to give its answer within the prescribed time, the grievance will automatically proceed to the next step unless the time is extended by mutual consent.

Section 10. Precedent Setting

Where either party so states in writing in the disposition of a matter not submitted to arbitration under the grievance procedure, the acceptance of the action or disposition shall not be binding on either party as a precedent for the future on the same or related matters.

Section 11. Agreements Concerning Grievance

In the event any Agreement affecting the interpretation or application of this Agreement is reached with any local Union, a copy of such Agreement shall be sent immediately to the Business Manager of those local Unions not participating therein. In the event the Business

Manager of such local Union informs the Company in writing within one month that such disposition or Agreement is not acceptable to the employee's local Union, such Agreement shall not be binding on that local Union. This does not apply to awards made as a result of arbitration which shall be binding on all local Unions.

Section 12. Processing of Discharge Grievance

The Company agrees to expedite the processing of grievances involving discharge as rapidly as possible.

Any employee who has been disciplined or discharged and who is subsequently exonerated, shall be reinstated without prejudice or loss of seniority and compensated for any loss in wages, unless the Grievance Committee or the Arbitrator determine otherwise.

Section 13. Grievance Procedure for Berlin Construction Department

Due to work assignments of employees at remote locations, there could be a delay of several days before a grievance could be presented to the supervisor. Supervisors are requested to make arrangements for prompt attention to any grievance, and Union representatives will advise bargaining-unit employees to telephone to request a meeting with the immediate supervisor when they have a grievance.

Section 14. Discipline or Discharge

14.(a) The Company shall, on the same day on which it occurs, orally advise the local Union concerned of any suspension or discharge, and if requested by the Union, the matter shall on the same day, be discussed by the proper Management representative and the Business Manager and/or Assistant Business Manager or designated representative of the local Union concerned. The Company shall advise the Union in writing of any disciplinary action or discharge, which shall only be for just cause, within three (3) working days of its occurrence, specifying the reason therefore. The Company and Union shall designate representatives in each Division who will represent them at each step of the grievance procedure, and both the Company and the Union shall have a person available within the time limits provided for steps 1 and 2 of the grievance procedure.

14.(b) The Union shall have the right to question the propriety of any such disciplinary action or discharge through the grievance procedure herein outlined, including arbitration, but any such grievance shall be filed within fifteen days after receipt by the Union of notification of the Company's action.

Section 15. Submission of Grievance; Selection of Arbitrator

If a grievance is not settled in Step Three of Article IV, and provided the grievance is a dispute involving the interpretation, application or compliance with any provision of this Agreement, either the Union or the Company may, within the time limits specified in Article IV, Step Three, submit the grievance to **American Arbitration Association for arbitrator selection and hearing conducted under its rules then prevailing**. The decision of the arbitrator shall be final and binding on both the Union and the Company for the duration of the Agreement.

Section 16. Payment Of Expenses For Arbitration

It is understood that for the term of this Agreement, where the original position of the Union is upheld by the Arbitrator, the Company will pay such fees charged by the Arbitrator or the American Arbitration Association for any grievance properly processed and properly referred to arbitration under the terms of Article IV.

In any other case such fees will be shared equally by the Company and the Union. In all cases, any costs incurred by either party in its own behalf, such as legal fees, stenographic costs, etc., will be paid by that party.

Section 17. Role of Arbitrator

The parties recognize the proper role of the arbitrator as one of deciding issues submitted by the parties under this Article, after a full and fair hearing, and not as being invested with any authority to participate in matters of collective bargaining.

Section 18. Agreement Changes Nonarbitrable

It is understood and agreed that proposals to add to or change this Agreement shall not be arbitrable and that no proposal to amend or terminate this Agreement may be referred to arbitration under this Article.

ARTICLE V
Seniority

Introduction

Seniority which employees accumulate is of two types:

(a) Total length of continuous time served with Local 420/ 457 legacy CL&P employees shall be known as "Teal Book Seniority."

(b) Except as modified elsewhere in this Agreement, total length of time served within a job classification shall be known as "Classification Seniority."

(c) In addition to Union seniority, an employee accrues other types of service with the Company such as credited service and service recognition as described below:

i. Credited service date is used for pension and severance calculations as well as the three year vesting period for employees on K-Vantage.

ii. Service recognition is used for vacation and sick time eligibility as well as an employee's service anniversary date.

Generally, unless there is a break in service with the Company, an employee's credited service date and service recognition date would be the same.

Definition of an Employee

The term "employee" as used in this Agreement refers only to regular employees in the bargaining unit. Regular employees are employees hired for full-time employment on continuing nontemporary work in an established job classification. During the first six months of employment each such employee will be on a probationary or trial basis. Nonregular employees are employees hired for temporary work whose term of employment will not exceed three months in any twelve month period and whose employment does not affect the advancement of or result in the layoff of a regular employee.

In the application of seniority, as defined in paragraphs (a) and (b) above, to employees having equivalent Classification Seniority, greater Teal Book Seniority shall prevail and when both Classification Seniority and Teal Book Seniority are equivalent, greater seniority shall prevail for the employee having the earlier birth date. The application of seniority as herein provided shall not be applied so as to conflict with any established seniority relationships existing prior to June 1, 1963.

New employees, other than temporary employees, shall be regarded as probationary until they have worked continuously for six months during which period they shall have no seniority status. Any employee who has been continuously employed during the employee's probationary period as defined above shall become a regular employee at the end of the probationary period and the employee's seniority shall start from the date of hiring. Employees hired on a temporary basis for special projects that require not more than twelve months to complete shall acquire no seniority status during such employment. If a temporary employee is retained as a regular employee, the employee's Teal Book Seniority shall start from the date of hiring and the employee's Classification Seniority shall start on the date the employee became a regular employee. Temporary employees must comply with Article II, Section 3. A regular employee shall lose the employee's seniority status if the employee resigns voluntarily or is discharged for just cause or is laid off for periods in excess of those specified in Section 4 of this Article. Where used in this Article the words "local" and "locality" describe designated areas of Company operations for which the immediate responsibility is directly assigned to an individual Manager or other in charge. Appendix **"**C**"** attached hereto shows a list of designated areas of Company operations which define "Local" seniority areas for application of the provisions of this Article.

Section 1. Promotion

1.(a) Employees will be given preference for training to qualify for promotion within the bargaining unit in descending order of Classification Seniority within normal sequences of promotion on a local departmental basis. Exceptions to such preference may be made only in (1) temporary situations where assigning a more senior employee would involve short notice change of a normal work schedule or unreasonably interfere with the conduct of a particular job assignment or (2) when a senior employee either has qualified previously for promotion or has demonstrated the employee's inability to do so and has been advised accordingly by the Company.

1.(b) When promoting an employee to fill a vacancy in a higher job classification within the bargaining unit, the Company will give first consideration to the qualifications of the employee having greatest Classification Seniority in the normal sequence of promotion on a

local or departmental basis. If this employee is qualified as evidenced by the employee's skill, efficiency, knowledge, ability and acceptable performance in training, the employee will be given the promotion. If the employee having greatest Classification Seniority is not qualified, the remaining employees will likewise be considered for the promotion in the order of greatest Classification Seniority on a local or departmental basis. When no employee on a local or departmental basis is qualified, Classification Seniority will be applied secondly on a district basis, thirdly on a regional basis and fourthly on a Companywide basis.

1.(c) Vacancies in the bargaining unit, other than Helper or equivalent job classifications or classifications covered by the Time- Merit Progression Program which are to be filled by promotion will be filled within two weeks from the date of the vacancy excepting in situations when the employee who is to fill a vacancy is temporarily absent from work or requires additional time to complete necessary training. If it is determined that no vacancy exists, the Company will advise the Business Manager of the Local Union concerned in writing.

1.(d) The Company will give preference to its regular bargaining unit employees over hiring new employees when making placements in job openings within the bargaining unit. Notices of available job openings, other than those to be filled by application of any other provision(s) of this Agreement, will be posted on bulletin boards throughout the Company, and a copy will be sent to the Business Manager of each Local Union. Each bulletin board posting will be for a period of not less than seven (7) calendar days during which period interested employees may apply in writing for reassignment to the posted job opening by use of a reassignment application form provided by the Company. The Business Manager, Assistant Business Manager or Steward may submit a reassignment application in the above manner on behalf of an employee who is absent during the seven-day period by reason of vacation, short-term illness or short-term excused absence. Promptly following the end of a posting period each applicant will be notified within 15 days following the end of that posting period whether or not the employee's application has been accepted, and if rejected, the reason therefore. The Company's determinations of the qualifications of employees applying for reassignment under this Section 1.(d) will be made on the same basis as for hiring new employees. In the event two or more employees with basically equal qualifications apply for one job opening, preference for placement will be determined by greater Teal Book Seniority. If reassignment is postponed following notification of acceptance, the employee's classification seniority will be adjusted upon reassignment to the starting date of the first full week following the date of the acceptance notice.

1.(e) Regular Employees who have been transferred or reassigned prior to June 1, 1979 under Sections 2.(a) or Sections 3, 3.(a) or 3.(b) or rehired under the provisions of 4.(b) of this Article will be considered as having greater Teal Book seniority within the employee's former local seniority area for purposes of Section 1.(d).

If more than one such Employee applies for the same job posting, greater Teal Book seniority will be the determining factor. Such Employee(s) will receive this consideration only if the Employee(s) notes on the job posting application that the employee is applying under this Section of Article V. Further, the Employee(s) affected will be allowed this seniority consideration only until the employee has been selected for one job opening under these provisions. An employee selected for a job posting under this Section 1.(e) will have the employee's rate established in accordance with Section 2.(d) of this Article.

Applicants who are selected for job postings to classifications covered by Time Merit Progression Programs under this Section will be considered for reinstatement rights under the provisions of Section 3.(e) or 4.(a) of this Article for a period of up to two (2) years from the date of transfer.

1.(f)(1) **Understanding Concerning Article V, Section 1.(d)** - When an employee with one year or more of satisfactory Company service is selected to fill a posted job opening **for a position that has progression steps at six month intervals**, the employee will be transferred into the new position at the second rate step. If the employee has 18 months or more of satisfactory Company service, the employee will start at the third rate step.

If additional training is required, the employee may remain at the step the employee started the employee's new position at up to one year or eighteen months whichever the case may be.

When an employee with two years or more of satisfactory Company service is selected to fill a posted job opening for a position that has progression steps at twelve month intervals, the employee will be transferred into the new position at the second rate step. If the employee has three years or more of satisfactory Company service, the employee will start at the third rate step. If an employee is within two (2) months of reaching two or three years of satisfactory Company service, the Company may consider transferring the employee into the new position at the second or third rate step. Such consideration will be made on a case by case basis. If additional training is required, the employee may remain at the step the employee started the employee's new position at up to two years or three years whichever the case may be.

If prior work experiences were directly related to the new duties, the employee may be accelerated through the pay rate steps.

1.(f)(2) Employees accepted for a job posting back to their former Local Seniority Area under Article V, Section 1(e) who have previously been transferred or reassigned under Sections 2(a), 3, 3(a) or 3(b) of Article V, will have their rates established in accordance with Article V, Section 2(d). Application of Article V, Section 2(d) under this Section 2, will be applied only to the initial job posting for which the employee was accepted back to the employee's former Local Seniority Area and also only to employees who at the time of transfer or reassignment were not offered an option to remain in their Local.

Section 2. Reassignment, Layoff and Demotion

If at any time Company operations require a reduction of the existing working forces, employees in the localities or departments affected will be subject to reassignment in the order of least Teal Book Seniority and in reverse sequence of job progression within the job classifications affected. The Company will reassign employees entitled to reassignment to job classifications for which they are qualified and in accordance with the procedure outlined below:

2.(a) An employee subject to reassignment under the provisions of Section 2. or displaced by the application of this Section 2.(a), may at the employee's option and to the extent the employee's Teal Book Seniority exceeds that of other employees,

(1) either displace the employee having least Teal Book Seniority in the same job classification within the district or region, or
(2) displace the employee having least Teal Book Seniority in the same job classification within the Company, or
(3) displace the employee having least Teal Book Seniority in a lower job classification within the employee's normal sequence of job progression within the locality, or
(4) displace the employee having least Teal Book Seniority within the locality.

If an employee subject to reassignment has insufficient Teal Book Seniority to exercise provisions (1) or (3), then the employee may

(5) displace the employee having least Teal Book Seniority in a lower job classification within the employee's normal sequence of job progression within the District, within the Region or within the Company, or
(6) displace the employee having least Teal Book Seniority firstly, within the District and secondly, within the Region.

If an employee subject to reassignment has insufficient Teal Book Seniority to exercise provisions (1), (2), (3), (4), (5) or (6), then

(7) the employee may displace one of the five employees having least Teal Book Seniority within the Company.

2.(b) An employee subject to reassignment under the provisions of Section 2. or displaced by the application of Section 2(a) of this Article who has insufficient Teal Book Seniority to entitle the employee to reassignment or in lieu of displacing another employee, may elect to be laid off with recall privileges as outlined in Section 4.(b) of this Article.

Prior to being presented with the employee's options, an employee subject to reassignment under the provisions of Section 2. or displaced by the application of Section 2.(a), of this Article may at the employee's option, after giving the Company at least one weeks' notification, elect to be laid off with recall privileges as outlined in Section 4.(b) of this Article.

2.(c) In the event an employee subject to reassignment does not have sufficient Teal Book Seniority to entitle the employee to job placement, the employee may be laid off with recall privileges as outlined in Section 4.(b) of this Article.

Any employee who has completed one or more years of continuous service and who is laid off because of the permanent elimination of one or more jobs shall be given an allowance of forty hours pay at the employee's straight-time hourly rate for each full year of continuous service with the Company. For any such employee who is fifty years or more of

age, the above-mentioned allowance will, instead of forty hours, be sixty hours if the employee has completed at least fifteen years of continuous service, or eighty hours if the employee has completed at least twenty-five years of continuous service. Any laid off employee or employee identified to be laid off, who obtains employment with any of the system companies will not be entitled to terminal pay. Any such employee who accepts terminal pay will thereby relinquish all other rights under this Agreement and will not be eligible for recall under Section 4.(b) of this Article. Any employee who accepts any position or who is offered a position similar to the position the employee held with the Company prior to the sale or lease, or in which the employee has had experience, the wages and benefits for which are reasonably comparable to those earned prior to such sale or lease, with this Company or with the purchaser or lessor, shall not be eligible for severance pay. An employee so affected who has reached the employee‘s fifty-fifth birthday may, in addition to severance pay, make arrangements for applicable annuity benefits under the then existing Annuity Plan.

2.(d) When Company operations require other than a temporary transfer or reassignment of employees under the provisions of Sections 2 of this Article to a job classification in which the employee is unskilled or inexperienced, the employee will be given training on the job and allowed a reasonable period of time to develop sufficient skill and ability to perform satisfactorily in the employee‘s new job classification.

An employee who is reassigned to a job classification with a lower hourly starting rate of pay than the employee‘s present hourly rate a special basic rate of pay will be established for the employee in the following manner:

A. For an employee with less than five years of continuous service:

(1) If the employee‘s present rate is greater than the maximum rate of the employee‘s new classification, the employee will be paid the maximum rate of the new classification.

(2) If the employee‘s present rate is less than the maximum rate of the employee‘s new classification, the employee will retain the employee‘s present rate in the new classification until the employee is qualified for advancement.

B. For an employee with five years but less than fifteen years of continuous service:

(3) If the employee’s present rate is greater than the maximum rate of the employee’s new classification, twenty-five percent of the difference between the employee’s basic rate immediately preceding reassignment and the maximum basic rate of the lower job classification to which the employee is reassigned will be added to the rate for the lower job classification.

(4) If the employee’s present rate is less than the maximum rate of the employee’s new classification, the employee will retain

the employee's present rate in the new classification until the employee is qualified for advancement.

C. For an employee with fifteen or more years of continuous service:

(5) If the employee's present rate is greater than the maximum rate of the employee's new classification, fifty percent of the difference between the employee's basic rate immediately preceding reassignment and the maximum basic rate of the lower job classification to which the employee is reassigned will be added to the rate for the lower job classification.

(6) If the employee's present rate is less than the maximum rate of the employee's new classification, the employee will retain the employee's present rate in the new classification until the employee is qualified for advancement.

Any special rate established under the terms of subsection (3) or (5) of this provision will thereafter not be subject to any rate or general wage adjustments until such time as the maximum rate for the lower job classification equals or exceeds the employee's special rate.

2.(e) If it is definitely established that a regular employee is physically incapable of performing the duties of the employee's assignment, the Company will, in accordance with its past practice, whenever possible and with due consideration given to the Teal Book Seniority of all employees affected, reassign such employee to an available job for which the employee is qualified at a rate which will result in a minimum reduction from the employee's former rate.

2.(f) If an employee is demoted or assigned to a lower job classification or hourly rate of pay (1) at the employee's own request, (2) for disciplinary reasons, (3) for incompetence or (4) because of physical inability to perform the duties of the employee's assignment, the employee's Classification Seniority for the purposes of promotion will retrogress in reverse sequence of classification progression. An employee who is demoted under item number (4), above, will retain the employee's Classification Seniority in the employee's former classification for the purpose of reinstatement as set forth in Section 4.(a) of this Article. Any employee desiring assignment to a lower job classification or hourly rate of pay for a purpose other than covered by Section 1.(d) of this Article shall make written request to the Manager concerned, with duplicate copy to the Business Manager of the Local Union having jurisdiction over the location involved. Such written request shall state that the employee understands the Classification Seniority provisions of this Agreement.

Section 3. Transfer

When it is necessary for the Company to transfer an employee from one locality, or department to another under circumstances other than those outlined in Sections 2., 3.(a) or 3.(b) of this Article, the Company shall offer the transfer to qualified employees in descending order of Classification Seniority in the job classification affected in the locality or department

from which the transfer is to be made provided first that Section 1.(b) is complied with on a local or departmental basis.

3.(a) If at any time there is an excess number of employees in a job classification which is to be retained in a locality or district and concurrently there is a vacancy in the same job classification in another locality the Company may, rather than apply Section 2 of this Article, transfer a qualified employee from the locality where there is an excess to the locality where the vacancy exists provided first that Section 1.(b) of this Article is complied with on a local or departmental basis. Under these circumstances the Company shall offer the transfer to qualified employees in descending order of Teal Book seniority in the job classification affected, from the locality where the excess number exists to the locality where the vacancy exists. If no employee accepts the transfer, the least senior of the employees affected, will be subject to provision (2) of Section 2.(a) of this Article except that when the transfer is from one region to another the employee may displace the employee having least Teal Book Seniority in the same job classification within the region where the employee is employed. Any employee displaced from the same job classification may accept transfer to where the vacancy exists or exercise provision (2) of Section 2.(a) or elect to be laid off with recall privileges as outlined in Section 4.(b) of this Article. Any employee displaced by the application of provision (2) of Section 2.(a) will, if qualified, be required either to accept the promotional transfer or to be laid off with recall privileges as outlined under Section 4.(b). If an employee displaced by this procedure is not qualified for promotional transfer the employee will be subject to provision (3) of Section 2.(a).

3.(b) If at any time Company operations require permanent elimination of a job classification or permanent reduction of the number of employees or both in a locality, under conditions not provided for under Sections 3. or 3.(a) of this Article, and requirement to fill existing or contemplated vacancies elsewhere can reasonably be coordinated with the elimination or reduction, the employees where the job elimination or reduction is to be made will be offered opportunities, consistent with their respective qualifications and seniority, either to remain in their present locality in job classifications remaining available there or to be reassigned to fill available vacancies elsewhere. Under these circumstances offers for available jobs will be made in descending order of Teal Book Seniority to (1) accept promotional transfer, or (2) remain in the present locality, or (3) accept reassignment to a different job classification and locality, or (4) in lieu of applying provisions (1), (2) or (3) of this Section 3.(b) be laid off with recall privileges as outlined under Section 4.(b) of this Article. If the application of provisions (1), (2) or (3) above would result in less favorable job placement for an employee than reassignment under Section 2.(a), then Section 2.(a) will be applicable for that employee. For the purpose of coordinating the permanent elimination of a job classification or the permanent reduction of the number of employees in a locality with requirement to fill existing or contemplated vacancies elsewhere the provisions of Sections 1.(b) and 1.(c) of this Article will not be applicable and the Company will give written notice of intent to the Business Manager of the Local Union concerned.

3.(c) If an employee is reassigned under provisions (2) or (3) of Section 3.(b) of this Article to a job classification in which the employee is unskilled or inexperienced, the employee will be given training on the job and allowed a reasonable period of time to develop sufficient skill and ability to perform satisfactorily in the employee's new job classification. When by application of provisions (2) or (3) of Section 3.(b) an employee with five or more years of Teal Book Seniority is reassigned to a job classification with a lower hourly rate of pay than the

employee's former hourly rate a special basic rate of pay will be established for the employee by application of the formula set forth in Article V, Section 12.(a) of this Agreement. Should such an employee subsequently be promoted to a job classification with a higher hourly rate of pay the employee's basic rate will be the starting rate for the higher job classification or the special basic rate as determined under Article V, Section 12.(a), whichever is higher. When an employee with less than five years of Teal Book Seniority is reassigned to a job classification with a lower hourly rate of pay by application of provisions (2) or (3) of Section 3.(b) the employee will be paid the maximum hourly rate for the lower job classification.

3.(d) In situations when the application of the seniority principles of this Article either involve groups of employees or involve two or more separate localities, plants or departments, the Company may, at its discretion, satisfy its obligation to contact affected employees by giving written notice. Such written notice shall contain information pertinent to the situation at hand and be posted on bulletin boards in the localities where the employees concerned are based. It shall remain posted for a period of not less than one calendar week before the Company takes action affecting the status of employees having direct and reasonable interest in the stated situation. A copy of any written notice under this Section 3.(d) will be forwarded to the Business Manager(s) of the Local(s) concerned and, when it appears desirable to the Company to insure adequate communication, copies may be forwarded to each employee having direct and reasonable interest in a stated situation.

3.(e) When, for reasons other than the employee's own request, an employee is transferred or reassigned under Sections 2.(a) or 2.(b) or Sections 3., 3.(a) or 3.(b) the employee will retain the employee's Classification Seniority in the employee's former location and job classification for purposes of reinstatement and promotion and, if reassigned to a lower job classification within the employee's normal sequence of progression, the employee's Classification Seniority in the lower job classification will be established in reverse sequence of normal progression. When an employee is required by the Company to transfer to another locality, or is transferred to another locality for the mutual convenience of the employee and the Company, and no change in job classification is involved, the employee's Classification Seniority in the employee's former and new locations will be accumulative.

Employees reassigned since January 1, 1978 to another classification by the application of Section 2.(a) of this Article and who are later reinstated to their former classification, will have their Classification Seniority adjusted for a period up to the employee's recall rights had the employee elected layoff to reflect continuous former Classification Seniority.

3.(f) When an employee is transferred or reassigned from one locality, plant or department to another at the employee's own request, the employee's Classification Seniority in the employee's new assignment will begin on the effective date of the transfer and the employee will forfeit the employee's Classification Seniority in all job classifications the employee has held prior to the transfer.

[1]3.(g) An employee who is transferred out of the bargaining unit and who is later transferred back into the bargaining unit will maintain continuous Teal Book Seniority for the

[1] November 22, 2004

purposes of this Article and the employee's Classification Seniority will be determined in accordance with the provisions of this Article. Effective June 1, 1975, Teal Book Seniority for purposes of layoff and transfer only will be the total length of time the employee has served in bargaining unit classifications.

Section 4. Reinstatement and Recall

4.(a) Should opportunity for reinstatement to a higher job classification occur after an employee has been transferred or reassigned to a lower job classification for reasons other than the employee's own request or after demotion because of physical inability to perform the duties of the employee's assignment in accordance with provision (4) in Section 2.(f) of this Article, the employee involved will be reinstated in the higher job classification provided the employee is then able and willing to perform its duties. If more than one employee is involved, reinstatement to the higher job classification will be offered in reverse order to the previous reassignments.

4.(b) Employees with three or more years of continuous service who are laid off will be entitled to recall for a period of three years from the date of layoff. Employees laid off with less than three years but more than six months of continuous service will be entitled to recall for a period of one year from date of layoff. Employees with recall rights will be considered as regular bargaining unit employees for purposes of Section 1(e) of this article.

A certified letter to the Employees' last known address with a copy of the job posting and a reassignment application will be considered proper notification for purposes of this section. The completed reassignment application must be returned to the Company by certified mail within (10) calendar days from the date of the Company's mailing of the posting. In the event an employee is recalled the employee must be available, able, qualified to work and return to work within two weeks.

Laid off employees who are reemployed within their recall period will maintain continuous Teal Book and Classification Seniority status during the period of layoff for the purpose of this Article and the starting rate of pay will be established according to the provisions of Section 2.(d) of this Article.

4.(c) **Vacation and Sick Leave Payment Entitlement Upon Recall from Layoff** - Employees who are recalled, for other than temporary assignments, under Section 4(b) shall not have their eligibility interrupted for purposes of vacation and sick leave payment entitlement. The application of this topic will be effective retroactive to August 1, 1975.

Section 5. Adjustment of Classification Seniority

If a qualified employee is bypassed for a promotion in normal sequence to a higher job classification because of absence due to illness at the time the promotion is made and the employee is subsequently promoted to that higher job classification, the employee's Classification Seniority will be adjusted to place the employee in the relative status the employee would have attained in the higher job classification had the employee not been bypassed. If an employee is bypassed for promotion under these circumstances, the Company will advise the Business Manager of the Local Union concerned.

5.(a) In order to prevent an employee from being bypassed in the employee's normal sequence of promotion on or after June 1, 1972 within the locality or department by (1) the lateral transferring of an employee from another seniority area; (2) an employee being accepted for a job posting at other than the starting rate; or (3) by the hiring of an employee at other than the starting rate or starting classification within the promotional sequence; an employee will retain the same Classification Seniority date the employee is assigned at the helper or starting classification within the sequence up through attaining journeyman (effective September 6, 1992, up through Troubleshooter where applicable), but not including the Lead or Chief Classifications. This will also apply to employees presently classified at the starting classification within the promotional sequence on June 1, 1972.

Employees who were classified journeyman prior to June 1, 1972 will have the number "2" immediately preceding their classification seniority date and will show primary seniority except for those employees who have been assigned the number "1" immediately preceding their classification seniority date as referred to in Section 9 (c) of this Article.

Section 6. Troubleshooter Assignments

6.(a) Vacancies in the Troubleshooter classification will be offered to the qualified lineman on a senior to junior classification seniority basis. Classified as a lineman for at least one year will be considered as qualified for promotion and upgrading to the Troubleshooter classification.

6.(b)Junior qualified Line Mechanic will be required to accept unfilled vacancies in the Troubleshooter classification.

6.(c) Troubleshooter can voluntarily elect to be reclassified to a lineman after one year in the Troubleshooter classification without loss of seniority.

6.(d) The Troubleshooter reclassified to lineman will not be required to accept promotion to a Troubleshooter for a period of one year.

6.(e) Employees classified as Troubleshooter on September 6, 1992, will be considered as having greater seniority than employees classified as lineman on that date.

6.(f) For the purpose of this Article, Section 2(a) only, Troubleshooter and Line Mechanic will be considered as the same classification.

Section 7. Employees in Military Service

The Company will reinstate without loss of Teal Book Seniority employees, other than temporary, who have been granted leaves of absence for military service in accordance with federal statutes applicable thereto. In order to effect reinstatement it may be necessary to reassign, transfer or lay off other employees.

Probationary employees, who are reinstated, shall have their Teal Book Seniority adjusted to the hiring date upon completion of their six-month probationary period. Service

immediately preceding and immediately following the leave of absence shall be credited to the six-month probationary requirement.

Section 8. Adjustment of Veteran's Seniority

8.(a) If a regular employee is bypassed for a promotion in the employee's normal sequence of job progression because of a military leave of absence and the employee is subsequently promoted to the higher job classification, the employee's Classification Seniority will be adjusted to place the employee in the relative status the employee would have attained in the higher job classification had the employee not been bypassed.

8.(b) A returning veteran will be given credit for time in service plus Company service prior to entering service to determine the employee's rate step. One year of continuous Company and military service will entitle the employee to return at the 2nd rate step and 18 months will entitle the employee to 3rd rate step. Eighteen months is the maximum credit allowed. This does not apply to any veterans returning prior to June 1, 1973.

Section 9. Seniority Lists

9.(a) The Company will prepare and post on bulletin boards seniority lists showing the employee's name, job classification, date employed, Classification Seniority date and date classified. The seniority lists will show the relative Classification Seniority of employees in each job classification on a local, district or department basis.

9.(b) Effective with the June 1, 1963 Agreement, the wage band identification letters "A", "B" or "C", which appeared under the "Rate Per Hour" column of Appendix "A" in preceding Agreements between the parties, were made a part of the respective job classifications for which they previously identified the wage bands. The respective job classifications thereby became either two or three separate job classifications.

When seniority lists were prepared under Section 9.(a) above, job classifications which included the letters "A", or "B" or "C" were established in separate groupings and the Classification Seniority dates of the employees in the separate groupings were retained as they existed immediately preceding the June 1, 1963 Agreement. In some localities this reflected earlier Classification Seniority dates for certain employees in "B" or "C" job classifications than for other employees in higher job classifications within the same normal sequences of promotion. Each employee in the former category will, if promoted in normal sequence to the first available vacancy in the higher job classification, retain the employee's Classification Seniority date for relative position in the higher job classification.

If, under the above-described conditions, a senior employee is not promoted to the first vacancy available, but is promoted to a subsequent vacancy, the Classification Seniority date for that employee will be the effective date of such promotion unless modified by Section 5. or Section 8.(a) of this Article.

9.(c) In order to maintain related classification seniority established under the former classifications Lineman "A" and "B", Electrician "A" and "B" and Splicer "A" and "B", the number "1" immediately preceding the classification date of the new classification of Lineman,

Electrician and Splicer will show primary seniority and will be assigned to employees classified Lineman "A", Electrician "A" and Splicer "A" as of May 28, 1966.

For purposes of Section 9.(b) the reclassification from Lineman "B", Electrician "B" and Splicer "B" to Lineman, Electrician and Splicer will be considered a promotion. Employees entitled to retain classification seniority under this Section will be shown in the primary group.

9.(d) Not later than August 1 of each year, the Company shall furnish the Union with an up-to-date District and departmental seniority list for the bargaining unit together with the classification and rate of pay and address of each employee on such list.

Section 10. Assignment of Job Classifications

Each employee will be assigned a job classification, the duties of which the employee is competent to perform and which generally reflects the employee's normal work. Such job classification shall not preclude assignment of the employee for limited periods on work other than that reflected by the employee's job classification in emergencies, for sickness or vacation relief, to meet the Company's service requirements, when the employee's normal work is slack or while the employee is being trained to better fit himself for advancement in grade as vacancies occur.

Section 11. Performing Duties of Higher Job Classifications

[2] [3]11.(a) An employee performing the duties of a higher job classification than the employee's own within the bargaining unit on a Shift, Automotive Equipment Mechanic (Berlin, Waterbury), (Bristol, Greenwich, Mystic, Oxford, Waterbury, Winsted), Construction Equipment Operator (Berlin Construction), Instrument Mechanic (Berlin), shall be paid the minimum rate of the higher job classification for all hours so-assigned on one day, provided the employee works one or more hours in the higher job classification on that day. Stockhandlers performing the duties of Tractor Trailer Driver shall be uprated by one rate progression step (provided such rate does not exceed the maximum rate for Tractor Trailer Driver) for all hours so-assigned on one day, provided the employee works one or more hours in the higher job classification on that day. Temporary upgrades to Chief or Lead will be at the maximum rate. This provision will not apply to an employee who is performing the duties of a higher job classification while being trained under the direction of a qualified employee. Employees who are assigned to perform the duties of a higher job classification under this provision shall not acquire Classification Seniority in the higher job classification while so-assigned.

11.(b) **Upgrading of and to Automotive Equipment Mechanic** - When assigned to perform the duties of Chief Garage Mechanic, the Automotive Equipment Mechanic **or Garage Mechanic** will be upgraded to the maximum pay rate of the Chief Garage Mechanic's job classification.

[2] June 27, 1962
[3] September 14, 1982

When upgraded to perform the duties of Automotive Equipment Mechanic, a Garage Mechanic will be upgraded to the maximum pay rate of the Automotive Equipment Mechanic's job classification.

11.(c) Provided a qualified supervisor is not present to direct the work forces in the Berlin Construction Department, the Company will assign a Chief or upgrade a journeyman to the maximum Chief rate of the employee's classification for all hours so-assigned on that day provided the assignment is for one or more hours under the following conditions:

(1) When the work crew consists of three or more bargaining-unit employees and they are assigned to perform work on a specific job assignment, as a work group;

(2) If the work content of the job assignment remains the same and the crew size is reduced from four or five to three.

Upgrading, under this section, will normally be on a classification seniority basis by job location assignment and in the classification that reflects the type of work being performed.

11.(d) When a Berlin Construction crew or crews of six or more employees per crew are assigned to perform work without a supervisor present, the Company will designate a Chief to direct the work forces and the employee will be paid one dollar and seventy five ($1.75) cents per hour in addition to the employee's s basic straight-time hourly rate, or in the absence of a Chief the Company will designate a journeyman to direct the work forces and the employee will be paid one dollar and seventy five ($1.75) cents per hour in addition to the maximum Chief rate of the employee's classification, for all hours so-assigned on that day provided the assignment is for one or more hours.

Upgrading, under this section, will normally be on a classification seniority basis by job location assignment and in the classification that reflects the type of work being performed.

11.(e) If during a Supervisor's absence from work an employee in a Chief job classification is temporarily assigned to direct work forces normally directed by a Supervisor, the employee will be paid one dollar and seventy five ($1.75) cents per hour in addition to the employee's basic straight-time hourly rate for all hours so-assigned on one day provided the assignment is for one or more hours on that day. If a classification other than Chief is assigned, the employee will be paid the maximum Chief rate in addition to one dollar and seventy five ($1.75) cents per hour for all hours so-assigned on one day provided the assignment is for one or more hours on that day. Upgrading under these sections will normally be based on classification seniority basis by job location assignment and in classifications that reflect the type of work being performed.

11.(f) When crews headed by Chiefs are combined, and in the absence of a Supervisor, a single Chief is assigned to direct the work performance of the crews the senior Chief will be upgraded to Supervisor, and the employee will be paid one dollar and seventy five ($1.75) cents per hour in addition to the employee's basic straight-time hourly rate for all hours so-assigned on one day provided the assignment is for one or more hours on that day.

Upgrading under these sections will normally be based on classification seniority basis by job location assignment and in classifications that reflect the type of work being performed.

11.(g) If during a Supervisor's absence from work a Stockhandler at the maximum rate is temporarily assigned to conduct the work normally conducted by the Supervisor, the employee will be paid one dollar and seventy five ($1.75) cents per hour in addition to the employee's basic straight-time hourly rate for all hours so-assigned on one day provided the assignment is for one or more hours on that day.

11.(h) If during an Area Stockhandler's absence from work a Stockhandler at the maximum rate is temporarily assigned to conduct the work normally conducted by the Area Stockhandler, the employee will be paid the maximum rate of the Area Stockhandler classification for all hours so assigned on one day, provided the employee works one or more hours in that classification on that day.

11.(i) Meter Readers-AMR Drivers may be temporarily assigned to perform the duties of a collector, as required. If this assignment exceeds a continuous period of one hour, then the employee is entitled for all hours so assigned on one day to be paid at the top of the rate of the collector's rate progression.

11.(j) **Crew Size - Track Machines** - When track machines (digger or bucket) are to be utilized, for work in a District or System Project area, two bargaining unit employees from Transmission (GO) will be utilized.

11.(k) **The Effects on Employees Hired as Transmission Line Mechanic Helper Classification** - All employees who are hired or post for job openings into the Transmission Line mechanic Helper classification after June 1, 1989, will be retained in that classification until the employee's completion of the Transmission Line Mechanic Time Merit Progression program.

Section 12. Retrogression; Wage Rate

If it is definitely established (1) that a regular employee is incapable of performing the duties of the employee's job classification because of an injury sustained in the employ of the Company, or (2) that a regular employee having five or more years of continuous service is incapable of performing the duties of the employee's job classification because of a disability or infirmity arising from natural causes and the employee is assigned to a lower job classification within the employee's ability to perform, a special basic rate of pay will be established for the employee as follows:

12.(a) For an employee with less than twenty years of continuous service at the time of reassignment, the special basic rate will be determined by multiplying the difference between the employee's basic rate immediately preceding reassignment and the maximum basic rate for the lower job classification to which the employee is reassigned by the product of five percent times the employee's years of continuous service and adding the amount so obtained to the maximum basic rate of the lower rated job classification. For an employee with twenty or more years of continuous service there will be no reduction in basic rate when reassigned to a lower rated job classification under this provision. Any special basic rate

established under the terms of this provision will thereafter be subject to general wage adjustments made during the term of this Agreement.

12.(b) Should such an employee later qualify for and be promoted to a higher job classification, the employee's basic rate will be the starting rate for the higher job classification or the special rate as determined above, whichever is greater.

12.(c) The above Sections 12.(a) and 12.(b) apply to employees who may be reassigned to a lower rated job classification for reasons stated in Section 12 on or after June 1, 1973.

[4] [5] [6] [7]**Section 13. Job Classification Change Notices to Union**

In order that the Union may maintain its records of bargaining unit employees the Company will periodically notify the Union of job classification changes. Such notification will provide the name, job classification and location for each bargaining unit employee hired, reclassified, transferred or separated from the Company. The information will be directed to the Business Manager of the Local Union having jurisdiction over the location involved. If an employee within the bargaining unit is discharged, the Company will notify the Business Manager of the Local Union concerned as promptly as possible.

13.(a) If an employee is retrogressed, it will be communicated in writing to the Business Manager of the Local Union having jurisdiction over the location involved.

13.(b) If a regular bargaining unit employee is suspended or discharged the local management of the Company will notify the Local Union representative on the same day of occurrence. If requested by the Union, the matter shall be discussed on that day by management representatives and the Local Union in the area concerned.

Section 14. Time-Merit Progression Programs and Job Specifications

A list of Time-Merit Progression Programs and Job Specifications that are currently in effect are included in Appendix D, TOPIC: Time-Merit Progression Programs in Effect and TOPIC: Job Specifications.

ARTICLE VI
Hours of Work, Rates of Pay and Overtime

Section 1. The minimum wage rate for each job classification shall be in accordance with a schedule entitled "Schedule of Regular Hourly Rates" appended hereto and to be signed by both parties to this Agreement.

This rate schedule shall not be construed so as to require a cut in the existing hourly wage of any employee now paid in excess of the schedule.

[4] July 1, 1969 #4
[5] July 1, 1973 #2
[6] Topic: New Hires (B)
[7] Topic: Meter Service Installers

[8]**Section 2.**

(a) For the purpose of computing overtime, the workweek shall start at 12:01 a.m. Sunday and end at 12 midnight the following Saturday.

(b) For the purpose of this Agreement, employees are composed of shift, day and scheduled workers. (1) A shift employee is defined as one who works at a seven-day operation or service, on a rotating or shift schedule. (2) A day worker is one whose basic work week is Monday through Friday, or Tuesday through Saturday between the hours of 6 a.m. and 6 p.m. for 8 hours a day or ten (10) hours; if applicable. (3) A scheduled worker is an employee, other than a shift worker or day worker, who works according to a schedule of hours at different times of the day or night and/or on different days of the week including Saturdays and Sundays.

If the Company changes or modifies working schedules in a department, plant or district of the Company, in a manner which the Union considers arbitrary or unnecessary, the new schedule shall be worked subject to adjustment through the grievance procedure up to and including arbitration.

(c) **Establishing New Schedules** - The establishing of any new schedule for scheduled employees shall be discussed with the appropriate Local Business Manager in advance of making such schedule effective.

(d) **Saturday Work** - Saturday Work requirements will be minimized. The Company will continue its efforts to reduce the number of employees who are required to work on Saturday as a part of their normal work schedules.

(e) It will be within the discretion of the supervisor to excuse an employee from overtime for good cause where such overtime is not due to an emergency, is not a special job, and does not involve work at the end of a day's shift.

[9] [10]**Section 3. Computing Overtime**

All hours worked in excess of eight or ten hours in one day of twenty-four, except for shift employees as scheduled, or forty hours in one workweek or on an employee's regularly scheduled day off shall be paid for at the overtime rate of one and one-half times the regular rate. Employees with Sunday as a regularly scheduled day off in any calendar week shall be paid double time for work on that Sunday, and at time and one-half for work on the other regularly scheduled day off in that calendar week. Employees regularly scheduled to work on Sunday in any calendar week shall receive time and one-half for work on the first regularly scheduled day off and double time for work on the second regularly scheduled day off in that calendar week. Overtime rates shall not be applied more than once to any particular hour of work, nor shall they apply to scheduled changes of shift.

Section 4. Planned Overtime

[8] Topic: J schedules- Meter Service
[9] July 1, 1966 B.2.

4.(a) Planned overtime shall be defined as overtime work for which at least seventy-two hours advance notice has been given and will be assigned among employees as equally as possible. Records of overtime hours and "on-call" hours shall be posted on the Company bulletin boards each month and a copy given to the Union. In selecting employees for assignment to planned overtime, the Company will excuse employees who do not want the assignment provided the required number of qualified employees are available. Where additional help is needed beyond the number desiring the overtime assignment, additional assignments will be made among qualified employees in inverse order of the amount of overtime worked. Non-regular employees shall not be used unless regular employees are not available. Among employees in a given classification, those who have more than six months of service will be given preference for planned overtime assignments over those who are still on a probationary basis. Except in the case of the unforeseen absence of another employee if an employee is required to work overtime on a scheduled day off, or on an observed holiday, with less than seventy-two hours' notice, the employee shall be paid travel time as defined in Section 8 of this Article VI. Records of distribution of overtime work will be made available to designated Union representatives upon their request and also posted on a weekly basis.

4.(b) Where an employee first reports for planned overtime on a scheduled day off, or on an observed holiday, the employee shall receive a minimum of four hours work or pay or, if the work exceeds four continuous hours, a minimum of eight hours work or pay at the applicable overtime rate. For each time thereafter that the employee reports for planned overtime work on that same day, the employee shall receive a minimum of three hours' work or pay at the applicable overtime rate. Employees, at the time they are notified of the assignment shall be informed as to the estimated duration of the work. When an employee is advised on less than 15 hrs notice not to report for such prearranged overtime, the employee will be paid for 2 hrs at the employee's straight time rate except that when the prearranged overtime immediately precedes or follows the employees normal schedule hours and would amount to less than 2 hrs, the employee will be paid at the employee's basic straight time rate for the actual amount of prearranged overtime. In any case where an employee is given an opportunity to work planned overtime on the employee's scheduled day off in accordance with the full minimum provided under this paragraph, but is excused at the employee's own request from working that full minimum, the employee will be paid only for actual hours worked.

Section 5. Equitable Distribution of Overtime

Insofar as practicable overtime work will be equitably distributed among suitably qualified employees who are in the job classifications in the area in which the work is to be performed. Records of distribution of overtime work will be made available to designated Union representatives upon their request and also posted on a weekly basis. Overtime lists will be furnished to the Business Manager on a monthly basis.

[11]**Section 6. Rest Time**

6.(a) Except in case of emergency or the case of unforeseen absence of other employees, employees shall not be required to work more than twelve hours in any one twenty-four hour period. If an employee is required to work beyond sixteen hours in any twenty-four hour period, the employee will be paid at double the employee's straight time rate for those

[11] July 22, 1976 #2

hours worked beyond sixteen. An employee required to work more than sixteen hours during any twenty-four hour period shall, once released, be allowed a period of eight hours off before returning to work. If this period extends into the employee's regular scheduled working hours, the employee shall lose no pay thereby. If an employee is required to work outside of the employee's normal schedule for more than one hour (more than two hours with advanced notice) during the eight-hour period immediately preceding the starting time of the employee's next normal schedule, the employee will, whenever possible be allowed rest time during that normal schedule without loss of normal wages. If an employee is called out without advance notice to work more than one hour (including travel time) during the eight hour period immediately preceding the starting time of the employee's next normal schedule, the employee will, where service requirements permit, be allowed equivalent rest time during the employee's basic scheduled hours on that day without loss of normal wages. The above does not apply to "call-outs" occurring one hour before the start of the employee's regular schedule. The rest time provided in the above two paragraphs will be scheduled by the supervisor. The rest time shall be equivalent to the sum of the time worked during the above eight-hour period. Time allowed off for meals **(meal time not taken)** will **not** be counted **as time worked** in determining "more than one hour" (more than two hours for prearranged overtime) for the purpose of this Section. When service requirements will not permit scheduling such time off, the equivalent hours will be paid for at two times the regular rate instead of straight time. Similarly, an employee called out without advance notice to work more than one hour (more than two hours with advanced notice), including travel time during the eight-hour period immediately preceding the starting time of a planned overtime assignment on the employee's scheduled day off, said employee will, when service requirements permit, be allowed equivalent rest time at straight time rates during such planned overtime assignment hours-the maximum hours so paid being either the announced minimum hours guaranteed or the average hours actually worked on the assignment by other employees of the same classification, whichever is greater. The above does not apply to "call-outs" occurring one hour before the start of the employee's regular schedule. The rest time provided for above will be scheduled by the supervisor. When service requirements will not permit scheduling such time off, the equivalent hours will be paid for at straight time rates in addition to the applicable overtime rate.

6.(b) **Payment For Rest Time Worked On A Holiday.** Employees who are eligible for rest time and are required to work through their rest time on a Company recognized holiday that they were scheduled to work, will receive double and one half times the employee's straight time rate for the actual rest time hours worked.

Section 7. Work Beyond 16 Hours

If an employee is required to work beyond sixteen consecutive hours, the employee will be paid at double the employee's straight time rate for those hours worked beyond sixteen, until the employee is allowed eight consecutive hours off. Time allowed off for meals **(meal time not taken)** will be counted in determining sixteen consecutive hours for the purpose of this Section**, but will not count towards eight consecutive hours off**.

[12]**Section 8. Call Out**

An employee is considered to be called out (1) when the employee is called in when not on duty and without advance notice, to report immediately for overtime work or, (2) when the

[12] Topic: Storm Assignment

employee is given advance notice to report for overtime work on a regularly scheduled working day when the overtime work is prior to or after and not continuous with the employee's regular scheduled working hours. Employees called in for work outside their regular working hours shall be paid time and one-half. Such pay shall be computed from the time the employee reports to work to the time of completion of the employee's work and their return to designated headquarters, to which time shall be added one-half hour for travel to work and one-half hour for travel from work. Time off shall not be considered as repayment for such work done. An employee called in for work under the terms of this paragraph will receive a minimum of two hours' pay including the above travel time at time and one-half for each time the employee is called away from their home, except that if an employee is called in for work which continues into the employee's regular working schedule, the employee shall be paid the overtime rate only for actual time worked and the half hour travel time to work. In the case of an employee who receives a call between the hours of midnight and 6 a.m., or between 8:00 a.m. and 2:00 p.m. for permanent 2nd shift garage mechanics, to report immediately, the minimum shall be three hours instead of the two hours referred to in the previous sentence, and the same conditions will apply. An employee will be considered on Company time while traveling directly to work after being called out, but paid no more than the amount specified herein.

When normal means of transportation are not available to an employee required to work overtime without advance notice, the Company will provide transportation to the employee's home.

[13] [14] [15] [16]**Section 9. On Call**

Employees may be placed on-call outside their normal schedule hours for one or more consecutive 24-hour periods, or less than 24 hour periods. Employees, except Troubleshooters, who are assigned by the Company to be on-call will be paid either 1.5 hours at basic straight-time rates or 3 hours at basic straight-time rates for each 24 hour period (or less than a 24 hour period) that they are required to be on call as follows:

(i) If the majority of the 24 hour on-call period (or less than a 24 hour assignment) is served during a weekday (Monday through Friday), employees will receive 1.5 hours at basic straight-time rates;

(ii) If the majority of the 24 hour on-call period, (or less than a 24 hour assignment) is served during a holiday, weekend (Saturday or Sunday), or the employee's scheduled day off (only for employees working a shift or special schedule), employees will receive 3 hours at basic straight-time rates. With the exception of weekend on-call periods containing Company-recognized holidays, employees will receive no more than two 3 hour payments and one 1.5 hour payment for a weekend on-call assignment (e.g., 3 p.m. Friday until 7 a.m. Monday.).

Time worked under Sections 9 and 12 will be computed from the time of receipt of each call out, and unless the time extends into the employee's scheduled work time, until return to place of receipt of the call out.

[15] November 22, 2004
[16] November 3, 2010

One on–call payment will be made for each 24-hour period regardless whether such 24-hour period extends over two calendar days. With the exception of seven day on-call weeks containing company recognized holidays, or weeks containing an employee's scheduled day off (only for employees working a shift or special schedule), employees will receive no more than five payments of 1.5 hours and two payments of 3 hours for an on-call assignment of seven consecutive 24-hour periods (e.g., 3 p.m. Tuesday until 7 a.m. Tuesday) even though such period might extend over eight calendar days.

In addition, the employee will receive pay, when appropriate, in accordance with Section 8 of this Article VI. Where employees have been placed "on-call," they shall be called before or concurrently with other employees in case of emergency work which they are qualified to do.

An employee not scheduled for "on-call" who is given advance notice to report for overtime work on a regularly scheduled working day when the overtime work is prior to or after and not continuous with the employee's regular scheduled working hours, shall be paid for being "on-call" in accordance with Section 9 of this Article.

Employees not regularly assigned to "on-call" who are required to hold themselves available so that they may be contacted within one-half hour in anticipation of an emergency or to return to work following the completion of their regular shift shall be paid in the same manner as a person assigned to "on-call" for the day on which such an assignment is made and paid under Section 9.

[17] [18]**Section 10. Excused From On Call**

Such employees shall upon request be excused only from the established annual rotational scheduled "on-call"/Shift assignment for a period of not less than twelve months provided the employee has reached 45 years of age, has greater departmental seniority than other employees who make the same request, and the granting and/or continued compliance with the request does not subject the remaining employees on the employee's particular "on-call" schedule to a normal "on-call" schedule assignment frequency greater than one out of four. Nothing contained in this Article shall restrict the Company's right to assign any employee (whether or not excused from participating in the annual on-call schedule) to be on call for unscheduled emergency situations, such as the forecast of a storm. Any employee so excused will be excluded from the provisions of Article VI, Section 5. However, the Company will attempt to equalize scheduled overtime to the extent possible without keeping dual overtime records.

For the purpose of <u>unplanned</u> overtime, the overtime list will be followed as per normal practice.

For the purposes of <u>planned</u> overtime, the administrative 2000 hours figure will be disregarded.

The Company will utilize the following process to assign personnel to unscheduled on-call:

[17] Topic: New Hires (A)
[18] October 23, 2012 & August 29, 2005

(i) The Company will ask for volunteers, including employees who have requested to be excused from on-call assignment of this Article by overtime standing in accordance with Article VI section 5.

(ii) If there is an insufficient number of volunteers to meet on call staffing needs the company will first assign employees who have not requested to be excused for on call assignment of this Article, by overtime standing in accordance with Article VI section 5.

(iii) If steps 1 and 2 above do not provide a sufficient number of volunteers or assigned personnel to meet on call staffing needs the company will assign employees who have requested to be excused from on call assignment of this Article by Classification Seniority.

(iv) The Company may, upon the conditions of the work, assign personnel who are available at the facility including employees who have requested to be excused from on call assignment of this Article to stand call until steps 1-3 can be satisfied. The Company will attempt to find replacements for the excused employees who have been assigned. If a sufficient number of volunteers and assigned personnel are available to meet on-call staffing needs, the employees who have requested to be excused from on call assignment may be excused by Classification Seniority.

Section 11. Trouble Call

11.(a) The Company and Union agree to continue their cooperative efforts to enhance customer service by improving response time during customer outages. In keeping with this mutual goal, the parties agree to the formation of an A list of employees who wish to be designated to take trouble calls.

11.(b) All employees in the following classifications will be eligible to participate in the A response list:

Chief Line Mechanic,	Chief Electrician	Chief Splicer
Lead Line Mechanic	Electrician	Splicer
Troubleshooter	Lead Electrician	Lead Splicer
Line Mechanic		

11.(c) The Company seeks 100% participation of all eligible employees, but requires 25% within each of the ten (10) participating classifications. If the required participation is not obtained on a voluntary basis, assignment to the A list will be made on a junior to senior basis. Employees not participating in the A list may elect to participate on a weekly basis.

11.(d) Overtime Rotation - A separate overtime rotation list will be maintained for A list participants. Prearranged overtime will be distributed from a combined list.

11.(e) Employees who have removed themselves from the scheduled call rotation under this Article will have 2000 hours added to their overtime hours on the overtime list.

For the purpose of unplanned overtime, the overtime list will be followed as per normal practice.

For the purposes of planned overtime, the administrative 2000 hours figure will be disregarded.

Section 12. Troubleshooters Assigned to Call

Troubleshooters who are assigned by the Company to take trouble calls outside their normal schedule hours will be so-assigned for either (1) eight hours immediately preceding, or (2) eight hours immediately following, or (3) a total not in excess of eight hours both immediately preceding and immediately following their normal schedule hours each day they work. Troubleshooters will be paid for one hour at basic straight-time rate for each eight hours they are assigned to trouble call duty except that, when assigned on a recognized holiday they will be paid for two hours at basic straight-time rate for each eight hours so-assigned. If called upon to perform work, in addition to the call-time pay they will be paid for the time worked at the rate applicable but not less than two hours for each time called out, except they will be paid not less than three hours at the applicable rate for each time called out between the hours of 12:00 midnight and 6:00 a.m.

Section 13. Assignment of Vehicles for Call

13.(a) Employees, except troubleshooters, who are assigned by the Company to take trouble calls outside their normal schedule will, whenever practical, be assigned a Company motor vehicle for all hours assigned to call, provided that there are no conflicts with local zoning regulations.

13.(b) When an employee is assigned to call as a member of a crew, one member of the crew complement will be assigned a motor vehicle under the provisions outlined above.

13.(c) This provision will also apply to troubleshooters where arrangements suitable to the Company can be made to return the vehicle to a suitable location following the call assignment. Troubleshooters who use their personally owned vehicle, while responding to trouble calls during the hours of call assignment, will be paid mileage in accordance with Article XII, Section 4.

13.(d) The Company agrees that it will give consideration to valid reasons of an employee who requests that the employee be excused from taking an assigned Company vehicle home during hours of call.

Section 14. Paging Device for Use During Call Assignments

When an employee is assigned to call, they will be provided with a paging device ("beeper"), when practicable, as an alternate means of contact during the normal call schedule. It will be the responsibility of that employee to ensure that they are within the signal range and the "beeper" is in operating order as indicated by the testing procedure or to provide other means to be contacted as is presently practiced.

[19]**Section 15. Meals And Meal Allowances**

After an employee has had one and one-half hours of overtime work which is continuous with the employee's regular scheduled working hours and which forces the employee to miss their regular meal hour (other than breakfast as provided for below), or after five hours of overtime work since being called out, and after each additional five hours of overtime work, the Company will either provide a meal for the employee or pay the employee $10.00 on account of such meal.

An allowance of $20.00 shall be made for evening meals only (4:00 p.m. to 12 midnight). The eight hour period following completion of the normal work schedule is applicable for shift workers. A meal allowance shall be given to shift employees who are required to report for work starting one hour or more before their next normal schedule starting time without having been given twelve hours advance notice.

An allowance of $10.00 shall be made for breakfast in any case where an employee is required to report for work on the day shift one hour or more before the employee's usual starting time, even though prior notice had been given of such work. Meals eaten on the job to avoid interruption of work during such overtime or emergency will be eaten on Company time. As far as operating requirements permit, each such employee shall be allowed reasonable time off to eat such meal, except for the special case of the breakfast meal provided for above. Such reasonable time off up to three-quarters of an hour shall be included in the hours of overtime work. An employee entitled to a meal and/or time off under this Section shall, if the overtime assignment continues, become entitled to additional meals and/or time off therefore at five-hour intervals. Although exact scheduling of meals will depend on requirements of the job, it is intended that an employee be allowed to eat a meal within a reasonable time after the employee becomes entitled to it under this Section. However, if the employee is not given time off but works through to complete the job, the employee will be paid three-quarters of an hour for each meal for which the employee qualified. An employee called out for one and one-half hours or more but less than five hours of actual overtime work, who thereby misses a regular meal hour, will be provided with a meal or paid for the meal at the rate of $10.00 for breakfast, lunch, and $20.00 for evening meals only (4:00 p.m. to 12 midnight), and in which case there would be a time allowance for eating. On a day when an employee is not scheduled to work, the "regular meal hour" for the purpose of this Section will include any part of the one hour period beginning at 7:00 a.m., 12:00 noon, and 5:00 p.m. For prearranged work, the meal allowances would be the same as on a regular workday. An employee on the day shift who is called to come immediately to work one hour or more in advance of the employee's regular starting time and who is not released for at least half an hour prior to starting the employee's day's work will be provided with a breakfast or paid $10.00 for purchase of same and, if the employee does not have the opportunity to provide the employee's own lunch in these circumstances, the employee will be provided with a lunch or paid $10.00 for the purchase of same.

In the event a shift employee is called back with less than eight hours' notice to work a second full shift within a twenty-four hour period or is assigned with less than four hours' notice to work a full shift on the employee's day off, the employee shall receive two meal allowances for the shift.

[19] July 15, 1971 #5

Except where the Company has scheduled an employee for a straight eight (8)-hour day**,** normal lunch periods should be observed whenever practicable and those cases where it is necessary to delay lunch periods should be kept at a minimum. When the work requirements make it necessary to postpone a lunch period for an hour or more, the practice will be to pay the employee time and one-half for the lunch period so that the employee will be considered to be on continuous duty from the start to the finish of the workday, eating when the employee can find the opportunity without any stated meal period. Employees scheduled for a straight eight (8)-hour day will not have a lunch period designated but will be expected to eat on the fly.

Section 16. Schedules of Normal Work Coverage

The Company will prepare and post on bulletin boards schedules of normal work coverage for the employees in various departments, plants and districts of the Company. The purpose of the schedules is to inform the employee of the employee's normal hours of work which shall consist of not more than ten hours per day or forty hours per week. Employees may be required to work a straight eight (8) hour schedule without a designated lunch period. The work week shall consist of four or five consecutive days except for shift or scheduled workers. All hours worked in excess of eight or ten hours per day or the basic forty hours per week, or outside of the employee's normal schedule, will be paid for at one and one-half straight-time rates except when other overtime rates, premium rates or holiday rates are applicable as herein provided.

Section 17. No Duplication of Rates

When two or more rates may be applicable, the higher rate shall be applied. There shall be no duplication in the application of regular, overtime or premium rates of pay for the same hours worked.

Section 18. Schedules of Shift Employees, Shift Premium and Sunday Premium

18.(a) The schedules of normal work coverage for employees who are assigned as shift or scheduled workers are made to meet the continuous nature of the Company's operations. **The Company and Union shall meet and discuss any permanent schedule change for shift or scheduled workers prior to implementation. During the course of discussions with the Company, the Union may seek input and poll the membership regarding any schedule change.** The job classifications of employees who normally are assigned as shift or scheduled workers are identified by the prefix "S" in the Schedule of Job Classifications and Basic Straight-Time Hourly Rates Appendix "A" of this Agreement.

18.(b) Upon request from shift or scheduled workers, the Company may, at its discretion with respect to extended hours of work and the numbers of simultaneous requests or extended periods of exchange, permit such employees to exchange their scheduled hours of normal work coverage within a work week provided the shifts are adequately covered without involving payment of overtime or upgraded rates. When such exchanges of scheduled work hours are permitted, the advance notice requirements of Section 19 of this Article shall not be applicable. No other such exchanges of scheduled hours of normal work coverage will be permitted, except for employees on a Tuesday through Saturday schedule.

18.(c) When an employee in any job classification is assigned to work on an afternoon or night schedule of normal work coverage, a premium of two dollars and fifty cents ($2.50) per hour will be added to the employee's basic straight-time rate for all hours worked within that schedule. For the purpose of this shift premium provision, afternoon and night schedules of normal work coverage are defined as those which include normal schedule hours of work preceding 6:00 a.m., or following 6:00 p.m. An employee regularly assigned to a shift schedule will receive shift adder for all paid time off.

18.(d) A premium of twenty-five percent of the basic straight-time rate per hour will be added to the basic straight-time rates for time worked on Sundays on a normal schedule by shift or scheduled workers. This Section will not be applicable to time worked at double straight-time rates under the provisions of Section 20 of this Article.

Section 19. Change In Normal Work Schedules

The work and "on-call" schedules in effect for the different departments at the time of the execution of this Agreement will be furnished to the Union by the Company.

19.(a) When possible, employees will be given not less than seventy-two hours advance notice of changes in their normal work schedules. In any case of a change of normal work schedule, the employee(s) affected must be advised of the change in advance of the starting time of the new normal work schedule for the purposes of the premium rate and rest time provisions of this Article.

19.(b) When an employee's normal work schedule is changed with less than seventy-two hours advance notice, any time worked within the new normal schedule which was not normal work time under the old schedule will be paid for at one and one-half straight-time rates until the advance-notice period has expired, except when other rates are applicable, and excepted further that when an employee's normal work schedule is changed to provide relief coverage because of sickness or other unexpected absences of employees, forty-eight hours shall be the advance-notice period for application of greater than straight-time rates. An employee may be returned to the employee's previous normal schedule without forty-eight hours advance notice after serving a relief coverage assignment as described herein.

19.(c) When operating or maintenance requirements make it necessary to change the normal work schedule of a day work employee, (other than a shift or scheduled worker), to an afternoon or night normal schedule, for other than relief assignments to normal schedules of shift or scheduled workers, the employee will be paid at one and one-half times the employee's straight-time hourly rate for all time worked on the afternoon or night normal schedule which was not normal work time on the employee's daytime schedule provided the period of assignment is for three or less consecutive workdays. When the period of assignment is more than three consecutive workdays, the change of normal work schedule will be made in accordance with 19.(b) above. This Section will not be used to change the normal work schedules of day work employees from daytime to afternoon or night normal schedules except when the work to be done is necessitated by operating or maintenance requirements which must be continued on at least a two-shift basis or when it cannot be performed during daytime normal schedule hours. A day work employee may be returned to a daytime normal work schedule without seventy-two hours advance notice.

19.(d) Whenever possible, employees will request permission for planned absence at least seventy-two hours in advance of such absence.

Section 20. Sunday or Second Scheduled Day Off

20.(a) A Shift or scheduled worker will be paid double the straight-time rate for all hours worked on Sunday outside the employee's normal schedule.

20.(b) Employees with Sunday as a normal scheduled day off in any calendar week shall be paid double time for work on that Sunday, and at time and one-half for work on the other normal scheduled day off in that calendar week. Employees required to work on a Sunday within their normal schedule in any calendar week shall receive time and one-half for work on the first normal scheduled day off and double time for work on the second normal scheduled day off in that calendar week.

ARTICLE VII
Vacations, Holidays and Leaves of Absences~~~~

[20] [21]**Section 1**. **Vacation Allowance**

a) Regular Employees will be allowed the following vacation periods annually with basic straight-time pay:

- For employees with less than one year of service and hired between January 1 and March 31 of the current calendar year will be allowed three weeks of vacation.
- For employees with less than one year of service and hired between April 1 and June 30 of the current calendar year will be allowed two weeks of vacation.
- For employees with less than one year of service and hired between July 1 and September 30 of the current calendar year will be allowed one week of vacation.
- For employees with less than one year of service and hired between October 1 and December 31 of the current calendar year will not be granted vacation for that period.

Employees who are expected to complete at least one year of continuous service by December 31 of a calendar year will be allowed three weeks' vacation in that and each succeeding calendar year until eligible for four weeks' vacation under 1.(c) below.

Employees who are expected to complete 10 years of continuous service by December 31 of a calendar year will be allowed four weeks' vacation in that and each succeeding calendar year until eligible for five weeks' vacation under 1.(d) below.

Employees who are expected to complete 20 or more years of continuous service by December 31 of a calendar year will be allowed five weeks' vacation in that and each succeeding calendar year.

[20] July 24, 1970 #1
[21] Topic: Vacations

Less than one year of service	Start date January 1 through March 31 – 15 days
	Start date April 1 through June 30 – 10 days
	Start date July 1 through September 1 – 5 days
	Start date October 1 or later – no vacation accrued.
One year but less than 10 years	15 days per year
10 years but less than 20 years	20 days per year
20 years or more	25 days per year

All vacations must be completed within the calendar year and are not cumulative. The Company must afford opportunity for the employee to take the employee's vacation within the calendar year. The period of continuous service, for vacation purposes only, is not interrupted by leave of absence or temporary layoff.

(b) An employee's vacation begins at the end of his/her last scheduled work day.

(c) The vacation allowance per week will be based on the number of hours in the scheduled workweek generally in effect throughout the Division at the time the employee takes the employee's vacation, with overtime rates applying to hours in excess of forty hours per week. For the term of this Agreement, the minimum vacation allowance per week will be forty hours' straight time pay unless some public authority orders a shorter workweek.

Section 2. **Employee Returns Before June 1**

An employee who returns before June 1 of any calendar year from leave of absence or temporary layoff of more than six months' duration shall be entitled to the employee's full vacation for that calendar year. For any such employee returning after June 1, the vacation for that calendar year will be computed at one-tenth of the amount provided under Section 1 above for each month (including the month of the employee's return) remaining in the calendar year.

[22]**Section 3**. **Choice Of Vacation**

Consistent with the Company's service obligations, vacation periods will be scheduled to meet and suit the convenience of employees. Insofar as practicable, employees will be granted preference in selecting vacation periods in descending order of Teal Book Seniority on a local, plant or departmental basis as involved. Such preference for selection will be granted in the following order: (1) for all vacation periods under 1(a) 1. above, (2) for all third week vacation periods, (3) for all fourth week vacation periods, (4) for all fifth week vacation periods, and (5) for any additional vacation days granted because of recognized holidays falling within vacation periods. Each district, department and plant will, not later than April 1st, prepare and post on appropriate bulletin boards schedules showing the time of vacation periods granted. In order that the Company will be able to prepare and post vacation schedules by April 1st, it will be necessary for employees to make their selections of vacation periods promptly. In the event an employee fails to make the employee's selection within a reasonable period of time, the

[22] Topic: Hartford/ Simsbury/ Falls Village

employee will forfeit the employee's turn until all other employees involved have made their selections. Should any employee fail to make the employee's selection(s) by March 1st, the Company, at its discretion, may schedule that employee's vacation period. Changes in any scheduled vacation period may be made with mutual consent of employees involved and the Company. When choice of vacation period has been granted, it will not be interfered with except in emergencies.

[23]**Section 4**. **Vacation**

The vacation period shall be between January 1 and December 31. Each employee shall be permitted to take a vacation between May 1 and October 31, subject to the provisions of Section 3. An employee entitled to more than two weeks of vacation shall be permitted to take a two-week vacation between May 1 and October 31 and may take the employee's entire vacation during this period or outside this period, subject to the provisions of Section 3.

Section 5. **Discontinuation Of Employment**

Any employee with more than one year of continuous service who resigns and has given the Company at least two weeks' notice, or who is discharged by the Company, shall, at the time of the termination of the employee's employment, be credited with any vacation pay which the employee has earned but not received, prorated at one-fifth of the employee's total vacation allowance for each full month of full-time, active employment completed between January 1 and June 1 of that year. Any such employee who leaves after June 1 will be entitled to the employee's full vacation or pay for that calendar year.

Any employee who retires after January 1 of any calendar year will be credited with vacation time for any portion of the employee's total vacation allowance for that calendar year which the employee has not already received. However, in the normal case, such employee will be required to schedule the employee's entire vacation prior to the employee's retirement date. An employee retiring on any February 1 who is entitled to more than four weeks of vacation will schedule such vacation during January of that year and in the latter part of December of the preceding year.

Section 6. **Emergency Recall From Vacation**

An employee who has started the employee's vacation will not be required to return to work during the period of that vacation as scheduled. Any employee who is recalled to work any hours of the employee's regular basic schedule during a week the employee is on vacation shall be paid at two times the employee's regular rate for such work and, in addition, shall receive as soon as practicable thereafter, at the employee's option, either equivalent time off with pay or pay at straight time rates for those hours worked which are within the employee's regular forty-hour basic schedule. Hours worked outside of an employee's usual eight working hours on one of the employee's basic five workdays shall be paid at double time and such hours shall be counted as hours worked for the purpose of equalizing overtime.

[24]**Section 7**. **Holidays (effective January 1, 2017), Time Off Before Christmas**

[23] November 3, 2010

New Year's Day, Martin Luther King Day, Presidents' Day, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans Day, Thanksgiving Day, and Christmas Day shall be recognized as holidays.

In addition to the 10 federal holidays above, employees will be granted two floating holidays during the calendar year based on operational requirements and supervisory approval. The two floating holidays can be used for any reason and are requested by the employee. In the event of a conflict between employees requesting the same date, seniority shall govern.

Whenever any of such holiday(s) occur upon Sunday, the Monday next following such day shall be recognized as the holiday, except that for those employees who are required to work that Sunday, as part of their normal schedule, the holiday will be observed on Sunday.

Whenever any such holiday(s) occur upon Saturday, the preceding such day shall be recognized as the holiday, except that, for those employees who are required to work that Saturday, as part of their normal schedule, the holiday will be observed on Saturday.

The Company will allow four (4) hours off at the basic straight time rate to all employees who report for work on their last scheduled work day prior to Christmas Day. If Christmas day falls on a weekend day or a Monday, the 4 hours will be allowed in a manner consistent with the rest of the company.

If it is determined by the Company that time off cannot be allowed, the employee in lieu of the time off, will receive an additional four (4) hours pay at the employee's basic straight time rate.

Section 8. **Holiday Pay**

Pay for the holidays listed in this Article will be as follows:

(a) If the holiday is observed on a day when the employee would ordinarily work and if the employee's services are not required, the employee will receive eight hours' pay and the day off.

(b) If the holiday is observed on an employee's day off or during the employee's vacation, the employee shall receive an additional day off sometime during the calendar year on a day mutually agreeable to the Company and the employee.

(c) If an employee is required to work on a holiday, the employee will receive the eight hours' pay or day off provided under (a) or (b) plus time and one-half for all hours worked within the employee's usual eight working hours and double time for all other hours actually worked or the minimum provided under Article VI, whichever is greater.

(d) The pay provided in this Section 8 shall be in lieu of all other pay for work on holidays. Hours worked on a holiday which are outside of an employee's usual eight working hours shall be counted as hours worked for purpose of equalizing overtime.

[24] July 3, 1963 4(b)

Section 9. Shift Adder For Second Shift

A permanent second shift employee, e.g., Garage Mechanic, will be paid holiday and vacation pay at the rate which includes the shift adder.

Section 10. Sick Leave

Continuation of Pay

Incumbent employees as of December 31, 2016 will keep their sick time eligibility in accordance with the following:

Continuous Service – Weeks of Full Pay

From 6 months to 5 years - Up to 6 weeks

For 5 years to 10 years – Up to 10 weeks

For 10 years and upward – Up to 1 week for each year of continuous service

In case of a disability continuing from one calendar year into the succeeding calendar year, the employee is allowed for that disability only the amount of sick leave to the employee's credit as of the beginning of the disability. An employee whose disability is carried over into the succeeding year must return to work in order to establish sick leave benefits for that year.

The Company will notify the Local Union one week prior to the expiration of an employee's sick-leave payments.

Effective September 1, 1963, the Company amended its sick-leave wage payment policy for bargaining-unit employees to suspend the waiting period of one scheduled work day without pay.

Employees hired on January 1, 2017 or after will be under the following Sick Leave Policy:

SICK LEAVE WAGE PAYMENT POLICY

- Non-occupational illness/injury disability lasting more than five days will be managed by Liberty Mutual
- A total of 10 sick days per year at 100% of pay
- In the case of illnesses that exceed five consecutive work days, qualifying employees will be eligible for short term disability
- The first **twelve** weeks of short-term disability will be paid at 100% of base pay
- Up to **thirteen** additional weeks of short-term disability will be paid at 67% of base pay
- Vacation time cannot be used in lieu of 67% pay
- Vacation time cannot be used to extend a short-term disability claim prior to transitioning to long-term disability (LTD)

All Engineering Designers, Senior Engineering Designers, Distribution Design Engineers, Senior Distribution Design Engineers, **Representative A – Mobile Meter Reading, Distribution Automation Technicians, Distribution Automation Specialists, Substation Automation**

Technicians and Substation Automation Specialists have the same sick leave wage payment benefits listed above as employees hired on or after January 1, 2017.

Section 11. Absence Due to Death in Family

11.(a) Time off without loss of pay shall be granted to employees in the event of death in the family or step-family as follows: Where the deceased was the father, mother, brother, sister, wife, child, grandparent, or grandchild of the employee, the employee shall be given time off between the death and burial up to a maximum of four calendar days and including the entire calendar day on which the funeral occurs, together with the midnight shift of the next calendar morning, so that the employee may make arrangements for the funeral and attend the services. Where the deceased was the father-in-law or the mother-in-law of the employee, the above maximum time off shall be two calendar days. In case such relative's death and burial takes place at a distant location and the employee does not attend, one day off will be allowed. In case of the death of brother-in-law, sister-in-law, aunt, or uncle, or in case of the death of any relative who is a member of the employee's household, the employee will be allowed one day off to attend the funeral. An employee seeking leave must notify the employee's supervisor of such death and request such leave, which shall be granted unless an emergency exists at the time requiring the employee's services.

Where the supervisor is satisfied that additional time off is needed by the employee to attend the funeral and to make arrangements for which the employee has responsibility, the supervisor may, at the employer's discretion, increase the maximum time allowances specified above to five or three calendar days, respectively.

11.(b) If death occurs to a member of an employee's immediate family, during the employee's scheduled vacation period, that portion of the employee's scheduled vacation from the day of death up to and including the day of the funeral will be rescheduled, but not to exceed three days. The vacation will be rescheduled at the option of the Company to another time during the calendar year. In the event vacation to be rescheduled under this section cannot be rescheduled during the current calendar year, it will be rescheduled as promptly as possible within the first three months of the following calendar year. The immediate family is defined to include the spouse, son, daughter, father, father-in-law, mother, mother-in-law, grandmother or grandfather, grandchildren, sister, brother, step-relative, or one who is considered a member of the family and living in the employee's home through a tie of obligation or friendship.

Section 12. Jury Duty Wage Payments

The Company will facilitate wage differential payments to employees on jury duty.

Section 13. Military Leave

The Company will grant a military leave of absence as required by law and provide certain benefits to an employee granted such a leave. The service record for those who are granted a military leave of absence will continue without interruption.

13.(a) **Short-Term Leave of Absence for National Guard and Active Reserve**

Any employee who is required to report for short military training periods will be granted a Short-Term Military Leave of Absence and must give a copy of the "Ordered Tour of Duty" as soon as possible to his or her supervisor so that arrangements can be made for work assignments in the employee's absence.

Upon receipt of military documentation and the Compensation for Ordered Tour of Duty form, any regular employee will be compensated for the difference between his or her base wages and military pay for a maximum of fifteen working days per Federal fiscal year (October 1 through September 30 of the next calendar year) if the military pay (taxable income on the military pay voucher) is less than the employee's base wages. Payment procedures are as follows:

An employee must complete and submit the Compensation for Ordered Tour of Duty form to the Leave Administration Department. If an employee does not submit the completed form prior to leave, the period of leave will remain unpaid until such time that the employee submits the form.

Requests for leave of absence to attend service schools or tours of duty for other than training will be considered on a case-by-case basis.

Company Benefit Plans will remain in force during short-term military leave of absence. When an employee active in the National Guard or Reserves is called for emergency duties, compensation for such a call will be considered at that time.

[25]13.(b) **Long-Term Leave of Absence for Active Duty**

Any employee who enlists, is drafted, or is called to active duty will be granted a Long-Term Military Leave of Absence in accordance with the Uniformed Services Employment and Reemployment Rights Act, 38 U.S.C. §§4301-4333. He/she must give a copy of the orders to his or her supervisor immediately. Employees on military leave for active duty may continue their health care benefits under COBRA, and for an additional six-month period subsequent to the 18-month COBRA period. Employees participating in the Retirement Plan will continue participation. Information on benefits will be provided to employees by Human Resources when HR is notified of the leave.

Upon return from military service, the employee will be reinstated, to the extent required by law, provided the employee: makes application for reinstatement within the required time following release from active duty; is still physically qualified or is able to become re-qualified with reasonable efforts; and if drafted, produces a certificate of satisfactory completion of training and service. An employee who enlisted must produce documentation of honorable discharge to qualify for reinstatement. For temporary employees, is released from military service prior to the end date of his or her temporary assignment or, for bargaining unit employees, prior to being released from the assignment.

In the event the military leave continues for greater than 91 days, the Company will provide a job of like status and pay if an employee's former job is not available.

[25] July 24, 1970 #5

Section 14. Personal Time

The Company and Union agree that NUP 13 – Personal time, will be extended to the classifications covered in this agreement. The parties also agree that the Company may change the policy / practice outlined in this NUP without negotiation. Effective January 1, 2017 personal time is eliminated.

Section 15. Leave of Absence: Union Representative

Upon written request from the Union, the Company will arrange for a leave of absence for up to four employees who are elected or appointed to the office of full-time Union representative for the Local Unions participating in this Agreement. Such arrangement will include a provision for the Local Union to pay all costs required to maintain the employee's benefits during the employee's leave of absence. The arrangement will also include provisions governing the seniority status of the full-time Union representative in such manner as may be mutually agreed upon by the Company and the Union.

ARTICLE VIII
Safety Provisions

Section 1. Policy Statement

It is agreed that the Company and the Union will work together on a continuing program of safety measures for the protection of the employees, the public, of Company property and of its service to customers.

Section 2. Employees; Judgment, Skill and Ability

In job assignments and in assignments to do specific pieces of work only such employees shall be assigned as have the necessary judgment, skill and ability, as generally reflected by their job classifications and normal assignments, to safely perform the work to be done.

Section 3. Safety Manual

The Company will issue a copy of its "Employee Safety & Health Handbook" to each employee covered by this Agreement. Any changes in the rules in the " Employee Safety & Health Handbook" shall be a matter of discussion between the Parties before becoming effective. Once the Company has made a decision on any such change in a safety regulation the grievance procedure up to and including arbitration may be initiated to determine if the Company acted reasonably in making such change.

Section 4. Company/Union Safety Meetings

Representatives of the Company and two representatives of the Union from each Division and the Local Business Managers shall meet in February and September to discuss safety. Any conclusions reached by this committee will be followed up promptly by the Safety Section and the results will be communicated to the Business Manager and Assistant Business Manager concerned within thirty days. Within five days following any meeting of this joint

committee, any Union representative may submit to the President the employee's own report on any safety matters which this representative presented for discussion at the meeting but which did not result in a committee recommendation.

The Union shall be allowed one representative on each divisional or district safety committee.

[26]**Section 5. Company/Union Safety Responsibilities**

The Union agrees to use its best efforts to see that its members employed by the Company shall read and comply with the safety regulations made by the Company, and that its members will wear and use the protective devices and apparel to be provided in accordance with the standard practice of the Company for the protection of employees from injury. The Company agrees to use its best efforts to see that persons who supervise employees read and comply with the safety regulations. The Company agrees also to use its best efforts to see that contractors engaged in work included in bargaining unit classifications observe the Company's safety regulations or equivalent. Safety is a joint responsibility of supervisors and employees. The primary function of a Supervisor is to direct work in a safe manner at all times. Supervisors will endeavor to see that employees observe necessary safety precautions to protect against exposure to danger when working aloft, on live wires, or in other situations of potential hazard and will direct operations in such a manner that safety precautions are observed. Supervisors will refrain from engaging in manual work when such engagement prevents them from giving adequate attention to their responsibilities as outlined in this Section.

Section 6. Protective Equipment Furnished by Company

6.(a) Protective equipment such as safety belts, rubber gloves with protectors and welder's equipment will be furnished by the Company. The Company will furnish coveralls or shirt and pants for painting of a nature where normal painting practices fail to prevent for all practical purposes destruction of the employee's clothing such as painting towers, gas holders or chain link fences. Employees whose duties include handling of acid or assignment to areas where acid producing conditions exist will be provided protective clothing when engaged in this type of work. Where required on the job the Company also will furnish for the use of employees, boots, raincoats, rainhats, heat-protective gloves, working gloves and other protective items which it has customarily furnished in the past. In addition, plastic raincoats will be furnished to collectors, rubbers and gloves to collectors and Meter Readers-AMR Drivers. Protective equipment furnished by the Company shall not be used by employees for purposes other than Company work. Such equipment shall normally be stored on Company property or in other locations authorized by the Company where it will be readily available for use when required. Each employee to whom the foregoing equipment is issued will be expected to exercise reasonable care in its use and to guard it against unnecessary damage or loss.

Replacement of clothing unavoidably destroyed due to abnormal working conditions.

6.(b) The Company shall provide and own all tools used by a gang or crew such as picks, shovels, crowbars, chain hoists and the like as required. The Company also shall provide and own uncommon and infrequently used equipment and tools such as those of larger size than ordinary hand tools or any special tools required for special purposes including body belts with essential accessories and climbers with straps and pads for linemen and other

[26] July 24, 1970 #2

employees as required. In addition, the Company shall provide those hand-tool items which are consumed in use such as files, bits, drills, hacksaw blades and the like.

6.(c) It shall be the responsibility of both the Company and the employees to maintain their respectively owned tools and equipment in good condition at all times and make replacements promptly when required for the safety of employees. The Company shall replace employees' personally owned hand tools if worn out or broken in normal use on the job. Worn out and broken tools replaced in accordance with this provision shall be turned over to and become the property of the Company.

[27]**Section 7. Live Line Practices**

7.(a) Work assignment of employees classified as Line Helpers

Work assignments of employees classified as Line Helpers will be made in accordance with the TMP.

7.(b) Energized primary work at two working levels or cutting in or out slack

Live-wire work involving either transferring of primary wires on poles or cutting in or out slack, or handling energized wire at two working levels shall be carried on by two Linemen or a Lineman and an eligible Line Helper **as defined in the TMP**.

The following is our understanding of operating practices to be observed under paragraph B.

1. For the purposes of this paragraph, the following definitions shall apply:

a. Straight-Line Pole

A pole in line where the energized primary wires are carried on pin-type insulators and the angle of pull is not more than 18 feet (20 degrees).

b. Corner Pole or Angle Pole

A pole located at an angle in excess of the above or where the energized primary wires are carried on disc insulators or the equivalent.

c. Junction Pole

A pole where the energized primary wires extend in three or more directions from the pole, or where the energized wires extend in two directions from the pole and are supported on crossarms attached to the pole at two different levels.

2. The transferring of energized primary wires from a point of support on one pole to a point of support on another pole and where it is necessary to work on both poles at the same time shall be carried out in accordance with the number of qualified line department personnel described in the attached Live-Wire chart. The chart will be interpreted within the following scope:

[27] July 15, 1971 #5

a. Where the required numbers are two (2) or four (4), one-half (½) of the assigned number must be Linemen or Chief Linemen or a combination of both. The remainder may include Line Helper(s) **as set forth in the TMP**.

b. Where the required number is three (3), two (2) must be Linemen or Chief Linemen or a combination of both, the remainder may be a Line Helper **as set forth in the TMP**.

3. The cutting in or cutting out of slack in energized primary wires shall be carried out by two Linemen or one Lineman and a Line Helper **as set forth in the TMP**.

4. It is understood that in the event the transferring of energized wires from one pole to another also involves the cutting in or cutting out of slack or the installation of energized primary taps, or both, the provisions of 3. of this letter shall not require Linemen in addition to those provided for in the chart.

5. The Company may assign more than the specified number of employees to carry out any of the above jobs for expediting the work or for other purposes and the Union agrees that such use of extra employees shall not be considered as establishing a precedent.

6. The installation of energized primary taps on junction poles, and elsewhere where it is current standard practice, shall be carried out by two Linemen or one Lineman and one Line Helper **as set forth in the TMP**.

7. During 1976 contract negotiations discussions of the Company proposals for modifications of the June 18, 1975 live-wire practices letter, the Company explained that it was not its intent to change its method of assigning three-person crews as a result of the redesigning of the required number of personnel with respect to the live-wire practices, as described in the Letter of Understanding and attached chart.

On limited occasions, a line crew consisting of two qualified line department personnel could be assigned to perform jobs listed as 1 through 3 under the heading Personnel Lifting Devices of the live-wire practices letter interpretation chart, where the jobs could be performed without the use of a lifting tong in conjunction with a holding stick.

However, it is recognized that some line functions, other than the assignments listed in the live-wire practices chart, are now performed by and will continue to be performed by a two-person line crew.

LIVE-WIRE CHART

The transferring of energized primary wires from a point of support on one pole to a point of support on another pole and where it is necessary to work on both poles at the same time shall be carried out by:

Type of Pole	Change in Level	Horizontal Distance Between Pole	No Arerial	Personnel Lifting	Personnel - Lifting Device &	Material Handling or Aerial

	of Primary Wires	Surfaces at Level of Primary Wire on Old Pole	Device	Device	Material Handling or Device or Aerial Derrick	Derrick
1/				2/	2/	2/
1 Straight Line	No more than 5 ft.	Not more than 18 in.	2	2	2	2
2 Straight Line	No more than 5 ft.	More than 18 in.	3	2	2	2
3 Straight Line	More than 5 ft.	Any distance	3	2	2	2
4 Corner	Not more than 5 ft.	Not more than 18 in.	3	2	2	2
5 Corner	Not more than 5 ft.	More than 18 in.	3	3	2	3
6 Corner	More than 5 ft.	Not more than 18 in.	3	3	2	3
7 Corner	More than 5 ft.	More than 18 in.	4	3	3	3
8 Junction	Not more than 5 ft.	Not more than 18 in.	3	2	2	3
9 Junction	Not more than 5 ft.	More than 18 in.	3	3	3	3
10 Junction	More than 5 ft. but not more than 6 ft.	Not more than 18 in.	3	3	3	3
11 Junction	More than 5 ft. but not more than 6 ft.	More than 18 in.	4	3	3	4
12 Junction	More than 6 ft.	Any distance	4	4	4	4

1/ As defined in Section 7. paragraph (b).
2/ Applicable when personnel lifting devices that can be controlled from the device's work position, or aerial derricks, are used and can be positioned so that both poles can be worked from the same truck position.

Section 8. Company/Union Understanding

Through a memorandum and meetings, supervision will be advised of the Company's intent and understandings with the Union with regard to the following:

A. Reasonable assignments during inclement weather, making particular mention of extremes of heat and cold. The Company agrees to instruct its supervisors to make reasonable assignments in all Departments during extreme cold. Except in the case of emergency or to restore service, employees will not be required to do overhead line work or steel substation structure work when the temperature is 10° or lower at the job site.

B. Inexperienced probationary Line Mechanics limited to simpler work in which they are fully qualified when assigned to two-person line crew and truck.

C. Importance of staying within the limitation provided in the Agreement on work done by supervisors.

D. Assistance will be provided, when requested by employees assigned to service customers, under conditions which present special problems or hazards.

E. Line Mechanics will get help, if requested, when performing switching duties aloft on primary voltage on a planned switching job on a scheduled day off when such switching presents an unsafe working condition.

F. Replacement of clothing unavoidably destroyed due to abnormal working conditions.

[28] [29]**Section 9. Inclement Weather**

9.(a) Except in emergency, no employee shall be required to do outdoor work when weather conditions might make such work unsafe.

9.(b) It will be the policy of the Company to give reasonable consideration to limiting the outside work of Meter Readers-AMR Drivers, when extreme weather conditions exist, providing the nature of the work will permit postponement.

9.(c) Meters installed on the outside of buildings or structures will not be tested in place during rainy or snowy weather unless the meterman is sheltered from rain or snow during the testing operation.

Section 10. Hazardous Tasks

No employee shall be required to perform any hazardous task, with which the employee is not familiar, without proper instruction and close supervision. When working on emergency service restoration, employees shall call the appropriate Company office or person designated by the Company to receive such calls for any assistance that may be required for compliance with safe work practices.

Section 11. Regular On Call Requirements

[28] July 1, 1966 B.5.
[29] July 15, 1971 #3

A Line Mechanic shall not be placed on the regular "on-call" schedule unless the employee shall have had at least six months of service in such classification.

Section 12. Work Assignment Disputes

Where a disputed work assignment clearly involves a violation of the safety rules and such abnormal hazard as to affect a person's life, such work shall not be completed until the dispute is resolved or a temporary solution is reached by the Company and the local Union concerned. This shall not apply to any established practices. This paragraph shall not be so construed as to excuse an employee from performing any established duties of the employee's job classification unless the employee is not familiar with them.

Section 13. Practices and Procedures for Rubber Gloving Energized Conductors above 600v up to three-phase 23kv MGY

1. All standard safety rules in effect shall be followed.

2. Practices and procedures set forth below shall be strictly adhered to.

3. Rubber Gloving energized conductors more than 600 volts up to 23kv MGY will be done by minimum two qualified person crew.

4. No work will be permitted on energized conductors from a pole position (line mechanic spurred into pole or standing on pole steps or other permanent pole attachments).

5. Class 2 (20 kV) gloves and properly tested sleeves shall be used for all pole work while rubber gloving high-voltage energized conductors up to and including the three-phase 23 kV MGY class. A ground-to-ground rubber glove rule shall be enforced for all voltages. Gloves shall be air inflated for testing in the morning and after lunch and at any other time deemed necessary.

6. Employees using bucket trucks shall follow all rules and procedures governing the use of bucket trucks. The insulation portion of the bucket truck shall be inspected and cleaned as necessary before work.

7. a. All energized or grounded parts such as secondaries, neutral conductors, guy wires, telephone wires, cables or CATV cables within reaching distance of the employee shall be covered with approved protective equipment. Company-owned wires and equipment may be floated clear of the pole when practical if work is being done on or near energized conductors. If the neutral conductor is moved, the continuity of all earth grounds including guy grounds shall be maintained.

b. All energized conductors or equipment within reaching distance shall be covered with approved protective equipment, except that portion which is actually being worked on. No handline shall be permitted near an unprotected area.

c. When work is performed on an energized primary conductor, all other conductors, neutrals, grounds, and potential grounds, including crossarms and any portion of the pole within reaching distance, shall be covered with approved protective equipment.

8. When an energized primary conductor is placed on the crossarm, bracket or against the pole, it shall first be covered with a line hose, and in addition, the crossarm, bracket or pole shall be covered with a rubber blanket or other approved insulation.

9. Work being performed on energized conductors by workers in buckets, and/or by workers working at the same pole or structure, shall be confined to only one phase of any circuit at a time.

10. Work not directly related to rubber glove procedures shall not be performed on the same pole or structure. Tools and materials shall not be handed to or from the pole to a person in a bucket while a Line Mechanic is spurred to the pole or not otherwise isolated from the ground.

11. All jumpers and rubber protective equipment, including gloves, sleeves, blankets, hoods, and line hose shall be inspected before each use and shall be turned in for testing and/or washing in accordance with a Company schedule, or sooner if there is any indication that the equipment may be defective.

12. Bucket trucks shall be tested **two times per year** and at any other time there are indications of damage or electrical leakage.

13. When wet conditions exist, hot sticks will be used or the lines will be deenergized.

Section 14. Safety Shoes

Effective January 17, 2013, the Company will provide up to $250 annual allowance to Operating Department employees towards the purchase of one or more pair(s) of safety footwear that meets the requirements for impact/compression resistance and protection from electrical hazards (EH rated) as described in ASTM F2413-05 (M 1175/C75/Mt75) EH Rated Safety (steel toe or composite) footwear. The employee must furnish a receipt of purchase for reimbursement documenting the purchase of safety shoes which meet the above safety standard and the allowance will be limited to $250 per year. Ordering safety shoes through the Company stock rooms has been discontinued.

[30] [31] [32]**Section 15. Safety Eyeglasses**

The Company will pay the full cost of lenses, frame and carrying case of clear and/or tinted prescription safety eyeglasses**,** for operating department personnel who are required to wear them for their job. Employees will be limited to two (2) pairs of safety glasses (clear and/or tinted) every two years for the term of the agreement. Employees who opt for safety glasses with Photochromatic (photogray) or progressive lenses will not receive a second pair of clear or tinted safety glasses. The Company will pay for the cost of Photochromatic (photogray) or progressive lenses. The Company will provide for the replacement of safety eyeglasses when damaged on the job. Replacement will be limited to lenses only if the lenses are damaged or obscured.

[30] July 1, 1969 #3
[31] July 18, 1975 #3 & #4
[32] August 21, 1995

The employee will provide the Company with a current (not over two years old) prescription. The Company will also provide replacement lenses if the employee's prescription changes.

When obtaining prescription safety glasses under the Company's current plan with the American Optical Company (or other company approved vendor) employees will pay any costs for eye examinations which are not covered by their chosen medical or vision plan.

The Company will reimburse the employee for all fitting fees.

Section 16. Emergency Equipment on Vehicles

Gas masks, fire extinguishers and first-aid kits will be standard equipment on all trucks where conditions require.

Section 17. Rubber Protective Equipment

Protective rubber gloves and similar equipment are to be maintained in a safe working condition or replaced as frequently as required or when so-requested by employees.

Section 18. Bucket Trucks for Call Person

It is not intended to be normal practice to assign articulating boom bucket trucks for use by employees on-call when working alone at night.

Extendible (telescopic or similar equipment) boom bucket trucks may be assigned to employees on-call when working alone at night.

Section 19. Testing Articulating Boom Bucket Trucks

Two bargaining unit employees will be utilized when testing articulating boom bucket trucks.

Section 20. Assignment for Patrolling Rights of Way

When necessary to patrol lines on foot through rights-of-way at night or during severe weather conditions, employees will be assigned in pairs.

Section 21. Personnel Assignment for Pole-Mounted Transformers

It shall be standard practice to assign suitably qualified bargaining-unit line personnel as follows to install or remove a pole-mounted distribution transformer.

21.(a) During the hours of darkness, three qualified bargaining unit Line personnel may be utilized when high intensity lighting and when material handling bucket trucks of the type that enables the operator to be in the work area or line derrick trucks suitably rated for the load being handled are provided. Additional Line personnel will be made available when the type of equipment indicated in this Section is not available or when required or requested by the person in charge in order to perform the work safely.

21.(b) Employees assigned shall be suitably qualified bargaining unit Line department personnel. However, under emergency conditions, when the required number of Line department personnel cannot be located or are otherwise unavailable to perform the work, other employees, including wage hour or supervisory, may be assigned to assist available Line department personnel.

Section 22. Personal Security

To enhance personal safety, employees will avoid entering a high-risk area to perform their assigned duties if it appears that their personal safety, or the safety of their personal or company property, may be endangered. Personnel should report such conditions immediately to their supervisor.

District management will request local law enforcement agencies to accompany employees performing an assignment in a high-risk area when the employee has identified the area as imminently dangerous.

Section 23. Fire Retardant Clothing (Effective January 1, 2013)

Increase F.R. allowance to $**1,300.00** for a new hire in the first year and $650.00 per year thereafter and for all other incumbents.

ARTICLE IX
General Provisions

Section 1. Bulletin Board for Union Use

1.(a) The Company will furnish suitably identified bulletin boards for use by the Union in such numbers and locations as mutually agreed upon. The purpose of these bulletin boards will be for the posting of notices pertaining to the Union and its members. All Union notices must be signed by an official of the Union and such notices shall contain nothing political, controversial or reflecting upon the Company, Union or any employees. Either the Union or the Company may remove from these bulletin boards any notices posted thereon which do not comply with this Section 1.(a).

1.(b) If a general notice to employees or the public is issued pertaining to a change made in this Agreement it shall be signed jointly by representatives of the Company and the Union.

1.(c) When information pertaining to Company-Union business is to be disseminated to the employees, announcement shall be posted on the official bulletin boards in the department or departments affected, and duplicates submitted to the Business Manager and Assistant Business Manager.

[33] [34]**Section 2. Supervisors Performing Work**

[33] July 3, 1963 #4(C)
[34] July 24, 1970 #3

(a) Supervisors shall not act in other than a supervisory capacity while they are actively supervising three or more men working on the same shift with them. They shall in no case act in other than a supervisory capacity for more than twenty percent of the time.

(b) A supervisor is not relieved from the employee's responsibility to protect life and property, nor from giving occasional or emergency assistance.

(c) A supervisor called out in an emergency shall not perform regular work other than shall be immediately required to protect life and property. If any additional regular work is required, the foreman or supervisor shall call out bargaining unit personnel to perform the required work.

Section 3. Contract Work

(a) The Company agrees that it will not have work done by contract which is usually done by employees where such contracts will be accompanied by a layoff or reduction of hours in the working schedule or where men capable of doing the work are on layoff, have recall rights, and are readily available. Where contractors employing I.B.E.W. members are readily available and qualified to perform such work, they will be given any contract involving live wire work, to the extent permitted by law, and, all things being equal, will be given preference for other work usually done by employees, to the extent permitted by law.

(b) **When Contracting Out is Not Allowed**

Work regularly performed by employees covered by this Agreement will not be contracted out if it would result in loss of continuity of employment or opportunities for permanent promotions to job classifications covered by this Agreement.

[35](c) **Use of Contractors – District and Division Managers will advise Union of use of Contractors upon request**

Upon requests made at reasonable intervals by Local Union Business Managers to the Company's Division or District Managers, the Company will advise the Union of tree trimming, major plant maintenance, substation construction and electric line construction contractors working on the Company's facilities and the estimated duration of such work.

Section 4. Definition Of Emergency

An emergency, as referred to in this Agreement, is any unforeseen circumstance which involves the safety of any person, loss of or damage to any property, or interruption of or interference with service or operation.

Section 5. Wages While Negotiating

During negotiations for the amendment or replacement of this Agreement, the Company will pay basic straight-time wages to not more than twenty-four employee representatives of the Union for time lost from their normal work schedules while attending meetings with Company representatives. If any of these Union representatives is a shift or scheduled worker and the employee's schedule of normal work coverage includes shifts directly preceding and directly following the time during which a negotiation meeting with the Company takes place, the

[35] July 1, 1960 #2

employee will be allowed time off with basic straight-time wages from either the shift directly preceding or the shift directly following, but not both, provided that the period of time elapsing between the end of the shift directly preceding and the beginning of the shift directly following does not exceed sixteen hours.

[36]**Section 6. Work Outside of Company Area**

It is recognized that the Company may occasionally assign employees covered by this Agreement to work in locations and upon facilities other than those owned or operated by the Company. On such occasions the employees involved, the Union and the Company shall be bound by the provisions of this Agreement except that when emergency assistance to other utility companies is involved, Section 2 of Article XII shall not be applicable. All hours for travel time or work time paid at a straight- time rate under the terms of this Agreement will be paid at double straight-time rates, when employees are assigned to work in locations or upon facilities other than those owned or operated by Eversource Energy.

Section 7. Relative Policy

It is understood and agreed that notwithstanding the provisions of the collective bargaining agreement between the parties, relatives of employees will not be hired, transferred or promoted into situations where the possibility of favoritism or conflicts of interest might exist. These restrictions also apply to a relative who is working on Company property through a contractor or vendor agency. A relative of an employee will not be hired, transferred or promoted into the same department unless the employee reports to a different supervisor. Additionally, a relative of an employee will not be hired, transferred or promoted into a position in which the relative would be in the employee's direct chain of command (no matter how far removed geographically).

Relatives (including Step-relatives) are defined as:

Father	Wife	Uncle
Mother	Father-in-Law	Aunt
Son	Mother-in-Law	Nephew
Daughter	Son-in-Law	Niece
Brother	Daughter-in-Law	Grandfather
Sister	Brother-in-Law	Grandmother
Husband	Sister-in-Law	Grandchild

If any liability is incurred as a result of discrimination charges that directly result from this Relative Policy, the Company will assume said liability.

ARTICLE X
Strikes and Lockouts

[36] Topic: Storm Assignment

Section 1. The Company agrees that there shall be no lockout and the Union agrees that there shall be no strike or stoppage of work during the period of this Contract. The Company agrees that no action will be taken against the Union as an organization, or its officers while acting as such, for any damage which may be sustained as a result of any strike or stoppage of work not countenanced or authorized by the Union.

ARTICLE XI
Employee Benefits

Section 1.

1.(a) The Company agrees to continue in effect for the period of this Agreement the benefits and eligibility requirements which apply to employees and their dependents where applicable under its current Group Life Insurance Plan, and Health Insurance Plan and the current Northeast Utilities Retirement Plan as amended. January 1, 2008, for employees hired prior to January 1, 2010, and to offer the K-Vantage Benefit to employees hired after December 31, 2009. K-Vantage will also be available to employees hired prior to January 1, 2010, who choose K-Vantage before January 1, 2010 in lieu of additional service and earnings credits under the Northeast Utilities Service Company Retirement Plan. Employees originally hired into NU System Companies other than NStar who transfer into the union after January 1, 2010 will retain the same retirement benefit plan elections (under the NUSCO Retirement Plan or K-Vantage) they have immediately prior to the transfer, and will not be given an opportunity to make a new election for either plan. Employees transferred into the union from NStar will be treated as new hires as of their transfer date and will participate in K-Vantage. Previous vesting service from NStar will be recognized for vesting of K-Vantage benefits.

1.(b) Should the Company make any major changes which affect privileges or benefits to employees under any major policy, plan, or program not specifically covered by this Agreement but affecting employees hereunder, the Company shall, if it recognizes such change as significant, notify the Union in writing of such proposed change and the effective date thereof and the Union may, if it so desires, request in writing at any time within thirty days after notice of such change, that a meeting be arranged to discuss the effect of such change on employees and the Company will promptly arrange such a meeting. If notice of such change has not been given, the Company will arrange a meeting for discussing it promptly on request of the Union.

1.(c) It is understood and agreed by the Union and the Company that continuation of benefits provided under the Plans shall, of necessity, be contingent upon the rules and regulations applicable thereto and that the Company and its Plan Carriers will have authority to administer the Plans in accordance with such rules and regulations. Any change in a policy or practice covered by this Section which is not specifically mentioned in this Agreement or any question concerning the Company's application of such policies and practices of the Pension Plan, Group Life Insurance Plan or Health Insurance Plan shall not be subject to grievance procedure or arbitration.

Section 2. Company-Sustained Injury; Total Incapacity

If during the term of this Agreement a regular employee sustains an injury on a Company job which results in total incapacity and which prevents the employee from doing any work and which is compensable under the Worker’s Compensation laws of the State of Connecticut, the employee shall be paid the differential between the employee's normal basic after-tax wages and Worker's Compensation benefits for the period of total incapacity not in excess of one year from the date of the injury. If it is established that the injury is caused by the

negligence of a third party and that third party makes settlement with the injured employee, the Company shall be reimbursed for all wage payments made to the injured employee to the extent that such settlement covers the Company's payments made under the terms of this provision.

Section 3. Employee Benefits – Increase Accidental Death Benefits

3.(a) **Notification to Union** - It is the Company's intention to continue its past practices with respect to employee benefits. Should the Company contemplate any diminution of employee benefits affecting bargaining-unit employees, the matter will be discussed with the Union in advance of the change.

3.(b) **Accidental Death Provision** - In the event any bargaining-unit employee dies as a result of a job-connected injury and benefit is payable under the accidental death provisions of Group Policy No. GC-323337, the Company will provide an additional benefit equal to the amount payable under such accidental death provisions. These benefits are in addition to life insurance coverage provided under Group Policy No. GL-323337.

Section 4. Dutch Point Credit Union

The Company will provide payroll deduction for employees desiring membership in the Dutch Point Credit Union**.**

ARTICLE XII
Expense Allowance

Section 1. Travel Time and Transportation

When required to work distant from their base area, employees will be paid expense and travel allowances as follows:

1.(a) When the Company supplies transportation between the base and work, employees will be allowed travel time at the rate applicable and equal to the time spent en route.

1.(b) When requested to travel by means of specific public transportation, employees will receive the actual fare paid and will be allowed travel time at the rate applicable and equal to the time spent en route.

Section 2. Expense Plans Outside Base Area

Except when Section 1. or Section 3. of this Article is applicable, an employee required to make the employee’s own arrangements to report at a job location including all training assignments outside the employee’s base area (except satellite/line shops or when the job location distance one way is ten (10) miles or less) will be paid a daily expense allowance as provided under one of the following Plans:

Plan A - If the distance one way is twenty-five miles or less; $28.32 per day.

Plan B - If the distance one way is over twenty-five miles but not over forty miles; $50.18 per day.
Plan C - If the distance one way is over forty miles but not over sixty miles; $57.39 per day.
Plan D - If the distance one way is over sixty miles but not over ninety miles; $64.82 per day. When the distance is beyond ninety miles, the employee will be paid mileage at the current NU mileage rate per mile for each mile beyond ninety miles.

2.(a) If on any day an employee travels one way to or returns one way from a job location under the provisions of Section 1. of this Article, the employee will be paid an expense allowance on that day under one of the following Plans:

Plan E - If the distance one way is thirty miles or less, $24.34 per day.
Plan F - If the distance one way is over thirty miles; $33.41 per day.

2.(b) For the purposes of the above Plans, distances shall be measured over highways which are reasonably passable and which provide the shortest routes between the employee's base area headquarters and the job locations involved.

2.(c) If an employee is required to report at two or more job locations outside of the employee's base area on one day the employee will be paid the daily expense allowance provided under the Plan applicable to the job location which is the greatest distance from the employee's base area headquarters. In addition, the employee will be paid mileage at the current Eversource mileage rate per mile one way for the actual distance traveled between the job locations involved on that day. This Section 2.(c) will not be applied to require an employee to report at two or more job locations on one day involving Plans B, C, D, or F except when it is necessary to do so to provide a full day's work or when emergency work is required. Whenever possible, employees will be advised not later than the day preceding requirement to report at a different job location.

2.(d) As part of the 2009 contract negotiations, the company and union agreed that the mileage reimbursement rate for the CL&P Blue Book and Green Book union agreements will be paid at the current Company mileage rate (i.e., the same rate as non-union employees). This rate will be paid to employees who are authorized to use their personal vehicles while on company time, unless the mileage is otherwise addressed as part of the established contractual expense plans.

It is understood by all parties that the company may change the mileage rate at its sole discretion without notice to, or negotiation with, the union. Changes or modifications to the rate will also not be subject to the grievance and arbitration procedure.

2.(e) If an employee is required to make his or her own arrangements to report to a job location, including all training assignments, outside of the employee's base area on any day and the employee is subject to any tolls using section 2.(b), the Company will reimburse the cost of such tolls to the employee.

Section 3. Berlin Construction, Work in Central Division

An employee of the Berlin Construction Department assigned to Waterbury who is required to report for work on the job within the towns of Middlebury, Naugatuck, Prospect, Thomaston, Watertown, Wolcott, or Waterbury will be paid mileage at the current Eversource mileage rate per mile to and from the job in lieu of the provisions of Section 2 of this Article.

An employee of the Berlin Construction Department assigned to Newington who is required to report for work on the job within the towns of Berlin, Farmington, Hartford, New Britain, Rocky Hill, West Hartford, Wethersfield, or Newington will be paid mileage at the current Eversource mileage rate per mile to and from the job in lieu of the provisions of Section 2 of this Article.

[37]Section 4. Mileage Allowance for Personal Vehicle

An employee authorized to make occasional use of the employee's personally owned vehicle for Company business during working hours and for which the employee is not being paid a travel expense allowance under other provisions of this Article will be paid for such use at the current Eversource mileage rate per mile. Employees will be paid a daily mileage allowance of at the current Eversource mileage rate per mile to and from the job in lieu of the provisions of Section 2 of this Article if the distance one way to the job location is ten miles or less from the home base or satellite.

Section 5. Company Furnished Meals or Lodgings

During times of emergency when employees cannot be released long enough to make arrangements for their meals or lodgings, the Company at its expense will make suitable arrangements for same. Under such conditions the provisions of Section 5. of this Article shall not apply. For the purpose of this Section meals will be furnished at five-hour intervals unless a majority of the employees concerned in a work group agree to extend the five-hour interval. (See Article VI, Section 15 concerning time off for meals furnished under this Section 5).

Section 6. Transfer Expense Allowance

6.(a) When at the Company's request an employee is reassigned or transferred under the provisions of Article V and a change of residence is required, the employee will be reimbursed for mileage between the employee's former reporting base and the new reporting base and will be paid mileage at the current Eversource mileage rate per mile.

The following conditions apply to above temporary expense allowance:

(1) The expense allowance will be applied for each day the employee provides the employee's own transportation to travel to and/or from the employee's new reporting base.

(2) The amount of expense allowance will be based upon the actual distance in miles between the former and new reporting bases as measured over streets and highways that are reasonably passable and provide the most direct route.

[37] Letter- mileage

6.(b) In lieu of the expense allowance outlined in Section 6.(a) the Company may either provide the employee with transportation or require the employee to live in the employee's new base area and make arrangements for the employee's meals and lodgings at Company expense.

6.(c) Payment of the expense allowance or provision of transportation or meals and lodging under this Section 6 will be limited to the first thirteen weeks from the effective date of assignment at the new reporting base or until the effective date of the employee's change of residence, whichever occurs earlier.

Section 7. Review of Expense Allowances

When in the judgment of the Company the expense allowances provided in this Article are insufficient to cover reasonable expenses it may, upon review of any particular case, make an additional allowance to cover expenses actually incurred. When an employee is assigned to work in another District, arrangements will be made either directly with the employee or through the employee's supervisor to meet the employee's reasonable expenses and the Business Manager and/or Assistant Business Manager will be advised.

Section 8. Change in Current Practices or Privilege

If, during the term of this Agreement, the Company contemplates changing a current practice or privilege, not specifically covered in this Agreement, which, if changed, would result in a significant increase in employees' personal expenses, the Business Manager or an Assistant Business Manager of the Local Union concerned will be advised in advance of the change as soon as practicable. Upon request of either party, Union and Company representatives will meet for discussion of such change.

[38]**Section 9. Tool Allowance**

The Company will provide an annual tool upgrade allowance of up to **$400.00** per year for Garage Mechanics. The employee must furnish a receipt of purchase for reimbursement documenting the purchase of job specific tools.

Any new or replacement tools required by the Company for performance of any job will be furnished by the Company except that the employee will be responsible for any tools lost or damaged through the employee's own negligence.

Effective June 1, 1986 new hires and transferees to the Garage Mechanic Classification shall provide and own all ordinary hand tools commonly required in the employee's regular assignment. The Company shall replace employees' personally owned hand tools if worn out or broken in normal use on the job. Worn out and broken tools replaced in accordance with this provision shall be turned over to and become the property of the Company.

If an employee's tools are stolen, they will be replaced by the Company, if, in the Company's opinion a valid and justifiable claim exists.

[39]**Section 10. Commercial Driver's License**

[38] Topic: Replacement of employee's tools when stolen
[39] Topic: Commercial Driver's License

The Company will pay applicable costs associated with obtaining a Commercial Driver's License required by the duties performed of the classification.

Applicable costs Include:

(a) endorsements
(b) various test fees
(c) issuance of permit

In addition, the Company will pay the cost difference between the employee's license fee and the license fee of the job-required CDL.

Section 11. Storm Assignment Or Other Emergency Situation

If an employee is assigned to an out of district storm assignment or other emergency situation that may require an overnight stay, and the assignment is made during the employee's regular work hours, the Company will provide ½ hour early dismissal, without loss of wages. In the event that the employee was not provided ½ hour early dismissal, the Company will provide a one-time $25.00 payment to the employee for that overnight storm or emergency event.

ARTICLE XIII
Compliance With Law

No provision in this Agreement shall be deemed to require the Company or the Union to disregard existing or future laws affecting the relations of the Company, the Union and employees. All provisions of this Agreement are subject to all applicable laws now or hereafter in effect and to the lawful regulations, rulings and orders of regulatory bodies having jurisdiction. If any such laws, regulations, rulings or orders shall conflict with any provision of this Agreement, the Company and the Union shall confer to negotiate a lawful modification. The lawful invalidating of any provision shall not affect the remaining provisions of this Agreement and it shall not constitute a grievance for the purposes of Article IV.

ARTICLE XIV
Letters of Understanding

Incorporated herein and made a part hereof by reference are confirming letters of understanding from the Company to the Union which pertain to:

1. **System Projects** – System Projects which is dated March 16, 1998. This letter can be found in Appendix D.

ARTICLE XV
Duration

This Agreement constitutes the entire Agreement of the parties except such amendments or supplementary Agreements as are reduced to writing and signed by the parties hereto.

This Agreement supersedes all previous agreements and shall continue in force from the first day of June 1, **2019** until June 1, **2022** and thereafter for periods of one year unless canceled by advance notice in writing by either party to the other, the advance notice to be given at any time during a thirty-day period, the beginning of which period is ninety days prior to June 1, **2022** or June 1st of any year thereafter.

If either party desires to amend this Agreement on June 1, **2022** anniversary date or on June 1st of any year thereafter, a list of all proposed changes shall be submitted to the other party in writing prior to March 1st of the year involved. The party receiving the proposed changes shall have until March 10th to submit additional proposed changes to the other party. The Company and the Union agree to meet promptly thereafter in the period between the 90th and 61st day prior to the anniversary date of the Agreement to discuss the proposed changes and endeavor to reach an understanding on them. If all proposed changes are not thus disposed of in a mutually satisfactory manner, (1) the proposed changes remaining in dispute may, by mutual agreement, be submitted to arbitration or (2) either party prior to May 1st of that year may serve notice of cancellation of the Agreement if such action is deemed desirable. If all proposed changes are disposed of in a mutually satisfactory manner, the amendments mutually agreed upon shall take effect on the following June 1st, unless the parties agree upon a different effective date.

If notice is given as provided for above it shall be by registered mail addressed to, respectively:

Director-Labor Relations
The Connecticut Light and Power Company
P.O. Box 270, Hartford, Connecticut 06141-0270

or

Recording Secretary
Local Union No. 420
550 Wolcott Street
Waterbury, Connecticut 06705

and

Recording Secretary
Local Union No. 457
2590 Berlin Turnpike, Suite 1
Berlin, Connecticut 06037

This Agreement shall become effective when signed by the authorized representatives of the parties.

In witness whereof we have attached our hand and seal.

FOR THE UNION:

Joseph A Malcarne Date 2/27/2020
Joseph A. Malcarne
Business Manager, Local 420

Scott R. McCoy Date 2/27/2020
Scott McCoy
Business Manager, Local 457

s Shift or scheduled workers

* Rate bands designated with "*" provide minimum rates which are probationary for one year and maximum rates which are paid after the probationary period to qualified workers who regularly perform the grade of work specified for the rate band.

x Rate bands designated with "x" provide minimum rates which are probationary for six months and maximum rates which are paid after the probationary period to qualified workers who regularly perform the grade of work specified for the rate band.

y Rate bands designed with “y” provide for increases at approximately six- month intervals to employees who make satisfactory progress.

z Rate bands designated with "z" provide minimum and maximum rates and intermediate rates which will be based upon an employee's relative skill, efficiency and ability to perform the work assigned. After one year of satisfactory performance of the grade of work required for the job classification, employees will be paid the maximum rate of the band applicable to the job classification.

† Rate bands designated by "†" cover the range starting with the new employee or beginner and finishing with an experienced and fully qualified worker or helper in the respective job classifications. Increases within these bands are made at approximately six-month intervals to employees who make satisfactory progress. The hourly rate step increases applicable to the job classifications are as follows:

1(a) When an employee in any job classification is assigned to work on a shift which includes one hour or more between the hours of 6:00 p.m. and 6:00 a.m. of the following day, will receive an additional payment of $2.50 per hour.

1(b) When an employee in any job classification is assigned to work on a shift which includes one hour or more on a Sunday, the employee will receive a premium of 25 percent of the employee's basic straight time rate in addition to the employee's basic straight time rate.

R **Shift differential of $2.50 per hour will be paid for the whole shift if working one or more hours before 6:00 a.m. as part of the regular shift for Stockhandlers in the Districts. (Between 4:00 a.m. and 6:00 p.m.)**

APPENDIX "A" -

AGREEMENT OF JUNE 1, 2019

Schedule of Job Classifications and Basic Straight-Time Hourly Rates

s Shift or scheduled workers

* Rate bands designated with "*" provide minimum rates which are probationary for one year and maximum rates which are paid after the probationary period to qualified workers who regularly perform the grade of work specified for the rate band.

x Rate bands designated with "x" provide minimum rates which are probationary for six months and maximum rates which are paid after the probationary period to qualified workers who regularly perform the grade of work specified for the rate band.

y Rate bands designed with “y” provide for increases at approximately six- month intervals to employees who make satisfactory progress.

z Rate bands designated with "z" provide minimum and maximum rates and intermediate rates which will be based upon an employee's relative skill, efficiency and ability to perform the work assigned. After one year of satisfactory performance of the grade of work required for the job classification, employees will be paid the maximum rate of the band applicable to the job classification.

† Rate bands designated by "†" cover the range starting with the new employee or beginner and finishing with an experienced and fully qualified worker or helper in the respective job classifications. Increases within these bands are made at approximately six-month intervals to employees who make satisfactory progress. The hourly rate step increases applicable to the job classifications are as follows:

1(a) When an employee in any job classification is assigned to work on a shift which includes one hour or more between the hours of 6:00 p.m. and 6:00 a.m. of the following day, will receive an additional payment of $2.50 per hour.

1(b) When an employee in any job classification is assigned to work on a shift which includes one hour or more on a Sunday, the employee will receive a premium of 25 percent of the employee's basic straight time rate in addition to the employee's basic straight time rate.

R **Shift differential of $2.50 per hour will be paid for the whole shift if working one or more hours before 6:00 a.m. as part of the regular shift for Stockhandlers in the Districts. (Between 4:00 a.m. and 6:00 p.m.)**

APPENDIX "A" -

AGREEMENT OF JUNE 1, 2019

Schedule of Job Classifications and Basic Straight-Time Hourly Rates

Effective June 1, 2021

	Job Classification	Location		Rate Per Hour Min.	Max.
	Area Stockhandler	As Assigned	*	$44.70	$45.61
S	Automotive Body Mechanic	Berlin	z	$47.21	$49.65
S	Automotive Equip. Mechanic	Berlin	+	$47.21	$49.65
	Building Maintenance Worker	As Assigned	+	$28.07	$45.98

A DUES			

ATTENTION: DIRECTOR - LABOR RELATIONS

I hereby authorize The Connecticut Light & Power Company to make a single initiation fee deduction and in addition to deduct from my wages each month union membership dues in Local 420 and Local 457 of the International Brotherhood of Electrical Workers in such sums as from time to time the secretary/treasurer of Local 420 and Local 457 of the International Brotherhood of Electrical Workers may certify. Initiation fees and dues covered by this authorization are not deductible as charitable contributions for federal income tax purpose.

I further direct the Company to remit the amount deducted to the Union Officer designated by the Union to receive such payments.

This authorization shall be effective for the duration of any written agreement or extension thereof between The Connecticut Light & Power Company and Local Union Nos. 420 and 457 of the International Brotherhood of Electrical Workers, et al unless canceled in writing by me.

PROVISIONS PERTAINING EXCLUSIVELY TO TEST/TECH EMPLOYEES (FORMERLY TECHNICAL CONTRACT)

WAGES

1.(a) Appendix "A" attached hereto and made a part hereof lists the job classifications covered by this agreement for non-exempt individuals. Appendix "A" shows the basic straight-time hourly rates of pay applicable to each job classification effective as of **June 1, 2019, June 1, 2020 and June 1, 2021,** for employees who are employed in the listed job classifications on the date this Agreement is signed by authorized representatives.

1.(b) Effective **June 1, 2019, June 1, 2020 and June 1, 2021,** each exempt individual's current salary will be adjusted based on their latest performance rating as follows:

Performance Rating	**Percent Ranges**
Top Achiever	0% - 8%
High Contributor	0% - 6%
Successful Contributor or Developing	0% - 6%
Improvement Needed to be a Successful Contributor	0%
Did Not Meet Performance Expectations	0%

When to pay lump sum:

Performance	**Relationship to Band Max**
Top Achiever	100% or greater
High Contributor	97.5% or greater
Successful Contributor or Developing	95% or greater
Improvement Needed to be a Successful Contributor	No lump sum or pay increase
Did Not Meet Performance Expectations	No lump sum or pay increase

1.(c) The Company will determine an individual's salary adjustment amount based on the pay increase percent ranges of Section 1.(a) and 1.(b).

2. All employees will be reviewed annually on the effective date of wages as to their progress within the rate range of the job based on their most recent performance review.

3. The Company's determination on such reviews shall not be subject to grievance or arbitration.

4. The job classifications within the respective wage rates shall be as provided in Appendix "B".

OVERTIME – FOR TEST ONLY

a. Insofar as practicable overtime work will be equitably distributed among suitably qualified employees who are in the job classifications in the area in which the work is to be performed. Overtime distribution for Lead Test Advisor assigned to a project is described in section 11.b. below. Records of distribution of overtime work will be made available to designated Union representatives upon their request and also posted on a weekly basis. Overtime lists will be furnished to the Business Manager on a monthly basis.

b. Lead Test Advisor Project Overtime Distribution

1. Insofar as necessary for a project where periods of extended overtime is involved; job classifications in the area in which the work is to be performed and the overtime list will be used in the selection of the lead test advisor for a project.

2. The lead test advisor shall be afforded all overtime hours associated with the project. The lead test advisor’s overtime hours will be evaluated every 2 months to maintain equitable distribution of overtime in accordance with Article 11, Section a.

3. In the event the lead test advisor assigned to the project is unavailable to work overtime and there is a second qualified test person assigned to the project, this person will be afforded the first right to assume the lead test advisor position for a limited time.

CALLOUT

Travel Time

Employees utilizing company supplied transportation, who have completed their scheduled workday and are called out without advanced notice will be paid at the rate applicable and equal to the time spent en route to and from work location.

LEAVES OF ABSENCE

1. The Company, at its discretion, may grant leaves of absence for personal reasons.

2. Requests for leaves of absence, including any extensions, must be submitted in writing as far in advance of the requested period of absence as is possible, shall designate the period of the leave and its purpose.

3. Written requests for leaves of absence shall be considered on a case-by-case basis.

4. Leaves of absence that are granted by the Company will be in writing, shall designate the period of the leave and its purpose.

5. An employee's seniority shall cease and such employee will be terminated as an employee if such employee fails to return to work upon termination of the leave of absence.

TOPIC: EXEMPT PAY PROVISIONS

Central Region Distribution Test Unit
Eastern Region Distribution Test Unit
Western Region Transmission Test Unit
Western Region Distribution Test Unit
Eastern Region Transmission Test Unit

These pay provisions apply to all union employees covered by this contract who are designated "exempt" under the Fair Labor Standards Act (FLSA). These pay provisions supersede all other pay provisions of this contract.

Work Day - Work Week

Exempt employees are paid an annual salary (paid biweekly) and are expected to work those hours necessary to complete the assignments of their job. Exempt employees are not normally compensated for working hours in excess of the normal scheduled work day or work week. The normal scheduled work week shall be five (5) days, Monday through Friday.

Salary

The negotiated Time Merit Progression with rates of pay shall be provided in Appendix A.

The job Classifications shall be provided in Appendix B.

All exempt employees will have their performance reviewed annually. Their progress within the range of the job will be based on their most recent performance review. The Company's determination on such reviews shall not be subject to grievance or arbitration.

An exempt employee whose current base salary is at or above the going rate of their salary grade, will receive any pay increase as a lump sum amount.

An exempt employee whose current base salary is below the going rate of their salary grade will receive a salary adjustment up to a maximum of the going rate, and any amount of the increase that would be over the going rate will be paid as a lump sum amount.

Overtime

Exempt employees will be paid an annual salary (paid biweekly). This salary will cover the regular work schedule and a reasonable amount of hours outside of the regular schedule. The normal work schedule will consist of five days.

When exempt employees are assigned to work outside their regular work schedule or on Saturdays, Sundays, or holidays, it will normally be without additional salary, unless it is authorized overtime and a four-hour weekly corridor will be applied, or during an emergency. During an emergency, exempt employees will be paid in accordance with Company policy for exempt pay during Storm Restoration (See Storm Restoration Guide below).

Exempt employees are not subject to the pay provisions of this contract concerning overtime pay (Article 11), callout pay (Article 12), rest time pay (Article 13), meal time pay (Article 14-paragraph 2), or jury duty (Article 20). Exempt employees not serving an on-call rotation assignment are not normally eligible for on-call pay. (See Storm Restoration Guide below.)

Records of distribution of overtime work for exempt employees will be made available to designated union representatives upon request and also posted on a weekly basis.

Storm Restoration

When assigned for storm restoration to other utility companies outside of the State of Connecticut, which are not within the NU System, an exempt employee will receive compensation at approximately two times salary, paid biweekly.

During storms within the NU System, an exempt employee will receive a special overtime rate in accordance with the NU System Emergency Restoration Guide.

NU System Emergency Restoration Guide

Exempt employees are expected to participate in NU System Emergency Restoration as needed. A System emergency is one created by natural or technological disasters that interrupt electric service to NU customers.

Exempt employees assigned to NU System Emergency Restoration duty will be paid a flat rate per hour for each hour worked: 1) over and above their regular work schedule, or 2) after the first eight hours worked each day (time code 232). During such Storm Restoration Assignments, exempt employees are paid from first hour worked over and above their regular work schedule. Exempt employees are not paid for travel time to their assigned emergency location.

Qualified on-call supervisors (normally serve an on-call rotation assignment) who are assigned to the supervision of line/electrical craft workers during Emergency Storm Restoration will be paid at an overtime rate of 1.4 times their hourly flat rate for all hours worked 1) outside their regular work schedule, or 2) after the first eight hours worked each day (time code 208). Such an on-call supervisor, if placed on-call, is required to remain fit for duty, near the reporting area, and to be continuously available for duty as assigned.

Exempt employees will be reimbursed for personal vehicle use during NU System Emergency Restoration at the standard flat rate per mile in accordance with Article 14-paragraph 4. Out-of-pocket meal expenses, when accompanied by a receipt, will be reimbursed for the reasonable cost of such meal.

TOPIC: UPGRADING – PROJECT TEST SPECIALIST / TEST SPECIALIST 3 or 4

Central Region Distribution Test Unit
Eastern Region Distribution Test Unit
Western Region Transmission Test Unit
Western Region Distribution Test Unit
Eastern Region Transmission Test Unit

In the absence of a supervisor for an extended period of time (e.g., vacation, illness), when a Project Test Specialist / Test Specialist 3 or 4 is specifically assigned supervisory responsibilities, the employee will be upgraded and will be paid two dollars and fifty cents ($2.50) per hour in addition to their basic straight-time hourly rate for all hours so-assigned.

Upgrade to supervisor will normally be offered on a senior to junior departmental seniority basis.

When a Project Test Specialist is assigned to a major/complex project (as defined below) ** to temporarily provide Lead Advisory direction in their specific area of expertise, the employee at the job location/satellite will be upgraded and will be paid two dollars ($2.00) per hour in addition to their basic straight-time hourly rate for all hours so-assigned.

When a Test Specialist 3 or 4 is assigned to a project to temporarily provide Lead Advisory direction in their specific area of expertise, the employee at the job location/satellite will be upgraded and will be paid two dollars ($2.00) per hour in addition to their basic straight-time hourly rate for all hours so-assigned. Test Specialists 3 or 4 cannot be forced to take an upgrade.

Upgrade to Lead Test Advisor will normally be offered on a senior to junior departmental seniority basis or by Article 11.b (Lead Test Advisor Project Overtime Distribution) where extended overtime is involved.

**The definition of eligible jobs which qualify for Lead Advisory upgrade is shown by the following examples:

Examples of prior major/complex jobs are:

Branford Substation Conversion Project (Ref. 1997 work)
AMTRAC (Ref. 1999 work)
Simsbury Substation (Ref. 1998/1999 work)
Williams Street Substation (Ref. 1999 work)
Cheshire Industrial Park (Ref. RSAM Project 1997/1998)
23kV conversion - Cheshire/Madison (Ref. 1997/ 1998 work)
Stepstone Substation (2008)
Rood Avenue Substation (2009)
Bloomfield Substation Breaker and Relay Refurbishment (2010)
Southington 345.115 Autotransformer LTC Control (2012)
Westside Substation Project (2010)
Boehringer/Ingelhiem VISTA gear with SEL protective relays (2011)
Middlesex Hospital Co-Gen (2012)

Major/complex job assignments typically include several of the following elements:

Advance job planning
Major/complex equipment installation
Major/complex field reengineering/redesign

Coordination of multiple work group disciplines
Coordination of work schedules for multiple work entities, i.e., contractors, customers.
Potential for major customer exposure

Examples of jobs that do not qualify for upgrade include:

Doble Testing
Battery Testing
Cable Testing
Recloser Testing
Timer Testing
Bucket Truck Testing
Distribution Relay Testing
Transmission Relay testing
Insulation Testing
Ground Testing
Cable Fault location
Radio/TV interference
Troubleshooting equipment failures
Power Quality investigations
Stray Voltage investigations
Records management

Jobs which would normally not qualify for upgrade, but depending on the complexity and size of a specific job, would be evaluated by the supervisor on a case-by-case basis:

Mobil Transformer Installation
Commission Auto Loop System
Substation/Distribution Disturbance Analysis
Commissioning NUGs/Cogens

TOPIC: PROJECT TEST SPECIALIST UPGRADE

MEMORANDUM OF UNDERSTANDING

Project Test Specialist/Test Specialist 3 or 4 Upgrade

One test person Project Test Specialist/Test Specialist 3 or 4) per construction project will receive a double upgrade for providing technical support to contractors for complex substation construction electrical wiring projects where the scope of the job includes:

- Sequencing of work, work plan development and job planning functions, and
- Leading the contractors with translating the schemes, wiring changes, device identification and functionality, and
- Providing technical direction although not supervisory direction for the job.

Note: the testing services for these construction projects would be provided by the Regional Test personnel.

/s/ Theresa Kmetetz, Assistant Business Manager 12/11/01
Local 457

/s/ Raymond C. DiCenso, Sr HR Consultant 12/10/01
Labor Relations

TOPIC: UPGRADE TO ELECTRIC SERVICE DESIGNER SPECIALIST

When a fully qualified top step Electric Service Designer is specifically assigned by his/her supervisor to perform work on a network system, primary metering or mentoring, the employee will be upgraded to the first step rate of the Electric Service Designer Specialist for those hours assigned to perform the upgraded work.

TOPIC: ON-CALL ASSIGNMENTS – ELECTRIC SERVICE DESIGNERS AND ELECTRIC SERVICE DESIGNER SPECIALISTS

The Company will extend the Teal Book on-call rate to Electric Service Designers and Electric Service Designer Specialists, who **shall** be put on-call at the request of the Company **for Storm/Weather events where all hands are needed and all three RMTs are open**. All of the provisions and requirements of on-call will apply to employees who **are** placed on-call.

On-call assignments will remain voluntary for Electric Service Designers and Electric Service Designer Specialists except for all hands Storm/Weather events as described above.

Exempt Employees

Exempt employees whose job requirements include assignment to take trouble calls outside of normal scheduled hours will use on-call pay codes and will be paid in accordance with Company policy.

PROVISIONS PERTAINING EXCLUSIVELY TO ENGINEERING DESIGNERS AND DISTRIBUTION DESIGN ENGINEERS

Engineering Designers and Senior Engineering Designers

Engineering Designers and Senior Engineering Designers whose base rate is above the Engineering Designer III, Step 4 rate will receive the negotiated contractual wage increase in the form of a lump sum until the Engineering Designer III, Step 4 rate catches up to their respective base rate. See Appendix A. In addition, Engineering Designers and Senior Engineering Designers will be eligible for overtime compensation in accordance with the contract.

Engineering Designers

Engineering Designers III will receive a $1.75 per hour upgrade to their base rate for those hours specifically assigned by his/her supervisor to:

- Act on behalf of Engineering Supervisor in his/her absence
- Act as team lead in project assignments in which multiple designers are needed
- Provide engineering training and technical leadership for more than one hour

Distribution Design and Senior Distribution Design Engineers

This group of employees will not be eligible for overtime or any other premium pay cited in Article VI and VII of the Teal contract.

Distribution Design Engineers and Senior Distribution Design Engineers shall receive the negotiated general wage increases.

PROVISIONS PERTAINING EXCLUSIVELY TO FIELD COMMUNICATIONS EMPLOYEES

On Call

Where the Company establishes an annual rotational scheduled on-call, all employees shall be subject to such scheduled on-call and may not opt out. The Company may establish two separate on-call lists, one for Distribution Automation and one for Substation Automation. The annual scheduled on-call rotation may include both union and non-union employees.

Nothing shall restrict the Company's right to assign any employee to be on call for unscheduled emergency situations, such as the forecast of a storm.

Nothing shall restrict the Company's right to eliminate or combine annual rotational scheduled on-call.

Article VI, Section 10 shall not apply.

TOPIC: OVERTIME

Insofar as practicable, overtime will be equitably distributed among suitably qualified employees in the job classifications in the area in which the work is to be performed.

For purposes of project continuity, where periods of extended overtime and/or where a long term project is involved, an employee assigned to such project shall be offered all overtime hours associated with the project.

CALLOUT

Travel Time

Employees utilizing company supplied transportation, who have completed their scheduled workday and are called out without advanced notice will be paid at the rate applicable and equal to the time spent en route to and from work location.

PROVISIONS PERTAINING EXCLUSIVELY TO FIELD COMMUNICATIONS EMPLOYEES AND FIELD ENGINEERING TEST

TOPIC: USE OF COMPANY VEHICLES

The Company may authorize an employee who is assigned a Company vehicle to take the vehicle home. An employee who takes a Company vehicle home shall be subject to the following conditions:

The hours of work shall be the normal hours of work assigned to the employee. When an employee reports to his or her assigned office at the start of the day, the employee must be in the office at the beginning of his or her regular shift. If the employee is expected to report elsewhere at the start of the day and the reporting location is closer to the employee's home than the assigned office, the employee must be at the reporting location at the beginning of his or her regular shift. If the reporting location at the start of the day is further from the employee's home than the assigned office, the time spent traveling to the reporting location beyond the employee's regular commute shall be on Company time. For example, if an employee normally has a 30-minute commute and the reporting location is 45 minutes away, the employee is expected to show up at the reporting location 15 minutes after the beginning of his or her regular shift.

APPENDIX "D"

TOPICS

TOPIC: Labor/Management Committee

The Company and Union agree to establish a joint labor/management committee to meet periodically (quarterly) during the term of the agreement to identify opportunities and develop plans to improve the quality and performance of our operations.

The Committee shall be composed of five bargaining unit employees and five management employees. The first meeting will be scheduled in September 2016 (or any other mutually agreed date).

The topics and issues to be addressed may include but not be limited to:

- "State of the Company" session including Business Plan and objectives
- Safety/Training
- Opportunities to partner on specific initiatives
- New technology (engineering)
- Employee engagement

Topic: Expanded Loading Duties for Stockhandlers

EVERSOURCE ENERGY

107 Selden Street
Berlin, CT 06037

May 25, 2016

This confirms an agreement reached between The Connecticut Light & Power dba Eversource Energy and IBEW Locals 420 and 457 for the expanded loading duties for the Stockhandlers:

1. The Company will expand the current practice of loading by the Stockhandlers, to include material and equipment such as but not limited to, cable reels and transformers onto Company vehicles.
2. It is not the intent of the Company to remove loading duties from any classification that presently performs these duties, nor is it the intent to give any classification exclusivity to the duties associated with loading and unloading.
3. The Company will train Stockhandlers on equipment necessary to perform the expanded loading duties.
4. The Company may need to reassign Stockhandlers to schedules between the hours of 6:00 AM to 6:00 PM to perform the expanded loading duties.
5. The Company will agree to post and fill 5 Stockhandler positions, locations to be determined.
6. $1.00 adder to incumbent employee base rate that obtains and maintains CDL (B).
7. New hires must be able to obtain and maintain valid CDL (B).

Sincerely,

Manager, Labor Relations

Agreed:

Joe Malcarne
Business Manager, IBEW, Local 420

John Fernandes
Business Manager, IBEW, Local 457

TOPIC: Training of Cadets – It is not the intent to train Cadets for Supervisor positions or for the acquisition of manual skills.

Company Intent – It is the Company's intent to accomplish the training of Cadet Engineers without adversely affecting training or promotional opportunity for helpers and classified workers covered by the Union Agreement and the Company will not exclude helpers and classified workers from consideration for appointment to the position of Engineering Assistant in training. Cadet Engineers will not be assigned as substitutes for helpers or classified workers to avoid employing helpers and classified workers needed to meet the Company's work requirements. Engineering Assistants may be assigned to assist supervisors in the performance of their duties by preparing and transmitting work orders, inspecting work progress and such other specific tasks which they may, in the management's opinion, be capable of performing.

TOPIC: Vacations

(A) With reference to discussion of Article VII –Vacations, it is the Company's intention to continue to administer vacation policies in accordance with Employee Relations Instruction No. 9314 and 9904 as set forth in The Connecticut Light and Power Company Manual of Procedures. Should the Company contemplate any change in these instructions affecting bargaining-unit employees, the matter will be discussed with the union in advance of the change.

(B) Illness or Injury Immediately Preceding or During Scheduled Vacation.

(C) In the event that an employee becomes incapacitated immediately preceding or during the employee's scheduled vacation, due to illness or injury, and the employee notifies the employee's supervisor of such illness or injury as soon as possible, that portion of the employee's vacation period during which the employee is incapacitated may be rescheduled, at the option of the Company, to another time during the calendar year.

(D) In determining whether the employee's vacation should be rescheduled due to illness or injury, occurring immediately preceding or during the employee's scheduled vacation, the Company may request from the employee verification from the attending physician.

(E) In the event vacation to be rescheduled under paragraph 3.(D) cannot be rescheduled during the current calendar year, it will be rescheduled (up to eighty hours), in accordance with Article VII, Section 3, within the following calendar year.

(F) When a former employee of the Company is re-employed and completes five years of continuous service, such prior service will be included in the employee's total length of service for the purpose of determining the amount of vacation eligibility, provided such prior service had been for a period of six months or more and other than on a temporary basis.

(G) Granting of credit for prior service for vacation eligibility will not change an employee's company or classification seniority date.

TOPIC: Replacement of Employee's Tools when Stolen and Garage Mechanic Tool Allowance. (Effective January 1, 2010)

If an employee's tools are stolen, they will be replaced by the Company, if, in the Company's opinion a valid and justifiable claim exists.

The Company will provide an annual tool upgrade allowance of up to $250.00 per year for Garage Mechanics. The employee must furnish a receipt of purchase for reimbursement documenting the purchase of job specific tools.

TOPIC: Subcommittee Agreements with Respect to Line-Tensioning Equipment and Progression Sequence of the Construction Equipment Operator Classification.

The parties agree that line-tensioning equipment that was being operated by construction equipment operators may be operated by any qualified employee(s).

TOPIC: Time-Merit Progression Programs in Effect

Letter of April 26, 1966
Line Helper to Lineman – (effective May 29, 1966, revised September 23, 1985, and January 6, 2005)
Electrician Helper to Electrician – (effective May 29, 1966, revised November 5, 1985 and March 19, 2008)
Splicer Helper to Splicer – (effective May 29, 1966, revised October 25, 1985, and March 19, 2008)

Letter of April 4, 1968
Mechanic Helper to Construction Mechanic – (effective April 1, 1968)
Mechanic Helper to Construction Mechanic (revised January 6, 1986)
Stockhandler – (effective January 5, 1969, revised June 1, 1986 and June 1, 2004)

Letter of January 14, 1970
Garage Mechanic Helper to Garage Mechanic – (effective January 4, 1970, revised November 14, 1985 and August 1, 2005)

Letter of June 3, 1993
Meter Service Mechanic/Installer (effective 1993, revised May 9, 2008)

TOPIC: Executive Instruction No. 18 – Uniforms: Customer Contact Personnel

Once a year the Company will arrange and pay for a complete overhaul and cleaning of all uniforms, at which time any replacements and repairs that may be necessary should be made. This overhaul and cleaning should be arranged for locally and performed without interfering with normal work assignments. In addition, the Company will provide for cleaning every two weeks.

TOPIC: Upgrading to Construction Eq. Op.

An employee upgraded to Construction Equipment Operator will be paid at the rate of $36.11 effective May 31, 2009; $37.19 effective May 30, 2010; $38.31 effective May 29, 2011.

TOPIC: Job Specifications

The following job specifications have been agreed on by the Company and the Union:

Automotive Equipment Mechanic (Berlin and Waterbury only)
Laborer
Building Maintenance Mechanic
Groundman
Survey Party Assistant (Berlin)
Instrument Mechanic (Berlin)
Chief of Party (Berlin) (Revised April 19, 1987)
Carpenter
URD Equipment Operator
Tester – Electric Meter Laboratory Helper – Tester – Electric Meter Laboratory
Meter-Service Mechanic Helper – Electric – Meter-Service Mechanic – Electric (Revised June 1, 1989)
Meter Service Installer (Revised June 1, 1993)

TOPIC: Employee Progress Reports

In the future Employees will be furnished with a copy of their progress reports.

TOPIC: URD Construction Crew

URD Construction Crews will consist of one, two, three or more qualified personnel. The number of employees assigned will be dependent on the work to be done, and will be made from the Line, Splicer, or Electrical classifications. Additional Groundman, Line Electric or Splicer classified personnel will be supplied whenever required or requested by the person in charge in order to perform the work safely.

TOPIC: Installation of Submersible Transformers in Energized Silos

The scheduled installation or removal of submersible transformers in energized silos will be performed by URD crews equipped with corner-mounted derricks or other equipment assigned to the department involved.

TOPIC: Summer Employees Working Overtime

The Company will not assign temporary summer employees to prearranged overtime work on a day outside of their normal schedule when other employees capable of performing the work are available.

TOPIC: Berlin Construction, Jackson Street and 3333 Employees, Nuclear Plant Assignments

Berlin Construction employees from Jackson Street or 3333 who accept assignment to work nuclear plants, including radiation controlled areas, will be required to accept assignment for a period of not less than one year.

TOPIC: The Effect on Employees of the Establishment of Building 3333

1. It is anticipated that the Company would transfer the following classifications and numbers of employees to Newington Building 3333 during the term of the Agreement.

(1) Chief Construction Mechanic

(3) Construction Mechanics

(3) Carpenters

(2) Utility Workers

(8) Construction Equipment Operators

(2) Construction Welders

2. These transfers of Berlin Construction personnel would be offered on a volunteer basis. If the requirements above are not met on a volunteer basis in the time required, then such transfers will be required on a junior to senior basis in the classifications involved.

3. Additional required numbers of Berlin Construction employees will be reassigned to Newington Building 3333 on a volunteer basis. If the Company is unable to meet its requirements on this basis, then the Company and the Union will discuss the matter and attempt to work out a satisfactory solution. Should a satisfactory solution not be arrived at, the subject will be discussed during the next Company/Union Negotiations.

4. Present Berlin Construction employees headquartered at Jackson Street, Waterbury transferred under Paragraph 2 above, or who are reassigned to Newington Building 3333 either through voluntary action, in

response to job posting or transfer, will have their per diem base "grandfathered" for one year from the date of reassignment.

5. Present Berlin Construction employees reassigned from Jackson Street, Waterbury to Newington Building 3333 will be eligible for moving expenses for the period of one year from the date of their reassignment. Moving expenses include the following:

a. Packing of household furniture and personal effects.

b. Disconnection of major appliances.

c. $100.00 for incidental expenses.

d. Insurance coverage for the move. Employee may suggest mover. Company will engage the mover and make the arrangements with the mover.

6. If the Berlin Construction workload requires, the Company will post and hire into Building 3333.

7. The Company Proposal made on "mileage towns" dated August 9, 1977 is part of this Proposal. Any questions on distance from Newington Building 3333 to work locations will be worked out as they occur.

TOPIC: Seniority – Berlin Construction – Jackson Street (Waterbury)

Employees assigned to Jackson Street (Waterbury) as of August 1, 1982 and are reduced will have available, in addition to their options as stated in Article V, the option to displace the least senior employee within the employee's classification at 3333 or Myrock Avenue.

TOPIC: Berlin Construction

All employees hired into Berlin Construction after May 30, 1982 will be required to work at Connecticut Yankee and/or Millstone when so assigned.

TOPIC: J Schedules-Meter Service Department

J Schedules will not be utilized during the term of the Agreement in the Meter Service Department.

TOPIC: Commercial Driver's License

The Company will pay applicable costs associated with obtaining a Commercial Driver's License required by the duties performed of the classification.

Applicable costs Include:

a) endorsements
b) various test fees
c) issuance of permit

In addition, the Company will pay the cost difference of the employee's license fee and the license fee of the job-required CDL.

TOPIC: METER SERVICE INSTALLERS

Meter Service Installers will progress in their respective districts to Meter Service Mechanic without a job posting providing there is an approved vacancy to be filled and they have successfully passed the CAST test.

TOPIC: STORM ASSIGNMENT OR OTHER EMERGENCY SITUATION

If an employee is assigned to an out of district storm assignment or other emergency situation that may require an overnight stay, and the assignment is made during the employee's regular work hours, the Company will provide ½ hour early dismissal, without loss of wages. In the event that the employee was not provided ½ hour early dismissal, the Company will provide a one time $25.00 payment to the employee for that overnight storm or emergency event. (Code 029).

TOPIC: SYSTEM PROJECTS

The Company agrees to maintain the existence of a System Projects Group through the term of the Agreement.

TOPIC: GROUND RULES

The Company and Union agree to establish ground rules prior to future negotiations. In addition, the parties will start negotiations six months prior to the expiration date and conduct negotiations in such a manner that ensures conclusion by contract expiration.

TOPIC: PATH OF PROGRESSION (SILO SENIORITY)

This letter confirms our understanding reached concerning the merging of the Blue and Green Books. Seniority will be Grandfathered separately for the purpose of promotion only. Any vacancy to be filled by promotion from a former Green Book employee leaving will be offered to the senior qualified former Green Book Employee. Any vacancy to be filled by promotion as a result of a former Blue Book employee leaving will be offered to the Senior Qualified Blue Book employee. Any vacancy to be filled by promotion that cannot be identified as a former Blue/Green position will be offered to the senior qualified employee.

In the event displaced employees from a district or locality that is closed are reassigned to more than one district such displaced employees shall retain their

promotional sequence rights from their former district or locality (Blue or Green).

In the event a displaced employee has no promotional sequence in the district that he is reassigned to, the promotional sequence from his former district will apply for wage purposes only.

Retrogression drops in reverse sequence of classification progression.

Promotion to Teal means any promotion slots in at junior most position in said classification.

Promotional sequence will not apply to any District/ AWC not listed under this Topic.

All former Local 457 Blue/ Green locations, for example, are the former Green locations of Hartford, New London, Middletown and the former Blue locations of Tolland, Mystic, Madison, East Hampton, Danielson, Cheshire, and System Projects East and Central.

All former Local 420 Blue/ Green locations, for example, are the former Green locations of Stamford, Torrington, Falls Village, Simsbury and the former Blue locations of Greenwich, Newtown, Norwalk, Waterbury, New Milford, Waterbury/ Oxford, System Projects West, Torrington, Mattatuck Heights, Berlin Construction/ G.O, and Norwalk Transmission Electricians.

TOPIC: Hartford/ Simsbury/ Windsor/ Stamford Meter Readers- Green Vacation Choice Seniority

This letter confirms our understanding reached concerning the merger of the Blue and Green Books. Seniority for the purposes of selection of vacation periods will be grandfathered for existing employees in Hartford, Simsbury, Windsor and Stamford Meter Readers. Existing Hartford, Simsbury, Windsor and Stamford Meter Reading employees will be granted preference in selecting vacation periods in descending order of Teal Book seniority on a departmental basis as involved.

In the event of an employee transferring to Hartford, Simsbury, Windsor or Stamford Meter Reading their vacation preference will be based on Teal Book seniority.

In the event of an existing Hartford, Simsbury, Windsor or Stamford Meter Reader employee transferring to another district (other than Hartford, Simsbury, Windsor or Stamford Meter Reader), whether voluntary or displaced, their vacation preference will be based on Teal Book seniority in relation to other employees in their new district.

TOPIC: ADOPTION ASSISTANCE BENEFIT

The adoption benefit is offered to help employees meet some of the expenses related to adopting a child.

The adoption benefit provides reimbursement of up to $5,000 of eligible expenses for the adoption of each child under the age of 18. Only the expenses employees actually incur are eligible for reimbursement. The benefit is payable when the adoption is final (when a decree of adoption is entered by the court) and applies to expenses incurred on or after January 1, 2015.

Eligible expenses include: adoption agency fees, legal fees, court fees, travel expenses, the child's initial medical exam and certain out-of-pocket medical expenses for the natural mother.

Adoption Leave

Employees are eligible for company-paid adoption leave after completing three months of employment with Eversource. An employee's pay during the duration of his or her adoption leave will be based on his or her base pay in effect on the day the leave starts.

An employee must give his or her supervisor at least three months written notice of the date the leave will start and when the employee expects to return to work. If an employee is also eligible for Family Medical Leave Act (FMLA) leave, time taken for adoption leave will also count as FMLA leave.

Duration of Leave

Adoption leave begins on the date the child is received into an employee's home. The maximum duration of an adoption leave depends on the age of the adopted child according to the following schedule:

Age of Adopted Child	**Maximum Amount of Leave***
6 years old or younger	8 weeks
At least 7 years old but less than 13 years old	4 weeks
At least 13 years old but less than 18 years old	2 weeks

TOPIC: ON CALL ASSIGNMENTS (ADMINISTRATIVE SUPPORT UNITS ONLY)

Employees who volunteer to be placed on-call at the request of the Company may be placed on-call outside their normal schedule hours for one or more consecutive 24-hour periods, or less than 24 hour periods. Employees who volunteer and are assigned for such on-call will be paid either 1.5 hours at basic straight-time rates or 3 hours at basic straight-time rates for each 24 hour period (or less than a 24 hour period) that they are on call as follows:

(i) if the majority of the 24 hour on-call period (or less than a 24 hour assignment) is served during a weekday (Monday through Friday), employees will receive 1.5 hours at basic straight time rates;

(ii) if the majority of the 24 hour on-call period (or less than a 24 hour assignment) is serviced during a holiday, weekend (Saturday or Sunday), or the employees day off (only for employees working a shift or special schedule), employees will receive 3 hours at basic straight time rates. With the exception of weekend on-call periods containing Company recognized holidays employees will receive no more than two 3 hour payments and one 1.5 hour payment for a weekend on-call assignment (e.g., 3 p.m. Friday until 7 a.m. Monday).

If called upon to perform work, in addition to the call-time pay they will be paid for the time worked at the rate applicable but not less than two hours for each time called out, except that they will be paid not less than three hours at the applicable rate for each time called out between 12:00 midnight and 6:00 a.m.

TOPIC: COMPANY TO ESTABLISH (R) SHIFT FOR STOCKHANDLERS IN THE DISTRICTS

Hours: Between 4:00 a.m. to 6:00 p.m.
Workweek: Monday – Friday

•One qualified Stockhandler per district.
•All incumbents are affected.
•Shift offered in order by classification seniority. Ask the Stockhandlers senior to junior; absent volunteers, force junior qualified Stockhandler.
•Management may elect to fill the shift during a scheduled temporary vacancy— such as vacations or other scheduled absences.
•Filling of temporary shift vacancies will be done by volunteers; absent volunteers, junior qualified Stockhandler will be required to take the shift in their local seniority area.
•Overtime by area – No change to present practice.
•Shift differential of $2.50 per hour will be paid for the whole shift if working one or more hours before 6:00 a.m. as part of the regular shift.
•On an annual basis, the R shift will be offered by order of classification seniority. Ask Stockhandlers senior to junior; absent volunteers, force junior qualified Stockhandler.

TOPIC: G.O. PROJECT OVERTIME DISTRIBUTION

Insofar as necessary for a project involving a wiring task where overtime is involved, the qualifications of the employee and the overtime list will be used in the selection of the G.O. Electrician to perform the wiring task for a project.
The G.O. Electrician who performs wiring tasks shall be afforded overtime hours associated with the project if needed. The overtime hours will be evaluated every 2 months to maintain equitable distribution of overtime.

Records of training and distribution of overtime work will be made available to designated Union representatives upon request. Overtime lists will be posted on a weekly basis.

TOPIC: TRANSMISSION LINE DEPARTMENT

Employees in the Transmission Line Department are considered day workers and will be required to work any of the following hours of work:

- **Four ten (10) hour days.**
- **Five eight (8) hour days.**

TOPIC: HOLIDAYS FOR REGULAR 10 HOUR SCHEDULE

Effective January 1, 2020, day workers on a regular 10 hour per day work schedule will receive ten federal holidays as set forth in Article VII, Section 7. The Floating holiday hours will be used to make up the difference between the 8 hour holidays and 10 hour regular schedule.

For employees working a Monday through Thursday schedule, if the holiday falls on Friday, the employees will have the preceding Thursday designated as the holiday. For employees working a Tuesday through Friday schedule, if the holiday falls on Monday, the employees will have the following Tuesday designated as the holiday.

This supersedes the provision in the March 16, 1998 letter regarding holiday weeks for 10 hour per day employees.

Article V- Employee Option Sheet Example:

6/23/2016

ARTICLE V SECTION 3(b) TRANSFER

In accordance with Article V of the current Agreement, I, _____have been offered the following options: _____, and I elect option number _____.

1. Displace the employee having least Teal Book Seniority in my classification:

A. _____ District B. _____ Region

2. Displace the employee having least Teal Book Seniority in my classification:

_____ Company

3. Displace the employee having least Teal Book Seniority in a lower job classification within my normal sequence of job progression within the locality:

_____ Classification

4. If qualified, displace the employee having least Teal Book Seniority within the locality:

_____ Classification

If an employee subject to reassignment has insufficient Teal Book Seniority to exercise provisions (1) or (3) then the employee may:

5. Displace the employee having least Teal Book Seniority in a lower job classification within my normal sequence of job progression:

A. _____ Classification-District B. _____ Classification-Region C. _____ Classification-Company

6. If qualified, displace the employee having least Teal Book Seniority:

A. _____ District-Classification B. _____ Region-Classification

If an employee subject to reassignment has insufficient Teal Book Seniority to exercise provisions (1),(2), (3), (4), (5), or (6):

7. If qualified, displace one of the five employees having least Teal Book Seniority within the Company:

A. _____ Classification-Location B. _____ Classification-Location C. _____ Classification-Location
D. _____ Classification-Location E. _____ Classification-Location

8. If qualified, layoff with recall rights.

9. If qualified, layoff with severance pay without recall rights.

10. If qualified, displace least senior excess employee in the same job classification in the same locality.

11. Elect vacancy of _____ listed on back of option sheet.

_____ Employee's Signature and Date _____ Present Classification and Location

_____ Displaced Employee _____ Classification _____ Seniority Date _____ Location

THE HARTFORD ELECTRIC LIGHT COMPANY

and

Local 1419, I.B.E.W.

Effective as of July 1, 1960

In addition to matters agreed upon and incorporated in the collective bargaining Agreement of even date between the parties, the following are agreements and understandings reached concurrently with such collective bargaining Agreement.

1. *** Obsolete

2. While the collective bargaining Agreement between the parties provides that there will be no other restriction on the Company's use of outside contractors, this will confirm our understanding in respect to the use of outside contractors so far as it involves or affects work in classifications in the bargaining unit.

When contractors employing I.B.E.W. members are readily available and qualified to perform live wire work usually done by employees in the bargaining unit, they will be given any contracts involving live wire work and, all things being equal, will be given preference for other work usually done by employees in the bargaining unit. It is understood that this limitation does not apply to the kinds of work other than live wire work customarily given to outside contractors in the past such as tree trimming and group replacement of streetlights.

Also, the Company, all things being equal, will not have work done by contract which is usually done by employees in the bargaining unit when this would cause a layoff of such employees. This will in no way apply to the use of nonbargaining unit personnel in the employ of the Company which is covered in a separate memorandum.

3. It is understood that any part-time employees of the Company currently performing work in classifications in the bargaining unit are excluded from the bargaining unit and that the Company will not add to the number of such employees.

4. *** Obsolete

5. *** Superseded

This memorandum shall be considered to be a part of the collective bargaining Agreement between the parties although not incorporated physically therein and shall be effective for the duration of said collective bargaining Agreement.

Witness: Harold P. Meyer

June 27, 1962

Mr. Chester Reynolds
Business Manager, Local 383, I.B.E.W.
345 Riverside Avenue
Torrington, Connecticut

Dear Mr. Reynolds:

This is to confirm yesterday's discussion as to our reasons for eliminating from the Agreement we signed, Item 11 which was a new Section 12 to be included under Article X and which is found in the Agreement with Locals 468, 469, and 1419. This Section was left out, not because we expect the Agreement to operate very differently on this subject from those we have with the other Locals, but rather because Local 383 had some concern as to its meaning and application and preferred not to have it in their Agreement. Rather than hold up proceedings, we have agreed to remove it with the understanding that it is the intent of our Agreement that temporary assignments to higher classifications may be made occasionally under circumstances where there is no vacancy and where there is no employee absent. Along with this understanding, the Union reserves the right to bring up a claim of vacancy if, in their judgment, they feel that temporary assignments of this special nature are so frequent as to indicate a need for additional full-time help. Please indicate your acceptance of this by signing and returning the copy of this letter which is enclosed.

Very truly yours,

THE HARTFORD ELECTRIC LIGHT COMPANY

AGREEMENT

between

THE HARTFORD ELECTRIC LIGHT COMPANY

and

LOCAL 383, I.B.E.W.

as of July 1, 1963

*** Paragraph Obsolete

We have also agreed to the following interpretations and applications of Section II of Article VI concerning temporary assignments to a higher classification:

1. That it is the intent of our Agreement that temporary assignments to higher classifications may be made occasionally under circumstances where there is no vacancy and where there is no employee absent. Along with this understanding, the Union reserves the right to bring up a claim of vacancy if, in their opinion, temporary assignments of this special nature are so frequent as to indicate the need for additional help.

2. Although the Agreement only requires the Company to rotate temporary assignments among qualified employees in order of seniority where such assignments exceed two weeks, it is the intent that in any case where assignment to a given classification occurs frequently that such assignments be rotated even though they be less than a week's duration, provided the largest share of such assignments are given to the senior employee.

IN TESTIMONY WHEREOF:

The parties hereto have executed this Agreement the day and year first above written.

This is to confirm certain statements of intent made by the Company during our recent negotiation meetings and certain understandings which are not a part of the Agreement itself.

1. *** Obsolete

2. Superseded (June 1, 1980)

3. *** Implemented

4. The Company plans to hold meetings with supervisors for the purpose of reviewing the terms of the Agreement and to emphasize the following points:

a. *** In Contract

b. That every effort will be made to give a shift employee as much advance notice as is practicable when the employee is to be given a holiday off. Further, that when such a holiday off is scheduled, it will not be interfered with except in case of emergency or the unforeseen absence of another employee.

c. Special mention will be made of the contract limitations on the amount and kinds of work to be performed by supervisors.

5. During the period of our Agreement, the Director of Employee Relations plans to arrange periodic meetings with the representatives of each of the local unions for the purpose of discussing on an informal basis, any subjects of current interest.

MEMORANDUM OF AGREEMENT

between

THE HARTFORD ELECTRIC LIGHT COMPANY

and

LOCAL 1419, I.B.E.W.

This is to confirm understandings reached as a result of our current negotiation discussions.

A. The following policy changes will be made effective as of July 1, 1966:

1. *** Superseded

2. *** Superseded

3. *** Superseded

4. *** In Contract

5. *** In Contract

B. The following practices will be reaffirmed through meetings with supervisors to be held during the month of July:

1. On-call schedules will be posted at least one month in advance, hopefully more, and will cover as long a period as is practicable, recognizing that there will necessarily be later revisions to accommodate unanticipated absences or changes in personnel or in operating requirements.

2. A regular system must be maintained whereby an employee will be notified the actual hours of overtime work recorded as soon as practicable after having worked overtime.

3. If supervision decides a replacement is needed to cover the illness of a person "oncall," it is supervision's responsibility to designate the substitute, giving consideration to the relative amounts of accumulated overtime worked by those qualified for the assignment.

4. Although time required for washing up will vary with circumstances and no set amount can be guaranteed, it is the general practice to try to complete the normal day's work early enough to allow reasonable time for washing up.

5. On days of extremely cold weather, particularly when accompanied by high winds, supervision is expected to use discretion so as to minimize exposure

aloft of any one lineman in the performance of nonemergency work which does not have to be completed that day.

Accepted for the Union:

July 3, 1969 /s/ Clarence L. Fillmore Jr.
Business Manager, Local 1419, I.B.E.W.

July 24, 1970

Mr. Philip A. Lent
Business Manager, Local 383, I.B.E.W.

Mr. Clarence L. Fillmore Jr.
Business Manager, Local 1419, I.B.E.W.

Gentlemen:

This is confirm our understanding on the following matters discussed during our negotiations meetings in connection with a new Agreement to be effective as of July 1, 1970:

1. In the event that an employee suffers a serious verified incapacitating illness or injury during the employee's scheduled vacation, and the employee notifies the employee's supervisor of such illness or injury as soon as possible, that portion the employee's vacation period during which the employee is incapacitated may be rescheduled, at the option of the Company, to another time during the calendar year.

An employee who has been unable to take all of the employee's vacation by December 31 due to verified incapacitating illness or Company operating requirements will have their vacation period extended up to eighty (80) hours until the end of the following year.

In determining whether the employee's vacation should be rescheduled, the Company may request from the employee verification from the attending physician.

2. In connection with the administration of Section 2 of Article IX of the current Agreement, in the event the Union wishes to question whether or not the Company has acted reasonably in making a change in a safety regulation, such issue shall first be referred for review to a committee of two safety specialists, one appointed by the Company and one appointed by the Union. If the two representatives agree as to their decision on the issue submitted, it shall be binding on both parties.

In the event the Committee is unable to agree, then the same issue shall be submitted to arbitration under Article IX of the current Agreement and the Arbitrator may use the two safety specialists as consultants in reaching the employee's decision following a hearing on the issue.

3. This will confirm the Company's intent with respect to the application of paragraph (a) of Section 2, Article X of the current Agreement. In administering Section 2(a), the Company intends to use the twenty percent as a guideline in relation to the Fair Labor Standards Act and not as an authorization for supervisors to do regular work a full twenty percent of the time under normal operating conditions.

Both the Company and the Union plan to follow the administration of this clause very carefully during the period of the contract year.

4. The sentence in paragraph 3 of the Memo of Agreement signed June 30, 1967, which reads, "Similarly, any hours worked but offset by equivalent rest time shall not be recognized," shall be deleted. As a result, paragraph 3 will read:

> "In connection with the revision of Article IV, Section 2(e), the following interpretation is agreed upon. Double the straight time rate will be paid for those hours worked beyond sixteen within any twenty-four hour period but not beyond such twenty-four hour period. Only such hours actually worked shall be recognized for these purposes. It is also agreed that any consecutive hours actually worked beyond sixteen consecutive hours actually worked will be paid at double the straight time rate whether offset by rest time or not." (Amended July 1, 1976)

5. While not part of the Collective Bargaining Agreement, for the duration of the Agreement, it is agreed, in connection with Article VIII, Grievance Procedure, that:

In the event a Business Manager and/or Assistant Business Manager has factual and reasonable evidence that the Company has violated a provision(s) of the Agreement and the employee(s) affected fails to present a grievance in Step One, then the Business Manager and/or Assistant Business Manager having first notified the employee(s) affected, may initiate a grievance in the Second Step at any time within ten working days after the date of the claimed violation. This period will be extended to fifteen working days should the Assistant Business Manager be absent during the original ten-day period.

6. While not part of the Collective Bargaining Agreement, for the duration of the Agreement, it is agreed that in addition to the two weeks Armed Forces training leave provided for in Article X, Section 14, an employee required to report for duty by a Reserve Component of the Armed Forces in the event of civil disturbance or natural disaster shall for an additional maximum of five working days, be paid the difference between the pay received for such service and the employee's regular straight time pay.

7. While not part of the Collective Bargaining Agreement, for the duration of the Agreement, it is agreed in connection with Article X, Section 8(a) that: The Company will not permanently transfer any employee from the Bargaining Unit to positions outside the Bargaining Unit unless the employee himself so desires.

Very truly yours,

R. H. Peterson
Director of Employee Relations

Mr. George O. Potter Jr.
Business Manager, Local 468, I.B.E.W.

Mr. Norman N. McPhail
Business Manager, Local 469, I.B.E.W.

Gentlemen:

This is to confirm our understanding on the following matters discussed during our negotiations meetings in connection with a new Agreement to be effective as of July 1, 1970:

1. In the event that an employee suffers a serious verified incapacitating illness or injury during the employee's scheduled vacation, and the employee notifies the employee's supervisor of such illness or injury as soon as possible, that portion of the employee's vacation period during which the employee is incapacitated may be rescheduled, at the option of the Company, to another time during the calendar year.

An employee who has been unable to take all of the employee's vacation by December 31 due to verified incapacitating illness or Company operating requirements will the employee's vacation period extended until the end of the following calendar year.

In determining whether the employee's vacation should be rescheduled, the Company may request from the employee, verification from the attending physician.

2. In connection with the administration of Section 2 of Article IX of the current Agreement, in the event the Union wishes to question whether or not the Company has acted reasonably in making a change in a safety regulation, such issue shall first be referred for review to a committee of two safety specialists, one appointed by the Company and one appointed by the Union. If the two representatives agree as to their decision on the issue submitted, it shall be binding on both parties. In the event the committee is unable to agree, then the same issue shall be submitted to arbitration under Article IX of the current Agreement and the arbitrator may use the two safety specialists as consultants in reaching the employee's decision following a hearing on the issue.

3. This will confirm the Company's intent with respect to the application of paragraph (a) of Section 2, Article X of the current Agreement. In administering Section 2(a), the Company intends to use the twenty percent as a guideline in relation to the Fair Labor Standards Act and not as an authorization for Foremen and other supervisors to do regular work a full twenty percent of the time under normal operating conditions.

Both the Company and the Union plan to follow the administration of this clause very carefully during the period of the contract year.

4. While not part of the Collective Bargaining Agreement, for the duration of the Agreement, it is agreed in connection with Article VIII, Grievance Procedure, that:

In the event a Business Manager and/or Assistant Business Manager has factual and reasonable evidence that the Company has violated a provision(s) of the Agreement and the employee(s) affected fails to present a grievance in Step One, then the Business Manager and/or Assistant Business Manager having first notified the employee(s) affected, may initiate a grievance in the Second Step at any time within ten working days after the date of the claimed violation. This period will be extended to fifteen working days should the Assistant Business Manager be absent during the original ten day period.

5. While not part of the Collective Bargaining Agreement, for the duration of the Agreement, it is agreed that in addition to the two weeks Armed Forces training leave provided for in Article X, Section 14, an employee required to report for duty by a Reserve Component of the Armed Forces in the event of civil disturbance or natural disaster shall for an additional maximum of five working days, be paid the difference between the pay received for such service and the employee's regular straight time pay.

Business Manager, Local 469, I.B.E.W.

Gentlemen:

This is confirm our understanding on the following matters discussed during our negotiations meetings in connection with a new Agreement to be effective as of July 1, 1971:

1. Letter of Agreement dated July 24, 1970 (Paragraph 1. In the event that an employee, etc.) is extended until July 1, 1972.

2. *** Deleted

3. Although time required for washing up will vary with circumstances and no set amount can be guaranteed, it is the general practice to try to complete the normal day's work early enough to allow reasonable time for washing up.

4. *** Obsolete

5. That normal lunch periods should be observed whenever practicable and those cases where it is necessary to delay lunch period should be kept at a minimum. Further, that when the work requirements make it necessary to postpone a lunch period for an hour or more, the practice will be to pay the employee time and one-half for the lunch period so that the employee will be considered to be on continuous duty from the start to the finish of the workday, eating when the employee can find the opportunity without any stated meal period.

Very truly yours,

R. H. Peterson
Director of Employee Relations

Mr. Clarence L. Fillmore Jr.
Business Manager, Local 1419, I.B.E.W.

Dear Mr. Fillmore:

This is to confirm our understanding on the following matters discussed during our negotiations meetings in connection with a new Agreement to be effective as of July 1, 1971:

1. The following Letters of Agreement dated July 1, 1970 Agreement are extended until July 1, 1972:

July 24, 1970 (Paragraph 1. In the event that an employee, etc.)

July 3, 1969
June 30, 1967
July 8, 1966
July 3, 1963
July 1, 1963
July 1, 1960

2. *** Deleted

3. The Company agrees to instruct its supervisors to make reasonable assignments in all departments during extreme cold. Except in the case of emergency or to restore service, employees will not be required to do overhead line work or steel substation structure work when the temperature is 10° or lower at the job site.

4. *** Obsolete

5. Line Mechanics will get help, if requested, when performing switching duties aloft on primary voltage on a planned switching job on a scheduled day off when such switching presents an unsafe working condition.

Very truly yours,

R. H. Peterson
Director of Employee Relations

Mr. J. R. Kelly, Business Manager, Local 457, I.B.E.W.

Gentlemen:

This is to confirm our understanding on the following matters discussed during our negotiations meetings in connection with a new Agreement to be effective as of June 1, 1995.

1. The Letter of Intent dated July 22, 1976 (page 138 of current Agreement) and other Letters of Intent extended by that Letter are extended until June 1, 1998 except as superseded by paragraphs 2. and 3. below.

2. The Company will pay the full cost of lenses, frame, and case of clear and/or tinted prescription safety eyeglasses for operating department personnel who are required to wear them for their job. Employees will be limited to two (2) pairs of safety glasses (clear and/or tinted) every two years for the term of the agreement. Employees who opt for safety glasses with Photochromatic (photogray) or progressive lenses will not receive a second pair of clear or tinted safety glasses. The company will pay for the cost of Photochromatic (photogray) or progressive lenses. The Company will provide for the replacement of safety eyeglasses when damaged on the job. Replacement will be limited to lenses only if the lenses are damaged or obscured.

The employee will provide the Company with a current (not over two years' old) prescription. The Company will also provide replacement lenses if the employee's prescription changes.

The Company will reimburse the employee for all fitting fees.

International Brotherhood of Electrical Workers

Gentlemen:

This letter concerning live-wire practices, referred to in Article XVIII of the June 1, 1989 Agreement, is to confirm our understanding of certain operating practices to be observed in the performance of work on energized primary conductors.

A. Work assignment of employees classified as Line Helpers

When a line helper is in the first three rate steps, the employee may be assigned to perform work on energized circuits of not higher than secondary voltage. When a line helper has attained the fourth rate step, the employee may be assigned, under close supervision, to apply protective equipment on primary conductors necessary to perform work safely on energized conductors not in excess of 600 volts. When a line helper has attained the fifth rate step, the employee may be assigned to perform simple work on poles involving energized primary circuits provided a Lineman is in the work area.

B. Energized primary work at two working levels or cutting in or out slack

Live-wire work involving either transferring of primary wires on poles or cutting in or out slack, or handling energized wire at two working levels shall be carried on by two Linemen or a Lineman and an eligible Line Helper in the sixth, seventh, or eighth rate step, except that the sixth-step helper will not be required to perform the work of cutting in or out of slack on energized wires unless under close supervision.

The following is our understanding of operating practices to be observed under paragraph B.

1. For the purposes of this paragraph, the following definitions shall apply:

a. Straight-Line Pole

A pole in line where the energized primary wires are carried on pin-type insulators and the angle of pull is not more than 18 feet (20 degrees).

b. Corner Pole or Angle Pole

A pole located at an angle in excess of the above or where the energized primary wires are carried on disc insulators or the equivalent.

c. Junction Pole

A pole where the energized primary wires extend in three or more directions from the pole, or where the energized wires extend in two directions from the pole and are supported on crossarms attached to the pole at two different levels.

2. The transferring of energized primary wires from a point of support on one pole to a point of support on another pole and where it is necessary to work on both poles at the same time shall be carried out in accordance with the number of qualified line department personnel described in the attached Live-Wire chart. The chart will be interpreted within the following scope:

a. Where the required numbers are two (2) or four (4), one-half (½) of the assigned number must be Linemen or Chief Linemen or a combination of both. The remainder may include Line Helper(s) in the sixth, seventh, or eighth rate steps.

b. Where the required number is three (3), two (2) must be Linemen or Chief Linemen or a combination of both, the remainder may be a Line Helper in the sixth, seventh, or eighth rate step.

3. The cutting in or cutting out of slack in energized primary wires shall be carried out by two Linemen or one Lineman and a Line Helper in the seventh or eighth rate step.

4. It is understood that in the event the transferring of energized wires from one pole to another also involves the cutting in or cutting out of slack or the installation of energized primary taps, or both, the provisions of 3. of this letter shall not require Linemen in addition to those provided for in the chart.

5. The Company may assign more than the specified number of employees to carry out any of the above jobs for expediting the work or for other purposes and the Union agrees that such use of extra employees shall not be considered as establishing a precedent.

6. The installation of energized primary taps on junction poles, and elsewhere where it is current standard practice, shall be carried out by two Linemen or one Lineman and one Line Helper in the sixth, seventh, or eighth rate step.

7. During 1976 contract negotiations discussions of the Company proposals for modifications of the June 18, 1975 live-wire practices letter, the Company explained that it was not its intent to change its method of assigning three-person crews as a result of the redesigning of the required number of personnel with respect to the live-wire practices, as described in the Letter of Understanding and attached chart.

On limited occasions, a line crew consisting of two qualified line department personnel could be assigned to perform jobs listed as 1 through 3 under the heading Personnel Lifting Devices of the live-wire practices letter interpretation chart, where the jobs could be performed without the use of a lifting tong in conjunction with a holding stick.

However, it is recognized that some line functions, other than the assignments listed in the live-wire practices chart, are now performed by and will continue to be performed by a two-person line crew.

Very truly yours,

Senior Vice President-Human Resources and Administrative Services

CONFIRMED FOR THE UNION:

By _____ Date *August 21, 1995*
Business Manager, Local 420

By _____ Date *August 21, 1995*
Business Manager, Local 457

March 16, 1998

Mr. William Hogg, Assistant Business Manager Local 420 – I.B.E.W.

Ms. Theresa Kmetetz, Assistant Business Manager
Local 457 – I.B.E.W.

Dear Mr. Hogg and Ms. Kmetetz:

This letter serves to confirm understandings reached as a result of our current negotiation discussions regarding the new CL&P Blue Book Department – System Projects.

Scope of System Projects

System Projects work is defined as any assignment that exceeds 120 continuous manhours.

Reporting Locations, Classifications and Population

	East (East Hampton)	West (Newtown)
Chief Lineman (rubber gloving)	3	3
Lineman (rubber gloving)	9	9
Helper	1	1

Hours of Work – Premium Pay – Holidays

All employees transferring into System Projects will be required to work any of the following hours of work:

- Four ten (10) hour days:
  - Eight (8) hour schedules during work weeks that contain holidays.
  - Premium pay will be in accordance with Article VII, Section 13(b).
- Straight eight (8) hour days.
- Eight (8) hour days with an unpaid lunch.

Overtime Rotation

Insofar as practicable, overtime work will be equitably distributed among suitably qualified employees who are assigned to the project in which the overtime work is required on a weekly basis.

Temporary Upgrades

When required, employees will be offered temporary upgrades according to greatest classification seniority on the project.

Work Practices

- Rubber gloving practices and procedures will be in accordance with the Blue Book Topic.

- System Projects line classifications will not perform switching in substations.

- It is not the Company's intention to mix district and System Projects linemen except for conversions. Any other mixing of district and System Projects linemen will be on a voluntary basis.

Incentive Compensation

Company and Union agree to meet and discuss, within 120 days from the date of this Letter of Understanding, the feasibility of adopting an incentive compensation program for System Projects bargaining unit employees.

Company and Union Review Committee

Representatives of the Company and Local Unions shall meet from time to time, at the request of either party to discuss matters pertaining to safety, efficiency and other cooperative efforts.

Storm Restoration Protocol

Available district linemen will be utilized first on storm restoration activities and then available System Projects Linemen, followed by Transmission linemen. If System Projects is working in an area hit by a storm, they may be required to perform storm restoration activities until they are relieved by available outside district crews from the area (as defined in Appendix C).

Seniority

Reassignment and layoff (see attached option sheet).

Appendix C

Department	Local Seniority Area
System Projects	East (East Hampton) West (Newtown)

Training

Training for helpers will be in accordance with the existing Lineman's Time Merit Progression Program. If a "non-rubber gloving" lineman applied for a System Projects position, rubber glove training will be provided.

Inclement Weather

System Projects linemen shall not be required to perform outdoor work when weather conditions might make such work unsafe. Work to be performed during inclement weather will be by mutual agreement.

Job Positions

The Company will give preference to its regular Blue Book bargaining unit employees and then its regular Green Book bargaining unit employees over hiring new employees when making placements within System Projects. Vacancies created by Green Book and Blue Book bargaining unit employees posting into System Projects will be filled in a timely manner, but not necessarily in the same location.

The Company and Union will act in accordance with all other provisions of the Blue Book Agreement.

Very truly yours,

/s/ Raymond C. DiCenso
Sr. Consultant – Labor Relations

RCD/tjk

ACCEPTED FOR THE UNION:

/s/ William Hogg, Assistant Business Manager	3/16/98
Local 420 – I.B.E.W.	Date
/s/ Theresa Kmetetz, Assistant Business Manager	3/16/98
Local 457 – I.B.E.W.	Date

11/10/2003

An agreement on a protocol for assigning CL&P-System Project crews to participate in major storm restoration activities at locations other than those owned or operated by the Company (Northeast Utilities)

The agreement is as follows:

- System Project crews will comprise of approximately 15% of the total number of crews participating in major storm restoration activities
- This agreement does not take effect until a minimum of 10 crews from the Divisions are assigned
- The Company will make an earnest effort to draw these crews from the various system project locations as evenly as practicable
- System Project crews will be selected on the basis of low overtime by location where practicable
- As the determined supervision, System Project line-workers will be mixed with Division line-workers when work requirements dictate (consistent with present practices)

Re: Extension of 'Gold Coast' Program to Local 420 Bargaining Unit Employees

Dennis:

Pursuant to our March 28th telephone call, I am providing our written commitment to extend to your members the subject Gold Coast program. This program, outlined in the attached memorandum, has already been implemented for qualified non bargaining unit employees, and may be discontinued at any time at the discretion of the company.

Please indicate your acceptance of this offer in the space provided below. I will be happy to answer any questions or address any comments you may have on this program.

Re: "Gold Coast" Program (Revised)

Revised – June 2016

To support Eversource's efforts of attracting and retaining employees in or near the high-cost, high-traffic area of Connecticut commonly referred to as the "Gold Coast," the Company maintains a program of the same name, which provides additional compensation above and beyond an employee's base salary.

Highlights of the program include:

- The Company will pay an initial Transfer Bonus Payment (or "Anniversary" payment) for new employees being hired and transferees into specific job locations, and an Annual Geographic Adjustment Payment to employees in designated job locations – specifically, the Stamford and Norwalk work centers.
- We will formally relax the 30-minute resident rule to 60-minutes.

The specifics of the plan:

1. Existing employees in the designated job locations as of 02-17-03 who are still in one of those specific locations on 12-31-03 will receive an annual $3,000 Geographic Adjustment Payment. This will occur every year as long as the Company deems this program necessary. The Company, in its sole discretion, retains the right to end this program at any time. In future years January 1 will be used as the start date.

2. Any employees who transfer or are initially hired into these designated job locations while the program is in effect will receive a one-time, once-in-a-lifetime $15,000 Transfer Bonus Payment, in the form of $5,000 after each of the first three anniversaries of such transfer, assuming the employee is still in a qualifying position.

3. The Annual Geographic Adjustment Payment will be payable in February. If an employee transfers out at any point in a calendar year, he/she is ineligible for that year's payment.

4. Should an employee transfer out of these job locations at any time, there is no obligation to repay any of the payments; however, no further payments will be made, and the employee will be ineligible for any additional Transfer Bonus Payments. The only exception is for an employee transferring out to accept a supervisory position; such employee will receive a pro-rated Transfer Bonus Payment for the number of days in the year the employee was assigned to one of the designated job locations. The employee will be eligible for the remainder of the Transfer Bonus Payment if he/she ever transfers back to one of these job locations as a supervisor or above.

5. The Geographic Adjustment Payment is pensionable each year, if the payment is made prior to the last month before your separation from Eversource. The Transfer Bonus Payment is not pensionable.

Q&A's for Proposed Gold Coast Program

Q1 – If I am in the program, assigned to one of the qualifying job locations, and retire during the year, what is the status of the Geographic Adjustment Payment I would have received at year's end?

A – The Geographic Adjustment would be prorated, for the time worked during the year up to the date of retirement, and would be paid out within 30 days after your effective retirement date.

Q2 – What happens if I am currently working in one of the qualifying job locations and I am assigned to a rotational assignment outside any of the qualifying job locations during the year?

A – If the Company assigns you to a temporary assignment at the Company's convenience, and you are expected to return to a qualifying location at the end of the assignment, you will be paid a full Geographic Adjustment Payment at year's end, when the other recipients are paid.

Q3 – What happens if I am currently working in one of the qualifying job locations and am downsized during the year?

A – You would first try to locate another position within Eversource. If you were unable to find another position and were terminated from Eversource employment, a prorated share of the Geographic Adjustment Payment would be paid to you at year's end, in the same time frame as other payment recipients.

Q4 – Are any employees currently assigned to a qualifying job location when the program begins qualified for the one-time initial Transfer Bonus Payment?

A – No, only new transfers and new hires into the qualifying job location, with effective dates of assignment after 01-01-03 will qualify for the one-time, once in a lifetime initial payment.

Q5 – Would an employee who transferred into a qualifying job location before the program's inception qualify for the one-time initial Transfer Bonus Payment?

A – No. The one-time initial Transfer Bonus element of the program only applies to people transferring into a qualifying job location with an effective date after 01-01-03 for the transfer. Employees who were assigned to the qualifying job location prior to 01-01-03 do not qualify for the one-time initial payment. However, they may still qualify for the Annual Geographic Adjustment for each subsequent year they remain in a qualifying job location while the program is in effect.

Q6 – For employees eligible to receive the one-time initial Transfer Bonus Payment for transferring into the qualifying job location, would they receive a pro-rated portion of the annual payment for a year in which they retired, or left the area due to, for instance, taking a new position outside the area?

A – The one-time initial Transfer Bonus Payment will only be paid out to employees who stay within the qualifying job location for three consecutive years and will be paid in equal increments at the end of each 12 month period, for those three years. If at any time during this three-year period they leave the area or retire, they would become ineligible for any additional payments through this part of the program.

Q7 – Do these payments affect benefits or overtime?
A – Both the Transfer Bonus Payment and the Annual Geographic Adjustment Payment will be included as base pay, retrospectively, for the purpose of calculating nonexempt overtime. Neither adjustment will be included in any calculation of e-share or401K. The annual

Geographic Adjustment Payments are included in pensionable earnings each year, if paid prior to the last month before your separation from Eversource. The Transfer Bonus Payments are not pensionable.

Q8 – Are these payments taxable?

A – Yes.

Q9 – Who is eligible for the Geographic Adjustment Payment?

A – Active, regular, full time and part time employees permanently assigned in qualifying job locations.

Q10 – If eligible, could employees receive both the Transfer Bonus Payment and the Annual Geographic Payment in the same year?

A – Yes.

Re: 2004 Blue Book & Green Book Announcements

John & Terry:

As part of the 2004 Blue Book and Green Book negotiations the Company announced that it would discontinue certain practices upon expiration of the current contract. Of the seven (7) Blue Book and six (6) Green Book announcements, the Union Locals expressed specific membership concerns regarding the three (3) announcements below, and requested that the Company commit that any future changes to these announcements be negotiated with the Locals.

In agreeing to the Union's request, the Company is agreeing—without precedent and without in any way committing to negotiate with the Locals with respect to any other announcements (whether made in the past, present or future)—to negotiate future modifications of the three (3)
2004 announcements listed below:

- **Announcement** - displaced employees, *who are hired after June 1, 2004*, will be required to successfully pass applicable aptitude tests (i.e., CAST, Tech., etc.) prior to exercising bumping options under Article V, Reassignment, Layoff and Demotion.

- **Announcement** - the Company eliminates the practice of rotating crews after 1½ hours worked for the sole purpose of equitable distribution of overtime. The Company will attempt to change-out crews after 3 hours**.**

- **Announcement** - On-call Prearranged Overtime Practices - with the exception of Saturday and Sunday, the Company eliminates the practice of using the scheduled oncall lineworker for prearranged overtime.

It is also understood and agreed that this agreement in no way affects the Company's management rights, including but not limited to, determining qualifications (including testing), establishing schedules (including establishment of the on-call week, shifts, etc.), and making work assignments.

Agreed to by the Company:

Re: Resolution of Overtime Distribution Issue – Local 420

John:

Pursuant to our August 24th telephone conversation the Company (CL&P) is agreeing to extend the practice of administratively assigning 2000 hours of overtime to those individuals who have reached the age of 45 and have removed themselves from scheduled on-call as permitted by the Blue Book (Article X) and Green Book (Article IV). This practice, which was originally initiated to accommodate the ACOS callout process, will result in these individuals being placed at the bottom of the overtime list for their area. Overtime assignments will be accomplished as follows:

- For unplanned overtime, ACOS will typically be used to run the entire list pursuant to normal practices. (See Attached).
- For planned overtime, work area supervision will disregard the administrative 2000 hour figure and offer the overtime to the person with the lowest number of net hours. (See Attached).

Implementation of the above process will, upon agreement from Local 420, become effective on September 1, 2005. Affected employees, who meet the aforementioned contract criteria, will be charged 2000 hours as outlined above. Affected employees who wish to return to on-call status will be given the one time opportunity to return to the on-call list without waiting the one year timeframe. Specifically, employees will not be returned to "scheduled on-call" until they have satisfied the earlier of a 12 month waiting period, or the January 1, 2006 calendar date (for establishment of the 2006 on-call schedule), unless there is a less than one in four on-call staffing arrangement in their work area where they can be immediately reintroduced to scheduled on-call work. Even if returned on-call employees are not working scheduled on-call they will be subject to the same overtime offerings as those employees who work scheduled on-call work.

As we have discussed this action (to include the waiving of the waiting period for return to scheduled on-call) is taken without precedence and without prejudice to the company's established position on overtime distribution. Additionally, the Company's action is predicated on the assumption that mathematical errors may occur in the assignment of planned overtime work – due to the need to deduct the 2000 hours. Accordingly, the company and/or the union reserve the right to discontinue this overtime process (i.e., using an administrative 2000 hours) with appropriate notice, if it is determined to be problematic or unmanageable. It is also understood that this agreement will resolve any grievances specific to the distribution of overtime where the adding of 2000 hours may have been a factor.

Please sign below to indicate your agreement on this issue.

Very Truly Yours,

/s/ Robert Lizotte

Agreed: /s/ John Unikas – Business Mgr. Local 420

Letter-2000 Hours Rule

October 23, 2012

Mr. Ed Hammett
Executive Director-Labor Relations Connecticut
Light & Power Co.

Re: Blue Book 2000 Hours Rule-457

Dear Mr. Hammett:

This letter serves to explain, in greater detail, Article X, Section 8(e). The affected employees, who meet the aforementioned contract criteria, will be charged 2000 hours as outlined in Article X, Section 8 (e). Specifically employees will not be returned to "scheduled on-call" until they have satisfied the earlier of a 12 month waiting period, or the April 1st calendar date (for establishment of the next year's on-call schedule), unless there is a less than one in four on-call staffing arrangement in their work area where they can be immediately reintroduced to scheduled on-call work.

Implementation of the above process will, upon agreement, become effective on April 1, 2013. Affected employees, who meet the aforementioned contract criteria, will be charged 2000 hours as outlined above. Affected employees who wish to return to on-call status will be given the one time opportunity to return to the on-call list without waiting the one year timeframe. Specifically, employees will not be returned to "scheduled on-call" until they have satisfied the earlier of a 12 month waiting period, or the March 1, 2014 calendar date (for establishment of the 2013 on-call schedule), unless there is a less than one in four on-call staffing arrangement in their work area where they can be immediately reintroduced to scheduled on-call work. Even if returned on-call employees are not working scheduled on-call they will be subject to the same overtime offerings as those employees who work scheduled on-call work, per the overtime list.

As we have discussed this action (to include the waiving of the waiting period for return to schedule on-call) is taken without precedence and without prejudice to the company's established position on overtime distribution. Additionally, the Company's action is predicated on the assumption that mathematical errors may occur in the assignment of planned overtime work-due to the need to deduct the 2000 hours. Accordingly, the company and/ or the union reserve the right to discontinue this overtime process (i.e., using an administrative 2000 hours) with appropriate notice, if it is determined to be problematic or unmanageable.

The parties hereby agree to the terms above.

Re: Agreement – Scheduling Vacation and On-call

Dear Rich & Frank:

This letter documents our August 2, 2010 agreement in principle and my subsequent discussion with Frank Cirillo regarding the company's development, approval and posting of annual vacation and on-call schedules. This agreement applies to the CL&P Blue Book and Green Book union contracts, the Yankee Gas White Book Contract, and the CL&P Technical Contract and as applicable, modifies the language contained in these contracts on this subject and replaces any side agreements or practices currently in existence regarding this topic. This agreement also applies to the Transmission Group as applicable.

It is also agreed that neither the Union or the Company will use this agreement as part of Local 457's grievance 2010-014 (Company No. 2010-10-457), or the arbitration of that grievance.

Purpose: This agreement reflects an effort by the parties to eliminate unnecessary controversy surrounding conflict between the on-call schedule and the employee's vacation submittal. To date, the company has processed these schedules independently – leaving some employees in a position where their vacation preference has conflicted with their on-call schedule. These employees have often had to swap their on-call schedule with another employee or otherwise modify their vacation plans. This agreement is specific to this conflicting schedule issue. All other vacation requests will continue to be processed in accordance with the applicable union contract (Blue Book and Green Book).

This agreement also documents the company's intent to fill on-call schedule vacancies (e.g., for planned medical absences) as soon as they are made aware of such. To fill short notice vacancies (less than 30 days) the company will seek volunteers, and if none will use the overtime list effective the Monday prior to the vacancy. For longer notice vacancies, the company will use the established on-call schedule rotation and will assign the vacancy to one of the scheduled employees provided the employee does not get back to back on-call schedules.

It is understood that the company may decide not to fill vacancies (particularly short notice absences) if it determines that the existing on-call response resources are appropriate for the anticipated trouble call volume.

Company actions for 2010: Effective November 3, 2010, the company will review the existing on-call schedule to determine if there is a conflict between the approved vacation schedule and the on-call schedule. Identified conflicts will be resolved by filling the vacancy through the overtime list of employees – specifically those employees eligible for scheduled on-call assignment. The company is not obligated to take action on any other vacation request.

Concurrent with its actions on resolving the vacation/on-call scheduling conflicts, the company will extend the current on-call schedule rotation until April 24, 2011. Employees requesting vacation during the period of January 1, 2010 through April 24, 2010, will submit their requests in accordance with the applicable contract language.

Company Actions for 2011 [and Future Years]: Effective April 24, 2011, and every year thereafter, the company will post the on-call schedule by the last Sunday in April. The on-call schedule will be prepared using approved vacation schedules to ensure there is no conflict with the employees approved vacation. Company management will process the employees' vacation preference in accordance with Article IX of the Blue book and Article V of the Green book, Article IX White book, and Article 22 of the Technical Contract as applicable. Once the vacation and on-call schedules are finalized by the Companies the employee (not the company) will be responsible for addressing any swapping or other schedule change, outside of those resulting from illness or disability.

Both parties understand and agree that this agreement will terminate with the expiration of each cited contract and this agreement will be incorporated into the next version of these contracts or will otherwise be dispositioned through the contract negotiations process. Additionally either party may request a revision to this agreement.

November 30, 2016

Topic: Floating Holiday Protocol

Bargaining unit employees have the ability to choose two floating holidays during the calendar year based on operational requirements and supervisory approval. The two floating holidays can be used for any reason and are requested by the employee. In the event of a conflict between employees requesting the same date, Teal seniority shall govern.

Process

- Employees will make their selection of vacation periods (A,B,C,D....., weeks) by March 1 and vacation schedule will be posted by April 1.
- If an employee wants to use their floating holiday for either – Good Friday and Day after Thanksgiving those days must be selected at the same time as vacation. The total number of bargaining unit employees off for those two days cannot exceed the limits designated by local management. Management will make best effort to be as flexible as possible when designating these local limits.
- On-Call schedule, where applicable, will be prepared using the approved vacation and floating holiday schedules and posted by the last Sunday in April.

Supervisors may require employees to complete a Flexible Holiday Preference form at the start of each year to avoid scheduling conflicts.

The Connecticut Light and Power Company dba Eversource Energy and IBEW Locals 420 and 457

Response Specialist - Line

The purpose of this document is to outline the scope and parameters of the Response Specialist position in Connecticut as agreed to between Connecticut Light and Power dba Eversource Energy (the "Company") and IBEW Local 420 and 457 (the "Union"), collectively referred to herein as the "Parties." In accordance with collective bargaining agreements between the Parties dated June 1, **2019** (the "CBAs"), both Parties agree as follows.

Job Duties and Description
Attachment "A"

Schedule:
The hours of coverage will be 24 hours daily and 7 days per week. See attachment **D**. The Company commits to maintain the schedule for **the term of the contract**. **However, the Company and Union recognize that for the 12 hour shift to work properly, RSO employees must make a good faith effort to be available to work when needs dictate. The Company shall monitor the response for both planned overtime and call outs. If the Company determines that employees are engaging in overtime abuse, the Company may cancel 12 hour shifts. Such cancellation may be limited to specific zone(s) where the overtime abuse occurs. Prior to implementing the schedule change, the Company and Union shall meet and discuss the abuse concerns and make reasonable efforts to address these issues.**

Holidays:
For the determination of Holiday hours, a Holiday will start at 06:00 hours on the actual day of the holiday and end at 06:00 hours the following day.

There will continue to be twelve (12) paid, eight (8) hour holidays per year. When an employee works a holiday, they will receive eight (8) hours of holiday pay at basic straight time rate and the hours worked will be paid at the applicable rates. Lieu days will continue to be administered per the contract except that in addition to eight (8) hours of holiday pay, **for any shifts greater than eight (8) hours**, **the employee shall elect to use either vacation pay, lieu time, if available, or up to twenty-four (24) hours of "no pay" per calendar year for the remaining hours of the shift**.

Number of positions for the staffing of the Response Specialist:
Range of 81-100 positions **for the initial staffing**. See Attachment **C**. **Subsequent to that, the Company can determine the staffing levels with the maximum number of positions for the organization set at 126. The Company can force qualified employees up to a maximum of 126 positions.**

Backfilling shift vacancies within the Response Specialist organization:
The Company will determine the need to backfill open shifts and positions based on operational requirements and will be done from within the respective zones. Incremental backfills; will be attempted to be filled from within the zone, if unsuccessful, the company will then utilize the entire Response Specialist roster as appropriate. Scheduled backfills; will be posted and attempted to be filled in the respective zone. All vacancies will be filled in accordance with the overtime list. See Attachment **E**. **If the Company adds additional resources equally in each zone due to weather related events, the Company retains the right to move resources across zones based on operational needs regardless if the Response Specialists are on straight time or overtime.**

Reporting location(s):
Closest district to home within the zone **or a mutually agreed upon location within the zone. However, the Company reserves the right to change the mutually agreed upon reporting location. Such change shall either be to another mutually agreed upon location or the closest district to home within the zone.** See Attachment **C***.

Coverage area:
The area that is covered by The Connecticut Light And Power Company.

Supervisory Direction:
Response Specialists will be directed through the Systems Operation Center ("SOC") **and RSO Management**. The **RSO** organization will consist of a Director, Managers, and **RSO**/Field Supervision. The Field Supervisor will provide the day-to-day direction for the Response Specialists. When necessary, the local AWC Supervisor- Electric Field Operations will also provide direction, in coordination with **RSO** management.

Mutual Aid:
Response Specialists will not be eligible to perform mutual aid assignments off Company property. Company property is defined as any and all property owned by Eversource.

Storm Assignments:
Local AWC personnel, System Projects and Transmission Line will be asked and required prior to Response Specialist being offered to perform Storm assignments on Company property outside of the Connecticut Light and Power service territory.

Training:
The Response Specialist position requires a minimum qualification of Line Mechanic.
The Company will schedule all required ongoing training and updates. **Ongoing training and updates will be furnished to the Business Manager on a semi-annual basis.** See Attachment **F**.

Response Specialist Initial Staffing:
Step One
Response Specialist positions will be offered to and filled by the respective districts. The selection of employees will be in accordance with departmental seniority.*

Step Two
Remainder of the vacancies will be filled in accordance with the contractual provisions.

*Length of service in the Department since date of last employment by the Company shall constitute Department seniority.

Response Specialist Staffing

- **Internal Candidates** – Hiring process in accordance with contractual provisions.

- **External Candidates** – Potential candidates to be given a physical skills assessment. Successful candidates to be offered a position within the Response Specialist organization. Candidates who accept a position will receive training/orientation prior to beginning their new role. External hires will start at the minimum **RSO** rate and be held at that rate through their probationary period in accordance with the contract.

Retention
Initial incumbent qualified employees who elect to accept a position within the Response Specialist classification will be retained for a period of two (2) years from date of transfer and will not be entitled to apply for posted job openings during this period. Exceptions to this two year restriction would be promotions attained through the employee's normal sequence of progression.

The initial incumbent employees, who wish to return to their respective districts and classifications, must notify **RSO** management in writing, at least thirty days prior to their intention to leave the Response Specialist organization. However, an adequate complement of Response Specialists must be maintained to operate the Response Specialist organization. Therefore, an incumbent employee will not be released if the complement would be below a certain threshold, set forth in Attachment D. The Response Specialist reclassified to their previous classification will not be required to accept upgrade to the Response Specialist for a period of two (2) years.

All others, subsequent to the initial posting, once qualified as a Response Specialist, will remain in the position for a minimum of three (3) years and will not be entitled to apply for posted job openings during this period.

The junior qualified employee(s) by Teal Book seniority in the affected Local 420 or Local 457 territory will be required to accept any unfilled vacancies in the Response Specialist classification. Incumbent employees forced into the Response Specialist position will be retained for a minimum of **eighteen (18) months. An employee who is forced into the Response Specialist classification for a minimum of eighteen (18) months will not be required to accept upgrade to the Response Specialist classification for a period of one (1) year starting from the date of being released from the organization. Exceptions to this eighteen (18) month retention period restriction would be promotions attained through the employee's normal sequence of progression.**

Seniority:
For the purposes of Article V, Section 2 (a) only, Response Specialist and Line Mechanic will be considered as the same classification.

In addition, **during the initial two (2) year startup period,** Response Specialists formerly classified as a Lead or Chief Line Mechanic will be treated as a Lead or Chief Line Mechanic respectively for the purposes of Article V, Section 2 (a) only.

All initial incumbent employees who chose to remain in the RSO following the two (2) year startup period will have their classification seniority date adjusted to the implementation date for Zone 1.

Implementation:
Post and fill **initial** Response Specialist positions upon **June 1, 2016** contract ratification.

Upgrading:
When the Company assigns three (3) or more people to a crew, the Company will designate an employee to direct the workforce and be responsible for the crew for all hours so assigned on that day provided the assignment is for one (1) or more hours. The designated employee in charge will be paid one dollar and seventy-five cents per hour ($1.75) in addition to the employee's basic straight time hourly rate for all hours so assigned. Upgrading will normally be on a classification seniority basis.

Meals:
Any earned meals will be paid at the contractually higher rate ($20.00**). Meal time not taken shall not count as hours worked for the purposes of determining sixteen hours of work or rest time in accordance with Article VI, Sections 6 and 7.**

Rest Time:
Except in case of emergency or the case of unforeseen absence of other employees, employees shall not be required to work more than sixteen hours in any one twenty-four hour period.

The rest time window set forth in Article VI, Section 6 does not apply to Response Specialist employees. A Response Specialist must work beyond 16 hours in any 24 hour period, not including meal time not taken, in order to be allowed 8 hours off, once released, before returning to work. If this period extends into the employee's regular scheduled working hours, the employee shall lose no pay thereby.

Planned Overtime:
Planned overtime shall be defined as overtime work for which at least forty-eight hours advance notice has been given and will be assigned among employees as equally as possible. Effective June 1, 2020, the planned overtime notice will be reduced from forty-eight hours to thirty-six hours. Effective June 1, 2021, the planned overtime notice will be reduced from thirty-six hours to twenty-four hours.

If a Response Specialist accepts a planned overtime shift, the Response Specialist cannot accept a call out prior to the planned overtime shift that would preclude him or her from filling the initial planned overtime shift.

A Response Specialist cannot accept a planned overtime shift prior to his or her regular shift if taking such planned overtime will make the employee unavailable to work all of his or her regular shift.

Attachment A

Eversource Response Specialist Duties

The responsibilities will include, but not be limited to, clearing faulty and unsafe conditions, including maintaining or restoring electrical service, by temporary or permanent means to include replacing or bracing/lashing poles, securing pole tops, floating conductors, extending secondary, or as described in the below listed duties.

The below illustrative duties will be performed as a single-person crew or as a multi-person crew as dictated by the task and applicable work methods.

1. Clearing faulty and unsafe conditions including maintaining or restoring electrical service by temporary or permanent means;
2. Operate primary* and secondary fault locating equipment on URD systems in order to isolate the faulted equipment and restore the customers**. This includes all URD/DB single phase systems and three phase radials;**
3. Operate switching and control devices on both the overhead and underground systems (pad mounted equipment). See Attachment **B** for further information;
4. Connect, disconnect, and operate portable transformers and temporary primary jumpers under emergency or urgent conditions;
5. Replace failed transformers with assistance of other qualified employee(s);
6. Replace damaged or faulty equipment during the initial response;
7. Perform street light repair work including replacing defective bulbs, photocells, and heads along with new installations (up to a 250 watt head and under a 12' bracket);
8. Install and remove minimal cover up as needed. This may include primary conductors;
9. Perform secondary overhead and URD service connections associated with connecting customers;
10. Perform overhead distribution system line patrols;
11. Perform URD and overhead equipment inspections;
12. Make current and voltage measurements, as required;
13. Determine and record causes of failures and communicate the findings to the SOC;
14. Communicate the status of outages to the SOC – on-site, restoration projections, ETRs, etc.;
15. Investigate customer concerns, communicate with customer when needed to provide information;
16. Investigate and correct complaints of interference to telephone, radio, or television reception;
17. Document and submit required records and reports associated with trouble, line patrols, equipment inspections, and other related work;
18. Utilize mobile data terminals as **instructed**;
19. Operate GOABs that Line Mechanics operate (excluding GOABs with keyed interlock systems), reclosers and cutouts when needed, as well as other equipment that Line Mechanics currently operate;
20. **External substation inspections.**

Attachment B

There are two types of pad mounted switchgear in CT. The first is air insulated PMH Gear (Type 3, 5, 8, 9, 11, 12, and 13). The second is SF6 insulated (Vista, Trayer). In addition, there are wall mounted (Elastimold) located in customer vaults (primarily in Stamford and Hartford) that are tied into the UG system. Response Specialists would not normally respond to these outages. However, the Company may train them if they were to be utilized to restore customers while UG personnel are responding to an event.

There are many more types of gear in the industry. Therefore, this is for discussion purposes only and not meant to be all-inclusive.

Response Specialist **Initial/Annual** Training Subjects

- Work site protection
- Auto transformer installation and removal
- Customer interaction
- ETR estimates/importance
- Stray voltage initial response
- Computer/tablet training
- Transformer connections, standard and unusual
- Ferroresonance
- Capacitor operations
- Regulator operations
- Direct buried & grounding
- DB trailer set up
- Von DB Primary fault finding
- Safe excavation practices
- Spitfire and Pin Pointer secondary fault finding
- PMH Switch gear and S&C fuse handling
- Recloser and loop scheme operations

- Environmental training
    - Oil spill containment, transport and reporting
    - Endangered species nest removal
- Outage prevention – best practices (upgrading the event to prevent future outages)
- Standard SERT subjects will continue to be scheduled through the training department

*This list of subjects may not be all inclusive and could expand as business needs demand.

Memorandum of Understanding
between
Eversource Energy Connecticut
and
IBEW Locals 420 and 457
Reliability Shift Electrician

The purpose of this document is to outline the scope and parameters of the **Reliability Shift Electrician** position in Connecticut as agreed to between Eversource Energy (the "Company") and IBEW Local 420 and 457 (the "Union"), collectively referred to herein as the "Parties." In accordance with collective bargaining agreements between the Parties dated June 1, **2019** (the "CBAs"), both Parties agree as follows.

Job Duties and Description:

Attachment "A"

Schedule:

The Company reserves the right to set the schedule. The hours of coverage will be 24 hours daily and 7 days per week. **The Company is committed to have the attached schedule (Attachment D) for the RSE Organization for the term of the Contract. However, the Company and Union recognize that for this schedule to work properly, RSE employees must make a good faith effort to be available to work when needs dictate. The Company shall monitor the response for both planned overtime and call outs. If the Company determines that employees are engaging in overtime abuse, the Company may change the schedule accordingly. Prior to implementing the schedule change, the Company and Union shall meet and discuss the abuse concerns and make reasonable efforts to address these issues.**

Holidays:

There will continue to be twelve (12) paid, eight (8) hour holidays per year. When an employee works a holiday, they will receive eight (8) hours of holiday pay at basic straight time rate and the hours worked will be paid at the applicable rates. Lieu days will continue to be administered per the contract except that in addition to eight (8) hours of holiday pay, **for shifts greater than eight hours, the employee shall use vacation time, or no pay code for the remaining hours of the shift**.

Number of positions for staffing of the Reliability Shift Electrician organization:

36 positions will be initially staffed upon ratification of this contract. Future staffing levels will be determined by the Company. Forcing will be limited to maintain the initial staff of 36 positions for the term of the contract.

Backfilling shift vacancies within the Reliability Shift Electrician organization:

The Company will determine the need to backfill open shifts and positions based on operational requirements and will be done from within the respective **division**. Incremental backfills; will be attempted to be filled from within the division; if unsuccessful, the Company will then utilize the entire **Reliability Shift** Electrician roster as appropriate. Scheduled backfills; will be posted and attempted to be filled in the respective **division**. All vacancies will be filled in accordance with the overtime list. **The Company reserves the right to fill any portion of a shift. The Company retains the right to move resources across divisions based on operational needs regardless if the RSE are on straight time or overtime.**

Reporting location(s):

Reliability Shift Electricians will report to a show up site within the zones listed in Attachment B. The Company will determine the number of employees required to report within each zone. Priority on reporting zone will be based on classification seniority by division.

Coverage area:

The area that is covered by The Connecticut Light and Power Company.

Supervisory Direction:

Reliability Shift Electricians will be directed through **Substation Operations Supervision and** the Systems Operation Center ("SOC"). The Supervisor will provide the day-to-day direction for the **Reliability Shift** Electrician. **On a limited basis**, the local AWC Supervisor- Electric Field Operations will also provide direction, in coordination with **Substation Operations** management.

Mutual Aid:

Reliability Shift Electricians will not be eligible to perform mutual aid assignments off Company property. Company property is defined as any and all property owned by Eversource.

Storm Assignments:

Local AWC personnel, General Operating and Central Maintenance will be asked and required prior to **Reliability Shift** Electricians being offered to perform storm assignments on Company property outside of the Connecticut Light and Power service territory.

Training:

The **Reliability Shift** Electrician position requires a minimum qualification of Electrician. The Company will schedule all required ongoing training and updates. **Ongoing training and updates will be furnished to the Business Manager when requested.**

Electrician Helpers hired into the RSE organization will be placed in to the TMP, evaluated and trained to become fully qualified.

On Call:

On-Call will be paid in accordance to Article VI, Section 9 of the Teal book.

Reliability Shift Electrician Staffing:

Internal Candidates – Hiring process in accordance with contractual provisions. **Reliability Shift Electrician positions will be posted by zone and filled by Teal book seniority with Electricians qualified to be RSE. If one or more vacancies are not filled through the posting process, the junior qualified Electrician(s) by Teal Book seniority within the affected division will be required to accept any remaining vacancies not exceeding the initial 36 positions. The Reliability Shift Electrician(s) reclassified to their previous classification will not be required to accept upgrade to the Reliability Shift Electrician for a grace period of one (1) year.**

External Candidates – External candidates are defined as applicants external to the Company or not in the Substation Operations Electricians organization. Successful candidates will be offered a position within the Reliability Shift Electrician organization. Candidates who accept a position will receive training/orientation prior to beginning their new role. **External hires will be offered a position at an appropriate step in the TMP or depending on experience, be offered the** minimum **qualified Electrician** rate and be held at that rate through their probationary period in accordance with the contract**. Candidates will receive the maximum qualified electrician rate upon completion of six months at the minimum electrician rate and have demonstrated competence. The RSE rate will be applicable once the employee is fully performing the responsibilities of a Reliability Shift Electrician. External candidates hired into the TMP progression will be paid at the applicable rate in accordance with the TMP.**

Retention:

During the initial posting, following the ratification of the June 2019 contract, incumbent qualified employees who elect to accept a position within the Reliability Shift Electrician organization will be retained for a period of two (2) years from date of transfer and will not be entitled to apply for posted job openings **or change divisions during the retention period. The two (2) year retention will begin once initial training period is completed and the employee enters the shift rotation. The RSE rate will be applicable once the employee enters the shift rotation.**

All others, subsequent to the initial posting, once qualified as a **Reliability Shift Electrician,** will remain in the position for a minimum of **two (2) years** and will not be entitled to apply for posted job openings **or change divisions during this retention period.**

Incumbent qualified employees forced into the Reliability Shift Electrician position will be retained for a minimum of 18 months. If there are more than 36 fully qualified RSE in the shift rotation, the forced employee will have the option to be released; however, the

forced employee relinquishes the one year grace period and is eligible to be forced back into the RSE for the full 18 month retention period. The 18 month retention will begin once initial training period is completed and the employee enters the shift rotation. The RSE rate will be applicable on the date of transfer into the RSE organization. Promotions attained through the employee's normal sequence of progression in their home district will be granted; however, the employee must fulfill the 18 month retention. If an employee elects to remain in the organization after 18 month retention period the employee forfeits their rights to promotion in their respective district. After 1 year as a full RSE, an Electrician who wishes to return to their respective district and classification must notify the Substation Operations Manager with a binding letter of their intention to leave the RSE organization. The Company will release the employee after six months from the date the letter of intent was accepted as long as 16 qualified RSE are in the division. An adequate complement of **Reliability Shift Electricians** must be maintained to operate the **RSE** organization. Therefore, an incumbent employee will not be released **until a fully qualified replacement is placed on the RSE schedule. No more than two RSE will be allowed to leave at one time per division at the end of the retention period. Forced employees are allowed to post for positions outside Substation Operations. Forced employee(s) will be allowed to post for Substation Operations positions after their letter of intent to leave is accepted; however, they will complete the 18-month retention and the Company will hold positions they are offered and have accepted.**

Seniority:

For the purposes of Article V, Section 2 (a) only, **Reliability Shift** Electrician and Electrician will be considered as the same classification. In addition, **Reliability Shift** Electrician formerly classified as a Lead or Chief Electrician will be treated as a Lead or Chief Electrician respectively for the purposes of Article V, Section 2 (a) only.

Meals:

Any earned meals will be paid at the contractually higher rate ($20.00). **Meal time not taken shall not count as hours worked for the purposes of determining sixteen hours of work or rest time in accordance with Article VI, Sections 6 and 7.**

Rest Time:

Except in case of emergency or the case of unforeseen absence of other employees, RSE employees shall not be required to work more than sixteen hours in any one twenty-four hour period.

The rest time window set forth in Article VI, Section 6 does not apply to Reliability Shift Electrician employees. A Reliability Shift Electrician must work more than 16 hours in a 24 hour period, not including meal time not taken, in order to be allowed 8 hours off, once released, before returning to work. If this period extends into the employee's regular scheduled working hours, the employee shall lose no pay thereby.

Planned Overtime:

If a Reliability Shift Electrician accepts a planned overtime assignment, the Reliability Shift Electrician cannot accept a call out prior to the planned overtime shift that would preclude him or her from filling the initial planned overtime assignment.

A Reliability Shift Electrician cannot accept a planned overtime assignment prior to his or her regular shift if taking such planned overtime will make the employee unavailable to work all of his or her regular shift.

Attachment A

Eversource Reliability Shift Electrician Duties

Under general supervision, inspects, maintains repairs and operates substations, and does such similar work in the electric system, performing such duties as:

Performing the duties included in the Time Merit Progression Program for Electrician

Essential Functions:

- Repairing and maintaining circuit breakers, switchgear, transformers, and similar equipment, including the replacing of sub-assemblies;
- Installing circuit breakers, switchgear, transformers, and similar equipment as directed;
- Making all electrical tests using standard test equipment, including but not limited to carrier and transfer tripping equipment testing and battery testing;
- Performing switching operation involving any voltage;
- Is thoroughly familiar with switching and tagging procedures, switchboard facilities, and related apparatus in area of normal assignment;
- Operating substations and network equipment;
- Checking, inspecting, and testing underground system and maintaining equipment;
- Reading and interpreting wiring diagrams, blue prints, etc.;
- Making repairs to tools and work equipment;
- Recognizing, correcting if possible, and reporting abnormal conditions that develop during the progress of the work;
- Obtaining miscellaneous items from suppliers;
- Repairs or replaces insulators, conductors, transformers, fuses, disconnects and lighting arresters, etc., associated with normal duties;
- Makes standard types of transformer connection;
- Assembles, disassembles, and maintains major rotating equipment such as motors, generators, etc., as required by normal assignment;
- Works on live electrical conductors using proper tools and protective equipment;
- Installs and repairs switchboard wiring and controls, major devices and equipment, complicated wiring, relaying and control circuits, using plans and drawings as required by normal assignment;

- Tests insulators on substation structures Electrical Insulation Systems, Electrical Equipment Operating Parameters, and Distribution System Protective Relays and Devices as required by normal assignment;
- Assembles, disassembles, and rebuilds power circuit breakers, voltage regulators, power transformers, distribution transformers, etc., as required within normal assignment;
- Tests with meggers, Ohmmeters, voltmeters, ammeters, metester and similar instruments and interprets results;
- Testing Contact Resistance for breakers and connections using a DLRO (Ductor);
- Makes electrical connections on copper or aluminum cable and bus, or between dissimilar materials;
- Installs all types of electrical bus work as required by normal assignment;
- Performs routine inspection, maintenance and adjustments on electrical equipment following manufacturer's instructions and/or Company procedures;
- Secondary and primary cable testing;
- Recloser programming and network testing;
- Makes simple electrical calculations and measurements;
- Bend and installs conduit;
- Performs simple rigging;
- Has a working knowledge of insulating oils and SF6 gas applications and uses, including storage, clean-up, filtering and testing;
- Cleans and paints structures, equipment, and devices;
- Operates motor vehicles safely in the performance of required duties;
- Operating a motor vehicle and associated equipment;
- Performs work in clean and neat manner and exercises care to prevent damage to Company or customer's property;
- Provide substation escort for non-qualified individuals;
- Keeping the substation buildings and grounds in good order, including minor repairs and snow removal;
- Works either indoors or outdoors as required, and is subject to overtime work;
- May have storm restoration and emergency assignments.

This Agreement, effective June 1, **2022**, is between Eversource, hereinafter referred to as the Company, as the Successor to The Connecticut Light and Power Company, The Hartford Electric Light Company and Locals 420 and 457 of the International Brotherhood of Electrical Workers, hereinafter jointly referred to as the Union and shall be final and binding on any and all successors and assigns of the employer, whether by sale, transfer, merger, acquisition, consolidation, or otherwise. The employer shall make it a condition of transfer that any such successors or assigns shall be bound by the terms of this Agreement.

ARTICLE I

Torrington
General

Section 1. The Company recognizes Local 420 as the exclusive collective bargaining representative with respect to rates of pay, hours of employment and other conditions of employment for employees in the former Torrington bargaining unit of The Hartford Electric Light Company who were on the eligibility list for voting in the NLRB election in case number 1-RC-5243 and any employee hired or permanently transferred to replace any such employee and any additional personnel covered by the provisions of Section 2 hereof.

Section 2. If (a) additional personnel are hired for, or Company personnel are transferred permanently to, classifications included in the bargaining unit description in case number 1-RC-5243 or classifications added to the coverage of this Agreement, and (b) such personnel are assigned to the same reporting headquarters as any employee on said eligibility list or a reporting headquarters within the Towns of Torrington, New Hartford, Burlington, Thomaston or Plymouth, Connecticut, they shall become members of the bargaining unit and shall be added to the group referred to in Section 1 hereof, as of their date of hire, if newly hired, or as of their date of transfer, if permanently transferred. Nothing in this Article shall be deemed to require the hiring or transfer of personnel.

Section 3. An employee covered by Section 1 above who is permanently transferred to any reporting headquarters of the Company which was not the reporting headquarters of any of the employees on said eligibility list or to any position not included in the classifications set forth in Appendix A of this Agreement, shall cease to be a member of the bargaining unit as of the date of such transfer, but such employee shall retain seniority rights in the event of layoff for one year as provided in Section 4 of Article V. If a currently recognized reporting headquarters within the Torrington Bargaining Unit is relocated in the Towns of Torrington, New Hartford, Burlington, Thomaston or Plymouth, Connecticut, recognition herein will extend to all employees at such reporting headquarters with respect to job classifications appearing in Appendix A, Nomenclature, or in any other classification added to the Unit by agreement of the parties.

Section 4. By way of example as to the application of this Article, employees now or hereafter covered by Section 1 hereof who are permanently transferred to any service center located outside the above-mentioned town will cease to be members of the bargaining unit in accordance with Section 3 hereof. Similarly, a meter shop repairman now covered by Section 1 hereof who is permanently transferred to the Company's meter shop in Hartford where it is contemplated to centralize meter repair work, will cease to be a member of the bargaining unit. There shall be no personnel added to the bargaining unit in connection with either such change in the Company's operations. By way of further example, in the event of a change in the reporting headquarters in Torrington, from one location to another within the Towns of Torrington, New Hartford, Burlington, Thomaston or Plymouth, Connecticut, the employees permanently transferred from their present reporting headquarters in Torrington to such new reporting headquarters will not result in such employees ceasing to be members of the bargaining unit.

Section 5. In the event of any dispute between the parties as to whether an individual is a member of the bargaining unit or not, such dispute shall be handled under the grievance procedure of this Agreement except that if the grievance shall not have been satisfactorily disposed of after the meeting with the Grievance Committee under Section 4 of Article IV of this

Agreement, instead of proceeding to arbitration as therein provided, the dispute shall be resolved by joint submission of the bargaining unit issue to the National Labor Relations Board through the filing of a Motion for Clarification on the Certification.

ARTICLE I
Stamford
General

The Company recognizes Local 420, IBEW as the exclusive representative of all employees in the former Stamford bargaining unit of The Hartford Electric Light Company, as were certified by proper authorities for the purpose of collective bargaining in respect to rates of pay, wages, hours of employment or other conditions of employment.

ARTICLE I
Stamford Meter Readers
General

ARTICLE I
New London
General

The Company recognizes Local 457, IBEW as the exclusive representative of all employees in the former New London bargaining unit of The Hartford Electric Light Company, as were certified by proper authorities for the purpose of collective bargaining in respect to rates of pay, wages, hours of employment or other conditions of employment.

Middletown

This Agreement, dated as of June 1, 2016, is between The Connecticut Light and Power Company, hereinafter referred to as the Company, as the Successor to The Hartford Electric Light Company and Local 457 of the International Brotherhood of Electrical Workers, AFL-CIO, hereinafter referred to as the Union, in respect to the bargaining unit certified by the National Labor Relations Board on April 2, 1959, in case number 1-RC-5240, and which is described under Article I below and hereafter referred to as the "Middletown Bargaining Unit."

ARTICLE I
Middletown
General

Section 1. The Company recognizes the Union as the exclusive collective bargaining representative of those employees who were on the eligibility list for voting in the NLRB election in case number 1-RC-5240 and any employee hired or permanently transferred to replace any such employee and any additional personnel covered by the provisions of Section 2 hereof.

Section 2. If (a) additional personnel are hired for, or Company personnel are transferred permanently to, classifications included in the bargaining unit description in case number 1-RC-5240 or classifications added to the coverage of this Agreement, and (b) such personnel are assigned to the same reporting headquarters as any employee on said eligibility list or a reporting headquarters within the Towns of Middletown, Middlefield, Durham, Haddam, Portland, or Cromwell, Connecticut, they shall become members of the bargaining unit and shall be added to the group referred to in Section 1 hereof, as of their date of hire, if newly hired, or

as of their date of transfer, if permanently transferred. Nothing in this Article shall be deemed to require the hiring or transfer of personnel.

Section 3. An employee covered by Section 1 above who is permanently transferred to any reporting headquarters of the Company which was not the reporting headquarters of any of the employees on said eligibility list or to any position not included in the classifications set forth in Article V of this Agreement, shall cease to be a member of the bargaining unit as of the date of such transfer, but such employee shall retain seniority rights in the event of layoff for one year as provided in Section 4 of Article V. It is understood that the designation of a new or different reporting headquarters within the Towns of Middletown, Middlefield, Durham, Haddam, Portland, or Cromwell, for any of the employees on said eligibility list shall not be deemed a reporting headquarters which was not the headquarters of any of the employees on said eligibility list.

Section 4. By way of example as to the application of this Article, employees now or hereafter covered by Section 1 hereof who are permanently transferred to any service center located outside the above-mentioned towns will cease to be members of the bargaining unit in accordance with Section 3 hereof. Similarly, a meter shop repairman now covered by Section 1 hereof who is permanently transferred to the Company's meter shop in Hartford where it is contemplated to centralize meter repair work, will cease to be a member of the bargaining unit. There shall be no personnel added to the bargaining unit in connection with either such change in the Company's operations. By way of further example in the event of a change in the reporting headquarters in Middletown, from one location to another within the Towns of Middletown, Middlefield, Durham, Haddam, Portland, or Cromwell, the employees permanently transferred from their present reporting headquarters in Middletown to such new reporting headquarters will not result in such employees ceasing to be members of the bargaining unit.

Section 5. In the event of any dispute between the parties as to whether an individual is a member of the bargaining unit or not, such dispute shall be handled under the grievance procedure of this Agreement, except that if the grievance shall not have been satisfactorily disposed of after the meeting with the Grievance Committee under Section 4 of Article IV of this Agreement, instead of proceeding to arbitration as therein provided, the dispute shall be resolved by joint submission of the bargaining unit issue to the National Labor Relations Board through the filing of a Motion for Clarification on the Certification.

ARTICLE I
Simsbury

The Company recognizes Local 420 as the sole collective bargaining representative with respect to wages, hours of employment, and other conditions of employment for those employees who were on the eligibility list for voting in the NLRB election in case number 34-RC-1465, 34-RC-1486 and 34-RC-1561, and any employee hired or permanently transferred to replace any such employee and any additional personnel hired into classifications included in the bargaining unit description.

ARTICLE I
Hartford and Windsor

The Company recognizes Local 457 as the sole collective bargaining representative with respect to wages, hours of employment, and other conditions of employment for those employees who were on the eligibility list for voting in the NLRB election in case number

34-RC-1485 and 34-RC-1560, and any employee hired or permanently transferred to replace any such employee and any additional personnel hired into classifications included in the bargaining unit description.

ARTICLE I
Madison
General

The Company recognizes Local 457, IBEW as the sole collective bargaining representative with respect to wages, hours of employment, and other conditions of employment for those employees in the Madison Area Work Center and any employee hired or permanently transferred to replace any such employee and any additional personnel hired into classifications included in the bargaining unit description.

Recognition is granted pursuant to the Stipulation of Representation dated October 11, 2016 (case number 01-RC-185500).

Definition of an employee

1. The word "employee" as used in this Agreement refers only to regular employees in the bargaining unit. Regular employees are employees hired on a full-time or part-time basis for continuing nontemporary work in an established job classification.

2. A temporary employee is one hired for a special project of limited duration not to exceed twelve (12) months, unless a longer period is agreed to by the Company and the Union. Employees changed from temporary to regular employee status shall have their Teal Book Seniority count from the first date of their most recent employment as a temporary employee. Any time served as a temporary employee shall be considered as a part of the probationary time required.

ARTICLE I
Engineering Designer and Distribution Design Engineer Units

The Company recognizes the Union as the sole collective bargaining representative with respect to wages, hours, and other conditions of employment for all full-time and regular part-time senior circuit owners, circuit owners and large and complex construction engineers, senior engineers, assistant engineers, associate engineers, engineering technologists, associate engineering technologists, senior engineering technologists, engineering specialists, and senior field technicians, employed by Connecticut Light & Power Company throughout the State of Connecticut, excluding guards, clerical and confidential employees, and supervisors as defined in the Act. Recognition is granted pursuant to the Certificate of Representative of the National Labor Relations Board in case number 01-RC-112451 dated December 13, 2013.

ARTICLE I
Field Communications Unit

The Company recognizes the Union as the sole collective bargaining representative with respect to wages, hours, and other conditions of employment for all full-time and regular part-time Test Technicians, Test Specialists A, Test Specialists B, and Senior Test Specialists in Distribution Automation and Substation Automation employed by Connecticut Light & Power Company at its Berlin, Connecticut area facility, excluding all other employees, guards, professional employees, and supervisors as defined in the Act. Recognition is granted pursuant to the Certificate of Representative of the National Labor Relations Board in case number 01-RC-231775 dated December 31, 2018.

ARTICLE I
Meter Reading Support Unit

The Company recognizes the Union as the sole collective bargaining representative with respect to wages, hours, and other conditions of employment for all full-time and regular part-time Rep A Mobile Meter Reading employees employed by Connecticut Light & Power Company at its Cheshire and Hartford, Connecticut area facilities, excluding all other employees, office clerical employees, and all guards, professional employees, and supervisors as defined in the Act. Recognition is granted pursuant to the Certificate of Representative of the National Labor Relations Board in case number 01-RC-234774 dated February 20, 2019.

ARTICLE IA
General

Section 1. The Union agrees that its members who are employees of the Company will individually and collectively perform efficient work and service, and that they will avoid and discourage waste of materials, time and manpower, and that they will use their influence and best efforts to protect the property of the Company and its interests and to prevent loss of tools and materials, and that they will cooperate with the Company in promoting and advancing the welfare of the Company and the service at all times.

Section 2. Employees who were members of the Union in Stamford on June 21, 1968, in New London on May 22, 1968, in Torrington and Middletown on July 1, 1976, or who later become members, will as a condition of employment be required to maintain their membership for the duration of this Agreement.

(a) Employees hired or transferred into the Bargaining Unit in Stamford after June 21, 1968, in New London after May 22, 1968, in Torrington and Middletown after July 1, 1976 will be required as a condition of employment to join or make application to join the Union thirty days from their date of employment or transfer or thirty days after the date this Agreement is executed, whichever is later.

(b) Stamford employees on June 21, 1968, New London employees on May 22, 1968 or Torrington and Middletown employees on July 1, 1976 who were not members of the Union in their respective areas are exempt from the provisions of Article II, Section 3 above.

(c) If the Union refuses to accept as a member or refuses to continue the membership of any employee for any reasons other than the failure to pay or tender payment of required initiation fees and periodic dues, the employee shall be exempt from the provisions of Article II, Section 3 above. It shall be the responsibility of the Union to solicit the membership of employees who are required to join the Union under Article II, Section 3. Should the Union fail to solicit the membership of an employee within the time period prescribed in Article II, Section 3, that employee shall be exempt from the provisions of Article II, Section 3 until the first day of the calendar month within which the employee's membership is first solicited by the Union.

(d) Should an employee fail or refuse to join the Union or maintain membership therein as hereinbefore provided, the Union may request the Company to discharge such employee. The request shall be submitted in writing to the Director-Labor Relations. Two weeks from the date of receipt of the request, unless the Company has notified the Union that the matter is in dispute, the employee will be discharged. If during the two week period the employee complies with the Union membership provisions of this Article, the Company will not be obliged to discharge the employee.

(e) If a dispute arises under Article II, Section 3 hereof concerning the discharge of an employee, the Director-Labor Relations and the Business Manager of the Union shall ascertain the facts and endeavor to settle the dispute. Pending settlement of the dispute, the Company will not suspend or discharge the employee concerned. If the dispute is not settled within thirty calendar days, (subject to extension by mutual agreement), from date of receipt of the Union's written request for discharge as provided in Article II, Section 3 hereof, either party may, within the next ten calendar days following the thirty calendar day period, submit the dispute to Arbitration for final settlement as provided in Article IV.

Section 3. Each new employee shall upon the commencement of employment be given a copy of the collective bargaining Agreement, informed that the Company has recognized the local Union as the exclusive bargaining representative of all employees in the bargaining unit,

and introduced to the Union steward or other Union official employed in the same department or unit.

ARTICLE II
Recognition And Union Membership

Section 1. Recognition of Union

1. (a) The Company recognizes the Union as the exclusive bargaining agent for all employees in job classifications listed in Appendix "A" of this Agreement.

1. (b) The Company and Union agree to continue their cooperative efforts to promote safety, efficiency and harmony among all the employees and to promote and advance the welfare of the Company and the service at all times.

The Union agrees that its members, who are employees of the Company, will individually and collectively continue to avoid and discourage waste of materials, time, and manpower, and that they will use their influence and best efforts to protect the property of the Company.

1. (c) Each Local Union shall notify the Company in writing of the identity of its elected and appointed representatives and, in the event of a change of any representative, shall notify the Company of such change promptly. Notices to the Company under this provision shall be directed to the Director - Labor Relations.

Section 2. Exclusive Bargaining Agent for New Job Classifications

If at any time during the term of this Agreement, or any renewals or extensions hereof, the Company shall recognize the Union as the exclusive bargaining agent of the employees in any job classification in addition to those specified in Section 1.(a) of this Article, all of the provisions of this Agreement shall become applicable to the employees in such job classification as though such job classification had been originally designated herein, except that the rates of pay applicable to such job classification shall be such as may be agreed upon between the Company and the Union.

Section 3. Union Membership Requirements

The following provisions will apply to employees in job classifications covered by this Agreement:

3. (a) **Where permitted by applicable law,** employees who are members of the Union or its predecessor Union on June 1, 2009, or who later become members, will as a condition of employment be required to maintain their membership for the duration of this Agreement.

3. (b) **Where permitted by applicable law,** employees hired or transferred into the bargaining unit will be required as a condition of employment to join or make application to join the Union thirty days from their date of employment or transfer or thirty days after the date this Agreement is executed, whichever is later. Employees hired for temporary summer

assignment are excluded from this requirement for an additional sixty-day period in that summer and in any subsequent summers of temporary employment from their date of employment.

3.(c) If the Union refuses to accept as a member or refuses to continue the membership of any employee for any reasons other than the failure to pay or tender payment of uniformly required initiation fees and periodic dues, the employee shall be exempt from the provisions of (a) and (b) above. It shall be the responsibility of the Union to solicit the membership of employees who are required to join the Union under Section 3.(b). Should the Union fail to solicit the membership of an employee within the time period prescribed in (b), that employee shall be exempt from the provisions of (b) until the first day of the calendar month within which the employee's membership is first solicited by the Union.

3.(d) **Where permitted by applicable law,** should an employee fail or refuse to join the Union or maintain membership therein as hereinbefore provided, the Union may request the Company to discharge such employee. The request shall be submitted in writing to the Director-Labor Relations. Two weeks from the date of receipt of the request, unless the Company has notified the Union that the matter is in dispute, the employee will be discharged, provided that, if during the two week period the employee complies with the Union membership provisions of this Section 3., the Company will not be obliged to discharge the employee.

3.(e) If a dispute arises under Section 3.(d) hereof concerning the discharge of an employee, the Director-Labor Relations and the respective Business Manager of the Union shall ascertain the facts and endeavor to settle the dispute. Pending settlement of the dispute, the Company will not suspend or discharge the employee concerned. If the dispute is not settled within thirty calendar days, (subject to extension by mutual agreement), from date of receipt of the Union's written request for discharge as provided in Section 3.(d) hereof, either party may, within the next ten calendar days following the thirty calendar day period, submit the dispute to Arbitration for final settlement as provided in Article IV.

Section 4. Union Dues and Initiation Fees

4.(a) Each Local Union shall notify the Company in writing of its required amounts of membership initiation fees and monthly dues. In the event such fees or dues are to be changed during the term of this Agreement, the Local Union concerned shall give the Company written notice in advance of such change. Notices to the Company under this provision shall be directed to the Director-Labor Relations.

4.(b) Upon receipt of individual written authorization and assignment from employees in job classifications listed in Appendix "A" the Company will make a single deduction for the required initiation fee and in addition will deduct required monthly Union dues from the employees' wages on a pay period basis and remit monthly to the Local Union Officers designated in writing by each Local Union. Authorizations shall be submitted in the form and language shown in Appendix **"**B**"** attached hereto and made a part of this Agreement. If an employee is transferred out of the bargaining unit, the employee's authorization for the payroll deduction of Union dues will automatically become void at the end of the calendar month within which the employee's transfer is effective.

4.(c) The Company will deduct from the wages of each employee on a pay period basis from whom it receives written authorization, voluntary contributions to the Union's COPE fund. Such deductions shall be remitted to the financial secretary of the Union monthly, along with a list of employees and amounts so deducted.

Section 5. Nondiscrimination Clause

It is agreed that neither the Company nor the Union will discriminate against any employee in application of any of the terms of this Agreement because of race, color, religion, sex, national origin, age, ancestry, marital status, familial status, sexual orientation, disability/handicap, military status, genetic information, Vietnam era veterans, disabled veterans, and other veterans.

ARTICLE III
The Functions Of Management

In order that the Company may discharge its obligations as a public utility and furnish dependable and satisfactory service to its customers, it is mutually agreed that the Company shall exercise the functions of management, including among other things the determination of the number and the qualifications of the employees required to perform the work, the direction of the working forces, the right to hire, suspend or discharge for just cause, promote, demote, transfer, discipline and lay off employees. In exercising these rights the Company will act in accordance with the provisions of this Agreement.

ARTICLE IV
Grievances

Section 1. Weingarten

Employees have the right to have a union representative present during any investigatory interview/meeting which the employee reasonably believes may result in disciplinary action.

Section 2. Open-Door Policy

Management will discuss problems or potential problems with Business and Assistant Business Managers. In a letter to the Local Union the Company stated it has always believed in an "open-door" policy regarding its treatment of employee problems and contemplates no change in that policy. Under such a policy, an employee or an employee's representative in the person of a Union Business Manager or Assistant Business Manager is welcome to discuss problems or potential problems with management at any reasonable time.

The Company agrees with the Union that it is mutually advantageous to avoid grievances whenever possible by prompt investigation and appropriate adjustment where indicated.

Section 3. Introduction to Grievance Procedure

Any complaint made by an employee to the employee’s immediate Supervisor concerning the employee’s wages, hours or working conditions which is accompanied by a request for an answer will be considered as a grievance for the purpose of this Article. Grievances should be presented as promptly as possible following the incidents that caused them. At such times as are mutually agreeable, an aggrieved employee and, if requested by the

Business Manager of the Local concerned, an employee from within the Local area concerned, other than the aggrieved, will be allowed time to discuss grievances with management in Steps One, Two or Three without loss of pay for normal schedule work hours providing overtime replacement is not required. This same provision will apply also for a Steward, Business Manager or Assistant Business Manager if the employee wishes one to appear with the employee in Step One, or for a Business Manager or the employee's designated representative or an Assistant Business Manager in Step Two, or for a Business Manager or the employee's designated representative in Step Three.

In order that any grievance by an employee or group of employees may be promptly and satisfactorily settled, the procedure outlined below shall be followed:

Section 4. Step One

The aggrieved employee or employees in person, who may be accompanied by a Steward, Business Manager or Assistant Business Manager, shall present the grievance to the immediate Supervisor as promptly as possible following the incident which caused it. The immediate Supervisor will endeavor to settle it by giving an answer as promptly as possible and within seven calendar days of the date of presentation. If an answer is given and accepted in this Step, the grievance is to be considered closed. If an answer is not given, or is not acceptable, it may be taken to Step Two within fifteen calendar days, (subject to extension by mutual agreement), from date of presentation in this Step.

Section 5. Step Two

The Business Manager or Assistant Business Manager shall forward the grievance in writing to the Manager concerned stating its nature, specifying the provision(s) of the Agreement on which it is based and giving a brief description of the circumstances causing it. The Manager concerned or the employee's designated representative will investigate the grievance and answer it as promptly as possible. If a meeting is held in this Step, it shall be attended by the Business Manager or Assistant Business Manager who presented the grievance, the Manager concerned or the employee's designated representative, other management representatives if concerned and, at the option of either the Company or the Union, the aggrieved employee(s) shall be present. At this Step in the procedure, there also may be present either an International Representative of the Union in an advisory capacity to the Local Union, or a Representative of the Labor Relations Department of the Company, or both.

In the event a Business Manager has factual and reasonable evidence that the Company has violated a provision(s) of this Agreement and the employee(s) affected fails to present a grievance in Step One, then the Business Manager, having first notified the employee(s) affected, may initiate a grievance in this Step at any time within a period not in excess of thirty calendar days, (subject to extension by mutual agreement), from the date of the claimed violation.

The Company will furnish written answers to the Union for grievances which are concluded with adjustment in Step Two. When grievances are concluded in Step Two without adjustment, the Union will so-notify the Company in writing.

If a grievance is not settled within ten calendar days from date of receipt in this step, it may be taken to Step Three within twenty-five calendar days, (subject to extension by mutual agreement), from date of such receipt.

Section 6. Step Three

The Business Manager shall forward a copy of the written grievance identified as being in Step Three, to the Director - Labor Relations. The latter shall refer the grievance to a joint committee consisting of:

(A) three representatives appointed by the Company, and
(B) three representatives appointed by the Union, one shall be the Business Manager of the Local Union concerned, and/or the employee's designated representatives. In addition an International Representative may be present in this Step in an advisory capacity to the Local Union.

6.(a) Designee to Appear for the International Representative - An International Representative may designate an alternate representative to appear for the employee in Step Three grievance meetings with the Company, provided advance confirmation of this arrangement is set forth in letters to be exchanged by the International Vice-President of the International Brotherhood of Electrical Workers, second district, and the Director of Labor Relations, of the Company. Such letters shall confirm the status of the alternate representative, who shall be a bargaining-unit employee of the Company, as having authority to represent the International Union. The alternate representative will, at such times as are mutually convenient, be excused from the employee's normal work assignment without pay from the Company for the purpose of discussing Step Three grievances with Company representatives.

The Joint Committee shall endeavor to meet within fifteen calendar days from the date the grievance is received by the Director - Labor Relations. It shall be the duty of the Joint Committee to investigate all of the circumstances surrounding the grievance and endeavor to settle it on a factual basis, including the method and manner of complying with decision.

6.(b) Notifications Required When Grievances are Concluded - The Company will furnish written answers to the Union for grievances which are concluded with adjustment in Step Three. When grievances are concluded in Step Three without adjustment, the Union will so-notify the Company in writing.

6.(c) Filing of a Union or Company Grievance - At this Step in the grievance procedure, a "Union Grievance" or a "Company Grievance" may be initiated. Such a grievance shall consist of a claim or charge by the Union or the Company, in writing, that a specified provision of this Agreement, involving the status, rights, privileges, or duties of the Union as an organization or of the Company as management has been violated. If a "Union Grievance" is presented, it shall be forwarded in the manner specified in the first paragraph of this Step. If a "Company Grievance" is initiated, it shall be forwarded by the Director - Labor Relations to the Business Manager of the Local Union concerned and the International Representative who shall refer the grievance for settlement to a joint committee as provided in this Step.

If the grievance is not settled within thirty calendar days from the date of receipt in this Step, either party may take it to arbitration in accordance with and subject to the provisions of Article IV hereof within forty calendar days, (subject to extension by mutual agreement), from the date of receipt in this Step.

Section 7. Time Off For Grievance

Employees will be allowed necessary time off without loss of pay for attending scheduled grievance discussions with the Company at the second or third step. In addition to the time allowed above, the Assistant Business Manager or, in the employee's absence, the employee's designated representative, will, upon specific request, be allowed necessary time off to assemble data for scheduled grievance meetings.

Additional time off without pay will be allowed to not more than two representatives each from the Torrington Unit, Stamford Unit, New London Unit, Falls Village Unit, Simsbury Unit, Hartford Unit, Middletown Unit, Madison, Torrington Blue, East Hampton, Tolland, Danielson, Cheshire, Newtown, Waterbury, Greenwich, Norwalk, Berlin, Eastern Projects, Central Projects, Western Projects, General Operations, Transmission Harbor Avenue, Transmission Mattatuck Heights, Transmission Sequin Drive and two additional representative at large (upon written request by the Union) for the time required to attend state, regional, and national labor conventions.

Section 8. Grievance Committee/ Major Policy Changes

The Company and Union shall have the right to use Section 3 of this Article of the grievance procedure including arbitration, to settle any alleged violation or dispute over the interpretation or application of any provision of this Agreement. In such case, if the matter in question is one of major policy and Companywide application, and if the provisions in question are identical in all Agreements, the Grievance Committee may, by mutual consent, be increased to eight persons representing the Union and eight persons representing the Company. This clause shall not be used to circumvent the grievance procedure as provided in Section 1 hereof, which must be followed in any matter which involves individual employees.

Section 9. Failure To Pursue Or Respond

Any grievance not presented or followed up through the grievance procedure above outlined shall be deemed waived. If at any step in the grievance procedure the Company fails to give its answer within the prescribed time, the grievance will automatically proceed to the next step unless the time is extended by mutual consent.

Section 10. Precedent Setting

Where either party so states in writing in the disposition of a matter not submitted to arbitration under the grievance procedure, the acceptance of the action or disposition shall not be binding on either party as a precedent for the future on the same or related matters.

Section 11. Agreements Concerning Grievance

In the event any Agreement affecting the interpretation or application of this Agreement is reached with any local Union, a copy of such Agreement shall be sent immediately to the Business Manager of those local Unions not participating therein. In the event the Business Manager of such local Union informs the Company in writing within one month that such disposition or Agreement is not acceptable to the employee's local Union, such Agreement shall not be binding on that local Union. This does not apply to awards made as a result of arbitration which shall be binding on all local Unions.

Section 12. Processing of Discharge Grievance

The Company agrees to expedite the processing of grievances involving discharge as rapidly as possible.

Any employee who has been disciplined or discharged and who is subsequently exonerated, shall be reinstated without prejudice or loss of seniority and compensated for any loss in wages, unless the Grievance Committee or the Arbitrator determine otherwise.

Section 13. Grievance Procedure for Berlin Construction Department

Due to work assignments of employees at remote locations, there could be a delay of several days before a grievance could be presented to the supervisor. Supervisors are requested to make arrangements for prompt attention to any grievance, and Union representatives will advise bargaining-unit employees to telephone to request a meeting with the immediate supervisor when they have a grievance.

Section 14. Discipline or Discharge

14.(a) The Company shall, on the same day on which it occurs, orally advise the local Union concerned of any suspension or discharge, and if requested by the Union, the matter shall on the same day, be discussed by the proper Management representative and the Business Manager and/or Assistant Business Manager or designated representative of the local Union concerned. The Company shall advise the Union in writing of any disciplinary action or discharge, which shall only be for just cause, within three (3) working days of its occurrence, specifying the reason therefore. The Company and Union shall designate representatives in each Division who will represent them at each step of the grievance procedure, and both the Company and the Union shall have a person available within the time limits provided for steps 1 and 2 of the grievance procedure.

14.(b) The Union shall have the right to question the propriety of any such disciplinary action or discharge through the grievance procedure herein outlined, including arbitration, but any such grievance shall be filed within fifteen days after receipt by the Union of notification of the Company's action.

Section 15. Submission of Grievance; Selection of Arbitrator

If a grievance is not settled in Step Three of Article IV, and provided the grievance is a dispute involving the interpretation, application or compliance with any provision of this Agreement, either the Union or the Company may, within the time limits specified in Article IV, Step Three, submit the grievance to American Arbitration Association for arbitrator selection and hearing conducted under its rules then prevailing. The decision of the arbitrator shall be final and binding on both the Union and the Company for the duration of the Agreement.

Section 16. Payment Of Expenses For Arbitration

It is understood that for the term of this Agreement, where the original position of the Union is upheld by the Arbitrator, the Company will pay such fees charged by the Arbitrator or the American Arbitration Association for any grievance properly processed and properly referred to arbitration under the terms of Article IV.

In any other case such fees will be shared equally by the Company and the Union. In all cases, any costs incurred by either party in its own behalf, such as legal fees, stenographic costs, etc., will be paid by that party.

Section 17. Role of Arbitrator

The parties recognize the proper role of the arbitrator as one of deciding issues submitted by the parties under this Article, after a full and fair hearing, and not as being invested with any authority to participate in matters of collective bargaining.

Section 18. Agreement Changes Nonarbitrable

It is understood and agreed that proposals to add to or change this Agreement shall not be arbitrable and that no proposal to amend or terminate this Agreement may be referred to arbitration under this Article.

ARTICLE V
Seniority

Introduction

Seniority which employees accumulate is of two types:

(a) Total length of continuous time served with Local 420/ 457 legacy CL&P employees shall be known as "Teal Book Seniority."

(b) Except as modified elsewhere in this Agreement, total length of time served within a job classification shall be known as "Classification Seniority."

(c) In addition to Union seniority, an employee accrues other types of service with the Company such as credited service and service recognition as described below:

i. Credited service date is used for pension and severance calculations as well as the three year vesting period for employees on K-Vantage.

ii. Service recognition is used for vacation and sick time eligibility as well as an employee's service anniversary date.

Generally, unless there is a break in service with the Company, an employee's credited service date and service recognition date would be the same.

Definition of an Employee

The term "employee" as used in this Agreement refers only to regular employees in the bargaining unit. Regular employees are employees hired for full-time employment on continuing nontemporary work in an established job classification. During the first six months of employment each such employee will be on a probationary or trial basis. Nonregular

employees are employees hired for temporary work whose term of employment will not exceed three months in any twelve month period and whose employment does not affect the advancement of or result in the layoff of a regular employee.

In the application of seniority, as defined in paragraphs (a) and (b) above, to employees having equivalent Classification Seniority, greater Teal Book Seniority shall prevail. When Teal Book Seniority **is** equivalent, greater seniority shall prevail for the employee having the earlier birth date. The application of seniority as herein provided shall not be applied so as to conflict with any established seniority relationships existing prior to June 1, 1963.

New employees, other than temporary employees, shall be regarded as probationary until they have worked continuously for six months during which period they shall have no seniority status. Any employee who has been continuously employed during the employee's probationary period as defined above shall become a regular employee at the end of the probationary period and the employee's seniority shall start from the date of hiring. Employees hired on a temporary basis for special projects that require not more than twelve months to complete shall acquire no seniority status during such employment. If a temporary employee is retained as a regular employee, the employee's Teal Book Seniority shall start from the date of hiring and the employee's Classification Seniority shall start on the date the employee became a regular employee. Temporary employees must comply with Article II, Section 3. A regular employee shall lose the employee's seniority status if the employee resigns voluntarily or is discharged for just cause or is laid off for periods in excess of those specified in Section 4 of this Article. Where used in this Article the words "local" and "locality" describe designated areas of Company operations for which the immediate responsibility is directly assigned to an individual Manager or other in charge. Appendix **"**C**"** attached hereto shows a list of designated areas of Company operations which define "Local" seniority areas for application of the provisions of this Article.

Section 1. Promotion

1.(a) Employees will be given preference for training to qualify for promotion within the bargaining unit in descending order of Classification Seniority within normal sequences of promotion on a local departmental basis. Exceptions to such preference may be made only in (1) temporary situations where assigning a more senior employee would involve short notice change of a normal work schedule or unreasonably interfere with the conduct of a particular job assignment or (2) when a senior employee either has qualified previously for promotion or has demonstrated the employee's inability to do so and has been advised accordingly by the Company.

1.(b) When promoting an employee to fill a vacancy in a higher job classification within the bargaining unit, the Company will give first consideration to the qualifications of the employee having greatest Classification Seniority in the normal sequence of promotion on a local or departmental basis. If this employee is qualified as evidenced by the employee's skill, efficiency, knowledge, ability and acceptable performance in training, the employee will be given the promotion. If the employee having greatest Classification Seniority is not qualified, the remaining employees will likewise be considered for the promotion in the order of greatest Classification Seniority on a local or departmental basis. When no employee on a local or departmental basis is qualified, Classification Seniority will be applied secondly on a district basis, thirdly on a regional basis and fourthly on a Companywide basis.

1.(c) Vacancies in the bargaining unit, other than Helper or equivalent job classifications or classifications covered by the Time- Merit Progression Program which are to be filled by promotion will be filled within two weeks from the date of the vacancy excepting in situations when the employee who is to fill a vacancy is temporarily absent from work or requires additional time to complete necessary training. If it is determined that no vacancy exists, the Company will advise the Business Manager of the Local Union concerned in writing.

1.(d) The Company will give preference to its regular bargaining unit employees over hiring new employees when making placements in job openings within the bargaining unit. Notices of available job openings, other than those to be filled by application of any other provision(s) of this Agreement, will be posted on bulletin boards throughout the Company, and a copy will be sent to the Business Manager of each Local Union. Each bulletin board posting will be for a period of not less than seven (7) calendar days during which period interested employees may apply in writing for reassignment to the posted job opening by use of a reassignment application form provided by the Company. The Business Manager, Assistant Business Manager or Steward may submit a reassignment application in the above manner on behalf of an employee who is absent during the seven-day period by reason of vacation, short-term illness or short-term excused absence. Promptly following the end of a posting period each applicant will be notified within 15 days following the end of that posting period whether or not the employee's application has been accepted, and if rejected, the reason therefore. The Company's determinations of the qualifications of employees applying for reassignment under this Section 1.(d) will be made on the same basis as for hiring new employees. In the event two or more employees with basically equal qualifications apply for one job opening, preference for placement will be determined by greater Teal Book Seniority. If reassignment is postponed following notification of acceptance, the employee's classification seniority will be adjusted upon reassignment to the starting date of the first full week following the date of the acceptance notice.

1.(e) Regular Employees who have been transferred or reassigned prior to June 1, 1979 under Sections 2.(a) or Sections 3, 3.(a) or 3.(b) or rehired under the provisions of 4.(b) of this Article will be considered as having greater Teal Book seniority within the employee's former local seniority area for purposes of Section 1.(d).

If more than one such Employee applies for the same job posting, greater Teal Book seniority will be the determining factor. Such Employee(s) will receive this consideration only if the Employee(s) notes on the job posting application that the employee is applying under this Section of Article V. Further, the Employee(s) affected will be allowed this seniority consideration only until the employee has been selected for one job opening under these provisions. An employee selected for a job posting under this Section 1.(e) will have the employee's rate established in accordance with Section 2.(d) of this Article.

Applicants who are selected for job postings to classifications covered by Time Merit Progression Programs under this Section will be considered for reinstatement rights under the provisions of Section 3.(e) or 4.(a) of this Article for a period of up to two (2) years from the date of transfer.

1.(f)(1) **Understanding Concerning Article V, Section 1.(d)** - When an employee with one year or more of satisfactory Company service is selected to fill a posted job opening for a position that has progression steps at six month intervals, the employee will be

transferred into the new position at the second rate step. If the employee has 18 months or more of satisfactory Company service, the employee will start at the third rate step.

If additional training is required, the employee may remain at the step the employee started the employee's new position at up to one year or eighteen months whichever the case may be.

When an employee with two years or more of satisfactory Company service is selected to fill a posted job opening for a position that has progression steps at twelve month intervals, the employee will be transferred into the new position at the second rate step. If the employee has three years or more of satisfactory Company service, the employee will start at the third rate step. If an employee is within two (2) months of reaching two or three years of satisfactory Company service, the Company may consider transferring the employee into the new position at the second or third rate step. Such consideration will be made on a case by case basis. If additional training is required, the employee may remain at the step the employee started the employee's new position at up to two years or three years whichever the case may be.

If prior work experiences were directly related to the new duties, the employee may be accelerated through the pay rate steps.

1.(f)(2) Employees accepted for a job posting back to their former Local Seniority Area under Article V, Section 1(e) who have previously been transferred or reassigned under Sections 2(a), 3, 3(a) or 3(b) of Article V, will have their rates established in accordance with Article V, Section 2(d). Application of Article V, Section 2(d) under this Section 2, will be applied only to the initial job posting for which the employee was accepted back to the employee's former Local Seniority Area and also only to employees who at the time of transfer or reassignment were not offered an option to remain in their Local.

1.(g) If the Company elects to fill a Senior Distribution Design Engineer position, the position shall be posted. In selecting an applicant to fill this position, the Company will determine the most qualified candidate as evidenced through experience, demonstrated abilities and the interview process.

Section 2. Reassignment, Layoff and Demotion

If at any time Company operations require a reduction of the existing working forces, employees in the localities or departments affected will be subject to reassignment in the order of least Teal Book Seniority and in reverse sequence of job progression within the job classifications affected. The Company will reassign employees entitled to reassignment to job classifications for which they are qualified and in accordance with the procedure outlined below:

2.(a) An employee subject to reassignment under the provisions of Section 2. or displaced by the application of this Section 2.(a), may at the employee's option and to the extent the employee's Teal Book Seniority exceeds that of other employees,

(1) either displace the employee having least Teal Book Seniority in the same job classification within the district or region, or

(2) displace the employee having least Teal Book Seniority in the same job classification within the Company, or
(3) displace the employee having least Teal Book Seniority in a lower job classification within the employee's normal sequence of job progression within the locality, or
(4) displace the employee having least Teal Book Seniority within the locality.

If an employee subject to reassignment has insufficient Teal Book Seniority to exercise provisions (1) or (3), then the employee may

(5) displace the employee having least Teal Book Seniority in a lower job classification within the employee's normal sequence of job progression within the District, within the Region or within the Company, or
(6) displace the employee having least Teal Book Seniority firstly, within the District and secondly, within the Region.

If an employee subject to reassignment has insufficient Teal Book Seniority to exercise provisions (1), (2), (3), (4), (5) or (6), then

(7) the employee may displace one of the five employees having least Teal Book Seniority within the Company.

2.(b) An employee subject to reassignment under the provisions of Section 2. or displaced by the application of Section 2(a) of this Article who has insufficient Teal Book Seniority to entitle the employee to reassignment or in lieu of displacing another employee, may elect to be laid off with recall privileges as outlined in Section 4.(b) of this Article.

Prior to being presented with the employee's options, an employee subject to reassignment under the provisions of Section 2. or displaced by the application of Section 2.(a), of this Article may at the employee's option, after giving the Company at least one weeks' notification, elect to be laid off with recall privileges as outlined in Section 4.(b) of this Article.

2.(c) In the event an employee subject to reassignment does not have sufficient Teal Book Seniority to entitle the employee to job placement, the employee may be laid off with recall privileges as outlined in Section 4.(b) of this Article.

Any employee who has completed one or more years of continuous service and who is laid off because of the permanent elimination of one or more jobs shall be given an allowance of forty hours pay at the employee's straight-time hourly rate for each full year of continuous service with the Company. For any such employee who is fifty years or more of age, the above-mentioned allowance will, instead of forty hours, be sixty hours if the employee has completed at least fifteen years of continuous service, or eighty hours if the employee has completed at least twenty-five years of continuous service. Any laid off employee or employee identified to be laid off, who obtains employment with any of the system companies will not be entitled to terminal pay. Any such employee who accepts terminal pay will thereby relinquish all other rights under this Agreement and will not be eligible for recall under Section 4.(b) of this

Article. Any employee who accepts any position or who is offered a position similar to the position the employee held with the Company prior to the sale or lease, or in which the employee has had experience, the wages and benefits for which are reasonably comparable to those earned prior to such sale or lease, with this Company or with the purchaser or lessor, shall not be eligible for severance pay. An employee so affected who has reached the employee‘s fifty-fifth birthday may, in addition to severance pay, make arrangements for applicable annuity benefits under the then existing Annuity Plan.

2.(d) When Company operations require other than a temporary transfer or reassignment of employees under the provisions of Sections 2 of this Article to a job classification in which the employee is unskilled or inexperienced, the employee will be given training on the job and allowed a reasonable period of time to develop sufficient skill and ability to perform satisfactorily in the employee‘s new job classification.

An employee who is reassigned to a job classification with a lower hourly starting rate of pay than the employee‘s present hourly rate a special basic rate of pay will be established for the employee in the following manner:

A. For an employee with less than five years of continuous service:

(1) If the employee‘s present rate is greater than the maximum rate of the employee‘s new classification, the employee will be paid the maximum rate of the new classification.

(2) If the employee‘s present rate is less than the maximum rate of the employee‘s new classification, the employee will retain the employee‘s present rate in the new classification until the employee is qualified for advancement.

B. For an employee with five years but less than fifteen years of continuous service:

(3) If the employee’s present rate is greater than the maximum rate of the employee’s new classification, twenty-five percent of the difference between the employee’s basic rate immediately preceding reassignment and the maximum basic rate of the lower job classification to which the employee is reassigned will be added to the rate for the lower job classification.

(4) If the employee’s present rate is less than the maximum rate of the employee’s new classification, the employee will retain the employee’s present rate in the new classification until the employee is qualified for advancement.

C. For an employee with fifteen or more years of continuous service:

(5) If the employee’s present rate is greater than the maximum rate of the employee’s new classification, fifty percent of

the difference between the employee's basic rate immediately preceding reassignment and the maximum basic rate of the lower job classification to which the employee is reassigned will be added to the rate for the lower job classification.

(6) If the employee's present rate is less than the maximum rate of the employee's new classification, the employee will retain the employee's present rate in the new classification until the employee is qualified for advancement.

Any special rate established under the terms of subsection (3) or (5) of this provision will thereafter not be subject to any rate or general wage adjustments until such time as the maximum rate for the lower job classification equals or exceeds the employee's special rate.

2.(e) If it is definitely established that a regular employee is physically incapable of performing the duties of the employee's assignment, the Company will, in accordance with its past practice, whenever possible and with due consideration given to the Teal Book Seniority of all employees affected, reassign such employee to an available job for which the employee is qualified at a rate which will result in a minimum reduction from the employee's former rate.

2.(f) If an employee is demoted or assigned to a lower job classification or hourly rate of pay (1) at the employee's own request, (2) for disciplinary reasons, (3) for incompetence or (4) because of physical inability to perform the duties of the employee's assignment, the employee's Classification Seniority for the purposes of promotion will retrogress in reverse sequence of classification progression. An employee who is demoted under item number (4), above, will retain the employee's Classification Seniority in the employee's former classification for the purpose of reinstatement as set forth in Section 4.(a) of this Article. Any employee desiring assignment to a lower job classification or hourly rate of pay for a purpose other than covered by Section 1.(d) of this Article shall make written request to the Manager concerned, with duplicate copy to the Business Manager of the Local Union having jurisdiction over the location involved. Such written request shall state that the employee understands the Classification Seniority provisions of this Agreement.

Section 3. Transfer

When it is necessary for the Company to transfer an employee from one locality, or department to another under circumstances other than those outlined in Sections 2., 3.(a) or 3.(b) of this Article, the Company shall offer the transfer to qualified employees in descending order of Classification Seniority in the job classification affected in the locality or department from which the transfer is to be made provided first that Section 1.(b) is complied with on a local or departmental basis.

3.(a) If at any time there is an excess number of employees in a job classification which is to be retained in a locality or district and concurrently there is a vacancy in the same job classification in another locality the Company may, rather than apply Section 2 of this Article, transfer a qualified employee from the locality where there is an excess to the locality where the vacancy exists provided first that Section 1.(b) of this Article is complied with

on a local or departmental basis. Under these circumstances the Company shall offer the transfer to qualified employees in descending order of Teal Book seniority in the job classification affected, from the locality where the excess number exists to the locality where the vacancy exists. If no employee accepts the transfer, the least senior of the employees affected, will be subject to provision (2) of Section 2.(a) of this Article except that when the transfer is from one region to another the employee may displace the employee having least Teal Book Seniority in the same job classification within the region where the employee is employed. Any employee displaced from the same job classification may accept transfer to where the vacancy exists or exercise provision (2) of Section 2.(a) or elect to be laid off with recall privileges as outlined in Section 4.(b) of this Article. Any employee displaced by the application of provision (2) of Section 2.(a) will, if qualified, be required either to accept the promotional transfer or to be laid off with recall privileges as outlined under Section 4.(b). If an employee displaced by this procedure is not qualified for promotional transfer the employee will be subject to provision (3) of Section 2.(a).

3.(b) If at any time Company operations require permanent elimination of a job classification or permanent reduction of the number of employees or both in a locality, under conditions not provided for under Sections 3. or 3.(a) of this Article, and requirement to fill existing or contemplated vacancies elsewhere can reasonably be coordinated with the elimination or reduction, the employees where the job elimination or reduction is to be made will be offered opportunities, consistent with their respective qualifications and seniority, either to remain in their present locality in job classifications remaining available there or to be reassigned to fill available vacancies elsewhere. Under these circumstances offers for available jobs will be made in descending order of Teal Book Seniority to (1) accept promotional transfer, or (2) remain in the present locality, or (3) accept reassignment to a different job classification and locality, or (4) in lieu of applying provisions (1), (2) or (3) of this Section 3.(b) be laid off with recall privileges as outlined under Section 4.(b) of this Article. If the application of provisions (1), (2) or (3) above would result in less favorable job placement for an employee than reassignment under Section 2.(a), then Section 2.(a) will be applicable for that employee. For the purpose of coordinating the permanent elimination of a job classification or the permanent reduction of the number of employees in a locality with requirement to fill existing or contemplated vacancies elsewhere the provisions of Sections 1.(b) and 1.(c) of this Article will not be applicable and the Company will give written notice of intent to the Business Manager of the Local Union concerned.

3.(c) If an employee is reassigned under provisions (2) or (3) of Section 3.(b) of this Article to a job classification in which the employee is unskilled or inexperienced, the employee will be given training on the job and allowed a reasonable period of time to develop sufficient skill and ability to perform satisfactorily in the employee's new job classification. When by application of provisions (2) or (3) of Section 3.(b) an employee with five or more years of Teal Book Seniority is reassigned to a job classification with a lower hourly rate of pay than the employee's former hourly rate a special basic rate of pay will be established for the employee by application of the formula set forth in Article V, Section 12.(a) of this Agreement. Should such an employee subsequently be promoted to a job classification with a higher hourly rate of pay the employee's basic rate will be the starting rate for the higher job classification or the special basic rate as determined under Article V, Section 12.(a), whichever is higher. When an employee with less than five years of Teal Book Seniority is reassigned to a job classification with a lower hourly rate of pay by application of provisions (2) or (3) of Section 3.(b) the employee will be paid the maximum hourly rate for the lower job classification.

3.(d) In situations when the application of the seniority principles of this Article either involve groups of employees or involve two or more separate localities, plants or departments, the Company may, at its discretion, satisfy its obligation to contact affected employees by giving written notice. Such written notice shall contain information pertinent to the situation at hand and be posted on bulletin boards in the localities where the employees concerned are based. It shall remain posted for a period of not less than one calendar week before the Company takes action affecting the status of employees having direct and reasonable interest in the stated situation. A copy of any written notice under this Section 3.(d) will be forwarded to the Business Manager(s) of the Local(s) concerned and, when it appears desirable to the Company to insure adequate communication, copies may be forwarded to each employee having direct and reasonable interest in a stated situation.

3.(e) When, for reasons other than the employee's own request, an employee is transferred or reassigned under Sections 2.(a) or 2.(b) or Sections 3., 3.(a) or 3.(b) the employee will retain the employee's Classification Seniority in the employee's former location and job classification for purposes of reinstatement and promotion and, if reassigned to a lower job classification within the employee's normal sequence of progression, the employee's Classification Seniority in the lower job classification will be established in reverse sequence of normal progression. When an employee is required by the Company to transfer to another locality, or is transferred to another locality for the mutual convenience of the employee and the Company, and no change in job classification is involved, the employee's Classification Seniority in the employee's former and new locations will be accumulative.

Employees reassigned since January 1, 1978 to another classification by the application of Section 2.(a) of this Article and who are later reinstated to their former classification, will have their Classification Seniority adjusted for a period up to the employee's recall rights had the employee elected layoff to reflect continuous former Classification Seniority.

3.(f) When an employee is transferred or reassigned from one locality, plant or department to another at the employee's own request, the employee's Classification Seniority in the employee's new assignment will begin on the effective date of the transfer and the employee will forfeit the employee's Classification Seniority in all job classifications the employee has held prior to the transfer.

[1]3.(g) An employee who is transferred out of the bargaining unit and who is later transferred back into the bargaining unit will maintain continuous Teal Book Seniority for the purposes of this Article and the employee's Classification Seniority will be determined in accordance with the provisions of this Article. Effective June 1, 1975, Teal Book Seniority for purposes of layoff and transfer only will be the total length of time the employee has served in bargaining unit classifications.

[1] November 22, 2004

Section 4. Reinstatement and Recall

4.(a) Should opportunity for reinstatement to a higher job classification occur after an employee has been transferred or reassigned to a lower job classification for reasons other than the employee's own request or after demotion because of physical inability to perform the duties of the employee's assignment in accordance with provision (4) in Section 2.(f) of this Article, the employee involved will be reinstated in the higher job classification provided the employee is then able and willing to perform its duties. If more than one employee is involved, reinstatement to the higher job classification will be offered in reverse order to the previous reassignments.

4.(b) Employees with three or more years of continuous service who are laid off will be entitled to recall for a period of three years from the date of layoff. Employees laid off with less than three years but more than six months of continuous service will be entitled to recall for a period of one year from date of layoff. Employees with recall rights will be considered as regular bargaining unit employees for purposes of Section 1(e) of this article.

A certified letter to the Employees' last known address with a copy of the job posting and a reassignment application will be considered proper notification for purposes of this section. The completed reassignment application must be returned to the Company by certified mail within (10) calendar days from the date of the Company's mailing of the posting. In the event an employee is recalled the employee must be available, able, qualified to work and return to work within two weeks.

Laid off employees who are reemployed within their recall period will maintain continuous Teal Book and Classification Seniority status during the period of layoff for the purpose of this Article and the starting rate of pay will be established according to the provisions of Section 2.(d) of this Article.

4.(c) **Vacation and Sick Leave Payment Entitlement Upon Recall from Layoff** - Employees who are recalled, for other than temporary assignments, under Section 4(b) shall not have their eligibility interrupted for purposes of vacation and sick leave payment entitlement. The application of this topic will be effective retroactive to August 1, 1975.

Section 5. Adjustment of Classification Seniority

If a qualified employee is bypassed for a promotion in normal sequence to a higher job classification because of absence due to illness at the time the promotion is made and the employee is subsequently promoted to that higher job classification, the employee's Classification Seniority will be adjusted to place the employee in the relative status the employee would have attained in the higher job classification had the employee not been bypassed. If an employee is bypassed for promotion under these circumstances, the Company will advise the Business Manager of the Local Union concerned.

5.(a) In order to prevent an employee from being bypassed in the employee's normal sequence of promotion on or after June 1, 1972 within the locality or department by (1) the lateral transferring of an employee from another seniority area; (2) an employee being accepted for a job posting at other than the starting rate; or (3) by the hiring of an employee at

other than the starting rate or starting classification within the promotional sequence; an employee will retain the same Classification Seniority date the employee is assigned at the helper or starting classification within the sequence up through attaining journeyman (effective September 6, 1992, up through Troubleshooter where applicable), but not including the Lead or Chief Classifications. This will also apply to employees presently classified at the starting classification within the promotional sequence on June 1, 1972.

Employees who were classified journeyman prior to June 1, 1972 will have the number "2" immediately preceding their classification seniority date and will show primary seniority except for those employees who have been assigned the number "1" immediately preceding their classification seniority date as referred to in Section 9 (c) of this Article.

Section 6. Troubleshooter Assignments

6.(a) Vacancies in the Troubleshooter classification will be offered to the qualified lineman on a senior to junior classification seniority basis. Classified as a lineman for at least one year will be considered as qualified for promotion and upgrading to the Troubleshooter classification.

6.(b)Junior qualified Line Mechanic will be required to accept unfilled vacancies in the Troubleshooter classification.

6.(c) Troubleshooter can voluntarily elect to be reclassified to a lineman after one year in the Troubleshooter classification without loss of seniority.

6.(d) The Troubleshooter reclassified to lineman will not be required to accept promotion to a Troubleshooter for a period of one year.

6.(e) Employees classified as Troubleshooter on September 6, 1992, will be considered as having greater seniority than employees classified as lineman on that date.

6.(f) For the purpose of this Article, Section 2(a) only, Troubleshooter and Line Mechanic will be considered as the same classification.

Section 7. Employees in Military Service

The Company will reinstate without loss of Teal Book Seniority employees, other than temporary, who have been granted leaves of absence for military service in accordance with federal statutes applicable thereto. In order to effect reinstatement it may be necessary to reassign, transfer or lay off other employees.

Probationary employees, who are reinstated, shall have their Teal Book Seniority adjusted to the hiring date upon completion of their six-month probationary period. Service immediately preceding and immediately following the leave of absence shall be credited to the six-month probationary requirement.

Section 8. Adjustment of Veteran's Seniority

8.(a) If a regular employee is bypassed for a promotion in the employee's normal sequence of job progression because of a military leave of absence and the employee is subsequently promoted to the higher job classification, the employee's Classification Seniority will be adjusted to place the employee in the relative status the employee would have attained in the higher job classification had the employee not been bypassed.

8.(b) A returning veteran will be given credit for time in service plus Company service prior to entering service to determine the employee's rate step. One year of continuous Company and military service will entitle the employee to return at the 2nd rate step and 18 months will entitle the employee to 3rd rate step. Eighteen months is the maximum credit allowed. This does not apply to any veterans returning prior to June 1, 1973.

Section 9. Seniority Lists

9.(a) The Company will prepare and post on bulletin boards seniority lists showing the employee's name, job classification, date employed, Classification Seniority date and date classified. The seniority lists will show the relative Classification Seniority of employees in each job classification on a local, district or department basis.

9.(b) Effective with the June 1, 1963 Agreement, the wage band identification letters "A", "B" or "C", which appeared under the "Rate Per Hour" column of Appendix "A" in preceding Agreements between the parties, were made a part of the respective job classifications for which they previously identified the wage bands. The respective job classifications thereby became either two or three separate job classifications.

When seniority lists were prepared under Section 9.(a) above, job classifications which included the letters "A", or "B" or "C" were established in separate groupings and the Classification Seniority dates of the employees in the separate groupings were retained as they existed immediately preceding the June 1, 1963 Agreement. In some localities this reflected earlier Classification Seniority dates for certain employees in "B" or "C" job classifications than for other employees in higher job classifications within the same normal sequences of promotion. Each employee in the former category will, if promoted in normal sequence to the first available vacancy in the higher job classification, retain the employee's Classification Seniority date for relative position in the higher job classification.

If, under the above-described conditions, a senior employee is not promoted to the first vacancy available, but is promoted to a subsequent vacancy, the Classification Seniority date for that employee will be the effective date of such promotion unless modified by Section 5. or Section 8.(a) of this Article.

9.(c) In order to maintain related classification seniority established under the former classifications Lineman "A" and "B", Electrician "A" and "B" and Splicer "A" and "B", the number "1" immediately preceding the classification date of the new classification of Lineman, Electrician and Splicer will show primary seniority and will be assigned to employees classified Lineman "A", Electrician "A" and Splicer "A" as of May 28, 1966.

For purposes of Section 9.(b) the reclassification from Lineman "B", Electrician "B" and Splicer "B" to Lineman, Electrician and Splicer will be considered a promotion. Employees entitled to retain classification seniority under this Section will be shown in the primary group.

9.(d) Not later than August 1 of each year, the Company shall furnish the Union with an up-to-date District and departmental seniority list for the bargaining unit together with the classification and rate of pay and address of each employee on such list.

Section 10. Assignment of Job Classifications

Each employee will be assigned a job classification, the duties of which the employee is competent to perform and which generally reflects the employee's normal work. Such job classification shall not preclude assignment of the employee for limited periods on work other than that reflected by the employee's job classification in emergencies, for sickness or vacation relief, to meet the Company's service requirements, when the employee's normal work is slack or while the employee is being trained to better fit himself for advancement in grade as vacancies occur.

Section 11. Performing Duties of Higher Job Classifications

[2] [3]11.(a) An employee performing the duties of a higher job classification than the employee's own within the bargaining unit on a Shift, Automotive Equipment Mechanic (Berlin, Waterbury), (Bristol, Greenwich, Mystic, Oxford, Waterbury, Winsted), Construction Equipment Operator (Berlin Construction), Instrument Mechanic (Berlin), shall be paid the minimum rate of the higher job classification for all hours so-assigned on one day, provided the employee works one or more hours in the higher job classification on that day. Stockhandlers performing the duties of Tractor Trailer Driver shall be uprated by one rate progression step (provided such rate does not exceed the maximum rate for Tractor Trailer Driver) for all hours so-assigned on one day, provided the employee works one or more hours in the higher job classification on that day. Temporary upgrades to Chief or Lead will be at the maximum rate. This provision will not apply to an employee who is performing the duties of a higher job classification while being trained under the direction of a qualified employee. Employees who are assigned to perform the duties of a higher job classification under this provision shall not acquire Classification Seniority in the higher job classification while so-assigned.

11.(b) **Upgrading of and to Automotive Equipment Mechanic** - When assigned to perform the duties of Chief Garage Mechanic, the Automotive Equipment Mechanic or Garage Mechanic will be upgraded to the maximum pay rate of the Chief Garage Mechanic's job classification.

When upgraded to perform the duties of Automotive Equipment Mechanic, a Garage Mechanic will be upgraded to the maximum pay rate of the Automotive Equipment Mechanic's job classification.

[2] June 27, 1962
[3] September 14, 1982

11.(c) Provided a qualified supervisor is not present to direct the work forces in the Berlin Construction Department, the Company will assign a Chief or upgrade a journeyman to the maximum Chief rate of the employee's classification for all hours so-assigned on that day provided the assignment is for one or more hours under the following conditions:

(1) When the work crew consists of three or more bargaining-unit employees and they are assigned to perform work on a specific job assignment, as a work group;

(2) If the work content of the job assignment remains the same and the crew size is reduced from four or five to three.

Upgrading, under this section, will normally be on a classification seniority basis by job location assignment and in the classification that reflects the type of work being performed.

11.(d) When a Berlin Construction crew or crews of six or more employees per crew are assigned to perform work without a supervisor present, the Company will designate a Chief to direct the work forces and the employee will be paid one dollar and seventy five ($1.75) cents per hour in addition to the employee's s basic straight-time hourly rate, or in the absence of a Chief the Company will designate a journeyman to direct the work forces and the employee will be paid one dollar and seventy five ($1.75) cents per hour in addition to the maximum Chief rate of the employee's classification, for all hours so-assigned on that day provided the assignment is for one or more hours.

Upgrading, under this section, will normally be on a classification seniority basis by job location assignment and in the classification that reflects the type of work being performed.

11.(e) If during a Supervisor's absence from work an employee in a Chief job classification is temporarily assigned to direct work forces normally directed by a Supervisor, the employee will be paid one dollar and seventy five ($1.75) cents per hour in addition to the employee's basic straight-time hourly rate for all hours so-assigned on one day provided the assignment is for one or more hours on that day. If a classification other than Chief is assigned, the employee will be paid the maximum Chief rate in addition to one dollar and seventy five ($1.75) cents per hour for all hours so-assigned on one day provided the assignment is for one or more hours on that day. Upgrading under these sections will normally be based on classification seniority basis by job location assignment and in classifications that reflect the type of work being performed.

11.(f) When crews headed by Chiefs are combined, and in the absence of a Supervisor, a single Chief is assigned to direct the work performance of the crews the senior Chief will be upgraded to Supervisor, and the employee will be paid one dollar and seventy five ($1.75) cents per hour in addition to the employee's basic straight-time hourly rate for all hours so-assigned on one day provided the assignment is for one or more hours on that day. Upgrading under these sections will normally be based on classification seniority basis by job location assignment and in classifications that reflect the type of work being performed.

11.(g) If during a Supervisor's absence from work a Stockhandler at the maximum rate is temporarily assigned to conduct the work normally conducted by the

Supervisor, the employee will be paid one dollar and seventy five ($1.75) cents per hour in addition to the employee's basic straight-time hourly rate for all hours so-assigned on one day provided the assignment is for one or more hours on that day.

11.(h) If during an Area Stockhandler's absence from work a Stockhandler at the maximum rate is temporarily assigned to conduct the work normally conducted by the Area Stockhandler, the employee will be paid the maximum rate of the Area Stockhandler classification for all hours so assigned on one day, provided the employee works one or more hours in that classification on that day.

11.(i) Meter Readers-AMR Drivers may be temporarily assigned to perform the duties of a collector, as required. If this assignment exceeds a continuous period of one hour, then the employee is entitled for all hours so assigned on one day to be paid at the top of the rate of the collector's rate progression.

11.(j) **Crew Size - Track Machines** - When track machines (digger or bucket) are to be utilized, for work in a District or System Project area, two bargaining unit employees from Transmission (GO) will be utilized.

11.(k) **The Effects on Employees Hired as Transmission Line Mechanic Helper Classification** - All employees who are hired or post for job openings into the Transmission Line mechanic Helper classification after June 1, 1989, will be retained in that classification until the employee's completion of the Transmission Line Mechanic Time Merit Progression program.

11.(l) A qualified Electrician assigned to the task of escorting an unqualified person or persons in a substation will be upgraded to Lead Electrician for the hours so assigned. Such upgrade will be offered by Classification Seniority from senior to junior except when management receives less than seventy-two hours' notice of the need for an escort.

Section 12. Retrogression; Wage Rate

If it is definitely established (1) that a regular employee is incapable of performing the duties of the employee's job classification because of an injury sustained in the employ of the Company, or (2) that a regular employee having five or more years of continuous service is incapable of performing the duties of the employee's job classification because of a disability or infirmity arising from natural causes and the employee is assigned to a lower job classification within the employee's ability to perform, a special basic rate of pay will be established for the employee as follows:

12.(a) For an employee with less than twenty years of continuous service at the time of reassignment, the special basic rate will be determined by multiplying the difference between the employee's basic rate immediately preceding reassignment and the maximum basic rate for the lower job classification to which the employee is reassigned by the product of five percent times the employee's years of continuous service and adding the amount so obtained to the maximum basic rate of the lower rated job classification. For an employee with twenty or more years of continuous service there will be no reduction in basic rate when

reassigned to a lower rated job classification under this provision. Any special basic rate established under the terms of this provision will thereafter be subject to general wage adjustments made during the term of this Agreement.

12.(b) Should such an employee later qualify for and be promoted to a higher job classification, the employee's basic rate will be the starting rate for the higher job classification or the special rate as determined above, whichever is greater.

12.(c) The above Sections 12.(a) and 12.(b) apply to employees who may be reassigned to a lower rated job classification for reasons stated in Section 12 on or after June 1, 1973.

[4] [5] [6] [7]Section 13. Job Classification Change Notices to Union

In order that the Union may maintain its records of bargaining unit employees the Company will periodically notify the Union of job classification changes. Such notification will provide the name, job classification and location for each bargaining unit employee hired, reclassified, transferred or separated from the Company. The information will be directed to the Business Manager of the Local Union having jurisdiction over the location involved. If an employee within the bargaining unit is discharged, the Company will notify the Business Manager of the Local Union concerned as promptly as possible.

13.(a) If an employee is retrogressed, it will be communicated in writing to the Business Manager of the Local Union having jurisdiction over the location involved.

13.(b) If a regular bargaining unit employee is suspended or discharged the local management of the Company will notify the Local Union representative on the same day of occurrence. If requested by the Union, the matter shall be discussed on that day by management representatives and the Local Union in the area concerned.

Section 14. Time-Merit Progression Programs and Job Specifications

A list of Time-Merit Progression Programs and Job Specifications that are currently in effect are included in Appendix D, TOPIC: Time-Merit Progression Programs in Effect and TOPIC: Job Specifications.

ARTICLE VI
Hours of Work, Rates of Pay and Overtime

Section 1. The minimum wage rate for each job classification shall be in accordance with a schedule entitled "Schedule of Regular Hourly Rates" appended hereto and to be signed by both parties to this Agreement.

[4] July 1, 1969 #4
[5] July 1, 1973 #2
[6] Topic: New Hires (B)
[7] Topic: Meter Service Installers

This rate schedule shall not be construed so as to require a cut in the existing hourly wage of any employee now paid in excess of the schedule.

[8]**Section 2.**

(a) For the purpose of computing overtime, the workweek shall start at 12:01 a.m. Sunday and end at 12 midnight the following Saturday.

(b) For the purpose of this Agreement, employees are composed of shift, day and scheduled workers. (1) A shift employee is defined as one who works at a seven-day operation or service, on a rotating or shift schedule. (2) A day worker is one whose basic work week is Monday through Friday, or Tuesday through Saturday between the hours of 6 a.m. and 6 p.m. for 8 hours a day or ten (10) hours; if applicable. (3) A scheduled worker is an employee, other than a shift worker or day worker, who works according to a schedule of hours at different times of the day or night and/or on different days of the week including Saturdays and Sundays.

If the Company changes or modifies working schedules in a department, plant or district of the Company, in a manner which the Union considers arbitrary or unnecessary, the new schedule shall be worked subject to adjustment through the grievance procedure up to and including arbitration.

(c) **Establishing New Schedules** - The establishing of any new schedule for scheduled employees shall be discussed with the appropriate Local Business Manager in advance of making such schedule effective.

(d) **Saturday Work** - Saturday Work requirements will be minimized. The Company will continue its efforts to reduce the number of employees who are required to work on Saturday as a part of their normal work schedules.

(e) It will be within the discretion of the supervisor to excuse an employee from overtime for good cause where such overtime is not due to an emergency, is not a special job, and does not involve work at the end of a day's shift.

[9] [10]**Section 3. Computing Overtime**

All hours worked in excess of eight or ten hours in one day of twenty-four, except for shift employees as scheduled, or forty hours in one workweek or on an employee's regularly scheduled day off shall be paid for at the overtime rate of one and one-half times the regular rate. Employees with Sunday as a regularly scheduled day off in any calendar week shall be paid double time for work on that Sunday, and at time and one-half for work on the other regularly scheduled day off in that calendar week. Employees regularly scheduled to work on Sunday in any calendar week shall receive time and one-half for work on the first regularly scheduled day off and double time for work on the second regularly scheduled day off in that calendar week. Overtime rates shall not be applied more than once to any particular hour of work, nor shall they apply to scheduled changes of shift.

[8] Topic: J schedules- Meter Service
[9] July 1, 1966 B.2.

Section 4. Planned Overtime

4.(a) Planned overtime shall be defined as overtime work for which at least seventy-two hours advance notice has been given and will be assigned among employees as equally as possible. Records of overtime hours and "on-call" hours shall be posted on the Company bulletin boards each month and a copy given to the Union. In selecting employees for assignment to planned overtime, the Company will excuse employees who do not want the assignment provided the required number of qualified employees are available. Where additional help is needed beyond the number desiring the overtime assignment, additional assignments will be made among qualified employees in inverse order of the amount of overtime worked. Non-regular employees shall not be used unless regular employees are not available. Among employees in a given classification, those who have more than six months of service will be given preference for planned overtime assignments over those who are still on a probationary basis. Except in the case of the unforeseen absence of another employee if an employee is required to work overtime on a scheduled day off, or on an observed holiday, with less than seventy-two hours' notice, the employee shall be paid travel time as defined in Section 8 of this Article VI. Records of distribution of overtime work will be made available to designated Union representatives upon their request and also posted on a weekly basis.

4.(b) Where an employee first reports for planned overtime on a scheduled day off, or on an observed holiday, the employee shall receive a minimum of four hours work or pay or, if the work exceeds four continuous hours, a minimum of eight hours work or pay at the applicable overtime rate. For each time thereafter that the employee reports for planned overtime work on that same day, the employee shall receive a minimum of three hours' work or pay at the applicable overtime rate. Employees, at the time they are notified of the assignment shall be informed as to the estimated duration of the work. When an employee is advised on less than 15 hrs notice not to report for such prearranged overtime, the employee will be paid for 2 hrs at the employee's straight time rate except that when the prearranged overtime immediately precedes or follows the employees normal schedule hours and would amount to less than 2 hrs, the employee will be paid at the employee's basic straight time rate for the actual amount of prearranged overtime. In any case where an employee is given an opportunity to work planned overtime on the employee's scheduled day off in accordance with the full minimum provided under this paragraph, but is excused at the employee's own request from working that full minimum, the employee will be paid only for actual hours worked.

Section 5. Equitable Distribution of Overtime

Insofar as practicable overtime work will be equitably distributed among suitably qualified employees who are in the job classifications in the area in which the work is to be performed. Records of distribution of overtime work will be made available to designated Union representatives upon their request and also posted on a weekly basis. Overtime lists will be furnished to the Business Manager on a monthly basis.

[11]**Section 6. Rest Time**

6.(a) Except in case of emergency or the case of unforeseen absence of other employees, employees shall not be required to work more than twelve hours in any one twenty-four hour period. If an employee is required to work beyond sixteen hours in any twenty-four

[11] July 22, 1976 #2

hour period, the employee will be paid at double the employee's straight time rate for those hours worked beyond sixteen. An employee required to work more than sixteen hours during any twenty-four hour period shall, once released, be allowed a period of eight hours off before returning to work. If this period extends into the employee's regular scheduled working hours, the employee shall lose no pay thereby. If an employee is required to work outside of the employee's normal schedule for more than one hour (more than two hours with advanced notice) during the eight-hour period immediately preceding the starting time of the employee's next normal schedule, the employee will, whenever possible be allowed rest time during that normal schedule without loss of normal wages. If an employee is called out without advance notice to work more than one hour (including travel time) during the eight hour period immediately preceding the starting time of the employee's next normal schedule, the employee will, where service requirements permit, be allowed equivalent rest time during the employee's basic scheduled hours on that day without loss of normal wages. The above does not apply to "call-outs" occurring one hour before the start of the employee's regular schedule. The rest time provided in the above two paragraphs will be scheduled by the supervisor. The rest time shall be equivalent to the sum of the time worked during the above eight-hour period. Time allowed off for meals (meal time not taken) will not be counted as time worked in determining "more than one hour" (more than two hours for prearranged overtime) for the purpose of this Section. When service requirements will not permit scheduling such time off, the equivalent hours will be paid for at two times the regular rate instead of straight time. Similarly, an employee called out without advance notice to work more than one hour (more than two hours with advanced notice), including travel time during the eight-hour period immediately preceding the starting time of a planned overtime assignment on the employee's scheduled day off, said employee will, when service requirements permit, be allowed equivalent rest time at straight time rates during such planned overtime assignment hours-the maximum hours so paid being either the announced minimum hours guaranteed or the average hours actually worked on the assignment by other employees of the same classification, whichever is greater. The above does not apply to "call-outs" occurring one hour before the start of the employee's regular schedule. The rest time provided for above will be scheduled by the supervisor. When service requirements will not permit scheduling such time off, the equivalent hours will be paid for at straight time rates in addition to the applicable overtime rate.

6.(b) **Payment For Rest Time Worked On A Holiday.** Employees who are eligible for rest time and are required to work through their rest time on a Company recognized holiday that they were scheduled to work, will receive double and one half times the employee's straight time rate for the actual rest time hours worked.

Section 7. Work Beyond 16 Hours

If an employee is required to work beyond sixteen consecutive hours, the employee will be paid at double the employee's straight time rate for those hours worked beyond sixteen, until the employee is allowed eight consecutive hours off. Time allowed off for meals (meal time not taken) will be counted in determining sixteen consecutive hours for the purpose of this Section, but will not count towards eight consecutive hours off.

[12]**Section 8. Call Out**

An employee is considered to be called out (1) when the employee is called in when not on duty and without advance notice, to report immediately for overtime work or, (2) when the employee is given advance notice to report for overtime work on a regularly scheduled working day when the overtime work is prior to or after and not continuous with the employee's regular scheduled working hours. Employees called in for work outside their regular working hours shall be paid time and one-half. Such pay shall be computed from the time the employee reports to work to the time of completion of the employee's work and their return to designated headquarters, to which time shall be added one-half hour for travel to work and one-half hour for travel from work. Time off shall not be considered as repayment for such work done. An employee called in for work under the terms of this paragraph will receive a minimum of two hours' pay including the above travel time at time and one-half for each time the employee is called away from their home, except that if an employee is called in for work which continues into the employee's regular working schedule, the employee shall be paid the overtime rate only for actual time worked and the half hour travel time to work. In the case of an employee who receives a call between the hours of midnight and 6 a.m., or between 8:00 a.m. and 2:00 p.m. for permanent 2nd shift garage mechanics, to report immediately, the minimum shall be three hours instead of the two hours referred to in the previous sentence, and the same conditions will apply. An employee will be considered on Company time while traveling directly to work after being called out, but paid no more than the amount specified herein.

When normal means of transportation are not available to an employee required to work overtime without advance notice, the Company will provide transportation to the employee's home.

[13] [14] [15] [16]**Section 9. On Call**

Employees may be placed on-call outside their normal schedule hours for one or more consecutive 24-hour periods, or less than 24 hour periods. Employees, except Troubleshooters, who are assigned by the Company to be on-call will be paid either 1.5 hours at basic straight-time rates or 3 hours at basic straight-time rates for each 24 hour period (or less than a 24 hour period) that they are required to be on call as follows:

(i) If the majority of the 24 hour on-call period (or less than a 24 hour assignment) is served during a weekday (Monday through **Thursday**), employees will receive 1.5 hours at basic straight-time rates;

(ii) If the majority of the 24 hour on-call period, (or less than a 24 hour assignment) is served during a holiday, weekend (**Friday,** Saturday or Sunday), or the employee's scheduled day off (only for employees working a shift or special schedule), employees will receive 3 hours at basic straight-time rates. With the exception of weekend on-call periods containing Company-recognized holidays, employees will receive no

[12] Topic: Storm Assignment
[13] July 1, 1966 B.1.
[14] July 1, 1966 B.3.
[15] November 22, 2004
[16] November 3, 2010

more than **three** 3 hour payments for a weekend on-call assignment (e.g., 3 p.m. Friday until 7 a.m. Monday.).

Time worked under Sections 9 and 12 will be computed from the time of receipt of each call out, and unless the time extends into the employee's scheduled work time, until return to place of receipt of the call out.

One on–call payment will be made for each 24-hour period regardless whether such 24-hour period extends over two calendar days. With the exception of seven day on-call weeks containing company recognized holidays, or weeks containing an employee's scheduled day off (only for employees working a shift or special schedule), employees will receive no more than **four** payments of 1.5 hours and **three** payments of 3 hours for an on-call assignment of seven consecutive 24-hour periods (e.g., 3 p.m. Tuesday until 7 a.m. Tuesday) even though such period might extend over eight calendar days.

In addition, the employee will receive pay, when appropriate, in accordance with Section 8 of this Article VI. Where employees have been placed "on-call," they shall be called before or concurrently with other employees in case of emergency work which they are qualified to do.

An employee not scheduled for "on-call" who is given advance notice to report for overtime work on a regularly scheduled working day when the overtime work is prior to or after and not continuous with the employee's regular scheduled working hours, shall be paid for being "on-call" in accordance with Section 9 of this Article.

Employees not regularly assigned to "on-call" who are required to hold themselves available so that they may be contacted within one-half hour in anticipation of an emergency or to return to work following the completion of their regular shift shall be paid in the same manner as a person assigned to "on-call" for the day on which such an assignment is made and paid under Section 9.

[17] [18]**Section 10. Excused From On Call**

Such employees shall upon request be excused only from the established annual rotational scheduled "on-call"/Shift assignment for a period of not less than twelve months provided the employee has reached 45 years of age, has greater departmental seniority than other employees who make the same request, and the granting and/or continued compliance with the request does not subject the remaining employees on the employee's particular "on-call" schedule to a normal "on-call" schedule assignment frequency greater than one out of four. Nothing contained in this Article shall restrict the Company's right to assign any employee (whether or not excused from participating in the annual on-call schedule) to be on call for unscheduled emergency situations, such as the forecast of a storm. Any employee so excused will be excluded from the provisions of Article VI, Section 5. However, the Company will attempt to equalize scheduled overtime to the extent possible without keeping dual overtime records.

[17] Topic: New Hires (A)
[18] October 23, 2012 & August 29, 2005

For the purpose of unplanned overtime, the overtime list will be followed as per normal practice.

For the purposes of planned overtime, the administrative 2000 hours figure will be disregarded.

The Company will utilize the following process to assign personnel to unscheduled on-call:

(i) The Company will ask for volunteers, including employees who have requested to be excused from on-call assignment of this Article by overtime standing in accordance with Article VI section 5.

(ii) If there is an insufficient number of volunteers to meet on call staffing needs the company will first assign employees who have not requested to be excused for on call assignment of this Article, by overtime standing in accordance with Article VI section 5.

(iii) If steps 1 and 2 above do not provide a sufficient number of volunteers or assigned personnel to meet on call staffing needs the company will assign employees who have requested to be excused from on call assignment of this Article by Classification Seniority.

(iv) The Company may, upon the conditions of the work, assign personnel who are available at the facility including employees who have requested to be excused from on call assignment of this Article to stand call until steps 1-3 can be satisfied. The Company will attempt to find replacements for the excused employees who have been assigned. If a sufficient number of volunteers and assigned personnel are available to meet on-call staffing needs, the employees who have requested to be excused from on call assignment may be excused by Classification Seniority.

Section 11. Trouble Call

11.(a) The Company and Union agree to continue their cooperative efforts to enhance customer service by improving response time during customer outages. In keeping with this mutual goal, the parties agree to the formation of an A list of employees who wish to be designated to take trouble calls.

11.(b) All employees in the following classifications will be eligible to participate in the A response list:

Chief Line Mechanic,	Chief Electrician	Chief Splicer
Lead Line Mechanic	Electrician	Splicer
Troubleshooter	Lead Electrician	Lead Splicer
Line Mechanic		

11.(c) The Company seeks 100% participation of all eligible employees, but requires 25% within each of the ten (10) participating classifications. If the required participation is not obtained on a voluntary basis, assignment to the A list will be made on a junior to senior basis. Employees not participating in the A list may elect to participate on a weekly basis.

11.(d) Overtime Rotation - A separate overtime rotation list will be maintained for A list participants. Prearranged overtime will be distributed from a combined list.

11.(e) Employees who have removed themselves from the scheduled call rotation under this Article will have 2000 hours added to their overtime hours on the overtime list.

For the purpose of unplanned overtime, the overtime list will be followed as per normal practice.

For the purposes of planned overtime, the administrative 2000 hours figure will be disregarded.

Section 12. Troubleshooters Assigned to Call

Troubleshooters who are assigned by the Company to take trouble calls outside their normal schedule hours will be so-assigned for either (1) eight hours immediately preceding, or (2) eight hours immediately following, or (3) a total not in excess of eight hours both immediately preceding and immediately following their normal schedule hours each day they work. Troubleshooters will be paid for one hour at basic straight-time rate for each eight hours they are assigned to trouble call duty except that, when assigned on a recognized holiday they will be paid for two hours at basic straight-time rate for each eight hours so-assigned. If called upon to perform work, in addition to the call-time pay they will be paid for the time worked at the rate applicable but not less than two hours for each time called out, except they will be paid not less than three hours at the applicable rate for each time called out between the hours of 12:00 midnight and 6:00 a.m.

Section 13. Assignment of Vehicles for Call

13.(a) Employees, except troubleshooters, who are assigned by the Company to take trouble calls outside their normal schedule will, whenever practical, be assigned a Company motor vehicle for all hours assigned to call, provided that there are no conflicts with local zoning regulations.

13.(b) When an employee is assigned to call as a member of a crew, one member of the crew complement will be assigned a motor vehicle under the provisions outlined above.

13.(c) This provision will also apply to troubleshooters where arrangements suitable to the Company can be made to return the vehicle to a suitable location following the call assignment. Troubleshooters who use their personally owned vehicle, while responding to trouble calls during the hours of call assignment, will be paid mileage in accordance with Article XII, Section 4.

13.(d) The Company agrees that it will give consideration to valid reasons of an employee who requests that the employee be excused from taking an assigned Company vehicle home during hours of call.

Section 14. Paging Device for Use During Call Assignments

When an employee is assigned to call, they will be provided with a paging device

("beeper"), when practicable, as an alternate means of contact during the normal call schedule. It will be the responsibility of that employee to ensure that they are within the signal range and the "beeper" is in operating order as indicated by the testing procedure or to provide other means to be contacted as is presently practiced.

[19]**Section 15. Meals And Meal Allowances**

After an employee has had one and one-half hours of overtime work which is continuous with the employee's regular scheduled working hours and which forces the employee to miss their regular meal hour (other than breakfast as provided for below), or after five hours of overtime work since being called out, and after each additional five hours of overtime work, the Company will either provide a meal for the employee or pay the employee $10.00 on account of such meal.

An allowance of $20.00 shall be made for evening meals only (4:00 p.m. to 12 midnight). The eight hour period following completion of the normal work schedule is applicable for shift workers. A meal allowance shall be given to shift employees who are required to report for work starting one hour or more before their next normal schedule starting time without having been given twelve hours advance notice.

An allowance of $10.00 shall be made for breakfast in any case where an employee is required to report for work on the day shift one hour or more before the employee's usual starting time, even though prior notice had been given of such work. Meals eaten on the job to avoid interruption of work during such overtime or emergency will be eaten on Company time. As far as operating requirements permit, each such employee shall be allowed reasonable time off to eat such meal, except for the special case of the breakfast meal provided for above. Such reasonable time off up to three-quarters of an hour shall be included in the hours of overtime work. An employee entitled to a meal and/or time off under this Section shall, if the overtime assignment continues, become entitled to additional meals and/or time off therefore at five-hour intervals. Although exact scheduling of meals will depend on requirements of the job, it is intended that an employee be allowed to eat a meal within a reasonable time after the employee becomes entitled to it under this Section. However, if the employee is not given time off but works through to complete the job, the employee will be paid three-quarters of an hour for each meal for which the employee qualified. An employee called out for one and one-half hours or more but less than five hours of actual overtime work, who thereby misses a regular meal hour, will be provided with a meal or paid for the meal at the rate of $10.00 for breakfast, lunch, and $20.00 for evening meals only (4:00 p.m. to 12 midnight), and in which case there would be a time allowance for eating. On a day when an employee is not scheduled to work, the "regular meal hour" for the purpose of this Section will include any part of the one hour period beginning at 7:00 a.m., 12:00 noon, and 5:00 p.m. For prearranged work, the meal allowances would be the same as on a regular workday. An employee on the day shift who is called to come immediately to work one hour or more in advance of the employee's regular starting time and who is not released for at least half an hour prior to starting the employee's day's work will be provided with a breakfast or paid $10.00 for purchase of same and, if the employee does not have the opportunity to provide the employee's own lunch in these circumstances, the employee will be provided with a lunch or paid $10.00 for the purchase of same.

[19] July 15, 1971 #5

In the event a shift employee is called back with less than eight hours' notice to work a second full shift within a twenty-four hour period or is assigned with less than four hours' notice to work a full shift on the employee's day off, the employee shall receive two meal allowances for the shift.

Except where the Company has scheduled an employee for a straight eight (8)-hour day**,** normal lunch periods should be observed whenever practicable and those cases where it is necessary to delay lunch periods should be kept at a minimum. When the work requirements make it necessary to postpone a lunch period for an hour or more, the practice will be to pay the employee time and one-half for the lunch period so that the employee will be considered to be on continuous duty from the start to the finish of the workday, eating when the employee can find the opportunity without any stated meal period. Employees scheduled for a straight eight (8)-hour day will not have a lunch period designated but will be expected to eat on the fly.

Section 16. Schedules of Normal Work Coverage

The Company will prepare and post on bulletin boards schedules of normal work coverage for the employees in various departments, plants and districts of the Company. The purpose of the schedules is to inform the employee of the employee's normal hours of work which shall consist of not more than ten hours per day or forty hours per week. Employees may be required to work a straight eight (8) hour schedule without a designated lunch period. The work week shall consist of four or five consecutive days except for shift or scheduled workers. All hours worked in excess of eight or ten hours per day or the basic forty hours per week, or outside of the employee's normal schedule, will be paid for at one and one-half straight-time rates except when other overtime rates, premium rates or holiday rates are applicable as herein provided.

Section 17. No Duplication of Rates

When two or more rates may be applicable, the higher rate shall be applied. There shall be no duplication in the application of regular, overtime or premium rates of pay for the same hours worked.

Section 18. Schedules of Shift Employees, Shift Premium and Sunday Premium

18.(a) The schedules of normal work coverage for employees who are assigned as shift or scheduled workers are made to meet the continuous nature of the Company's operations. The Company and Union shall meet and discuss any permanent schedule change for shift or scheduled workers prior to implementation. During the course of discussions with the Company, the Union may seek input and poll the membership regarding any schedule change. The job classifications of employees who normally are assigned as shift or scheduled workers are identified by the prefix "S" in the Schedule of Job Classifications and Basic Straight-Time Hourly Rates Appendix "A" of this Agreement.

18.(b) Upon request from shift or scheduled workers, the Company may, at its discretion with respect to extended hours of work and the numbers of simultaneous requests or extended periods of exchange, permit such employees to exchange their scheduled hours of normal work coverage within a work week provided the shifts are adequately covered without involving payment of overtime or upgraded rates. When such exchanges of scheduled work

hours are permitted, the advance notice requirements of Section 19 of this Article shall not be applicable. No other such exchanges of scheduled hours of normal work coverage will be permitted, except for employees on a Tuesday through Saturday schedule.

18.(c) When an employee in any job classification is assigned to work on an afternoon or night schedule of normal work coverage, a premium of two dollars and fifty cents ($2.50) per hour will be added to the employee's basic straight-time rate for all hours worked within that schedule. For the purpose of this shift premium provision, afternoon and night schedules of normal work coverage are defined as those which include normal schedule hours of work preceding 6:00 a.m., or following 6:00 p.m. An employee regularly assigned to a shift schedule will receive shift adder for all paid time off.

18.(d) A premium of twenty-five percent of the basic straight-time rate per hour will be added to the basic straight-time rates for time worked on Sundays on a normal schedule by shift or scheduled workers. This Section will not be applicable to time worked at double straight-time rates under the provisions of Section 20 of this Article.

Section 19. Change In Normal Work Schedules

The work and "on-call" schedules in effect for the different departments at the time of the execution of this Agreement will be furnished to the Union by the Company.

19.(a) When possible, employees will be given not less than seventy-two hours advance notice of changes in their normal work schedules. In any case of a change of normal work schedule, the employee(s) affected must be advised of the change in advance of the starting time of the new normal work schedule for the purposes of the premium rate and rest time provisions of this Article.

19.(b) When an employee's normal work schedule is changed with less than seventy-two hours advance notice, any time worked within the new normal schedule which was not normal work time under the old schedule will be paid for at one and one-half straight-time rates until the advance-notice period has expired, except when other rates are applicable, and excepted further that when an employee's normal work schedule is changed to provide relief coverage because of sickness or other unexpected absences of employees, forty-eight hours shall be the advance-notice period for application of greater than straight-time rates. An employee may be returned to the employee's previous normal schedule without forty-eight hours advance notice after serving a relief coverage assignment as described herein.

19.(c) When operating or maintenance requirements make it necessary to change the normal work schedule of a day work employee, (other than a shift or scheduled worker), to an afternoon or night normal schedule, for other than relief assignments to normal schedules of shift or scheduled workers, the employee will be paid at one and one-half times the employee's straight-time hourly rate for all time worked on the afternoon or night normal schedule which was not normal work time on the employee's daytime schedule provided the period of assignment is for three or less consecutive workdays. When the period of assignment is more than three consecutive workdays, the change of normal work schedule will be made in accordance with 19.(b) above. This Section will not be used to change the normal work schedules of day work employees from daytime to afternoon or night normal schedules except when the work to be done is necessitated by operating or maintenance requirements which must be continued on at least a two-shift basis or when it cannot be performed during daytime

normal schedule hours. A day work employee may be returned to a daytime normal work schedule without seventy-two hours advance notice.

19.(d) Whenever possible, employees will request permission for planned absence at least seventy-two hours in advance of such absence.

Section 20. Sunday or Second Scheduled Day Off

20.(a) A Shift or scheduled worker will be paid double the straight-time rate for all hours worked on Sunday outside the employee's normal schedule.

20.(b) Employees with Sunday as a normal scheduled day off in any calendar week shall be paid double time for work on that Sunday, and at time and one-half for work on the other normal scheduled day off in that calendar week. Employees required to work on a Sunday within their normal schedule in any calendar week shall receive time and one-half for work on the first normal scheduled day off and double time for work on the second normal scheduled day off in that calendar week.

ARTICLE VII
Vacations, Holidays and Leaves of Absences

[20] [21]**Section 1**. **Vacation Allowance**

a) Regular Employees will be allowed the following vacation periods annually with basic straight-time pay:

- For employees with less than one year of service and hired between January 1 and March 31 of the current calendar year will be allowed three weeks of vacation.
- For employees with less than one year of service and hired between April 1 and June 30 of the current calendar year will be allowed two weeks of vacation.
- For employees with less than one year of service and hired between July 1 and September 30 of the current calendar year will be allowed one week of vacation.
- For employees with less than one year of service and hired between October 1 and December 31 of the current calendar year will not be granted vacation for that period.

Employees who are expected to complete at least one year of continuous service by December 31 of a calendar year will be allowed three weeks' vacation in that and each succeeding calendar year until eligible for four weeks' vacation under 1.(c) below.

Employees who are expected to complete 10 years of continuous service by December 31 of a calendar year will be allowed four weeks' vacation in that and each succeeding calendar year until eligible for five weeks' vacation under 1.(d) below.

Employees who are expected to complete 20 or more years of continuous service by December 31 of a calendar year will be allowed five weeks' vacation in that and each succeeding calendar year.

[20] July 24, 1970 #1
[21] Topic: Vacations

Less than one year of service	Start date January 1 through March 31 – 15 days
	Start date April 1 through June 30 – 10 days
	Start date July 1 through September 1 – 5 days
	Start date October 1 or later – no vacation accrued.
One year but less than 10 years	15 days per year
10 years but less than 20 years	20 days per year
20 years or more	25 days per year

All vacations must be completed within the calendar year and are not cumulative. The Company must afford opportunity for the employee to take the employee's vacation within the calendar year. The period of continuous service, for vacation purposes only, is not interrupted by leave of absence or temporary layoff.

(b) An employee's vacation begins at the end of his/her last scheduled work day.

(c) The vacation allowance per week will be based on the number of hours in the scheduled workweek generally in effect throughout the Division at the time the employee takes the employee's vacation, with overtime rates applying to hours in excess of forty hours per week. For the term of this Agreement, the minimum vacation allowance per week will be forty hours' straight time pay unless some public authority orders a shorter workweek.

Section 2. **Employee Returns Before June 1**

An employee who returns before June 1 of any calendar year from leave of absence or temporary layoff of more than six months' duration shall be entitled to the employee's full vacation for that calendar year. For any such employee returning after June 1, the vacation for that calendar year will be computed at one-tenth of the amount provided under Section 1 above for each month (including the month of the employee's return) remaining in the calendar year.

[22]**Section 3**. **Choice Of Vacation**

Consistent with the Company's service obligations, vacation periods will be scheduled to meet and suit the convenience of employees. Insofar as practicable, employees will be granted preference in selecting vacation periods in descending order of Teal Book Seniority on a local, plant or departmental basis as involved. Such preference for selection will be granted in the following order: (1) for all vacation periods under 1(a) 1. above, (2) for all third week vacation periods, (3) for all fourth week vacation periods, (4) for all fifth week vacation periods, and (5) for any additional vacation days granted because of recognized holidays falling within vacation periods. Each district, department and plant will, not later than April 1st, prepare and post on appropriate bulletin boards schedules showing the time of vacation periods granted. In order

[22] Topic: Hartford/ Simsbury/ Falls Village

that the Company will be able to prepare and post vacation schedules by April 1st, it will be necessary for employees to make their selections of vacation periods promptly. In the event an employee fails to make the employee's selection within a reasonable period of time, the employee will forfeit the employee's turn until all other employees involved have made their selections. Should any employee fail to make the employee's selection(s) by March 1st, the Company, at its discretion, may schedule that employee's vacation period. Changes in any scheduled vacation period may be made with mutual consent of employees involved and the Company. When choice of vacation period has been granted, it will not be interfered with except in emergencies.

[23]**Section 4**. **Vacation**

The vacation period shall be between January 1 and December 31. Each employee shall be permitted to take a vacation between May 1 and October 31, subject to the provisions of Section 3. An employee entitled to more than two weeks of vacation shall be permitted to take a two-week vacation between May 1 and October 31 and may take the employee's entire vacation during this period or outside this period, subject to the provisions of Section 3.

Section 5. **Discontinuation Of Employment**

Any employee with more than one year of continuous service who resigns and has given the Company at least two weeks' notice, or who is discharged by the Company, shall, at the time of the termination of the employee's employment, be credited with any vacation pay which the employee has earned but not received, prorated at one-fifth of the employee's total vacation allowance for each full month of full-time, active employment completed between January 1 and June 1 of that year. Any such employee who leaves after June 1 will be entitled to the employee's full vacation or pay for that calendar year.

Any employee who retires after January 1 of any calendar year will be credited with vacation time for any portion of the employee's total vacation allowance for that calendar year which the employee has not already received. However, in the normal case, such employee will be required to schedule the employee's entire vacation prior to the employee's retirement date. An employee retiring on any February 1 who is entitled to more than four weeks of vacation will schedule such vacation during January of that year and in the latter part of December of the preceding year.

Section 6. **Emergency Recall From Vacation**

An employee who has started the employee's vacation will not be required to return to work during the period of that vacation as scheduled **except in an emergency**. Any employee who is recalled to work any hours of the employee's regular basic schedule during a week the employee is on vacation shall be paid at two times the employee's regular rate for such work and, in addition, shall receive as soon as practicable thereafter, at the employee's option, either equivalent time off with pay or pay at straight time rates for those hours worked which are within the employee's regular forty-hour basic schedule. Hours worked outside of an employee's usual eight working hours on one of the employee's basic five workdays shall be paid at double time and such hours shall be counted as hours worked for the purpose of equalizing overtime.

[23] November 3, 2010

[24]**Section 7**. **Holidays (effective January 1, 2017), Time Off Before Christmas**

New Year's Day, Martin Luther King Day, Presidents' Day, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans Day, Thanksgiving Day, and Christmas Day shall be recognized as holidays.

In addition to the 10 federal holidays above, employees will be granted two floating holidays during the calendar year based on operational requirements and supervisory approval. The two floating holidays can be used for any reason and are requested by the employee. In the event of a conflict between employees requesting the same date, seniority shall govern.

Whenever any of such holiday(s) occur upon Sunday, the Monday next following such day shall be recognized as the holiday, except that for those employees who are required to work that Sunday, as part of their normal schedule, the holiday will be observed on Sunday.

Whenever any such holiday(s) occur upon Saturday, the preceding such day shall be recognized as the holiday, except that, for those employees who are required to work that Saturday, as part of their normal schedule, the holiday will be observed on Saturday.

The Company will allow four (4) hours off at the basic straight time rate to all employees who report for work on their last scheduled work day prior to Christmas Day. If Christmas day falls on a weekend day or a Monday, the 4 hours will be allowed in a manner consistent with the rest of the company.

If it is determined by the Company that time off cannot be allowed, the employee in lieu of the time off, will receive an additional four (4) hours pay at the employee's basic straight time rate.

Section 8. **Holiday Pay**

Pay for the holidays listed in this Article will be as follows:

(a) If the holiday is observed on a day when the employee would ordinarily work and if the employee's services are not required, the employee will receive eight hours' pay and the day off.

(b) If the holiday is observed on an employee's day off or during the employee's vacation, the employee shall receive an additional day off sometime during the calendar year on a day mutually agreeable to the Company and the employee.

(c) If an employee is required to work on a holiday, the employee will receive the eight hours' pay or day off provided under (a) or (b) plus time and one-half for all hours worked within the employee's usual eight working hours and double time for all other hours actually worked or the minimum provided under Article VI, whichever is greater.

(d) The pay provided in this Section 8 shall be in lieu of all other pay for work on holidays. Hours worked on a holiday which are outside of an employee's usual

[24] July 3, 1963 4(b)

eight working hours shall be counted as hours worked for purpose of equalizing overtime.

Section 9. Shift Adder For Second Shift

A permanent second shift employee, e.g., Garage Mechanic, will be paid holiday and vacation pay at the rate which includes the shift adder.

Section 10. Sick Leave

Continuation of Pay

Incumbent employees as of December 31, 2016 will keep their sick time eligibility in accordance with the following:

Continuous Service – Weeks of Full Pay

From 6 months to 5 years - Up to 6 weeks

For 5 years to 10 years – Up to 10 weeks

For 10 years and upward – Up to 1 week for each year of continuous service

In case of a disability continuing from one calendar year into the succeeding calendar year, the employee is allowed for that disability only the amount of sick leave to the employee's credit as of the beginning of the disability. An employee whose disability is carried over into the succeeding year must return to work in order to establish sick leave benefits for that year.

The Company will notify the Local Union one week prior to the expiration of an employee's sick-leave payments.

Effective September 1, 1963, the Company amended its sick-leave wage payment policy for bargaining-unit employees to suspend the waiting period of one scheduled work day without pay.

Employees hired on January 1, 2017 or after will be under the following Sick Leave Policy:

SICK LEAVE WAGE PAYMENT POLICY

- Non-occupational illness/injury disability lasting more than five days will be managed by Liberty Mutual
- A total of 10 sick days per year at 100% of pay
- In the case of illnesses that exceed five consecutive work days, qualifying employees will be eligible for short term disability
- The first twelve weeks of short-term disability will be paid at 100% of base pay
- Up to thirteen additional weeks of short-term disability will be paid at 67% of base pay
- Vacation time cannot be used in lieu of 67% pay
- Vacation time cannot be used to extend a short-term disability claim prior to transitioning to long-term disability (LTD)

All Engineering Designers, Senior Engineering Designers, Distribution Design Engineers, Senior Distribution Design Engineers, Representative A – Mobile Meter Reading, Distribution Automation Technicians, Distribution Automation Specialists, Substation Automation Technicians and Substation Automation Specialists have the same sick leave wage payment benefits listed above as employees hired on or after January 1, 2017.

Section 11. Absence Due to Death in Family

11.(a) Time off without loss of pay shall be granted to employees in the event of death in the family or step-family as follows: Where the deceased was the father, mother, brother, sister, wife, child, grandparent, or grandchild of the employee, the employee shall be given time off between the death and burial up to a maximum of four calendar days and including the entire calendar day on which the funeral occurs, together with the midnight shift of the next calendar morning, so that the employee may make arrangements for the funeral and attend the services. Where the deceased was the father-in-law or the mother-in-law of the employee, the above maximum time off shall be two calendar days. In case such relative's death and burial takes place at a distant location and the employee does not attend, one day off will be allowed. In case of the death of brother-in-law, sister-in-law, aunt, or uncle, or in case of the death of any relative who is a member of the employee's household, the employee will be allowed one day off to attend the funeral. An employee seeking leave must notify the employee's supervisor of such death and request such leave, which shall be granted unless an emergency exists at the time requiring the employee's services.

Where the supervisor is satisfied that additional time off is needed by the employee to attend the funeral and to make arrangements for which the employee has responsibility, the supervisor may, at the employer's discretion, increase the maximum time allowances specified above to five or three calendar days, respectively.

11.(b) If death occurs to a member of an employee's immediate family, during the employee's scheduled vacation period, that portion of the employee's scheduled vacation from the day of death up to and including the day of the funeral will be rescheduled, but not to exceed three days. The vacation will be rescheduled at the option of the Company to another time during the calendar year. In the event vacation to be rescheduled under this section cannot be rescheduled during the current calendar year, it will be rescheduled as promptly as possible within the first three months of the following calendar year. The immediate family is defined to include the spouse, son, daughter, father, father-in-law, mother, mother-in-law, grandmother or grandfather, grandchildren, sister, brother, step-relative, or one who is considered a member of the family and living in the employee's home through a tie of obligation or friendship.

Section 12. Jury Duty Wage Payments

The Company will facilitate wage differential payments to employees on jury duty.

Section 13. Military Leave

The Company will grant a military leave of absence as required by law and provide certain benefits to an employee granted such a leave. The service record for those who are granted a military leave of absence will continue without interruption.

13.(a) **Short-Term Leave of Absence for National Guard and Active Reserve**

Any employee who is required to report for short military training periods will be granted a Short-Term Military Leave of Absence and must give a copy of the "Ordered Tour of Duty" as soon as possible to his or her supervisor so that arrangements can be made for work assignments in the employee's absence.

Upon receipt of military documentation and the Compensation for Ordered Tour of Duty form, any regular employee will be compensated for the difference between his or her base wages and military pay for a maximum of fifteen working days per Federal fiscal year (October 1 through September 30 of the next calendar year) if the military pay (taxable income on the military pay voucher) is less than the employee's base wages. Payment procedures are as follows:

An employee must complete and submit the Compensation for Ordered Tour of Duty form to the Leave Administration Department. If an employee does not submit the completed form prior to leave, the period of leave will remain unpaid until such time that the employee submits the form.

Requests for leave of absence to attend service schools or tours of duty for other than training will be considered on a case-by-case basis.

Company Benefit Plans will remain in force during short-term military leave of absence. When an employee active in the National Guard or Reserves is called for emergency duties, compensation for such a call will be considered at that time.

[25]13.(b) **Long-Term Leave of Absence for Active Duty**

Any employee who enlists, is drafted, or is called to active duty will be granted a Long-Term Military Leave of Absence in accordance with the Uniformed Services Employment and Reemployment Rights Act, 38 U.S.C. §§4301-4333. He/she must give a copy of the orders to his or her supervisor immediately. Employees on military leave for active duty may continue their health care benefits under COBRA, and for an additional six-month period subsequent to the 18-month COBRA period. Employees participating in the Retirement Plan will continue participation. Information on benefits will be provided to employees by Human Resources when HR is notified of the leave.

Upon return from military service, the employee will be reinstated, to the extent required by law, provided the employee: makes application for reinstatement within the required time following release from active duty; is still physically qualified or is able to become re-qualified with reasonable efforts; and if drafted, produces a certificate of satisfactory completion of training and service. An employee who enlisted must produce documentation of honorable discharge to qualify for reinstatement. For temporary employees, is released from military service prior to the end date of his or her temporary assignment or, for bargaining unit employees, prior to being released from the assignment.

[25] July 24, 1970 #5

In the event the military leave continues for greater than 91 days, the Company will provide a job of like status and pay if an employee's former job is not available.

Section 14. Personal Time

The Company and Union agree that NUP 13 – Personal time, will be extended to the classifications covered in this agreement. The parties also agree that the Company may change the policy / practice outlined in this NUP without negotiation. Effective January 1, 2017 personal time is eliminated.

Section 15. Leave of Absence: Union Representative

Upon written request from the Union, the Company will arrange for a leave of absence for up to four employees who are elected or appointed to the office of full-time Union representative for the Local Unions participating in this Agreement. Such arrangement will include a provision for the Local Union to pay all costs required to maintain the employee's benefits during the employee's leave of absence. The arrangement will also include provisions governing the seniority status of the full-time Union representative in such manner as may be mutually agreed upon by the Company and the Union.

ARTICLE VIII
Safety Provisions

Section 1. Policy Statement

It is agreed that the Company and the Union will work together on a continuing program of safety measures for the protection of the employees, the public, of Company property and of its service to customers.

Section 2. Employees; Judgment, Skill and Ability

In job assignments and in assignments to do specific pieces of work only such employees shall be assigned as have the necessary judgment, skill and ability, as generally reflected by their job classifications and normal assignments, to safely perform the work to be done.

Section 3. Safety Manual

The Company will issue a copy of its "Employee Safety & Health Handbook" to each employee covered by this Agreement. Any changes in the rules in the " Employee Safety & Health Handbook" shall be a matter of discussion between the Parties before becoming effective. Once the Company has made a decision on any such change in a safety regulation the grievance procedure up to and including arbitration may be initiated to determine if the Company acted reasonably in making such change.

Section 4. Company/Union Safety Meetings

Representatives of the Company and two representatives of the Union from each Division and the Local Business Managers shall meet in February and September to discuss

safety. Any conclusions reached by this committee will be followed up promptly by the Safety Section and the results will be communicated to the Business Manager and Assistant Business Manager concerned within thirty days. Within five days following any meeting of this joint committee, any Union representative may submit to the President the employee's own report on any safety matters which this representative presented for discussion at the meeting but which did not result in a committee recommendation.

The Union shall be allowed one representative on each divisional or district safety committee.

[26]Section 5. Company/Union Safety Responsibilities

The Union agrees to use its best efforts to see that its members employed by the Company shall read and comply with the safety regulations made by the Company, and that its members will wear and use the protective devices and apparel to be provided in accordance with the standard practice of the Company for the protection of employees from injury. The Company agrees to use its best efforts to see that persons who supervise employees read and comply with the safety regulations. The Company agrees also to use its best efforts to see that contractors engaged in work included in bargaining unit classifications observe the Company's safety regulations or equivalent. Safety is a joint responsibility of supervisors and employees. The primary function of a Supervisor is to direct work in a safe manner at all times. Supervisors will endeavor to see that employees observe necessary safety precautions to protect against exposure to danger when working aloft, on live wires, or in other situations of potential hazard and will direct operations in such a manner that safety precautions are observed. Supervisors will refrain from engaging in manual work when such engagement prevents them from giving adequate attention to their responsibilities as outlined in this Section.

Section 6. Protective Equipment Furnished by Company

6.(a) Protective equipment such as safety belts, rubber gloves with protectors and welder's equipment will be furnished by the Company. The Company will furnish coveralls or shirt and pants for painting of a nature where normal painting practices fail to prevent for all practical purposes destruction of the employee's clothing such as painting towers, gas holders or chain link fences. Employees whose duties include handling of acid or assignment to areas where acid producing conditions exist will be provided protective clothing when engaged in this type of work. Where required on the job the Company also will furnish for the use of employees, boots, raincoats, rainhats, heat-protective gloves, working gloves and other protective items which it has customarily furnished in the past. In addition, plastic raincoats will be furnished to collectors, rubbers and gloves to collectors and Meter Readers-AMR Drivers. Protective equipment furnished by the Company shall not be used by employees for purposes other than Company work. Such equipment shall normally be stored on Company property or in other locations authorized by the Company where it will be readily available for use when required. Each employee to whom the foregoing equipment is issued will be expected to exercise reasonable care in its use and to guard it against unnecessary damage or loss.

Replacement of clothing unavoidably destroyed due to abnormal working conditions.

6.(b) The Company shall provide and own all tools used by a gang or crew such as picks, shovels, crowbars, chain hoists and the like as required. The Company also shall

[26] July 24, 1970 #2

provide and own uncommon and infrequently used equipment and tools such as those of larger size than ordinary hand tools or any special tools required for special purposes including body belts with essential accessories and climbers with straps and pads for linemen and other employees as required. In addition, the Company shall provide those hand-tool items which are consumed in use such as files, bits, drills, hacksaw blades and the like.

6.(c) It shall be the responsibility of both the Company and the employees to maintain their respectively owned tools and equipment in good condition at all times and make replacements promptly when required for the safety of employees. The Company shall replace employees' personally owned hand tools if worn out or broken in normal use on the job. Worn out and broken tools replaced in accordance with this provision shall be turned over to and become the property of the Company.

[27]**Section 7. Live Line Practices**

7.(a) Work assignment of employees classified as Line Helpers

Work assignments of employees classified as Line Helpers will be made in accordance with the TMP.

7.(b) Energized primary work at two working levels or cutting in or out slack

Live-wire work involving either transferring of primary wires on poles or cutting in or out slack, or handling energized wire at two working levels shall be carried on by two Linemen or a Lineman and an eligible Line Helper as defined in the TMP.

The following is our understanding of operating practices to be observed under paragraph B.

1. For the purposes of this paragraph, the following definitions shall apply:

a. Straight-Line Pole

A pole in line where the energized primary wires are carried on pin-type insulators and the angle of pull is not more than 18 feet (20 degrees).

b. Corner Pole or Angle Pole

A pole located at an angle in excess of the above or where the energized primary wires are carried on disc insulators or the equivalent.

c. Junction Pole

A pole where the energized primary wires extend in three or more directions from the pole, or where the energized wires extend in two directions from the pole and are supported on crossarms attached to the pole at two different levels.

2. The transferring of energized primary wires from a point of support on one pole to a point of support on another pole and where it is necessary to work on both poles at the same

[27] July 15, 1971 #5

time shall be carried out in accordance with the number of qualified line department personnel described in the attached Live-Wire chart. The chart will be interpreted within the following scope:

a. Where the required numbers are two (2) or four (4), one-half (½) of the assigned number must be Linemen or Chief Linemen or a combination of both. The remainder may include Line Helper(s) as set forth in the TMP.

b. Where the required number is three (3), two (2) must be Linemen or Chief Linemen or a combination of both, the remainder may be a Line Helper as set forth in the TMP.

3. The cutting in or cutting out of slack in energized primary wires shall be carried out by two Linemen or one Lineman and a Line Helper as set forth in the TMP.

4. It is understood that in the event the transferring of energized wires from one pole to another also involves the cutting in or cutting out of slack or the installation of energized primary taps, or both, the provisions of 3. of this letter shall not require Linemen in addition to those provided for in the chart.

5. The Company may assign more than the specified number of employees to carry out any of the above jobs for expediting the work or for other purposes and the Union agrees that such use of extra employees shall not be considered as establishing a precedent.

6. The installation of energized primary taps on junction poles, and elsewhere where it is current standard practice, shall be carried out by two Linemen or one Lineman and one Line Helper as set forth in the TMP.

7. During 1976 contract negotiations discussions of the Company proposals for modifications of the June 18, 1975 live-wire practices letter, the Company explained that it was not its intent to change its method of assigning three-person crews as a result of the redesigning of the required number of personnel with respect to the live-wire practices, as described in the Letter of Understanding and attached chart.

On limited occasions, a line crew consisting of two qualified line department personnel could be assigned to perform jobs listed as 1 through 3 under the heading Personnel Lifting Devices of the live-wire practices letter interpretation chart, where the jobs could be performed without the use of a lifting tong in conjunction with a holding stick.

However, it is recognized that some line functions, other than the assignments listed in the live-wire practices chart, are now performed by and will continue to be performed by a two-person line crew.

LIVE-WIRE CHART

The transferring of energized primary wires from a point of support on one pole to a point of support on another pole and where it is necessary to work on both poles at the same time shall be carried out by:

Type of Pole	Change in Level of Primary Wires	Horizontal Distance Between Pole Surfaces at Level of Primary Wire on Old Pole	No Arerial Device	Personnel Lifting Device	Personnel - Lifting Device & Material Handling or Device or Aerial Derrick	Material Handling or Aerial Derrick
1/				2/	2/	2/
1 Straight Line	No more than 5 ft.	Not more than 18 in.	2	2	2	2
2 Straight Line	No more than 5 ft.	More than 18 in.	3	2	2	2
3 Straight Line	More than 5 ft.	Any distance	3	2	2	2
4 Corner	Not more than 5 ft.	Not more than 18 in.	3	2	2	2
5 Corner	Not more than 5 ft.	More than 18 in.	3	3	2	3
6 Corner	More than 5 ft.	Not more than 18 in.	3	3	2	3
7 Corner	More than 5 ft.	More than 18 in.	4	3	3	3
8 Junction	Not more than 5 ft.	Not more than 18 in.	3	2	2	3
9 Junction	Not more than 5 ft.	More than 18 in.	3	3	3	3
10 Junction	More than 5 ft. but not more than 6 ft.	Not more than 18 in.	3	3	3	3
11 Junction	More than 5 ft. but not more than 6 ft.	More than 18 in.	4	3	3	4
12 Junction	More than 6 ft.	Any distance	4	4	4	4

1/ As defined in Section 7. paragraph (b).
2/ Applicable when personnel lifting devices that can be controlled from the device's work position, or aerial derricks, are used and can be positioned so that both poles can be worked from the same truck position.

Section 8. Company/Union Understanding

Through a memorandum and meetings, supervision will be advised of the Company's intent and understandings with the Union with regard to the following:

A. Reasonable assignments during inclement weather, making particular mention of extremes of heat and cold. The Company agrees to instruct its supervisors to make reasonable assignments in all Departments during extreme cold. Except in the case of emergency or to restore service, employees will not be required to do overhead line work or steel substation structure work when the temperature is 10° or lower at the job site.

B. Inexperienced probationary Line Mechanics limited to simpler work in which they are fully qualified when assigned to two-person line crew and truck.

C. Importance of staying within the limitation provided in the Agreement on work done by supervisors.

D. Assistance will be provided, when requested by employees assigned to service customers, under conditions which present special problems or hazards.

E. Line Mechanics will get help, if requested, when performing switching duties aloft on primary voltage on a planned switching job on a scheduled day off when such switching presents an unsafe working condition.

F. Replacement of clothing unavoidably destroyed due to abnormal working conditions.

[28] [29]**Section 9. Inclement Weather**

9.(a) Except in emergency, no employee shall be required to do outdoor work when weather conditions might make such work unsafe.

9.(b) It will be the policy of the Company to give reasonable consideration to limiting the outside work of Meter Readers-AMR Drivers, when extreme weather conditions exist, providing the nature of the work will permit postponement.

9.(c) Meters installed on the outside of buildings or structures will not be tested in place during rainy or snowy weather unless the meterman is sheltered from rain or snow during the testing operation.

Section 10. Hazardous Tasks

No employee shall be required to perform any hazardous task, with which the employee is not familiar, without proper instruction and close supervision. When working on emergency service restoration, employees shall call the appropriate Company office or person designated by the Company to receive such calls for any assistance that may be required for compliance with safe work practices.

[28] July 1, 1966 B.5.
[29] July 15, 1971 #3

Section 11. Regular On Call Requirements

A Line Mechanic shall not be placed on the regular "on-call" schedule unless the employee shall have had at least six months of service in such classification.

Section 12. Work Assignment Disputes

Where a disputed work assignment clearly involves a violation of the safety rules and such abnormal hazard as to affect a person's life, such work shall not be completed until the dispute is resolved or a temporary solution is reached by the Company and the local Union concerned. This shall not apply to any established practices. This paragraph shall not be so construed as to excuse an employee from performing any established duties of the employee's job classification unless the employee is not familiar with them.

Section 13. Practices and Procedures for Rubber Gloving Energized Conductors above 600v up to three-phase 23kv MGY

1. All standard safety rules in effect shall be followed.

2. Practices and procedures set forth below shall be strictly adhered to.

3. Rubber Gloving energized conductors more than 600 volts up to 23kv MGY will be done by minimum two qualified person crew.

4. No work will be permitted on energized conductors from a pole position (line mechanic spurred into pole or standing on pole steps or other permanent pole attachments).

5. Class 2 (20 kV) gloves and properly tested sleeves shall be used for all pole work while rubber gloving high-voltage energized conductors up to and including the three-phase 23 kV MGY class. A ground-to-ground rubber glove rule shall be enforced for all voltages. Gloves shall be air inflated for testing in the morning and after lunch and at any other time deemed necessary.

6. Employees using bucket trucks shall follow all rules and procedures governing the use of bucket trucks. The insulation portion of the bucket truck shall be inspected and cleaned as necessary before work.

7. a. All energized or grounded parts such as secondaries, neutral conductors, guy wires, telephone wires, cables or CATV cables within reaching distance of the employee shall be covered with approved protective equipment. Company-owned wires and equipment may be floated clear of the pole when practical if work is being done on or near energized conductors. If the neutral conductor is moved, the continuity of all earth grounds including guy grounds shall be maintained.

b. All energized conductors or equipment within reaching distance shall be covered with approved protective equipment, except that portion which is actually being worked on. No handline shall be permitted near an unprotected area.

c. When work is performed on an energized primary conductor, all other conductors, neutrals, grounds, and potential grounds, including crossarms and any

portion of the pole within reaching distance, shall be covered with approved protective equipment.

8. When an energized primary conductor is placed on the crossarm, bracket or against the pole, it shall first be covered with a line hose, and in addition, the crossarm, bracket or pole shall be covered with a rubber blanket or other approved insulation.

9. Work being performed on energized conductors by workers in buckets, and/or by workers working at the same pole or structure, shall be confined to only one phase of any circuit at a time.

10. Work not directly related to rubber glove procedures shall not be performed on the same pole or structure. Tools and materials shall not be handed to or from the pole to a person in a bucket while a Line Mechanic is spurred to the pole or not otherwise isolated from the ground.

11. All jumpers and rubber protective equipment, including gloves, sleeves, blankets, hoods, and line hose shall be inspected before each use and shall be turned in for testing and/or washing in accordance with a Company schedule, or sooner if there is any indication that the equipment may be defective.

12. Bucket trucks shall be tested two times per year and at any other time there are indications of damage or electrical leakage.

13. When wet conditions exist, hot sticks will be used or the lines will be deenergized.

Section 14. Safety Shoes

Effective January **1, 2023**, the Company will provide up to **$300** annual allowance to Operating Department employees towards the purchase of one or more pair(s) of safety footwear that meets the requirements for impact/compression resistance and protection from electrical hazards (EH rated) as described in ASTM F2413-05 (M 1175/C75/Mt75) EH Rated Safety (steel toe or composite) footwear. The employee must furnish a receipt of purchase for reimbursement documenting the purchase of safety shoes which meet the above safety standard and the allowance will be limited to **$300** per year. Ordering safety shoes through the Company stock rooms has been discontinued.

[30] [31] [32]**Section 15. Safety Eyeglasses**

The Company will pay the full cost of lenses, frame and carrying case of clear and/or tinted prescription safety eyeglasses**,** for operating department personnel who are required to wear them for their job. Employees will be limited to two (2) pairs of safety glasses (clear and/or tinted) every two years for the term of the agreement. Employees who opt for safety glasses with Photochromatic (photogray) or progressive lenses will not receive a second pair of clear or tinted safety glasses. The Company will pay for the cost of Photochromatic (photogray) or progressive lenses. The Company will provide for the replacement of safety eyeglasses when

[30] July 1, 1969 #3
[31] July 18, 1975 #3 & #4
[32] August 21, 1995

damaged on the job. Replacement will be limited to lenses only if the lenses are damaged or obscured.

The employee will provide the Company with a current (not over two years old) prescription. The Company will also provide replacement lenses if the employee's prescription changes.

When obtaining prescription safety glasses under the Company's current plan with the American Optical Company (or other company approved vendor) employees will pay any costs for eye examinations which are not covered by their chosen medical or vision plan.

The Company will reimburse the employee for all fitting fees.

Section 16. Emergency Equipment on Vehicles

Gas masks, fire extinguishers and first-aid kits will be standard equipment on all trucks where conditions require.

Section 17. Rubber Protective Equipment

Protective rubber gloves and similar equipment are to be maintained in a safe working condition or replaced as frequently as required or when so-requested by employees.

Section 18. Bucket Trucks for Call Person

It is not intended to be normal practice to assign articulating boom bucket trucks for use by employees on-call when working alone at night.

Extendible (telescopic or similar equipment) boom bucket trucks may be assigned to employees on-call when working alone at night.

Section 19. Testing Articulating Boom Bucket Trucks

Two bargaining unit employees will be utilized when testing articulating boom bucket trucks.

Section 20. Assignment for Patrolling Rights of Way

When necessary to patrol lines on foot through rights-of-way at night or during severe weather conditions, employees will be assigned in pairs.

Section 21. Personnel Assignment for Pole-Mounted Transformers

It shall be standard practice to assign suitably qualified bargaining-unit line personnel as follows to install or remove a pole-mounted distribution transformer.

21.(a) During the hours of darkness, three qualified bargaining unit Line personnel may be utilized when high intensity lighting and when material handling bucket trucks of the type that enables the operator to be in the work area or line derrick trucks suitably rated for the load being handled are provided. Additional Line personnel will be made available when the type of

equipment indicated in this Section is not available or when required or requested by the person in charge in order to perform the work safely.

21.(b) Employees assigned shall be suitably qualified bargaining unit Line department personnel. However, under emergency conditions, when the required number of Line department personnel cannot be located or are otherwise unavailable to perform the work, other employees, including wage hour or supervisory, may be assigned to assist available Line department personnel.

Section 22. Personal Security

To enhance personal safety, employees will avoid entering a high-risk area to perform their assigned duties if it appears that their personal safety, or the safety of their personal or company property, may be endangered. Personnel should report such conditions immediately to their supervisor.

District management will request local law enforcement agencies to accompany employees performing an assignment in a high-risk area when the employee has identified the area as imminently dangerous.

Section 23. Fire Retardant Clothing (Effective January 1, **2023**)

Increase F.R. allowance to $**1,450.00** for a new hire in the first year and **$800.00** per year thereafter and for all other incumbents.

ARTICLE IX
General Provisions

Section 1. Bulletin Board for Union Use

1.(a) The Company will furnish suitably identified bulletin boards for use by the Union in such numbers and locations as mutually agreed upon. The purpose of these bulletin boards will be for the posting of notices pertaining to the Union and its members. All Union notices must be signed by an official of the Union and such notices shall contain nothing political, controversial or reflecting upon the Company, Union or any employees. Either the Union or the Company may remove from these bulletin boards any notices posted thereon which do not comply with this Section 1.(a).

1.(b) If a general notice to employees or the public is issued pertaining to a change made in this Agreement it shall be signed jointly by representatives of the Company and the Union.

1.(c) When information pertaining to Company-Union business is to be disseminated to the employees, announcement shall be posted on the official bulletin boards in the department or departments affected, and duplicates submitted to the Business Manager and Assistant Business Manager.

[33] [34]**Section 2. Supervisors Performing Work**

(a) Supervisors shall not act in other than a supervisory capacity while they are actively supervising three or more men working on the same shift with them. They shall in no case act in other than a supervisory capacity for more than twenty percent of the time.

(b) A supervisor is not relieved from the employee's responsibility to protect life and property, nor from giving occasional or emergency assistance.

(c) A supervisor called out in an emergency shall not perform regular work other than shall be immediately required to protect life and property. If any additional regular work is required, the foreman or supervisor shall call out bargaining unit personnel to perform the required work.

Section 3. Contract Work

(a) The Company agrees that it will not have work done by contract which is usually done by employees where such contracts will be accompanied by a layoff or reduction of hours in the working schedule or where men capable of doing the work are on layoff, have recall rights, and are readily available. Where contractors employing I.B.E.W. members are readily available and qualified to perform such work, they will be given any contract involving live wire work, to the extent permitted by law, and, all things being equal, will be given preference for other work usually done by employees, to the extent permitted by law.

(b) **When Contracting Out is Not Allowed**

Work regularly performed by employees covered by this Agreement will not be contracted out if it would result in loss of continuity of employment or opportunities for permanent promotions to job classifications covered by this Agreement.

[35](c) **Use of Contractors – District and Division Managers will advise Union of use of Contractors upon request**

Upon requests made at reasonable intervals by Local Union Business Managers to the Company's Division or District Managers, the Company will advise the Union of tree trimming, major plant maintenance, substation construction and electric line construction contractors working on the Company's facilities and the estimated duration of such work.

Section 4. Definition Of Emergency

An emergency, as referred to in this Agreement, is any unforeseen circumstance which involves the safety of any person, loss of or damage to any property, or interruption of or interference with service or operation.

Section 5. Wages While Negotiating

During negotiations for the amendment or replacement of this Agreement, the Company will pay basic straight-time wages to not more than twenty-four employee representatives of the

[33] July 3, 1963 #4(C)
[34] July 24, 1970 #3
[35] July 1, 1960 #2

Union for time lost from their normal work schedules while attending meetings with Company representatives. If any of these Union representatives is a shift or scheduled worker and the employee's schedule of normal work coverage includes shifts directly preceding and directly following the time during which a negotiation meeting with the Company takes place, the employee will be allowed time off with basic straight-time wages from either the shift directly preceding or the shift directly following, but not both, provided that the period of time elapsing between the end of the shift directly preceding and the beginning of the shift directly following does not exceed sixteen hours.

[36]**Section 6. Work Outside of Company Area**

It is recognized that the Company may occasionally assign employees covered by this Agreement to work in locations and upon facilities other than those owned or operated by the Company. On such occasions the employees involved, the Union and the Company shall be bound by the provisions of this Agreement except that when emergency assistance to other utility companies is involved, Section 2 of Article XII shall not be applicable. All hours for travel time or work time paid at a straight- time rate under the terms of this Agreement will be paid at double straight-time rates, when employees are assigned to work in locations or upon facilities other than those owned or operated by Eversource Energy.

Section 7. Relative Policy

It is understood and agreed that notwithstanding the provisions of the collective bargaining agreement between the parties, relatives of employees will not be hired, transferred or promoted into situations where the possibility of favoritism or conflicts of interest might exist. These restrictions also apply to a relative who is working on Company property through a contractor or vendor agency. A relative of an employee will not be hired, transferred or promoted into the same department unless the employee reports to a different supervisor. Additionally, a relative of an employee will not be hired, transferred or promoted into a position in which the relative would be in the employee's direct chain of command (no matter how far removed geographically).

Relatives (including Step-relatives) are defined as:

Father	Wife	Uncle
Mother	Father-in-Law	Aunt
Son	Mother-in-Law	Nephew
Daughter	Son-in-Law	Niece
Brother	Daughter-in-Law	Grandfather
Sister	Brother-in-Law	Grandmother
Husband	Sister-in-Law	Grandchild

If any liability is incurred as a result of discrimination charges that directly result from this Relative Policy, the Company will assume said liability.

[36] Topic: Storm Assignment

ARTICLE X
Strikes and Lockouts

Section 1. The Company agrees that there shall be no lockout and the Union agrees that there shall be no strike or stoppage of work during the period of this Contract. The Company agrees that no action will be taken against the Union as an organization, or its officers while acting as such, for any damage which may be sustained as a result of any strike or stoppage of work not countenanced or authorized by the Union.

ARTICLE XI
Employee Benefits

Section 1.

1.(a) The Company agrees to continue in effect for the period of this Agreement the benefits and eligibility requirements which apply to employees and their dependents where applicable under its current Group Life Insurance Plan, and Health Insurance Plan and the current Northeast Utilities Retirement Plan as amended. January 1, 2008, for employees hired prior to January 1, 2010, and to offer the K-Vantage Benefit to employees hired after December 31, 2009. K-Vantage will also be available to employees hired prior to January 1, 2010, who choose K-Vantage before January 1, 2010 in lieu of additional service and earnings credits under the Northeast Utilities Service Company Retirement Plan. Employees originally hired into NU System Companies other than NStar who transfer into the union after January 1, 2010 will retain the same retirement benefit plan elections (under the NUSCO Retirement Plan or K-Vantage) they have immediately prior to the transfer, and will not be given an opportunity to make a new election for either plan. Employees transferred into the union from NStar will be treated as new hires as of their transfer date and will participate in K-Vantage. Previous vesting service from NStar will be recognized for vesting of K-Vantage benefits.

1.(b) Should the Company make any major changes which affect privileges or benefits to employees under any major policy, plan, or program not specifically covered by this Agreement but affecting employees hereunder, the Company shall, if it recognizes such change as significant, notify the Union in writing of such proposed change and the effective date thereof and the Union may, if it so desires, request in writing at any time within thirty days after notice of such change, that a meeting be arranged to discuss the effect of such change on employees and the Company will promptly arrange such a meeting. If notice of such change has not been given, the Company will arrange a meeting for discussing it promptly on request of the Union.

1.(c) It is understood and agreed by the Union and the Company that continuation of benefits provided under the Plans shall, of necessity, be contingent upon the rules and regulations applicable thereto and that the Company and its Plan Carriers will have authority to administer the Plans in accordance with such rules and regulations. Any change in a policy or practice covered by this Section which is not specifically mentioned in this Agreement or any question concerning the Company's application of such policies and practices of the Pension Plan, Group Life Insurance Plan or Health Insurance Plan shall not be subject to grievance procedure or arbitration.

Section 2. Company-Sustained Injury; Total Incapacity

If during the term of this Agreement a regular employee sustains an injury on a Company job which results in total incapacity and which prevents the employee from doing any work and which is compensable under the Worker’s Compensation laws of the State of

Connecticut, the employee shall be paid the differential between the employee's normal basic after-tax wages and Worker's Compensation benefits for the period of total incapacity not in excess of one year from the date of the injury. If it is established that the injury is caused by the negligence of a third party and that third party makes settlement with the injured employee, the Company shall be reimbursed for all wage payments made to the injured employee to the extent that such settlement covers the Company's payments made under the terms of this provision.

Section 3. Employee Benefits – Increase Accidental Death Benefits

3.(a) **Notification to Union** - It is the Company's intention to continue its past practices with respect to employee benefits. Should the Company contemplate any diminution of employee benefits affecting bargaining-unit employees, the matter will be discussed with the Union in advance of the change.

3.(b) **Accidental Death Provision** - In the event any bargaining-unit employee dies as a result of a job-connected injury and benefit is payable under the accidental death provisions of Group Policy No. GC-323337, the Company will provide an additional benefit equal to the amount payable under such accidental death provisions. These benefits are in addition to life insurance coverage provided under Group Policy No. GL-323337.

Section 4. Dutch Point Credit Union

The Company will provide payroll deduction for employees desiring membership in the Dutch Point Credit Union**.**

ARTICLE XII
Expense Allowance

Section 1. Travel Time and Transportation

When required to work distant from their base area, employees will be paid expense and travel allowances as follows:

1.(a) When the Company supplies transportation between the base and work, employees will be allowed travel time at the rate applicable and equal to the time spent en route.

1.(b) When requested to travel by means of specific public transportation, employees will receive the actual fare paid and will be allowed travel time at the rate applicable and equal to the time spent en route.

Section 2. Expense Plans Outside Base Area

Except when Section 1. or Section 3. of this Article is applicable, an employee required to make the employee’s own arrangements to report at a job location including all training assignments outside the employee’s base area (except satellite/line shops or when the job location distance one way is ten (10) miles or less) will be paid a daily expense allowance as provided under one of the following Plans:

Plan A - If the distance one way is twenty-five miles or less; **$31.15** per day.

Plan B - If the distance one way is over twenty-five miles but not over forty miles; **$55.20** per day.

Plan C - If the distance one way is over forty miles but not over sixty miles; **$63.13** per day.

Plan D - If the distance one way is over sixty miles but not over ninety miles; **$71.30** per day. When the distance is beyond ninety miles, the employee will be paid mileage at the current NU mileage rate per mile for each mile beyond ninety miles.

2.(a) If on any day an employee travels one way to or returns one way from a job location under the provisions of Section 1. of this Article, the employee will be paid an expense allowance on that day under one of the following Plans:

Plan E - If the distance one way is thirty miles or less, **$26.77** per day.

Plan F - If the distance one way is over thirty miles; **$36.75** per day.

2.(b) For the purposes of the above Plans, distances shall be measured over highways which are reasonably passable and which provide the shortest routes between the employee's base area headquarters and the job locations involved.

2.(c) If an employee is required to report at two or more job locations outside of the employee's base area on one day the employee will be paid the daily expense allowance provided under the Plan applicable to the job location which is the greatest distance from the employee's base area headquarters. In addition, the employee will be paid mileage at the current Eversource mileage rate per mile one way for the actual distance traveled between the job locations involved on that day. This Section 2.(c) will not be applied to require an employee to report at two or more job locations on one day involving Plans B, C, D, or F except when it is necessary to do so to provide a full day's work or when emergency work is required. Whenever possible, employees will be advised not later than the day preceding requirement to report at a different job location.

2.(d) As part of the 2009 contract negotiations, the company and union agreed that the mileage reimbursement rate for the CL&P Blue Book and Green Book union agreements will be paid at the current Company mileage rate (i.e., the same rate as non-union employees). This rate will be paid to employees who are authorized to use their personal vehicles while on company time, unless the mileage is otherwise addressed as part of the established contractual expense plans.

It is understood by all parties that the company may change the mileage rate at its sole discretion without notice to, or negotiation with, the union. Changes or modifications to the rate will also not be subject to the grievance and arbitration procedure.

2.(e) If an employee is required to make his or her own arrangements to report to a job location, including all training assignments, outside of the employee's base area on any day and the employee is subject to any tolls using section 2.(b), the Company will reimburse the cost of such tolls to the employee.

2.(f) Employees shall not be eligible to receive any of the above expense plans during the time that they are in the 18-month Field Training program.

Section 3. Berlin Construction, Work in Central Division

An employee of the Berlin Construction Department assigned to Waterbury who is required to report for work on the job within the towns of Middlebury, Naugatuck, Prospect, Thomaston, Watertown, Wolcott, or Waterbury will be paid mileage at the current Eversource mileage rate per mile to and from the job in lieu of the provisions of Section 2 of this Article.

An employee of the Berlin Construction Department assigned to Newington who is required to report for work on the job within the towns of Berlin, Farmington, Hartford, New Britain, Rocky Hill, West Hartford, Wethersfield, or Newington will be paid mileage at the current Eversource mileage rate per mile to and from the job in lieu of the provisions of Section 2 of this Article.

[37]Section 4. Mileage Allowance for Personal Vehicle

An employee authorized to make occasional use of the employee's personally owned vehicle for Company business during working hours and for which the employee is not being paid a travel expense allowance under other provisions of this Article will be paid for such use at the current Eversource mileage rate per mile. Employees will be paid a daily mileage allowance of at the current Eversource mileage rate per mile to and from the job in lieu of the provisions of Section 2 of this Article if the distance one way to the job location is ten miles or less from the home base or satellite.

Section 5. Company Furnished Meals or Lodgings

During times of emergency when employees cannot be released long enough to make arrangements for their meals or lodgings, the Company at its expense will make suitable arrangements for same. Under such conditions the provisions of Section 5. of this Article shall not apply. For the purpose of this Section meals will be furnished at five-hour intervals unless a majority of the employees concerned in a work group agree to extend the five-hour interval. (See Article VI, Section 15 concerning time off for meals furnished under this Section 5).

Section 6. Transfer Expense Allowance

6.(a) When at the Company's request an employee is reassigned or transferred under the provisions of Article V and a change of residence is required, the employee will be reimbursed for mileage between the employee's former reporting base and the new reporting base and will be paid mileage at the current Eversource mileage rate per mile.

The following conditions apply to above temporary expense allowance:

(1) The expense allowance will be applied for each day the employee provides the employee's own transportation to travel to and/or from the employee's new reporting base.

(2) The amount of expense allowance will be based upon the actual distance in miles between the former and new reporting bases as

[37] Letter- mileage

measured over streets and highways that are reasonably passable and provide the most direct route.

6.(b) In lieu of the expense allowance outlined in Section 6.(a) the Company may either provide the employee with transportation or require the employee to live in the employee's new base area and make arrangements for the employee's meals and lodgings at Company expense.

6.(c) Payment of the expense allowance or provision of transportation or meals and lodging under this Section 6 will be limited to the first thirteen weeks from the effective date of assignment at the new reporting base or until the effective date of the employee's change of residence, whichever occurs earlier.

Section 7. Review of Expense Allowances

When in the judgment of the Company the expense allowances provided in this Article are insufficient to cover reasonable expenses it may, upon review of any particular case, make an additional allowance to cover expenses actually incurred. When an employee is assigned to work in another District, arrangements will be made either directly with the employee or through the employee's supervisor to meet the employee's reasonable expenses and the Business Manager and/or Assistant Business Manager will be advised.

Section 8. Change in Current Practices or Privilege

If, during the term of this Agreement, the Company contemplates changing a current practice or privilege, not specifically covered in this Agreement, which, if changed, would result in a significant increase in employees' personal expenses, the Business Manager or an Assistant Business Manager of the Local Union concerned will be advised in advance of the change as soon as practicable. Upon request of either party, Union and Company representatives will meet for discussion of such change.

[38]**Section 9. Tool Allowance**

The Company will provide an annual tool upgrade allowance of up to **$800.00** per year for Garage Mechanics. The employee must furnish a receipt of purchase for reimbursement documenting the purchase of job specific tools.

Any Testing Equipment, Diagnostic Tools, Torque Wrenches, Specialty Tools or Socket Sets over ½ inch drive required by the Company for performance of any job will be **supplied by the Company as shop tools.** The employee will be responsible for any tools lost or damaged through the employee's own negligence.

Any repair and/or replacement of a cordless/battery operated tool, including batteries, shall be the responsibility of the employee.

Effective June 1, 1986 new hires and transferees to the Garage Mechanic Classification shall provide and own all ordinary hand tools commonly required in the employee's regular assignment. The Company shall replace employees' personally owned hand tools **used on Company assigned work** if worn out or broken in normal use on the job **provided the tools**

[38] Topic: Replacement of employee's tools when stolen

are not covered under warranty at the time they are worn out or broken. Worn out and broken tools replaced in accordance with this provision shall be turned over to and become the property of the Company.

If an employee's tools are stolen, **not lost, while they are on Company property**, they will be replaced by the Company, if, in the Company's opinion a valid and justifiable claim exists.

[39]Section 10. Commercial Driver's License

The Company will pay applicable costs associated with obtaining a Commercial Driver's License required by the duties performed of the classification.

Applicable costs Include:

(a) endorsements
(b) various test fees
(c) issuance of permit

In addition, the Company will pay the cost difference between the employee's license fee and the license fee of the job-required CDL.

Section 11. Storm Assignment Or Other Emergency Situation

If an employee is assigned to an out of district storm assignment or other emergency situation that may require an overnight stay, and the assignment is made during the employee's regular work hours, the Company will provide ½ hour early dismissal, without loss of wages. In the event that the employee was not provided ½ hour early dismissal, the Company will provide a one-time $25.00 payment to the employee for that overnight storm or emergency event.

ARTICLE XIII
Compliance With Law

No provision in this Agreement shall be deemed to require the Company or the Union to disregard existing or future laws affecting the relations of the Company, the Union and employees. All provisions of this Agreement are subject to all applicable laws now or hereafter in effect and to the lawful regulations, rulings and orders of regulatory bodies having jurisdiction. If any such laws, regulations, rulings or orders shall conflict with any provision of this Agreement, the Company and the Union shall confer to negotiate a lawful modification. The lawful invalidating of any provision shall not affect the remaining provisions of this Agreement and it shall not constitute a grievance for the purposes of Article IV.

ARTICLE XIV
Letters of Understanding

Incorporated herein and made a part hereof by reference are confirming letters of understanding from the Company to the Union which pertain to:

[39] Topic: Commercial Driver's License

1. **System Projects** – System Projects which is dated March 16, 1998. This letter can be found in Appendix D.

ARTICLE XV
Duration

This Agreement constitutes the entire Agreement of the parties except such amendments or supplementary Agreements as are reduced to writing and signed by the parties hereto.

This Agreement supersedes all previous agreements and shall continue in force from the first day of June 1, **2022** until June 1, **2026** and thereafter for periods of one year unless canceled by advance notice in writing by either party to the other, the advance notice to be given at any time during a thirty-day period, the beginning of which period is ninety days prior to June 1, **2026** or June 1st of any year thereafter.

If either party desires to amend this Agreement on June 1, **2026** anniversary date or on June 1st of any year thereafter, a list of all proposed changes shall be submitted to the other party in writing prior to March 1st of the year involved. The party receiving the proposed changes shall have until March 10th to submit additional proposed changes to the other party. The Company and the Union agree to meet promptly thereafter in the period between the 90th and 61st day prior to the anniversary date of the Agreement to discuss the proposed changes and endeavor to reach an understanding on them. If all proposed changes are not thus disposed of in a mutually satisfactory manner, (1) the proposed changes remaining in dispute may, by mutual agreement, be submitted to arbitration or (2) either party prior to May 1st of that year may serve notice of cancellation of the Agreement if such action is deemed desirable. If all proposed changes are disposed of in a mutually satisfactory manner, the amendments mutually agreed upon shall take effect on the following June 1st, unless the parties agree upon a different effective date.

If notice is given as provided for above it shall be by registered mail addressed to, respectively:

Director-Labor Relations
The Connecticut Light and Power Company
P.O. Box 270, Hartford, Connecticut 06141-0270

or

Recording Secretary

s Shift or scheduled workers

* Rate bands designated with "*" provide minimum rates which are probationary for one year and maximum rates which are paid after the probationary period to qualified workers who regularly perform the grade of work specified for the rate band.

x Rate bands designated with "x" provide minimum rates which are probationary for six months and maximum rates which are paid after the probationary period to qualified workers who regularly perform the grade of work specified for the rate band.

y Rate bands designed with “y” provide for increases at approximately six- month intervals to employees who make satisfactory progress.

z Rate bands designated with "z" provide minimum and maximum rates and intermediate rates which will be based upon an employee's relative skill, efficiency and ability to perform the work assigned. After one year of satisfactory performance of the grade of work required for the job classification, employees will be paid the maximum rate of the band applicable to the job classification.

† Rate bands designated by "†" cover the range starting with the new employee or beginner and finishing with an experienced and fully qualified worker or helper in the respective job classifications. Increases within these bands are made at approximately six-month intervals to employees who make satisfactory progress. The hourly rate step increases applicable to the job classifications are as follows:

1(a) When an employee in any job classification is assigned to work on a shift which includes one hour or more between the hours of 6:00 p.m. and 6:00 a.m. of the following day, will receive an additional payment of $2.50 per hour.

1(b) When an employee in any job classification is assigned to work on a shift which includes one hour or more on a Sunday, the employee will receive a premium of 25 percent of the employee's basic straight time rate in addition to the employee's basic straight time rate.

R Shift differential of $2.50 per hour will be paid for the whole shift if working one or more hours before 6:00 a.m. as part of the regular shift for Stockhandlers in the Districts. (Between 4:00 a.m. and 6:00 p.m.)

APPENDIX "A" -

AGREEMENT OF JUNE 1, 2022

Schedule of Job Classifications and Basic Straight-Time Hourly Rates

Effective June 1, 2023

	Job Classification	Location		Rate Per Hour Min.	Max.

s Shift or scheduled workers

* Rate bands designated with "*" provide minimum rates which are probationary for one year and maximum rates which are paid after the probationary period to qualified workers who regularly perform the grade of work specified for the rate band.

x Rate bands designated with "x" provide minimum rates which are probationary for six months and maximum rates which are paid after the probationary period to qualified workers who regularly perform the grade of work specified for the rate band.

y Rate bands designed with “y” provide for increases at approximately six- month intervals to employees who make satisfactory progress.

z Rate bands designated with "z" provide minimum and maximum rates and intermediate rates which will be based upon an employee's relative skill, efficiency and ability to perform the work assigned. After one year of satisfactory performance of the grade of work required for the job classification, employees will be paid the maximum rate of the band applicable to the job classification.

† Rate bands designated by "†" cover the range starting with the new employee or beginner and finishing with an experienced and fully qualified worker or helper in the respective job classifications. Increases within these bands are made at approximately six-month intervals to employees who make satisfactory progress. The hourly rate step increases applicable to the job classifications are as follows:

1(a) When an employee in any job classification is assigned to work on a shift which includes one hour or more between the hours of 6:00 p.m. and 6:00 a.m. of the following day, will receive an additional payment of $2.50 per hour.

1(b) When an employee in any job classification is assigned to work on a shift which includes one hour or more on a Sunday, the employee will receive a premium of 25 percent of the employee's basic straight time rate in addition to the employee's basic straight time rate.

R Shift differential of $2.50 per hour will be paid for the whole shift if working one or more hours before 6:00 a.m. as part of the regular shift for Stockhandlers in the Districts. (Between 4:00 a.m. and 6:00 p.m.)

ATTENTION: DIRECTOR - LABOR RELATIONS

I hereby authorize The Connecticut Light & Power Company to make a single initiation fee deduction and in addition to deduct from my wages each month union membership dues in Local 420 and Local 457 of the International Brotherhood of Electrical Workers in such sums as from time to time the secretary/treasurer of Local 420 and Local 457 of the International Brotherhood of Electrical Workers may certify. Initiation fees and dues covered by this authorization are not deductible as charitable contributions for federal income tax purpose.

I further direct the Company to remit the amount deducted to the Union Officer designated by the Union to receive such payments.

This authorization shall be effective for the duration of any written agreement or extension thereof between The Connecticut Light & Power Company and Local Union Nos. 420 and 457 of the International Brotherhood of Electrical Workers, et al unless canceled in writing by me.

PROVISIONS PERTAINING EXCLUSIVELY TO TEST/TECH EMPLOYEES (FORMERLY TECHNICAL CONTRACT)

WAGES

1.(a) Appendix "A" attached hereto and made a part hereof lists the job classifications covered by this agreement for non-exempt individuals. Appendix "A" shows the basic straight-time hourly rates of pay applicable to each job classification effective as of **June 1, 2022, June 1, 2023, June 1, 2024 and June 1, 2025,** for employees who are employed in the listed job classifications on the date this Agreement is signed by authorized representatives.

1.(b) Effective **June 1, 2022, June 1, 2023, June 1 2024 and June 1, 2025,** each exempt individual's current salary will be adjusted based on their latest performance rating as follows:

Performance Rating	**Percent Ranges**
Top Achiever	0% - 8%
High Contributor	0% - 6%
Successful Contributor or Developing	0% - 6%
Improvement Needed to be a Successful Contributor	0%
Did Not Meet Performance Expectations	0%

When to pay lump sum:

Performance	**Relationship to Band Max**
Top Achiever	100% or greater
High Contributor	97.5% or greater
Successful Contributor or Developing	95% or greater
Improvement Needed to be a Successful Contributor	No lump sum or pay increase
Did Not Meet Performance Expectations	No lump sum or pay increase

1.(c) The Company will determine an individual's salary adjustment amount based on the pay increase percent ranges of Section 1.(a) and 1.(b).

2. All employees will be reviewed annually on the effective date of wages as to their progress within the rate range of the job based on their most recent performance review.

3. The Company's determination on such reviews shall not be subject to grievance or arbitration.

4. The job classifications within the respective wage rates shall be as provided in Appendix "B".

OVERTIME – FOR TEST ONLY

a. Insofar as practicable overtime work will be equitably distributed among suitably qualified employees who are in the job classifications in the area in which the work is to be performed. Overtime distribution for Lead Test Advisor assigned to a project is described in section 11.b. below. Records of distribution of overtime work will be made available to designated Union representatives upon their request and also posted on a weekly basis. Overtime lists will be furnished to the Business Manager on a monthly basis.

b. Lead Test Advisor Project Overtime Distribution

1. Insofar as necessary for a project where periods of extended overtime is involved; job classifications in the area in which the work is to be performed and the overtime list will be used in the selection of the lead test advisor for a project.

2. The lead test advisor shall be afforded all overtime hours associated with the project. The lead test advisor’s overtime hours will be evaluated every 2 months to maintain equitable distribution of overtime in accordance with Article 11, Section a.

3. In the event the lead test advisor assigned to the project is unavailable to work overtime and there is a second qualified test person assigned to the project, this person will be afforded the first right to assume the lead test advisor position for a limited time.

CALLOUT

Travel Time

Employees utilizing company supplied transportation, who have completed their scheduled workday and are called out without advanced notice will be paid at the rate applicable and equal to the time spent en route to and from work location.

LEAVES OF ABSENCE

1. The Company, at its discretion, may grant leaves of absence for personal reasons.

2. Requests for leaves of absence, including any extensions, must be submitted in writing as far in advance of the requested period of absence as is possible, shall designate the period of the leave and its purpose.

3. Written requests for leaves of absence shall be considered on a case-by-case basis.

4. Leaves of absence that are granted by the Company will be in writing, shall designate the period of the leave and its purpose.

5. An employee's seniority shall cease and such employee will be terminated as an employee if such employee fails to return to work upon termination of the leave of absence.

TOPIC: EXEMPT PAY PROVISIONS

Central Region Distribution Test Unit
Eastern Region Distribution Test Unit
Western Region Transmission Test Unit
Western Region Distribution Test Unit
Eastern Region Transmission Test Unit

These pay provisions apply to all union employees covered by this contract who are designated "exempt" under the Fair Labor Standards Act (FLSA). These pay provisions supersede all other pay provisions of this contract.

Work Day - Work Week

Exempt employees are paid an annual salary (paid biweekly) and are expected to work those hours necessary to complete the assignments of their job. Exempt employees are not normally compensated for working hours in excess of the normal scheduled work day or work week. The normal scheduled work week shall be five (5) days, Monday through Friday.

Salary

The negotiated Time Merit Progression with rates of pay shall be provided in Appendix A.

The job Classifications shall be provided in Appendix B.

All exempt employees will have their performance reviewed annually. Their progress within the range of the job will be based on their most recent performance review. The Company's determination on such reviews shall not be subject to grievance or arbitration.

An exempt employee whose current base salary is at or above the going rate of their salary grade, will receive any pay increase as a lump sum amount.

An exempt employee whose current base salary is below the going rate of their salary grade will receive a salary adjustment up to a maximum of the going rate, and any amount of the increase that would be over the going rate will be paid as a lump sum amount.

Overtime

Exempt employees will be paid an annual salary (paid biweekly). This salary will cover the regular work schedule and a reasonable amount of hours outside of the regular schedule. The normal work schedule will consist of five days.

When exempt employees are assigned to work outside their regular work schedule or on Saturdays, Sundays, or holidays, it will normally be without additional salary, unless it is authorized overtime and a four-hour weekly corridor will be applied, or during an emergency. During an emergency, exempt employees will be paid in accordance with Company policy for exempt pay during Storm Restoration (See Storm Restoration Guide below).

Exempt employees are not subject to the pay provisions of this contract concerning overtime pay (Article 11), callout pay (Article 12), rest time pay (Article 13), meal time pay (Article 14-paragraph 2), or jury duty (Article 20). Exempt employees not serving an on-call rotation assignment are not normally eligible for on-call pay. (See Storm Restoration Guide below.)

Records of distribution of overtime work for exempt employees will be made available to designated union representatives upon request and also posted on a weekly basis.

Storm Restoration

When assigned for storm restoration to other utility companies outside of the State of Connecticut, which are not within the NU System, an exempt employee will receive compensation at approximately two times salary, paid biweekly.

During storms within the NU System, an exempt employee will receive a special overtime rate in accordance with the NU System Emergency Restoration Guide.

NU System Emergency Restoration Guide

Exempt employees are expected to participate in NU System Emergency Restoration as needed. A System emergency is one created by natural or technological disasters that interrupt electric service to NU customers.

Exempt employees assigned to NU System Emergency Restoration duty will be paid a flat rate per hour for each hour worked: 1) over and above their regular work schedule, or 2) after the first eight hours worked each day (time code 232). During such Storm Restoration Assignments, exempt employees are paid from first hour worked over and above their regular work schedule. Exempt employees are not paid for travel time to their assigned emergency location.

Qualified on-call supervisors (normally serve an on-call rotation assignment) who are assigned to the supervision of line/electrical craft workers during Emergency Storm Restoration will be paid at an overtime rate of 1.4 times their hourly flat rate for all hours worked 1) outside their regular work schedule, or 2) after the first eight hours worked each day (time code 208). Such an on-call supervisor, if placed on-call, is required to remain fit for duty, near the reporting area, and to be continuously available for duty as assigned.

Exempt employees will be reimbursed for personal vehicle use during NU System Emergency Restoration at the standard flat rate per mile in accordance with Article 14-paragraph 4. Out-of-pocket meal expenses, when accompanied by a receipt, will be reimbursed for the reasonable cost of such meal.

TOPIC: UPGRADING – PROJECT TEST SPECIALIST / TEST SPECIALIST 3 or 4

Central Region Distribution Test Unit
Eastern Region Distribution Test Unit
Western Region Transmission Test Unit
Western Region Distribution Test Unit
Eastern Region Transmission Test Unit

In the absence of a supervisor for an extended period of time (e.g., vacation, illness), when a Project Test Specialist / Test Specialist 3 or 4 is specifically assigned supervisory responsibilities, the employee will be upgraded and will be paid two dollars and fifty cents ($2.50) per hour in addition to their basic straight-time hourly rate for all hours so-assigned.

Upgrade to supervisor will normally be offered on a senior to junior departmental seniority basis.

When a Project Test Specialist / Test Specialist is assigned, during their normal schedule, to temporarily provide technical advisory support in their specific area of expertise to the Training Department or for classroom and training simulator practice with peers, the employee will be upgraded and will be paid two dollars and fifty cents ($2.50) per hour in addition to their basic straight-time hourly rate for all hours so-assigned. This assignment will be offered on a senior to junior departmental seniority basis. Project Test Specialist or Test Specialist cannot be forced to take this upgrade.

When a Project Test Specialist**/Test Specialist 3 or 4** is assigned to a project (as defined below) ** to temporarily provide Lead **Test** Advisory direction in their specific area of expertise, the employee at the job location/satellite will be upgraded and will be paid two dollars **and fifty cents** (**$2.50**) per hour in addition to their basic straight-time hourly rate for all hours so-assigned. Test Specialists 3 or 4 cannot be forced to take an upgrade.

Upgrade to Lead Test Advisor will normally be offered on a senior to junior departmental seniority basis or by **paragraph b OVERTIME – FOR TEST ONLY** (Lead Test Advisor Project Overtime Distribution) where extended overtime is involved.

**** Upgrade includes distribution automation loop scheme projects that involve three or more distribution circuit modifications and substation projects with the following exception guidance:**

> **Test and Commissioning pad mounted switchgear installations is upgradable for TS3 or TS4 and not upgradable for PTS1 or PTS2.**
>
> **Test and Commissioning Transformer or Reactor Load Tap Changer (LTC) Controls is upgradable for TS3 or TS4 and not upgradable for PTS1 or PTS2.**
>
> **Test and Commissioning of individual apparatus equipment such as PT/CCVTs, or Motor Operated Switch and Controls is upgradable for TS3 or TS4 and not upgradable for PTS1 or PTS2.**
>
> **Witnessing of Commissioning Independent Power System provider testing in support of interconnecting to the electrical grid is upgradable for TS3 or TS4 and at the discretion of Management for PTS1 or PTS2.**
>
> **Mobile Transformer Installation is upgradable for TS3 or TS4 and at the discretion of Management for PTS1 or PTS2.**

Examples of jobs that do not qualify for upgrade include:

Power Factor Testing
Battery Testing
Recloser Testing **(Substation or Distribution)**
Distribution automation apparatus & controls replacements or additions
Apparatus Motion and Time Testing
Bucket Truck Testing
Distribution Relay Testing
Transmission Relay testing
Insulation Testing
Ground **Grid** Testing
Cable Fault location
Cable Testing
Radio/TV interference
Troubleshooting equipment failures
Power Quality investigations
Stray Voltage investigations
Records management
Relay & DA Device (recloser) setting changes

One Project Test Specialist or Test Specialist, when assigned work or projects that do not qualify for an upgrade will receive a single upgrade when assigned to work with a contractor and act as crew leader to direct work activities of multiple disciplines, direct commissioning activities and authorize equipment or systems to be placed into service. The employee will be paid two dollars and fifty cents ($2.50) per hour in addition to their basic straight-time hourly rate for all hours so-assigned. If contractor staffing for the assignment is not known seventy-two (72) hours in advance, this assignment will not be offered on a senior to junior departmental seniority basis.

One Project Test Specialist/Test Specialist 3 or 4, per upgradable project will receive a double upgrade when assigned to work with a contractor and act as crew leader to direct work activities of multiple disciplines, direct commissioning activities and authorize equipment or systems to be placed into service.

TOPIC: UPGRADE TO ELECTRIC SERVICE DESIGNER SPECIALIST

When a fully qualified top step Electric Service Designer is specifically assigned by his/her supervisor to perform work on a network system, primary metering or mentoring, the employee will be upgraded to the first step rate of the Electric Service Designer Specialist for those hours assigned to perform the upgraded work.

TOPIC: ON-CALL ASSIGNMENTS – ELECTRIC SERVICE DESIGNERS AND ELECTRIC SERVICE DESIGNER SPECIALISTS

The Company will extend the Teal Book on-call rate to Electric Service Designers and Electric Service Designer Specialists, who shall be put on-call at the request of the Company for Storm/Weather events where all hands are needed and all three RMTs are open. All of the provisions and requirements of on-call will apply to employees who are placed on-call.

On-call assignments will remain voluntary for Electric Service Designers and Electric Service Designer Specialists except for all hands Storm/Weather events as described above.

Exempt Employees

Exempt employees whose job requirements include assignment to take trouble calls outside of normal scheduled hours will use on-call pay codes and will be paid in accordance with Company policy.

PROVISIONS PERTAINING EXCLUSIVELY TO ENGINEERING DESIGNERS AND DISTRIBUTION DESIGN ENGINEERS

Engineering Designers and Senior Engineering Designers

Engineering Designers and Senior Engineering Designers whose base rate is above the Engineering Designer III, Step 4 rate will receive the negotiated contractual wage increase in the form of a lump sum until the Engineering Designer III, Step 4 rate catches up to their respective base rate. See Appendix A. In addition, Engineering Designers and Senior Engineering Designers will be eligible for overtime compensation in accordance with the contract.

Engineering Designers

Engineering Designers III will receive a $1.75 per hour upgrade to their base rate for those hours specifically assigned by his/her supervisor to:

- Act on behalf of Engineering Supervisor in his/her absence
- Act as team lead in project assignments in which multiple designers are needed
- Provide engineering training and technical leadership for more than one hour

Distribution Design and Senior Distribution Design Engineers

This group of employees will not be eligible for overtime or any other premium pay cited in Article VI and VII of the Teal contract.

Distribution Design Engineers and Senior Distribution Design Engineers shall receive the negotiated general wage increases.

PROVISIONS PERTAINING EXCLUSIVELY TO FIELD COMMUNICATIONS EMPLOYEES

On Call

Where the Company establishes an annual rotational scheduled on-call, all employees shall be subject to such scheduled on-call and may not opt out. The Company may establish two separate

on-call lists, one for Distribution Automation and one for Substation Automation. The annual scheduled on-call rotation may include both union and non-union employees.

Nothing shall restrict the Company's right to assign any employee to be on call for unscheduled emergency situations, such as the forecast of a storm.

Nothing shall restrict the Company's right to eliminate or combine annual rotational scheduled on-call.

Article VI, Section 10 shall not apply.

TOPIC: OVERTIME

Insofar as practicable, overtime will be equitably distributed among suitably qualified employees in the job classifications in the area in which the work is to be performed.

For purposes of project continuity, where periods of extended overtime and/or where a long term project is involved, an employee assigned to such project shall be offered all overtime hours associated with the project.

CALLOUT

Travel Time

Employees utilizing company supplied transportation, who have completed their scheduled workday and are called out without advanced notice will be paid at the rate applicable and equal to the time spent en route to and from work location.

PROVISIONS PERTAINING EXCLUSIVELY TO FIELD COMMUNICATIONS EMPLOYEES AND FIELD ENGINEERING TEST

TOPIC: USE OF COMPANY VEHICLES

The Company may authorize an employee who is assigned a Company vehicle to take the vehicle home. An employee who takes a Company vehicle home shall be subject to the following conditions:

The hours of work shall be the normal hours of work assigned to the employee. When an employee reports to his or her assigned office at the start of the day, the employee must be in the office at the beginning of his or her regular shift. If the employee is expected to report elsewhere at the start of the day and the reporting location is closer to the employee's home than the assigned office, the employee must be at the reporting location at the beginning of his or her regular shift. If the reporting location at the start of the day is further from the employee's home than the assigned office, the time spent traveling to the reporting location beyond the employee's regular commute shall be on Company time. For example, if an employee normally has a 30-

minute commute and the reporting location is 45 minutes away, the employee is expected to show up at the reporting location 15 minutes after the beginning of his or her regular shift.

APPENDIX "D"

TOPICS

TOPIC: Labor/Management Committee

The Company and Union agree to establish a joint labor/management committee to meet periodically (quarterly) during the term of the agreement to identify opportunities and develop plans to improve the quality and performance of our operations.

The Committee shall be composed of five bargaining unit employees and five management employees. The first meeting will be scheduled in September 2016 (or any other mutually agreed date).

The topics and issues to be addressed may include but not be limited to:

- "State of the Company" session including Business Plan and objectives
- Safety/Training
- Opportunities to partner on specific initiatives
- New technology (engineering)
- Employee engagement

Topic: Expanded Loading Duties for Stockhandlers

EVERSOURCE ENERGY

107 Selden Street
Berlin, CT 06037

May 25, 2016

This confirms an agreement reached between The Connecticut Light & Power dba Eversource Energy and IBEW Locals 420 and 457 for the expanded loading duties for the Stockhandlers:

1. The Company will expand the current practice of loading by the Stockhandlers, to include material and equipment such as but not limited to, cable reels and transformers onto Company vehicles.
2. It is not the intent of the Company to remove loading duties from any classification that presently performs these duties, nor is it the intent to give any classification exclusivity to the duties associated with loading and unloading.
3. The Company will train Stockhandlers on equipment necessary to perform the expanded loading duties.
4. The Company may need to reassign Stockhandlers to schedules between the hours of 6:00 AM to 6:00 PM to perform the expanded loading duties.
5. The Company will agree to post and fill 5 Stockhandler positions, locations to be determined.
6. $1.00 adder to incumbent employee base rate that obtains and maintains CDL (B).
7. New hires must be able to obtain and maintain valid CDL (B).

Sincerely,

Manager, Labor Relations

Agreed:

Joe Malcarne
Business Manager, IBEW, Local 420

John Fernandes
Business Manager, IBEW, Local 457

TOPIC: Training of Cadets – It is not the intent to train Cadets for Supervisor positions or for the acquisition of manual skills.

Company Intent – It is the Company's intent to accomplish the training of Cadet Engineers without adversely affecting training or promotional opportunity for helpers and classified workers covered by the Union Agreement and the Company will not exclude helpers and classified workers from consideration for appointment to the position of Engineering Assistant in training. Cadet Engineers will not be assigned as substitutes for helpers or classified workers to avoid employing helpers and classified workers needed to meet the Company's work requirements. Engineering Assistants may be assigned to assist supervisors in the performance of their duties by preparing and transmitting work orders, inspecting work progress and such other specific tasks which they may, in the management's opinion, be capable of performing.

TOPIC: Vacations

(A) With reference to discussion of Article VII –Vacations, it is the Company's intention to continue to administer vacation policies in accordance with Employee Relations Instruction No. 9314 and 9904 as set forth in The Connecticut Light and Power Company Manual of Procedures. Should the Company contemplate any change in these instructions affecting bargaining-unit employees, the matter will be discussed with the union in advance of the change.

(B) Illness or Injury Immediately Preceding or During Scheduled Vacation.

(C) In the event that an employee becomes incapacitated immediately preceding or during the employee's scheduled vacation, due to illness or injury, and the employee notifies the employee's supervisor of such illness or injury as soon as possible, that portion of the employee's vacation period during which the employee is incapacitated may be rescheduled, at the option of the Company, to another time during the calendar year.

(D) In determining whether the employee's vacation should be rescheduled due to illness or injury, occurring immediately preceding or during the employee's scheduled vacation, the Company may request from the employee verification from the attending physician.

(E) In the event vacation to be rescheduled under paragraph 3.(D) cannot be rescheduled during the current calendar year, it will be rescheduled (up to eighty hours), in accordance with Article VII, Section 3, within the following calendar year.

(F) When a former employee of the Company is re-employed and completes five years of continuous service, such prior service will be included in the employee's total length of service for the purpose of determining the amount of vacation eligibility, provided such prior service had been for a period of six months or more and other than on a temporary basis.

(G) Granting of credit for prior service for vacation eligibility will not change an employee's company or classification seniority date.

TOPIC: Replacement of Employee's Tools when Stolen and Garage Mechanic Tool Allowance. (Effective January 1, 2010)

If an employee's tools are stolen, they will be replaced by the Company, if, in the Company's opinion a valid and justifiable claim exists.

The Company will provide an annual tool upgrade allowance of up to $250.00 per year for Garage Mechanics. The employee must furnish a receipt of purchase for reimbursement documenting the purchase of job specific tools.

TOPIC: Subcommittee Agreements with Respect to Line-Tensioning Equipment and Progression Sequence of the Construction Equipment Operator Classification.

The parties agree that line-tensioning equipment that was being operated by construction equipment operators may be operated by any qualified employee(s).

TOPIC: Time-Merit Progression Programs in Effect

Letter of April 26, 1966
Line Helper to Lineman – (effective May 29, 1966, revised September 23, 1985, and January 6, 2005)
Electrician Helper to Electrician – (effective May 29, 1966, revised November 5, 1985 and March 19, 2008)
Splicer Helper to Splicer – (effective May 29, 1966, revised October 25, 1985, and March 19, 2008)

Letter of April 4, 1968
Mechanic Helper to Construction Mechanic – (effective April 1, 1968)
Mechanic Helper to Construction Mechanic (revised January 6, 1986)
Stockhandler – (effective January 5, 1969, revised June 1, 1986 and June 1, 2004)

Letter of January 14, 1970
Garage Mechanic Helper to Garage Mechanic – (effective January 4, 1970, revised November 14, 1985 and August 1, 2005)

Letter of June 3, 1993
Meter Service Mechanic/Installer (effective 1993, revised May 9, 2008)

TOPIC: Executive Instruction No. 18 – Uniforms: Customer Contact Personnel

Once a year the Company will arrange and pay for a complete overhaul and cleaning of all uniforms, at which time any replacements and repairs that may be necessary should be made. This overhaul and cleaning should be arranged for locally and performed without interfering with normal work assignments. In addition, the Company will provide for cleaning every two weeks.

TOPIC: Upgrading to Construction Eq. Op.

An employee upgraded to Construction Equipment Operator will be paid at the rate of $36.11 effective May 31, 2009; $37.19 effective May 30, 2010; $38.31 effective May 29, 2011.

TOPIC: Job Specifications

The following job specifications have been agreed on by the Company and the Union:

Automotive Equipment Mechanic (Berlin and Waterbury only)
Laborer
Building Maintenance Mechanic
Groundman
Survey Party Assistant (Berlin)
Instrument Mechanic (Berlin)
Chief of Party (Berlin) (Revised April 19, 1987)
Carpenter
URD Equipment Operator
Tester – Electric Meter Laboratory Helper – Tester – Electric Meter Laboratory Meter-Service Mechanic Helper – Electric – Meter-Service Mechanic – Electric (Revised June 1, 1989)
Meter Service Installer (Revised June 1, 1993)

TOPIC: Employee Progress Reports

In the future Employees will be furnished with a copy of their progress reports.

TOPIC: URD Construction Crew

URD Construction Crews will consist of one, two, three or more qualified personnel. The number of employees assigned will be dependent on the work to be done, and will be made from the Line, Splicer, or Electrical classifications. Additional Groundman, Line Electric or Splicer classified personnel will be supplied whenever required or requested by the person in charge in order to perform the work safely.

TOPIC: Installation of Submersible Transformers in Energized Silos

The scheduled installation or removal of submersible transformers in energized silos will be performed by URD crews equipped with corner-mounted derricks or other equipment assigned to the department involved.

TOPIC: Summer Employees Working Overtime

The Company will not assign temporary summer employees to prearranged overtime work on a day outside of their normal schedule when other employees capable of performing the work are available.

TOPIC: Berlin Construction, Jackson Street and 3333 Employees, Nuclear Plant Assignments

Berlin Construction employees from Jackson Street or 3333 who accept assignment to work nuclear plants, including radiation controlled areas, will be required to accept assignment for a period of not less than one year.

TOPIC: The Effect on Employees of the Establishment of Building 3333

1. It is anticipated that the Company would transfer the following classifications and numbers of employees to Newington Building 3333 during the term of the Agreement.

(1) Chief Construction Mechanic

(3) Construction Mechanics

(3) Carpenters

(2) Utility Workers

(8) Construction Equipment Operators

(2) Construction Welders

2. These transfers of Berlin Construction personnel would be offered on a volunteer basis. If the requirements above are not met on a volunteer basis in the time required, then such transfers will be required on a junior to senior basis in the classifications involved.

3. Additional required numbers of Berlin Construction employees will be reassigned to Newington Building 3333 on a volunteer basis. If the Company is unable to meet its requirements on this basis, then the Company and the Union will discuss the matter and attempt to work out a satisfactory solution. Should a satisfactory solution not be arrived at, the subject will be discussed during the next Company/Union Negotiations.

4. Present Berlin Construction employees headquartered at Jackson Street, Waterbury transferred under Paragraph 2 above, or who are reassigned to Newington Building 3333 either through voluntary action, in

response to job posting or transfer, will have their per diem base "grandfathered" for one year from the date of reassignment.

5. Present Berlin Construction employees reassigned from Jackson Street, Waterbury to Newington Building 3333 will be eligible for moving expenses for the period of one year from the date of their reassignment. Moving expenses include the following:

a. Packing of household furniture and personal effects.

b. Disconnection of major appliances.

c. $100.00 for incidental expenses.

d. Insurance coverage for the move. Employee may suggest mover. Company will engage the mover and make the arrangements with the mover.

6. If the Berlin Construction workload requires, the Company will post and hire into Building 3333.

7. The Company Proposal made on "mileage towns" dated August 9, 1977 is part of this Proposal. Any questions on distance from Newington Building 3333 to work locations will be worked out as they occur.

TOPIC: Seniority – Berlin Construction – Jackson Street (Waterbury)

Employees assigned to Jackson Street (Waterbury) as of August 1, 1982 and are reduced will have available, in addition to their options as stated in Article V, the option to displace the least senior employee within the employee's classification at 3333 or Myrock Avenue.

TOPIC: Berlin Construction

All employees hired into Berlin Construction after May 30, 1982 will be required to work at Connecticut Yankee and/or Millstone when so assigned.

TOPIC: J Schedules-Meter Service Department

J Schedules will not be utilized during the term of the Agreement in the Meter Service Department.

TOPIC: Commercial Driver's License

The Company will pay applicable costs associated with obtaining a Commercial Driver's License required by the duties performed of the classification.

Applicable costs Include:

a) endorsements
b) various test fees
c) issuance of permit

In addition, the Company will pay the cost difference of the employee's license fee and the license fee of the job-required CDL.

TOPIC: METER SERVICE INSTALLERS

Meter Service Installers will progress in their respective districts to Meter Service Mechanic without a job posting providing there is an approved vacancy to be filled and they have successfully passed the CAST test.

TOPIC: STORM ASSIGNMENT OR OTHER EMERGENCY SITUATION

If an employee is assigned to an out of district storm assignment or other emergency situation that may require an overnight stay, and the assignment is made during the employee's regular work hours, the Company will provide ½ hour early dismissal, without loss of wages. In the event that the employee was not provided ½ hour early dismissal, the Company will provide a one time $25.00 payment to the employee for that overnight storm or emergency event. (Code 029).

TOPIC: SYSTEM PROJECTS

The Company agrees to maintain the existence of a System Projects Group through the term of the Agreement.

TOPIC: GROUND RULES

The Company and Union agree to establish ground rules prior to future negotiations. In addition, the parties will start negotiations six months prior to the expiration date and conduct negotiations in such a manner that ensures conclusion by contract expiration.

TOPIC: PATH OF PROGRESSION (SILO SENIORITY)

This letter confirms our understanding reached concerning the merging of the Blue and Green Books. Seniority will be Grandfathered separately for the purpose of promotion only. Any vacancy to be filled by promotion from a former Green Book employee leaving will be offered to the senior qualified former Green Book Employee. Any vacancy to be filled by promotion as a result of a former Blue Book employee leaving will be offered to the Senior Qualified Blue Book employee. Any vacancy to be filled by promotion that cannot be identified as a former Blue/Green position will be offered to the senior qualified employee.

In the event displaced employees from a district or locality that is closed are reassigned to more than one district such displaced employees shall retain their

promotional sequence rights from their former district or locality (Blue or Green).

In the event a displaced employee has no promotional sequence in the district that he is reassigned to, the promotional sequence from his former district will apply for wage purposes only.

Retrogression drops in reverse sequence of classification progression.

Promotion to Teal means any promotion slots in at junior most position in said classification.

Promotional sequence will not apply to any District/ AWC not listed under this Topic.

All former Local 457 Blue/ Green locations, for example, are the former Green locations of Hartford, New London, Middletown and the former Blue locations of Tolland, Mystic, Madison, East Hampton, Danielson, Cheshire, and System Projects East and Central.

All former Local 420 Blue/ Green locations, for example, are the former Green locations of Stamford, Torrington, Falls Village, Simsbury and the former Blue locations of Greenwich, Newtown, Norwalk, Waterbury, New Milford, Waterbury/ Oxford, System Projects West, Torrington, Mattatuck Heights, Berlin Construction/ G.O, and Norwalk Transmission Electricians.

TOPIC: Hartford/ Simsbury/ Windsor/ Stamford Meter Readers- Green Vacation Choice Seniority

This letter confirms our understanding reached concerning the merger of the Blue and Green Books. Seniority for the purposes of selection of vacation periods will be grandfathered for existing employees in Hartford, Simsbury, Windsor and Stamford Meter Readers. Existing Hartford, Simsbury, Windsor and Stamford Meter Reading employees will be granted preference in selecting vacation periods in descending order of Teal Book seniority on a departmental basis as involved.

In the event of an employee transferring to Hartford, Simsbury, Windsor or Stamford Meter Reading their vacation preference will be based on Teal Book seniority.

In the event of an existing Hartford, Simsbury, Windsor or Stamford Meter Reader employee transferring to another district (other than Hartford, Simsbury, Windsor or Stamford Meter Reader), whether voluntary or displaced, their vacation preference will be based on Teal Book seniority in relation to other employees in their new district.

TOPIC: ADOPTION ASSISTANCE BENEFIT

The adoption benefit is offered to help employees meet some of the expenses related to adopting a child.

The adoption benefit provides reimbursement of up to $5,000 of eligible expenses for the adoption of each child under the age of 18. Only the expenses employees actually incur are eligible for reimbursement. The benefit is payable when the adoption is final (when a decree of adoption is entered by the court) and applies to expenses incurred on or after January 1, 2015.

Eligible expenses include: adoption agency fees, legal fees, court fees, travel expenses, the child's initial medical exam and certain out-of-pocket medical expenses for the natural mother.

Adoption Leave

Employees are eligible for company-paid adoption leave after completing three months of employment with Eversource. An employee's pay during the duration of his or her adoption leave will be based on his or her base pay in effect on the day the leave starts.

An employee must give his or her supervisor at least three months written notice of the date the leave will start and when the employee expects to return to work. If an employee is also eligible for Family Medical Leave Act (FMLA) leave, time taken for adoption leave will also count as FMLA leave.

Duration of Leave

Adoption leave begins on the date the child is received into an employee's home. The maximum duration of an adoption leave depends on the age of the adopted child according to the following schedule:

Age of Adopted Child	**Maximum Amount of Leave***
6 years old or younger	8 weeks
At least 7 years old but less than 13 years old	4 weeks
At least 13 years old but less than 18 years old	2 weeks

TOPIC: ON CALL ASSIGNMENTS (ADMINISTRATIVE SUPPORT UNITS ONLY)

Employees may be placed on-call outside their normal schedule hours for one or more consecutive 24-hour periods, or less than 24 hour periods. Employees who are assigned for such on-call will be paid either 1.5 hours at basic straight-time rates or 3 hours at basic straight-time rates for each 24 hour period (or less than a 24 hour period) that they are on call as follows:

(i) if the majority of the 24 hour on-call period (or less than a 24 hour assignment) is served during a weekday (Monday through **Thursday**), employees will receive 1.5 hours at basic straight time rates;

(ii) if the majority of the 24 hour on-call period (or less than a 24 hour assignment) is serviced during a holiday, weekend (**Friday,** Saturday or Sunday), or the employees day off (only for employees working a shift or special schedule), employees will receive 3 hours at basic straight time rates. With the exception of weekend on-call periods containing Company recognized holidays employees will receive no more than **three** 3 hour payments for a weekend on-call assignment (e.g., 3 p.m. Friday until 7 a.m. Monday).

If called upon to perform work, in addition to the call-time pay they will be paid for the time worked at the rate applicable but not less than two hours for each time called out, except that they will be paid not less than three hours at the applicable rate for each time called out between 12:00 midnight and 6:00 a.m.

TOPIC: COMPANY TO ESTABLISH (R) SHIFT FOR STOCKHANDLERS IN THE DISTRICTS

Hours: Between 4:00 a.m. to 6:00 p.m.
Workweek: Monday – Friday

•One qualified Stockhandler per district.
• All incumbents are affected.
•Shift offered in order by classification seniority. Ask the Stockhandlers senior to junior; absent volunteers, force junior qualified Stockhandler.
•Management may elect to fill the shift during a scheduled temporary vacancy—such as vacations or other scheduled absences.
•Filling of temporary shift vacancies will be done by volunteers; absent volunteers, junior qualified Stockhandler will be required to take the shift in their local seniority area.
•Overtime by area – No change to present practice.
•Shift differential of $2.50 per hour will be paid for the whole shift if working one or more hours before 6:00 a.m. as part of the regular shift.
•On an annual basis, the R shift will be offered by order of classification seniority. Ask Stockhandlers senior to junior; absent volunteers, force junior qualified Stockhandler.

TOPIC: G.O. PROJECT OVERTIME DISTRIBUTION

Insofar as necessary for a project involving a wiring task where overtime is involved, the qualifications of the employee and the overtime list will be used in the selection of the G.O. Electrician to perform the wiring task for a project.
The G.O. Electrician who performs wiring tasks shall be afforded overtime hours associated with the project if needed. The overtime hours will be evaluated every 2 months to maintain equitable distribution of overtime.

Records of training and distribution of overtime work will be made available to designated Union representatives upon request. Overtime lists will be posted on a weekly basis.

TOPIC: TRANSMISSION LINE DEPARTMENT

Employees in the Transmission Line Department are considered day workers and will be required to work any of the following hours of work:

- Four ten (10) hour days.
- Five eight (8) hour days.

TOPIC: HOLIDAYS FOR REGULAR 10 HOUR SCHEDULE

Effective January 1, 2020, day workers on a regular 10 hour per day work schedule will receive ten federal holidays as set forth in Article VII, Section 7. The Floating holiday hours will be used to make up the difference between the 8 hour holidays and 10 hour regular schedule.

For employees working a Monday through Thursday schedule, if the holiday falls on Friday, the employees will have the preceding Thursday designated as the holiday. For employees working a Tuesday through Friday schedule, if the holiday falls on Monday, the employees will have the following Tuesday designated as the holiday.

This supersedes the provision in the March 16, 1998 letter regarding holiday weeks for 10 hour per day employees.

TOPIC: FIELD TRAINING

Effective June 1, 2022, new hires and transfers into Field Training will receive the Step 4 Line Helper rate of pay at the time of transfer or hire into the Line Helper position.

Employees currently in Field Training as of the date of ratification of the June 1, 2022 contract will receive the Step 4 Line Helper pay effective June 1, 2022.

Employees may remain at the step they started the Line Helper position at for up to two years.

The starting rates above only apply to Line Helper positions in the Field Training program.

Employees shall not be eligible to receive any of the expense plans in Article XII, Section 2 during the time that they are in the 18-month Field Training program.

Article V- Employee Option Sheet Example:

6/23/2016

ARTICLE V SECTION 3(b) TRANSFER

In accordance with Article V of the current Agreement, I, _____have been offered the following options: _____, and I elect option number _____.

1. Displace the employee having least Teal Book Seniority in my classification:

A. _____ District B. _____ Region

2. Displace the employee having least Teal Book Seniority in my classification:

_____ Company

3. Displace the employee having least Teal Book Seniority in a lower job classification within my normal sequence of job progression within the locality:

_____ Classification

4. If qualified, displace the employee having least Teal Book Seniority within the locality:

_____ Classification

If an employee subject to reassignment has insufficient Teal Book Seniority to exercise provisions (1) or (3) then the employee may:

5. Displace the employee having least Teal Book Seniority in a lower job classification within my normal sequence of job progression:

A. _____ Classification-District B. _____ Classification-Region C. _____ Classification-Company

6. If qualified, displace the employee having least Teal Book Seniority:

A. _____ District-Classification B. _____ Region-Classification

If an employee subject to reassignment has insufficient Teal Book Seniority to exercise provisions (1),(2), (3), (4), (5), or (6):

7. If qualified, displace one of the five employees having least Teal Book Seniority within the Company:

A. _____ Classification-Location B. _____ Classification-Location C. _____ Classification-Location
D. _____ Classification-Location E. _____ Classification-Location

8. If qualified, layoff with recall rights.

9. If qualified, layoff with severance pay without recall rights.

10. If qualified, displace least senior excess employee in the same job classification in the same locality.

11. Elect vacancy of _____ listed on back of option sheet.

_____ Employee's Signature and Date _____ Present Classification and Location

_____ Displaced Employee _____ Classification _____ Seniority Date _____ Location

THE HARTFORD ELECTRIC LIGHT COMPANY

and

Local 1419, I.B.E.W.

Effective as of July 1, 1960

In addition to matters agreed upon and incorporated in the collective bargaining Agreement of even date between the parties, the following are agreements and understandings reached concurrently with such collective bargaining Agreement.

1. *** Obsolete

2. While the collective bargaining Agreement between the parties provides that there will be no other restriction on the Company's use of outside contractors, this will confirm our understanding in respect to the use of outside contractors so far as it involves or affects work in classifications in the bargaining unit.

When contractors employing I.B.E.W. members are readily available and qualified to perform live wire work usually done by employees in the bargaining unit, they will be given any contracts involving live wire work and, all things being equal, will be given preference for other work usually done by employees in the bargaining unit. It is understood that this limitation does not apply to the kinds of work other than live wire work customarily given to outside contractors in the past such as tree trimming and group replacement of streetlights.

Also, the Company, all things being equal, will not have work done by contract which is usually done by employees in the bargaining unit when this would cause a layoff of such employees. This will in no way apply to the use of nonbargaining unit personnel in the employ of the Company which is covered in a separate memorandum.

3. It is understood that any part-time employees of the Company currently performing work in classifications in the bargaining unit are excluded from the bargaining unit and that the Company will not add to the number of such employees.

4. *** Obsolete

5. *** Superseded

This memorandum shall be considered to be a part of the collective bargaining Agreement between the parties although not incorporated physically therein and shall be effective for the duration of said collective bargaining Agreement.

Mr. Chester Reynolds
Business Manager, Local 383, I.B.E.W.
345 Riverside Avenue
Torrington, Connecticut

Dear Mr. Reynolds:

This is to confirm yesterday's discussion as to our reasons for eliminating from the Agreement we signed, Item 11 which was a new Section 12 to be included under Article X and which is found in the Agreement with Locals 468, 469, and 1419. This Section was left out, not because we expect the Agreement to operate very differently on this subject from those we have with the other Locals, but rather because Local 383 had some concern as to its meaning and application and preferred not to have it in their Agreement. Rather than hold up proceedings, we have agreed to remove it with the understanding that it is the intent of our Agreement that temporary assignments to higher classifications may be made occasionally under circumstances where there is no vacancy and where there is no employee absent. Along with this understanding, the Union reserves the right to bring up a claim of vacancy if, in their judgment, they feel that temporary assignments of this special nature are so frequent as to indicate a need for additional full-time help. Please indicate your acceptance of this by signing and returning the copy of this letter which is enclosed.

Very truly yours,

THE HARTFORD ELECTRIC LIGHT COMPANY

AGREEMENT

between

THE HARTFORD ELECTRIC LIGHT COMPANY

and

LOCAL 383, I.B.E.W.

as of July 1, 1963

*** Paragraph Obsolete

We have also agreed to the following interpretations and applications of Section II of Article VI concerning temporary assignments to a higher classification:

1. That it is the intent of our Agreement that temporary assignments to higher classifications may be made occasionally under circumstances where there is no vacancy and where there is no employee absent. Along with this understanding, the Union reserves the right to bring up a claim of vacancy if, in their opinion, temporary assignments of this special nature are so frequent as to indicate the need for additional help.

2. Although the Agreement only requires the Company to rotate temporary assignments among qualified employees in order of seniority where such assignments exceed two weeks, it is the intent that in any case where assignment to a given classification occurs frequently that such assignments be rotated even though they be less than a week's duration, provided the largest share of such assignments are given to the senior employee.

IN TESTIMONY WHEREOF:

The parties hereto have executed this Agreement the day and year first above written.

Mr. Chester Reynolds, Business Manager, Local 383, I.B.E.W.

Mr. Charles McBrien, Business Manager,
Local 1419, I.B.E.W.

This is to confirm certain statements of intent made by the Company during our recent negotiation meetings and certain understandings which are not a part of the Agreement itself.

1. *** Obsolete

2. Superseded (June 1, 1980)

3. *** Implemented

4. The Company plans to hold meetings with supervisors for the purpose of reviewing the terms of the Agreement and to emphasize the following points:

   a. *** In Contract

   b. That every effort will be made to give a shift employee as much advance notice as is practicable when the employee is to be given a holiday off. Further, that when such a holiday off is scheduled, it will not be interfered with except in case of emergency or the unforeseen absence of another employee.

   c. Special mention will be made of the contract limitations on the amount and kinds of work to be performed by supervisors.

5. During the period of our Agreement, the Director of Employee Relations plans to arrange periodic meetings with the representatives of each of the local unions for the purpose of discussing on an informal basis, any subjects of current interest.

MEMORANDUM OF AGREEMENT

between

THE HARTFORD ELECTRIC LIGHT COMPANY

and

LOCAL 1419, I.B.E.W.

This is to confirm understandings reached as a result of our current negotiation discussions.

A. The following policy changes will be made effective as of July 1, 1966:

1. *** Superseded

2. *** Superseded

3. *** Superseded

4. *** In Contract

5. *** In Contract

B. The following practices will be reaffirmed through meetings with supervisors to be held during the month of July:

1. On-call schedules will be posted at least one month in advance, hopefully more, and will cover as long a period as is practicable, recognizing that there will necessarily be later revisions to accommodate unanticipated absences or changes in personnel or in operating requirements.

2. A regular system must be maintained whereby an employee will be notified the actual hours of overtime work recorded as soon as practicable after having worked overtime.

3. If supervision decides a replacement is needed to cover the illness of a person "oncall," it is supervision's responsibility to designate the substitute, giving consideration to the relative amounts of accumulated overtime worked by those qualified for the assignment.

4. Although time required for washing up will vary with circumstances and no set amount can be guaranteed, it is the general practice to try to complete the normal day's work early enough to allow reasonable time for washing up.

5. On days of extremely cold weather, particularly when accompanied by high winds, supervision is expected to use discretion so as to minimize exposure

aloft of any one lineman in the performance of nonemergency work which does not have to be completed that day.

Accepted for the Union:

July 3, 1969 /s/ Clarence L. Fillmore Jr.
Business Manager, Local 1419, I.B.E.W.

July 24, 1970

Mr. Philip A. Lent
Business Manager, Local 383, I.B.E.W.

Mr. Clarence L. Fillmore Jr.
Business Manager, Local 1419, I.B.E.W.

Gentlemen:

This is confirm our understanding on the following matters discussed during our negotiations meetings in connection with a new Agreement to be effective as of July 1, 1970:

1. In the event that an employee suffers a serious verified incapacitating illness or injury during the employee's scheduled vacation, and the employee notifies the employee's supervisor of such illness or injury as soon as possible, that portion the employee's vacation period during which the employee is incapacitated may be rescheduled, at the option of the Company, to another time during the calendar year.

An employee who has been unable to take all of the employee's vacation by December 31 due to verified incapacitating illness or Company operating requirements will have their vacation period extended up to eighty (80) hours until the end of the following year.

In determining whether the employee's vacation should be rescheduled, the Company may request from the employee verification from the attending physician.

2. In connection with the administration of Section 2 of Article IX of the current Agreement, in the event the Union wishes to question whether or not the Company has acted reasonably in making a change in a safety regulation, such issue shall first be referred for review to a committee of two safety specialists, one appointed by the Company and one appointed by the Union. If the two representatives agree as to their decision on the issue submitted, it shall be binding on both parties.

In the event the Committee is unable to agree, then the same issue shall be submitted to arbitration under Article IX of the current Agreement and the Arbitrator may use the two safety specialists as consultants in reaching the employee's decision following a hearing on the issue.

3. This will confirm the Company's intent with respect to the application of paragraph (a) of Section 2, Article X of the current Agreement. In administering Section 2(a), the Company intends to use the twenty percent as a guideline in relation to the Fair Labor Standards Act and not as an authorization for supervisors to do regular work a full twenty percent of the time under normal operating conditions.

Both the Company and the Union plan to follow the administration of this clause very carefully during the period of the contract year.

4. The sentence in paragraph 3 of the Memo of Agreement signed June 30, 1967, which reads, "Similarly, any hours worked but offset by equivalent rest time shall not be recognized," shall be deleted. As a result, paragraph 3 will read:

> "In connection with the revision of Article IV, Section 2(e), the following interpretation is agreed upon. Double the straight time rate will be paid for those hours worked beyond sixteen within any twenty-four hour period but not beyond such twenty-four hour period. Only such hours actually worked shall be recognized for these purposes. It is also agreed that any consecutive hours actually worked beyond sixteen consecutive hours actually worked will be paid at double the straight time rate whether offset by rest time or not." (Amended July 1, 1976)

5. While not part of the Collective Bargaining Agreement, for the duration of the Agreement, it is agreed, in connection with Article VIII, Grievance Procedure, that:

In the event a Business Manager and/or Assistant Business Manager has factual and reasonable evidence that the Company has violated a provision(s) of the Agreement and the employee(s) affected fails to present a grievance in Step One, then the Business Manager and/or Assistant Business Manager having first notified the employee(s) affected, may initiate a grievance in the Second Step at any time within ten working days after the date of the claimed violation. This period will be extended to fifteen working days should the Assistant Business Manager be absent during the original ten-day period.

6. While not part of the Collective Bargaining Agreement, for the duration of the Agreement, it is agreed that in addition to the two weeks Armed Forces training leave provided for in Article X, Section 14, an employee required to report for duty by a Reserve Component of the Armed Forces in the event of civil disturbance or natural disaster shall for an additional maximum of five working days, be paid the difference between the pay received for such service and the employee's regular straight time pay.

7. While not part of the Collective Bargaining Agreement, for the duration of the Agreement, it is agreed in connection with Article X, Section 8(a) that: The Company will not permanently transfer any employee from the Bargaining Unit to positions outside the Bargaining Unit unless the employee himself so desires.

Very truly yours,

R. H. Peterson
Director of Employee Relations

Accepted for the Union:

Business Manager, Local 1419, I.B.E.W.

July 24, 1970
Mr. George O. Potter Jr.
Business Manager, Local 468, I.B.E.W.

Mr. Norman N. McPhail
Business Manager, Local 469, I.B.E.W.

Gentlemen:

This is to confirm our understanding on the following matters discussed during our negotiations meetings in connection with a new Agreement to be effective as of July 1, 1970:

1. In the event that an employee suffers a serious verified incapacitating illness or injury during the employee's scheduled vacation, and the employee notifies the employee's supervisor of such illness or injury as soon as possible, that portion of the employee's vacation period during which the employee is incapacitated may be rescheduled, at the option of the Company, to another time during the calendar year.

An employee who has been unable to take all of the employee's vacation by December 31 due to verified incapacitating illness or Company operating requirements will the employee's vacation period extended until the end of the following calendar year.

In determining whether the employee's vacation should be rescheduled, the Company may request from the employee, verification from the attending physician.

2. In connection with the administration of Section 2 of Article IX of the current Agreement, in the event the Union wishes to question whether or not the Company has acted reasonably in making a change in a safety regulation, such issue shall first be referred for review to a committee of two safety specialists, one appointed by the Company and one appointed by the Union. If the two representatives agree as to their decision on the issue submitted, it shall be binding on both parties. In the event the committee is unable to agree, then the same issue shall be submitted to arbitration under Article IX of the current Agreement and the arbitrator may use the two safety specialists as consultants in reaching the employee's decision following a hearing on the issue.

3. This will confirm the Company's intent with respect to the application of paragraph (a) of Section 2, Article X of the current Agreement. In administering Section 2(a), the Company intends to use the twenty percent as a guideline in relation to the Fair Labor Standards Act and not as an authorization for Foremen and other supervisors to do regular work a full twenty percent of the time under normal operating conditions.

Both the Company and the Union plan to follow the administration of this clause very carefully during the period of the contract year.

4. While not part of the Collective Bargaining Agreement, for the duration of the Agreement, it is agreed in connection with Article VIII, Grievance Procedure, that:

In the event a Business Manager and/or Assistant Business Manager has factual and reasonable evidence that the Company has violated a provision(s) of the Agreement and the employee(s) affected fails to present a grievance in Step One, then the Business Manager and/or Assistant Business Manager having first notified the employee(s) affected, may initiate a grievance in the Second Step at any time within ten working days after the date of the claimed violation. This period will be extended to fifteen working days should the Assistant Business Manager be absent during the original ten day period.

5. While not part of the Collective Bargaining Agreement, for the duration of the Agreement, it is agreed that in addition to the two weeks Armed Forces training leave provided for in Article X, Section 14, an employee required to report for duty by a Reserve Component of the Armed Forces in the event of civil disturbance or natural disaster shall for an additional maximum of five working days, be paid the difference between the pay received for such service and the employee's regular straight time pay.

Gentlemen:

This is to confirm our understanding on the following matters discussed during our negotiations meetings in connection with a new Agreement to be effective as of July 1, 1975.

1. The Letter of Intent dated July 17, 1973 and other Letters of Intent referred to in paragraph 1 of that letter are extended until July 1, 1976 except as noted in paragraph 2 below.

2. Delete Paragraph 2 - Letter of Intent July 15, 1971 to Local 383.

Delete Paragraph 2 - Letter of Intent July 15, 1971 to Locals 468 and 469.

Delete Paragraph 2 - Letter of Intent July 15, 1971 to Local 1419.

3. As an alternative to the Company's current plan with the American Optical Company for providing safety glasses where required on the job, an employee so desiring may purchase prescription safety glasses through commercial sources. For such purchases the Company will pay the following allowances: $12 single lens, $22 bifocal lens, $29 trifocal lens, providing such lens and frames are certified to conform to Z87.1 U.S.A. Standard Practice for Occupational and Educational Eye and Face Protection.

4. (Effective January 1, 2005) When obtaining prescription safety glasses under the Company’s current plan with the American Optical Company (or other company approved vendor) employees will pay any costs for eye examinations which are not covered by their chosen medical or vision plan provisions.

The Company will reimburse the employee for all fitting fees.

Very truly yours,

R. H. Peterson
Director of Employee Relations

Accepted for the Union:

Business Manager, Local 457, I.B.E.W.

Gentlemen:

This is to confirm our understanding on the following matters discussed during our negotiations meetings in connection with a new Agreement to be effective as of July 1, 1976.

1. The Letter of Intent dated July 18, 1975 and other Letters of Intent extended by that Letter are extended until July 1, 1977 except as noted in paragraph 2 below.

2. Delete Letter of Intent June 30, 1967 to Local 383.

Delete Letter of Intent June 30, 1967 to Local 1419.

Amend last sentence of paragraph 4 of Letter of Intent July 24, 1970 to Locals 383 and 1419 to read: "It is also agreed that any consecutive hours actually worked beyond sixteen consecutive hours actually worked will be paid at double the straight time rate whether offset by rest time or not. (Amended July 1, 1976)."

Delete paragraph 5 of Letter of Intent July 18, 1975 to Locals 420 and 457.

3. ***Deleted.

Gentlemen:

This is to confirm a statement of intent made by the Company during 1982 Company-Union (CL&P Green Book) negotiations.

The Labor Relations Department will provide, upon requests made at reasonable intervals by the Local Union(s) Business Manager(s), the year-to-date hours of employees temporarily upgraded to "chief" or "top" classification.

Very truly yours,

R. E. Pawloski
Labor Relations Administrator

August 21, 1995

Mr. J. R. Healey, Business Manager, Local 420, I.B.E.W.

Mr. J. R. Kelly, Business Manager, Local 457, I.B.E.W.

Gentlemen:

This is to confirm our understanding on the following matters discussed during our negotiations meetings in connection with a new Agreement to be effective as of June 1, 1995.

1. The Letter of Intent dated July 22, 1976 (page 138 of current Agreement) and other Letters of Intent extended by that Letter are extended until June 1, 1998 except as superseded by paragraphs 2. and 3. below.

2. The Company will pay the full cost of lenses, frame, and case of clear and/or tinted prescription safety eyeglasses for operating department personnel who are required to wear them for their job. Employees will be limited to two (2) pairs of safety glasses (clear and/or tinted) every two years for the term of the agreement. Employees who opt for safety glasses with Photochromatic (photogray) or progressive lenses will not receive a second pair of clear or tinted safety glasses. The company will pay for the cost of Photochromatic (photogray) or progressive lenses. The Company will provide for the replacement of safety eyeglasses when damaged on the job. Replacement will be limited to lenses only if the lenses are damaged or obscured.

The employee will provide the Company with a current (not over two years' old) prescription. The Company will also provide replacement lenses if the employee's prescription changes.

The Company will reimburse the employee for all fitting fees.

Very truly yours,

C. W. Grisé
Senior Vice President - Human Resources
and Administrative Services

Business Managers
Locals No. 420 and 457
International Brotherhood of Electrical Workers

Gentlemen:

This letter concerning live-wire practices, referred to in Article XVIII of the June 1, 1989 Agreement, is to confirm our understanding of certain operating practices to be observed in the performance of work on energized primary conductors.

A. Work assignment of employees classified as Line Helpers

When a line helper is in the first three rate steps, the employee may be assigned to perform work on energized circuits of not higher than secondary voltage. When a line helper has attained the fourth rate step, the employee may be assigned, under close supervision, to apply protective equipment on primary conductors necessary to perform work safely on energized conductors not in excess of 600 volts. When a line helper has attained the fifth rate step, the employee may be assigned to perform simple work on poles involving energized primary circuits provided a Lineman is in the work area.

B. Energized primary work at two working levels or cutting in or out slack

Live-wire work involving either transferring of primary wires on poles or cutting in or out slack, or handling energized wire at two working levels shall be carried on by two Linemen or a Lineman and an eligible Line Helper in the sixth, seventh, or eighth rate step, except that the sixth-step helper will not be required to perform the work of cutting in or out of slack on energized wires unless under close supervision.

The following is our understanding of operating practices to be observed under paragraph B.

1. For the purposes of this paragraph, the following definitions shall apply:

a. Straight-Line Pole

A pole in line where the energized primary wires are carried on pin-type insulators and the angle of pull is not more than 18 feet (20 degrees).

b. Corner Pole or Angle Pole

A pole located at an angle in excess of the above or where the energized primary wires are carried on disc insulators or the equivalent.

c. Junction Pole

A pole where the energized primary wires extend in three or more directions from the pole, or where the energized wires extend in two directions from the pole and are supported on crossarms attached to the pole at two different levels.

2. The transferring of energized primary wires from a point of support on one pole to a point of support on another pole and where it is necessary to work on both poles at the same time shall be carried out in accordance with the number of qualified line department personnel described in the attached Live-Wire chart. The chart will be interpreted within the following scope:

a. Where the required numbers are two (2) or four (4), one-half (½) of the assigned number must be Linemen or Chief Linemen or a combination of both. The remainder may include Line Helper(s) in the sixth, seventh, or eighth rate steps.

b. Where the required number is three (3), two (2) must be Linemen or Chief Linemen or a combination of both, the remainder may be a Line Helper in the sixth, seventh, or eighth rate step.

3. The cutting in or cutting out of slack in energized primary wires shall be carried out by two Linemen or one Lineman and a Line Helper in the seventh or eighth rate step.

4. It is understood that in the event the transferring of energized wires from one pole to another also involves the cutting in or cutting out of slack or the installation of energized primary taps, or both, the provisions of 3. of this letter shall not require Linemen in addition to those provided for in the chart.

5. The Company may assign more than the specified number of employees to carry out any of the above jobs for expediting the work or for other purposes and the Union agrees that such use of extra employees shall not be considered as establishing a precedent.

6. The installation of energized primary taps on junction poles, and elsewhere where it is current standard practice, shall be carried out by two Linemen or one Lineman and one Line Helper in the sixth, seventh, or eighth rate step.

7. During 1976 contract negotiations discussions of the Company proposals for modifications of the June 18, 1975 live-wire practices letter, the Company explained that it was not its intent to change its method of assigning three-person crews as a result of the redesigning of the required number of personnel with respect to the live-wire practices, as described in the Letter of Understanding and attached chart.

On limited occasions, a line crew consisting of two qualified line department personnel could be assigned to perform jobs listed as 1 through 3 under the heading Personnel Lifting Devices of the live-wire practices letter interpretation chart, where the jobs could be performed without the use of a lifting tong in conjunction with a holding stick.

However, it is recognized that some line functions, other than the assignments listed in the live-wire practices chart, are now performed by and will continue to be performed by a two-person line crew.

Very truly yours,

Senior Vice President-Human Resources and Administrative Services

CONFIRMED FOR THE UNION:

By _____ Date *August 21, 1995*
Business Manager, Local 420

By _____ Date *August 21, 1995*
Business Manager, Local 457

March 16, 1998

Mr. William Hogg, Assistant Business Manager Local 420 – I.B.E.W.

Ms. Theresa Kmetetz, Assistant Business Manager
Local 457 – I.B.E.W.

Dear Mr. Hogg and Ms. Kmetetz:

This letter serves to confirm understandings reached as a result of our current negotiation discussions regarding the new CL&P Blue Book Department – System Projects.

Scope of System Projects

System Projects work is defined as any assignment that exceeds 120 continuous manhours.

Reporting Locations, Classifications and Population

	East (East Hampton)	West (Newtown)
Chief Lineman (rubber gloving)	3	3
Lineman (rubber gloving)	9	9
Helper	1	1

Hours of Work – Premium Pay – Holidays

All employees transferring into System Projects will be required to work any of the following hours of work:

- Four ten (10) hour days:
  - Eight (8) hour schedules during work weeks that contain holidays.
  - Premium pay will be in accordance with Article VII, Section 13(b).
- Straight eight (8) hour days.
- Eight (8) hour days with an unpaid lunch.

Overtime Rotation

Insofar as practicable, overtime work will be equitably distributed among suitably qualified employees who are assigned to the project in which the overtime work is required on a weekly basis.

Temporary Upgrades

When required, employees will be offered temporary upgrades according to greatest classification seniority on the project.

Work Practices

- Rubber gloving practices and procedures will be in accordance with the Blue Book Topic.

- System Projects line classifications will not perform switching in substations.

- It is not the Company's intention to mix district and System Projects linemen except for conversions. Any other mixing of district and System Projects linemen will be on a voluntary basis.

Incentive Compensation

Company and Union agree to meet and discuss, within 120 days from the date of this Letter of Understanding, the feasibility of adopting an incentive compensation program for System Projects bargaining unit employees.

Company and Union Review Committee

Representatives of the Company and Local Unions shall meet from time to time, at the request of either party to discuss matters pertaining to safety, efficiency and other cooperative efforts.

Storm Restoration Protocol

Available district linemen will be utilized first on storm restoration activities and then available System Projects Linemen, followed by Transmission linemen. If System Projects is working in an area hit by a storm, they may be required to perform storm restoration activities until they are relieved by available outside district crews from the area (as defined in Appendix C).

Seniority

Reassignment and layoff (see attached option sheet).

Appendix C

Department	Local Seniority Area
System Projects	East (East Hampton) West (Newtown)

Training

Training for helpers will be in accordance with the existing Lineman's Time Merit Progression Program. If a "non-rubber gloving" lineman applied for a System Projects position, rubber glove training will be provided.

Inclement Weather

System Projects linemen shall not be required to perform outdoor work when weather conditions might make such work unsafe. Work to be performed during inclement weather will be by mutual agreement.

Job Positions

The Company will give preference to its regular Blue Book bargaining unit employees and then its regular Green Book bargaining unit employees over hiring new employees when making placements within System Projects. Vacancies created by Green Book and Blue Book bargaining unit employees posting into System Projects will be filled in a timely manner, but not necessarily in the same location.

The Company and Union will act in accordance with all other provisions of the Blue Book Agreement.

Very truly yours,

/s/ Raymond C. DiCenso
Sr. Consultant – Labor Relations

RCD/tjk

ACCEPTED FOR THE UNION:

/s/ William Hogg, Assistant Business Manager	3/16/98
Local 420 – I.B.E.W.	Date
/s/ Theresa Kmetetz, Assistant Business Manager	3/16/98
Local 457 – I.B.E.W.	Date

11/10/2003

An agreement on a protocol for assigning CL&P-System Project crews to participate in major storm restoration activities at locations other than those owned or operated by the Company (Northeast Utilities)

The agreement is as follows:

- System Project crews will comprise of approximately 15% of the total number of crews participating in major storm restoration activities
- This agreement does not take effect until a minimum of 10 crews from the Divisions are assigned
- The Company will make an earnest effort to draw these crews from the various system project locations as evenly as practicable
- System Project crews will be selected on the basis of low overtime by location where practicable
- As the determined supervision, System Project line-workers will be mixed with Division line-workers when work requirements dictate (consistent with present practices)

Re: Extension of 'Gold Coast' Program to Local 420 Bargaining Unit Employees

Dennis:

Pursuant to our March 28th telephone call, I am providing our written commitment to extend to your members the subject Gold Coast program. This program, outlined in the attached memorandum, has already been implemented for qualified non bargaining unit employees, and may be discontinued at any time at the discretion of the company.

Please indicate your acceptance of this offer in the space provided below. I will be happy to answer any questions or address any comments you may have on this program.

Re: "Gold Coast" Program (Revised)

Revised – June 2016

To support Eversource's efforts of attracting and retaining employees in or near the high-cost, high-traffic area of Connecticut commonly referred to as the "Gold Coast," the Company maintains a program of the same name, which provides additional compensation above and beyond an employee's base salary.

Highlights of the program include:

- The Company will pay an initial Transfer Bonus Payment (or "Anniversary" payment) for new employees being hired and transferees into specific job locations, and an Annual Geographic Adjustment Payment to employees in designated job locations – specifically, the Stamford and Norwalk work centers.
- We will formally relax the 30-minute resident rule to 60-minutes.

The specifics of the plan:

1. Existing employees in the designated job locations as of 02-17-03 who are still in one of those specific locations on 12-31-03 will receive an annual $3,000 Geographic Adjustment Payment. This will occur every year as long as the Company deems this program necessary. The Company, in its sole discretion, retains the right to end this program at any time. In future years January 1 will be used as the start date.

2. Any employees who transfer or are initially hired into these designated job locations while the program is in effect will receive a one-time, once-in-a-lifetime $15,000 Transfer Bonus Payment, in the form of $5,000 after each of the first three anniversaries of such transfer, assuming the employee is still in a qualifying position.

3. The Annual Geographic Adjustment Payment will be payable in February. If an employee transfers out at any point in a calendar year, he/she is ineligible for that year's payment.

4. Should an employee transfer out of these job locations at any time, there is no obligation to repay any of the payments; however, no further payments will be made, and the employee will be ineligible for any additional Transfer Bonus Payments. The only exception is for an employee transferring out to accept a supervisory position; such employee will receive a pro-rated Transfer Bonus Payment for the number of days in the year the employee was assigned to one of the designated job locations. The employee will be eligible for the remainder of the Transfer Bonus Payment if he/she ever transfers back to one of these job locations as a supervisor or above.

5. The Geographic Adjustment Payment is pensionable each year, if the payment is made prior to the last month before your separation from Eversource. The Transfer Bonus Payment is not pensionable.

Q&A's for Proposed Gold Coast Program

Q1 – If I am in the program, assigned to one of the qualifying job locations, and retire during the year, what is the status of the Geographic Adjustment Payment I would have received at year's end?

A – The Geographic Adjustment would be prorated, for the time worked during the year up to the date of retirement, and would be paid out within 30 days after your effective retirement date.

Q2 – What happens if I am currently working in one of the qualifying job locations and I am assigned to a rotational assignment outside any of the qualifying job locations during the year?

A – If the Company assigns you to a temporary assignment at the Company's convenience, and you are expected to return to a qualifying location at the end of the assignment, you will be paid a full Geographic Adjustment Payment at year's end, when the other recipients are paid.

Q3 – What happens if I am currently working in one of the qualifying job locations and am downsized during the year?

A – You would first try to locate another position within Eversource. If you were unable to find another position and were terminated from Eversource employment, a prorated share of the Geographic Adjustment Payment would be paid to you at year's end, in the same time frame as other payment recipients.

Q4 – Are any employees currently assigned to a qualifying job location when the program begins qualified for the one-time initial Transfer Bonus Payment?

A – No, only new transfers and new hires into the qualifying job location, with effective dates of assignment after 01-01-03 will qualify for the one-time, once in a lifetime initial payment.

Q5 – Would an employee who transferred into a qualifying job location before the program's inception qualify for the one-time initial Transfer Bonus Payment?

A – No. The one-time initial Transfer Bonus element of the program only applies to people transferring into a qualifying job location with an effective date after 01-01-03 for the transfer. Employees who were assigned to the qualifying job location prior to 01-01-03 do not qualify for the one-time initial payment. However, they may still qualify for the Annual Geographic Adjustment for each subsequent year they remain in a qualifying job location while the program is in effect.

Q6 – For employees eligible to receive the one-time initial Transfer Bonus Payment for transferring into the qualifying job location, would they receive a pro-rated portion of the annual payment for a year in which they retired, or left the area due to, for instance, taking a new position outside the area?

A – The one-time initial Transfer Bonus Payment will only be paid out to employees who stay within the qualifying job location for three consecutive years and will be paid in equal increments at the end of each 12 month period, for those three years. If at any time during this three-year period they leave the area or retire, they would become ineligible for any additional payments through this part of the program.

Q7 – Do these payments affect benefits or overtime?
A – Both the Transfer Bonus Payment and the Annual Geographic Adjustment Payment will be included as base pay, retrospectively, for the purpose of calculating nonexempt overtime. Neither adjustment will be included in any calculation of e-share or401K. The annual

Geographic Adjustment Payments are included in pensionable earnings each year, if paid prior to the last month before your separation from Eversource. The Transfer Bonus Payments are not pensionable.

Q8 – Are these payments taxable?

A – Yes.

Q9 – Who is eligible for the Geographic Adjustment Payment?

A – Active, regular, full time and part time employees permanently assigned in qualifying job locations.

Q10 – If eligible, could employees receive both the Transfer Bonus Payment and the Annual Geographic Payment in the same year?

A – Yes.

Re: 2004 Blue Book & Green Book Announcements

John & Terry:

As part of the 2004 Blue Book and Green Book negotiations the Company announced that it would discontinue certain practices upon expiration of the current contract. Of the seven (7) Blue Book and six (6) Green Book announcements, the Union Locals expressed specific membership concerns regarding the three (3) announcements below, and requested that the Company commit that any future changes to these announcements be negotiated with the Locals.

In agreeing to the Union's request, the Company is agreeing—without precedent and without in any way committing to negotiate with the Locals with respect to any other announcements (whether made in the past, present or future)—to negotiate future modifications of the three (3)
2004 announcements listed below:

- **Announcement** - displaced employees, *who are hired after June 1, 2004*, will be required to successfully pass applicable aptitude tests (i.e., CAST, Tech., etc.) prior to exercising bumping options under Article V, Reassignment, Layoff and Demotion.

- **Announcement** - the Company eliminates the practice of rotating crews after 1½ hours worked for the sole purpose of equitable distribution of overtime. The Company will attempt to change-out crews after 3 hours**.**

- **Announcement** - On-call Prearranged Overtime Practices - with the exception of Saturday and Sunday, the Company eliminates the practice of using the scheduled oncall lineworker for prearranged overtime.

It is also understood and agreed that this agreement in no way affects the Company's management rights, including but not limited to, determining qualifications (including testing), establishing schedules (including establishment of the on-call week, shifts, etc.), and making work assignments.

Agreed to by the Company:

/s/
Robert G. Lizotte January 6, 2005

Re: Resolution of Overtime Distribution Issue – Local 420

John:

Pursuant to our August 24th telephone conversation the Company (CL&P) is agreeing to extend the practice of administratively assigning 2000 hours of overtime to those individuals who have reached the age of 45 and have removed themselves from scheduled on-call as permitted by the Blue Book (Article X) and Green Book (Article IV). This practice, which was originally initiated to accommodate the ACOS callout process, will result in these individuals being placed at the bottom of the overtime list for their area. Overtime assignments will be accomplished as follows:

- For unplanned overtime, ACOS will typically be used to run the entire list pursuant to normal practices. (See Attached).
- For planned overtime, work area supervision will disregard the administrative 2000 hour figure and offer the overtime to the person with the lowest number of net hours. (See Attached).

Implementation of the above process will, upon agreement from Local 420, become effective on September 1, 2005. Affected employees, who meet the aforementioned contract criteria, will be charged 2000 hours as outlined above. Affected employees who wish to return to on-call status will be given the one time opportunity to return to the on-call list without waiting the one year timeframe. Specifically, employees will not be returned to "scheduled on-call" until they have satisfied the earlier of a 12 month waiting period, or the January 1, 2006 calendar date (for establishment of the 2006 on-call schedule), unless there is a less than one in four on-call staffing arrangement in their work area where they can be immediately reintroduced to scheduled on-call work. Even if returned on-call employees are not working scheduled on-call they will be subject to the same overtime offerings as those employees who work scheduled on-call work.

As we have discussed this action (to include the waiving of the waiting period for return to scheduled on-call) is taken without precedence and without prejudice to the company's established position on overtime distribution. Additionally, the Company's action is predicated on the assumption that mathematical errors may occur in the assignment of planned overtime work – due to the need to deduct the 2000 hours. Accordingly, the company and/or the union reserve the right to discontinue this overtime process (i.e., using an administrative 2000 hours) with appropriate notice, if it is determined to be problematic or unmanageable. It is also understood that this agreement will resolve any grievances specific to the distribution of overtime where the adding of 2000 hours may have been a factor.

Please sign below to indicate your agreement on this issue.

Very Truly Yours,

/s/ Robert Lizotte

Agreed: /s/ John Unikas – Business Mgr. Local 420

Letter-2000 Hours Rule

October 23, 2012

Mr. Ed Hammett
Executive Director-Labor Relations Connecticut
Light & Power Co.

Re: Blue Book 2000 Hours Rule-457

Dear Mr. Hammett:

This letter serves to explain, in greater detail, Article X, Section 8(e). The affected employees, who meet the aforementioned contract criteria, will be charged 2000 hours as outlined in Article X, Section 8 (e). Specifically employees will not be returned to "scheduled on-call" until they have satisfied the earlier of a 12 month waiting period, or the April 1st calendar date (for establishment of the next year's on-call schedule), unless there is a less than one in four on-call staffing arrangement in their work area where they can be immediately reintroduced to scheduled on-call work.

Implementation of the above process will, upon agreement, become effective on April 1, 2013. Affected employees, who meet the aforementioned contract criteria, will be charged 2000 hours as outlined above. Affected employees who wish to return to on-call status will be given the one time opportunity to return to the on-call list without waiting the one year timeframe. Specifically, employees will not be returned to "scheduled on-call" until they have satisfied the earlier of a 12 month waiting period, or the March 1, 2014 calendar date (for establishment of the 2013 on-call schedule), unless there is a less than one in four on-call staffing arrangement in their work area where they can be immediately reintroduced to scheduled on-call work. Even if returned on-call employees are not working scheduled on-call they will be subject to the same overtime offerings as those employees who work scheduled on-call work, per the overtime list.

As we have discussed this action (to include the waiving of the waiting period for return to schedule on-call) is taken without precedence and without prejudice to the company's established position on overtime distribution. Additionally, the Company's action is predicated on the assumption that mathematical errors may occur in the assignment of planned overtime work-due to the need to deduct the 2000 hours. Accordingly, the company and/ or the union reserve the right to discontinue this overtime process (i.e., using an administrative 2000 hours) with appropriate notice, if it is determined to be problematic or unmanageable.

The parties hereby agree to the terms above.

Re: Agreement – Scheduling Vacation and On-call

Dear Rich & Frank:

This letter documents our August 2, 2010 agreement in principle and my subsequent discussion with Frank Cirillo regarding the company's development, approval and posting of annual vacation and on-call schedules. This agreement applies to the CL&P Blue Book and Green Book union contracts, the Yankee Gas White Book Contract, and the CL&P Technical Contract and as applicable, modifies the language contained in these contracts on this subject and replaces any side agreements or practices currently in existence regarding this topic. This agreement also applies to the Transmission Group as applicable.

It is also agreed that neither the Union or the Company will use this agreement as part of Local 457's grievance 2010-014 (Company No. 2010-10-457), or the arbitration of that grievance.

Purpose: This agreement reflects an effort by the parties to eliminate unnecessary controversy surrounding conflict between the on-call schedule and the employee's vacation submittal. To date, the company has processed these schedules independently – leaving some employees in a position where their vacation preference has conflicted with their on-call schedule. These employees have often had to swap their on-call schedule with another employee or otherwise modify their vacation plans. This agreement is specific to this conflicting schedule issue. All other vacation requests will continue to be processed in accordance with the applicable union contract (Blue Book and Green Book).

This agreement also documents the company's intent to fill on-call schedule vacancies (e.g., for planned medical absences) as soon as they are made aware of such. To fill short notice vacancies (less than 30 days) the company will seek volunteers, and if none will use the overtime list effective the Monday prior to the vacancy. For longer notice vacancies, the company will use the established on-call schedule rotation and will assign the vacancy to one of the scheduled employees provided the employee does not get back to back on-call schedules.

It is understood that the company may decide not to fill vacancies (particularly short notice absences) if it determines that the existing on-call response resources are appropriate for the anticipated trouble call volume.

Company actions for 2010: Effective November 3, 2010, the company will review the existing on-call schedule to determine if there is a conflict between the approved vacation schedule and the on-call schedule. Identified conflicts will be resolved by filling the vacancy through the overtime list of employees – specifically those employees eligible for scheduled on-call assignment. The company is not obligated to take action on any other vacation request.

Concurrent with its actions on resolving the vacation/on-call scheduling conflicts, the company will extend the current on-call schedule rotation until April 24, 2011. Employees requesting vacation during the period of January 1, 2010 through April 24, 2010, will submit their requests in accordance with the applicable contract language.

Company Actions for 2011 [and Future Years]: Effective April 24, 2011, and every year thereafter, the company will post the on-call schedule by the last Sunday in April. The on-call schedule will be prepared using approved vacation schedules to ensure there is no conflict with the employees approved vacation. Company management will process the employees' vacation preference in accordance with Article IX of the Blue book and Article V of the Green book, Article IX White book, and Article 22 of the Technical Contract as applicable. Once the vacation and on-call schedules are finalized by the Companies the employee (not the company) will be responsible for addressing any swapping or other schedule change, outside of those resulting from illness or disability.

Both parties understand and agree that this agreement will terminate with the expiration of each cited contract and this agreement will be incorporated into the next version of these contracts or will otherwise be dispositioned through the contract negotiations process. Additionally either party may request a revision to this agreement.

Agreed to by the Company:	/s/ R. Lizotte
Agreed to by the Union:	/s/ R. Sank

EVERSOURCE ENERGY

107 Selden Street
Berlin, CT 06037

November 30, 2016

Topic: Floating Holiday Protocol

Bargaining unit employees have the ability to choose two floating holidays during the calendar year based on operational requirements and supervisory approval. The two floating holidays can be used for any reason and are requested by the employee. In the event of a conflict between employees requesting the same date, Teal seniority shall govern.

Process

- Employees will make their selection of vacation periods (A,B,C,D....., weeks) by March 1 and vacation schedule will be posted by April 1.
- If an employee wants to use their floating holiday for either – Good Friday and Day after Thanksgiving those days must be selected at the same time as vacation. The total number of bargaining unit employees off for those two days cannot exceed the limits designated by local management. Management will make best effort to be as flexible as possible when designating these local limits.
- On-Call schedule, where applicable, will be prepared using the approved vacation and floating holiday schedules and posted by the last Sunday in April.

Supervisors may require employees to complete a Flexible Holiday Preference form at the start of each year to avoid scheduling conflicts.

Agreed to:

Memorandum of Understanding
Between
The Connecticut Light and Power Company dba Eversource Energy and IBEW Locals 420 and 457

Response Specialist - Line

The purpose of this document is to outline the scope and parameters of the Response Specialist position in Connecticut as agreed to between Connecticut Light and Power dba Eversource Energy (the "Company") and IBEW Local 420 and 457 (the "Union"), collectively referred to herein as the "Parties." In accordance with collective bargaining agreements between the Parties dated June 1, **2022** (the "CBAs"), both Parties agree as follows.

Job Duties and Description
Attachment "A"

Schedule:
The hours of coverage will be 24 hours daily and 7 days per week. See attachment D. The Company commits to maintain the schedule for the term of the contract. However, the Company and Union recognize that for the 12 hour shift to work properly, RSO employees must make a good faith effort to be available to work when needs dictate. The Company shall monitor the response for both planned overtime and call outs. If the Company determines that employees are engaging in overtime abuse, the Company may cancel 12 hour shifts. Such cancellation may be limited to specific zone(s) where the overtime abuse occurs. Prior to implementing the schedule change, the Company and Union shall meet and discuss the abuse concerns and make reasonable efforts to address these issues.

Holidays:
For the determination of Holiday hours, a Holiday will start at 06:00 hours on the actual day of the holiday and end at 06:00 hours the following day.

There will continue to be twelve (12) paid, eight (8) hour holidays per year. When an employee works a holiday, they will receive eight (8) hours of holiday pay at basic straight time rate and the hours worked will be paid at the applicable rates. Lieu days will continue to be administered per the contract except that in addition to eight (8) hours of holiday pay, for any shifts greater than eight (8) hours, the employee shall elect to use either vacation pay, lieu time, if available, or up to twenty-four (24) hours of "no pay" per calendar year for the remaining hours of the shift.

Number of positions for the staffing of the Response Specialist:
Range of 81-100 positions for the initial staffing. See Attachment C. Subsequent to that, the Company can determine the staffing levels with the maximum number of positions for the organization set at 126. The Company can force qualified employees up to a maximum of 126 positions.

Backfilling shift vacancies within the Response Specialist organization:
The Company will determine the need to backfill open shifts and positions based on operational requirements and will be done from within the respective zones. Incremental backfills; will be attempted to be filled from within the zone, if unsuccessful, the company will then utilize the entire Response Specialist roster as appropriate. Scheduled backfills; will be posted and attempted to be filled in the respective zone. All vacancies will be filled in accordance with the overtime list. See Attachment E. If the Company adds additional resources equally in each zone due to weather related events, the Company retains the right to move resources across zones based on operational needs regardless if the Response Specialists are on straight time or overtime.

Reporting location(s):
Closest district to home within the zone or a mutually agreed upon location. However, the Company reserves the right to change the mutually agreed upon reporting location. Such change shall either be to another mutually agreed upon location or the closest district to home within the zone. See Attachment C*.

Coverage area:
The area that is covered by The Connecticut Light And Power Company.

Supervisory Direction:
Response Specialists will be directed through the Systems Operation Center (“SOC”) and RSO Management. The RSO organization will consist of a Director, Managers, and RSO/Field Supervision. The Field Supervisor will provide the day-to-day direction for the Response Specialists. When necessary, the local AWC Supervisor- Electric Field Operations will also provide direction, in coordination with RSO management.

Mutual Aid:
Response Specialists will not be eligible to perform mutual aid assignments off Company property. Company property is defined as any and all property owned by Eversource.

Storm Assignments:
Local AWC personnel, System Projects and Transmission Line will be asked and required prior to Response Specialist being offered to perform Storm assignments on Company property outside of the Connecticut Light and Power service territory.

Training:
The Company will schedule all required ongoing training and updates. Ongoing training and updates will be furnished to the Business Manager on a semi-annual basis. See Attachment F.

Response Specialist Initial Staffing:
Step One
Response Specialist positions will be offered to and filled by the respective districts. The selection of employees will be in accordance with departmental seniority.*

Step Two
Remainder of the vacancies will be filled in accordance with the contractual provisions.

*Length of service in the Department since date of last employment by the Company shall constitute Department seniority.

Response Specialist Staffing

- **Internal Candidates** – Hiring process in accordance with contractual provisions.

- **External Candidates** – Potential candidates to be given a physical skills assessment. Successful candidates to be offered a position within the Response Specialist organization. Candidates who accept a position will receive training/orientation prior to beginning their new role. External hires will start at the minimum RSO rate and be held at that rate through their probationary period in accordance with the contract.

Retention

Initial incumbent qualified employees who elect to accept a position within the Response Specialist classification will be retained for a period of two (2) years from date of transfer and will not be entitled to apply for posted job openings during this period. Exceptions to this two year restriction would be promotions attained through the employee's normal sequence of progression.

The initial incumbent employees, who wish to return to their respective districts and classifications, must notify RSO management in writing, at least thirty days prior to their intention to leave the Response Specialist organization. However, an adequate complement of Response Specialists must be maintained to operate the Response Specialist organization. Therefore, an incumbent employee will not be released if the complement would be below a certain threshold, set forth in Attachment D. The Response Specialist reclassified to their previous classification will not be required to accept upgrade to the Response Specialist for a period of two (2) years.

All others, subsequent to the initial posting, once qualified as a Response Specialist, will remain in the position for a minimum of three (3) years and will not be entitled to apply for posted job openings **outside of the RSO** during this period.

The junior qualified employee(s) by Teal Book seniority in the affected Local 420 or Local 457 territory will be required to accept any unfilled vacancies in the Response Specialist classification. Incumbent employees forced into the Response Specialist position will be retained for a minimum of eighteen (18) months. An employee who is forced into the Response Specialist classification for a minimum of eighteen (18) months will not be required to accept upgrade to the Response Specialist classification for a period of one (1) year starting from the date of being released from the organization. Exceptions to this eighteen (18) month retention period restriction would be promotions attained through the employee's normal sequence of progression.

Seniority:

For the purposes of Article V, Section 2 (a) only, Response Specialist and Line Mechanic will be considered as the same classification.

In addition, during the initial two (2) year startup period, Response Specialists formerly classified as a Lead or Chief Line Mechanic will be treated as a Lead or Chief Line Mechanic respectively for the purposes of Article V, Section 2 (a) only.

All initial incumbent employees who chose to remain in the RSO following the two (2) year startup period will have their classification seniority date adjusted to the implementation date for Zone 1.

The Response Specialist position requires a minimum qualification of Line Mechanic **for at least one (1) year prior to the date of transfer or forcing.**

Implementation:
Post and fill initial Response Specialist positions upon June 1, 2016 contract ratification.

Upgrading:
When the Company assigns three (3) or more people to a crew, the Company will designate an employee to direct the workforce and be responsible for the crew for all hours so assigned on that day provided the assignment is for one (1) or more hours. The designated employee in charge will be paid one dollar and seventy-five cents per hour ($1.75) in addition to the employee's basic straight time hourly rate for all hours so assigned. Upgrading will normally be on a classification seniority basis.

Meals:
Any earned meals will be paid at the contractually higher rate ($20.00**).** Meal time not taken shall not count as hours worked for the purposes of determining sixteen hours of work or rest time in accordance with Article VI, Sections 6 and 7.

Rest Time:
Except in case of emergency or the case of unforeseen absence of other employees, employees shall not be required to work more than sixteen hours in any one twenty-four hour period.

The rest time window set forth in Article VI, Section 6 does not apply to Response Specialist employees. A Response Specialist must work beyond 16 hours in any 24 hour period, not including meal time not taken, in order to be allowed 8 hours off, once released, before returning to work. If this period extends into the employee's regular scheduled working hours, the employee shall lose no pay thereby.

Planned Overtime:
Planned overtime shall be defined as overtime work for which at least forty-eight hours advance notice has been given and will be assigned among employees as equally as possible. Effective June 1, 2020, the planned overtime notice will be reduced from forty-eight hours to thirty-six hours. Effective June 1, 2021, the planned overtime notice will be reduced from thirty-six hours to twenty-four hours.

If a Response Specialist accepts a planned overtime shift, the Response Specialist cannot accept a call out prior to the planned overtime shift that would preclude him or her from filling the initial planned overtime shift.

A Response Specialist cannot accept a planned overtime shift prior to his or her regular shift if taking such planned overtime will make the employee unavailable to work all of his or her regular shift.

Attachment A

Eversource Response Specialist Duties

The responsibilities will include, but not be limited to, clearing faulty and unsafe conditions, including maintaining or restoring electrical service, by temporary or permanent means to include replacing or bracing/lashing poles, securing pole tops, floating conductors, extending secondary, or as described in the below listed duties.

The below illustrative duties will be performed as a single-person crew or as a multi-person crew as dictated by the task and applicable work methods.

1. Clearing faulty and unsafe conditions including maintaining or restoring electrical service by temporary or permanent means;
2. Operate primary* and secondary fault locating equipment on URD systems in order to isolate the faulted equipment and restore the customers**.** This includes all URD/DB single phase systems and three phase radials;
3. Operate switching and control devices on both the overhead and underground systems (pad mounted equipment). See Attachment B for further information;
4. Connect, disconnect, and operate portable transformers and temporary primary jumpers under emergency or urgent conditions;
5. Replace failed transformers with assistance of other qualified employee(s);
6. Replace damaged or faulty equipment during the initial response;
7. Perform street light repair work including replacing defective bulbs, photocells, and heads along with new installations (up to a 250 watt head and under a 12' bracket);
8. Install and remove minimal cover up as needed. This may include primary conductors;
9. Perform secondary overhead and URD service connections associated with connecting customers;
10. Perform overhead distribution system line patrols;
11. Perform URD and overhead equipment inspections;
12. Make current and voltage measurements, as required;
13. Determine and record causes of failures and communicate the findings to the SOC;
14. Communicate the status of outages to the SOC – on-site, restoration projections, ETRs, etc.;
15. Investigate customer concerns, communicate with customer when needed to provide information;
16. Investigate and correct complaints of interference to telephone, radio, or television reception;
17. Document and submit required records and reports associated with trouble, line patrols, equipment inspections, and other related work;
18. Utilize mobile data terminals as instructed;
19. Operate GOABs that Line Mechanics operate (excluding GOABs with keyed interlock systems), reclosers and cutouts when needed, as well as other equipment that Line Mechanics currently operate;
20. External substation inspections.

Attachment B

There are two types of pad mounted switchgear in CT. The first is air insulated PMH Gear (Type 3, 5, 8, 9, 11, 12, and 13). The second is SF6 insulated (Vista, Trayer). In addition, there are wall mounted (Elastimold) located in customer vaults (primarily in Stamford and Hartford) that are tied into the UG system. Response Specialists would not normally respond to these outages. However, the Company may train them if they were to be utilized to restore customers while UG personnel are responding to an event.

There are many more types of gear in the industry. Therefore, this is for discussion purposes only and not meant to be all-inclusive.

Attachment F

Response Specialist Initial/Annual Training Subjects

- Work site protection
- Auto transformer installation and removal
- Customer interaction
- ETR estimates/importance
- Stray voltage initial response
- Computer/tablet training
- Transformer connections, standard and unusual
- Ferroresonance
- Capacitor operations
- Regulator operations
- Direct buried & grounding
- DB trailer set up
- Von DB Primary fault finding
- Safe excavation practices
- Spitfire and Pin Pointer secondary fault finding
- PMH Switch gear and S&C fuse handling
- Recloser and loop scheme operations

- Environmental training
    - Oil spill containment, transport and reporting
    - Endangered species nest removal
- Outage prevention – best practices (upgrading the event to prevent future outages)
- Standard SERT subjects will continue to be scheduled through the training department

*This list of subjects may not be all inclusive and could expand as business needs demand.

Memorandum of Understanding
between
Eversource Energy Connecticut
and
IBEW Locals 420 and 457
Reliability Shift Electrician

The purpose of this document is to outline the scope and parameters of the Reliability Shift Electrician position in Connecticut as agreed to between Eversource Energy (the "Company") and IBEW Local 420 and 457 (the "Union"), collectively referred to herein as the "Parties." In accordance with collective bargaining agreements between the Parties dated June 1, **2022** (the "CBAs"), both Parties agree as follows.

Job Duties and Description:

Attachment "A"

Schedule:

The Company reserves the right to set the schedule. The hours of coverage will be 24 hours daily and 7 days per week. The Company is committed to have the attached schedule (Attachment **C**) for the RSE Organization for the term of the Contract. However, the Company and Union recognize that for this schedule to work properly, RSE employees must make a good faith effort to be available to work when needs dictate. The Company shall monitor the response for both planned overtime and call outs. If the Company determines that employees are engaging in overtime abuse, the Company may change the schedule accordingly. Prior to implementing the schedule change, the Company and Union shall meet and discuss the abuse concerns and make reasonable efforts to address these issues.

Holidays:

There will continue to be twelve (12) paid, eight (8) hour holidays per year. When an employee works a holiday, they will receive eight (8) hours of holiday pay at basic straight time rate and the hours worked will be paid at the applicable rates. Lieu days will continue to be administered per the contract except that in addition to eight (8) hours of holiday pay, for shifts greater than eight hours, the employee shall use vacation time, or no pay code for the remaining hours of the shift.

Number of positions for staffing of the Reliability Shift Electrician organization:

Staffing levels will be determined by the Company. Forcing will be limited to maintain **a** staff of 36 positions for the term of the contract.

Backfilling shift vacancies within the Reliability Shift Electrician organization:

The Company will determine the need to backfill open shifts and positions based on operational requirements and will be done from within the respective division. Incremental backfills; will be attempted to be filled from within the division; if unsuccessful, the Company will then utilize the entire Reliability Shift Electrician roster as appropriate. Scheduled backfills; will be posted and attempted to be filled in the respective division. All vacancies will be filled in accordance with the overtime list. The Company reserves the right to fill any portion of a shift. The Company retains the right to move resources across divisions based on operational needs regardless if the RSE are on straight time or overtime.

Reporting location(s):

Reliability Shift Electricians will report to a show up site, **which will be the closest district or substation to home within the zone as determined by the Company or a mutually agreed upon location. The Company reserves the right to change the mutually agreed upon reporting location.** The Company will determine the number of employees required to report within each zone.

Coverage area:

The area that is covered by The Connecticut Light and Power Company **dba Eversource Energy**.

Supervisory Direction:

Reliability Shift Electricians will be directed through Substation Operations Supervision and the Systems Operation Center (“SOC”). The Supervisor will provide the day-to-day direction for the Reliability Shift Electrician. On a limited basis, the local AWC Supervisor- Electric Field Operations will also provide direction, in coordination with Substation Operations management.

Mutual Aid:

Reliability Shift Electricians will not be eligible to perform mutual aid assignments off Company property. Company property is defined as any and all property owned by Eversource.

Storm Assignments:

Local AWC personnel, General Operating and Central Maintenance will be asked and required prior to Reliability Shift Electricians being offered to perform storm assignments on Company property outside of the Connecticut Light and Power service territory.

Training:

The Reliability Shift Electrician position requires a minimum qualification of Electrician. The Company will schedule all required ongoing training and updates. Ongoing training and updates will be furnished to the Business Manager when requested.

On Call:

On-Call will be paid in accordance to Article VI, Section 9 of the Teal book.

Reliability Shift Electrician Staffing:

Internal Candidates – Hiring process in accordance with contractual provisions. Reliability Shift Electrician positions will be posted by zone and filled by Teal Book seniority with Electricians qualified to be RSE. If one or more vacancies are not filled through the posting process, the junior qualified Electrician(s) by Teal Book seniority within the affected division will be required to accept any remaining vacancies not exceeding the initial 36 positions. The Reliability Shift Electrician(s) reclassified to their previous classification will not be required to accept upgrade to the Reliability Shift Electrician for a grace period of one (1) year.

External Candidates – External candidates are defined as applicants external to the Company or not in the Substation Operations Electricians organization. Successful candidates will be offered a position within the Reliability Shift Electrician organization. Candidates who accept a position will receive training/orientation prior to beginning their new role. External hires will **not** be **considered Company qualified during the probationary period and will be paid the "C" rate as defined in Appendix A** through their probationary period in accordance with the contract. **At the completion of the probationary period,** candidates will receive the **minimum RSE** rate **of pay for up to twelve months until they** have demonstrated competence. The RSE rate will be applicable once the employee is fully performing the responsibilities of a Reliability Shift Electrician.

Retention:

During the initial posting, following the ratification of the June 2019 contract, incumbent qualified employees who elect to accept a position within the Reliability Shift Electrician organization will be retained for a period of two (2) years from date of transfer and will not be entitled to apply for posted job openings or change divisions during the retention period. The two (2) year retention will begin once initial training period is completed and the employee enters the shift rotation. The RSE rate will be applicable once the employee enters the shift rotation.

All others, subsequent to the initial posting, once qualified as a Reliability Shift Electrician, will remain in the position for a minimum of two (2) years and will not be entitled to apply for posted job openings or change divisions during this retention period.

Incumbent qualified employees forced into the Reliability Shift Electrician position will be retained for a minimum of 18 months. If there are more than 36 fully qualified RSE in the shift rotation, the forced employee will have the option to be released; however, the forced employee relinquishes the one year grace period and is eligible to be forced back into the RSE for the full 18 month retention period. The 18 month retention will begin once initial training period is completed and the employee enters the shift rotation. The RSE rate will be applicable on the

date of transfer into the RSE organization. Promotions attained through the employee's normal sequence of progression in their home district will be granted; however, the employee must fulfill the 18 month retention. If an employee elects to remain in the organization after 18 month retention period the employee forfeits their rights to promotion in their respective district. **On or before** 1 year as a full RSE, an Electrician who wishes to return to their respective district and classification must notify the Substation Operations Manager with a binding letter of their intention to leave the RSE organization. The Company will release the employee after **completion of their 18 month retention period and receipt of** the letter of intent as long as 16 qualified RSE are in the division. An adequate complement of Reliability Shift Electricians must be maintained to operate the RSE organization. Therefore, an incumbent employee will not be released until a fully qualified replacement is placed on the RSE schedule. No more than two RSE will be allowed to leave at one time per division at the end of the retention period. Forced employees are allowed to post for positions outside Substation Operations. Forced employee(s) will be allowed to post for Substation Operations positions after their letter of intent to leave is accepted; however, they will complete the 18-month retention and the Company will hold positions they are offered and have accepted.

Seniority:

For the purposes of Article V, Section 2 (a) only, Reliability Shift Electrician and Electrician will be considered as the same classification. In addition, Reliability Shift Electrician formerly classified as a Lead or Chief Electrician will be treated as a Lead or Chief Electrician respectively for the purposes of Article V, Section 2 (a) only.

Meals:

Any earned meals will be paid at the contractually higher rate ($20.00). Meal time not taken shall not count as hours worked for the purposes of determining sixteen hours of work or rest time in accordance with Article VI, Sections 6 and 7.

Rest Time:

Except in case of emergency or the case of unforeseen absence of other employees, RSE employees shall not be required to work more than sixteen hours in any one twenty-four hour period.

The rest time window set forth in Article VI, Section 6 does not apply to Reliability Shift Electrician employees. A Reliability Shift Electrician must work more than 16 hours in a 24 hour period, not including meal time not taken, in order to be allowed 8 hours off, once released, before returning to work. If this period extends into the employee's regular scheduled working hours, the employee shall lose no pay thereby.

Planned Overtime:

Planned overtime shall be defined as overtime work for which at least twenty-four hours advance notice has been given and will be assigned among employees as equally as possible.

If a Reliability Shift Electrician accepts a planned overtime assignment, the Reliability Shift Electrician cannot accept a call out prior to the planned overtime shift that would preclude him or her from filling the initial planned overtime assignment.

A Reliability Shift Electrician cannot accept a planned overtime assignment prior to his or her regular shift if taking such planned overtime will make the employee unavailable to work all of his or her regular shift.

Attachment A

Eversource Reliability Shift Electrician Duties

Under general supervision, inspects, maintains repairs and operates substations, and does such similar work in the electric system, performing such duties as:

Performing the duties included in the Time Merit Progression Program for Electrician

Essential Functions:

- Repairing and maintaining circuit breakers, switchgear, transformers, and similar equipment, including the replacing of sub-assemblies;
- Installing circuit breakers, switchgear, transformers, and similar equipment as directed;
- Making all electrical tests using standard test equipment, including but not limited to carrier and transfer tripping equipment testing and battery testing;
- Performing switching operation involving any voltage;
- Is thoroughly familiar with switching and tagging procedures, switchboard facilities, and related apparatus in area of normal assignment;
- Operating substations and network equipment;
- Checking, inspecting, and testing underground system and maintaining equipment;
- Reading and interpreting wiring diagrams, blue prints, etc.;
- Making repairs to tools and work equipment;
- Recognizing, correcting if possible, and reporting abnormal conditions that develop during the progress of the work;
- Obtaining miscellaneous items from suppliers;
- Repairs or replaces insulators, conductors, transformers, fuses, disconnects and lighting arresters, etc., associated with normal duties;
- Makes standard types of transformer connection;
- Assembles, disassembles, and maintains major rotating equipment such as motors, generators, etc., as required by normal assignment;
- Works on live electrical conductors using proper tools and protective equipment;
- Installs and repairs switchboard wiring and controls, major devices and equipment, complicated wiring, relaying and control circuits, using plans and drawings as required by normal assignment;
- Tests insulators on substation structures Electrical Insulation Systems, Electrical Equipment Operating Parameters, and Distribution System Protective Relays and Devices as required by normal assignment;

- Assembles, disassembles, and rebuilds power circuit breakers, voltage regulators, power transformers, distribution transformers, etc., as required within normal assignment;
- Tests with meggers, Ohmmeters, voltmeters, ammeters, metester and similar instruments and interprets results;
- Testing Contact Resistance for breakers and connections using a DLRO (Ductor);
- Makes electrical connections on copper or aluminum cable and bus, or between dissimilar materials;
- Installs all types of electrical bus work as required by normal assignment;
- Performs routine inspection, maintenance and adjustments on electrical equipment following manufacturer's instructions and/or Company procedures;
- Secondary and primary cable testing;
- Recloser programming and network testing;
- Makes simple electrical calculations and measurements;
- Bend and installs conduit;
- Performs simple rigging;
- Has a working knowledge of insulating oils and SF6 gas applications and uses, including storage, clean-up, filtering and testing;
- Cleans and paints structures, equipment, and devices;
- Operates motor vehicles safely in the performance of required duties;
- Operating a motor vehicle and associated equipment;
- Performs work in clean and neat manner and exercises care to prevent damage to Company or customer's property;
- Provide substation escort for non-qualified individuals;
- Keeping the substation buildings and grounds in good order, including minor repairs and snow removal;
- Works either indoors or outdoors as required, and is subject to overtime work;
- May have storm restoration and emergency assignments.

The Connecticut Light & Power Company
DBA Eversource Energy
Final Summary
for a
New June 1, 2026 – Teal Book Agreement
with
Locals 420 & 457 - IBEW

New and changed provisions to be included in the 2026 Company and Union Agreement:

All Union proposals not addressed in this summary are rejected. All Company proposals not addressed in this summary are withdrawn.

Note: With reference to the June 1, 2026 Agreement, and where pertinent to clarify, new language is indicated by **bolded** text; deleted language is indicated by ~~strikeout~~ text.

Article V – Seniority
Section 1. Promotion
Revise to read as follows:

1.(d) The Company will give preference to its regular bargaining unit employees over hiring new employees when making placements in job openings within the bargaining unit. Notices of available job openings, other than those to be filled by application of any other provision(s) of this Agreement, will be posted on bulletin boards throughout the Company, and a copy will be sent to the Business Manager of each Local Union. Each bulletin board posting will be for a period of not less than seven (7) calendar days during which period interested employees may apply in writing for reassignment to the posted job opening by use of a reassignment application form provided by the Company. The Business Manager, Assistant Business Manager or Steward may submit a reassignment application in the above manner on behalf of an employee who is absent during the seven-day period by reason of vacation, short-term illness or short-term excused absence. Promptly following the end of a posting period each applicant will be notified within 15 days following the end of that posting period whether or not the employee's application has been accepted, and if rejected, the reason therefore. The Company's determinations of the qualifications of employees applying for reassignment under this Section 1.(d) will be made on the same basis as for hiring new employees. In the event two or more employees with basically equal qualifications apply for one job opening, preference for placement will be determined by greater Teal Book Seniority. If

reassignment is postponed following notification of acceptance, the employee's classification seniority will be adjusted upon reassignment to the starting date of the first full week following the date of the acceptance notice.

Anyone who is newly hired or transferred into the Meter Service Mechanic – Electric classifications effective June 1, 2026 will remain in the position for a minimum of one (1) year from the date of hire or transfer and shall not be eligible to apply for posted job openings during this time period; however there is no restriction in transferring within the Meter Services Job Family.

Article VI – Hours of Work, Rates of Pay and Overtime
Section 10. Excused From On Call
Revise to read as follows:

Such employees shall upon request be excused only from the established annual rotational scheduled "on-call"/Shift assignment for a period of not less than twelve months provided the employee ~~has reached 45 years of age,~~ has greater departmental seniority than other employees who make the same request, and the granting and/or continued compliance with the request does not subject the remaining employees on the employee's particular "on-call" schedule to a normal "on-call" schedule assignment frequency greater than one out of four. Nothing contained in this Article shall restrict the Company's right to assign any employee (whether or not excused from participating in the annual on-call schedule) to be on call for unscheduled emergency situations, such as the forecast of a storm. Any employee so excused will be excluded from the provisions of Article VI, Section 5. However, the Company will attempt to equalize scheduled overtime to the extent possible without keeping dual overtime records.

For the purpose of unplanned overtime, the overtime list will be followed as per normal practice.

For the purposes of planned overtime, the administrative 2000 hours figure will be disregarded.

The Company will utilize the following process to assign personnel to unscheduled on-call:

(i) The Company will ask for volunteers, including employees who have requested to be excused from on-call assignment of this Article by overtime standing in accordance with Article VI section 5.

(ii) If there is an insufficient number of volunteers to meet on call staffing needs the company will first assign employees who have not requested to

be excused for on call assignment of this Article, by overtime standing in accordance with Article VI section 5.

(iii) If steps 1 and 2 above do not provide a sufficient number of volunteers or assigned personnel to meet on call staffing needs the company will assign employees who have requested to be excused from on call assignment of this Article by Classification Seniority.

(iv) The Company may, upon the conditions of the work, assign personnel who are available at the facility including employees who have requested to be excused from on call assignment of this Article to stand call until steps 1-3 can be satisfied. The Company will attempt to find replacements for the excused employees who have been assigned. If a sufficient number of volunteers and assigned personnel are available to meet on-call staffing needs, the employees who have requested to be excused from on call assignment may be excused by Classification Seniority.

Article VII – Vacations, Holidays and Leaves of Absences
Section 1. Vacation Allowance
Revise to read as follows:

a) Regular Employees will be allowed the following vacation periods annually with basic straight-time pay:

- For employees with less than one year of service and hired between January 1 and March 31 of the current calendar year will be allowed three weeks of vacation.
- For employees with less than one year of service and hired between April 1 and June 30 of the current calendar year will be allowed two weeks of vacation.
- For employees with less than one year of service and hired between July 1 and September 30 of the current calendar year will be allowed one week of vacation.
- For employees with less than one year of service and hired between October 1 and December 31 of the current calendar year will not be granted vacation for that period.

Employees who are expected to complete at least one year of continuous service by December 31 of a calendar year will be allowed three weeks' vacation in that and each succeeding calendar year until eligible for four weeks' vacation under 1.(c) below.

Employees who are expected to complete 10 years of continuous service by December 31 of a calendar year will be allowed four weeks' vacation in that and each succeeding calendar year until eligible for five weeks' vacation under 1.(d) below.

Employees who are expected to complete 20 or more years of continuous service by December 31 of a calendar year will be allowed five weeks' vacation in that and each succeeding calendar year.

Less than one year of service	Start date January 1 through March 31 – 15 days
	Start date April 1 through June 30 – 10 days
	Start date July 1 through September 1 – 5 days
	Start date October 1 or later – no vacation accrued.
One year but less than 10 years	15 days per year
10 years but less than 20 years	20 days per year
20 years or more	25 days per year

All vacations must be completed within the calendar year and are not cumulative. **However, employees shall be allowed to carry over up to forty (40) hours of vacation. Such vacation time must be used in the year it is carried over.** The Company must afford opportunity for the employee to take the employee's vacation within the calendar year. The period of continuous service, for vacation purposes only, is not interrupted by leave of absence or temporary layoff.

(b) An employee's vacation begins at the end of his/her last scheduled work day.

(c) The vacation allowance per week will be based on the number of hours in the scheduled workweek generally in effect throughout the Division at the time the employee takes the employee's vacation, with overtime rates applying to hours in excess of forty hours per week. For the term of this Agreement, the minimum vacation allowance per week will be forty hours' straight time pay unless some public authority orders a shorter workweek.

Article VII – Vacations, Holidays and Leaves of Absences
Section 3. Choice of Vacation
Revise to read as follows:

Consistent with the Company's service obligations, vacation periods will be scheduled to meet and suit the convenience of employees. Insofar as practicable, employees will be granted preference in selecting vacation periods in descending order of Teal Book

Seniority on a local, plant or departmental basis as involved. Such preference for selection will be granted in the following order: (1) for all vacation periods under 1(a) 1. above, (2) for all third week vacation periods, (3) for all fourth week vacation periods, (4) for all fifth week vacation periods, and (5) for any additional vacation days granted because of recognized holidays falling within vacation periods. Each district, department and plant will, not later than April 1st, prepare and post on appropriate bulletin boards schedules showing the time of vacation periods granted. **Revised lists shall be provided to union personnel upon request.** In order that the Company will be able to prepare and post vacation schedules by April 1st, it will be necessary for employees to make their selections of vacation periods promptly. In the event an employee fails to make the employee's selection within a reasonable period of time, the employee will forfeit the employee's turn until all other employees involved have made their selections. Should any employee fail to make the employee's selection(s) by March 1st, the Company, at its discretion, may schedule that employee's vacation period. Changes in any scheduled vacation period may be made with mutual consent of employees involved and the Company. When choice of vacation period has been granted, it will not be interfered with except in emergencies.

Article VII – Vacations, Holidays and Leaves of Absences
Section 8. Holiday Pay
Revise to read as follows:

Pay for the holidays listed in this Article will be as follows:

(a) If the holiday is observed on a day when the employee would ordinarily work and if the employee's services are not required, the employee will receive eight hours' pay and the day off.

(b) If the holiday is observed on an employee's day off or during the employee's vacation, the employee shall receive an additional day off sometime during the calendar year on a day mutually agreeable to the Company and the employee.

(c) If an employee is required to work on a holiday, the employee will receive the eight hours' pay or day off provided under (a) or (b) plus time and one-half for all hours worked within the employee's usual eight working hours and-double time for all other hours actually worked or the minimum provided under Article VI, whichever is greater.

(d) The pay provided in this Section 8 shall be in lieu of all other pay for work on holidays. Hours worked on a holiday which are outside of an employee's usual eight working hours shall be counted as hours worked for purpose of equalizing overtime.

(e) When an employee is placed on call during a holiday and is not called in to work, the employee will receive eight hours' pay or an additional day off sometime during the calendar year on a day mutually agreeable to the Company and the employee.

Article VIII – Safety Provisions
Section 14. Safety Shoes
Revise to read as follows:

Effective January 1, 2023, the Company will provide up to ~~$300~~ **$350** annual allowance to Operating Department employees towards the purchase of one or more pair(s) of safety footwear that meets the requirements for impact/compression resistance and protection from electrical hazards (EH rated) as described in ASTM F2413-05 (M 1175/C75/Mt75) EH Rated Safety (steel toe or composite) footwear. The employee must furnish a receipt of purchase for reimbursement documenting the purchase of safety shoes which meet the above safety standard and the allowance will be limited to ~~$300~~ **$350** per year. Ordering safety shoes through the Company stock rooms has been discontinued.

Article VIII – Safety Provisions
Section 23. Fire Retardant Clothing ~~(Effective January 1, 2023)~~
Revise to read as follows:

Effective January 1, 2027, increase ~~Increase~~ F.R. allowance to ~~$1,450.00~~ **$1,650.00** for a new hire in the first year and ~~$800.00~~ **$1,000.00** per year thereafter and for all other incumbents.

Effective January 1, 2028, increase F.R. allowance to $1,850.00 for a new hire in the first year and $1,200.00 per year thereafter and for all other incumbents.

Article XII – Expense Allowance
Section 2. Expense Plans Outside Base Area
Revise to read as follows:

Except when Section 1. or Section 3. of this Article is applicable, an employee required to make the employee's own arrangements to report at a job location including all training assignments outside the employee's base area (except satellite/line shops or

when the job location distance one way is ten (10) miles or less) will be paid a daily expense allowance as provided under one of the following Plans:

Plan A - If the distance one way is twenty-five miles or less; ~~$31.15~~ **$34.27** per day.
Plan B - If the distance one way is over twenty-five miles but not over forty miles; ~~$55.20~~ **$60.72** per day.
Plan C - If the distance one way is over forty miles but not over sixty miles; ~~$63.13~~ **$69.44** per day.
Plan D - If the distance one way is over sixty miles but not over ninety miles; ~~$71.30~~ **$78.43** per day. When the distance is beyond ninety miles, the employee will be paid mileage at the current NU mileage rate per mile for each mile beyond ninety miles.

2.(a) If on any day an employee travels one way to or returns one way from a job location under the provisions of Section 1. of this Article, the employee will be paid an expense allowance on that day under one of the following Plans:

Plan E - If the distance one way is thirty miles or less, ~~$26.77~~ **$29.45** per day.
Plan F - If the distance one way is over thirty miles; ~~$36.75~~ **$40.43** per day.

* * *

~~2.(f) Employees shall not be eligible to receive any of the above expense plans during the time that they are in the 18-month Field Training program.~~

Article XII – Expense Allowance
Section 9. Tool Allowance
Revise to read as follows:

The Company will provide an annual tool upgrade allowance of up to ~~$800.00~~ **$950.00** per year for Garage Mechanics. The employee must furnish a receipt of purchase for reimbursement documenting the purchase of job specific tools.

* * *

Article XV – Duration
Revise to read as follows:

This Agreement constitutes the entire Agreement of the parties except such amendments or supplementary Agreements as are reduced to writing and signed by the parties hereto.

This Agreement supersedes all previous agreements and shall continue in force from the first day of June 1, ~~2022~~ **2026** until June 1, ~~2026~~ **2030** and thereafter for periods of one year unless canceled by advance notice in writing by either party to the other, the advance notice to be given at any time during a thirty-day period, the beginning of which period is ninety days prior to June 1, ~~2026~~ **2030** or June 1st of any year thereafter.

If either party desires to amend this Agreement on June 1, ~~2026~~ **2030** anniversary date or on June 1st of any year thereafter, a list of all proposed changes shall be submitted to the other party in writing prior to March 1st of the year involved. The party receiving the proposed changes shall have until March 10th to submit additional proposed changes to the other party. The Company and the Union agree to meet promptly thereafter in the period between the 90th and 61st day prior to the anniversary date of the Agreement to discuss the proposed changes and endeavor to reach an understanding on them. If all proposed changes are not thus disposed of in a mutually satisfactory manner, (1) the proposed changes remaining in dispute may, by mutual agreement, be submitted to arbitration or (2) either party prior to May 1st of that year may serve notice of cancellation of the Agreement if such action is deemed desirable. If all proposed changes are disposed of in a mutually satisfactory manner, the amendments mutually agreed upon shall take effect on the following June 1st, unless the parties agree upon a different effective date.

* * *

TOPIC: Vacations

(A) With reference to discussion of Article VII –Vacations, it is the Company's intention to continue to administer vacation policies in accordance with Employee Relations Instruction No. 9314 and 9904 as set forth in The Connecticut Light and Power Company Manual of Procedures. Should the Company contemplate any change in these instructions affecting bargaining-unit employees, the matter will be discussed with the union in advance of the change.

(B) Illness or Injury Immediately Preceding or During Scheduled Vacation.

(C) In the event that an employee becomes incapacitated immediately preceding or during the employee's scheduled vacation, due to illness or injury, and the employee notifies the employee's supervisor of such illness or injury as soon as possible, that portion of the employee's vacation period during which the employee is incapacitated may be rescheduled, at the option of the Company, to another time during the calendar year.

(D) In determining whether the employee's vacation should be rescheduled due to illness or injury, occurring immediately preceding or during the employee's scheduled vacation, the Company may request from the employee verification from the attending physician.

(E) In the event vacation to be rescheduled under paragraph 3.(D) cannot be rescheduled during the current calendar year, it will be rescheduled (up to eighty hours), in accordance with Article VII, Section 3, within the following calendar year. **The eighty (80) hours of vacation includes the forty (40) hours of vacation carried over in accordance with Article VII, Section 1.**

(F) When a former employee of the Company is re-employed and completes five years of continuous service, such prior service will be included in the employee's total length of service for the purpose of determining the amount of vacation eligibility, provided such prior service had been for a period of six months or more and other than on a temporary basis.

(G) Granting of credit for prior service for vacation eligibility will not change an employee's company or classification seniority date.

~~**TOPIC: FIELD TRAINING**~~

~~Effective June 1, 2022, new hires and transfers into Field Training will receive the Step 4 Line Helper rate of pay at the time of transfer or hire into the Line Helper position.~~

~~Employees currently in Field Training as of the date of ratification of the June 1, 2022 contract will receive the Step 4 Line Helper pay effective June 1, 2022.~~

~~Employees may remain at the step they started the Line Helper position at for up to two years.~~

~~The starting rates above only apply to Line Helper positions in the Field Training program.~~

~~Employees shall not be eligible to receive any of the expense plans in Article XII, Section 2 during the time that they are in the 18-month Field Training program.~~

TOPIC: Mobile Transformer Installation (NEW)

When an Electrician is assigned to a job that requires him or her to lead multiple classifications for the installation of a Mobile Transformer, he or she will be

upgraded and will be paid $2.50 per hour in addition to his or her basic straight-time hourly rate and any other applicable upgrades for all hours so assigned.

Primary Duties include:

- **Being the Clearance Holder**
- **Switching, grounding and phasing with proper switching authority**
- **Coordinating and directing multiple classifications**
- **Assisting Field Engineering (Test)**
- **Identifying and securing materials for Mobile Installation**

TOPIC: Pad Mounted Switchgear (NEW)

When an Electrician is assigned to a job that requires him or her to lead multiple classifications for the installation of new pad mounted switchgear, he or she will be upgraded and will be paid $2.50 per hour in addition to his or her basic straight-time hourly rate and any other applicable upgrades for all hours so assigned.

Primary Duties include:

- **Switching, grounding and phasing with proper switching authority**
- **Coordinating and directing multiple classifications, departments and/or customers**
- **Assisting Field Engineering (Test)**
- **Identifying and securing materials**
- **Serving as the point person for the initial set up, wiring, testing and commissioning of equipment**
- **Reviewing and verifying switching orders**

TOPIC: G.O. Clearances for End-to-End Work (NEW)

When a G.O. Electrician is assigned to a job where G.O. Electrician crews are working that requires him or her to take clearances for end-to-end work (e.g. relay jobs at multiple substations) he or she will be upgraded and will be paid $2.50 in addition to his or her basic straight-time hourly rate and any other applicable upgrades for all hours so assigned.

TOPIC: Rates of Pay During Training for Garage Employees (NEW)

If a Garage employee who normally works the night shift and is temporarily

(defined as one week or less) assigned to day shift for training purposes or otherwise as required by the Company, the employee shall receive shift differential set forth in Article VI, Section 18(c) for all hours worked within the day shift.

TOPIC: Clothing for Garage Employees (NEW)

Parts Handler – Garage employees shall receive the Company Supplied Uniform Service (Cintas).

Garage Mechanics/Automotive Equipment Mechanics shall receive the Company Supplied Uniform Service (Cintas) and the FR Clothing allowance as listed below:

- **$750 for a first time/new participant in the first year and $500 per year thereafter for all other incumbents**

PROVISIONS PERTAINING EXCLUSIVELY TO ENGINEERING DESIGNERS AND DISTRIBUTION DESIGN ENGINEERS

Upgrading (NEW)

Field Engineering Designer I will be upgraded to the Field Engineering Designer II Step 1 rate of pay for those hours specifically assigned by his/her supervisor to perform the following tasks:

- **Performs work on the network system**
- **Primary metering**
- **Occasionally acts on behalf of Engineering Supervisor/Lead in his/her absence as needed for no more than a two-week period**
- **Acts as coordinator in project assignments in which multiple designers are needed**
- **Participates in Multifunctional and Process Improvement teams, i.e. Maximo, Distribution Design Tools, etc.**
- **Prepares full and supplemental project PAF (Project Authorization Form) documentation excluding documentation for statewide project initiatives (e.g. tripsavers, circuit patrol fixes, etc.)**
- **Presents to Management in collaboration with Distribution Design Engineer/Senior Distribution Design Engineer on technical and cost aspects of Full Funding for projects to Management at Capital Project Approval meetings**
- **Serve as mentor and trainer for the team**

The above assignments will be offered on a senior to junior departmental seniority basis with exception of:

- **Prepares full and supplemental project PAF (Project Authorization Form) documentation excluding documentation for statewide project initiatives (e.g. tripsavers, circuit patrol fixes, etc.)**
- **Presents to Management in collaboration with Distribution Design Engineer/Senior Distribution Design Engineer on technical and cost aspects of Full Funding for projects to Management at Capital Project Approval meetings**

in which case the Field Engineering Designer employee assigned to a project would be eligible for the upgrade due to project work continuation and efficiency.

Benefits Proposal
Refer to attached Summary of Benefit Changes

Miscellaneous

1. Establish MOU regarding staffing Fleet shifts at locations outside of Berlin. See attached MOU.

2. A Day Shift Chief Position will be established in Berlin only if four or more Garage Mechanics/Automotive Equipment Mechanics are assigned on the Day shift on a permanent basis. If these requirements are met, a Chief Position will be offered to the qualified employees in Berlin in order of greatest classification seniority.

3. The Company and Union agree to meet and discuss the potential of creating a Chief Parts Handler position within 180 days following ratification.

4. Revise job description for Electrician. See attached job description.

5. Revise job descriptions for Meter Service Mechanic – Electric. See attached job description.

6. Revise TMP for Meter Service Mechanic/Installer.

7. Establish Meter Services Training Coordinator Pilot Program. See attached MOU.

8. Revise job descriptions for Field Engineering Designer I and Field Engineering Designer II. See attached job descriptions.

9. Revise TMP for Field Engineering Designer I.

10. The Field Engineering Designer II Step 2 classification will be sunset upon ratification of the June 1, 2026 collective bargaining agreement.

11. Revise job description for Overhead Training Coordinator. See attached job description.

12. Revise MOU regarding Field Training changes and Overhead Training Coordinator position. See attached MOU.

13. Employees hired at the Line Mechanic B (minimum) rate may be eligible for acceleration to the maximum rate based on demonstrated skill, knowledge and ability as determined by the Company.

14. Within 120 days following ratification, the Company and Union shall meet and discuss supplying smartphones to employees in the Building Maintenance department.

15. Within 120 days following ratification, the Company and the Union shall meet and discuss the potential of creating a Safety position or pilot program.

16. Within 180 days following ratification, the Company and the Union shall meet and discuss the potential of creating a Chief Electric Meter Lab position.

17. Within 120 days following ratification, the Company and Union shall meet and discuss revising the TMPs for Test Assistant, Test Specialist and Project Test Specialist.

18. Within 180 days following ratification, meet and discuss revising the following job descriptions:

- Automotive Equipment Mechanic
- Chief Garage Mechanic
- Garage Mechanic
- Line Mechanic Helper/FQ
- Parts Handler – Garage

- Splicer/Cable Splicer Helper/FQ
- Test Assistant/Test Specialist/Project Test Specialist
- Transmission Line Mechanic Helper/FQ
- Meter Service Mechanic – Electric Helper
- Chief Meter Service Mechanic - Electric

19. If a Response Specialist has a planned OT shift immediately preceding the start of his or her regular 3 or 4-day schedule, the Response Specialist is eligible to take a call out prior to the planned OT shift and work 24 hours (e.g., Week 2 schedule: Response Specialist has planned OT on Thursday 0600-1800 prior to the regular shift of 1800-0600. He or she may take a call out on Wednesday 1800-0600 and continue working the full planned OT shift on Thursday from 0600-1800. The Response Specialist would then earn rest time during the regular shift on Thursday from 1800-0200).

20. In addition to Thanksgiving and Christmas, RSO and RSE employees who elect to receive holiday in lieu time for Veterans Day in accordance with Article VII, Section 8 shall be allowed to carry over that time to the following year. The holiday in lieu time that is carried over must be used by the end of the first quarter.

APPENDIX A

WAGES

Appendix "A": Wages Schedule of Job Classifications and Basic Straight-Time Hourly Rates

- Provide for a 3.0% general wage increase effective **June 1, 2026***
- Provide for a 3.0% general wage increase effective **June 1, 2027**
- Provide for a 3.0% general wage increase effective **June 1, 2028**
- Provide for a 3.0% general wage increase effective **June 1, 2029**

***The general wage increase of 3.0% effective June 1, 2026 and adjustments set forth below are based upon timely ratification. Timely ratification is defined as May 18, 2026.**

Effective June 1, 2026, provide for a $0.25 adjustment to the maximum hourly rate for Electrician, Line Mechanic, Splicer/Cable Splicer, Transmission Line Mechanic, Lead Electrician, Lead Line Mechanic, Lead Splicer/Cable Splicer, Lead Transmission Line Mechanic, Chief Electrician, Chief/Top Line Mechanic, Chief Splicer/Chief Cable Splicer and Chief Transmission Line Mechanic prior to the general wage increase.*

Effective June 1, 2027, provide for a $0.25 adjustment to the maximum hourly rate for Electrician, Line Mechanic, Splicer/Cable Splicer, Transmission Line Mechanic, Lead Electrician, Lead Line Mechanic, Lead Splicer/Cable Splicer, Lead Transmission Line Mechanic, Chief Electrician, Chief/Top Line Mechanic, Chief Splicer/Chief Cable Splicer and Chief Transmission Line Mechanic prior to the general wage increase.

Effective June 1, 2028, provide for a $0.25 adjustment to the maximum hourly rate for Electrician, Line Mechanic, Splicer/Cable Splicer, Transmission Line Mechanic, Lead Electrician, Lead Line Mechanic, Lead Splicer/Cable Splicer, Lead Transmission Line Mechanic, Chief Electrician, Chief/Top Line Mechanic, Chief Splicer/Chief Cable Splicer and Chief Transmission Line Mechanic prior to the general wage increase.

Effective June 1, 2026, provide for a $0.25 adjustment to the Admin Support A and Senior Division Admin Support wage scale prior to the general wage increase.*

Effective June 1, 2027, provide for a $0.25 adjustment to the Admin Support A and Senior Division Admin Support wage scale prior to the general wage increase.

Effective June 1, 2028, provide for a $0.25 adjustment to the Admin Support A and Senior Division Admin Support wage scale prior to the general wage increase.

Effective June 1, 2026, provide for $1.25 adjustment to the hourly rate for Field Engineering Designer II Step 1 prior to the general wage increase.

Reduce progression for Field Engineering Designer I Step 1 and Step 2 from twelve months to six months.

Reduce progression from Project Test Specialist Step 1 to Step 2 from twenty-four months to twelve months.

- **Scenarios**
- **Vegetation Management**
- **Standard SERT subjects will continue to be scheduled through the training department**

***This list of subjects may not be all inclusive and could expand as business needs demand.**

Memorandum of Understanding
between
Eversource Energy Connecticut
and
IBEW Locals 420 and 457
Reliability Shift Electrician

* * *

Seniority:

For the purposes of Article V, Section 2 (a) only, Reliability Shift Electrician and Electrician will be considered as the same classification. In addition, Reliability Shift Electrician formerly classified as a Lead or Chief Electrician will be treated as a Lead or Chief Electrician respectively for the purposes of Article V, Section 2 (a) only.

Upgrading:

When the Company assigns three (3) or more people to a crew, the Company will designate an employee to direct the workforce and be responsible for the crew

for all hours so assigned on that day provided the assignment is for one (1) or more hours. The designated employee in charge will be paid one dollar and seventy-five cents per hour ($1.75) in addition to the employee's basic straight time hourly rate for all hours so assigned. Upgrading will normally be on a classification seniority basis.

Re: Garage Department Shift Bidding Process

Dear Messrs. Malcarne and McCoy:

This letter confirms our understanding and agreement regarding the shift bidding process for all Garage Department Area Work Center locations. The Company and Union understand and agree to the following:

1. The Shift Bidding process shall occur on an annual basis beginning during the first week of November for all garage area work center locations.

2. The Shift Bid shall be awarded by classification seniority. During the bidding process, employees will select a day or night shift to determine the work schedule for the following year.

3. Berlin garage mechanics do not have the ability to rotate shifts.

4. If non-Berlin garage mechanic request to rotate their shifts, it must be agreed upon by personnel involved in the rotation and by supervision during the bidding process. If a rotation is agreed upon, the rotation will be in effect for the entire year.

   This Agreement does not create a practice or precedent and cannot be relied upon or used to prejudice either party in any future proceeding.

Sincerely,
Lauren Pensa

POSITION PROFILE **Effective Date: June 1, 2026**

Title:	Electrician	**Job Family:**	Miscellaneous HR
Job Profile Name:	Electrician	**Job Profile #:**	
Job Code:		**Band:**	
Revision Date:			

Role and Scope of Position:

Under general supervision, inspects, maintains, repairs and operates substations, and does such similar work in the electric system, performing such duties as:

Performing the duties included in the Time Merit Progression Program for Electrician

Essential Functions:

- Repairing and maintaining circuit breakers, switchgear, transformers, and similar equipment, including the replacing of sub-assemblies;
- Installing circuit breakers, switchgear, transformers, and similar equipment as directed;
- Making all electrical tests using standard test equipment, including but not limited to carrier and transfer tripping equipment testing and battery testing;
- Performing switching operation involving any voltage;
- Is thoroughly familiar with switching and tagging procedures, switchboard facilities, and related apparatus in area of normal assignment;
- Operating substations;
- Checking, inspecting, and testing underground system and maintaining equipment;
- Reading and interpreting wiring diagrams, blue prints, etc.;
- Making repairs to tools and work equipment;
- Recognizing, correcting if possible, and reporting abnormal conditions that develop during the progress of the work;
- Obtaining miscellaneous items from suppliers;
- Repairs or replaces insulators, conductors, transformers, fuses, disconnects and lighting arresters, etc., associated with normal duties;
- Makes standard types of transformer connection;
- Assembles, disassembles, and maintains major rotating equipment such as motors, generators, etc., as required by normal assignment;
- Works on live electrical conductors using proper tools and protective equipment;
- Installs and repairs switchboard wiring and controls, major devices and equipment, complicated wiring, relaying and control circuits, using plans and drawings as required by normal assignment;

EVERSOURCE ENERGY

POSITION PROFILE **Effective Date: June 1, 2026**

- Tests insulators on substation structures Electrical Insulation Systems, Electrical Equipment Operating Parameters, and Distribution System Protective Relays and Devices as required by normal assignment;
- Assembles, disassembles, and rebuilds power circuit breakers, voltage regulators, power transformers, distribution transformers, etc., as required within normal assignment;
- Tests with meggers, Ohmmeters, voltmeters, ammeters, metester and similar instruments and interprets results;
- Testing Contact Resistance for breakers and connections using a DLRO (Ductor);
- Makes electrical connections on copper or aluminum cable and bus, or between dissimilar materials;
- Installs all types of electrical bus work as required by normal assignment;
- Performs routine inspection, maintenance and adjustments on electrical equipment following manufacturer's instructions and/or Company procedures;
- Secondary and primary cable testing;
- Recloser programming and network testing;
- Makes simple electrical calculations and measurements;
- Bend and installs conduit;
- Performs simple rigging
- Has a working knowledge of insulating oils and SF6 gas applications and uses, including storage, clean-up, filtering and testing;
- Cleans and paints structures, equipment, and devices.
- Operates motor vehicles safely in the performance of required duties;
- Operating a motor vehicle and associated equipment;
- Performs work in clean and neat manner and exercises care to prevent damage to Company or customer's property;
- Assisting in the training of Electrician helpers;
- Provide substation escort for non-qualified individuals;
- Subject to on-call duty assignments to work alone or with others;
- Keeping the substation buildings and grounds in good order, including minor repairs and snow removal;
- Works either indoors or outdoors as required, and is subject to overtime work;
- Will have storm restoration and emergency assignments.
- **Other related duties as assigned.**

Technical Knowledge/Skill/Education/Licenses/Certifications:

- Five years experience in Time Merit Progression program for Electrician;
- Must possess a normal degree of dexterity in the use of tools and equipment;
- Must possess a working knowledge of principles involved in the operation of substation equipment;
- Acquires a thorough knowledge and understanding of Employee Safety Manual and performs work in conformance with safe practices and Company standards;

EVERSOURCE ENERGY

POSITION PROFILE **Effective Date: June 1, 2026**

- Thorough technical knowledge of substation, transmission and distribution equipment and systems;
- Understanding of and ability to properly and safely utilize various tools and equipment required to perform assigned tasks;
- Ability to effectively direct the work of others:
- Ability to repair, adjust, install and operate equipment;
- Thorough understanding of safety methods, practices, procedures and policies relating to the construction, testing, operation and maintenance of electrical or electronic equipment;
- Ability to oversee and coordinate work as assigned;
- Knowledge of applicable safety regulations and codes along with construction standards and regulations;
- Working knowledge of construction and maintenance methods and procedures;
- The ability to learn and utilize available information technologies;
- Experience in Energy Delivery, Distribution or Transmission Systems is required.

Education: High School Diploma or Equivalent, Additional formal education preferred

Experience: Five years

Licenses & Certification:

- New Hires must possess an Electrician E-1 or E-2 license **or may also meet this requirement through documented prior experience as a qualified Electrician at another Utility, provided he or she submits all necessary verification of qualification, training and relevant experience**; all other candidates must successfully complete the TMP for Electrician;
- Must be able to obtain and maintain a valid CDL license
- Must obtain and maintain Switching and Tagging certification

Working Conditions:

The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of the job. Reasonable accommodations will be made to enable individuals with disabilities to perform the essential functions.

- Some hazards involved when working on or near equipment and lines energized at secondary or high voltages.
- While performing the duties of this job, the employee is frequently required to sit, stand, talk, and hear. The employee is required to walk; use hands and fingers to operate, handle, or feel objects, tools, or controls; and reach with hands and arms. The employee may be required to drive for extended hours during a typical work day;

EVERSOURCE ENERGY

POSITION PROFILE **Effective Date: June 1, 2026**

- Climbs structures and performs work from ladders, staging, structures, etc., without adverse effects such as motion sickness or dizziness;

The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

- The noise level in the work environment is usually moderate.
- The employee is occasionally exposed to uneven terrain; high, precarious places; and outside weather conditions.
- The employee is occasionally exposed to wet and/or humid conditions, extreme cold, and extreme heat.
- Exposed to all weather conditions in cases of emergency. Manhole and vault work is frequently damp and sometimes dirty.

Problem Solving & Complexity:

- Reading and interpreting wiring diagrams, 1Lines, 3 Lines and schematics
- Makes routine tests with meggers, ohmmeters, voltmeters, ammeters, SF^ gas quality meters and similar instruments and interprets results
- Recognizing, correcting if possible, and reporting abnormal conditions that develop during the progress of work

Physical Aspects:

- Requires average physical effort.
- **Regular lifting of 50 lbs. with occasional lifting of heavier equipment including but not limited to test equipment, gas bottles and grounds.**

Re: Meter Services Training Coordinator Pilot Program

Dear Messrs. Malcarne and McCoy:

This letter confirms our understanding and agreement regarding the establishment of a Meter Services Training Coordinator Pilot Program. The Company and Union understand and agree to the following:

1. The Company will pilot two training coordinator positions (one in Local 420 and one in Local 457) for a one-year duration.

2. Employees must be fully qualified Meter Service Mechanics to be eligible for the training coordinator position.

3. Employees in the Meter Service Department who are eligible for the Training Coordinator position will be polled from senior to junior by Teal Book seniority. Final candidates will be selected based upon review and approval by a four (4) person committee comprised of two (2) Union representatives and two (2) Management representatives.

4. Employees who accept the Meter Service Training Coordinator position will be eligible for overtime in their respective districts, only during the hours after their regularly scheduled shift Monday through Thursday until no later than 10:00 p.m., and after their regularly scheduled shift on Friday until 10:00 p.m. on Sunday.

5. If an employee decides to leave the Training Coordinator position and return to his or her respective district, he or she must submit written notice at least sixty (60) days prior to the intended release date, unless another ending date is mutually agreed upon between the Company and the Union.

6. The hours of the Training Coordinator will be 6:30 a.m. to 3:00 p.m.

EVERSOURCE ENERGY

107 Selden Street Berlin, CT
06037

Lauren Pensa
Manager Labor Relations

7. When the Training Coordinators are not actively participating in training, they will return to the districts and perform the work of their prior classification. Their rate of pay will however remain at the established Training Coordinator rate.

8. During the Pilot Program, the Training Coordinators will retain their classification seniority in their prior position, and if the opportunity for promotion to Chief arises, they will be eligible to be promoted.

9. The rate of pay for the Training Coordinator will be $62.24 prior to the negotiated general wage increase. The Company and the Union shall meet on a quarterly basis as needed to discuss the Training Coordinator position.

10. If the Company decides to discontinue the Training Coordinator Pilot Program, employees in the Training Coordinator position shall return to their respective districts in their applicable position. The Company will provide sixty (60) days notice prior to the intended release date.

11. If either party wishes to discuss a permanent Training Coordinator following the pilot program, the Company and Union will meet and discuss this matter.

This Agreement does not create a practice or precedent and cannot be relied upon or used to prejudice either party in any future proceeding.

Sincerely,

Lauren Pensa

EVERSOURCE ENERGY

POSITION PROFILE **Effective Date:**

Title:	**Field Engineering Designer I** ~~Electric Service Designer~~	**Job Family**	Engineer HR
Job Profile Name:	Union – Designer I	**Job Profile #:**	
Job Code:		**Band:**	
Revision Date:	**June 1, 2026**		

POSITION SUMMARY: Performs a variety of technical and customer-related work in connection with the construction, operation, and maintenance of the Company's electric system for an assigned geographic area. Supports various Eversource functions focused on residential and Commercial/industrial customers in the areas of new business, existing customer relations, and service requirements.

ACCOUNTABILITIES – PRIMARY DUTIES:

- Maintains and builds customer relationships by ensuring customer requests are met in a timely fashion.
- Designs layouts for service additions and changes to the Company electric system using Company approved standards and policies. Performs technical calculations and prepares work orders as assigned.
- Communicates internally and externally the Company requirements for electric service installation.
- Designs, negotiates, and coordinates the installation and upgrade of residential, commercial, and industrial services including the preparation of cost estimates, work orders, and written service agreements as assigned. Works with others (e.g. Supervisors, Engineers) to prepare work orders for residential, commercial and industrial service installations and upgrade.
- Prepares easement forms and easement areas for submission as required for services and extensions on private property.
- Obtains permits as required.
- Designs, negotiates and coordinates the relocation of overhead and underground facilities, including the preparation of work orders and cost estimates as assigned.
- Recommends designs and coordinates installation of streetlights. Prepares work orders for the installation of lighting and unmetered services for customers. Prepares residential or commercial contracts.
- Performs analysis/assistance/ assessments in emergency restoration in the facilitation of restoration efforts. Expected to work beyond regular business hours as required.
- **Other related duties as assigned.**

3. Technical Knowledge/Skill/Education/Licenses/Certifications:

Technical Knowledge/Skill:

- Sound knowledge of electrical distribution systems and construction standards and techniques.
- Capable of skillfully operating various measuring instruments and testing apparatus such as range rods, corner/pull measuring devices, voltage measuring devices.
- Capable of accurately interpreting, but not limited to, company maps, site and highway construction plans, profile prints, etc.
- Effective communication skills with a concentrated customer focus. Demonstrated ability to communicate verbally and in writing.
- Knowledge of Company policies, procedures, practices and electrical distribution engineering and/or construction standards; as they relate to the Eversource accounting system, customer billing,

EVERSOURCE ENERGY

POSITION PROFILE **Effective Date:**

conservation programs, rates, prepayments and/or customer contributions, and the various computer programs.

- **Ability to proficiently use computers, including navigating work management systems, graphics work-design tools, and Microsoft Office Suite applications such as Teams, Excel, Outlook, and Word.** ~~Ability to navigate within the latest company PC application.~~
- **Proficiency in the use of standard office equipment. (e.g. Printers, Scanners, Plotters, Fax, etc.)**
- Knowledge of joint use agreements involving other utility companies.
- General awareness of the National Electric Code as it pertains to service installations, customer requirements, and the Eversource Distribution System.
- Working knowledge of the Company's Employee Safety Manual.
- Capable of reviewing and/or inspecting electric service installations for compliance to Company standards.

Education/Experience: ***Proven understanding of NESC with:***

- *Associate's degree in engineering or Engineering Technology, or related field*

OR

- ***Connecticut E-1 Electrician's license***

OR

High School diploma or the equivalent. One year of formal technical training. AND 4-6 years of related electrical distribution experience.

Ex: Technical training is acquiring an: E-2 License, electronics technology certificate, completion of line apprentice program or related training.

Refer to Time Merit Progression (TMP) for experience required for each step.

Licenses & Certifications: A valid motor vehicle operator's license is required.

4. Working Conditions: The position requires work in an office environment, at customer locations, on construction sites, and in the field including entry in manholes, vaults, and other locations where electrical equipment is located. The position requires the use of company provided PPE.

CORE AND FUNCTIONAL COMPETENCIES:

- **Safety Awareness**: Continually demonstrate that safety is required for successful completion of all work assignments.
- **Negotiation:** Effective exploring alternatives and positions to reach outcomes that gain all parties' support and acceptance.
- **Teamwork (Cooperation):** Active participation in, and facilitation of, team effectiveness; taking actions that demonstrate consideration for the feelings and needs of others; being aware of the effects of one's behavior on others.
- **Judgment (Problem Solution):** Committing to an action after developing alternative courses of action that are based on logical assumptions and factual information and that take into consideration resources, constraints, and organizational values.

EVERSOURCE ENERGY

POSITION PROFILE **Effective Date:**

- **Customer Service Orientation:** Making efforts to listen to and understand the customer (both internal and external); anticipating customer needs; giving high priority to customer satisfaction.

5. Physical Aspects:

- **Desk work: Computer use required for daily email correspondence, work order design, and engineering analyses.**
- **Field work: Walking on construction sites, along public way, and in off road situations will be required.**
- **Vehicle use: Vehicle use to travel to and from field assignments and well as to perform circuit patrols will be required.**

Title:	Field Engineering Designer II	**Job Family**	Engineer HR
Job Profile Name:	Union – Designer II	**Job Profile #:**	
Job Code:		**Band:**	
Revision Date:	~~May 10, 2019~~ **June 1, 2026**		

POSITION SUMMARY: Performs a broad range of technical, design, and customer-related work supporting the planning, design, construction, operation, and maintenance of the Company's electric distribution system across the Eversource Connecticut service territory. Responsible for the detailed design and coordination of distribution projects and a variety of customer work, ensuring compliance with engineering standards, business policies, and regulatory requirements. Supports residential and commercial/industrial customers through new business initiatives, existing service needs, and system improvements, while preparing construction documentation, coordinating materials and permitting, and facilitating efficient project execution. ~~Responsible for the detailed design of distribution projects and complex/large customer work across the Eversource CT service territory. This includes preparing construction work order that satisfy Distribution Engineering design specifications, optimize construction efficiency, and adhere to applicable Standards and Business Policies. Responsible for the ordering of long lead material, identifying tree trimming needs, permitting, environmental requirements, easements etc. to ensure efficient completion of projects.~~

ACCOUNTABILITIES – PRIMARY DUTIES:

Step 1

- ~~In addition to responsibilities~~ **Responsible** for **all duties assigned under Field Engineering** Designer I steps 1-11.
- ~~, responsible for detailed work order design to meet designated specification for Eversource projects, URD, UG, DG and~~ **Designs, negotiates, and coordinates** ~~complex customer~~ work **associated with** ~~(including~~ Primary Metering **and** ~~&~~ Network~~.~~)
- Works with various internal / external customers as needed during the work order design and construction process (i.e. Civil Engineering, Transmission, Operations, Construction etc.)
- ~~Communicates internally and externally the Company requirements for electric service installations.~~
- Considers field conditions and overall project success in preparation of construction ready work orders.
- Considers ways to reduce cost and improve efficiency of all project designs.
- Provides construction ready job estimates
- Serves as a Company representative to CDOT for assigned CDOT projects. Represents the Company's interests at CDOT meetings. Prepares work orders and estimates as needed to meet CDOT relocation requirements.
- Surveys distribution facilities For NESC safety violations, determines suitability for third party attachments and prepares work orders as necessary to accommodate attachment requests.
- Works with Real Estate department and customers to secure property rights and easements.
- Working with other groups, may obtain various permits, agreements as required. (i.e. RR, CDOT, town, city, etc.)

EVERSOURCE ENERGY

POSITION PROFILE **Effective Date:**

- Working with other groups, determines when property owner consent is required for planned work and participates in the consent process (TD007).
- May act as departmental liaison/representative (i.e. committees, initiatives, meetings, etc.)
- **The ability to learn, adopt, and become proficient in the latest company PC applications (e.g. work management systems and graphic work-design tools).** ~~Through a combination of formal training, on the job training and self-study; learn and utilize new and existing software programs related to distribution engineering.~~
- Will have nonexclusive storm restoration and emergency assignments.
- **Occasionally acts on behalf of Engineering Supervisor/Lead in their absence as needed for no more than a two-week period.**
- **Acts as coordinator in project assignments in which multiple designers are needed.**
- **Prepares full and supplemental project PAF (Project Authorization Form) documentation.**
- **Presents to management in collaboration with Distribution Design Engineer/Senior Distribution Design Engineer on technical and cost aspects of Full Funding for projects to management at capital project approval meetings.**
- **Participates in Multifunctional and Process Improvement teams, i.e. Maximo, Distribution Design Tools, etc.**
- **Serves as a mentor and trainer for the team.**
- Other related duties as assigned.

Step 2 **(Incumbent Only)**

- In addition to the requirements of Designer II step 1
- Occasionally acts on behalf of Engineering Supervisor/Lead in their absence as needed for no more than a two week period
- Acts as coordinator in project assignments in which multiple designers are needed.
- Prepares **full and supplemental** project **PAF (Project Authorization Form)** documentation
- Presents to management in collaboration with Distribution Design Engineer/Senior Distribution Design Engineer on technical and cost aspects of ~~ACT/~~Full Funding for projects to management at capital project approval meetings
- Participates in Multifunctional and Process Improvement teams, i.e. Maximo, Distribution Design Tools, etc.

3. Technical Knowledge/Skill/Education/Licenses/Certifications:

Technical Knowledge/Skill:

- Ability to communicate in a professional manner.
- Operates independently within a team environment.
- Knowledgeable of various computer applications.
- Ability to learn and utilize new software related to distribution engineering and job responsibilities.
- Individual will need to solve a wide range of problems of varying degrees of complexity associated with analyzing the performance of the distribution system.
- ~~Step 2 only –~~ Demonstrates leadership qualities. Serves as a mentor and trainer for the team. Provides positive influence for the working environment. Leads by example.

EVERSOURCE ENERGY

POSITION PROFILE **Effective Date:**

Education:	Step 1: Proven understanding of NESC **with:** • **Associate's degree in Engineering or Engineering Technology or related technical field;** OR • Connecticut E-1 Electrician's license; • Bachelor's degree in Engineering or Engineering Technology preferred ~~2-year degree in related technical field~~ Step 2 **(Incumbent Only)**: A Bachelor's degree in Engineering or Bachelor's degree in Engineering Technology
Experience:	Minimum ~~8~~ **6** years of experience for step 1~~, and minimum 10 years for step 2~~ in Field Design/Distribution Engineering is required. Working knowledge/ experience with Distribution Standards, New Business policies & procedures, and engineering design criteria. (Position by Company selection and Company need).

Re: Revised MOU on Field Training Changes

Dear Messrs. Malcarne and McCoy:

This letter confirms our understanding and agreement regarding changes to the Field Training program resulting from the June 1, 2026 Teal Book contract negotiations. This agreement modifies the Field Training MOU dated November 14, 2024. The Company and Union understand and agree to the following:

1. Effective June 1, 2026 and contingent upon ratification of the June 1, 2026 Teal Book contract, the 18-month Field Training program will be eliminated.

    a. Any Line Helpers who are currently in Field Training will return to their respective AWCs on June 1, 2026.

    b. Overhead Training Leaders will return to their respective AWCs and classifications on June 1, 2026.

    c. The Training Coordinators (one in each Local) will return to their respective AWCs on June 1, 2026.

    d. If an employee decides to leave the Overhead Training Coordinator position, he or she must submit written notice at least sixty (60) days prior to the intended release date.

2. If there is a future vacancy in the Training Coordinator position, employees in the Overhead Department who are eligible for the Training Coordinator position will be polled from

EVERSOURCE ENERGY

107 Selden Street
Berlin, CT 06037

Brooke Sherer
Director, Labor Relations

senior to junior by Teal Book seniority. Final candidates will be selected based upon review and approval by a four (4) person committee comprised of two (2) Union representatives and two (2) Management representatives.

a. Any employee who is in the Overhead Training Leader classification on May 31, 2026, interviews for the Overhead Training Coordinator position and is approved by the committee shall get first consideration for the position. If more than one Overhead Training Leader is approved by the committee, the position shall be offered by Teal Book seniority.

3. As part of their apprenticeship, Line Helpers will spend three (3) months in System Projects (Step 4 – 18-21 months). After the System Projects rotation, they will spend the remainder of their apprenticeship in their Area Work Center (Step 4 – 21-24 months; Steps 5-8).

4. The following conditions will apply to Line Helpers during their three (3) month rotation in System Projects:

   a. Line Helpers will return to their respective Area Work Center during holiday weeks.

   b. Line Helpers will be part of the System Projects overtime list except during holiday weeks. During holiday weeks, the Line Helpers will be on their respective Area Work Center overtime list.

   c. Except for holiday weeks, Line Helpers will follow the exact same practices as System Projects employees relative to hours of work, overtime and on call during the three-month rotation. They will also remain with System Projects for all storm assignments during the three-month rotation except for holiday weeks when they return to their respective Area Work Center.

5. Line Helpers who are hired into System Projects will spend months 18-21 of their apprenticeship in the Area Work Centers.

   a. During their three (3) month rotation in the Area Work Centers, System Projects Line Helpers will return to System Projects during holiday weeks.

   b. During this rotation, the System Projects Line Helpers will be part of the Area Work Center overtime list except during holiday weeks. During holiday weeks, they will be on the System Projects overtime list.

AGREEMENT made as of the **first** day of **October, 2016**, by and between WESTERN MASSACHUSETTS ELECTRIC COMPANY (hereinafter referred to as "the Employer") and LOCAL UNION 455 of the INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS (AFL-CIO), (hereinafter referred to as "the Union").

It is mutually agreed between the parties as follows:

SECTION I
Purpose of Agreement

Both parties desire to promote harmony and efficiency among the employees of the Employer so that the employees and the Employer may obtain mutual economic advantages consistent with the duty of the Employer as a public utility at all times to provide adequate and uninterrupted electric service in the territory and communities which it serves. Both parties are signing this agreement in good faith and pledging themselves to keep its spirit and letter. This Agreement shall be binding on any and all successors and assigns of the Employer, whether by sale, transfer, merger, acquisition, consolidation or otherwise. The Employer shall make it a condition of transfer that any such successors or assigns shall be bound by the terms of this Agreement.

SECTION II
Definitions

All Districts including the Cummington and Lee Satellites:

(a) employee: The terms "employee" and "employees" as used in this agreement shall mean (1) all employees of the Employer in its overhead, underground, distribution departments, stock department, streetlight department, transportation department, maintenance department, and janitors including line mechanics and line helpers, response specialists, specialized mobile equipment operators, cable splicers and helpers, garage mechanics, electricians and helpers, area stockhandlers and stockhandlers (2) all meter readers, meter and service representatives, meter service installers, building maintenance mechanics and janitors, (3) all Field Technicians and GIS Technicians, (4) Test Technicians.

The provisions of this agreement do not apply to executives, superintendents, supervisors, office and clerical employees, guards, professional employees, and laboratory employees.

(b) Continuous Employment: The term "continuous employment" as used in this agreement shall mean an uninterrupted period of employment of the employee by the Employer and by any predecessor Company of the Employer. The period of employment of a regular employee shall be considered uninterrupted even though an interruption shall occur by reason of the employee serving in the Armed Forces of the United States.

(c) Regular employee: The term "regular employee" as used in this agreement shall mean any employee who has been employed by the Employer continuously for a period of six (6) months in one or more of the departments of the Employer named in paragraph (a) of this Section.

(d) Probationary employee: The term "probationary employee" as used in this agreement shall mean any employee who has not been employed by the Employer for such six (6) month period in one or more of said departments. **Such probationary period may be extended by mutual agreement between the Union and the Employer.** If a probationary employee is discharged by the Employer, such employee will be entitled to a meeting with the Employer as outlined in Section XVII to discuss the discharge, but neither the Union nor the employee will have the right to arbitrate the propriety of the discharge.

(e) Temporary employee: The term "temporary employee" as used in this agreement shall mean any employee who is employed by the Employer in one or more of said departments for a job that has a definite termination point.

(f) Long-Term Temporary employee: The term "Long-Term Temporary employee" as used in this agreement shall mean an employee hired with an expected termination date of six (6) months or more from the date of hire. Long-term temporary employees will be eligible for life insurance and medical benefits after twelve (12) months of continuous employment. Long-term temporary employees will be given a two-week notice of termination of employment. This termination will not be subject to Section XVI or Section XVII of the agreement by the employee or Union.

(g) Hourly-Paid employee: The term "hourly-paid employee" as used in this agreement shall mean any employee who is paid by the Employer on an hourly basis.

(h) Employed in Shift Operations: An employee (unless hired prior to October 1, 1994) is “employed in shift operations” within the meaning of this agreement when the employee’s regular hours of employment are consistently or periodically other than *first shift between Monday through Saturday per Section XXIII of the Collective Bargaining Agreement.*

(i) Day: The term "day" or "days" as used in this agreement shall mean a calendar day or days unless otherwise stated.

(j) Emergency: An "emergency," as referred to in this agreement, shall mean a circumstance which involves the safety of any person, loss of or damage to any property, or interruption of or interference with service or operations.

SECTION III
Recognition of Union by Employer and
Requirements of Union Membership

(a) The Employer agrees to recognize the Union as sole bargaining agent for the employees with regard to wages, hours of employment, or other conditions of employment.

(b) All employees who are members of the Union on the effective date of this agreement which is September 1, 2010, or who may thereafter become members of the Union shall remain members of the Union during the term of this agreement as a condition of their employment by the Employer in a position covered by this agreement. New employees (persons first hired by the employer during the term of this agreement and in a position covered by this agreement) shall be required to apply for membership in the Union at the end of thirty (30) days of continuous employment. Employees hired for temporary summer employment are excluded from this requirement for an additional 60-day period in that summer and in any subsequent

summers from their first day of hire.

(c) The Employer agrees that during the term of this agreement it will make a single deduction for the required initiation fee upon receipt of individual written authorization and assignment and in addition will deduct Union membership dues from the wages of each employee who authorized it to do so in writing in the form attached hereto and marked Appendix "B," in such amounts as shall be stated in said form. Provided, however, that in the event such amounts are changed in accordance with the Constitution and Bylaws of the Union and upon receipt of written notice signed by the Business Manager, Financial Secretary, President, and Recording Secretary of the Union at least thirty (30) days in advance of the effective date of such change, the Company will implement such new or changed amounts. The total amount so deducted shall be paid each month upon receipt therefor in the name of the Union signed by the financial secretary of the Union, to said financial secretary or to such other officer thereof as shall be designated in writing by the Union, within the ten (10) working days next following the date upon which the last deduction for the month is made.

SECTION IV
Pledge of Union and Employer

(a) The Union agrees that its members or representatives will not solicit membership in the Union during the hours of employment either of the solicitor or of any employee; and that there shall be no dues collected or other Union business or activities engaged in during the hours of employment, except as follows:

The Business Manager, Assistant Business Manager, or Steward will have reasonable freedom of movement to discuss differences which may arise in interpretation of this agreement, investigation of grievances, or jurisdictional disputes involving the Employer. The Business Manager, Assistant Business Manager, or Steward will notify the employee's supervisor and the supervisor of any other employee involved as far in advance as possible of the time that the employee will be absent from work. Such freedom of movement shall not unduly interfere with Employer operations.

(b) The Union agrees that it will not authorize during the term of this agreement any strike, stoppage, or slowdown of work for any reason or cause whatever. Each employee agrees that during the term of this agreement they will not engage in or induce others to engage in any strike, stoppage, or slowdown of work. The Union further agrees that it will take every reasonable means which are within its power to induce employees engaged in any strike, stoppage, or slowdown of work in violation of this agreement to return to work and that it will post a notice on the bulletin boards of the Employer used for notices to the employees, within twenty-four (24) hours after receiving written notification from the Employer of such violation, that the action of the employees was not authorized by the Union and directing the employees to return promptly to their jobs and cease any further violation of this agreement. The Employer agrees that in consideration of the performance by the Union of its undertaking with respect to the termination of any strike, stoppage, or slowdown of work, there shall be no responsibility on the part of the Union, its officers or official representatives for any strike, stoppage, or slowdown of work which has not been authorized or approved by the Union.

(c) The Union further agrees that the Employer has the right to take disciplinary action, including discharge, against any employee who engages in any strike, stoppage, or slowdown of work in violation of this agreement. Whether or not an employee has engaged in any strike, stoppage, or slowdown of work may be the subject of a grievance, but if the arbitrator

determines an employee has engaged in any strike or stoppage, the Arbitrator shall not reduce or otherwise modify the penalty imposed by the Employer. If the arbitrator determines an employee has not violated the provisions of this Paragraph (b), the employee shall be reinstated with compensation for loss of any wages.

(d) The Employer agrees that during the term of this agreement there shall be no lockout by the Employer.

(e) The Union agrees, for itself and the employees, not to hinder or interfere with the management of the Employer in its several departments, including the assignment of work, the direction of working forces, the right to hire, suspend or discharge for proper cause, to transfer employees to work for which they are better suited and to furlough employees because of lack of work or for other good and sufficient cause, but in the exercise of these responsibilities in management the Employer agrees that it will not discriminate against any member of the Union.

(f) Nothing in paragraph (e) shall be held to be paramount to any other provision in this agreement which may be claimed to be in conflict with it, but all parts of this agreement shall be held to be of equal importance and shall be subject equally to the provisions of Section XVI hereof.

(g) It is agreed that the Union may have reasonable use of a bulletin board for the purpose of posting notices pertaining to the Union and its members. All such Union notices shall be signed by the Business Manager of the Union. If requested by the department supervisor, copies of all such notices posted will be placed on the department supervisor's desk prior to posting. It is understood that such notices shall contain nothing political, controversial or reflecting upon the Employer, any of its employees, or any labor organization among its employees. The Union or the Employer may remove from the bulletin board any notice posted thereon which does not comply with the provisions of this paragraph.

(h) The Employer will pay basic straight-time wages to not more than **eleven (11)** employees for time lost from their normal basic work schedules for meaningful negotiation meetings with representatives of the Employer for the amendment of this Agreement.

(i) It is agreed that neither the Company nor the Union will discriminate against any employee in application of any of the terms of this Agreement because of race, color, religion, age, sex, national origin, ancestry, marital status, sexual orientation, disability, military status, veteran status or genetic information.

SECTION V
Hours of Employment

(a) The regular hours of employment for all employees shall be up to ten (10) hours per day and forty (40) hours per week. A day may be a calendar day or any twenty-four (24) hour period and a week may be a calendar week.

(b) The normal workweek for all employees, excepting employees who are employed in shift operations, shall be scheduled between Monday and Saturday inclusive, between the hours of 6:00 a.m. and 6:00 p.m. Late schedule will be assigned by rotation or on a volunteer basis. The Employer may change such workweek if required by federal or state authorities or to meet conditions due to a serious emergency or disaster or to fill a temporary vacancy, but upon the termination of such conditions or vacancy, the Employer shall reinstate

such workweek for each employee whose workweek was changed in accordance with this provision. Work schedules, within the normal workweek, will be determined by the Company and posted and may include a straight eight-hour shift without a designated lunch period.

(c) At the option of the Company, summer hours will be available between the period beginning the first Sunday in April to the last Saturday in October, or any portion of this seasonal period. The assignment of summer hours to a day worker will not cause such employee to be designated as employed in a shift operation. All hours in the Agreement which are based on an 8:00 a.m. to 4:30 p.m. daytime schedule will be adjusted to conform with summer hours.

(d) The provisions of this Section do not apply to a part-time employee and shall be applied to any temporary employee only after such employee has worked for the Employer more than ninety (90) days without interruption in a calendar year and in connection with the employee's work beyond such ninety (90) days.

SECTION VI
Overtime Pay

(a) An overtime rate of one and one-half (1 1/2) times the hourly rate of a regular and probationary employee will be paid to such employee for all hours of work performed by such employee (1) outside the employee's regular hours of employment or (2) beyond forty (40) hours in any one week, with the exception of hours of work performed on a holiday which are covered by the provisions of Section 8 of this agreement and which shall be paid for in accordance with such provisions.

(b) An overtime rate of one and one-half (1 1/2) times the hourly rate of a part-time employee shall be paid to such employee for all hours of work performed by such employee beyond forty (40) hours in any one week.

(c) An overtime rate of one and one-half (1 1/2) times the hourly rate of a temporary employee shall be paid to such employee for all hours of work performed by such employee beyond forty (40) hours in any one week. A temporary employee shall be paid such overtime rate for all hours of work performed by the employee outside the employee's regular hours of employment only after the employee has worked for the Employer more than ninety (90) days without interruption in a calendar year and in connection with the employee's work beyond such ninety (90) days.

(d) An employee who has Sunday as a regularly scheduled day off in a calendar week shall receive an overtime rate of two (2) times the employee's hourly rate for all hours of work performed on such Sunday.

(e) An employee who is employed in a shift job requiring twenty-four (24) hour coverage shall receive an overtime rate of two (2) times the employee's hourly rate for all hours of work performed on the employee's second regularly scheduled day off in such calendar week.

(f) An employee who is employed in a twenty-four (24) hour shift job and has Sunday as a regularly scheduled day off shall receive double time on the employee's second regularly scheduled day off in such calendar week.

(g) When an employee's regular work schedule is changed with less than **forty-eight (48)** hours advance notice, any time worked within such new regular schedule, which was not regular work time under the old schedule, will be paid for at time and one-half rates until the advance-notice period has expired, except when other rates are applicable, and excepted further when an employee's regular work schedule is changed to provide relief coverage because of sickness or other unexpected absences of employees, forty-eight (48) hours shall be the advance-notice period for application of greater than straight-time rates. An employee may be returned to the employee's previous regular schedule without forty-eight (48) hours' advance notice after serving a relief coverage assignment as described herein.

(h) All hours for travel time or work time paid at straight-time rates under the terms of this agreement will be paid at double straight-time rates, when employees are assigned to emergency work for other utilities in locations or upon facilities other than those owned or operated by Eversource.

(i) An employee shall not be paid both daily and weekly overtime for the same hours so worked either under the provisions of this Section, or of Section 7, or Section 8 hereof; and in no case shall overtime compensation provided for by these three sections be duplicated or pyramided.

(j) If an employee is required to work beyond sixteen consecutive hours, (or responds to a call-out within three hours of their ~~**normal**~~ quitting time, such hours will be counted towards the sixteen consecutive hours [non-worked hours will not be paid]), the employee will be paid at double the straight-time rate for those hours worked beyond sixteen, until the employee is allowed eight consecutive hours off. Time allowed off for meals will be counted in determining sixteen consecutive hours. Any part of such eight consecutive hours off which extends into the employee's normal work schedule will be paid for at straight-time rates. When service requirements will not permit allowing as earned rest time off that part which may extend into the normal schedule, such rest time worked will be paid for at double straight-time rates. Triple time will not be paid.

(k) Insofar as practicable, scheduled overtime work will be equitably distributed over the calendar year among the employees within the department, giving preference to the employees whose normal duties include such work. Excused overtime for scheduled overtime work will be counted only when an employee has been given a twenty-four (24) hour advance notice of the scheduled overtime work. Insofar as practicable, emergency overtime will be equitably distributed over the calendar year by calling the low employee on the overtime list based upon qualifications and familiarity with the particular job. *Overtime lists will be combined into one list within a district. There will be no planned overtime lists in any area*. When an employee is scheduled for planned overtime, their name will be removed from the overtime list for any call-outs prior to the planned overtime. When an employee transfers or bids to a new classification, the employee will carry their overtime hours with them. A newly hired employee will be assigned overtime hours equal to that of the employee with the lowest number of overtime hours in the job classification.

(l) Response To Overtime:

1. Because of the nature of our business, and our need to provide 24-hour a day service to our customers, it is necessary that employees work overtime when the need exists - planned and unplanned.

2. Employees shall furnish an acceptable means of off-hour contact by telephone.

3. The response rate standard for the Overhead Lines, Underground and Substation/EM departments is 10% for all offerings.

4. For this purpose, the measure is calculated as the percent of calls made which result in a report to work. Overtime hours resulting from an out of town storm restoration assignment to a non-Eversource affiliated company will not be counted towards the department average of total overtime hours worked. This standard is to be measured annually (year-end) on a going-forward basis. Employees who do not respond to a call will be charged with an instance for lack of response on the automated call-out system list. Employees who have worked the department average of total overtime hours in the preceding calendar year will be deemed to have met the standard regardless of acceptance rate to call outs. Employees who do not meet the minimum response level (See #3 above) will not be eligible for assignments at other utilities in locations or upon facilities other than those owned or operated by Eversource or voluntary planned overtime in the following year. Employees who do not meet the minimum response level (See Section VI (l)3) will be eligible in the following year for assignments at "sister" Eversource companies only after all other fellow department employees who have met the requirements have been asked first.

(m) A Crew Supervisor in the overhead lines, underground lines, and electric stations departments may utilize the Supervisor's own crew to perform overtime work without regard for the overtime list one hour prior to the start of the scheduled shift on a regularly scheduled workday.

(n) For purposes of equalization of unscheduled overtime, Response Specialists are to be considered as outside the overhead line department.

(o) **Employees scheduled for planned overtime assignments (non-regular scheduled days only) shall be for a minimum of four (4) hours at the applicable rate. The Company reserves the right to cancel the planned overtime assignment by 3 p.m. on the day prior to the planned overtime assignment.**

SECTION VII
On Call/Call-Out Pay

I. On-Call

(a) Employees who are assigned by the Company to take trouble calls outside their normal schedule hours will be paid:

(1) one and one-half (1½) hours at basic straight-time rates for each such day assigned - Monday through Friday,

(2) three hours (3) at basic straight-time rates for each Saturday, Sunday, or recognized holiday so-assigned.

(b)(1) Employees transferred after October 1, 2001 whose job requirements include assignment to take trouble calls outside of normal scheduled hours will be required, during periods of such assignment, to make themselves available at their reporting base within approximately one-half hour.

(b)(2) Employees placed on-call will be considered to be on-call for the entire district, e.g., Pittsfield/South County employees will be considered on-call for both areas; Hadley/Cummington/Montague employees will be considered to be on-call for all three areas.

Note: Selection process for being placed "on-call":

1) If the Company determines that Pittsfield/South County Work Centers needs to place two or more line crews on-call or Hadley/Cummington/Montague Work Centers need to place three or more crews on call then: a) volunteers will be asked by utilizing the weekly overtime list for each respective district/satellite. If this process does not satisfactorily fill the on-call need then the actual hours worked list for each respective district/satellite for the current year will be used and the employee with the lowest number of actual hours list will be selected. If an additional person is needed then the employee with the next lowest number of actual hours worked will be selected. This process will continue until the need is fulfilled.

2) If the Company determines that Pittsfield/South County Work Center needs to place one line crew on-call or Hadley/Cummington/Montague Work Centers need to place one or two line crews on call then: a) volunteers will be asked by utilizing the weekly overtime list for the combined district. If this process does not satisfactorily fill the on-call need then the actual hours worked list for each respective combined district for the current year will be used and the employee with the lowest number of actual hours list will be selected. If an additional person is needed then the employee with the next lowest number of actual hours worked will be selected. This process will continue until the need is fulfilled.

II. Call-Out

(a) Each time an employee is called out from the employee's home at times other than the employee's regular hours of employment, the employee shall be paid for a minimum of two and one-half (2-1/2) hours' work at the applicable overtime rate, computed in accordance with Section 6, except that when the employee is so called out between the hours of 12:00 midnight and 5:00 a.m., the employee shall be paid for a minimum of three (3) hours' work at such overtime rate. The foregoing minimum payments shall not apply to an employee who is so called out within two (2) hours of the start of the employee's regular hours of employment and works to the employee's regular starting time, but the employee shall be paid only for the actual time worked by the employee.

(b) In computing overtime pay of an employee so called out, working time shall begin immediately upon the employee's arrival at the employee's station and end upon the employee's return to such station; provided, however, the employee shall be credited with one-half hour travel time.

(c) If an employee is required to work outside of the employee's normal schedule for fifteen (15) minutes (except for more than two hours for prearranged overtime when such overtime immediately precedes the start of the normal workday) during the eight (8) hour period

immediately preceding the starting time of the employee's next normal schedule, the employee will, whenever possible, be allowed rest time during that normal schedule without loss of normal wages. The rest time shall be equivalent to the sum of the time worked and any time allowed off for meals during the above eight (8) hour period, except that eight hours rest time will be provided if an employee is required to work six consecutive hours, or, if the employee is working a ten (10) hour day, ten (10) hours rest time will be provided if an employee is required to work eight (8) consecutive hours, **for employees working a 12 hour shift, 12 hours rest time will be allowed if required to work ten (10) consecutive hours**. Time allowed off for meals will be counted in determining beyond fifteen (15) minutes. When service requirements will not permit allowing all of the earned rest time off during normal schedule, that part worked will, except for holidays, be paid for at double straight-time rates. Rest time shall be granted in accordance with this paragraph on an employee's day of relief when the employee has been scheduled to work on that day.

This language supersedes the rest-time/eight consecutive hours off letter dated October 8, 1998.

(d) When an employee continues work into the employee's scheduled period of work, the employee shall be given rest time when the work is completed, but not going beyond such scheduled period of work.

(e) The employee shall be paid on the straight hourly basis for any portion of such rest period so taken by the employee, which occurs during the scheduled period of work.

(f) An employee called out at times other than the employee's regular hours of employment shall return to the station upon completion of the assigned work; and unless further calls have been received or further trouble is reasonably expected from current potential storm warnings, flood warnings, or other acts of God, the employee will not be required to remain on the job to fill out the minimum call-out time.

(g) The provisions of this Section do not apply to a part-time employee and shall be applied to any temporary employee only after such employee has worked for the Employer more than ninety (90) days without interruption in a calendar year and in connection with the employee's work beyond such ninety (90) days.

SECTION VIII
Holidays

(a) The term "holiday" or "holidays" as used in Sections 6 and 8 of the agreement includes the following days:

New Year's Day, Martin Luther King Day, Presidents' Day, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, and Christmas Day shall be recognized as holidays.

In addition to the 10 federal holidays above, employees will be granted two floating holidays during the calendar year based on operational requirements and supervisory approval. The two floating holidays can be used for any reason and are requested by the employee. In the event of a conflict between employees requesting the same date, seniority shall govern.

(b) A regular employee will receive as holiday pay eight (8) hours' pay at the employee's straight hourly rate for a holiday, subject to the provisions of Section 12 (d), even though no work is performed by such employee.

Work performed on a holiday by such employee shall be paid for as follows:

(1) Such employee, except when employed in shift operations, shall be paid for work performed on such holiday which falls within the employee's scheduled workweek, in addition to eight hours of work on such holiday, at the overtime rate of one and one-half (1½) times the employee's straight hourly rate for up to eight hours during the employee's regular schedule on such holiday and at the straight-time rate for any additional regular scheduled hours within the employee's scheduled day. The employee shall be paid at the overtime rate of two (2) times the employee's straight hourly rate for any hours of work performed by the employee outside the employee's regular schedule on such holiday.

(2) Such employee, except when employed in shift operations, shall be paid for work performed by the employee on such holiday which falls outside the employee's scheduled workweek, in addition to said holiday pay, at the overtime rate of one and one-half (1½) times the employee's straight hourly rate for any hours of work performed by the employee on such holiday.

(3) Such employee when employed in shift operations shall be paid for work performed by the employee on such holiday, which falls on the employee's scheduled day of work, in addition to eight hours of work on such holiday, at the rate of one and one-half (1½) times the employee's straight hourly rate for up to eight (8) hours of work on such holiday and at the straight-time rate for any additional regular scheduled hours within the employee's scheduled day. The employee shall be paid at the overtime rate of two (2) times the employee's straight hourly rate for any hours of work outside the employee's regular schedule on such holiday.

(4) Such employee when employed in shift operations shall be paid for work performed by the employee on such holiday which falls outside the employee's scheduled workweek, in addition to said holiday pay, at the rate of one and one-half (1½) times the employee's straight hourly rate for any hours of work performed by the employee on such holiday.

(c) An employee on scheduled vacation leave which includes a holiday shall receive an extra day's pay for such holiday if it is determined by the Employer that it is not practical to schedule an additional day of vacation. If it is determined that an additional day of vacation can be scheduled, whenever practicable the additional vacation day will be scheduled to immediately precede or follow the vacation period during which the holiday occurs.

(d) Only employees when employed in shift operations who are scheduled to work a holiday will have the option of receiving holiday pay or receiving a day off in lieu of holiday pay. **Such day off will be requested by the employee during the week of the holiday worked. If the employee does not request such day off at that time then the employee shall be paid in the following paycheck for the holiday worked.**

(e) When a holiday falls on a Saturday, the preceding Friday will be the day observed in place of the Saturday holiday and holiday pay and the above rates for work on the holiday will be effective for such Friday.

(f) When a holiday falls on a Sunday, the following Monday will be the day observed in place of the Sunday holiday and holiday pay and the above rates for work on the holiday will be effective for such Monday.

(g) The preceding two paragraphs shall not apply to employees employed in shift operations.

SECTION IX

Time Off for Death in Family

(a) Time off with pay, which may be one, two, or three working days, will be granted to any regular and probationary employee upon notification to the employee's supervisor of the death of a member of the employee's immediate family and only when the employee is in actual attendance at the funeral. The immediate family, referred to herein, shall include a father, mother, husband, wife, brother, sister, son, daughter, grandfather, grandmother, grandchild, father-in-law, mother-in-law or step-relative in the above classifications.

(b) In addition, one working day off with pay, not extending beyond the day of the funeral and only when the employee is in actual attendance at the funeral, will be granted in the case of the death of a brother-in-law, sister-in-law, uncle, aunt, nephew or niece.

(c) In cases of death in the family not included in the above, time off may be granted, with due consideration to be given, according to the circumstances in each individual case.

(d) Duration of the time off with pay will depend upon the circumstances in each case, but shall in no case exceed three (3) working days and shall not extend beyond the date of the funeral except if extraordinary circumstances require an additional day beyond the day of the funeral for travel purposes, such day may be allowed as part of the three (3) day working day period.

(e) If death occurs to a member of an employee's immediate family, as defined in paragraph (a) above, during the employee's scheduled vacation period, that portion of the employee's scheduled vacation from the day of death up to and including the day of the funeral will be rescheduled, but not to exceed three (3) days. The vacation will be rescheduled at the option of the Employer to another time during the calendar year. In the event vacation to be rescheduled under this section cannot be rescheduled during the current calendar year, it will be rescheduled as promptly as possible within the first four months of the following calendar year.

(f) The provisions of this Section do not apply to a part-time employee and shall be applied to any temporary employee only after such employee has worked for the Employer more than ninety (90) days without interruption in a calendar year and in connection with the employee's work beyond such ninety (90) days.

SECTION X
Jury Duty and Military Leave of Absence

(a) Whenever a regular employee is required to be absent from the employee's regular duties because of Jury Duty and receives compensation from the appropriate governmental authority for reporting for said Jury Duty, the Employer will make up the difference between (1) the wages for the hours which the employee normally would have worked on the day or days of Jury Duty computed at the employee's straight hourly rate and (2) the amount which the employee receives from the appropriate governmental authority for Jury Duty for such day or days.

(b) In the event that the employee has an opportunity to perform some of the employee's regular duties for the Employer, the employee shall be paid the regular hourly rate for the hours worked which will be in addition to any money received from the appropriate governmental authority for Jury Duty.

(c) If the sum of the employee's compensations for Jury Duty and the amount received for work actually performed does not equal the wages for the total hours which the employee normally would have worked on the day or days of Jury Duty, the difference will be made up by the Employer. If such sum is equal to or greater than such wages, no additional payment will be made by the Employer.

(d) Holiday pay which such employee would have received if not on Jury Duty shall be paid to the employee without deduction for pay received from the appropriate governmental authority for work on such holiday.

(e) It is expected that, if an employee is relieved of Jury Duty before noon, the employee shall report back to the employee's supervisor for work assignment; if relieved after noon, the employee shall not be required to report back for work.

(f) *The Company will grant a military leave of absence as required by law and provide certain benefits to an employee granted such a leave. The benefits provided by the Company will be those set forth in the "Leave of Absence for Military Service" section of NUP 15 – Leaves of Absence, which may be amended at any time at the sole discretion of the Company.*

(g) The provisions of this Section do not apply to a part-time or probationary employee and shall be applied to any temporary employee only after such employee has worked for the Employer more than ninety (90) days without interruption in a calendar year and in connection with the employee's work beyond such ninety (90) days.

SECTION XI
Vacations

(a) Regular Employees will be allowed the following vacation periods annually with basic straight-time pay:

1)

- **For employees with less than one year of service and hired between January 1 and March 31 of the current calendar year will be allowed three weeks of vacation.**

- **For employees with less than one year of service and hired between April 1 and June 30 of the current calendar year will be allowed two weeks of vacation.**
- **For employees with less than one year of service and hired between July 1 and September 30 of the current calendar year will be allowed one week of vacation.**
- **For employees with less than one year of service and hired between October 1 and December 31 of the current calendar year will not be granted vacation for that period.**

2) Employees who are expected to complete at least one year of continuous service by December 31 of a calendar year will be allowed three weeks' vacation in that and each succeeding calendar year until eligible for four weeks' vacation under 1.(c) below.

3) Employees who are expected to complete 10 years of continuous service by December 31 of a calendar year will be allowed four weeks' vacation in that and each succeeding calendar year until eligible for five weeks' vacation under 1.(d) below.

4) Employees who are expected to complete 20 or more years of continuous service by December 31 of a calendar year will be allowed five weeks' vacation in that and each succeeding calendar year.

Less than one year of service	Start date January 1 through March 31 – 15 days
	Start date April 1 through June 30 – 10 days
	Start date July 1 through September 1 – 5 days
	Start date October 1 or later – no vacation accrued.
One year but less than 10 years	15 days per year
10 years but less than 20 years	20 days per year
20 years or more	25 days per year

5) During the year in which an employee reaches their 63rd birthday, the employee will be entitled to an additional week of vacation pay in that calendar year and every calendar year thereafter. **This additional week of vacation applies only to those employees who have reached their 63rd birthday by December 31, 2016 and were hired prior to that date.**

(b) Vacations shall not be cumulative from year to year. Employees entitled to vacations will take them in accordance with a schedule to be prepared by the Department Superintendent of the Employer. Consistent with the Employer's service obligations, vacation periods will be scheduled to meet and suit the convenience of employees. Employees may express to the Superintendent as early as possible any desire for specific vacation dates and such expressions will be given consideration in making up the vacation schedule with seniority to govern in case of conflict.

(c) One (1) of the three (3) weeks of vacation for those employees who are eligible for a three (3) weeks' vacation, two (2) of the four (4) weeks of vacation for those employees who are eligible for a four (4) weeks' vacation, three (3) of the five (5) weeks of vacation for those employees who are eligible for a five (5) weeks' vacation and four (4) of the six (6) weeks of vacation for those employees who are eligible for a six (6) weeks' vacation may be scheduled by the Employer at any time during the calendar year.

(d) Any employee eligible for one (1) or more weeks' vacation may split one week into two parts and one week into up to five parts provided a one-week notice is given where

practicable, except in case of an emergency. A split vacation shall not have preference over a first or second week's vacation or a previously scheduled vacation of an employee. Seniority shall govern in case of conflict of choice of split vacations among the employees. The second part of an employee's split vacation shall not have preference over any other employee's vacation.

(e) Within the meaning of this Section, vacation pay for a week for an employee is a sum equal to forty (40) times the straight hourly rate of such employee as of the time the employee's vacation is taken, subject to the provisions of Section 12 (d).

(f) *If an employee fails to perform any work, quits or is discharged during a calendar year, they will be paid the prorated vacation amount that they have earned.*

(g) An eligible employee who leaves the service of the Employer to enter the military service of the United States or is laid off for lack of work or quits after giving two (2) weeks' notice, and who has not then received vacation for such calendar year, shall receive vacation pay for such calendar year as follows:

The employee shall be paid that proportion of one (1), two (2), three (3), four (4), five (5), or six (6) weeks' vacation pay [the number being determined in accordance with paragraph (a) hereof except that the date on which the employee ceases work shall be used in place of December 3l as the number of full months worked by the employee during such calendar year bears to twelve (12)]. For this purpose, if the date of cessation of work occurs on or after the 15th calendar day of the month, the period of work in such month shall be counted as a full month, but if it occurs prior to the 15th calendar day of the month, the period of work in such month shall not be counted.

(h) The provisions of this Section do not apply to temporary employees, probationary employees, or part-time employees.

SECTION XII
Wages

(a) Schedule A attached hereto shows a list of the classifications covered by this agreement and the wage rate ranges applicable to each classification effective **September 4, 2016, October 1, 2017, September 30, 2018 and September 29, 2019**. All employees in a classification shall be paid at a rate of pay that comes within the rate range applicable to such classification. If any general wage adjustment is made by the Employer, any employee then receiving a rate in excess of the maximum rate for the job classification in which the employee is employed shall receive as a general wage adjustment a sum equal to the amount of the general wage adjustment as applied to the maximum rate of pay of such job classification.

(b) The progress of an employee within the rate range for the job classification shall be based on merit *and the provisions set forth in the Company/Union Time Merit Progression (TMP) Letter of Agreement dated March 22, 1989 found in Section XXV*. Merit includes the employee's effort and initiative, *safety on the job,* progress and experience in and knowledge of the requirements of the job classification, and it shall be the responsibility of the Employer to determine the same.

(c) Each employee whose rate of pay is from time to time below the maximum for their job classification shall be reviewed for a merit increase on wages once each six (6)

months. Merit increases will be for thirty (30) cents per hour or more, subject to the limitation of the maximum rate for the job. Following each such review, the Employer will notify the employee if the employee has not been granted a merit increase and the reasons therefore. Employees at the top rate of their classification shall receive Performance Appraisal Reviews at six (6) month intervals until they reach the Journeyman level. Any complaint as to the Employer's action may be processed as a grievance through the grievance procedure established in Section XVI of this agreement.

(d) When an employee is temporarily assigned by their authorized supervisor, in advance of performance, to perform higher classes of work and actually performs said work for a period of two (2) hours or more, the employee shall be compensated for such work at the minimum of the rate range for such higher classification or at the hourly rate of pay increased by fifteen (15) cents per hour, whichever is the higher, but not in excess of the maximum of such rate range. If the temporary assignment is to perform work in a supervisory classification, the hourly rate of pay of the employee shall be increased by *1.75* dollars per hour. After an employee has worked continuously for four (4) weeks on a temporary upgraded job, thereafter, so long as the employee continues to work at such job, the temporary upgraded rate shall apply to holiday pay, accident pay, vacation pay, and sickness disability payments. *In the event an employee is to be upgraded or promoted within a department and a relative of that employee (as defined by NUP64) works within the same department, the relative employees may not be assigned to the same work crew unless under emergency situations.*

(e) Whenever an employee not employed in a shift operation is assigned temporarily to perform work of an employee in a shift operation, the employee shall be entitled to overtime pay for hours worked by the employee on such temporary assignment outside of the employee's regular hours of employment unless the temporary assignment is for a period of forty (40) hours or more to work in a shift operation in which case the employee shall be considered as a person employed in a shift operation for the duration of such temporary assignment.

(f) The Employer shall advise the Union, in advance, of employees being transferred temporarily from one area to another or employees being transferred temporarily from one Occupational Group to another. Except for emergencies, as much advance notice as reasonably possible will be given.

(g) The Employer agrees that any employee selected on or after the date of this Agreement, to fill a vacancy as a Specialized Mobile Equipment Apprentice, will be promoted to Specialized Mobile Equipment Operator, respectively, not later than upon the completion of six (6) months service in such apprentice classification, provided the employee qualifies for such promotion. employees who are selected to fill an apprentice vacancy, and who have two (2) or more years of continuous service with the Employer on the date of such selection shall receive the rate of forty (40) cents per hour above the single rate established for the apprentice classification.

(h) Employees who are selected to fill an apprentice vacancy and who have ten (10) or more years of continuous service with the Employer on the date of such selection shall receive a rate equal to the minimum rate of Specialized Mobile Equipment Operator, except where such rate is in excess of the employee's current rate, the employee will continue to receive the employee's current rate.

SECTION XIII
Seniority

(a) The Employer shall make the selection of regular or probationary employees for promotion based upon the following factors:

(A) Length of continuous employment
(B) Training
(C) Ability
(D) Efficiency
(E) Physical fitness

Whenever there is no substantial difference with respect to factors (B), (C), (D), or (E), length of continuous employment as defined in Section 2 (d) shall govern, except as otherwise expressly provided in subparagraph (b) of this Section.

(b) When a promotion is to be made within an Occupational Group as hereinafter defined, and as shown on Appendix "C" which is attached hereto, the following requirements as to preference shall be met:

(1) First opportunity to fill a vacancy shall be given employees within the Occupational Group in which the vacancy exists. The employee in a particular job classification within the Occupational Group who has the necessary ability and qualifications shall be eligible to advance to the next higher job classification within the employee's Occupational Group, provided that whenever there is no substantial difference with respect to factors (B), (C), (D), or (E),

All Districts:

The employee with the greatest occupational seniority shall be selected. An employee must remain in a job classification for at least one (1) year before the employee is eligible to advance to the next higher job classification within the employee's Occupational Group.

(2) Vacancies in a job classification which is above the lowest step in an Occupational Group for which no qualified eligible employee within such Occupational Group is available, shall be filled by mutual agreement between the Employer and the Union. Mutual agreement shall not be unreasonably withheld.

(3) When necessary to determine the qualifications of applicants, the Employer shall determine the same in a reasonable manner consistent with the requirements of the job vacancy. An employee who formerly held the job classification shall be presumed to be qualified. In the event tests are used to determine the qualifications, such tests will be jointly administered by the Employer and the Union. Any disagreement concerning use of such tests shall be subject to the provisions of Section XVI.

(4) The Terms:

"Occupational Group" shall mean a sequence of related jobs rated from the highest to the lowest job classification, as shown in Appendix "C." "Occupational Seniority" shall mean the length of employment in an Occupational Group.

Employment in an Occupational Group shall be considered for the purpose of determining length of service to commence on the date that an employee is scheduled to begin a job within the Occupational Group irrespective of the hour or day on which the employee commences the employee's duties.

(c) Training received while working on temporary assignment to a job will not be considered in making the selection on a promotion to such job.

(d) The provisions of this Section shall not apply to the selection or hiring of any employees who are excluded by the provisions of Section 2 from the terms "employee" and "employees," or any employees in any department not coming within the scope of this agreement. Any employee transferred to a supervisory or other job outside the bargaining unit shall retain such seniority as accumulated prior to such transfer, and no seniority shall accumulate while such employee has been or shall be employed outside the bargaining unit, except that where an employee is transferred to a position in the first level of supervision, such employee shall accumulate seniority for the first ninety (90) days while occupying such position. If any employee has been or is transferred to a supervisory or other position so as to be excluded from the coverage of this agreement, such employee shall retain seniority plus that accumulated in the higher position to a maximum of ninety (90) days, and in the event such employee shall be retransferred to a job classification within the unit, shall retain all accumulated seniority as provided in the preceding sentence.

(e) When there is an increase in the work force after a layoff, employees who had been laid off for less than five (5) years because of lack of work, shall, if then available, be given preference over persons not formerly in the employ of the Employer, and with respect to former employees, the selection among them shall be based upon the factors set forth in subsection (a) of the Section. Such employee will retain seniority rights, but seniority will not accumulate during the period of layoff.

(f) The Employer shall maintain an up-to-date seniority list by Occupational Groups of all employees in jobs covered by the Union agreement. Such a list shall be made available to the Business Manager of the Union on December 1 of each year. The Employer shall send to the Business Manager of the Union on June 1 of each year, a letter outlining all changes which have been made to the seniority list issued the preceding December. If exception is not taken to the list or letter within thirty (30) days from the date of submission of such list or letter to the Union, the list or letter shall be considered as correct and no change will be made thereafter except by mutual agreement between the Employer and the Union.

(g) The provisions of this Section do not apply to part-time or temporary employees. However, when any temporary employee is transferred to regular status and becomes a regular employee, the length of continuous employment shall be measured from the date on which the continuous uninterrupted period of employment started, last prior to the employee's transfer to regular status.

(h) Company seniority under this Agreement shall be defined as length of service in a classification included in the bargaining unit. Effective July 1, 1984, employees transferred or reassigned from outside the bargaining unit to a classification included under this Agreement will not carry nonbargaining unit seniority with them.

SECTION XIV
Furlough of employees

(a) Whenever, because of a reduction or change in the work force in a job classification covered by this agreement, there is a surplus of employees in such job classification, then the employee in such job classification who has the least length of Company seniority with the Employer shall be selected by the Employer for reassignment (Such displaced employee shall successfully pass the applicable aptitude test for the entry level position in the job classification bumping to. This applies only to employees hired or transferred into bargaining unit positions upon ratification of this Collective Bargaining Agreement.) or furloughing in accordance with the following:

The Employer will offer such employee a job ...

first: in the same job classification at any location within the employee's Occupational Group as stated on the List of Occupational Groups set forth at the end of this Section;

second: in a previously held (within the last five (5) years) job classification or in any lower rated job classification within the employee's Occupational Group as stated on said List;

third: in any job classification in the employee's or any other Occupational Group in the employee's Department which is shown on said List with the symbol (f) before it, and for T.M.P. classifications this would include up to S-3, provided that such job classification has a maximum rate of pay lower than the maximum rate of pay of the employee's present job classification; and

fourth: in a job classification in another Department which as stated on said List is a starting job in such Department; provided the employee has the ability and qualifications (including license, if required) to perform the work in the offered job and has longer length of continuous employment with the Employer than another employee in such job classification. If the Employer cannot offer a job to the employee, the employee shall be furloughed. If the employee refuses to take the job offered to the employee, the employee shall then be furloughed.

(b) If a surplus is created in a job classification as a result of such offer of a job, the Employer will displace the employee then in such job classification who has the least length of continuous employment with the Employer. In turn the Employer shall offer to the displaced employee a job in the same manner followed in the first instance. If the Employer cannot offer a job to such employee, the employee shall be furloughed. If such employee refuses to take the job so offered to the employee, the employee shall be furloughed. The Employer shall repeat the above procedure until the last displaced employee or employees are furloughed. An employee to be furloughed shall be given two (2) weeks' notice prior to being separated from employment with the Employer.

If an employee has completed one or more years of continuous service, is not offered a job, the employee shall be given an allowance of 80 hours pay at the employee's straight-time

hourly rate for each full year of continuous service with the Company with a minimum of two weeks pay up to a maximum of 52 weeks pay. Any furloughed employee or employee identified to be furloughed, who obtains employment with any of the system companies and Connecticut Yankee Power Company or any successor company will not be entitled to terminal pay. Any such employee who accepts terminal pay will thereby relinquish any other rights, other than vested rights, under this Agreement and will not be eligible for recall.

Any employee who accepts any position or who is offered a position similar to the position the employee held with the Company prior to the sale or lease, or in which the employee had experience, the wages and benefits for which are reasonably comparable to those earned prior to such sale or lease with this Company, or with the purchaser or lessor, shall not be eligible for severance pay.

(c) The employee involved in this movement shall be given a seventy-two (72) hour notice before the change is made. In the employee's new job classification, the employee shall be paid at the maximum rate of pay of such job classification except, if the new job classification is covered by a TMP, the new pay rate will be at the third step of the rate progression. If it is a job classification requiring a license, the employee shall be paid in accordance with the maximum rate of pay provided for the license which the employee holds or at a rate of pay to be determined in accordance with the Schedule in Section 20 of this agreement, whichever is greater, provided, however, that the employee shall not receive in the new job classification more than the rate of pay which the employee was being paid in the job classification from which the employee has been selected or displaced.

(d) Employees with twenty (20) or more years of continuous service with the Employer, whose jobs are eliminated by automation or a permanent reduction in forces, shall be placed in other jobs without a reduction in their wages. The Employer and the Union will attempt to agree to place employees whose jobs are so eliminated in jobs for which they are best qualified.

(e) Employees hired prior to July 1, 1979, with five (5) or more years of continuous service with the Employer shall not be laid off because of a reduction or change in the work force. Such an employee who cannot be placed under the steps outlined in the Plan, will be offered a job in any job classification having a maximum rate of pay lower than the maximum rate of pay of the employee's present job classification, for which the employee is qualified (including license, if required) and in which there is an employee with less than five (5) years' service with the Employer, and in so doing the Employer will try to place such employee in a job having a maximum rate of pay below, but as near as possible to, the employee's rate of pay. The employee who is displaced by this procedure shall be subject to the steps outlined in this Plan.

(f) Whenever a vacancy occurs in a position from which an employee has been displaced, such vacancy will be filled by the displaced employee without the requirements of job posting and when more than one employee has been displaced, the employee having the longest length of service with the Employer shall be given the job vacancy. Such employee returning to the employee's former classification shall receive the rate of pay which the employee was receiving in such classification just prior to the employee's displacement. In order to qualify as a displaced employee, such employee must have worked in the position from which displaced at least thirty (30) days immediately prior to such displacement.

(g) The Company will not contract out work regularly performed by employees covered under this Agreement if it would result in the layoff or demotion of its regular employees.

(1) For upgrading only

SECTION XV
Reemployment of Veterans

Both parties agree that reemployment of former employees upon their release from the Armed Forces of the United States shall be in accordance with the laws of the United States of America and of the Commonwealth of Massachusetts and any duly authorized rules and regulations issued thereunder.

SECTION XVI
Grievance Procedure and Arbitration

(a) A representative of the Employer and the Business Manager of the Union shall meet from time to time at the request of either party for the purpose of discussing any common problems. All such meetings shall be held at the Employer's office at the convenience of both parties, if possible.

(b) During the term of this agreement, should any difference, dispute or grievance arise between the Employer and the Union regarding hours, wages, or working conditions or the interpretation or application of any of the provisions of the Agreement, there shall be no suspension of work and the following procedure shall be followed:

First - The aggrieved employee or employees within fifteen (15) working days after the grievance arises shall present the grievance verbally to the foreman or immediate supervisor. The foreman or immediate supervisor will endeavor to settle it by giving an answer as promptly as possible, and within five (5) working days of the date of presentation. Nothing contained in this provision shall be interpreted as preventing the Union from being present at any meeting at which any grievance is adjusted and the Union will be notified in advance of such meetings by the Company. If an answer is given and accepted by the Union in this step, the grievance shall be considered closed. If the answer is not given, or is not acceptable to the Union, the grievance may be taken to the second step within ten (10) working days from the date the answer was given or due.

Second - The Business Manager, Assistant Business Manager or Steward shall forward the grievance in writing to the Manager or Superintendent concerned stating its nature and giving a brief description of the circumstances causing it. Reference shall be made to the provision(s) of the Agreement on which it may be based. The Manager or Superintendent concerned or their designated representative will investigate the grievance and the answer will be given by the Manager or Superintendent in writing within five (5) working days. If a meeting is held at this step, the answer is to be given by the Manager or Superintendent in writing five (5) working days from the date of the meeting. If the answer is not acceptable to the Union or is not received within such five (5) working days, the grievance may be taken to the third step within ten (10) working days from the date that the answer was received or due. The Union may initiate the grievance at this step at any time within a period not in excess of fifteen (15) working days from the date of the alleged violation.

Third - The Business Manager, Assistant Business Manager, or Steward of the Union shall forward a copy of such written grievance to Labor Relations. A meeting between the Labor Relations and the Business Manager or their mutually agreed to designated representative, shall be held at a time and place as agreed to by the parties. An International Representative of the I.B.E.W. may be present at this step, only to assist the local Union. The answer is to be

given in writing by the Regional Personnel Manager within ten (10) working days from the date of the meeting.

Fourth - In the event that any such difference, dispute, or grievance shall not have been satisfactorily settled in the manner hereinbefore provided within thirty (30) working days after the date of the third-step answer, the Union shall immediately notify the Employer, in writing, that the same shall be referred for settlement to an impartial arbitrator who shall not be financially interested in the Employer, to be appointed by mutual agreement of the Employer and the Union. No matter shall be submitted to an impartial arbitrator after 65 days from the date of the incident. If the Employer and the Union cannot agree on the arbitrator within fifteen (15) calendar days then, within thirty (30) calendar days after the fifteenth day, the American Arbitration Association shall be requested by either party to administer the arbitration pursuant to the American Arbitration's Voluntary Labor Arbitration Rules. The arbitrator's decision or award shall be in writing and shall be final and binding on all parties. The expenses and fees incident to the services of the arbitrator shall be paid jointly by the Employer and by the Union.

(c) The impartial arbitrator shall render a decision on any difference, dispute, or grievance on the basis of the evidence, the data, and the facts properly placed before the employee regarding such difference, dispute, or grievance.

(d) Except as specifically provided herein this agreement shall not be changed or added to by arbitration and all awards shall be consistent with the terms hereof.

(e) The arbitrator shall render a written decision and/or written opinion within thirty (30) days following the close of hearings.

(f) At such times as are mutually agreeable, an aggrieved employee and the Business Manager or Assistant Business Manager or Steward of the Union will be allowed time to discuss grievances with the Employer in the first, second and third step of this procedure without loss of pay for normal-schedule work hours providing overtime replacement is not required.

SECTION XVII
Discharge of employees

The Employer shall notify the Union within two (2) working days of the suspension or termination of an employee and the Union shall have seven (7) working days to request a meeting to discuss such suspension or discharge. Such meeting shall be held within fifteen (15) days of the Union's request. Upon receipt of the foregoing request, the Employer will inform the Union of the reason for the suspension or discharge, and, upon receipt of a request from the Employer, the Union will state the reasons for believing the suspension or discharge to be improper. The Employer will state its determination within two (2) working days subsequent to the conference. If subsequent to such conference the Employer determines that the employee was not properly suspended or discharged, the employee will be reinstated without prejudice and may be compensated by the Employer for loss of wages as hereinafter stated. If the employee is not satisfied with the determination of the Employer rendered subsequent to such conference, the Union may in writing, delivered to the Employer, request within five (5) working days after such determination that the matter of the discharge or suspension of such employee be referred for settlement to an arbitrator under the provisions of Section l6 hereof. The arbitrator shall render a decision within two (2) working days after the close of the hearing. The arbitrator shall have the power to make a decision determining whether or not the discharge or

suspension was proper hereunder, and if improper, whether or not to order the employee to be reinstated with back pay. An award of back pay made either by the representative of the Employer or by the arbitrator shall charge the Employer with the number of hours of back pay computed on an eight (8) hour day at normal rates, that the employee would have worked had the employee been employed, and in no event with a greater number of hours of back pay than the hours the employee would have worked had the employee been employed for a period beginning with the date of discharge or suspension and not exceeding twenty (20) working days of eight (8) hours each, next following the date of the close of the arbitration hearing.

SECTION XVIII
Safety and Health Regulations

(a) The present safety regulations (Employee Safety & Health Handbook) of the Employer are hereby incorporated in this agreement by reference. A joint committee, comprised of the Business Manager of the Union and two assistant Business Managers of the Union or their designated representatives and three (3) representatives of the Employer, shall be established to promulgate safe work practices. The Committee shall meet from time to time at the request of either party to discuss matters pertaining to safe work practices.

(b) Before adopting barehand practices for work on energized transmission facilities, the Union and Employer Safety Committee will first thoroughly investigate by any means necessary that this practice is not injurious to the health of the employees in any way.

(c) The Employer agrees to submit to the Business Managers drafts of the proposed revisions of the Safety Rules (Employee Safety & Health Handbook) and to meet on or about June 9, 1967, (and on later dates as may be necessary) to review and discuss such revisions. It is understood that suggestions made by the Union will be given careful consideration before final rules are adopted by the Employer. It is further understood that future new or changed Safety rules (Employee Safety & Health Handbook) will be similarly submitted and discussed before adoption by the Employer. Once the Company has made a decision on any such change in a safety regulation, the grievance procedure up to and including arbitration may be initiated to determine if the Company acted reasonable in making such change.

(d) Both parties agree that they and the employees will each and all comply with the regulations made by the Employer and will respectively provide and use the protective devices, wearing apparel and other equipment to be provided by the Employer in accordance with the present practice of the Employer for protection from injury.

(e) Supervisor, Safety Administrator and/or Union Business Manager may report in writing a violation of such regulation by any employee to the department superintendent.

(f) If an employee is charged with a chargeable automobile accident, the employee and the Union are to be notified in writing within ten (l0) working days.

(g) An employee sent out on a trouble call may at the employee’s discretion and without prejudice request assistance if the trouble is beyond the employee’s ability to repair safely and adequately alone.

(h) Except in cases of necessity or emergency, employees shall not be required to do outdoor work when heat, cold, rain, snow, humidity, or other inclement weather conditions make such work unsafe in the Employer's judgment. employees may, prior to commencement

of outdoor work, or during such work, request their foreman to call the superintendent's office for a decision on whether or not such outdoor work shall be commenced or continued. If the foreman refuses to make the call, the employees may refuse to commence or continue such outdoor work until the call is made and a decision from the superintendent's office is obtained. employees shall not lose any regular pay because of failure to work outdoors due to inclement weather.

(i) When humidity or wet conditions are such that it is hazardous to work on l3,800/8000-volt or 8320/4800-volt lines with gloves, hot line sticks will be used or the lines will be de-energized.

(j) Except in cases of emergency or for customer scheduled or planned outage work, no employee engaged in work on overhead or underground lines shall be required to perform work on such lines when the temperature is ten degrees (l0°) or below. 10º clause clarification: Planned or scheduled outages for large (50 kVA and above) commercial or industrial customers, where there will be a major inconvenience or costs incurred by the customer if rescheduled. If possible, the Company will make a reasonable effort to reschedule.

(k) Employees may request their foreman to call the Superintendent's office for a decision on whether or not two (2) employees are needed on a pole to work 8320 Y hot safely or whether additional employees are needed to hang a transformer safely. If the foreman refuses to make the call, the employees may refuse to commence such work until the call is made.

(l) When it is necessary to patrol power lines on private right-of-ways at night on foot, employees will be assigned to perform this duty in pairs.

SECTION XIX

Accident and Sickness Disability Benefits

(a) The employees shall have the benefits of the Workmen's Compensation Laws of the Commonwealth of Massachusetts.

(b) Any regular employee who receives injury in the performance of assigned duties for the Employer resulting in the employee’s absence from work and in receiving medical care will be paid for such absent time, for the period of total incapacity not in excess of one year from the date of the injury, an amount which, after crediting Workmen's Compensation Benefits provided by such laws for such injury, will equal the normal basic, after taxes, pay for such absent period computed at the regular rate for a forty (40) hour week, subject to the provisions of Section 12 (d). In calculating the amount of payments to be made by the Employer, the Employer shall be entitled to the credit for Workmen's Compensation Benefits whether or not the employee has waived or actually receives such benefits. If it is established that the injury is caused by the negligence of a third party and that third party makes settlement with the injured employee, the Employer shall be reimbursed for all wage payments made to the injured employee to the extent that such settlement covers the Employer's payments made under the terms of this Section. The provisions of this subsection (b) do not apply to temporary employees, probationary employees, or part-time employees.

(c) The Employer agrees to continue in effect during the term of this agreement its present Sickness Disability Plan as modified *07/01/1992*, provided, however, that if by reason of federal or state legislation a program of such or similar benefits is established and the Employer

contributes to the cost of such program, then the Employer shall be entitled to a credit under its Sickness Disability Plan for all payments made to an employee under such program.

Test Tech Group and Employees hired on January 1, 2017 or after will be under the following Sick Leave Policy:

SICK LEAVE WAGE PAYMENT POLICY

- **Non-occupational illness/injury disability lasting more than five days will be managed by Liberty Mutual**
- **A total of 10 sick days per year at 100% of pay**
- **In the case of illnesses that exceed five consecutive work days, qualifying employees will be eligible for short term disability**
- **The first six weeks of short term disability will be paid at 100% of base pay**
- **Up to 19 additional weeks of short term disability will be paid at 67% of base pay**
- **Vacation time cannot be used in lieu of 67% pay**
- **Vacation time cannot be used to extend a short-term disability claim prior to transitioning to long-term disability (LTD)**

(d) Disability to work resulting from sickness and accidents incurred by an employee who is a Union representative while on Union business shall not make such employee ineligible for benefits under the Sickness Disability Plan.

SECTION XX
Disability Management

(a) In the event an employee becomes unable to perform the duties of the classification in which the employee is engaged because of physical *or mental* disability *as verified by the company*, the Employer shall transfer the employee to other work, if available, which the employee is capable of performing and shall pay the employee a rate to be determined in accordance with the Schedule shown below. The Employer shall decide whether vacancies exist in a classification to which an employee may be reassigned, and the Employer shall, after consultation with the Union, determine when an employee is entitled to be, or in the interest of safety should be, transferred to work which the employee is capable of performing safely and effectively.

(b) If the maximum wage rate for the job to which the employee is assigned is higher than the adjusted rate as determined from the Schedule, the maximum wage rate of the employee's new classification shall be the applicable rate.

SCHEDULE

An employee who has been in the employ of the Employer, or its predecessors, for a period of ten (10) or more years at the time of adjustment, will be paid a rate of fifty (50) percent of the employee's current base rate plus five (5) percent of such base rate for each year of continuous service in excess of the required ten (10) years' service at the time of adjustment, but in no case shall the adjusted rate exceed the employee's current base rate. The Employer shall endeavor to find jobs for aged and/or disabled employees.

SECTION XXI
GROUP HEALTH CARE PLAN

(a) The Employer's Health Care Plan and the employee contribution schedule as described in the Company's ***2016*** proposal for a new Agreement will be in effect for the term of this Agreement.

(b) Changes in the Health Care Plan – *beyond those associated with a change of carrier, or those legally or regulatorily mandated*, shall be made with the mutual consent of the Employer and the Union, the determination of the method of providing such benefits shall be at the sole discretion of the Employer.

(c) *A change of carriers and individual disputes that are otherwise covered by the providers' claims and appeal process, are not subject to the grievance and arbitration process.*

SECTION XXII
Job Posting Program

(a) The Employer will post a notice of every vacancy in any job (other than a temporary or part-time job) covered by this agreement which is a starting job or the lowest rated job in an Occupational Group. Such posting will be made company-wide in all Union areas. The starting job and the lowest rated job in an Occupational Group is shown with an asterisk (*) on Appendix "C" which is attached hereto. Such notice shall be posted for seven (7) working days in all the departments where the jobs covered by this agreement exist and shall set forth the classification of the job to be filled, an outline of its duties, the qualifications required for the job, its regular hours of employment, the name of the supervisor to whom applications for the job should be submitted, the date on which the notice is posted, and the last day for filing applications. On or before the date of posting of each such notice, a copy of the notice shall be furnished to the Business Manager of the Union.

(b) Any employee, except as otherwise noted in this Section, having the qualifications required and desiring to be considered may apply in writing for such job within seven (7) working days after the notice is posted or such additional period as may be agreed to by the Union and the Employer. The employee shall apply by filling out an application form provided by the Employer, copies of which shall be available from both the Employer and the Union, and submitting the original copy of the application to the supervisor named in the notice and the duplicate copy of the application to the Business Manager or Steward of the Union. The Business Manager or Steward of the Union may submit a bid for a job on behalf of an employee who is on vacation or absent from work. The Employer shall not be required to consider any employee who fails to apply as aforesaid. The Employer will consider the qualifications of the applicants, select the person to fill the job vacancy and announce its selection within twenty-five (25) working days after the notice is removed. The Employer's selection shall be consistent with the provisions of Section l3 (a) hereof, provided that if there are no qualified applicants, the Employer shall not be required to fill the vacancy from among the applicants. For bids on posted jobs, seniority shall be company-wide with no preference given those in a particular area. When necessary to determine the qualifications of applicants, the Employer shall determine the same in a reasonable manner consistent with the requirements of the job vacancy. An employee who formerly held the job classification shall be presumed to be qualified. The Employer shall promptly notify the Union of its selection and, if requested by the

Union, shall meet with a representative of the Union and any applicants to discuss the reasons for its selection.

(c) Nothing in this Section shall be construed to impair or interfere in any way with the unqualified right of the Employer to transfer employees within a job classification from one location to another.

(d) When filling a job vacancy in an Occupational Group in a department, preference shall be given to employees in any department. Prior to filling a job vacancy from non-Company personnel, employees from other Union areas within the company shall be given preference.

(e) The employee selected to fill the job vacancy shall hold the job for a reasonable period not to exceed ninety (90) days on a trial basis. If the employee fails to demonstrate satisfactorily, qualifications to perform the work required by the job within such reasonable period, the Employer shall return the employee to the employee's former job, and notify the Business Manager of the Union in writing of the reasons for this action. When a job is declared vacant by the Company, it will be posted immediately after the former incumbent qualifies in the employee's new assignment.

(f) The employee selected to fill the job vacancy shall be transferred to such job within *thirty (30)* working days. *If an employee is not moved into the new position within 10 working days, the employee will start accruing department seniority from the date of acceptance and will be paid the new rate of pay if it is higher than their present rate.*

(g) Posted job vacancies which have not been filled after ninety (90) days from the original posting date shall be reposted unless otherwise agreed by the Employer and Business Manager.

(h) An employee, other than a newly hired *or transferred into Local 455* employee, selected to fill a job vacancy under this Section shall not be eligible to bid another job until the expiration of six months from the date of the employee's selection. A newly hired *or transferred* employee **into the Underground Department** shall not be eligible to bid another job until after completing **thirty-six (36)** months of employment, or later *(unless with management's approval)*, if probationary period is extended by mutual agreement of the Union and the Employer.

(i) The Employer may assign anyone to fill a vacancy temporarily pending the posting of a notice hereunder and the consideration of applications. Newly created jobs coming under this program shall be posted not later than thirty (30) days after the creation of such job.

SECTION XXIII
Shift Premium

(a) Employees who are employed in shift operations shall be paid a shift premium as follows:

No shift premium shall be paid for hours worked on the first shift.

Two dollars and fifty cents ($2.50) per hour for all hours worked on the second shift.

Two dollars and fifty cents ($2.50) per hour for all hours worked on the third shift.

The first, second, and third shifts shall be defined as follows:

(1) The first shift shall include all regular hours of employment scheduled to start between 6:00 a.m. and 9:59 a.m. inclusive;

(2) The second shift shall include all regular hours of employment scheduled to start between l0:00 a.m. and 5:59 p.m. inclusive;

(3) The third shift shall include all regular hours of employment scheduled to start between 6:00 p.m. and 5:59 a.m. inclusive.

(b) Such employee shall be paid the respective shift premium which is applicable to the actual hours worked by the employee on each shift.

(c) Shift premium shall be applicable only for time actually worked by such an employee **and only on overtime when it is contiguous and follows or precedes the shift employee's regular shift. It is not applicable if the shift employee is called in on first shift hours.** It shall be added to the employee's regular hourly rate after computing overtime pay under Section 6 and after computing pay for work performed on a holiday under Section 8. Shift premium shall not be applicable in computing minimum call-out pay under Section 7.

SECTION XXIV
Sunday Premium

Shift employees, whose regular schedule includes work on Sunday, will be paid a premium of twenty-five (25) percent of their basic straight- time rate for work performed on Sunday during their regular hours of employment. No such premium will be paid for work which is performed at overtime rates.

SECTION XXV
Letters of Understanding

The letters of understanding which have been mutually agreed upon by the Employer and the Union and which are attached hereto are hereby made a part of this agreement.

SECTION XXVI
System Retirement Program

It is the intention of the Company to continue its present practices with respect to benefits provided under group insurance plans and the "Northeast Utilities Service Company Plan" for the term of this Agreement for employees hired prior to 01/01/2011, and to offer the K-Vantage Benefit to employees hired after December 31, 2010. K-Vantage will also be available to employees hired prior to January 1, 2011, who choose K-Vantage before 01/01/2011 in lieu of additional service and earnings credits under the Northeast Utilities Service Company Retirement Plan. It is understood and agreed by the Union and Company that continuance of benefits provided under group insurance plans will, of necessity, be contingent upon the rules and regulations application thereto as established and administered by the insurance

companies involved. It is further understood and agreed that application of these employee benefits shall not be subject to grievance procedure or arbitration.

SECTION XXVII
Group Life Insurance Program

The Employer agrees to continue in effect the Group Life Insurance Program as mutually agreed upon by the Employer and the Union.

SECTION XXVIII
Term

This Agreement, when signed by the Employer and the Union or their authorized representatives and approved by an officer of the International Brotherhood of Electrical Workers, shall become effective as of ***October 1, 2016*****,** and shall remain in effect until ***October 1, 2020*****,** and from year to year thereafter unless either party shall give to the other in writing at least sixty (60) days prior to the expiration of a term, notice of its desire to terminate the agreement at the expiration of such term or to effect changes therein. Within thirty (30) days after the receipt of such notice, the parties shall meet to negotiate or bargain with respect to the terms of a new agreement or such changes. During the term of this agreement, neither party shall request the other party to bargain with respect to any change of the provisions of this agreement or any other matter that may add to the provisions of this agreement, and neither party shall have any obligation to negotiate or bargain with the other party with respect to the same.

IN WITNESS WHEREOF, the parties hereto have set their hands this 1st day of October, 2016.

APPENDIX "B"
DUES DEDUCTION
(Weekly)

I hereby authorize and direct you to deduct from my pay union membership dues in the amount specified in accordance with the Constitution and Bylaws of the Union, this deduction to be made weekly and same to be paid to Local Union No. 455 in accordance with the terms of the collective bargaining agreement between it and the Company dated ***October 1, 2016***.

This authorization and direction shall be irrevocable for the period of one year or until the termination of the said collective bargaining agreement, whichever occurs sooner; and I agree and direct that this authorization and direction shall be automatically renewed and shall be irrevocable for successive periods of one year each or for the period of each succeeding applicable collective bargaining agreement between the Company and the Union, whichever shall be shorter unless written notice is given by registered mail by me to the Company and the Union not more than twenty working days and not less than ten working days prior to the expiration of each period of one year, or of each applicable collective bargaining agreement between the Company and the Union, whichever occurs sooner.

MEMORANDUMS OF UNDERSTANDING

1. Merit Increases and Classification Changes

The Labor Relations representative of the Employer will send to the Business Manager of the Union, each month, a list of employees in the bargaining unit who received merit increases and/or changes in classification during the preceding month.

2. Non-shift employees on Shift Basis

When nonshift employees are assigned temporarily on a shift basis to perform work which they normally perform on a day basis, they shall receive overtime compensation for those hours of work that fall outside the employee's regular scheduled working hours.

3. Tools

Broken or worn out hand tools and toolboxes used by Garage Mechanics, Meter and Service Representatives, and Electricians will be replaced at Employer's expense. Such replacements become the property of the employee. This agreement covers ordinary hand tools only and not special tools, which will be furnished by the Employer if the Employer determines such tools should be furnished by it.

4. Overtime

Each department superintendent will provide within the first fourteen (14) days of each month a copy of overtime records for the preceding month to the Business Manager or Steward of the Union.

5. Meal Allowance

The problem of providing food or making an allowance for meals often arises during emergency conditions and planned overtime work.

Whenever an employee works or is going to be required to work more than one and one half (1 1/2) hours beyond the regular scheduled quitting time, **the Company shall pay such employee a meal allowance** and an additional meal allowance shall be **paid** at the end of each five (5) hour interval of work thereafter. During these periods, the Employer will pay for time spent eating by such employee at the applicable overtime rate when the work is to be resumed after eating. If an employee works through to the completion of a job and is entitled to a meal under this plan, the employee shall be entitled to a mealtime allowance of forty-five minutes (45) at the applicable overtime rate.

An employee will **be paid** for a breakfast by the Employer when the employee is called out one and one half (1 1/2) hours or more before the regular starting time on the normal scheduled workday.

If an employee is called out on a day outside the normal schedule one and one-half hours (1-1/2) or more before the last normal scheduled starting time the employee will **be paid for** a breakfast and thereafter be **paid for** an additional meal after each five (5) hour interval of work. If an employee is called out outside their normal schedule, such

employee will be **paid for** a meal after each five hour interval of work.

After an employee is entitled to meal under the Meal Allowance Policy, the Company will pay the employee **$10.00** for meals from 12:01 a.m. until 3:59 p.m. or **$20.00** for meals from 4:00 p.m. to 12:00 midnight plus forty-five minutes (45) allowance at the applicable overtime rate for such meal. Restaurant slips **or receipts** will no longer be used and the employee will be responsible for paying for their own meals.

During times of emergency when employees cannot be released long enough to make arrangements for their meals, the Company at its expense will make suitable arrangements for same. Under such conditions, the provisions of this Section for the payment of meals shall not apply. Under such conditions, employees will earn meals based upon the eligibility guidelines above.

6. Union Elections

The Union has permission on a trial basis to place ballot boxes on Employer property to facilitate handling the election of Union officers and ratification of the agreement. It is understood that such voting will not take place on Employer time and shall not interfere with an employee's work.

7. Protective Clothing

The Employer will furnish rubber aprons, gloves, and boots for employees working on station emergency batteries.

8. Line Helper S4

A Line Helper S4 shall not be required to work on energized primary lines, other than tying in, unless a Line Mechanic or above is on the same pole or in a bucket elevated to the working position immediately adjacent to the pole where work is being performed.

9. Payday

The Employer will endeavor to get paychecks out on Thursday in weeks which include a holiday. When a holiday falls on Thursday, employees will receive their paychecks on the preceding Wednesday.

10. Subsistence Allowance (Work Assignments Outside WMECO/HWPCO Territory Excluding Training

Whenever an employee is temporarily assigned to work in another area requiring a temporary change in residence, the employee shall be entitled to a subsistence allowance of $65.00 per day. An employee authorized to make occasional use of the employee's personally owned vehicle for Employer business during working hours will be paid for such use at the applicable corporate rate per mile for all miles.

10a. On-Site Reporting - Expense Allowances (Within WMECO/HWPCO Territory)

1. When required to work distant from the "home base" (or normal reporting location), employees will be paid expense and travel allowances as follows:

1. (a) When the Company supplies transportation between the "home base" (or normal reporting location) and work, employees will be allowed travel time at the rate applicable and equal to the time spent en route.

1. (b) When requested to travel by means of specific public transportation, employees will receive the actual fare paid and will be allowed travel time at the rate applicable and equal to the time spent en route.

2. (a) When an employee is required to report for work on the job, within the area served by the "home base" (or normal reporting location), or where the reporting location is less than 15 miles away from the home base, they will be paid **fifteen dollars ($15.00) per day** in lieu of the provisions of Section 3 of this Memorandum.

2. (b) For the purposes of this Memorandum, distances shall be measured over highways which are reasonably passable and which provide the shortest routes between the employee's "home base" (or normal reporting location) and the job locations involved.

3. Except when Section 1. or Section 2. of this Memorandum is applicable, as determined by the Company, an employee is required to make their own arrangements to report at a job location, including all training assignments, outside their "home base" (or normal reporting location) jurisdiction, will be paid a daily expense allowance as provided under one of the following plans:

Plan A - If the distance one way is at least 15 miles, but not over thirty miles or less, ***$28.32*** per day.

Plan B - If the distance one way is over thirty miles but not over fifty, ***$50.18*** per day.

Plan C - If the distance one way is over fifty miles but not over seventy miles, ***$57.39*** per day.

Plan D - If the distance one way is over seventy miles but not over ninety miles, ***$64.82*** per day. When the distance is beyond ninety miles the employees will be paid the applicable corporate mileage cents per mile for all miles beyond ninety miles.

3. (a) If on any day an employee travels one way to or returns one way from a job location under the provisions of Section 1 of this Memorandum, they will be paid an expense allowance on that day under one of the following plans:

Plan E - If the distance one way is thirty miles or less, ***$24.34*** per day.

Plan F - If the distance one way is over thirty miles, ***$33.41*** per day.

3. (b) If an employee is required to report at two or more job locations outside of their "home base" (or normal reporting location) jurisdiction on one day, they will be paid the daily expense allowance provided under the plan applicable to the job location which is the greatest distance from the "home base" (or normal

reporting location). In addition, the applicable corporate cents per mile one way will be paid for the actual distance traveled between the job locations involved on the day. This Section 3 (b) will not be applied to require an employee to report at two or more job locations on one day involving plans B, C, D, or F except when it is necessary to do so to provide a full day's work or when emergency work is required. Whenever possible, employees will be advised not later than the day preceding requirement to report at a different job location.

11. Hospitalization and Surgical Coordination of Benefits

The Employer and the Union agree in principle that benefits under the Employer's Hospitalization and Surgical Plan for an employee and the employee's dependents shall be coordinated with similar benefits for such employee or the employee's dependents under any plans of any other Employer. The parties will mutually agree upon an amendment of the Employer's Plan to carry out such principle.

12. Live Primary Splicing

The Employer agrees that the practice of live primary cable splicing will be discontinued.

13. Specialized Mobile Equipment

The schedule of rates applicable to a Specialized Mobile Equipment Operator will apply to the following equipment:

Bulldozer
Locomotive
15-Ton Track Crane
Sterling Digger
18-Ton Grove Crane
Tractor Trailer
Davis Task Force
Loader Backhoe

14. Leave of Absence for Full-Time Business Manager

The Employer has agreed to consider and work out with the Union at a later date the specific details of a leave of absence policy for a full-time Business Manager.

15. Training Programs

The Employer will discuss all training programs with the Union and give full consideration to Union suggestions before putting any such new training programs into effect. Any test in connection with the above will be mutually agreed upon by the Employer and the Union.

Time Merit Progression programs as applied at CL&P are to be adopted. Details to be worked out. Areas of participation include Line Mechanics, Cable Splicers, Electricians, Mechanics, Meter and Service representatives, and Auto Mechanics. Employees who fail to successfully complete the TMP program will be terminated or reassigned in accordance with the procedure outlined below.

Method of transfer, reassignment or termination of employees who fail to successfully complete TMP training programs in accordance with the following:

Person From Within the Company

If they do not qualify in ninety (90) days, they can return to their former job.

Over ninety (90) days--will be evaluated periodically and informed of their status. If they fail to successfully complete the training program, they will be reassigned in accordance with the agreement.

Person From Outside the Company

Will be evaluated periodically and informed of their status. If they fail to successfully complete the training program, they can be terminated or reassigned in accordance with the agreement.

16. Personal Time Off

If the work schedule permits, an hourly paid employee may be granted personal time off from work without any loss in pay if, in the opinion of the employee's supervisor, a good and sufficient reason for the time off is given.

17. Allowance for Tools for Garage Mechanics

A **three hundred seventy-five ($375.00)** dollar annual allowance will be granted to each auto mechanic who is required to furnish hand tools, representing a substantial investment as evidenced by the pictures shown by the Business Manager at a 1963 negotiation meeting, as a condition of employment.

18. Leave of Absence

(a) The Employer will grant a leave of absence for up to two years to an employee who is elected to a full-time government office. All Employer benefits will cease during any such leave of absence. Upon return to employment promptly upon expiration of the leave of absence, the employee will retain seniority rights but seniority will not accumulate during the term of such leave. Such leave may be extended by the Employer upon application for an extension in writing by the employee. No more than one employee from the local Union will be granted a leave hereunder at any one time without the consent of the Employer.

(b) Upon written request from the Union, the Employer will grant a leave of absence for up to one year to an employee who is elected to the office of a full-time Union representative for the local Union. All Employer benefits will cease during any such leave of absence, except upon request in writing by the Union, the Employer will maintain the employee's insured benefits during such leave of absence so long as the Union pays all costs required to maintain such benefits. The employee's seniority status will be such as may be mutually agreed upon by the Employer and the Union. Such leave of absence may be extended by the Employer upon application for an extension in writing by the Union. No more than one employee from the Company will be granted a leave of absence under this paragraph (b) at any one time without the mutual consent of the Employer and the Union, except in the case of a full-time permanent position for the

Local Union for which the Company will agree to grant a leave of absence to one additional employee.

(c) Special cases for a leave of absence will be given consideration by the Employer.

19. Accidental Death and Dismemberment Insurance for a Job-Connected Death

In case of accidental death on the job where a benefit is payable under the Accidental Death and Dismemberment Policy, the Company will provide an additional benefit equal to the amount payable under the Accidental Death and Dismemberment Policy, thus providing Triple Indemnity from all sources in such a case.

20. Illness or Injury Immediately Preceding or During Scheduled Vacation *prior to year-end.*

An employee who has been unable to take all of their vacation by December 31 due to a verified incapacitating illness, will have their incapacitated vacation time, up to eighty (80) hours, extended until December 31 of the following year, scheduled at the option of the Employer.

21. Day Before Christmas

Employees who cannot be released for 4 hours on the day before Christmas or given compensating time off on the day before New Year's will be paid 4 hours' pay at their regular straight-time rate. This paragraph will be applicable to shift employees on a scheduled day off and to employees on vacation or out sick.

22. Safety Shoe Allowance

The Company will increase the safety shoe for the Overhead, Underground, Electrical Maintenance, Building Maintenance, Meter Service Installers and Representatives, Field Technicians, Garage, **Mappers** and Storeroom employees per the following:

The Company will provide up to **$250.00** allowance to employees in the departments listed above, towards the purchase of safety footwear (*up to two pairs) annually* that meets the requirements for impact/compression resistance and protection from electrical hazards (EH rated) as described in Sections 1 and 4 of ANSI Standards Z41-1999.

The employee must furnish a receipt of purchase for reimbursement documenting the purchase of safety shoes which meet the above safety standard and the allowance will be limited to one purchase per year. Ordering safety shoes through the Company stock rooms has been discontinued.

Meter Readers will be eligible for up to **$100.00** (up to two pairs) annually for *non-EH* rated safety shoe reimbursement. Receipts to be furnished and the shoes must be ANSI accepted.

23. Safety Regulations for Rubber Gloving Energized Conductors in the 15kV Class

The safety regulations outlined in the Memorandums of Understanding dated February 22, 1974, entitled the WMECO Practices and Procedures for Rubber Gloving Energized Conductors in the l5 kV Class are incorporated into the Agreement by

reference. Any changes in the WMECO Practices and Procedures for Rubber Gloving Energized Conductors in the l5 kV Class, as outlined in the above Memorandums of Understanding, shall be a matter of discussion between the parties before becoming effective. Once the Company has made a decision on any such change in the above rules only, with the exception of Item 2, "All standard safety rules now in effect shall be followed," the grievance procedure up to and including arbitration may be initiated to determine if the Company acted reasonably in making such change, based on the effect such change would have on the safety of the employees involved.

In the event the Union wishes to question whether a new or changed safety regulation in the above-stated Memorandums of Understanding is reasonable, such issue shall first be referred for review to a committee of two safety specialists, one appointed by the Company and one appointed by the Union. If the two representatives agree as to their decision on the issue submitted, it shall be binding on both parties. In the event the committee is unable to agree, then the same issue shall be submitted to arbitration under Section 16 of the current collective bargaining agreement and the designated arbitrator may use the two safety specialists as consultants in reaching a decision following a hearing on the issue.

24. Notification of Industrial Accidents

Company will supply the Union in writing the names of all employees who are out of work as a result of an industrial accident within five (5) working days from the date workmen's compensation begins, whether or not this be a new accident or a recurrence.

In the event a claim for workmen's compensation is denied by the Company, the Union will be notified within two (2) working days.

25. Streetlight Inspector

The following duties will be added to the established duties of the Streetlight Inspector:

A. Set up to 20-foot streetlight poles--wire to hand holes.
B. Assist qualified personnel in service disconnects and re-connects--overhead and URD.
C. Assist qualified personnel in installing and removing residential type services--overhead and URD.
D. Plant inspections--overhead and URD.
E. Pole inspections.
F. Regular patrol of lines as required.
G. Minor maintenance, such as molding repairs, guy repairs, stenciling poles, applying switch nomenclature to poles, stenciling padmounts, etc.

26. Streetlight Line Mechanic

The following duties will be added to the established duties of the Streetlight Line Mechanic:

A. Set up to 20-foot streetlight poles--wire and hook up in hand holes.
B. Service disconnects and reconnects--overhead and URD.

C. Install residential type meter and service where no present service exists (not to include upgrading of service), and remove both meter and service where service is to be terminated-- overhead and URD.
D. Plant inspections--overhead and URD.
E. Pole inspections.
F. Regular patrol of lines as required.
G. Minor maintenance, such as molding repairs, guy repairs, stenciling poles, applying switch nomenclature to poles, stenciling padmounts, etc.

27. Medical Monitoring

The Union will receive reports upon request of all medical monitoring of bargaining unit employees in anonymous form. Upon request by a Bargaining Unit employee and/or the Union and provided that individual employee authorizations are submitted when required, the Company shall provide such safety and health information as is available.

28. Cross Rostering

The Company will assure that qualified available employees normally located at the reporting base are the first to be offered the assignment.

Once a cross rostering assignment has been made and unscheduled overtime of two and one-half (2-1/2) hours or less is needed to complete the day's work assignment, those cross rostered employees assigned may be offered the overtime assignment.

Scheduled overtime, under cross rostering, will be assigned to the available qualified employees under the Contract the work site is covered by.

Overtime (call-outs) will be assigned to employees whose Contract governs that work site.

This language is not intended to add or subtract from the existing practices where employees of Connecticut Light and Power Company work in the Western Mass. Region or the practices now in existence where Western Mass. Electric Company employees work in the Connecticut Light and Power territory.

29. Upgrade to Lead Cable Splicer

When two (2) splicers are assigned to work together, one (1) will be upgraded to lead cable splicer.

30. The Company to supply coveralls to Garage Mechanics. Each Garage Mechanic will be supplied with two (2) pairs initially and one (1) pair per year thereafter. The employee will be responsible for cleaning and maintenance.

31. Transmission Line Work Premium

Springfield and Greenfield Line Mechanics assigned to the Transmission Line groups will receive an additional *dollar and fifty cents ($1.50)* per hour, added to their regular rate when assigned to perform transmission line work.

32. Job-Site Reporting or Transfers. Providing qualifications meet the job requirements, job-site reporting will be determined by "department" seniority if there are no volunteers.

33. Underground Fault Locating (Thumping)

For non-substation related fault locating, after an unsuccessful campaign to reach Electrical Maintenance personnel in the affected district, the qualified underground/overhead personnel on site of an event will be allowed to test and locate primary cable during emergencies in accordance with current substation protocol.

34. Meter Service Representative Upgrade

Meter Service Installers and Representatives (fully qualified) will be paid $1.00 per hour additional upgrade when working in a two-person crew while performing work that includes training of other Representatives or Installers. An example of this is a CT/PT project that requires more than one person. At no time will Meter Service Representatives be upgraded while doing disconnect or reconnect work or performing the function of a "second person" in disconnect/reconnect situations.

MEMORANDUM AGREED TO ON MAY 1, 1967

Each employee Safety Committee member will be directed by their supervisor to attend Safety Committee meetings unless an existing emergency prevents the employee's attendance. Each Committee shall rotate one-half (1/2) of the members of the Committee every six (6) months so that at no time shall more than one-half (1/2) of the Committee be composed of new members.

It is understood that a Safety Committee member whose work schedule calls for starting at 7:00 a.m. will report for work at 8:00 a.m. on the morning of a scheduled safety meeting.

MEMORANDUM

WESTERN MASSACHUSETTS ELECTRIC COMPANY-UNION

SAFETY COMMITTEES

It is recognized that a number of properly functioning employee safety groups throughout the Company may aid in maintaining constant vigilance and interest in safe practices and tend to reduce accidents. Therefore, in connection with the operation of Safety Committees within the Company, the following items are to be observed:

1. There shall be small functioning Company-Union Safety Committees. They shall meet regularly on prearranged dates to review current accidents and safety problems and to offer recommendations for improvements in safety.

2. Each district/area shall establish a Company-Union Safety Committee. The Committee shall be composed of two (2) members selected by management with remaining membership selected from and by the employees of the Company and shall represent the selecting group.

3. Each Safety committee shall elect a chairperson and secretary to serve for a twelve (12) month period. It shall be the duty of the secretary to keep minutes of the meeting and arrange for their typing and reproduction with sufficient copies for distribution. The secretary shall be responsible for assuring the accuracy and relevance of safety committee minutes before distribution.

    a. Copies shall be posted on the bulletin board in the area served by the committee.

    b. One copy of the minutes shall be sent to the superintendent responsible for the function represented. The responsible superintendent shall review the recommendations with supervisors in the department. The superintendent takes action deemed necessary and reports such action to the Safety Committee. In cases where this action is questioned, the chairman of the Safety Committee and the superintendent shall meet to discuss the matter. Should agreement not be reached at this meeting the matter will be referred to the Safety Supervisor who will further investigate and report back to both the superintendent and the committee chairman. Should the committee be dissatisfied with the report of the Safety Supervisor, the chairman of the committee may request a meeting with the Accident Review Board. The Board will review the problem with the committee members, the superintendent and the Safety Supervisor and make their recommendation to the President.

    c. At the regular meetings of the Accident Review Board, the Safety Supervisor will make a brief report of action taken on safety committee recommendations.

4. In order to best utilize the services of the Safety Supervisor, it may be necessary as well as desirable to combine in one committee the safety efforts of several stations,

departments, or groups. The membership in any one committee, however, should not be so large as to interfere with the proper functioning of the committee.

5. Members who have been selected by the employees to serve on a Safety Committee and who attend a scheduled committee meeting during their regular working hours will not lose their regular wages while attending such committee meeting.

6. Members who have been selected by the employees to serve on a Safety Committee and who attend a scheduled committee meeting outside of their regular working hours will be paid while so attending, in accordance with the Company overtime pay policy.

7. Members, who have been selected by the employees to serve on a Safety Committee and who attend a scheduled committee meeting which is held at a location other than their regular working location, will be entitled to transportation from their regular station to the location where the meeting is being held and return to their regular station.

   If such transportation cannot be furnished by the Company, the supervisor may approve the use of public transportation or mileage of the employee's own vehicle, such mileage being paid in accordance with the Company mileage allowance policy.

8. Mileage from item 7 will be entered for reimbursement through the COLT payroll system.*

9. Proper notation of time spent in safety committee meetings shall be indicated on the employee's time slip.

E. H. Wessells, Jr.
Safety Supervisor

May 1, 1965
*Revision 10/01/01

METER SERVICE JOB FAMILY

The Company proposes the establishment of a Meter Job Family Progression for the Meter Reader, Meter Installer, and Meter Representative positions. Progression within the Meter Job Family is outlined below:

Meter Reader Progression to Meter Service Installer Helper:

- Meter Readers progress to any/all open Meter Service Installer Helper (S1) positions when / if they become available provided they meet necessary qualifications of successfully passing the CAST test at the Meter Service Installer level or higher. Qualified Meter Reader candidates will fill open Installer positions based on Department seniority in the district where the open position exists (i.e., Springfield, Pittsfield, or Hadley / Greenfield).

- If the open Meter Installer position is not filled by a Meter Reader from the same district, the job will be made available to Meter Readers from the other districts and filled based on Company (union) seniority.

- If no Meter Readers are qualified or interested in filling the position(s), the job will be posted according to Section XXII of the union contract.

- Meter Readers who accept a transfer to Meter Installer Helper positions will enter the new classification at the TMP Step 5 (S-5) wage rate. However, for TMP progression they will start at S1. Also, with the exception of general wage increases, employee's wage rate will be frozen (red-circled) at the S-5 wage rate until employee progresses through their TMP steps and becomes equal with TMP progression increases.

- All Meter Installers/Installer Helpers can be assigned to read meters when necessary.

- All Meter Installers/Helpers hired after 1/1/02 will be considered shift workers and thus can be assigned to work shift hours. For example, an Installer hired after 1/1/02 can be assigned to read meters as a 2nd shift mobile AMR driver should the need arise due to resource limitations (i.e., due to sickness, vacation, workers compensation / light duty, equipment failure, etc.) If this were to occur , as is the case with any schedule changes, the Company will adhere to Section VI of the union contract.

Meter Service Installer Progression to Meter Service Representative:

- Meter Service Installers progress to any/all open Meter Service Representative positions when / if they become available provided they are at the fully qualified Installer level (TMP S6 or higher) and have successfully passed the CAST test at the Meter Service Representative level or higher. Qualified Meter Service Installer candidates will fill open Meter Service Representative positions based on Department seniority in the district where the open position exists (i.e., Springfield, Pittsfield, or Hadley / Greenfield).

- If an open Meter Service Representative position is not filled by a Meter Service Installer from the same district, the job will be made available to Meter Installers from the other districts and filled based on Company (union) seniority.

- If no Meter Service Installers are qualified or interested in filling the Meter Service

Representative position(s), the job will be posted according to Section XXII of the union contract.

- Meter Service Installers who accept a transfer to Meter Service Representative positions, will enter the new classification *at their current rate of pay* and appropriate TMP training level as determined by the company. *They will remain at their current rate of pay until such time as their training and pay are equal and then be eligible to continue through the TMP training/salary process.*

Other Items

- For the existing Installer Helpers (6) who transferred directly from their former Meter Reader position and as a result were required to take a cut in pay, the Company agrees to progress these employees to the S5 Installer/Helper wage rate prior to any general wage increase and freeze (red circle) them at this wage rate (with the exception of future general wage increases) until employee becomes equal with TMP progression step increases. In addition, these employees cannot be bumped by employees in a lower classification (i.e., Meter Reader).

- The Union agrees to cap the existing Meter Reader wage rate (prior to any general wage increase) for all new hire Meter Readers (i.e., Mobile AMR drivers). This is the same rate as the Temp Meter Reader rate (per the Three Year Manpower Agreement for new hire Meter Readers). All existing Meter Readers will be grandfathered and maintain their current wage structure per the contract.

- As part of this agreement, both the Company and the union agree to meet within 90 days of contract ratification to discuss the issue of combining the Meter Service Installer and Meter Service Representative positions into one TMP (job family) program.

- The Company recognizes that there may be circumstances in the future where injured or disabled employees may need to be considered for open Meter Service Installer or Meter Service Representative positions. In the event that a situation arises under this agreement that relates to section *XX - Disability Management*, the Company will abide by this section of the contract.

- The Company reserves the right to determine the proper mix of Meter Service Installer versus Meter Service Representative positions in a district based on need / workload requirements.

MEMORANDUM OF UNDERSTANDING

LEAD LINE MECHANIC

August 24, 1979

The following understandings were reached between the Company and the Union with respect to establishing the job classification of Lead Line Mechanic to be the leader of a two-person overhead line crew.

1. Job Classification

Lead Line Mechanic Expectations

Talking points regarding the Lead Line Mechanic Memorandum of Understanding DTD August 24, 1979

- **Progress of the assigned job**
  - **Directs all crew members**
  - **Ensures applicable guidelines and procedures are adhered to (construction standards, vehicle operation, etc)**
  - **Ensures appropriate break / lunch times are adhered to**
  - **Ensures the productivity of the crew**
  - **Communicate any change / delay of daily assignment to their Supervisor in a timely manner**
  - **Ends work in a reasonable time to return to the AWC / show-up location**
  - **Provide Supervisor a job status update for the tasks assigned**

- **Employees own safety, the safety of the employee assigned to the employee and the safety of the general public as it relates to the job being performed**
  - **Ensures all crew members adhere to all safety standards**
  - **Ensures a safe job site / work zone set-up**
  - **Ensures a comprehensive and complete job brief (tailboard) is conducted and documented**

- **All assigned equipment and material related clerical and stores activity**
  - **Ensures crew has all required material / equipment / tools for daily job assignment**
  - **Ensures all required paperwork is submitted at the end of day**
    - **Crew timesheets, tailboard sheet, completed job packet, police detail sheets, trouble tickets, etc.**

2. Progression

Lead Line Mechanic will be added to Occupational Group D-2 or TD-2 on the same level as Response Specialist in Appendix C. It is understood that Response Specialist will be combined with Line Mechanic for purposes of promotion to Lead Line Mechanic under the provisions of Section 13 of the Agreement.

3. Reduction in Force

Lead Line Mechanic will be added to the top of Occupational Group D-2 and TD-2 under Section 14 of the Agreement.

4. Call Outs

Lead Line Mechanic and Line Mechanic will be combined for purpose of equalization of overtime and emergency call outs.

5. Upgrading

A Lead Line Mechanic will be upgraded to Crew Supervisor-Lines in accordance with Section 12d of the Agreement whenever a third person is added to the employee's crew.

When two or more two-person crews are working as a coordinated unit and a Supervisor is not present on the job, one of the Lead Line Mechanics or temporary Lead Line Mechanic will be upgraded to a supervisory position in accordance with Section 12d of the Agreement.

When two Line Mechanics (or Response Specialists) are working together as a two-person crew, one will be upgraded to Lead Line Mechanic in accordance with Section 12d of the Agreement.

The letter of understanding concerning upgrading on a two-person crew on page 100 of the Agreement is rescinded and will be removed from the Agreement.

6. Added Person On a Job

It is agreed that a Lead Line Mechanic or temporary Lead Line Mechanic may request and receive an additional employee or employees on a job.

When such a request is considered as unnecessary by the Company, it will provide the employee or employees but will point out its reasons for believing the request unnecessary. If such requests continue, the Company will take appropriate action, subject to the provisions of Section l6 of the Agreement.

7. Use of Nonclimbers as One Person of a Two-Person Crew

When working on live primaries, the Company will not assign a non-climber as one person of a two-person crew. It is the position of the Company that this restriction does not apply to opening and closing a cutout, taking load and voltage checks, replacing a fuse or isolating an area because of a fault, and work which can safely be performed by one person. All non-climbers will receive necessary safety training prior to being assigned as one person of a two-person crew. This training will include one person bucket rescue and mouth-to-mouth and CPR.

In the application of the above use of non-climbers, it is recognized that an issue exists between the Company and the Union concerning the applicability of the Lineman's Safety Act.

Both parties have agreed in principle to submit their differences to the court and obtain a declaratory judgment on this matter.

8. It is agreed that a Line Helper S1 will not be assigned as one person on a two-person crew for the first six months of the employee's trainee period. The Helper S1 will receive necessary safety training prior to being assigned as one person of a two-person crew.

A Line Mechanic Helper S2 will not be required to work alone on energized conductors.

Revision made 10/01/16

LOU – Roving Electrical Maintenance Agreement – 10/01/2004 (Revised 10/01/2010)

Delete in its entirety and add the following language (underlined is new):

MEMORANDUM OF UNDERSTANDING
ROVING ELECTRICAL MAINTENANCE & CONSTRUCTION

October 1, 2010

Mr. William H. O'Rourke
Business Manager/Financial Secretary
I.B.E.W. Local 455
474 Page Boulevard
Springfield, Massachusetts 01104

Subject: Revision of Roving Maintenance Overtime Agreement

Dear Mr. O'Rourke:

The purpose of this memorandum of understanding is to update and clarify the roving maintenance agreement. The MOU addresses issues such as the scope of assignment, selection of employees to the roving crew, overtime distribution, travel, rotation and job site reporting expense. In addition, management will discuss with all workers prior to the start of a three month (quarterly) assignment, the work load that is known, to the best of their knowledge, for that period of time.

1. Scope of Assignments

Work assignments will include assignments to any properties in Massachusetts owned and/or operated by Western Massachusetts Electric Company (WMECO) and assignments to any location to which WMECO has contracted to perform work in Massachusetts.

Work to be performed will include, but not limited to:

- Major Maintenance (i.e., de-energized inspection, test and maintenance).
- Test (i.e., de-energized test and inspection).
- Construction projects (major or minor).
- Any assignment of less than three days is not considered a roving assignment.

Clarification of Roles of Construction and District Maintenance Electricians is as follows :

A. The primary role of the Substation Construction Electrician but not limited to this role will be work responsibilities related to the installation or replacement of substation equipment and protection systems – distribution and transmission.

B. The primary role of the District Electrical Maintenance Electrician but not limited to this role will be work responsibilities related to the maintenance of substation equipment for both distribution and transmission equipment.

Clarification for switching on Construction Projects:

If a project is assigned to WMECO Construction, switching will be performed by the Construction Electricians listed on the Qualified Persons List (QPL) if the switching only involves the substation where they are working. This will also be scheduled in accordance with Section 6 Paragraph M of the Contract. Switching occurring at the completion of the Construction Project and involving Overtime work beyond the end of the normal work day will be performed by the local District Electricians and will be staffed by following Local District Protocol. Otherwise the switching will be performed by the Construction Electricians who have been working on the Project.

If a project or other work is being performed by an outside contractor in a substation, or transmission line construction work requires switching to be performed, district electricians will perform the switching activities.

2. Selection of Employees

All employees in the following classification will be entitled to participate in the Roving work assignments to supplement WMECO Electrical Construction or other Districts as needed:

Lead Electrician
Electrician
Electrician Trainee

The Company seeks participation of qualified employees from the participating areas and Classifications as follows:

Springfield	-	*2 Electricians or 1 Electrician and 1 Electrician Trainee*
Pittsfield	-	*2 Electricians or 1 Electrician and 1 Electrician Trainee*
Hadley/Greenfield	-	*2 Electricians or 1 Electrician and 1 Electrician Trainee*

Hadley / Greenfield / Pittsfield – Roving Assignments

For support to other districts, the company will utilize Hadley / Greenfield and/or Pittsfield Electrical Maintenance Roving personnel based on business need and management discretion. The company will ask for volunteers to fill the roving assignment before employees are forced to fill the assignment on a seniority basis. These assignments are as follows:

Pittsfield: Two Electricians or a qualified electrician trainee
Greenfield: Two Electricians or a qualified electrician trainee*
Hadley: Two Electricians or a qualified electrician trainee*

* Note: Hadley and Greenfield will rotate the roving assignment on a quarterly basis. The district with the fourth quarter roving assignment shall have the first quarter assignment for the following year. In addition, Hadley and Greenfield will ask each quarter for two volunteers in total from either or both districts. If only one or no volunteers exist, the roving assignment will revert back to the scheduled district for that quarter and the junior personnel will be assigned to roving to fulfill the remaining obligation. If two electricians volunteer no one will be forced, however if both volunteers are from one district, the remaining electricians from the other district will provide back up support to the volunteering district.

Participation will be on a voluntary basis provided the required number is obtained. If the required number is not obtained, assignment to the program will be made on a junior to senior (Department Seniority) basis.

3. Rotation

- Participants will normally rotate off assignment after a three (3) month period, except if the assignment is at a critical juncture.
- Lead person will not rotate.
- Assignment to such work will be for the duration of the work in most cases. However, if a roving job assignment involves planned overtime, staffing on the roving job assignment will be rotated every 4 weeks or after a critical juncture is completed, defined by the assigning supervisor.
- If all roving assignments are working planned overtime, staff rotation is not necessary.

4. Overtime Distribution

As far as practicable, overtime will be distributed equitably over the calendar year among the employees who are in the job classifications assigned to "roving electrical maintenance work." employees assigned to this work will not be subject to call-outs during the week except as follows: Electricians on roving assignments within their home district will remain on their respective district call-out list, Electricians roving outside of their home district will be removed from the call-out list during the week. *In addition, the following will also apply:*

Construction Electricians and District Rovers if applicable who are assigned to Transmission Projects or Customer Critical Distribution Projects will be removed from the ACOS List for the duration of the particular project to help honor WMECO's commitment to the Transmission and Distribution Organizations to adequately staff and complete these projects on time. If the electricians are working a regular 40 hour per week schedule for the Project, they will be allowed to remain on the ACOS list.

This requirement also applies to Storm Emergencies affecting the WMECO Service Territory.

The company will also discuss work that involves overtime with the current rovers, as far as practicable, in advance to the actual start of the job. Both parties agree that the procedure for determining how overtime work would be distributed will to be determined by whether the overtime is planned or unplanned and whether it is during the week or weekend. It will be a factor only if the work is identified as requiring overtime prior to the start of the job. Not all roving work or construction work will require overtime. The following chart will be the manner by which employees' will be selected for work that is determined to have overtime associated with the work prior to the start of the work. This could be modified depending on other circumstances and discussion with the work force and Union representation.

PLANNED OVERTIME CHART

Planned Overtime – Weekdays

- Low person on the Roving Electrical Maintenance job assignment for the quarter (unless already assigned to a job) will be asked to work the assignment to its completion unless there are reasons to change personnel such as vacation, sickness, or end of quarterly rotation for the group of rovers. Some special reasons may also be considered with prior discussion with the parties involved.

Unplanned Overtime – Weekdays

- Roving Electrical Maintenance Workers on the job will continue to be selected as they are now.

Planned Overtime – Weekends

• *For weekend assignments, the lead person on the job will continue in that function. The lead can also request up to two electricians based upon the Electrician's Overtime list ranking for these electricians who have been working on the job to continue for the overtime assignment. If a particular electrician on the job site is working on a critical element of the project and would be a key member of the crew to continue this part of the project on the weekend, the Lead may request that this particular electrician work the Overtime assignment as one of the two allowed electricians regardless of his standing on the overtime list. The selection for any additional electricians for this overtime assignment will be based upon the substation electrician's overtime list in the home district from where the Project is located.*

• The Hadley/Greenfield region will be considered two separate lists for overtime assignments but one district. For example, if a planned overtime weekend assignment occurred in Hadley, the electricians in Hadley would be asked first and then the electricians in Greenfield would be asked second. After both lists have been exhausted, the supervisor would have the discretion to select electricians from either Pittsfield or Springfield.

5. Travel

When employees are required to make their own travel arrangements to report to job locations other than their base headquarters, they will be paid a daily expense allowance as follows: Any job site reporting assignments will be paid in accordance with the Collective Bargaining Agreement. For single day assignments, all employees shall be responsible to bring their PPE (i.e. hard hat, safety glasses, rubber gloves with keepers, leather gloves, traffic vest, and FR rain gear) with them to the job site reporting assignments. In addition, all roving employees job site reporting within their home district, but still available for call outs, shall have their PPE (as listed above) with them for call outs.

6**. Hours of Work**

The schedule hours of work may vary on each project. (Subject to 1994 WMECO Negotiations)

7. Filling Open Positions in WMECO Construction

The 30 minute reporting requirement will be removed for Construction Electrician positions. Electricians can continue to move from Construction to Springfield Maintenance when a job opening is created provided that the interested electrician lives within 30 minutes of the Springfield District to be consistent with WMECO Emergency Response requirements of a District Electrician. This applies to all electricians hired in to the Construction Group after October 1st, 2010. Electricians can also continue to move to Construction from Springfield Maintenance when a job opening is created as well.

8. Program Changes

Any changes to the "Roving Maintenance" program that affects participants (i.e. hours of work; assignments; overtime, etc.) shall be a matter of discussion between the parties before becoming effective.

At all times the provisions of the contract that apply will be adhered to with the exceptions being approved by both parties involved. If you are in agreement with above-outline process, please sign where indicated below and return a copy to me.

Sincerely,

James G. Connolly
Sr. Labor Relations Consultant

Date

LOU - October 30, 2000 – Expanded Duties for Distribution Construction Mechanic – Time Merit Progression Program.

Add the following *underlined* language to the existing 10/30/2000 letter:

"Expanded Duties: (1) Set up to 20 foot streetlight poles and heads, connect and maintain them. *In underground fed areas, the Distribution Construction department and Splicers will be able to install up to 35 foot dedicated streetlight poles and heads, connect and maintain them.*"

August 6, 1969

Mr. Thomas F. Eastwood, Business Manager
Local 455
International Brotherhood of Electrical Workers
l39 Arthur Street
Springfield, MA

Dear Mr. Eastwood:

This letter confirms the agreements reached on July 24, 1969, pertaining to the interpretation and understanding of the following statement in our May 1, 1969, union agreement:

Live Primary Splicing

The Employer agrees that the practice of live primary cable splicing will be discontinued.

It was agreed by the Employer and the Union that:

1. The 2400 volt to ground cable will be deenergized until it is fully insulated with insulating tape and shielding applied if required. The cable will then be energized and the wiping and filling of the sleeve will be performed. The above operation is included as a part of the duties of a Cable Splicer A-1.

2. The classification of Cable Splicer A-1 will be incorporated in the agreement with a rate of $4.745 effective on April 27, 1969, and $5.055 on May 3, 1970.

3. The four employees in Local 455 who were, prior to May 1, 1969, classified as Cable Splicer A-1, will be reclassed to that classification, retroactive to April 27, 1969. One employee in Local 909 will be reclassified accordingly after Local 909 agrees to the settlement agreed to with Local 455 and Mr. Keilty.

4. When First Class Cable Splicers are qualified and are desirous to perform all the duties of an A-1 Splicer, such employees will be reclassified and paid accordingly.

5. The six employees who were relieved of their duties with a loss in wages for failing to complete the cable splicing jobs on July 3, 1969, will have their loss in wages restored.

Will you kindly sign one copy of this letter acknowledging your agreement with the written understanding and return it to me for our records.

Very truly yours,

WESTERN MASSACHUSETTS ELECTRIC COMPANY

Mr. Joseph R. Hallett, Jr., Business Manager
Local 455
International Brotherhood of Electrical Workers
61 Warwick Drive
Ludlow, MA 01056

Dear Mr. Hallett:

In connection with the Massachusetts Classified Driver License Law which became effective on January 1, 1968, all employees who are required to drive a truck having a registered gross weight in excess of 18,000 pounds must have a Class 2 license and those employees required to drive a truck having a registered gross weight in excess of 18,000 pounds drawing a trailer having a registered gross weight in excess of 6,000 pounds must have a Class 1 license.

Effective at once, the Company agrees to reimburse each employee, who will be required to have a Class 1 or Class 2 license to perform the duties of the employee's job classification and who has been authorized by the employee's supervisor to take such examination, for the cost of taking the written examination and the driving test conducted by The Commonwealth of Massachusetts, Registry of Motor Vehicles. Such reimbursement shall be made only once to an employee for the class of license required. The current costs are $2 for the written examination and $3 for the road test. This procedure does not include the cost of the usual driver's license which is currently $10 for a four-year period.

As in the past, the Company will cooperate with those employees designated, both in preparing for and taking the examination.

Will you kindly indicate your approval of this procedure by your signature and return one copy to me for our files.

Very truly yours,

Donald A. Bartlett

Dear Mr. Collins:

It is agreed by the undersigned that if welding is required on gas turbines the Company will use qualified and available WMECO bargaining unit employees before using nonbargaining unit persons.

If the manufacturer of the turbine, for purposes of warranty or guaranty, requires its own employees, or other experts supplied by them, to perform welding the parties hereto agree that such persons shall be allowed to perform the welding.

In determining who is qualified the Company will consider production department welders and employees who demonstrate an ability to perform such welding following a testing procedure to be agreed upon by the Company and the Union.

The Company will give the Union reasonable notice within the context of the work to be performed of such welding.

Very truly yours,

SUBJECT: Time Merit Progression (TMP)

Dear Mr. O'Rourke:

This letter is to confirm the agreement between the Company and the Union concerning the administration of the Time Merit Progression (TMP) Program for the Western Mass. Region. This agreement is applicable to all TMP classifications listed in the HWPCO and WMECO agreements.

Acceleration

The Company will notify the Union prior to acceleration of employee in any of the TMP classifications.

A TMP Committee consisting of three (3) representatives from the Company and two (2) representatives from the Union will meet to review qualified candidates for possible acceleration within the steps of the TMP classifications. The Chairperson of this committee will be a Regional Personnel Representative.

The committee will be made up as follows:

Three (3) representatives from the Company

1. A representative from Regional Personnel (Chairperson of Committee).

2. The Superintendent, Manager, or their designee, from the work location in which the employee being considered for acceleration is located.

3. A supervisor from the department in which the employee being considered for acceleration is located.

Two (2) representatives from the Union

1. The Business Manager or Assistant Business Manager from the work locations involved.

2. The second Union representative will be a journeyman from the job classification in which acceleration is being considered.

The Company or the Union may request the TMP Committee to review an employee for acceleration. Acceleration must be based upon equivalent experience or education. The

requesting party shall be responsible for providing the necessary documentation to support an objective evaluation of the employee.

Pre-requisite: An employee will be considered eligible for acceleration only after an appropriate evaluation period in the TMP Program.

Examples of documentation showing equivalent experience or education required to support such an evaluation are:

1. The employee shall satisfactorily demonstrate ability to perform at the level of technical competence required for the requested acceleration step.

While not limited to the following, examples of other formal documentation to demonstrate equivalent experience or education:

A. References - verifiable satisfactory past work experience comparable to the work experience requirements to the applicable TMP Program

B. Certificates - formal documentation of training courses and schools attended and successfully completed, which are comparable to the work experience or classroom training requirements of the applicable TMP Program.

If consensus has not been reached after the Committee has reviewed the request for acceleration, a majority vote of the five (5) member committee will determine if acceleration is to take place and to which step an employee will be accelerated.

An employee may be accelerated only one time within a job classification.

An employee who is denied acceleration may be subsequently resubmitted to the TMP Committee for review after six (6) months from the date of denial and then only if there is new objective-demonstrable information of experience gained prior to entry in the TMP Program to support such reconsideration.

Job Postings TMP Classifications

Employees with one or more years of Company seniority who are selected to fill a posted job opening will be transferred into the new position at the second rate step. If the employee has 18 months or more of Company seniority, they will start at the third rate step. Transfers into the second or third rate step as described in this paragraph are for compensation purposes only.

Notwithstanding TMP language to the contrary, the Company reserves the right to maintain such transferred employees in their respective transfer rate steps until such time as their training corresponds with their rate step up to the length of time the employee received transfer credit for, i.e., one (1) year or eighteen (18) months. The employee is expected to satisfactorily complete the first three (3) steps.

Any employee currently in TMP job classification who applies for a job in a classification having training requirements similar to the employee's current TMP classification (i.e., Electrician - Station Electrician) will be placed in an appropriate step after review by the TMP Committee. Appendix A - hereof (Company and Union)

Employees who are helpers in the TMP classification are not eligible to apply for posted journeyman positions that are posted within their classifications. When an employee in a TMP classification is a successful applicant for a position within the same classification in another location, the employee will transfer in the same step of the TMP classification that the employee presently holds.

Upgrading

It is not intended by the Company to have employees performing the duties of a higher job classification. No upgrading will be permitted within the TMP steps either from step-to-step or from a trainee to a journeyman level. Helpers in TMP are trainees and have not received the full qualifications required for them to perform all duties in a higher classification. This provision will not apply to an employee who is performing the duties of a higher job classification while being trained or while demonstrating skills proficiency under the direction, supervision and observation of a qualified individual.

Very truly yours,

Paul W. Barr
Regional Personnel Manager

SUBJECT: Access

Dear Mr. O'Rourke:

The company and the Union agree the procedures listed below will be followed to address the situation of a Union-selected qualified industrial hygienist having access to Western Massachusetts Electric Company facilities:

1. Prior to making a request for such access, the Union will exhaust all other reasonable alternatives to obtain the industrial hygiene information including the right of the Company to perform or conduct such tests or surveys requested by the Union and thereafter to provide the test or survey results to the Union. The Company will endeavor to provide such relevant test data to the Union within four weeks of the test or survey insofar as is practical.

2. If requested by the Company, the Union will meet with the Company to discuss the relevancy of the information sought and the necessity of access. It is the Company's position that the Union has the burden to investigate reasonable alternatives to access by a hygienist before requesting such access.

3. If the reasonable alternatives are not able to produce the information or resolve the Union's questions, a union-selected qualified industrial hygienist shall be granted access to the test area or location where there remains a question. A mutually agreed time and date will be established in a timely manner. It is understood that whenever access is granted it shall be for a specific and reasonable period and shall not interfere with Company operations. The Union will make available to the Company the results of the analysis within four weeks of the test or survey insofar as practical.

4. The Company shall have the right to accompany the Union's representatives which shall not exceed three in number including one qualified industrial hygienist.

Very truly yours,

Paul W. Barr

SUBJECT: Long-Term Care

Dear Mr. O'Rourke:

At the 1989 negotiations the following item concerning Long-Term Care was agreed upon by the Company and the Union.

Effective January 1, 1990, the Company will implement coverage for Long-Term Care. Plan provisions include:

Eligibility:	Active bargaining unit employees eligible for coverage under the terms of this Agreement.
Benefit:	Long-term care is an insurance coverage that provides for out-of-pocket expenses not covered under traditional health insurance plans for illnesses or disabilities that tend to require custodial, long-term care.
Costs:	The employee will have payroll deductions to cover the premium for this insurance. employees will pay the full premium for this insurance. The Company will not be making any contribution towards this coverage. However, Northeast will assume administrative costs for this Plan and provide the advantage and availability of this insurance through group coverage.
Conversion Option:	The Plan will have an option to convert to individual coverage with the carrier. In addition, depending upon the participant's age when entering the Plan and length of participation, the coverage may be paid up at retirement.

Note: The selection of carrier and all details of coverage are not yet finalized. Until the final selection takes place, full details cannot be provided.

Very truly yours,

Paul W. Barr
Regional Personnel Manager

Subject: Dispatcher Rate/Rotating Shift Differential

Dear Mr. O'Rourke:

The Company and the Union have reached agreement on the above-noted subject. All monies associated with this agreement will be retroactive to April 15, 2001 and will remain in effect for the duration of the current Agreement.

Dispatcher Rate (Hourly)	(Effective 10/1/00)	(Effective 4/15/01)
Dispatcher	$29.57	$31.00

Dispatcher Rotating Shift Differential

When a Dispatcher is assigned to work on a rotating shift schedule of normal work coverage, a premium of two dollars ($2.00) per hour will be added to their basic straight-time rate for all hours worked within that schedule. For the purpose of this shift premium provision, rotating schedules of normal work coverage are defined as those which include normal schedule hours of work preceding 7:00 a.m., or following 7:00 p.m..

Subject: Letter of Agreement - Response Time/Furlough

Dear Mr. O'Rourke:

The Company and Union agree that employees hired after January 1, 2000 to a job with requirements that include emergency overtime work outside of normal scheduled hours, will be required to make themselves available at their reporting base within approximately one-half hour.

It is further agreed, unless negotiated differently at the conclusion of the October 1, 2001 negotiations:

- Employees transferred after 10/01/2001 to a job with requirements that include emergency overtime work outside of normal scheduled hours, will be required to make themselves available at their reporting base within approximately one-half hour.

- Section VII - Call-Out Pay, paragraph (b) will be modified to read, "*employees transferred after October 1, 2001 whose job requirements include assignment to take trouble calls outside of normal scheduled hours will be required, during periods of such assignment, to make themselves available at their reporting base within approximately one-half hour*."

- Section XIV - Furlough of employees, paragraph (g), will be added to read, "*The Company will not contract out work regularly performed by employees covered under this Agreement if it would result in the layoff or demotion of its regular employees*."

These modifications will be in the October 1, 2001 Summary of the new Agreement and appropriate sections of the new Agreement.

Sincerely,

Jack Curley
Sr. H.R. Consultant - Labor Relations

Subject: Three Year Manpower Plan

Dear Mr. O'Rourke:

With the on-going deployment of Automatic Meter Reader (AMR) technology throughout Western Massachusetts Electric Company which will reduce costs, improve metering services and provide flexible customer/supplier choices and in an effort to minimize the impact this will have within the Western Massachusetts Region, the Company would propose the following:

Commitment

The commitment as outlined below would allocate a position for every Meter Reader (employed as of 1/1/2000) provided they successfully pass the appropriate pre-selection test.

To help facilitate employees' ability to successfully test and bid into the above positions, the Company would offer after hour educational classroom instruction and this would include access to self-study material.

As Meter Readers are selected for posted job classifications, we would backfill these Meter Reader positions, where appropriate, with Long-term Temporary employees at a rate of $13.10/hour. (This rate would change each year in accordance with Schedule "A" rates that are negotiated by the Company and Union.) The long-term temporary employees, while filling these positions until the conclusion of the AMR installations, would be eligible for medical benefits. These medical benefits would be applicable only to the Long-Term Temporary Meter Reader employees hired as a result of the installation of the AMR's. The Company anticipates the AMR installation will be completed by July 1, 2003.

As the AMR process evolves, the need for long-term temporary (LTT) employees will dissipate thus resulting in the furlough of the LTT employees and the "benchmark" number would be reduced respectively pursuant to the 1997 Massachusetts Restructuring Act, Chapter 164, Section 1E, Paragraph (b), of Massachusetts General Laws.

Over the next three years the Company anticipates openings in the following classifications to accommodate this commitment:

- Linemen Helper S-1
- Splicer Helper S-1
- Distribution Construction Worker
- Stockhandler Helper S-1
- Meter Service Installer Helper S-1
- Electrician Helper S-1

Year 2000 Employment Opportunities

The Company would propose the following job posting opportunities during the year 2000. This proposal would require the Union's sign-off on the attached Letter of Agreement regarding Response Time/Furlough dated March 2, 2000.

- Three (3) Meter/Service Installer Helper S-1 positions
- Six (6) S-1 positions (from the following classifications: Line/Splicer/Electrician)
- One (1) Stockhandler Helper S-1 position

The Company and Union further agree to meet and discuss expanded duties for the Distribution Construction Workers (DCW) classification which will result in two additional DCW employees. An AMR Installation Committee will be formed to address attaining the three-year installation requirements.

Finally, the Company and Union agree that upon medical clearance by the Berlin Health Unit, David Burniske will be offered a Regular Meter Reader position in the Pittsfield Work Center and will be considered eligible for the commitments in this Agreement.

If you are in agreement with the above, please sign below and return to me.

Sincerely,

Jack Curley

Subject: Expanded Duties for Distribution Construction Mechanic - Time Merit Progression Program

Dear Mr. O'Rourke:

The Company and Union have reached agreement on the above-noted subject. Detailed below are the expanded duties and associated rates for the Distribution Construction Worker classification as well as a Time Merit Progression rate schedule. For occupational group seniority, these classifications would be included in D-12 of Appendix "C", List of Occupational Groups, Springfield District, Distribution Department.

The program would be a two year (2) Time Merit Progression as outlined below.

Distribution Construction Helper (f) Steps S-1, S-2, S-3 Rate: $16.40 - $19.87

Duties: Includes all current duties

Distribution Construction Worker Step S-4 Rate: $20.35

Expanded Duties: Includes duties of operating the backhoe, minor maintenance such as molding repairs, guy repairs, stenciling poles.

Distribution Construction Mechanic Step S-5 Rate: $22.32

Expanded Duties: (1) Set up to 20 foot streetlight poles and heads, connect and maintain them. *In underground fed areas, the Distribution Construction department and Splicers will be able to install up to 35 foot dedicated streetlight poles and heads, connect and maintain them.*"

(2) Service disconnects and reconnects
(3) Install residential service where no present service exists, including upgrading of service, and remove both meter and service where service is to be terminated.
(4) Stenciling padmounts

OVERTIME

Call-outs: The current practice of calling in Cable Splicers for all electrical-related trouble will continue.

Planned Overtime: The current practice of utilizing Cable Splicers on planned overtime for electrical-related job assignments will continue.

Extended Day: If a job assignment continues beyond the normal workday and involves job duties as

listed in items #1, #2 and #3 above, a Cable Splicer will be utilized until there are qualified Distribution Construction Mechanics.

Specialized Mobile Equipment Operator George Poehlman will be included in the Distribution Construction Overtime List and receive overtime assignments in the same manner as all employees of the department. He will be allowed to enter the Distribution Construction Mechanic T.M.P. program if he so desires.

The Company agrees to grandfather present Distribution Construction Worker employees at their current rate if they choose not to progress in the classification and will be considered "red-circled" and will remain in a furlough classification. It is further agreed, incumbents who enter the Program will be allowed to do so at their current rate of pay. The two incumbents who presently hold a backhoe license will enter the Program at the S-4 rate and must successfully complete all steps of the T.M.P. program within 30 months, at which time they will be eligible for the Distribution Construction Mechanic level. All incumbent employees will have until December 31, 2000 to decide whether to enter the T.M.P. program. This position requires successfully passing the CAST test. Incumbents will be exempted from this requirement.

If you are in agreement with the above-outlined program, please sign where indicated and return to me.

Sincerely,

Jack Curley

Business Manager/Financial Secretary
I.B.E.W., Local 455
57 Observer Street
Springfield, MA 01104

Subject: Mobile AMR Driver Positions - 1st and 2nd Shifts

Dear Mr. O'Rourke:

The Company and the Union have reached agreement on the above-noted subject. The Mobile AMR Driver positions will be operated out of the Springfield District and will be shift positions. The first shift will operate from 6:00 a.m. to 2:00 p.m., Monday - Friday and the second shift will operate from 1:30 p.m. to 9:30 p.m., Monday - Friday.

The Company will ask for volunteers from our existing Meter Reader work force for re-assignment to these positions. This process will be done by a "Company Notice" bulletin board posting. If there are more employees volunteering than positions, the positions will be filled based on Union seniority.

Employees choosing the first shift will be moved into this position at their current rate of pay. The employees choosing to work the second shift will receive an additional $1.10 shift differential to their current rate of pay and three payments on 7/01/01, 8/01/01 and 9/01/01 consisting of $250.00 per payment for a one time, overall total payment of $750.00.

This agreement will remain in effect until such time the Union ratifies a new Collective Bargaining Agreement with the Company.

If you are in agreement with the above, please sign where indicated and return a copy to me.

Sincerely,

James G. Connolly
Sr. H.R. Consultant - Labor Relations

JGC/cb

AGREEMENT entered into as of the 1st day of **December, 2018**, between THE YANKEE GAS SERVICES COMPANY, hereinafter referred to as the COMPANY, and LOCALS NO. 420 and 457 of THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, hereinafter referred to as the UNION, with respect to rates of pay, hours of employment and other conditions of employment. This Agreement shall be binding on any and all successors and assigns of the employer, whether by sale, transfer, merger, acquisition, consolidation or otherwise. The employer shall make it a condition of transfer that any such successors or assigns shall be bound by the terms of this Agreement.

.

ARTICLE I

RECOGNITION AND UNION MEMBERSHIP

1.(a) The Company recognizes the Union as the exclusive bargaining agent for all employees in job classifications listed in Appendix "A" of this Agreement.

1.(b) The Company and Union agree to continue their cooperative efforts to promote safety, efficiency and harmony among all the employees and to promote and advance the welfare of the Company and the service at all times.

The Union agrees that its members, who are employees of the Company, will individually and collectively continue to avoid and discourage waste of materials, time, and manpower, and that they will use their influence and best efforts to protect the property of the Company.

1.(c) Each Local Union shall notify the Company in writing of the identity of its elected and appointed representatives and, in the event of a change of any representative, shall notify the Company of such change promptly. Notices to the Company under this provision shall be directed to Labor Relations.

1.(d) The Company recognizes Local 457 – IBEW as the sole collective bargaining representative with respect to wages, hours, and other conditions of employment for all full time and part-time regular clerical employees, including Billing Services Representatives, Operating Records Clerks, Customer Information Representatives, Secretaries and Senior Meter Management Records Clerks, employed by the Employer at its 56 Cooper Street, Meriden, Connecticut, facility, but excluding all other employees, Field Technicians, and guards, professional employees and supervisors as defined in the Act. Recognition is granted pursuant to the certification of Representatives of the National Labor Relations Board in case number 34-RC-1885 dated April 23, 2001.

The Company recognizes Local 457 – IBEW as the sole collective bargaining representative with respect to wages, hours, and other conditions of employment for all full time and part-time regular clerical employees, including Operating Records Clerks employed by the Employer at its 112 Prospect Hill Road, East Windsor, Connecticut and 179 Cross Road, Waterford, Connecticut facilities, but excluding all other employees, Field Technician, and guards, professional employees and supervisors as defined in the Act.

1.(e) The Company recognizes Local 457 – IBEW as the sole collective bargaining representative with respect to wages, hours, and other conditions of employment for all full time and part time regular Technicians B&A excluding supervisors, professionals and guards as defined by the Act. Recognition is granted pursuant to the certification of Representatives of the National Labor Relations Board in case number 34-RC1942 dated February 13, 2002.

1.(f) The Company recognizes Local 457 and Local 420 – IBEW as the sole collective bargaining representatives with respect to wages, hours, and other conditions of employment for all regular Construction Technicians, excluding supervisors, professionals and guards as defined by the Act. Recognition is granted pursuant to the Certification of Representatives of the National Labor Relations Board in case number 34-RC-2084 dated June 24, 2004.

1.(g) The Company recognizes Local 457 and Local 420-IBEW as the sole collective bargaining representatives with respect to wages, hours and other conditions of employment for all regular Corrosion Technicians, excluding supervisors, professionals, and guards as defined by the Act. Recognition is granted pursuant to the Certification of Representatives of the National Labor Relations Board in case number 01-RC-112597 dated September 5, 2013.

1.(h) The Company recognizes Local 420-IBEW as the sole collective bargaining representatives with respect to wages, hours and other conditions of employment for all regular Field Techs I and II working at the Ansonia, Newtown, Norwalk, Waterbury, Connecticut; but excluding all other

employees, office clerical employee and guards, professional employees and supervisors as defined by in the Act. Recognition is granted pursuant to the Certification of Representatives of the National Labor Relations Board in case number 01-RC-108126 dated June 27, 2013.

1.(i) The Company recognizes Local 420-IBEW as the sole collective bargaining representatives with respect to wages, hours and other conditions of employment for all regular fulltime clerical employees working at the Danbury, Newtown, Norwalk, Shelton, Waterbury, Connecticut; but excluding all other employees, and guards, professional employees and supervisors as defined by in the Act. Recognition is granted pursuant to the Certification of Representatives of the National Labor Relations Board in case number 01-RC-112285 dated August 29, 2013.

1.(j) The Company recognizes Local 420-IBEW as the sole collective bargaining representatives with respect to wages, hours and other conditions of employment for all full-time and regular part-time Liquefied Natural Gas Coordinators, Operators and Maintenance Technicians employed by the employer at its Area Work Centers located in Waterbury, Connecticut; but excluding all other employees, and guards, professional employees and supervisors as defined by in the Act. Recognition is granted pursuant to the Certification of Representatives of the National Labor Relations Board in case number 01-RC-199614 dated June 30, 2017.

2. If at any time during the term of this Agreement, or any renewals or extensions hereof, the Company shall recognize the Union as the exclusive bargaining agent of the employees in any job classification in addition to those specified in Section 1.(a) of this Article, all of the provisions of this Agreement shall become applicable to the employees in such job classification as though such job classification had been originally designated herein, except that the rates of pay applicable to such job classification shall be such as may be agreed upon between the Company and the Union.

3. The following provisions will apply to employees in job classifications covered by this Agreement:

3.(a) Employees who are members of the Union or its predecessor Union on December 1, 2011, or who later become members, will as a condition of employment be required to maintain their membership for the duration of this Agreement.

3.(b) Employees hired or transferred into the bargaining unit will be required as a condition of employment to join or make application to join the Union thirty days from their date of employment or transfer or thirty days after the date this Agreement is executed, whichever is later. Employees hired for temporary summer assignment are excluded from this requirement for an additional sixty-day period in that summer and in any subsequent summers of temporary employment from their date of employment.

3.(c) If the Union refuses to accept as a member or refuses to continue the membership of any employee for any reasons other than the failure to pay or tender payment of uniformly required initiation fees and periodic dues, the employee shall be exempt from the provisions of (a) and (b) above. It shall be the responsibility of the Union to solicit the membership of employees who are required to join the Union under Section 3.(b). Should the Union fail to solicit the membership of an employee within the time period prescribed in (b), that employee shall be exempt from the provisions of (b) until the first day of the calendar month within which the employee's membership is first solicited by the Union.

3.(d) Should an employee fail or refuse to join the Union or maintain membership therein as hereinbefore provided, the Union may request the Company to discharge such employee. The request shall be submitted in writing to Labor Relations. Two weeks from the date of receipt of the request, unless the Company has notified the Union that the matter is in dispute, the employee will be discharged, provided that, if during the two week period the employee complies with the Union membership provisions of this Section 3., the Company will not be obliged to discharge the employee.

3.(e) If a dispute arises under Section 3.(d) hereof concerning the discharge of an employee, - Labor Relations and the respective Business Manager of the Union shall ascertain the facts and endeavor to settle the dispute. Pending settlement of the dispute, the Company will not suspend or discharge the employee concerned. If the dispute is not settled within thirty calendar days, (subject to extension by mutual agreement), from date of receipt of the Union's written request for discharge as provided in Section 3.(d) hereof, either party may, within the next ten calendar days following the thirty calendar day period, submit the dispute to Arbitration for final settlement as provided in Article IV.

4.(a) Each Local Union shall notify the Company in writing of its required amounts of membership initiation fees and monthly dues. In the event such fees or dues are to be changed during the term of this Agreement, the Local Union concerned shall give the Company written notice in advance of such change. Notices to the Company under this provision shall be directed to Labor Relations.

4.(b) Upon receipt of individual written authorization and assignment from employees in job classifications listed in Appendix "A", the Company will make a single deduction for the required initiation fee and in addition will deduct required Union dues from the employees' wages on a pay period basis and remit monthly to the Local Union Officers designated in writing by each Local Union. Authorizations shall be submitted in the form and language shown in Appendix "B" attached hereto and made a part of this Agreement. If an employee is transferred out of the bargaining unit, the employee's authorization for the payroll deduction of Union dues will automatically become void at the end of the calendar month within which the employee transfer is effective.

4(c.) The Company will deduct from the wages of each employee on a pay period basis from whom it receives written authorization, voluntary contributions to the Unions' COPE fund. Such donations shall be remitted to the financial secretary of the Union monthly, along with a list of employees and amounts so deducted.

5. It is agreed that neither the Company nor the Union will discriminate against any employee in the application of any of the terms of this Agreement because of race, color, religion, sex, national origin, age, ancestry, marital status, familial status, sexual orientation, disability/handicap, military status, genetic information, Vietnam era veterans, disabled veterans, and other veterans.

ARTICLE II
THE FUNCTIONS OF MANAGEMENT

In order that the Company may discharge its obligations as a public utility and furnish dependable and satisfactory service to its customers, it is mutually agreed that the Company shall exercise the functions of management, including among other things the determination of the number and the qualifications of the employees required to perform the work, the direction of the working forces, the right to hire, suspend or discharge for just cause, promote, demote, transfer, discipline and lay off employees. In exercising these rights the Company will act in accordance with the provisions of this Agreement.

ARTICLE III
GRIEVANCES

Any complaint made by an employee to the employee's immediate Supervisor concerning the employee's wages, hours or working conditions which is accompanied by a request for an answer will be considered as a grievance for the purpose of this Article. Grievances should be presented as promptly as possible following the incidents that caused them. Employees will be allowed necessary straight time off without loss of pay to attend scheduled grievance meetings. In addition to the time allowed off above, the Assistant Business Manager or, in the Assistant Business Manager's absence, the Assistant Business Manager's designated representative, will, upon specific request, be allowed necessary straight time off to assemble data for scheduled grievance meetings. Additional reasonable time off without pay will be allowed for a reasonable number of representatives to attend state, regional, and national conventions.

In order that any grievance by an employee or group of employees may be promptly and satisfactorily settled, the procedure outlined below shall be followed:

Step One

The aggrieved employee or employees in person, who may be accompanied by a Steward, Business Manager or Assistant Business Manager, shall present the grievance to the Supervisor as promptly as possible following the incident which caused it. The Supervisor will endeavor to settle it by giving an answer as promptly as possible and within seven calendar days of the date of presentation. If an answer is given and accepted in this Step, the grievance is to be considered closed. If an answer is not given, or is not acceptable, it may be taken to Step Two within fifteen calendar days, (subject to extension by mutual agreement), from date of presentation in this Step.

Step Two

The Business Manager or Assistant Business Manager shall forward the grievance in writing to the Manager concerned stating its nature, specifying the provision(s) of the Agreement on which it is based and giving a brief description of the circumstances causing it. The Manager concerned or the Manager's designated representative will investigate the grievance and answer it as promptly as possible. If a meeting is held in this Step, it shall be attended by the Business Manager or Assistant Business Manager who presented the grievance, the Manager concerned or the Manager's designated representative, other management representatives if concerned and, at the option of either the Company or the Union, the aggrieved employee(s) shall be present. At this Step in the procedure, there also may be present either an International Representative of the Union in an advisory capacity to the Local Union, or a representative of the Human Resources Department of the Company, or both.

In the event a Business Manager has factual and reasonable evidence that the Company has violated a provision(s) of this Agreement and the employee(s) affected fails to present a grievance in Step One, then the Business Manager, having first notified the employee(s) affected, may initiate a grievance in this Step at any time within a period not in excess of thirty calendar days, (subject to extension by mutual agreement), from the date of the claimed violation.

If a grievance is not settled within ten calendar days from date of receipt in this step, it may be taken to Step Three within twenty-five calendar days, (subject to extension by mutual agreement), from date of such receipt.

Step Three

The Business Manager shall forward a copy of the written grievance identified as being in Step Three, to Labor Relations. The latter shall refer the grievance to a joint committee consisting of:

(a) three representatives appointed by the Company, and

(b) three representatives appointed by the Union, one shall be the Business Manager of the Local Union concerned, and/or the Business Manager's designated representatives. In addition an International Representative may be present in this Step in an advisory capacity to the Local Union.

The Joint Committee shall endeavor to meet within fifteen calendar days from the date the grievance is received by Labor Relations. It shall be the duty of the Joint Committee to investigate all of the circumstances surrounding the grievance and endeavor to settle it on a factual basis, including the method and manner of complying with decision.

At this Step in the grievance procedure, a "Union Grievance" may be initiated. Such a grievance shall consist of a claim or charge by the Union in writing, that a specified provision of this Agreement, involving the status, rights, privileges, or duties of the Union as an organization has been violated. If a "Union Grievance" is presented, it shall be forwarded in the manner specified in the first paragraph of this Step.

If the grievance is not settled within thirty calendar days from the date of receipt in this Step, the Union may take it to arbitration in accordance with and subject to the provisions of Article IV hereof within forty calendar days, (subject to extension by mutual agreement), from the date of receipt in this Step.

ARTICLE IV

ARBITRATION

1. If a grievance is not settled in Step Three of Article III, and provided the grievance is a dispute involving the interpretation, application or compliance with any provision of this Agreement, the Union may, within the time limits specified in Article III, Step Three, submit the grievance to the American Arbitration Association for arbitrator selection and hearing conducted under its rules then prevailing. The decision of the arbitrator shall be final and binding on both the Union and the Company for the duration of the Agreement. The expenses of the arbitrator shall be borne equally by the Union and the Company. This Section is subject to the limitations set forth in Sections 2. and 3. of this Article.

2. The parties recognize the proper role of the arbitrator as one of deciding issues submitted by the parties under this Article, after a full and fair hearing, and not as being invested with any authority to participate in matters of collective bargaining.

3. It is understood and agreed that proposals to add to or change this Agreement shall not be arbitrable and that no proposal to amend or terminate this Agreement may be referred to arbitration under this Article.

ARTICLE V
SENIORITY

CLERICAL CLASSIFICATIONS

In the application of seniority, one new separate bargaining unit is recognized and all provisions of seniority and related matters apply separately. Union job postings will be posted simultaneously for union and non union employees. Language on the job posting will reflect that union employees will have preference for union positions. Preference for union postings will be with the respective bargaining unit first, secondly the other bargaining unit and thirdly the system (non union).

TECHNICIANS A & B

In the application of seniority, one new separate bargaining unit is recognized and all provisions of seniority and related matters apply separately. Union job postings will be posted simultaneously for union and non union employees. Language on the job posting will reflect that union employees will have preference for union positions. Preference for union postings will be with the respective bargaining unit first, secondly the other bargaining unit and thirdly the system (non union).

CONSTRUCTION TECHNICIANS

In the application of seniority, one new separate bargaining unit covering the Construction Technicians is recognized and all provisions of seniority and related matters shall apply separately. Union job postings will be posted simultaneously for union and non union employees. Language on job postings will reflect that union employees will have preference for union postings. Preference for union postings will be given in the following order: 1) the respective bargaining unit; 2) the other White Book bargaining unit; and 3) all other company employees (non-union and non-White Book).

Seniority which employees accumulate is of two types:

(a) Total length of continuous time served with the Company shall be known as "Company Seniority."

(b) Except as modified elsewhere in this Agreement, total length of time served within a job classification shall be known as "Classification Seniority."

In the application of seniority, as defined in paragraphs (a) and (b) above, to employees having equivalent Classification Seniority, greater Company Seniority shall prevail and when both Classification Seniority and Company Seniority are equivalent, greater seniority shall prevail for the employee having the earlier birth date. The application of seniority as herein provided shall not be applied so as to conflict with any established seniority relationships existing prior to June 1, 1963.

New employees, other than temporary employees, shall be regarded as probationary until they have worked continuously for six months during which period they shall have no seniority status. Any employee who has been continuously employed during their probationary period as defined above shall become a regular employee at the end of the probationary period and the employee's seniority shall start from the date of hiring. Employees hired on a temporary basis for special projects that require not more than twelve months to complete shall acquire no seniority status during such employment. If a temporary employee is retained as a regular employee, the employee's Company Seniority shall start from the date of hiring and the employee's Classification Seniority shall start on the date the employee became a regular employee. Temporary employees must comply with Article I, Section 3. A regular employee shall

lose seniority status if the employee resigns voluntarily or is discharged for just cause or is laid off for periods in excess of those specified in Section 4. of this Article. Where used in this Article the words "operating area" describe designated areas of Company operations for which the immediate responsibility is directly assigned to an individual Manager, Superintendent or other in charge. Appendix "C" attached hereto shows a list of designated areas of Company operations which define "Local" seniority areas for application of the provisions of this Article.

LNG CLASSIFICATIONS

In the application of seniority, one new separate bargaining unit is recognized and all provisions of seniority and related matters apply separately. Union job postings will be posted simultaneously for union and non-union employees. Language on the job posting will reflect that union employees will have preference for union positions. Preference for union postings will be given in the following order: 1) the respective bargaining unit; 2) the White Book bargaining unit; and 3) all other company employees (non-union and non-White Book).

Promotion

1.(a) Employees will be given preference for training to qualify for promotion within the bargaining unit in descending order of Classification Seniority within normal sequences of promotion on an operating area basis. Exceptions to such preference may be made only in (1) temporary situations where assigning a more senior employee would involve short notice change of a normal work schedule or unreasonably interfere with the conduct of a particular job assignment or (2) when a senior employee either has qualified previously for promotion or has demonstrated the inability to do so and has been advised accordingly by the Company **or (3) for LNG employees based on availability and/or seasonality of the processes**.

1.(b) When promoting an employee to fill a vacancy in a higher job classification within the bargaining unit, the Company will give first consideration to the qualifications of the employee having greatest Classification Seniority in the normal sequence of promotion on an operating area basis. If this employee is qualified as evidenced by skill, efficiency, knowledge, ability and acceptable performance in training, the employee will be given the promotion. If the employee having greatest Classification Seniority is not qualified, the remaining employees will likewise be considered for the promotion in the order of greatest Classification Seniority on an operating area basis. When no employee on an operating area basis is qualified, Classification Seniority will be applied secondly on a division basis, and thirdly on a Companywide basis.

1.(c) Vacancies in the bargaining unit, other than Helper or equivalent job classifications or classifications covered by the Time- Merit Progression Program which are to be filled by promotion will be filled within two weeks from the date of the vacancy excepting in situations when the employee who is to fill a vacancy is temporarily absent from work or requires additional time to complete necessary training. If it is determined that no vacancy exists, the Company will advise the Business Manager of the Local Union concerned in writing.

1.(d) The Company will give preference to its regular bargaining unit employees over hiring new employees when making placements in job openings within the bargaining unit. Notices of available job openings, other than those to be filled by application of any other provision(s) of this Agreement, will be posted on bulletin boards throughout the Company, and a copy will be sent to the Business Manager of each Local Union. Each bulletin board posting will be for a period of not less than seven (7) calendar days during which period interested employees may apply in writing for reassignment to the posted job opening by use of a reassignment application form provided by the Company. The Business Manager, Assistant Business Manager or Steward may submit a reassignment application in the above manner on behalf of an employee who is absent during the seven-day period by reason of vacation, short-term illness or short-term excused absence. Promptly following the end of a posting period each applicant will be notified within 15 days following the end of that posting period whether or not their application has been accepted, and if rejected, the reason therefore. The Company's determinations of the qualifications of employees applying for reassignment under this Section 1.(d) will be made on the same basis as for hiring new employees. In the event two or more employees with basically equal qualifications apply for one job opening, preference for placement will be determined by greater Company Seniority. If reassign-

ment is postponed following notification of acceptance, the employee's classification seniority will be adjusted upon reassignment to the starting date of the first full week following the date of the acceptance notice.

1.(d.1) Regular Employees who have been transferred or reassigned prior to June 1, 1979 under Sections 2.(a) or Sections 3, 3.(a) or 3.(b) or rehired under the provisions of 4.(b) of this Article will be considered as having greater Company seniority within the employee's former local seniority area for purposes of Section 1.(d).

If more than one such Employee applies for the same job posting, greater Company seniority will be the determining factor. Such Employee(s) will receive this consideration only if the Employee(s) notes on the job posting application that the employee is applying under this Section of Article V. Further, the Employee(s) affected will be allowed this seniority consideration only until the employee has been selected for one job opening under these provisions. An employee selected for a job posting under this Section 1.(d1) will have the employee's rate established in accordance with Section 2.(d) of this Article V.

Applicants who are selected for job postings to classifications covered by Time Merit Progression Programs under this Section will be considered for reinstatement rights under the provisions of Section 3.(e) or 4.(a) of this Article for a period of up to two (2) years from the date of transfer. The Company will endeavor to reassign the employee as soon as possible but will not hold him/her greater than sixty (60) days. The sixty (60) day hold will be the exception, not the rule.

Reassignment, Layoff and Demotion

2. If at any time Company operations require a reduction of the existing working forces, employees in the operating areas affected will be subject to reassignment in the order of least Company Seniority and in reverse sequence of job progression within the job classifications affected. The Company will reassign employees entitled to reassignment to job classifications for which they are qualified and in accordance with the procedure outlined below:

2.(a) An employee subject to reassignment under the provisions of Section 2. or displaced by the application of this Section 2.(a), may at the employee's option and to the extent the employee's Company Seniority exceeds that of other employees,

(1) either displace the employee having least Company Seniority in the same job classification within the division, or

(2) displace the employee having least Company Seniority in the same job classification within the Company, or

(3) displace the employee having least Company Seniority in a lower job classification within the employee's normal sequence of job progression within the operating area, or

(4) displace the employee having least Company Seniority within the operating area.

If an employee subject to reassignment has insufficient Company Seniority to exercise provision (1) or (3), then the employee may

(5) displace the employee having least Company Seniority in a lower job classification within the employee's normal sequence of job progression within the Division, or within the Company, or

(6) displace the employee having least Company Seniority within the Division.

If an employee subject to reassignment has insufficient Company Seniority to exercise provisions (1), (2), (3), (4), (5) or (6), then

(7) the employee may displace one of the five employees having least Company Seniority within the Company.

Union representatives shall be the last to be laid off and the first to be rehired in their department (Distribution, or Customer Service, etc.) in their operating area.

2.(b) An employee subject to reassignment under the provisions of Section 2. or displaced by the application of Section 2(a) of this Article who has insufficient Company Seniority to entitle the employee to reassignment or in lieu of displacing another employee, may elect to be laid off with recall privileges as outlined in Section 4.(b) of this Article.

Prior to being presented with options, an employee subject to reassignment under the provisions of Section 2. or displaced by the application of Section 2.(a), of this Article may at the employee's option, after giving the Company at least one weeks' notification, elect to be laid off with recall privileges as outlined in Section 4.(b) of this Article.

2.(c) In the event an employee subject to reassignment does not have sufficient Company Seniority to entitle the employee to job placement, the employee may be laid off with recall privileges as outlined in Section 4.(b) of this Article.

Any employee who has completed one or more years of continuous service and who is laid off because of the permanent elimination of one or more jobs shall be given an allowance of forty hours' pay at the employee's straight-time hourly rate for each full year of continuous service with the Company. For any such employee who is fifty years or more of age, the above-mentioned allowance will, instead of forty hours, be sixty hours if the employee has completed at least fifteen years of continuous service, or eighty hours if the employee has completed at least twenty-five years of continuous service. Any laid off employee or employee identified to be laid off, who obtains employment with any of the system companies, will not be entitled to terminal pay. Any such employee who accepts terminal pay will thereby relinquish all other rights under this Agreement and will not be eligible for recall under Section 4.(b) of this Article V. Any employee who accepts any position or who is offered a position similar to the position the employee held with the Company prior to the sale or lease, or in which the employee has had experience, the wages and benefits for which are reasonably comparable to those earned prior to such sale or lease, with this Company or with the purchaser or lessor, shall not be eligible for severance pay. An employee so affected who has reached age fifty-five may, in addition to severance pay, make arrangements for applicable annuity benefits under the then existing Annuity Plan.

2.(d) When Company operations require other than a temporary transfer or reassignment of employees under the provisions of Section 2 of this Article to a job classification in which the employee is unskilled or inexperienced, the employee will be given training on the job and allowed a reasonable period of time to develop sufficient skill and ability to perform satisfactorily in the employee's new job classification.

An employee who is reassigned to a job classification with a lower hourly starting rate of pay than the employee's present hourly rate a special basic rate of pay will be established for the employee in the following manner:

A. For an employee with less than five years of continuous service:
   (1) If the employee's present rate is greater than the maximum rate of the employee's new classification, the employee will be paid the maximum rate of the new classification.
   (2) If the employee's present rate is less than the maximum rate of the employee's new classification, the employee will retain the employee's present rate in the new classification until the employee is qualified for advancement.

B. For an employee with five years but less than fifteen years of continuous service:
   (3) If the employee's present rate is greater than the maximum rate of the employee's new classification, twenty-five percent of the difference between the employee's basic rate immediately preceding reassignment and the maximum basic rate of the lower job classification to which the employee is reassigned will be added to the rate for the lower job classification.
   (4) If the employee's present rate is less than the maximum rate of the employee's new classification, the employee will retain the employee's present rate in the new classification until the employee is qualified for advancement.

C. For an employee with fifteen or more years of continuous service:
   (5) If the employee's present rate is greater than the maximum rate of the employee's new classification, fifty percent of the difference between the employee's basic rate immediately

preceding reassignment and the maximum basic rate of the lower job classification to which the employee is reassigned will be added to the rate for the lower job classification.

(6) If the employee's present rate is less than the maximum rate of the employee's new classification, the employee will retain the employee's present rate in the new classification until the employee is qualified for advancement.

Any special rate established under the terms of subsection (3) or (5) of this provision will thereafter not be subject to any rate or general wage adjustments until such time as the maximum rate for the lower job classification equals or exceeds the employee's special rate.

2.(e) If it is definitely established that a regular employee is physically incapable of performing the duties of the employee's assignment, the Company will, in accordance with its past practice, whenever possible and with due consideration given to the Company Seniority of all employees affected, reassign such employee to an available job for which the employee is qualified at a rate which will result in a minimum reduction from the employee's former rate.

2.(f) If an employee is demoted or assigned to a lower job classification or hourly rate of pay (1) at the employee's own request, (2) for disciplinary reasons, (3) for incompetence or (4) because of physical inability to perform the duties of the employee's assignment, the employee's Classification Seniority for the purposes of promotion will begin on the date of the demotion. An employee who is demoted under item number (4), above, will retain the employee's Classification Seniority in the employee's former classification for the purpose of reinstatement as set forth in Section 4.(a) of this Article. Any employee desiring assignment to a lower job classification or hourly rate of pay for a purpose other than covered by Section 1.(e) of this Article shall make written request to the Manager or Superintendent concerned, with duplicate copy to the Business Manager of the Local Union having jurisdiction over the location involved. Such written request shall state that the employee understands the Classification Seniority provisions of this Agreement.

Transfer

3. When it is necessary for the Company to transfer an employee from one operating area to another under circumstances other than those outlined in Sections 2., 3.(a) or 3.(b) of this Article, the Company shall offer the transfer to qualified employees in descending order of Classification Seniority in the job classification affected in the operating area from which the transfer is to be made provided first that Section 1.(b) is complied with on operating area basis.

3.(a) If at any time there is an excess number of employees in a job classification which is to be retained in an operating area or division and concurrently there is a vacancy in the same job classification in another operating area the Company may, rather than apply Section 2 of this Article, transfer a qualified employee from the operating area where there is an excess to the operating area where the vacancy exists provided first that Section 1.(b) of this Article is complied with on an operating area basis. Under these circumstances the Company shall offer the transfer to qualified employees in descending order of Company seniority in the job classification affected, from the operating area where the excess number exists to the operating area where the vacancy exists. If no employee accepts the transfer, the least senior of the employees affected, will be subject to provision (2) of Section 2.(a) of this Article except that when the transfer is from one division to another the employee may displace the employee having least Company Seniority in the same job classification within the division where the employee is employed. Any employee displaced from the same job classification may accept transfer to where the vacancy exists or exercise provision (2) of Section 2.(a) or elect to be laid off with recall privileges as outlined in Section 4.(b) of this Article. Any employee displaced by the application of provision (2) of Section 2.(a) will, if qualified, be required either to accept the promotional transfer or to be laid off with recall privileges as outlined under Section 4.(b). If an employee displaced by this procedure is not qualified for promotional transfer the employee will be subject to provision (3) of Section 2.(a).

3.(b) If at any time Company operations require permanent elimination of a job classification or permanent reduction of the number of employees or both in an operating area, under conditions not provided for under Sections 3. or 3.(a) of this Article, and requirement to fill existing or contemplated vacancies elsewhere can reasonably be coordinated with the elimination or reduction, the employees

where the job elimination or reduction is to be made will be offered opportunities, consistent with their respective qualifications and seniority, either to remain in their present operating area in job classifications remaining available there or to be reassigned to fill available vacancies elsewhere. Under these circumstances offers for available jobs will be made in descending order of Company Seniority to (1) accept promotional transfer, or (2) remain in the present operating area, or (3) accept reassignment to a different job classification and operating area, or (4) in lieu of applying provisions (1), (2) or (3) of this Section 3.(b) be laid off with recall privileges as outlined under Section 4.(b) of this Article. If the application of provisions (1), (2) or (3) above would result in less favorable job placement for an employee than reassignment under Section 2.(a), then Section 2.(a) will be applicable for that employee. For the purpose of coordinating the permanent elimination of a job classification or the permanent reduction of the number of employees in an operating area with requirement to fill existing or contemplated vacancies elsewhere the provisions of Sections 1.(b) and 1.(c) of this Article will not be applicable and the Company will give written notice of intent to the Business Manager of the Local Union concerned.

3.(c) If an employee is reassigned under provisions (2) or (3) of Section 3.(b) of this Article to a job classification in which the employee is unskilled or inexperienced, the employee will be given training on the job and allowed a reasonable period of time to develop sufficient skill and ability to perform satisfactorily in the employee's new job classification. When by application of provisions (2) or (3) of Section 3.(b) an employee with five or more years of Company Seniority is reassigned to a job classification with a lower hourly rate of pay than the employee's former hourly rate a special basic rate of pay will be established for the employee by application of the formula set forth in Article VI, Section 3.(a) of this Agreement. Should such an employee subsequently be promoted to a job classification with a higher hourly rate of pay the employee's basic rate will be the starting rate for the higher job classification or the special basic rate as determined under Article VI, Section 3.(a), whichever is higher. When an employee with less than five years of Company Seniority is reassigned to a job classification with a lower hourly rate of pay by application of provision (2) or (3) of Section 3.(b) the employee will be paid the maximum hourly rate for the lower job classification.

3.(d) In situations when the application of the seniority principles of this Article V either involve groups of employees or involve two or more separate operating areas, the Company may, at its discretion, satisfy its obligation to contact affected employees by giving written notice. Such written notice shall contain information pertinent to the situation at hand and be posted on bulletin boards in the operating areas where the employees concerned are based. It shall remain posted for a period of not less than one calendar week before the Company takes action affecting the status of employees having direct and reasonable interest in the stated situation. A copy of any written notice under this Section 3.(d) will be forwarded to the Business Manager(s) of the Local(s) concerned and, when it appears desirable to the Company to insure adequate communication, copies may be forwarded to each employee having direct and reasonable interest in a stated situation.

3.(e) When, for reasons other than the employee's own request, an employee is transferred or reassigned under Sections 2.(a) or 2.(b) or Sections 3., 3.(a) or 3.(b) the employee will retain the employee's Classification Seniority in the employee's former operating area and job classification for purposes of reinstatement and promotion and, if reassigned to a lower job classification within the employee's normal sequence of progression, the employee's Classification Seniority in the lower job classification will be established in reverse sequence of normal progression. When an employee is required by the Company to transfer to another operating area, or is transferred to another operating area for the mutual convenience of the employee and the Company, and no change in job classification is involved, the employee's Classification Seniority in the employee's former and new operating areas will be accumulative.

Employees reassigned since January 1, 1978 to another classification by the application of Section 2.(a) of this Article and who are later reinstated to their former classification, will have their Classification Seniority adjusted for a period up to the employee's recall rights had the employee elected layoff to reflect continuous former Classification Seniority.

3.(f) When an employee is transferred or reassigned from one operating area to another at the employee's own request, the employee's Classification Seniority in the employee's new assignment will begin on the effective date of the transfer and the employee will forfeit the employee's Classification Seniority in all job classifications the employee has held prior to the transfer.

3.(g) An employee who is transferred out of the bargaining unit and who is later transferred back into the bargaining unit will maintain continuous Company Seniority for the purposes of this Article and the employee's Classification Seniority will be determined in accordance with the provisions of this Article. Effective June 1, 1975 Company Seniority for purposes of layoff and transfer only will be the total length of time the employee has served in bargaining unit classifications.

Reinstatement and Recall

4.(a) Should opportunity for reinstatement to a higher job classification occur after an employee has been transferred or reassigned to a lower job classification for reasons other than the employee's own request or after demotion because of physical inability to perform the duties of the employee's assignment in accordance with provision (4) in Section 2.(f) of this Article, the employee involved will be reinstated in the higher job classification provided the employee is then able and willing to perform its duties. If more than one employee is involved, reinstatement to the higher job classification will be offered in reverse order to the previous reassignments.

4.(b) Employees with three or more years of continuous service who are laid off will be entitled to recall for a period of three years from the date of layoff. Employees laid off with less than three years but more than six months of continuous service will be entitled to recall for a period of one year from date of layoff. Employees with recall rights will be considered as regular bargaining unit employees for purposes of Article V, Section 1(d).

A certified letter to the Employees' last known address with a copy of the job posting and a reassignment application will be considered proper notification for purposes of this section. The completed reassignment application must be returned to the Company by certified mail within (10) calendar days from the date of the Company's mailing of the posting. In the event an employee is recalled the employee must be available, able, qualified to work and return to work within two weeks.

Laid off employees who are re-employed within their recall period will maintain continuous Company and Classification Seniority status during the period of layoff for the purpose of this Article and the starting rate of pay will be established according to the provisions of Section 2.(d) of this Article.

Adjustment of Classification Seniority

5. If a qualified employee is bypassed for a promotion in normal sequence to a higher job classification because of absence due to illness at the time the promotion is made and the employee is subsequently promoted to that higher job classification, the employee's Classification Seniority will be adjusted to place the employee in the relative status the employee would have attained in the higher job classification had the employee not been bypassed. If an employee is bypassed for promotion under these circumstances, the Company will advise the Business Manager of the Local Union concerned.

5.(a) In order to prevent an employee from being bypassed in the employee's normal sequence of promotion on or after June 1, 1972 within the operating area by (1) the lateral transferring of an employee from another seniority area; (2) an employee being accepted for a job posting at other than the starting rate; or (3) by the hiring of an employee at other than the starting rate or starting classification within the promotional sequence; an employee will retain the same Classification Seniority date the employee is assigned at the helper or starting classification within the sequence up through attaining journeyman, but not including Lead or Chief Classifications where applicable. This will also apply to employees presently classified at the starting classification within the promotional sequence on June 1, 1972.

Employees who were classified journeyman prior to June 1, 1972 will have the number "2" immediately preceding their classification seniority date and will show primary seniority.

Employees in Military Service

6. The Company will reinstate without loss of Company Seniority employees, other than temporary, who have been granted leaves of absence for military service in accordance with federal statutes applicable thereto. In order to effect reinstatement it may be necessary to reassign, transfer or lay off other employees.

Probationary employees, who are reinstated, shall have their Company Seniority adjusted to the hiring date upon completion of their six-month probationary period. Service immediately preceding and immediately following the leave of absence shall be credited to the six-month probationary requirement.

Adjustment of Veteran's Seniority

7. If a regular employee is bypassed for a promotion in the employee's normal sequence of job progression because of military leave of absence and the employee is subsequently promoted to the higher job classification, the employee's Classification Seniority will be adjusted to place the employee in the relative status the employee would have attained in the higher job classification had the employee not been bypassed.

Seniority Lists

8. The Company will prepare and post on bulletin boards seniority lists showing the employee's name, job classification, date employed, Classification Seniority date and date classified. The seniority lists will show the relative Classification Seniority of employees in each job classification on an operating area or division basis.

ARTICLE VI
JOB CLASSIFICATIONS

1. Each employee will be assigned a job classification, the duties of which the employee is competent to perform and which generally reflect the employee's normal work. Such job classification shall not preclude assignment of the employee for limited periods on work other than that reflected by the employee's job classification in emergencies, for sickness or vacation relief, to meet the Company's service requirements, when the employee's normal work is slack or while the employee is being trained to better fit the employee for advancement in grade as vacancies occur.

2.(a) An employee performing the duties of a higher job classification than the employee's own within the bargaining unit shall be paid the maximum rate of the higher job classification for all hours so-assigned on one day, provided the employee works one or more hours in the higher job classification on that day. Temporary upgrades to Chief and Lead will be assigned according to the greater Classification Seniority among employees on duty in the job classification(s) affected. This provision will not apply to an employee who is performing the duties of a higher job classification while being trained under the direction of a qualified employee. Employees who are assigned to perform the duties of a higher job classification under this provision shall not acquire Classification Seniority in the higher job classification while so-assigned.

2.(b) When it is determined by the Company that an employee in a lower job classification who has been performing the duties of a Chief, Automotive Equipment Mechanic or Area Stockhandler job classification is qualified for promotion, the employee will upon promotion or upgrading be paid at the maximum rate for that classification. When an employee is promoted in accordance with the above, the one year probationary period will apply to the maximum rate.

When determination of qualifications has not been made prior to the promotion, the employee will upon promotion to such classification be credited with the amount of time served at the probationary wage rate of the job classification during the two year period immediately preceding the employee's promotion.

2.(c) If during a Supervisor's absence from work an employee in a Chief job classification is temporarily assigned to direct work forces normally directed by a Supervisor, the employee will be paid 7% of the applicable Chief's rate in addition to the employee's basic straight-time hourly rate for all hours so-assigned on one day provided the assignment is for one or more hours on that day. If a classification other than Chief is assigned, the employee will be paid the applicable Chief rate in addition to the 7% of the applicable Chief's rate for all hours so-assigned on one day provided the assignment is for one or more hours on that day.

2.(d) When crews headed by Chiefs are combined, and in the absence of a Supervisor, a single Chief is assigned to direct the work performance of the crews, the senior Chief will be upgraded to Supervisor, and the employee will be paid 7% of the applicable Chief's rate in addition to the employee's basic straight- time hourly rate for all hours so-assigned on one day provided the assignment is for one or more hours on that day.

2.(e) If during a Storekeeper's absence from work a Stockhandler at the maximum rate is temporarily assigned to conduct the work normally conducted by the Storekeeper, the employee will be paid 7% of the employee's basic straight-time hourly rate in addition to the employee's basic straight-time hourly rate for all hours so-assigned on one day provided the assignment is for one or more hours on that day.

2.(f) If during an Area Stockhandler's absence from work a Stockhandler at the maximum rate is temporarily assigned to conduct the work normally conducted by the Area Stockhandler, the employee will be paid the maximum rate of the Area Stockhandler classification for all hours so assigned on one day, provided the employee works one or more hours in that classification on that day.

2.(g) Meter readers may be temporarily assigned to perform the duties of a collector, as required. If this assignment exceeds a continuous period of one hour, then the employee is entitled for all hours so assigned on one day to be paid at the top of the rate of the collector's rate progression.

3. If it is definitely established (1) that a regular employee is incapable of performing the duties of the employee's job classification because of an injury sustained in the employ of the Company, or (2) that a regular employee having five or more years of continuous service is incapable of performing the duties of the employee's job classification because of a disability or infirmity arising from natural causes and the employee is assigned to a lower job classification within the employee's ability to perform, a special basic rate of pay will be established for the employee as follows:

3.(a) For an employee with less than twenty years of continuous service at the time of reassignment, the special basic rate will be determined by multiplying the difference between the employee's basic rate immediately preceding reassignment and the maximum basic rate for the lower job classification to which the employee is reassigned by the product of five percent times the employee's years of continuous service and adding the amount so-obtained to the maximum basic rate of the lower rated job classification. For an employee with twenty or more years of continuous service there will be no reduction in basic rate when reassigned to a lower rated job classification under this provision. Any special basic rate established under the terms of this provision will thereafter be subject to general wage adjustments made during the term of this Agreement.

3.(b) Should such an employee later qualify for and be promoted to a higher job classification, the employee's basic rate will be the starting rate for the higher job classification or the special rate as determined above, whichever is greater.

3.(c) The above Sections 3.(a) and 3.(b) apply to employees who may be reassigned to a lower rated job classification for reasons stated in Section 3. on or after June 1, 1973.

4. In order that the Union may maintain its records of bargaining unit employees the Company will periodically notify the Union of job classification changes. Such notification will provide the name, job classification and location for each bargaining unit employee hired, reclassified, transferred or separated from the Company. The information will be directed to the Business Manager of the Local Union having jurisdiction over the location involved. If an employee within the bargaining unit is discharged, the Company will notify the Business Manager and the Assistant Business Agent for that specific work group of the Local Union concerned as promptly as possible.

4.(a) If a regular bargaining unit employee is suspended or discharged the local management of the Company will notify the Local Union representative on the same day of occurrence. If requested by the Union, the matter shall be discussed on that day by management representatives and the Local Union in the area concerned.

ARTICLE VII

SCHEDULES, WORKING HOURS, OVERTIME, PREMIUM AND HOLIDAY RATES

1. The Company will prepare and post on bulletin boards schedules of normal work coverage for the employees in various operating areas and divisions of the Company. The purpose of the schedules is to inform the employee of the employee's normal hours of work which shall consist of not more than eight hours per day or forty hours per week. The workweek shall consist of five consecutive days except for shift or scheduled workers. All hours worked in excess of eight hours per day or the basic forty hours per week, or outside of the employee's normal schedule, will be paid for at one and one-half straight-time rates except when other overtime rates, premium rates or holiday rates are applicable as herein provided. The regular rate for purposes of computing overtime compensation shall include only those amounts required to be included under the applicable law.

2.(a) For the purpose of this Agreement, employees are composed of shift, day and scheduled workers. (1) A shift employee is defined as one who works at a seven day operation or service, on a rotating or shift schedule. (2) A day worker is one whose basic workweek is Monday through Friday, or Tuesday through Saturday between the hours of 6 a.m. and 6 p.m. for 8 hours a day. (3) A scheduled worker is an employee, other than a shift worker or day worker, who works according to a schedule of hours at different times of the day or night and/or on different days of the week including Saturdays and Sundays.

2.(b) The Company may establish a "J" schedule (hours other than between 6 a.m. and 6 p.m.) in each of its operating areas; except that two "J" schedules may be established in the Stamford portion of the Norwalk area.

2.(c) If the Company changes or modifies working schedules in an operating area or division of the Company, in a manner which the Union considers arbitrary or unnecessary, the new schedule shall be worked subject to adjustment through the grievance procedure up to and including arbitration.

3. When working conditions permit, regular active employees will be allowed time off at basic straight-time rates on recognized holidays falling on a day within their normal schedule. When a regular employee is required to work on a recognized holiday falling on a day within the employee's normal schedule, in addition to holiday pay at basic straight-time rates, one and one-half straight-time rates will be paid for time worked within the employee's normally scheduled hours and double straight-time rates will be paid for time worked outside the employee's normally scheduled hours.

4.(a) When a recognized holiday falls on a day outside of a regular active employee's normal schedule, the Company at its option will either designate a day off from the employee's normal schedule with basic straight-time pay or pay the employee for the holiday at basic straight-time. When the Company designates a day off from normal schedule, it shall fall within a calendar period of twenty-three days beginning with the second Saturday preceding the calendar week within which the recognized holiday falls. When designating a day off under this provision the Company will endeavor firstly to make such day off be contiguous to another day off or, secondly to occur on a Sunday or, thirdly to occur on a day other than contiguous to another day off or other than on a Sunday. Exceptions to the foregoing sequence may be made to accommodate an employee's request for a designated day off provided the exception does not require a change of normal work schedule for another employee who objects to such schedule change.

4.(b) When a regular employee is required to work on a recognized holiday falling on a day outside the employee's normal schedule, in addition to either the time off or the straight-time pay provision of Section 4.(a), above, one and one-half straight-time rates will be paid for time worked up to eight hours and double straight-time rates will be paid for time worked in excess of eight hours.

5.(a) The schedules of normal work coverage for employees who are assigned as shift or scheduled workers are made to meet the continuous nature of the Company's operations. It is the purpose of the Company to arrange such schedules to conform with the wishes of 60% or more of the employees involved, provided the shifts are adequately covered without unnecessary overtime payments. The job classifications of employees who normally are assigned as shift or scheduled workers are identified by the prefix "S" in the Schedule of Job Classifications and Basic Straight-Time Hourly Rates Appendix "A" of this Agreement.

5.(a.1) A Shift or scheduled worker required to work sixteen consecutive hours that include the eight-hour period immediately preceding the employee's normal schedule and eight hours of the employee's normal schedule will be paid at the applicable premium rate for the sixteen-hour period. Article VII, Section 10(b) will not be applicable for purposes of this Section.

5.(b) Upon request from shift or scheduled workers, the Company may, at its discretion with respect to extended hours of work and the numbers of simultaneous requests or extended periods of exchange, permit such employees to exchange their scheduled hours of normal work coverage within a work week provided the shifts are adequately covered without involving payment of overtime or upgraded rates. When such exchanges of scheduled work hours are permitted, the advance notice requirements of Section 6. of this Article shall not be applicable. No other such exchanges of scheduled hours of normal work coverage will be permitted, except for employees on a Tuesday through Saturday schedule.

5.(c) When an employee in any job classification is assigned to work on an afternoon or night schedule of normal work coverage, a premium of 7% of the employee's basic straight-time rate or $2.00 whichever is greater will be added to the employee's basic straight-time rate for all hours worked within that schedule and including all hours worked contiguous to that schedule. For the purpose of this shift premium provision, afternoon and night schedules of normal work coverage are defined as those which include normal schedule hours of work preceding 6:00 a.m., or following 6:00 p.m. **For LNG employees, afternoon and night schedules of normal work coverage are defined as those which include normal schedule hours of work preceding 6:00 a.m., or following 7:00 p.m. A Garage Mechanic regularly assigned to the second shift shall receive the shift adder for all paid time off.**

5.(d) A premium of twenty-five percent of the basic straight-time rate per hour will be added to the basic straight-time rates for time worked on Sundays on a normal schedule by shift or scheduled workers. This Section 5.(d) will not be applicable to time worked at double straight-time rates under the provisions of Section 13. of this Article.

6.(a) When possible, employees will be given not less than seventy-two hours advance notice of changes in their normal work schedules. In any case of a change of normal work schedule, the employee(s) affected must be advised of the change in advance of the starting time of the new normal work schedule for the purposes of the premium rate and rest time provisions of this Article VII.

6.(b) When an employee's normal work schedule is changed with less than seventy-two hours' advance notice, any time worked within the new normal schedule which was not normal work time under the old schedule will be paid for at one and one-half straight-time rates until the advance-notice period has expired, except when other rates are applicable, and excepted further that when an employee's normal work schedule is changed to provide relief coverage because of sickness or other unexpected absences of employees, forty-eight hours shall be the advance-notice period for application of greater than straight-time rates. An employee may be returned to the employee's previous normal schedule without forty-eight hours' advance notice after serving a relief coverage assignment as described herein.

6.(c) When operating or maintenance requirements make it necessary to change the normal work schedule of a day work employee, (other than a shift or scheduled worker), to an afternoon or night normal schedule, for other than relief assignments to normal schedules of shift or scheduled workers, the employee will be paid at one and one-half times the employee's straight-time hourly rate for all time worked on the afternoon or night normal schedule which was not normal work time on the employee's daytime schedule provided the period of assignment is for three or less consecutive workdays. When the period of assignment is more than three consecutive workdays, the change of normal work schedule will be made in accordance with 6.(b) above. This Section 6.(c) will not be used to change the normal work schedules of day work employees from daytime to afternoon or night normal schedules except when the work to be done is necessitated by operating or maintenance requirements which must be continued on at least a two-shift basis or when it cannot be performed during daytime normal schedule hours. A day work employee may be returned to a daytime normal work schedule without seventy-two hours' advance notice.

6.(d) Whenever possible, employees will request permission for planned absence at least seventy-two hours in advance of such absence.

7. When operating conditions make it necessary for employees to work during their normal schedule lunch period, an alternate lunch period of equivalent time will be designated by the Supervisor. The alternate lunch period normally will be designated to begin not more than one hour before or one

hour after the starting time of the normal schedule lunch period and when so-designated, time worked during the normal schedule lunch period will be considered as a part of the normal schedule workday. When the alternate lunch period is designated to begin more than one hour before or after the starting time of the normal schedule lunch period, that time will be paid at straight time rates and time worked during the normal scheduled lunch period will be considered as outside of the normal scheduled work day and will be paid for at the applicable overtime rates.

8. Insofar as practicable overtime work will be equitably distributed among suitably qualified employees who are in the job classifications in the area in which the work is to be performed. Records of distribution of overtime work will be made available to designated Union representatives upon their request and also posted on a weekly basis.

8.(a) CLERICAL CLASSIFICATIONS

Overtime work will be equitably distributed among suitably qualified employees who are in the job classification in the department in which the work is being performed.

8.(b) TECHNICIANS A & B

Overtime work will be equitably distributed among suitably qualified employees who are in the job classification in the department in which the work is being performed. Assigned work will be completed by technician without regard to seniority.

8.(c) CONSTRUCTION TECHNICIANS

Overtime work will be equitably distributed among suitably qualified employees who are in the job classification in the department in which the work is being performed. Assigned work will be completed by technician without regard to seniority.

9.(a) Whenever possible at least seventy-two hours' notice will be given to employees who are required to work prearranged overtime. For the purposes of this Section 9., prearranged overtime is defined as that for which four or more hours of advance notice has been given. Employees who are unable to report for overtime work will notify the Company as promptly as possible in order that planned work will not be disrupted.

9.(b) Except when assigned to call duty under the provisions of Article X, an employee who reports for prearranged overtime work on a day outside of the employee's normal work schedule will be paid for a minimum of four hours at applicable overtime rates. If an employee assigned under this Section 9.(b) is required to report on the job two or more times on one day, the employee will be paid a minimum of two hours at applicable overtime rates for each time the employee reports and, in addition, the employee will be paid for two hours at basic straight-time rates. When an employee is advised on less than **fifteen** hours' advance notice not to report for such prearranged overtime work the employee will be paid for two hours at the employee's basic straight-time rate. When an employee is assigned to call under the provisions of Article X the employee will be paid for overtime work in accordance with Article X and the provisions of this Section 9.(b) will not be applicable.

9.(c) When an employee reports for prearranged overtime work on a day within the employee's normal schedule, the employee will be paid for a minimum of two hours' work except that when the prearranged overtime is less than two hours and immediately precedes or follows the employee's normal schedule, the employee will be paid for the actual overtime worked at the rate applicable. When an employee is advised on less than **fifteen** hours' notice not to report for such prearranged overtime, the employee will be paid for two hours at the employee's basic straight-time rate except that when the prearranged overtime immediately precedes or follows the employee's normal schedule hours and would amount to less than two hours, the employee will be paid at the employee's basic straight- time rate for the actual amount of prearranged overtime involved.

10.(a) If an employee is required to work outside of the employee's normal schedule for more than one hour during the eight-hour period immediately preceding the starting time of the employee's next normal daytime schedule, (starting between 6 a.m. and 10 a.m.),the employee will, whenever possible, be allowed rest time during that normal schedule without loss of normal wages. The rest time shall be equivalent to the sum of the time worked and any **meal** time **taken in accordance with Article XII** during the above eight-hour period, except that eight hours rest time will be provided if an employee is required to work six consecutive hours during the above 8-hour period and is dismissed before the start of the

normal schedule. When service requirements will not permit allowing all of the earned rest time off during normal schedule, that part worked will, except for holidays, be paid for at double straight-time rates.

If an employee is called out to perform work outside of the employee's normal schedule for more than one hour during the eight-hour period immediately preceding the starting time of a daytime prearranged overtime period, (starting between 6 a.m. and 10 a.m.),the employee will, whenever possible, be allowed rest time during that prearranged overtime period for which the employee will be paid straight-time rates. The rest time shall be equivalent to the sum of the time worked and any **meal** time **taken in accordance with Article XII** during the above eight-hour period. When service requirements will not permit allowing all of the earned rest time off, that part worked will, except for holidays, be paid for at double and one-half straight-time rates.

10.(b) If an employee is required to work beyond sixteen consecutive hours the employee will, whenever possible, be allowed a period of eight hours time off before returning to work. Any part of such time off which extends into the employee's normal work schedule will be paid for at straight-time rates. Time allowed off for meals **(meal time not taken)** will be counted in determining sixteen consecutive hours for the purpose of this Section**, but will not count towards rest time**. When service requirements will not permit allowing as earned rest time off that part which may extend into normal schedule, that part worked during normal schedule will, except for holidays, be paid for at double straight-time rates.

11. If an employee is required to work beyond sixteen consecutive hours, the employee will be paid at double the employee's straight-time rate for those hours worked beyond sixteen, until the employee is allowed eight consecutive hours off. Time allowed off for meals **(meal time not taken)** will be counted in determining sixteen consecutive hours for the purpose of this Section**, but will not count towards eight consecutive hours off**.

12. When meals are furnished by the Company under the provisions of Article XII, Section 5., time allowed off for meals will be paid for at the applicable overtime rates except for the normal scheduled or designated (midday or midshift) lunch period. If a meal is furnished under this provision following the conclusion of the workday, one-half hour eating time at the applicable overtime rates will be paid.

13.(a) A Shift or scheduled worker will be paid double the straight-time rate for all hours worked on Sunday outside the employee's normal schedule.

13.(b) Employees with Sunday as a normal scheduled day off in any calendar week shall be paid double time for work on that Sunday, and at time and one-half for work on the other normal scheduled day off in that calendar week. Employees required to work on a Sunday within their normal schedule in any calendar week shall receive time and one-half for work on the first normal scheduled day off and double time for work on the second normal scheduled day off in that calendar week.

14. When two or more rates may be applicable, the higher rate shall be applied. There shall be no duplication in the application of regular, overtime or premium rates of pay for the same hours worked.

ARTICLE VIII
HOLIDAYS

1. New Year's Day, Martin Luther King Day, Presidents' Day, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day and Christmas Day shall be recognized as holidays. Whenever any of such holiday(s) occur upon Sunday, the Monday next following such day shall be recognized as the holiday, except that for those employees who are required to work that Sunday, as part of their normal schedule, the holiday will be observed on Sunday. Whenever any such holiday(s) occur upon Saturday, the Friday preceding such day shall be recognized as the holiday, except that, for those employees who are required to work that Saturday, as part of their normal schedule, the holiday will be observed on Saturday.

2. In addition to the 10 federal holidays above, employees will be granted two floating holidays during the calendar year based on operational requirements and supervisory approval. The two floating holidays can be used for any reason and are requested by the employee. In the event of a conflict between employees requesting the same date, seniority shall govern. **These two floating holidays must be taken in full eight (8) hour increments.**

ARTICLE IX
VACATIONS

1. Vacation Allowance: Regular employees will be allowed the following vacation periods annually with basic straight-time pay:

(a)(1) For employees with less than one year of service and hired between January 1 and March 31 of the current calendar year will be allowed three weeks of vacation.

(a)(2) For employees with less than one year of service and hired between April 1 and June 30 of the current calendar year will be allowed two weeks of vacation.

(a)(3) For employees with less than one year of service and hired between July 1 and September 30 of the current calendar year will be allowed one week of vacation.

(a)(4) For employees with less than one year of service and hired between October 1 and December 31 of the current calendar year will not be granted vacation for that period.

1.(b) Employees who are expected to complete at least one year of continuous service by December 31 of a calendar year will be allowed three weeks' vacation in that and each succeeding calendar year until eligible for four weeks' vacation under 1.(c) below.

1.(c) Employees who are expected to complete 10 years of continuous service by December 31 of a calendar year will be allowed four weeks' vacation in that and each succeeding calendar year until eligible for five weeks' vacation under 1.(d) below.

1.(d) Employees who are expected to complete 20 or more years of continuous service by December 31 of a calendar year will be allowed five weeks' vacation in that and each succeeding calendar year.

Less than one year of service	Start date January 1 through March 31 – 15 days
	Start date April 1 through June 30 – 10 days
	Start date July 1 through September 1 – 5 days
	Start date October 1 or later – no vacation accrued.
One year but less than 10 years	15 days per year
10 years but less than 20 years	20 days per year
20 years or more	25 days per year

2. Consistent with the Company's service obligations, vacation periods will be scheduled to meet and suit the convenience of employees. Insofar as practicable, employees will be granted preference in selecting vacation periods in descending order of Company Seniority on an operating area or departmental basis as involved. Such preference for selection will be granted in the following order: (1) for all vacation periods under 1(a), 1(b) above, (2) for all third week vacation periods, (3) for all fourth week vacation periods, (4) for all fifth week vacation periods, (5) for any additional vacation days granted because of recognized holidays falling within vacation periods. Each operating area will, not later than April 1st, prepare and post on appropriate bulletin boards schedules showing the time of vacation periods granted. In order that the Company will be able to prepare and post vacation schedules by April 1st, it will be necessary for employees to make their selections of vacation periods promptly. In the event an employee fails to make the employee’s selection within a reasonable period of time, the employee will forfeit the employee’s turn until all other employees involved have made their selections. Should any employee fail to make the employee’s selection(s) by March 1st, the Company, at its discretion, may schedule that employee's vacation period. Changes in any scheduled vacation period may be made with

mutual consent of employees involved and the Company. When choice of vacation period has been granted, it will not be interfered with except in emergencies.

3. When a recognized holiday falls within an employee's vacation period, an additional day of vacation with basic straight-time pay may be scheduled. Whenever possible the additional vacation day will be scheduled to either immediately precede or follow the vacation period during which the recognized holiday occurs or to be consecutive to other scheduled days off. When the Company cannot schedule or the employee does not desire such additional vacation day to be scheduled in the foregoing manner, it may be scheduled for some other available day. If it is determined by the Company that no additional day of vacation can be granted, the employee will be paid an additional day's pay at basic straight-time rate in lieu of the additional vacation day and such day's pay will be included with wages paid for the week during which the recognized holiday occurs.

4. Any employee with more than one year of continuous service who resigns and has given the Company at least two weeks' notice, or who is discharged by the Company, shall, at the time of the termination of the employee's employment, be credited with any vacation pay which the employee has earned but not received, prorated at one-fifth of the employee's total vacation allowance for each full month of full-time, active employment completed between January 1 and June 1 of that year. Any such employee who leaves after June 1 will be entitled to the employee's full vacation or pay for that calendar year.

Any employee who retires after January 1 of any calendar year will be credited with vacation time for any portion of the employee's total vacation allowance for that calendar year which the employee has not already received. However, in the normal case, such employee will be required to schedule the employee's entire vacation prior to the employee's retirement date. An employee retiring on any February 1 who is entitled to more than four weeks of vacation will schedule such vacation during January of that year and in the latter part of December of the preceding year.

ARTICLE X

CALL TIME

1. Employees whose job requirements include assignment to take trouble calls outside of normal scheduled hours will be required, during periods of such assignment, to make themselves available at their reporting base within approximately one-half hour.

Such employees shall upon request be excused from "On-Call"/Shift assignment for a period of not less than twelve months provided the employee has reached 45 years of age**,** has greater department/classification seniority, and the granting and/or continued compliance with the request does not subject the remaining employees on call in the operating area and department to a normal schedule call assignment frequency greater than one out of four.

Any employees so excused will be excluded from the provisions of Article VII, Section 8, but the Company will attempt to equalize scheduled overtime to the extent possible without keeping dual overtime records.

Employees who are excused from "On-Call" shall have 2000 hours added to their overtime hours on the overtime list.

For the purpose of unplanned overtime, the overtime list will be followed as per normal practice.

For the purpose of planned overtime, the administrative 2000 hours figure will be disregarded.

2. Employees who are assigned by the Company to take trouble calls outside their normal schedule hours will be paid (1) one and one-half hours at basic straight-time rates for each such 24 hour period assigned - Monday through Friday, (2) three hours at basic straight-time rates for each 24 hour period on a Saturday, Sunday, or recognized holiday so-assigned. If called upon to perform work, in addition to the call-time pay they will be paid for the time worked at the rate applicable but not less than two hours for

each time called out, except they will be paid not less than three hours at the applicable rate for each time called out between 12:00 midnight and 6:00 a.m.

3. Time worked under Section 2 will be computed from the time of receipt of each call out, and unless the time extends into the employee's scheduled work time, until return to place of receipt of the call out.

4. Employees not assigned to take trouble calls outside their normal schedule hours but who are called out to perform other than prearranged overtime work will be paid at a minimum of two hours the rate applicable for each time called out except they will be paid not less than three hours at the applicable rate for each time called out between the hours of 12:00 midnight and 6:00 a.m. Time worked will be computed as described in Section 3. Travel time will not be considered as time worked for purposes of Article VII, Section 10(a).

ARTICLE XI
SAFETY

1. In job assignments and in assignments to do specific pieces of work only such employees shall be assigned as have the necessary judgment, skill and ability, as generally reflected by their job classifications and normal assignments, to safely perform the work to be done.

2. The Company will issue a copy of its "Accident Prevention Manual" to each employee covered by this Agreement. Any changes in the rules in the "Accident Prevention Manual" shall be a matter of discussion between the Parties before becoming effective. Once the Company has made a decision on any such change in a safety regulation the grievance procedure up to and including arbitration may be initiated to determine if the Company acted reasonably in making such change.

3. The Company will furnish suitable protective equipment and take such other precautions in the interest of safety as conditions require.

4. Respirators, fire extinguishers and first-aid kits will be standard equipment on all trucks where conditions require.

5.(a) Protective equipment such as safety belts, rubber gloves with protectors and welder's equipment will be furnished by the Company. The Company will furnish coveralls or shirt and pants for painting of a nature where normal painting practices fail to prevent for all practical purposes destruction of the employee's clothing. Where required on the job the Company also will furnish for the use of employees, boots, raincoats, rainhats, heat-protective gloves, working gloves and other protective items which it has customarily furnished in the past. In addition, plastic raincoats will be furnished to collectors and rubbers to collectors and Meter Readers. Protective equipment furnished by the Company shall not be used by employees for purposes other than Company work. Such equipment shall normally be stored on Company property or in other locations authorized by the Company where it will be readily available for use when required. Each employee to whom the foregoing equipment is issued will be expected to exercise reasonable care in its use and to guard it against unnecessary damage or loss.

The Company shall repair or replace an employee's clothes which have been damaged or destroyed through an unusual incident on the job related to the employee's work except where the employee has failed to use the protective clothing furnished by the Company. The foregoing shall not apply to an employee's clothes which are worn out, damaged or soiled through daily attrition.

5.(b) Each employee shall provide and own all ordinary hand tools commonly required in the employee's regular assignment. The Company shall provide and own all tools used by a gang or crew such as picks, shovels, crowbars, chain hoists and the like as required. The Company also shall provide and own uncommon and infrequently used equipment and tools such as those of larger size than ordinary hand tools or any special tools required for special purposes, including body belts. In addition, the Company shall provide those hand-tool items which are consumed in use such as files, bits, drills, hacksaw blades and the like.

5.(c) It shall be the responsibility of both the Company and the employees to maintain their respectively owned tools and equipment in good condition at all times and make replacements promptly when required for the safety of employees. The Company shall replace employees' personally owned

hand tools if worn out or broken in normal use on the job. Worn out and broken tools replaced in accordance with this provision shall be turned over to and become the property of the Company.

6. No employee shall be required to perform any hazardous task, with which the employee is not familiar, without proper instruction and close supervision. When working on emergency service restoration, employees shall call the appropriate Company office or person designated by the Company to receive such calls for any assistance that may be required for compliance with safe work practices.

7. Except in emergency, no employee shall be required to do outdoor work when weather conditions might make such work unsafe. An emergency, as referred to in this Agreement, is any unforeseen circumstance which involves the safety of any person, loss of or damage to any property, or interruption of or interference with service or operation.

In case of construction or maintenance forces, who are normally engaged in outdoor work, extreme cold shall be considered as contributing to unsafe conditions. Such extreme cold shall be established when temperature is 10° or lower at the work location. However, they will be expected to do essential work to maintain operations such as outdoor switching and fuel handling.

It will be the policy of the Company to give reasonable consideration to limiting the outside work of Meter Readers, when extreme weather conditions exist, providing the nature of the work will permit postponement.

LNG employees, who are normally engaged in outdoor work, will be expected to perform essential functions including but not limited to snow removal, facility walkthroughs and maintenance in order to maintain operations in all weather conditions.

Employees excused from their normal duties due to this section may be assigned to other work as closely applicable to their work as is available, but need not be confined to work applicable to their specific job classifications.

8. Safety is a joint responsibility of supervisors and employees. The primary function of Supervision is to direct work in a safe manner at all times. Supervisors will endeavor to see that employees observe necessary safety precautions to protect against exposure to danger or in other situations of potential hazard and will direct operations in such a manner that safety precautions are observed. Supervisors will refrain from engaging in manual work when such engagement prevents them from giving adequate attention to their responsibilities as outlined in this Section.

9.(a) Representatives of the Company and the Union shall meet twice annually at the request of either party to discuss matters pertaining to safety. At such times as are mutually agreeable employee representatives designated by the Union, not to exceed a total of ten (10) union employees, five (5) from each Local, will be allowed time off from normal work schedule without loss of basic wages to meet and confer with designated representatives of the Company concerning matters of safety.

9.(b) In the month of November, Local Union Business Managers or Assistant Business Managers may, in their respective jurisdictional areas, nominate one regular bargaining unit employee for membership on each operating area safety committee. Appointment of nominees will be made by the Company with due consideration for safety- committee-membership rotation and cross-section representation of job classifications on each committee.

9.(b.1.) At the request of either party, meetings will take place on a monthly basis to discuss matters pertaining to safety.

ARTICLE XII
EXPENSE ALLOWANCES

1. When required to work distant from the base area, employees will be paid expense and travel allowances as follows:

1.(a) When the Company supplies transportation between the base and work, employees will be allowed travel time at the rate applicable and equal to the time spent en route.

1.(b) When requested to travel by means of specific public transportation, employees will receive the actual fare paid and will be allowed travel time at the rate applicable and equal to the time spent en route.

2. Except when Section 1 or Section 3 of this Article is applicable, an employee required to make the employee's own arrangements to report at a job location outside the employee's base area (except AMR satellite locations – Hartford and Waterbury) will be paid a daily expense allowance as provided under one of the following Plans:

Plan A - If the distance one way is twenty-five miles or less; $28.32 per day.

Plan B - If the distance one way is over twenty-five miles but not over forty miles; $50.18 per day.

Plan C - If the distance one way is over forty miles but not over sixty miles; $57.39 per day.

Plan D - If the distance one way is over sixty miles but not over ninety miles; **$64.82** per day.
When the distance is beyond ninety miles, the employee will be paid mileage at the current NU mileage rate for each mile beyond ninety miles.

(a) If on any one day an employee travels one way to or returns one way from a job location under the provisions of Section 1. of this Article, the employee will be paid an expense allowance on that day under one of the following Plans:

Plan E - If the distance one way is thirty miles or less; $24.34 per day.

Plan F - If the distance one way is over thirty miles; $33.41 per day.

2.(b) For the purposes of the above Plans, distances shall be measured over highways which are reasonably passable and which provide the shortest routes between the employee's base area headquarters and the job locations involved.

2.(c) If an employee is required to report at two or more job locations outside of the employee's base area on one day the employee will be paid the daily expense allowance provided under the Plan applicable to the job location which is the greatest distance from the employee's base area headquarters. In addition, the employee will be reimbursed at the current NU mileage rate one way for the actual distance traveled between the job locations involved on the day. This Section 2.(c) will not be applied to require an employee to report at two or more job locations on one day involving Plans B, C, D, or F except when it is necessary to do so to provide a full day's work or when emergency work is required. Whenever possible, employees will be advised not later than the day preceding requirement to report at a different job location.

3. An employee authorized to make occasional use of the employee's personally owned vehicle for Company business during working hours and for which the employee is not being paid a travel expense allowance under other provisions of this Article will be reimbursed at the current NU mileage rate.

The current NU mileage rate may be changed by the Company at its sole discretion without notice to, or negotiation with the union. Changes or modifications to the rate will also not be subject to the grievance and arbitration procedure.

4. If an employee is required to work overtime and is thereby put to additional expense to obtain a meal, the employee will, except when Section 5. of this Article is applicable, be paid a meal allowance of **$10.00 for meals between midnight and 3:59 p.m. and $20.00 for meals between 4:00 p.m. and 11:59 p.m.**

4.(a) When required to report for work starting one hour or more before the employee's next normal schedule starting time without having been given twelve or more hours' advance notice.

4.(b) When required with twelve or more hours' advance notice to report for prearranged overtime work an allowance will be paid for one meal if the reporting time is two or more hours: (1) before the employee's normal schedule starting time on a day within the employee's normal schedule; or (2) earlier in the day than the employee's starting time on a normal schedule workday if the work is on a day outside the employee's normal schedule; or (3) before the normal schedule starting time of a shift or scheduled worker.

Exception to the twelve hours' advance notice provisions of Sections 4.(a) and 4.(b) will be made when a shift or scheduled worker is required to report for prearranged overtime work on a shift starting at or between the hours of 12:00 Noon and 6:00 p.m. In such situations four or more hours' advance notice will be applicable. When advance notice to report for prearranged overtime work under the above conditions has not been given an allowance will be paid for a midday (midshift) meal also provided such meal is involved.

4.(c) When required to work one-and-one-half hours or more beyond the employee's normal schedule hours.

4.(d) When working a total of more than 15 minutes during the hour that starts at 7 AM, noon or 5 PM (an additional meal allowance will be provided for each additional five hours of overtime worked after 6 PM and before 7 AM).

4.(e) Under the conditions described in this section an employee will be allowed three quarter hour eating time for **the first meal earned after working one-and-one-half hours beyond the employee's normal scheduled hours or after working one-and-one-half hours beyond eight hours of continuous prearranged overtime work and one-half hour for any other meals earned** which the employee will be paid at the applicable overtime rate except for (1) the normal schedule or designated lunch period and, (2) meals eaten during working time. This eating time does not count toward the five hours required for an additional meal when the employees stop to eat.

5. During times of emergency when employees cannot be released long enough to make arrangements for their meals or lodgings, the Company at its expense will make suitable arrangements for same. Under such conditions the provisions of Section 4. of this Article shall not apply. For the purpose of this Section meals will be furnished at five-hour intervals unless a majority of the employees concerned in a work group agree to extend the five-hour interval. (See Article VII, Section 12., concerning time off for meals furnished under this Section 5.).

6.(a) When at the Company's request an employee is reassigned or transferred under the provisions of Article V and a change of residence is required, the employee will be reimbursed for mileage between the employee's former reporting base and the new reporting base and will be reimbursed at the current NU mileage rate.

The following conditions apply to above temporary expense allowance:

(1) The expense allowance will be applied for each day the employee provides the employee's own transportation to travel to and/or from the employee's new reporting base.

(2) The amount of expense allowance will be based upon the actual distance in miles between the former and new reporting bases as measured over streets and highways that are reasonably passable and provide the most direct route.

6.(b) In lieu of the expense allowance outlined in Section 6.(a) the Company may either provide the employee with transportation or require the employee to live in the employee's new base area and make arrangements for the employee's meals and lodgings at Company expense.

6.(c) Payment of the expense allowance or provision of transportation or meals and lodging under this Section 6. will be limited to the first thirteen weeks from the effective date of assignment at the new reporting base or until the effective date of the employee's change of residence, whichever occurs earlier.

7. When in the judgment of the Company the expense allowances provided in this Article are insufficient to cover reasonable expenses it may, upon review of any particular case, make an additional allowance to cover expenses actually incurred.

8. If, during the term of this Agreement, the Company contemplates changing a current practice or privilege, not specifically covered in this Agreement, which, if changed, would result in a significant increase in employees' personal expenses, the Business Manager or an Assistant Business Manager of the Local Union concerned will be advised in advance of the change as soon as practicable. Upon request of either party, Union and Company representatives will meet for discussion of such change.

9. The Company will provide an annual tool upgrade allowance of up to $375.00 per year for Garage Mechanics. The employee must furnish a receipt of purchase for reimbursement documenting the purchase of job specific tools.

Any new or replacement tools required by the Company for performance of any job will be furnished by the Company except that the employee will be responsible for any tools lost or damaged through the employee's own negligence.

New hires and transferees to the Garage Mechanic Classification shall provide and own all ordinary hand tools commonly required in the employee's regular assignment. The Company shall replace employees' personally owned hand tools if worn out or broken in normal use on the job. Worn out and broken tools replaced in accordance with this provision shall be turned over to and become the property of the Company.

If an employee's tools are stolen, they will be replaced by the Company, if, in the Company's opinion a valid and justifiable claim exists.

ARTICLE XIII
NOTICES

1. The Company will furnish suitably identified bulletin boards for use by the Union in such numbers and locations as mutually agreed upon. The purpose of these bulletin boards will be for the posting of notices pertaining to the Union and its members. All Union notices must be signed by an official of the Union and such notices shall contain nothing political, controversial or reflecting upon the Company, Union or any employees. Either the Union or the Company may remove from these bulletin boards any notices posted thereon which do not comply with this Section 1.

2. If a general notice to employees or the public is issued pertaining to a change made in this Agreement it shall be signed jointly by representatives of the Company and the Union.

ARTICLE XIV
STRIKES AND LOCKOUTS

During the term of this Agreement, the Company will not engage in any lockout and the Union will not take part in or cause, nor will its members take part in any strike, slowdown or stoppage of the Company's operations. All grievances arising under this Agreement shall be settled in the manner provided for in Article III.

ARTICLE XV
WAGES

Appendix "A" attached hereto and made a part hereof lists the job classifications covered by this Agreement. Appendix "A" is in **four** parts. The first part shows the basic straight time hourly rates of pay applicable to each job classification effective as of **December 1, 2018** for employees who are employed in the listed job classifications on the date this Agreement is signed by authorized representatives.

The second part of Appendix "A" shows the basic straight time hourly rates of pay applicable to the listed job classifications effective on **December 1, 2019.**

The third part of Appendix "A" shows the basic straight time hourly rates of pay applicable to the listed job classifications effective on **December 1, 2020.**

The fourth part of Appendix "A" shows the basic straight time hourly rates of pay

applicable to the listed job classifications effective on December 1, 2021.

ARTICLE XVI

CONTRACT WORK

Work regularly performed by employees covered by this Agreement will not be contracted out if it would result in loss of continuity of employment or opportunities for permanent promotions to job classifications covered by this Agreement.

ARTICLE XVII

COMPLIANCE WITH LAW

No provision in this Agreement shall be deemed to require the Company or the Union to disregard existing or future laws affecting the relations of the Company, the Union and employees. All provisions of this Agreement are subject to all applicable laws now or hereafter in effect and to the lawful regulations, rulings and orders of regulatory bodies having jurisdiction. If any such laws, regulations, rulings or orders shall conflict with any provision of this Agreement, the Company and the Union shall confer to negotiate a lawful modification. The lawful invalidating of any provision shall not affect the remaining provisions of this Agreement and it shall not constitute a grievance for the purposes of Article III or Article IV.

ARTICLE XVIII

EMPLOYEE BENEFITS

1. It is the intention of the Company to continue its present practices with respect to benefits provided under group insurance plans and the plan provisions applicable to a “Yankee Participant” as such term is defined in the NUSCO Retirement Plan for the term of this 2008 Agreement as amended by the documents titled Yankee Gas Health Benefit Program – December 30, 1992, Long-Term Disability (LTD) Plan Change – August 14, 1992, and 401(K) Plan Change – August 14, 1992 and as amended in the 1995, 1997, 2001, 2005 and 2008 Final Offers.

Beginning January 1, 2009, the Company will offer the K-Vantage Benefit to employees hired on or after January 1, 2009. K-Vantage will also be available to employees hired prior to January 1, 2009 who have chosen K-Vantage in lieu of additional service and earnings credits under the NUSCO Retirement Plan.

It is understood and agreed by the Union and Company that continuance of benefits provided under group insurance plans will, of necessity, be contingent upon the rules and regulations applicable thereto as established and administered by the insurance companies involved. It is further understood and agreed that application of these employee benefits shall not be subject to grievance procedure or arbitration.

2. If during the term of this Agreement a regular employee sustains an injury on a Company job which results in total incapacity and which prevents the employee from doing any work and which is compensable under the Worker's Compensation laws of the State of Connecticut, the employee shall be paid the difference between the employee’s normal basic after-tax wages and Worker's Compensation benefits for the period of total incapacity not in excess of one year from the date of the injury. If it is established that the injury is caused by the negligence of a third party and that third party makes settlement with the injured employee, the Company shall be reimbursed for all wage payments made to the injured employee to the extent that such settlement covers the Company's payments made under the terms of this provision.

ARTICLE XIX

GENERAL

1. During negotiations for the amendment or replacement of this agreement, the Company will pay basic straight time wages to not more than 1 employee representative of the union from each operating area for time lost from their normal work schedules while attending meetings with Company representatives. There will be only 1 representative from each operating area. If any of these Union representatives is a shift or scheduled worker and the employee's schedule of normal work coverage includes shifts directly preceding and directly following the time during which a negotiation meeting with the Company takes place, the employee will be allowed time off with basic straight-time wages from either the shift directly preceding or the shift directly following, but not both, provided that the period of time elapsing between the end of the shift directly preceding and the beginning of the shift directly following does not exceed sixteen hours.

2. Upon written request from the Union, the Company will arrange for a leave of absence for up to two employees who are elected or appointed to the office of full-time Union representative for the Local Unions participating in this Agreement. Such arrangement will include a provision for the Local Union to pay all costs required to maintain the employee's benefits during the employee's leave of absence. The arrangement will also include provisions governing the seniority status of the full-time Union representative in such manner as may be mutually agreed upon by the Company and the Union.

3. It is recognized that the Company may occasionally assign employees covered by this Agreement to work in locations and upon facilities other than those owned or operated by the Company. On such occasions the employees involved, the Union and the Company shall be bound by the provisions of this Agreement. When providing emergency assistance to other utility companies not owned or operated by Northeast Utilities during major outages and/or major service restoration Section 2 of Article XII shall not be applicable, and all hours for travel or work time paid under the terms of this Agreement will be paid at double straight-time rates.

ARTICLE XX

DURATION

This Agreement supersedes all previous agreements and shall continue in force from the first day of **December 2018** until **December 1, 2022** and thereafter for periods of one year unless canceled by advance notice in writing by either party to the other, the advance notice to be given at any time during a thirty-day period, the beginning of which period is ninety days prior to **December 1, 2022** or December 1st of any year thereafter.

If either party desires to amend this Agreement on the **December 1, 2022** anniversary date or on December 1st of any year thereafter, a list of all proposed changes shall be submitted to the other party in writing prior to September 1st of the year involved. The party receiving the proposed changes shall have until September 10th to submit additional proposed changes to the other party. The Company and the Union agree to meet promptly thereafter in the period between the 90th and 61st day prior to the anniversary date of the Agreement to discuss the proposed changes and endeavor to reach an understanding on them. If all proposed changes are not thus disposed of in a mutually satisfactory manner, (1) the proposed changes remaining in dispute may, by mutual agreement, be submitted to arbitration or (2) either party prior to November 1st of that year may serve notice of cancellation of the Agreement if such action is deemed desirable. If all proposed changes are disposed of in a mutually satisfactory manner, the amendments mutually agreed upon shall take effect on the following December 1st, unless the parties agree upon a different effective date.

If notice is given as provided for above it shall be by registered mail addressed to, respectively:

Labor Relations
The Yankee Gas Services Company
107 Selden Street – NU South
Berlin, Connecticut 06037

or

Recording Secretary

Footnotes:

Service Mechanic -

In locations where service requirements necessitate the scheduling of a Service Mechanic for normal work coverage on Sundays, the provisions of Article VII, Section 2. will not apply provided another Service Mechanic is assigned to call at the same time in the same location.

1 Location is "As Assigned" unless a specific location is designated.

I For incumbents only.

S Shift or Scheduled Workers.

X Monday - Friday: 3:00 PM to 11:30 PM Schedule

* Rate bands designated with "*" provide minimum rates which are probationary for one year and maximum rates which are paid after the probationary period to qualified workers who regularly perform the grade of work specified for the rate band.

y Rate bands designated with "y" provide for increases at approximately six-month intervals to employees who make satisfactory progress.

z Rate bands designated with "z" provide minimum and maximum rates and intermediate rates which will be based upon an employee's relative skill, efficiency and ability to perform the work assigned. After one year of satisfactory performance of the grade of work required for the job classification, employees will be paid the maximum rate of the band applicable to the job classification.

ø Rate bands designated by "ø" cover the range starting with the new employee or beginner and finishing with an experienced and fully qualified worker or helper in the respective job classifications. Increases within these bands are made at approximately six-month intervals to employees who make satisfactory progress. The hourly rate step increases applicable to the job classifications are as follows:

\# Rate bands designated with "#" provide for increases at approximately twelve-month intervals to employees who make satisfactory progress.

****** **Rate bands designated with "**" provide for increases at approximately six-month intervals from Step 1 to Step 2 and twelve-month intervals from Step 2 to Step 3 to employees who make satisfactory progress.**

Footnotes:

Service Mechanic -
In locations where service requirements necessitate the scheduling of a Service Mechanic for normal work coverage on Sundays, the provisions of Article VII, Section 2. will not apply provided another Service Mechanic is assigned to call at the same time in the same location.

1 Location is "As Assigned" unless a specific location is designated.

I For incumbents only.

S Shift or Scheduled Workers.

X Monday - Friday: 3:00 PM to 11:30 PM Schedule

* Rate bands designated with "*" provide minimum rates which are probationary for one year and maximum rates which are paid after the probationary period to qualified workers who regularly perform the grade of work specified for the rate band.

y Rate bands designated with "y" provide for increases at approximately six-month intervals to employees who make satisfactory progress.

z Rate bands designated with "z" provide minimum and maximum rates and intermediate rates which will be based upon an employee's relative skill, efficiency and ability to perform the work assigned. After one year of satisfactory performance of the grade of work required for the job classification, employees will be paid the maximum rate of the band applicable to the job classification.

ø Rate bands designated by "ø" cover the range starting with the new employee or beginner and finishing with an experienced and fully qualified worker or helper in the respective job classifications. Increases within these bands are made at approximately six-month intervals to employees who make satisfactory progress. The hourly rate step increases applicable to the job classifications are as follows:

\# Rate bands designated with "#" provide for increases at approximately twelve-month intervals to employees who make satisfactory progress.

**** Rate bands designated with "**" provide for increases at approximately six-month intervals from Step 1 to Step 2 and twelve-month intervals from Step 2 to Step 3 to employees who make satisfactory progress.**

The hourly rate step increases applicable to the job classifications are as follows:

Cancellation ☐ 16

ATTENTION: HUMAN RESOURCES

I hereby authorize Yankee Gas Services Company to make a single initiation fee deduction and in addition to deduct from my wages each month union membership dues in Local 420 and Local 457 of the International Brotherhood of Electrical Workers in such sums as from time to time the secretary/treasurer of Local 420 and Local 457 of the International Brotherhood of Electrical Workers may certify. Initiation fees and dues covered by this authorization are not deductible as charitable contributions for federal income tax purposes.

I further direct the Company to remit the amount deducted to the Union Officer designated by the Union to receive such payments.

This authorization shall be effective for the duration of any written agreement or extension thereof between Yankee Gas Services Company and Local Union Nos. 420 and 457 of the International Brotherhood of Electrical Workers, et al unless cancelled in writing by me.

Western Construction Group	Shelton

PROVISIONS PERTAINING EXCLUSIVELY TO EMPLOYEES AT THE LNG PLANT

Schedules, Working Hours, Overtime, Premium and Holiday Rates

For the LNG facility, the hours of coverage will be twenty-four (24) hours daily and seven (7) days per week. Article VII, Section 1 shall not apply. All hours worked in excess of forty hours per week, or outside of the employee's normal scheduled shift, will be paid for at one and one-half straight-time rates except when other overtime rates, premium rates or holiday rates are applicable as herein provided. The regular rate for purposes of computing overtime compensation shall include only those amounts required to be included under the applicable law.

Call Out

Employees not assigned to take trouble calls outside of their normal scheduled hours but who are called out to perform other than prearranged overtime work will be paid at a minimum of two hours at the applicable rate for each time called out except they will be paid not less than three hours at the applicable rate for each time called out between the hours of 12:00 midnight and 6:00 a.m. Such pay shall be computed from the time the employee reports to work to the time of completion of the employee's work, to which time shall be added one-half hour for travel to work and one-half hour for travel from work. However, if an employee is called in for work which continues into the employee's regular working schedule, the employee shall be paid for the call out only for actual time worked and the half hour travel time to work.

Rest Time

LNG employees shall not be entitled to earn eight hours rest time if they are required to work six consecutive hours during the eight hour period immediately preceding the starting time of their next normal schedule.

Holidays

Pursuant to Article VIII, there shall be twelve (12) paid, eight (8) hour holidays per year. When an employee works a holiday, he or she will be paid at the applicable rates pursuant to Article VII. Lieu days will continue to be administered per the contract except that in addition to eight (8) hours of holiday pay, at the employee's option and when the employee uses a lieu day during a twelve (12) hour shift, he or she may elect to deduct twelve (12) hours from the balance of lieu time if available, four (4) hours of "no pay" or four (4) hours of vacation pay to equal a twelve (12) hour day.

APPENDIX D

TOPIC: Employee Benefits – Business Travel Accident/Basic Accidental Death Benefit

(A) It is the Company's intention to continue its past practices with respect to employee benefits. Should the Company contemplate any diminution of employee benefits affecting bargaining-unit employees, the matter will be discussed with the Union in advance of the change.

(B) In the event any bargaining-unit employee dies or becomes injured accidentally while traveling on Company business, he/she will receive a benefit equal to five times annual Base Earnings with a maximum coverage of $1,000,000 (subject to possible reduction in the event of a multi-employee accident). This coverage does not require participation in any other Life or Accident insurance program. In addition, if the employee is enrolled in Employee Life, a benefit equal to the Employee Life coverage amount, up to a maximum of $120,000, will be provided automatically.

TOPIC: Leave of Absence for Military Service

The Company will grant a military leave of absence as required by law and provide certain benefits to an employee granted such a leave. The Company service record for those who are granted a military leave of absence will continue without interruption.

Short-Term Leave of Absence for National Guard and Active Reserve

Any employee who is required to report for short military training periods will be granted a Short-Term Military Leave of Absence and must give a copy of the "Ordered Tour of Duty" as soon as possible to his or her supervisor so that arrangements can be made for work assignments in the employee's absence.

Upon receipt of military documentation and the Compensation for Ordered Tour of Duty form, any regular employee will be compensated for the difference between his or her base wages and military pay for a maximum of fifteen working days per Federal fiscal year (October 1 through September 30 of the next calendar year) if the military pay (taxable income on the military pay voucher) is less than the employee's base wages. Payment procedures are as follows:

An employee must complete and submit the Compensation for Ordered Tour of Duty form to the Leave Administration Department. If an employee does not submit the completed form prior to leave, the period of leave will remain unpaid until such time that the employee submits the form.

Requests for leave of absence to attend service schools or tours of duty for other than training will be considered on a case-by-case basis.

Company Benefit Plans will remain in force during short-term military leave of absence. When an employee active in the National Guard or Reserves is called for emergency duties, compensation for such a call will be considered at that time.

Long-Term Leave of Absence for Active Duty

Any employee who enlists, is drafted, or is called to active duty will be granted a Long-Term Military Leave of Absence in accordance with the Uniformed Services Employment and Reemployment Rights Act, 38 U.S.C. §§4301-4333. He/she must give a copy of the orders to his or her supervisor immediately. Employees on military leave for active duty may continue their health care benefits under COBRA, and for an additional six-month period subsequent to the 18-month COBRA period. Employees participating in the Retirement Plan will continue participation. Information on benefits will be provided to employees by Human Resources when HR is notified of the leave. Upon return from military service, the employee will be reinstated, to the extent required by law, provided the employee:

- makes application for reinstatement within the required time following release from active duty;
- is still physically qualified or is able to become re-qualified with reasonable efforts; and
- if drafted, produces a certificate of satisfactory completion of training and service. An employee who enlisted must produce documentation of honorable discharge to qualify for reinstatement.
- for temporary employees, is released from military service prior to the end date of his or her temporary assignment or, for bargaining unit employees, prior to being released from the assignment.

In the event the military leave continues for greater than 91 days, the Company will provide a job of like status and pay if an employee's former job is not available.

TOPIC: Grievance Procedure

1. Notifications required when grievances are concluded.

2. Designation of an alternate to act for the International Representative at Step Three grievance meetings.

3. Processing of discharge grievance.

(1) In connection with Article III - Grievances, the Company will furnish written answers to the Union for grievances which are concluded with adjustment in either Step Two or Step Three. When grievances are concluded in either Step Two or Step Three without adjustment, the Union will so-notify the Company in writing.

(2) In connection with Article III, Step Three, joint committee, an International Representative may designate an alternate representative to appear for the employee in Step Three grievance meetings with the Company, provided advance confirmation of this arrangement is set forth in letters to be exchanged by the International Vice-President of the International Brotherhood of Electrical Workers, second district, and Labor Relations, of the Company. Such letters shall confirm the status of the alternate representative, who shall be a bargaining-unit employee of the Company, as having authority to represent the International Union. The alternate representative will, at such times as are mutually convenient, be excused from the employee's normal work assignment without pay from the Company for the purpose of discussing Step Three grievances with Company representatives.

(3) The Company agrees to expedite the processing of grievances involving discharge as rapidly as possible.

TOPIC: Use of Contractors - Operations Managers will advise Union of use of Contractors upon request.

Upon requests made at reasonable intervals by Local Union Business Managers to the Operations Managers, the Company will advise the Union of major plant maintenance, and gas pipeline construction contractors working on the Company's facilities and the estimated duration of such work. The Company will upon request also provide the Local ABA with a copy of the "YGS Construction Daily Work Schedule" provided to the CT PURA.

TOPIC: Understanding Concerning Article V, Section 1.(d)

1. When an employee with one year or more of satisfactory Company service is selected to fill a posted job opening, the employee will be transferred into the new position at the second rate step. If the employee has 18 months or more of satisfactory Company service, the employee will start at the third rate step.

If additional training is required, the employee may remain at the step the employee started the employee's new position at up to one year or eighteen months whichever the case may be.

If prior work experiences were directly related to the new duties, the employee may be accelerated through the pay rate steps.

2. Employees accepted for a job posting back to their former Local Seniority Area under Article V, Section 1(d) who have previously been transferred or reassigned under Sections 2(a), 3, 3(a) or 3(b) of Article V, will have their rates established in accordance with Article V, Section 2(d). Application of Article V, Section 2(d) under this Section 2, will be applied only to the initial job posting for which the employee was accepted back to the employee's former Local Seniority Area and also only to employees who at the time of transfer or reassignment were not offered an option to remain in their Local.

TOPIC: Motor Vehicle Use During Call Assignment

Employees who are assigned by the Company to take trouble calls outside their normal schedule will, whenever practical, be assigned a Company motor vehicle for all hours assigned to call, provided that there are no conflicts with local zoning regulations.

When an employee is assigned to call as a member of a crew, one member of the crew complement will be assigned a motor vehicle under the provisions outlined above.

The Company agrees that it will give consideration to valid reasons of an employee who requests that the employee be excused from taking an assigned Company vehicle home during hours of call.

TOPIC: "Open-Door" Policy - Management will discuss problems or potential problems with Business and Assistant Business Managers.

In a letter to the Local Union the Company stated it has always believed in an "open-door" policy regarding its treatment of employee problems and contemplates no change in that policy. Under such a policy, an employee or an employee's representative in the person of a Union Business Manager or Assistant Business Manager is welcome to discuss problems or potential problems with management at any reasonable time.

The Company agrees with the Union that it is mutually advantageous to avoid grievances whenever possible by prompt investigation and appropriate adjustment where indicated.

TOPIC: – Sick Leave Wage Payment Policy

Effective January 1, 1972, sick leave payments will be based on a calendar year January 1 to December 31 and will not be cumulative.

Continuation of Pay
Incumbent employees as of December 31, 2014 will keep their sick time allotment in accordance with the following:

Continuous Service – Weeks of Full Pay

From 6 months to 5 years - Up to 6 weeks
For 5 years to 10 years – Up to 10 weeks
For 10 years and upward – Up to 1 week for each year of continuous service

In case of a disability continuing from one calendar year into the succeeding calendar year, the employee is allowed for that disability only the amount of sick leave to the employee's credit as of the beginning of the disability. An employee whose disability is carried over into the succeeding year must return to work in order to establish sick leave benefits for that year.

The Company will notify the Local Union one week prior to the expiration of an employee's sick-leave payments.

Effective September 1, 1963, the Company amended its sick-leave wage payment policy for bargaining-unit employees to suspend the waiting period of one scheduled work day without pay.

In addition, they will have a one-time opportunity (by December 1, 2015; Effective January 1, 2016) to opt into the Sick Leave Wage Payment Policy for new hires. Furthermore, any absence over 5 consecutive work days will be managed by Liberty Mutual. The Company and Union agree to meet to review the Liberty management process within 90 days of ratification. All changes to the process will be effective January 1, 2015.

Employees hired on January 1, 2015 or after will be under the following Sick Leave Policy:

SICK LEAVE WAGE PAYMENT POLICY

- Non-occupational illness/injury disability lasting more than five days will be managed by Liberty Mutual
- A total of 10 sick days per year at 100% of pay
- In the case of illnesses that exceed five consecutive work days, qualifying employees will be eligible for short term disability
- The first **twelve** weeks of short term disability will be paid at 100% of base pay
- Up to **thirteen** additional weeks of short term disability will be paid at 67% of base pay
- Vacation time cannot be used in lieu of 67% pay to extend a short-term absence prior to transitioning to long-term disability (LTD)

Incumbent LNG employees as of the contract ratification date have the same sick leave wage payment benefits listed above as employees hired on or after January 1, 2015.

TOPIC: Training of Cadets

Company agrees to periodically meet with union to discuss training of cadets.

TOPIC: Patrolling Rights-of-Way

When necessary to patrol lines on foot through rights-of-way at night or during severe weather conditions, employees will be assigned in pairs.

TOPIC: Upgrading of and to Automotive Equipment Mechanic

When assigned to perform the duties of Chief Mechanic, the Automotive Equipment Mechanic will be upgraded to the maximum pay rate of the Chief Mechanic job classification.

When upgraded to perform the duties of Automotive Equipment Mechanic, a Garage Mechanic will be upgraded to the maximum pay rate of the Automotive Equipment Mechanic job classification.

TOPIC: Illness or Injury Immediately Preceding or During Scheduled Vacation

In the event that an employee becomes incapacitated immediately preceding or during the employee's scheduled vacation, due to illness or injury, and the employee notifies the employee's supervisor of such illness or injury as soon as possible, that portion of the employee's vacation period during which the employee is incapacitated may be rescheduled, at the option of the Company, to another time during the calendar year.
In determining whether the employee's vacation should be rescheduled due to illness or injury, occurring immediately preceding or during the employee's scheduled vacation, the Company may request from the employee verification from the attending physician.

In the event that vacation is not taken as scheduled due to accident, illness, or work requirements, and the Company determines that it can not be rescheduled during the remainder of that calendar year, it will be scheduled in the following calendar year.

When a former employee of the Company is re-employed and completes five years of continuous service, such prior service will be included in the employee's total length of service for the purpose of determining the amount of vacation eligibility, provided such prior service had been for a period of six months or more and other than on a temporary basis.

Granting of credit for prior service for vacation eligibility will not change an employee's company or classification seniority date.

TOPIC: Replacement of Employee's tools when stolen.

If an employee's tools are stolen, they will be replaced by the Company, if, in the Company's opinion a valid and justifiable claim exists.

TOPIC: Overtime Lists

Overtime lists will be furnished to the Business Manager on a quarterly basis.

TOPIC: Credit Union

The Company will provide payroll deduction for employees desiring membership in the Dutch Point Credit Union.

TOPIC: Time-Merit Progression Programs in Effect

1. Letter of April 4, 1968
   Pressure Mechanic Helper to Pressure Mechanic (effective April 1, 1968, revised December 29, 2011).

2. Letter of January 2, 1969
   Meter Repairer Helper to Meter Repairer
   - (effective January 5, 1969 and revised March 19, 1986, revised 2003)

3. Stockhandler - (effective January 5, 1969 and revised June 1, 1986, revised April 5, 2010)

4. Letter of January 14, 1970
   Garage Mechanic Helper to Garage Mechanic - (effective January 4, 1970 and revised November 14, 1985)

5. Construction Technician (effective May 25, 2007)

6. Meter & Service Mechanic (effective 2002)

7. Distribution Mechanic (revised December 29, 2011)

8. Construction Technician (revised March 14, 2013)

9. Meter & Service Mechanic (revised December 5, 2013)

10. Meter Repairer (revised January 16, 2014)

11. Corrosion Technician (effective February 2, 2015)

12. **LNG Operator (effective September 5, 2018)**

13. Damage Prevention Specialist (effective April 9, 2019)

NOTE: The Construction Technician, Meter & Service Mechanic and Meter Repairer TMP's are presently being revised with agreement among the parties to have them completed by the end of year 2012.

TOPIC: Executive Instruction No. 18 - Uniforms: Customer Contact Personnel

Once a year the Company will arrange and pay for a complete overhaul and cleaning of all uniforms, at which time any replacements and repairs that may be necessary should be made. This overhaul and cleaning should be arranged for locally and performed without interfering with normal work assignments. In addition, the Company will provide for cleaning every week.

TOPIC: Safety Eyeglasses

The Company will pay the full cost of lenses, frames, side shields and carrying case, of clear and/or tinted prescription safety eyeglasses for operating department personnel who are required to wear them for their job. Employees will be limited to two (2) pairs of safety glasses (clear and/or tinted) every two years. Employees who opt for safety glasses with Photochromatic (photogray) lenses will not receive a second pair of clear or tinted safety glasses The Company will pay for the cost of Photochromatic (photogray).

The Company will also provide for the replacement of safety eyeglasses when damaged on the job. The employee will provide the Company with a current (not over two years old) prescription. The Company will also provide replacement lenses if the employee's prescription changes.

Employee will pay the cost of any eye examination and/or fitting required.

TOPIC: Establishment of New Schedules

The establishing of any new schedule for scheduled employees shall be discussed with the appropriate Local Business Manager in advance of making such schedule effective.

TOPIC: Jury Duty Wage Payments

The Company will facilitate wage differential payments to employees on jury duty.

TOPIC: Retrogressed Employees

If an employee is retrogressed, the Company will inform the Business Manager of the Local Union having jurisdiction over the location involved.

TOPIC: Employee Progress Reports

In the future Employees will be furnished with a copy of their progress reports.

TOPIC: Safety Shoes

The Company will provide each employee who is required to wear safety footwear an allowance (shown below) for the purchase of one or more pair(s) of heavy soled safety footwear containing a safety-toe box, that is specially designed and manufactured to the requirements of the ANSI standard Z41, or ASTM F2413-05 version, that is endorsed by the Occupational Safety and Health Administration. Additionally all safety shoes must be Electrical Hazard "EH" rated.

Year	Effective Date	Allowed Amount
1	12/1/2018	$250
2	12/1/2019	$250
3	12/1/2020	$250
4	12/1/2021	$250

The employee must furnish a receipt of purchase for reimbursement. This allowance will be limited to the allowed amount per calendar year. Damaged safety shoes can be replaced at applicable reimbursement.

TOPIC: Rate Step For Returning Veteran

A returning veteran will be given credit for time in service plus Company service prior to entering service to determine the employee's rate step. One year of continuous Company and military service will entitle the employee to return at the 2nd rate step and 18 months will entitle the employee to 3rd rate step. Eighteen months is the maximum credit allowed. This does not apply to any veterans returning prior to June 1, 1973.

TOPIC: Summer Employees Working Overtime

The Company will not assign temporary summer employees to prearranged overtime when other employees capable of performing the work are available.

TOPIC: Absence Due to Death in Family

Employees will be allowed time off with basic straight-time wages under the following conditions:

1. When the deceased is a member of an employee's immediate family, the employee will be allowed necessary time off to make arrangements and attend the funeral. Such time off should not exceed three normal schedule workdays falling within the three-day period following the date of death. In addition, the three day period may be increased up to a fourth day with basic straight-time wages due to the employee being called from work on the date of death, or to attend the out-of-state funeral of an immediate family member. The supervisor will work with the employee to accommodate special circumstances.

The immediate family is defined to include the following relatives of the employee or employee's spouse: spouse, son, daughter, father, father-in-law, mother, mother-in-law, grandfather, grandmother, grandchildren, sister, brother, step family, or one who is considered a member of the family and living in the employee's home.

2. When the deceased is an employee's brother-in-law, sister-in-law, aunt or uncle, niece or nephew, necessary time off up to eight hours will be allowed to attend the funeral.

3. If death occurs to a member of an employee's immediate family, during the employee's scheduled vacation period, that portion of the employee's scheduled vacation from the day of death up to and including the day of the funeral will be rescheduled, but not to exceed three days. The vacation will be rescheduled at the option of the Company to another time during the calendar year. In the event vacation to be rescheduled under this section cannot be rescheduled during the current calendar year, it will be rescheduled as promptly as possible within the following calendar year.

TOPIC: Vacation and Sick Leave Payment Entitlement Upon Recall from Layoff.

Employees who are recalled, for other than temporary assignments, under the provisions of Article V, Section 4(b) shall not have their eligibility interrupted for purposes of vacation and sick leave payment entitlement. The application of this topic will be effective retroactive to August 1, 1975.

TOPIC: Paging Device for Use During Call Assignments

When an employee is assigned to call, they will be provided with a paging device ("beeper"), when practicable, as an alternate means of contact during the normal call schedule. It will be the responsibility of that employee to ensure that they are within the signal range and the "beeper" is in operating order as indicated by the testing procedure or to provide other means to be contacted as is presently practiced.

TOPIC: Relative Policy

It is understood and agreed that notwithstanding the provisions of the collective bargaining agreement between the parties, relatives of employees will not be transferred or promoted into situations where the possibility of favoritism or conflicts of interest might exist. Employees will not be promoted or transferred into a position where a relative occupies a position in the supervisory chain of command under which the individual employee would work (no matter how far removed geographically).

Relatives are defined as:

Father	Daughter-in-law
Mother	Brother-in-law
Son	Sister-in-law
Daughter	Uncle
Brother	Aunt
Sister	Nephew
Husband	Niece
Wife	Grandfather
Father-in-law	Grandmother
Mother-in-law	Grandchild
Son-in-law	Step-relatives

TOPIC: Article XVI - Contract Work

The award of arbitrator, Eric J. Schmertz, dated and notarized on October 5, 1981, shall be recognized as the controlling interpretation with respect to Article XVI - Contract Work.

TOPIC: High Risk Locations

If any employee believes that they will be entering a location of high risk to themselves, their property, or the Company's property, they should contact supervision. Area supervision will request local law enforcement agencies to accompany any employees in dangerous locations.

TOPIC: Green Book Seniority

This letter confirms our understanding reached concerning the merging of the Blue and Green Books. Seniority will be Grandfathered separately for the purpose of promotion only. Any vacancy to be filled by promotion from a former Green Book employee leaving will be offered to the senior qualified former Green Book Employee. Any vacancy to be filled by promotion as a result of a former Blue Book employee leaving will be offered to the Senior Qualified Blue Book employee. Any vacancy to be filled by promotion that cannot be identified as a former Blue/Green position will be offered to the senior qualified employee.

The former Green locations are Mystic, the Stamford portion of Norwalk, and the non-Winsted portion of Torrington.

TOPIC: Commercial Driver's License

The Company will pay applicable costs associated with obtaining a Commercial Driver's License required by the duties performed of the classification.

Applicable costs include:

a)endorsements
b)various test fees
c)issuance of permit

In addition, the Company will pay the cost difference between the employee's license fee and the license fee of the job-required CDL.

TOPIC: Out-of-Area Assignment

Yankee Gas management will make out-of-area straight time assignments on a voluntary senior to junior basis (forcing the junior qualified if necessary), except when this method of selection is inconsistent with good business judgment. Senior and junior refer to the relative amount of Departmental Seniority.

TOPIC: Weingarten

Employees have the right to have a union representative present during any investigatory interview/meeting which the employee reasonably believes may result in disciplinary action.

TOPIC: Upgrading – Construction Technician

When a Construction Technician is directly assigned by a Supervisor to perform any of the following tasks, the employee shall be upgraded and will be paid one dollar and fifty cents ($1.50) per hour in addition to their basic straight-time rate for all hours so-assigned.

The definitions of specific tasks which qualify for an upgrade are shown below:

CDOT / Municipal Design:

- Analyze CDOT construction prints for potential conflicts with gas facilities
- Determine if test pits are required
- Re-analyze prints for conflicts based on test pit information
- Determine if designer can eliminate conflicts if possible
- Prepare final gas main and/or service relocation plans and project staging
- Obtain agreements from CDOT for PE, construction and/or revised agreements as needed

Regulator Stations (from inlet valve tie-in location to outlet tie-in):

- Select final location for station
- Determine final design parameters including pipe/regulator sizes
- Develop construction plans including piping layout, vault elevations, tie in details, etc.
- Develop start-up procedure

Bridge Crossing Design:

- Develop construction plans including pipe layout, pipe size, expansion loop locations if needed and type and location of pipe supports

Parking Garages with Extensive Aboveground Piping to Multiple Meter Locations:

- Determine regulator vent sizes when vent length exceeds 10'
- Determine location of supports and complete stress analysis of piping layout

Pressure Uprates:

- Determine areas to be uprated
- Determine general gas facility work scope in accordance with GO-180 Uprating Gas Mains and Services
- Write pressure uprate procedure
- Direct pressure uprate procedure

Meter Sets:

- Size, design and construct meter and regulator set greater than 16M meter

Propane Plants:

- Possible work at propane plants will be discussed as it occurs

TOPIC: Company Allowed Time Off Before Christmas Day.

The Company will allow four (4) hours off at the basic straight time rate to all employees who report for work on their last scheduled work day prior to Christmas Day. If it is determined that time off cannot be allowed, the employee in lieu of the time off, will receive an additional four (4) hours pay at the employee's basic straight time rate.

TOPIC : 4 /10 hour days as authorized by supervisor

The Company may utilize a four / ten schedule (four /10 hour day) with the following as outlined below:

- The determination as to whether a four ten schedule is offered rests with local supervision based on need and/or ability to support.
- The determination as to what days will be allowed to be worked as ten hour days rests with supervision within the bounds of the contract. Saturday is not intended to be one of the normal work days.
- All days of the work week must have coverage for at least the 8 1/2 hour normal work day.
- If there are not enough volunteers for four ten hour days, supervision shall withdraw the offer.
- The 4/10 work week schedule will be voluntary. Workers may opt out of the 4/10 schedule with appropriate advance notice (e.g., the company will not incur additional costs due to schedule changes).
- Holiday weeks will revert to eight hour days.
- Vacation, sick time and other non productive hours will be charged for the hours not at work (i.e., if someone on a 4/10 schedule is sick they will be charged 10 hours for each work day missed; if they take a vacation day, it will be 10 hours of vacation).
- The current contractual rest time rules remain in effect (i.e., 6 hours worked earn 8 hours rest time).

TOPIC: Holidays

1. New Year's Day, Martin Luther King Day, Presidents' Day, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day and Christmas Day shall be recognized as holidays. Whenever any of such holiday(s) occur upon Sunday, the Monday next following such day shall be recognized as the holiday, except that for those employees who are required to work that Sunday, as part of their normal schedule, the holiday will be observed on Sunday. Whenever any such holiday(s) occur upon Saturday, the Friday proceeding such day shall be recognized as the holiday, except that, for

those employees who are required to work that Saturday, as part of their normal schedule, the holiday will be observed on Saturday.

2. In addition to the 10 federal holidays above, employees will be granted two floating holidays during the calendar year based on operational requirements and supervisory approval. The two floating holidays can be used for any reason and are requested by the employee. In the event of a conflict between employees requesting the same date, seniority shall govern. **These two floating holidays must be taken in full eight (8) hour increments.**

TOPIC: Agreement – Scheduling Vacation and On-Call

November 3, 2010
LR-10-162

Mr. Frank Cirillo, Assistant Business Manager
Local Union 420 – I.B.E.W.
550 Wolcott Street
Waterbury, CT 06708

Mr. Richard Sank, Business Manager
Local Union 457 – I.B.E.W.
1237 East Main Street, 1st Floor South
Meriden, CT 06450

Re: Agreement – Scheduling Vacation and On-Call

Dear Rich & Frank:

This letter documents our August 2, 2010 agreement in principle and my subsequent discussion with Frank Cirillo regarding the company's development, approval and posting of annual vacation and on-call schedules. This agreement applies to the CL&P Blue Book and Green Book union contracts, the Yankee Gas White Book Contract, and the CL&P Technical Contract and as applicable, modifies the language contained in these contracts on this subject and replaces any side agreements or practices currently in existence regarding this topic. This agreement also applies to the Transmission Group as applicable.

It is also agreed that neither the Union or the Company will use this agreement as part of Local 457's grievance 2010-014 (Company No. 2010-10-457), or the arbitration of that grievance.

Purpose: This agreement reflects an effort by the parties to eliminate unnecessary controversy surrounding conflict between the on-call schedule and the employee's vacation submittal. To date, the company has processed these schedules independently – leaving some employees in a position where their vacation preference has conflicted with their on-call schedule. These employees have often had to swap their on-call schedule with another employee or otherwise modify their vacation plans. This agreement is specific to this conflicting schedule issue. All other vacation requests will continue to be processed in accordance with the applicable union contract (Blue Book and Green Book)

This agreement also documents the company's intent to fill on-call schedule vacancies (e.g., for planned medical absences) as soon as they are made aware of such. To fill short notice vacancies (less than 30 days) the company will seek volunteers, and if none will use the overtime list effective the Monday prior to the vacancy. For longer notice vacancies, the company will use the established on-call schedule rotation and will assign the vacancy to one of the scheduled employees provided the employee does not get back to back on-call schedules.

It is understood that the company may decide not to fill vacancies (particularly short notice absences) if it determines that the existing on-call response resources are appropriate for the anticipated trouble call volume.

Company actions for 2010: Effective November 3, 2010, the company will review the existing on-call schedule to determine if there is a conflict between the approved vacation schedule and the on-call schedule. Identified conflicts will be resolved by filling the vacancy through the overtime list of employees – specifically those employees eligible for scheduled on-call assignment. The company is not obligated to take action on any other vacation request.

Concurrent with its actions on resolving the vacation/on-call scheduling conflicts, the company will extend the current on-call schedule rotation until April 24, 2011. Employees requesting vacation during the period of January 1, 2010 through April 24, 2010, will submit their requests in accordance with the applicable contract language.

Company Actions for 2011 [and Future Years]: Effective April 24, 2011, and every year thereafter, the company will post the on-call schedule by the last Sunday in April. The on-call schedule will be prepared using approved vacation schedules to ensure there is no conflict with the employees approved vacation. Company management will process the employee's vacation preference in accordance with Article IX of the Blue book and Article V of the Green book, Article IX White Book, and Article 22 of the Technical Contract as applicable. Once the vacation and on-call schedules are finalized by the Companies the employee (not the company) will be responsible for addressing any swapping or other schedule change, outside of those resulting from illness or disability.

Both parties understand and agree that this agreement will terminate with the expiration of each cited contract and this agreement will be incorporated into the next version of these contracts or will otherwise be dispositioned through the contract negotiations process. Additionally either party may request a revision to this agreement.

Agreed to by the Company: /s/ R. Lizotte

Agreed to by the Union: /s/ R. Sank

Agreed to by the Union: /s/ F. Cirillo

TOPIC: On-Call – Pressure Mechanic

Three Regional call areas will be established for the Pressure Management Department – East (East Windsor, Waterford, Danielson AWC's), Central (Waterbury, Meriden, Torrington AWC's) and West (Norwalk, Newtown, Ansonia AWC's). Each of three regions will operate on a 1 in 4 rotation and will have a single call person assigned, year round. If more workers are required, the regional call list will be utilized. If additional resources are still needed the next closest regional call list will be utilized, until resource needs are satisfied.

If a job requires a crew of three or more employees, the Chief upgrade will be applied to the senior most qualified employee on the crew in that region.

TOPIC: FR Clothing

The Company will increase the FR clothing allowance to **$1300** for first time/new participants to the program, and whose jobs require FR clothing (Distribution Mechanics, **Meter Service Mechanics** and Pressure Management
Mechanics). Thereafter it will be $650.

TOPIC: Establishment of a new Yankee Gas Construction Group

Scope of Work: The YG Construction Group will perform construction projects across Yankee Gas and CL&P Service territories as assigned. Typical work scope involves:

- New Business Services (conversions, new customers)
- New Business main extensions Development and Non-development work
- Service renewals associated with main renewals
- Selected main replacement projects
- Fitting Work, such as:
    - Periodic meter changes (both large and small)
    - Perform meter relocates from inside to out…
    - New Business meter set installations
    - OP1714 (meter set survey form) remediation work
- Other work as assigned by the company

Reporting Location: YG Construction Group with:

o Eastern Construction Group	Meriden
o Western Construction Group	Shelton

- The Company will establish a reporting base location in the Western part of the state and one in the Eastern part of the state.
- To the extent possible (e.g. resignation, open PVR, etc.), the company will attempt to balance the number of employees equally between the two reporting locations.
- Employees will mobilize and perform work anywhere in the Yankee Gas service territory.
- "Physical Worker" vacancies created associated with the new YG Construction Group will be filled in a timely manner. Postings for vacancies associated with the YG Construction Group will be at the helper/journeyman level.

Training & Qualifications: Employees assigned to the YG Construction Group must complete the requisite TMP's and pre-hire testing (new hires only) for their job classifications.

Schedule & Work Hours:

- Employees assigned to the YG Construction Group will be considered day workers and may be required to work 4-10 hour days (Monday through Thursday, or Tuesday through Friday schedule).
- A ½ hour unpaid lunch break for either schedule.
- 8 hour days during weeks with holidays
- Employees may be expected to be at their first work assignment at scheduled start time, and will be provided the appropriate expense plan per Article XII of the Contract, when required.

Work practices: Employees must comply with NU safety requirements, TMP Qualification and Operator Qualification requirements.

- The YG Construction Group will call the local areas in the event they encounter a gas leak during construction activities. The leak repairs will be done by the districts however consistent with the training provided to the workforce, the YG Construction Group will be responsible for "making the area safe."
- Taps and tie-ins normally will be arranged through district, unless scheduling or workforce prohibits. Otherwise the YG Construction Group will do the work.

When asking for volunteers to cover possible "storm duty" for NU system companies, the company will request volunteers from the districts first and then from the YG Construction Group.

Inclement Weather:

The YG construction Group personnel shall follow Article XI, Safety, and section #7 as it pertains to working in inclement weather.

Seniority/Overtime:

The YG Construction Group will have its own seniority and overtime distribution list for the Western part of the state and one in the Eastern part of the state, respectively.

- Overtime participation will be within each location (i.e., Eastern, Western) first and if necessary, then go to the other location within the YG Construction Group. If no volunteers, the Company will use the low overtime distribution process within the YG Construction Group.

Applicability of other contract provisions:

All other aspects of this contract are applicable to the YG Construction Group unless otherwise addressed by the provisions of this Topic.

TOPIC: Global Positioning System (GPS)

LR-12-064
April 20, 2012

Mr. Frank Cirillo, Business Manager
Local Union 420 – I.B.E.W.
550 Wolcott Street
Waterbury, CT 06708

Mr. Richard Sank, Business Manager
Local Union 457 – I.B.E.W.
1237 East Main Street, 1st Floor South
Meriden, CT 06450

Re: Global Positioning System (GPS)

The company, as part of the 2011 Yankee Gas Contract Negotiations, announces its intention to expand its use of current and any future GPS technology during the term of the new contract. This expanded use of GPS will in fact change any restrictions on GPS use that the company made or practiced in the past.

GPS technology has made significant strides in the past decade. While Yankee Gas has no intention of implementing a “big brother” environment (watching over the shoulders of employees), we do reserve the right to avail ourselves of all the operational efficiencies that current and new technology will provide, including improvement in employee safety and customer service, establishment of a necessary platform for future work management enhancements, and continued use of GPS for internal investigations.

Accordingly, the company’s previous GPS letters, commitments or practices are superseded by this letter.

Sincerely,

/s/ Edward S. Hammett
Director-Labor and Employee Relations

TOPIC: Adoption Assistance Benefit

The adoption benefit is offered to help employees meet some of the expenses related to adopting a child.

The adoption benefit provides reimbursement of up to $5,000 of eligible expenses for the adoption of each child under the age of 18. Only the expenses you actually incur are eligible for reimbursement. The benefit is payable when the adoption is final (when a decree of adoption is entered by the court) and applies to expenses incurred on or after January 1, 2015.

Eligible expenses include: adoption agency fees, legal fees, court fees, travel expenses, the child's initial medical exam and certain out-of-pocket medical expenses for the natural mother.

Adoption Leave
You are eligible for company-paid adoption leave after you complete three months of employment with NU. Your pay during the duration of your adoption leave will be based on your base pay in effect on the day your leave starts.

You must give your supervisor at least three months written notice of the date your leave will start and when you expect to return to work. If you are also eligible for Family Medical Leave Act (FMLA) leave, time taken for adoption leave will also count as FMLA leave.

Duration of Leave
Adoption leave begins on the date the child is received into your home. The maximum duration of an adoption leave depends on the age of the adopted child according to the following schedule:

Age of Adopted Child	**Maximum Amount of Leave***
6 years old or younger	8 weeks
At least 7 years old but less than 13 years old	4 weeks
At least 13 years old but less than 18 years old	2 weeks

Topic: YG Floating Holiday Protocol -

Bargaining unit employees have the ability to choose two floating holidays during the calendar year based on operational requirements and supervisory approval. The two floating holidays can be used for any reason and are requested by the employee. In the event of a conflict between employees requesting the same date, Company seniority shall govern.

Process

- Employees will make their selection of vacation periods (A,B,C,D....., weeks) by March 1 and vacation schedule will be posted by April 1.
- If an employee wants to use their floating holiday for either – Good Friday and Day after Thanksgiving those days must be selected at the same time as vacation. The total number of bargaining unit employees off for those two days cannot exceed the limits designated by local management. Management will make best effort to be as flexible as possible when designating these local limits.
- On-Call schedule will be prepared using the approved vacation and floating holiday schedules and posted by the last Sunday in April.

Supervisors may require employees to complete a Flexible Holiday Preference form at the start of each year to avoid scheduling conflicts. When taking a flexible holiday, use earnings code 071 when completing time sheets.

Subject: Coverage for the Former Yankee Gas Shelton AWC

Dear Mr. Cirillo:

This is to confirm an agreement reached between Yankee Gas and IBEW Local 420 concerning coverage of the Shelton area and its effect on Meter Service Mechanics and Distribution Mechanics reporting out of the Waterbury area work center:

- The Shelton location will remain in the contract in the Southern division of Appendix C, for the purpose of Article V for Distribution and Meter Service classifications.
- The Company can utilize Distribution and Meter Service personnel covering the Shelton area in Waterbury during regular working hours.
- The Meter Service and Distribution Mechanics covering the Shelton area will have their own overtime list, on-call and vacation schedules.
- The Meter Service Mechanics assigned to Shelton will service the Town of Monroe.
- There will be a minimum of six Distribution Mechanics in the street department and six Meter Service Mechanics in the meter service department covering the Shelton area. The Union understands that there may be times when people will retire or post out. The Company will attempt to backfill employees in a timely manner.
- The displaced employees from the former Shelton AWC in the Meter Service and Distribution Mechanic classifications will have reinstatement rights.

Sincerely,

Joseph C. Picone,
Manager, Labor Relations

Agreed:

Frank Cirillo
Business Mgr., IBEW, Local 420

Labor Relations File

Topic: Company to establish a 2nd shift for Distribution Mechanics as follows:
Shift (X)

2nd shift for Distribution Mechanics:

Meriden: **3**
Norwalk: **3**
Waterbury (does not include Derby, Ansonia, and Shelton): **3**

Hours: 3:00PM – 11:30PM
Work week: Monday – Friday

- Crew Size **3**
- **Distribution Mechanics/Helpers who were in the Distribution Department on 12/1/14 are defined as incumbents.**
    - **If incumbents volunteer for shift (X), they will not be designated with an (X).**
    - **Employees in the ES Construction Department on 12/1/14 are not considered incumbents. However, the three Construction employees who previously worked in the Distribution Department prior to 12/1/14 are considered incumbents.**
- All new **hires and voluntary transfers into** the Distribution Department are subject to shift (X) **designation.**
- Shift **(X) positions will be** awarded by order of seniority.
- **If management elects to fill** temporary shift vacancies, **they** will be be **filled first** by **(X)** volunteers, **then by volunteers based on seniority**; absent volunteers, the junior (X) employee will be required to take the shift in their local seniority area.
    - **Junior helper (X) employees will be required to take the shift in their local seniority area for no longer than one (1) month at a time as long as there are two qualified (X) mechanics on shift.**
- Overtime – by area – no change in present practice. **If second shift is collapsed, overtime rules will apply to all.**
- **Upgrade – no change in present practice.**
- **Shift (X) will normally operate with 3 Fully Qualified Individuals.**
- When helper mechanic (X) becomes qualified, a shift Employee can elect to come off shift at that time.
    - **On an annual basis, the second shift positions will be posted by March 1 for volunteers, and the shift will begin on the first full week of April to coincide with current practices spelled out in the White Book contract. Volunteers for shift (X) are required to work the second shift for a minimum of one (1) year or until there is a junior qualified (X) mechanic in the local seniority area to fill the second shift.**
    - **When a helper (X) mechanic reaches minimum qualified journeyman status, and an employee with greater seniority who is required to work the second shift assignment wishes to go back to first shift, that employee can do so at that time, but must provide management with notification in writing 60 days prior to his or her intended reassignment date.**
- If Management elects to fill the shift during a scheduled vacancy such as vacations and other scheduled absences, and if no one volunteers, the opening will be filled by the junior mechanic **or helper** (X) in their local seniority area, **provided that there are two other qualified (X) mechanics assigned to that shift.** If there are no qualified (X) mechanics, **the Company will decide** if the shift will either be collapsed, or it will be run short.
- The shift crew **may** relieve day crews **working on a job that is expected to extend beyond the regular work hours.**
- Shift Crews will not be **required to be** On-Call **unless opting in**.

- **When a helper (X) becomes fully qualified, that individual can opt in to joining in the on-call rotation when he or she volunteers or is assigned to shift (X).**
- **By opting in to the on-call rotation, that employee is subject to Article X. Call Time. The opt in is binding subject to Article X, Section 1.**

- Generally, when Christmas Eve or New Year's Eve occur during the work week, strong consideration will be given to moving the Shift workers to work days to avoid the inherit difficulties of doing work on these evenings. If business needs dictate, adjustments may need to be made.
- **If an employee who normally works the (X) shift is temporarily assigned to the day shift (i.e. training, OQ testing, temporary shift collapse), he or she shall receive the shift differential set forth in Article VII, Section 5.(c) for all hours worked within the day shift.**
- When a job the Shift workers respond to requires a 3rd person, the 1st Call Man from the area would be the 3rd man.

Job Duties:

All current Distribution Mechanic job functions including but not limited to:

1. Leak repairs
2. Leak investigation
3. Leak re-checks
4. CBYD tickets – (Emergency and tickets due to expire in 24 hours **only**)
5. Pre-marks (CBYD)
6. Box repairs
7. Critical valve inspection & repair
8. Paving inspections
9. Distribution shop cleaning
10. Equipment & tool repair
11. Corrosion inspections

Topic: Company to Establish 24 Hour Coverage for Meter Services Department as follows:

Areas initially affected:

- **Meriden**
- **E. Windsor**
- **Waterbury**
- **Norwalk**

- **The Company will determine the required number of employees for each shift.**
- **An incumbent Meter Service Mechanic is one who is in the classification in the Meter Services Department as of the date of contract ratification (November 30, 2018).**
- **Incumbents are unaffected unless they volunteer.**
- **All employees who are hired or transferred into the Meter Services Department following the date of ratification will be designated as "S" employees and are subject to shift.**
- **During the initial startup, shifts will be offered by departmental seniority. The Company will determine when to implement shifts.**

- **Shifts for the initial startup for incumbent volunteers will consist of five (5) consecutive days in accordance with Article VII, Section 2(a).**

- **Shifts may be filled on a rotational basis for a minimum of one (1) month at a time by incumbent volunteers until "S" Meter Service Mechanics are qualified.**

- **An incumbent Meter Service Mechanic who volunteers for 2nd or 3rd shift will be retained for a period of up to two (2) years from the date of transfer.**
- **If a Chief Meter Service Mechanic volunteers to work the second or third shift, he or she shall be reclassified as a Meter Service Mechanic for the term of the voluntary period. If he or she continues to work the second or third shift beyond the voluntary period, the employee shall be permanently reclassified as a Meter Service Mechanic.**

- **"S" Meter Service Mechanics in the affected areas will remain in the position for a minimum of three (3) years from the date of hire or transfer and will not be entitled to apply for posted open positions during this period.**

- **"S" Meter Service Mechanics may be subject to swing shifts.**

- **When the Company implements shifts for 24/7 coverage in a district, incumbent volunteers will be offered the option to return to first shift or be subject to the shift schedule. Such shift schedules may include swing shifts.**

- **Shifts shall be offered and filled by departmental seniority on an annual basis by February 1.**

- **If the Company elects to fill a temporary shift vacancy, it shall be offered to the call person, if available, or by the overtime list if no one is on call. If no one accepts the vacancy, it shall be filled by low overtime with a qualified employee.**

- **If the Company elects to fill a shift during a scheduled vacancy such as vacations or other scheduled absences, it shall be offered to the call person, if available, or by the overtime list if no one is on call. If no one accepts the vacancy, it shall be filled by low overtime with a qualified employee.**

- **Any shift may relieve another shift consistent with current practice.**

- **Meter Service Mechanics may be placed On-Call.**

- **When an "S" Meter Service Mechanic is required to work on a recognized holiday falling on a day within the employee's normal schedule, the employee will receive eight (8) hours of holiday pay at basic straight time rates or a day off in lieu to be used within the calendar year plus time and one-half for all hours worked within the employee's normally scheduled hours and double time for all hours worked outside the employee's normally scheduled hours.**

Topic: Expanded Loading Duties for Stockhandlers

1. **The Company will expand the current practice of loading by the Stockhandlers to include loading material and equipment onto Company vehicles.**

2. **It is not the intent of the Company to remove loading duties from any classification that presently performs these duties, nor is it the intent to give any classification exclusivity to the dutie /s associated with loading and unloading.**

3. **The Company will train Stockhandlers on equipment necessary to perform the expanded loading duties.**

4. **Incumbent Stockhandlers will receive $1.00/hour added to the base wage rate for obtaining and maintaining CDL (B).**

5. **New hires and transfers must be able to obtain and maintain valid CDL (B) within six (6) months of hire or transfer into a Stockhandler position.**

AGREEMENT entered into as of the 1st day of **December, 2022**, between THE YANKEE GAS SERVICES COMPANY, hereinafter referred to as the COMPANY, and LOCALS NO. 420 and 457 of THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, hereinafter referred to as the UNION, with respect to rates of pay, hours of employment and other conditions of employment. This Agreement shall be binding on any and all successors and assigns of the employer, whether by sale, transfer, merger, acquisition, consolidation or otherwise. The employer shall make it a condition of transfer that any such successors or assigns shall be bound by the terms of this Agreement.

.

ARTICLE I

RECOGNITION AND UNION MEMBERSHIP

1.(a) The Company recognizes the Union as the exclusive bargaining agent for all employees in job classifications listed in Appendix "A" of this Agreement.

1.(b) The Company and Union agree to continue their cooperative efforts to promote safety, efficiency and harmony among all the employees and to promote and advance the welfare of the Company and the service at all times.

The Union agrees that its members, who are employees of the Company, will individually and collectively continue to avoid and discourage waste of materials, time, and manpower, and that they will use their influence and best efforts to protect the property of the Company.

1.(c) Each Local Union shall notify the Company in writing of the identity of its elected and appointed representatives and, in the event of a change of any representative, shall notify the Company of such change promptly. Notices to the Company under this provision shall be directed to Labor Relations.

1.(d) The Company recognizes Local 457 – IBEW as the sole collective bargaining representative with respect to wages, hours, and other conditions of employment for all full time and part-time regular clerical employees, including Billing Services Representatives, Operating Records Clerks, Customer Information Representatives, Secretaries and Senior Meter Management Records Clerks, employed by the Employer at its 56 Cooper Street, Meriden, Connecticut, facility, but excluding all other employees, Field Technicians, and guards, professional employees and supervisors as defined in the Act. Recognition is granted pursuant to the certification of Representatives of the National Labor Relations Board in case number 34-RC-1885 dated April 23, 2001.

The Company recognizes Local 457 – IBEW as the sole collective bargaining representative with respect to wages, hours, and other conditions of employment for all full time and part-time regular clerical employees, including Operating Records Clerks employed by the Employer at its 112 Prospect Hill Road, East Windsor, Connecticut and 179 Cross Road, Waterford, Connecticut facilities, but excluding all other employees, Field Technician, and guards, professional employees and supervisors as defined in the Act.

1.(e) The Company recognizes Local 457 – IBEW as the sole collective bargaining representative with respect to wages, hours, and other conditions of employment for all full time and part time regular Technicians B&A excluding supervisors, professionals and guards as defined by the Act. Recognition is granted pursuant to the certification of Representatives of the National Labor Relations Board in case number 34-RC1942 dated February 13, 2002.

1.(f) The Company recognizes Local 457 and Local 420 – IBEW as the sole collective bargaining representatives with respect to wages, hours, and other conditions of employment for all regular Construction Technicians, excluding supervisors, professionals and guards as defined by the Act. Recognition is granted pursuant to the Certification of Representatives of the National Labor Relations Board in case number 34-RC-2084 dated June 24, 2004.

1.(g) The Company recognizes Local 457 and Local 420-IBEW as the sole collective bargaining representatives with respect to wages, hours and other conditions of employment for all regular Corrosion Technicians, excluding supervisors, professionals, and guards as defined by the Act. Recognition is granted pursuant to the Certification of Representatives of the National Labor Relations Board in case number 01-RC-112597 dated September 5, 2013.

1.(h) The Company recognizes Local 420-IBEW as the sole collective bargaining representatives with respect to wages, hours and other conditions of employment for all regular Field

Techs I and II working at the Ansonia, Newtown, Norwalk, Waterbury, Connecticut; but excluding all other employees, office clerical employee and guards, professional employees and supervisors as defined by in the Act. Recognition is granted pursuant to the Certification of Representatives of the National Labor Relations Board in case number 01-RC-108126 dated June 27, 2013.

1.(i) The Company recognizes Local 420-IBEW as the sole collective bargaining representatives with respect to wages, hours and other conditions of employment for all regular fulltime clerical employees working at the Danbury, Newtown, Norwalk, Shelton, Waterbury, Connecticut; but excluding all other employees, and guards, professional employees and supervisors as defined by in the Act. Recognition is granted pursuant to the Certification of Representatives of the National Labor Relations Board in case number 01-RC-112285 dated August 29, 2013.

1.(j) The Company recognizes Local 420-IBEW as the sole collective bargaining representatives with respect to wages, hours and other conditions of employment for all full-time and regular part-time Liquefied Natural Gas Coordinators, Operators and Maintenance Technicians employed by the employer at its Area Work Centers located in Waterbury, Connecticut; but excluding all other employees, and guards, professional employees and supervisors as defined by in the Act. Recognition is granted pursuant to the Certification of Representatives of the National Labor Relations Board in case number 01-RC-199614 dated June 30, 2017.

2. If at any time during the term of this Agreement, or any renewals or extensions hereof, the Company shall recognize the Union as the exclusive bargaining agent of the employees in any job classification in addition to those specified in Section 1.(a) of this Article, all of the provisions of this Agreement shall become applicable to the employees in such job classification as though such job classification had been originally designated herein, except that the rates of pay applicable to such job classification shall be such as may be agreed upon between the Company and the Union.

3. The following provisions will apply to employees in job classifications covered by this Agreement:

3.(a) **Where permitted by applicable law,** employees who are members of the Union or its predecessor Union on December 1, 2011, or who later become members, will as a condition of employment be required to maintain their membership for the duration of this Agreement.

3.(b) **Where permitted by applicable law,** employees hired or transferred into the bargaining unit will be required as a condition of employment to join or make application to join the Union thirty days from their date of employment or transfer or thirty days after the date this Agreement is executed, whichever is later. Employees hired for temporary summer assignment are excluded from this requirement for an additional sixty-day period in that summer and in any subsequent summers of temporary employment from their date of employment.

3.(c) If the Union refuses to accept as a member or refuses to continue the membership of any employee for any reasons other than the failure to pay or tender payment of uniformly required initiation fees and periodic dues, the employee shall be exempt from the provisions of (a) and (b) above. It shall be the responsibility of the Union to solicit the membership of employees who are required to join the Union under Section 3.(b). Should the Union fail to solicit the membership of an employee within the time period prescribed in (b), that employee shall be exempt from the provisions of (b) until the first day of the calendar month within which the employee's membership is first solicited by the Union.

3.(d) **Where permitted by applicable law,** should an employee fail or refuse to join the Union or maintain membership therein as hereinbefore provided, the Union may request the Company to discharge such employee. The request shall be submitted in writing to Labor Relations. Two weeks from the date of receipt of the request, unless the Company has notified the Union that the matter is in dispute, the employee will be discharged, provided that, if during the two week period the employee complies with the Union membership provisions of this Section 3., the Company will not be obliged to discharge the employee.

3.(e) If a dispute arises under Section 3.(d) hereof concerning the discharge of an employee, - Labor Relations and the respective Business Manager of the Union shall ascertain the facts and endeavor to settle the dispute. Pending settlement of the dispute, the Company will not suspend or discharge the employee concerned. If the dispute is not settled within thirty calendar days, (subject to extension by mutual agreement), from date of receipt of the Union's written request for discharge as

provided in Section 3.(d) hereof, either party may, within the next ten calendar days following the thirty calendar day period, submit the dispute to Arbitration for final settlement as provided in Article IV.

4.(a) Each Local Union shall notify the Company in writing of its required amounts of membership initiation fees and monthly dues. In the event such fees or dues are to be changed during the term of this Agreement, the Local Union concerned shall give the Company written notice in advance of such change. Notices to the Company under this provision shall be directed to Labor Relations.

4.(b) Upon receipt of individual written authorization and assignment from employees in job classifications listed in Appendix "A", the Company will make a single deduction for the required initiation fee and in addition will deduct required Union dues from the employees' wages on a pay period basis and remit monthly to the Local Union Officers designated in writing by each Local Union. Authorizations shall be submitted in the form and language shown in Appendix "B" attached hereto and made a part of this Agreement. If an employee is transferred out of the bargaining unit, the employee's authorization for the payroll deduction of Union dues will automatically become void at the end of the calendar month within which the employee transfer is effective.

4(c.) The Company will deduct from the wages of each employee on a pay period basis from whom it receives written authorization, voluntary contributions to the Unions' COPE fund. Such donations shall be remitted to the financial secretary of the Union monthly, along with a list of employees and amounts so deducted.

5. It is agreed that neither the Company nor the Union will discriminate against any employee in the application of any of the terms of this Agreement because of race, color, religion, sex, national origin, age, ancestry, marital status, familial status, sexual orientation, disability/handicap, military status, genetic information, Vietnam era veterans, disabled veterans, and other veterans.

ARTICLE II
THE FUNCTIONS OF MANAGEMENT

In order that the Company may discharge its obligations as a public utility and furnish dependable and satisfactory service to its customers, it is mutually agreed that the Company shall exercise the functions of management, including among other things the determination of the number and the qualifications of the employees required to perform the work, the direction of the working forces, the right to hire, suspend or discharge for just cause, promote, demote, transfer, discipline and lay off employees. In exercising these rights the Company will act in accordance with the provisions of this Agreement.

ARTICLE III
GRIEVANCES

Any complaint made by an employee to the employee's immediate Supervisor concerning the employee's wages, hours or working conditions which is accompanied by a request for an answer will be considered as a grievance for the purpose of this Article. Grievances should be presented as promptly as possible following the incidents that caused them. Employees will be allowed necessary straight time off without loss of pay to attend scheduled grievance meetings. In addition to the time allowed off above, the Assistant Business Manager or, in the Assistant Business Manager's absence, the Assistant Business Manager's designated representative, will, upon specific request, be allowed necessary straight time off to assemble data for scheduled grievance meetings. Additional reasonable time off without pay will be allowed for a reasonable number of representatives to attend state, regional, and national conventions.

In order that any grievance by an employee or group of employees may be promptly and satisfactorily settled, the procedure outlined below shall be followed:

Step One

The aggrieved employee or employees in person, who may be accompanied by a Steward, Business Manager or Assistant Business Manager, shall present the grievance to the Supervisor as promptly as possible following the incident which caused it. The Supervisor will endeavor to settle it by giving an answer as promptly as possible and within seven calendar days of the date of presentation. If an answer is given and accepted in this Step, the grievance is to be considered closed. If an answer is

not given, or is not acceptable, it may be taken to Step Two within fifteen calendar days, (subject to extension by mutual agreement), from date of presentation in this Step.

Step Two

The Business Manager or Assistant Business Manager shall forward the grievance in writing to the Manager concerned stating its nature, specifying the provision(s) of the Agreement on which it is based and giving a brief description of the circumstances causing it. The Manager concerned or the Manager's designated representative will investigate the grievance and answer it as promptly as possible. If a meeting is held in this Step, it shall be attended by the Business Manager or Assistant Business Manager who presented the grievance, the Manager concerned or the Manager's designated representative, other management representatives if concerned and, at the option of either the Company or the Union, the aggrieved employee(s) shall be present. At this Step in the procedure, there also may be present either an International Representative of the Union in an advisory capacity to the Local Union, or a representative of the Human Resources Department of the Company, or both.

In the event a Business Manager has factual and reasonable evidence that the Company has violated a provision(s) of this Agreement and the employee(s) affected fails to present a grievance in Step One, then the Business Manager, having first notified the employee(s) affected, may initiate a grievance in this Step at any time within a period not in excess of thirty calendar days, (subject to extension by mutual agreement), from the date of the claimed violation.

If a grievance is not settled within ten calendar days from date of receipt in this step, it may be taken to Step Three within twenty-five calendar days, (subject to extension by mutual agreement), from date of such receipt.

Step Three

The Business Manager shall forward a copy of the written grievance identified as being in Step Three, to Labor Relations. The latter shall refer the grievance to a joint committee consisting of:

(a) three representatives appointed by the Company, and

(b) three representatives appointed by the Union, one shall be the Business Manager of the Local Union concerned, and/or the Business Manager's designated representatives. In addition an International Representative may be present in this Step in an advisory capacity to the Local Union.

The Joint Committee shall endeavor to meet within fifteen calendar days from the date the grievance is received by Labor Relations. It shall be the duty of the Joint Committee to investigate all of the circumstances surrounding the grievance and endeavor to settle it on a factual basis, including the method and manner of complying with decision.

At this Step in the grievance procedure, a "Union Grievance" may be initiated. Such a grievance shall consist of a claim or charge by the Union in writing, that a specified provision of this Agreement, involving the status, rights, privileges, or duties of the Union as an organization has been violated. If a "Union Grievance" is presented, it shall be forwarded in the manner specified in the first paragraph of this Step.

If the grievance is not settled within thirty calendar days from the date of receipt in this Step, the Union may take it to arbitration in accordance with and subject to the provisions of Article IV hereof within forty calendar days, (subject to extension by mutual agreement), from the date of receipt in this Step.

ARTICLE IV

ARBITRATION

1. If a grievance is not settled in Step Three of Article III, and provided the grievance is a dispute involving the interpretation, application or compliance with any provision of this Agreement, the Union may, within the time limits specified in Article III, Step Three, submit the grievance to the American Arbitration Association for arbitrator selection and hearing conducted under its rules then prevailing. The decision of the arbitrator shall be final and binding on both the Union and the Company for the duration of

the Agreement. The expenses of the arbitrator shall be borne equally by the Union and the Company. This Section is subject to the limitations set forth in Sections 2. and 3. of this Article.

2. The parties recognize the proper role of the arbitrator as one of deciding issues submitted by the parties under this Article, after a full and fair hearing, and not as being invested with any authority to participate in matters of collective bargaining.

3. It is understood and agreed that proposals to add to or change this Agreement shall not be arbitrable and that no proposal to amend or terminate this Agreement may be referred to arbitration under this Article.

ARTICLE V
SENIORITY

CLERICAL CLASSIFICATIONS

In the application of seniority, one new separate bargaining unit is recognized and all provisions of seniority and related matters apply separately. Union job postings will be posted simultaneously for union and non union employees. Language on the job posting will reflect that union employees will have preference for union positions. Preference for union postings will be with the respective bargaining unit first, secondly the other bargaining unit and thirdly the system (non union).

TECHNICIANS A & B

In the application of seniority, one new separate bargaining unit is recognized and all provisions of seniority and related matters apply separately. Union job postings will be posted simultaneously for union and non union employees. Language on the job posting will reflect that union employees will have preference for union positions. Preference for union postings will be with the respective bargaining unit first, secondly the other bargaining unit and thirdly the system (non union).

CONSTRUCTION TECHNICIANS

In the application of seniority, one new separate bargaining unit covering the Construction Technicians is recognized and all provisions of seniority and related matters shall apply separately. Union job postings will be posted simultaneously for union and non union employees. Language on job postings will reflect that union employees will have preference for union postings. Preference for union postings will be given in the following order: 1) the respective bargaining unit; 2) the other White Book bargaining unit; and 3) all other company employees (non-union and non-White Book).

Seniority which employees accumulate is of two types:

(a) Total length of continuous time served with the Company shall be known as "Company Seniority."

(b) Except as modified elsewhere in this Agreement, total length of time served within a job classification shall be known as "Classification Seniority."

In the application of seniority, as defined in paragraphs (a) and (b) above, to employees having equivalent Classification Seniority, greater Company Seniority shall prevail and when both Classification Seniority and Company Seniority are equivalent, greater seniority shall prevail for the employee having the earlier birth date. The application of seniority as herein provided shall not be applied so as to conflict with any established seniority relationships existing prior to June 1, 1963.

New employees, other than temporary employees, shall be regarded as probationary until they have worked continuously for six months during which period they shall have no seniority status. Any employee who has been continuously employed during their probationary period as defined above shall become a regular employee at the end of the probationary period and the employee’s seniority shall start from the date of hiring. Employees hired on a temporary basis for special projects that require not more

than twelve months to complete shall acquire no seniority status during such employment. If a temporary employee is retained as a regular employee, the employee's Company Seniority shall start from the date of hiring and the employee's Classification Seniority shall start on the date the employee became a regular employee. Temporary employees must comply with Article I, Section 3. A regular employee shall lose seniority status if the employee resigns voluntarily or is discharged for just cause or is laid off for periods in excess of those specified in Section 4. of this Article. Where used in this Article the words "operating area" describe designated areas of Company operations for which the immediate responsibility is directly assigned to an individual Manager, Superintendent or other in charge. Appendix "C" attached hereto shows a list of designated areas of Company operations which define "Local" seniority areas for application of the provisions of this Article.

LNG CLASSIFICATIONS

In the application of seniority, one new separate bargaining unit is recognized and all provisions of seniority and related matters apply separately. Union job postings will be posted simultaneously for union and non-union employees. Language on the job posting will reflect that union employees will have preference for union positions. Preference for union postings will be given in the following order: 1) the respective bargaining unit; 2) the White Book bargaining unit; and 3) all other company employees (non-union and non-White Book).

Promotion

1.(a) Employees will be given preference for training to qualify for promotion within the bargaining unit in descending order of Classification Seniority within normal sequences of promotion on an operating area basis. Exceptions to such preference may be made only in (1) temporary situations where assigning a more senior employee would involve short notice change of a normal work schedule or unreasonably interfere with the conduct of a particular job assignment or (2) when a senior employee either has qualified previously for promotion or has demonstrated the inability to do so and has been advised accordingly by the Company or (3) for LNG employees based on availability and/or seasonality of the processes.

1.(b) When promoting an employee to fill a vacancy in a higher job classification within the bargaining unit, the Company will give first consideration to the qualifications of the employee having greatest Classification Seniority in the normal sequence of promotion on an operating area basis. If this employee is qualified as evidenced by skill, efficiency, knowledge, ability and acceptable performance in training, the employee will be given the promotion. If the employee having greatest Classification Seniority is not qualified, the remaining employees will likewise be considered for the promotion in the order of greatest Classification Seniority on an operating area basis. When no employee on an operating area basis is qualified, Classification Seniority will be applied secondly on a division basis, and thirdly on a Companywide basis.

1.(c) Vacancies in the bargaining unit, other than Helper or equivalent job classifications or classifications covered by the Time- Merit Progression Program which are to be filled by promotion will be filled within two weeks from the date of the vacancy excepting in situations when the employee who is to fill a vacancy is temporarily absent from work or requires additional time to complete necessary training. If it is determined that no vacancy exists, the Company will advise the Business Manager of the Local Union concerned in writing.

1.(d) The Company will give preference to its regular bargaining unit employees over hiring new employees when making placements in job openings within the bargaining unit. Notices of available job openings, other than those to be filled by application of any other provision(s) of this Agreement, will be posted on bulletin boards throughout the Company, and a copy will be sent to the Business Manager of each Local Union. Each bulletin board posting will be for a period of not less than seven (7) calendar days during which period interested employees may apply in writing for reassignment to the posted job opening by use of a reassignment application form provided by the Company. The Business Manager, Assistant Business Manager or Steward may submit a reassignment application in the above manner on behalf of an employee who is absent during the seven-day period by reason of vacation, short-term illness or short-term excused absence. Promptly following the end of a posting period each applicant will

be notified within 15 days following the end of that posting period whether or not their application has been accepted, and if rejected, the reason therefore. The Company's determinations of the qualifications of employees applying for reassignment under this Section 1.(d) will be made on the same basis as for hiring new employees. In the event two or more employees with basically equal qualifications apply for one job opening, preference for placement will be determined by greater Company Seniority. If reassignment is postponed following notification of acceptance, the employee's classification seniority will be adjusted upon reassignment to the starting date of the first full week following the date of the acceptance notice.

1.(d.1) Regular Employees who have been transferred or reassigned prior to June 1, 1979 under Sections 2.(a) or Sections 3, 3.(a) or 3.(b) or rehired under the provisions of 4.(b) of this Article will be considered as having greater Company seniority within the employee's former local seniority area for purposes of Section 1.(d).

If more than one such Employee applies for the same job posting, greater Company seniority will be the determining factor. Such Employee(s) will receive this consideration only if the Employee(s) notes on the job posting application that the employee is applying under this Section of Article V. Further, the Employee(s) affected will be allowed this seniority consideration only until the employee has been selected for one job opening under these provisions. An employee selected for a job posting under this Section 1.(d1) will have the employee's rate established in accordance with Section 2.(d) of this Article V.

Applicants who are selected for job postings to classifications covered by Time Merit Progression Programs under this Section will be considered for reinstatement rights under the provisions of Section 3.(e) or 4.(a) of this Article for a period of up to two (2) years from the date of transfer. The Company will endeavor to reassign the employee as soon as possible but will not hold him/her greater than sixty (60) days. The sixty (60) day hold will be the exception, not the rule.

1.(e) Damage Prevention Specialists will remain in the position for a minimum of three (3) years from the date of hire or transfer into the department and will not be entitled to apply for posted open positions outside of the Damage Prevention department during this period.

Reassignment, Layoff and Demotion

2. If at any time Company operations require a reduction of the existing working forces, employees in the operating areas affected will be subject to reassignment in the order of least Company Seniority and in reverse sequence of job progression within the job classifications affected. The Company will reassign employees entitled to reassignment to job classifications for which they are qualified and in accordance with the procedure outlined below:

2.(a) An employee subject to reassignment under the provisions of Section 2. or displaced by the application of this Section 2.(a), may at the employee's option and to the extent the employee's Company Seniority exceeds that of other employees,

(1) either displace the employee having least Company Seniority in the same job classification within the division, or

(2) displace the employee having least Company Seniority in the same job classification within the Company, or

(3) displace the employee having least Company Seniority in a lower job classification within the employee's normal sequence of job progression within the operating area, or

(4) displace the employee having least Company Seniority within the operating area.

If an employee subject to reassignment has insufficient Company Seniority to exercise provision (1) or (3), then the employee may

(5) displace the employee having least Company Seniority in a lower job classification within the employee's normal sequence of job progression within the Division, or within the Company, or

(6) displace the employee having least Company Seniority within the Division.

If an employee subject to reassignment has insufficient Company Seniority to exercise provisions (1), (2), (3), (4), (5) or (6), then

(7) the employee may displace one of the five employees having least Company Seniority within the Company.

Union representatives shall be the last to be laid off and the first to be rehired in their department (Distribution, or Customer Service, etc.) in their operating area.

2.(b) An employee subject to reassignment under the provisions of Section 2. or displaced by the application of Section 2(a) of this Article who has insufficient Company Seniority to entitle the employee to reassignment or in lieu of displacing another employee, may elect to be laid off with recall privileges as outlined in Section 4.(b) of this Article.

Prior to being presented with options, an employee subject to reassignment under the provisions of Section 2. or displaced by the application of Section 2.(a), of this Article may at the employee's option, after giving the Company at least one weeks' notification, elect to be laid off with recall privileges as outlined in Section 4.(b) of this Article.

2.(c) In the event an employee subject to reassignment does not have sufficient Company Seniority to entitle the employee to job placement, the employee may be laid off with recall privileges as outlined in Section 4.(b) of this Article.

Any employee who has completed one or more years of continuous service and who is laid off because of the permanent elimination of one or more jobs shall be given an allowance of forty hours' pay at the employee's straight-time hourly rate for each full year of continuous service with the Company. For any such employee who is fifty years or more of age, the above-mentioned allowance will, instead of forty hours, be sixty hours if the employee has completed at least fifteen years of continuous service, or eighty hours if the employee has completed at least twenty-five years of continuous service. Any laid off employee or employee identified to be laid off, who obtains employment with any of the system companies, will not be entitled to terminal pay. Any such employee who accepts terminal pay will thereby relinquish all other rights under this Agreement and will not be eligible for recall under Section 4.(b) of this Article V. Any employee who accepts any position or who is offered a position similar to the position the employee held with the Company prior to the sale or lease, or in which the employee has had experience, the wages and benefits for which are reasonably comparable to those earned prior to such sale or lease, with this Company or with the purchaser or lessor, shall not be eligible for severance pay. An employee so affected who has reached age fifty-five may, in addition to severance pay, make arrangements for applicable annuity benefits under the then existing Annuity Plan.

2.(d) When Company operations require other than a temporary transfer or reassignment of employees under the provisions of Section 2 of this Article to a job classification in which the employee is unskilled or inexperienced, the employee will be given training on the job and allowed a reasonable period of time to develop sufficient skill and ability to perform satisfactorily in the employee's new job classification.

An employee who is reassigned to a job classification with a lower hourly starting rate of pay than the employee's present hourly rate a special basic rate of pay will be established for the employee in the following manner:

A. For an employee with less than five years of continuous service:

(1) If the employee's present rate is greater than the maximum rate of the employee's new classification, the employee will be paid the maximum rate of the new classification.

(2) If the employee's present rate is less than the maximum rate of the employee's new classification, the employee will retain the employee's present rate in the new classification until the employee is qualified for advancement.

B. For an employee with five years but less than fifteen years of continuous service:

(3) If the employee's present rate is greater than the maximum rate of the employee's new classification, twenty-five percent of the difference between the employee's basic rate immediately preceding reassignment and the maximum basic rate of the lower job

classification to which the employee is reassigned will be added to the rate for the lower job classification.

(4) If the employee's present rate is less than the maximum rate of the employee's new classification, the employee will retain the employee's present rate in the new classification until the employee is qualified for advancement.

C. For an employee with fifteen or more years of continuous service:

(5) If the employee's present rate is greater than the maximum rate of the employee's new classification, fifty percent of the difference between the employee's basic rate immediately preceding reassignment and the maximum basic rate of the lower job classification to which the employee is reassigned will be added to the rate for the lower job classification.

(6) If the employee's present rate is less than the maximum rate of the employee's new classification, the employee will retain the employee's present rate in the new classification until the employee is qualified for advancement.

Any special rate established under the terms of subsection (3) or (5) of this provision will thereafter not be subject to any rate or general wage adjustments until such time as the maximum rate for the lower job classification equals or exceeds the employee's special rate.

2.(e) If it is definitely established that a regular employee is physically incapable of performing the duties of the employee's assignment, the Company will, in accordance with its past practice, whenever possible and with due consideration given to the Company Seniority of all employees affected, reassign such employee to an available job for which the employee is qualified at a rate which will result in a minimum reduction from the employee's former rate.

2.(f) If an employee is demoted or assigned to a lower job classification or hourly rate of pay (1) at the employee's own request, (2) for disciplinary reasons, (3) for incompetence or (4) because of physical inability to perform the duties of the employee's assignment, the employee's Classification Seniority for the purposes of promotion will begin on the date of the demotion. An employee who is demoted under item number (4), above, will retain the employee's Classification Seniority in the employee's former classification for the purpose of reinstatement as set forth in Section 4.(a) of this Article. Any employee desiring assignment to a lower job classification or hourly rate of pay for a purpose other than covered by Section 1.(e) of this Article shall make written request to the Manager or Superintendent concerned, with duplicate copy to the Business Manager of the Local Union having jurisdiction over the location involved. Such written request shall state that the employee understands the Classification Seniority provisions of this Agreement.

Transfer

3. When it is necessary for the Company to transfer an employee from one operating area to another under circumstances other than those outlined in Sections 2., 3.(a) or 3.(b) of this Article, the Company shall offer the transfer to qualified employees in descending order of Classification Seniority in the job classification affected in the operating area from which the transfer is to be made provided first that Section 1.(b) is complied with on operating area basis.

3.(a) If at any time there is an excess number of employees in a job classification which is to be retained in an operating area or division and concurrently there is a vacancy in the same job classification in another operating area the Company may, rather than apply Section 2 of this Article, transfer a qualified employee from the operating area where there is an excess to the operating area where the vacancy exists provided first that Section 1.(b) of this Article is complied with on an operating area basis. Under these circumstances the Company shall offer the transfer to qualified employees in descending order of Company seniority in the job classification affected, from the operating area where the excess number exists to the operating area where the vacancy exists. If no employee accepts the transfer, the least senior of the employees affected, will be subject to provision (2) of Section 2.(a) of this Article except that when the transfer is from one division to another the employee may displace the employee having least Company Seniority in the same job classification within the division where the employee is employed. Any employee displaced from the same job classification may accept transfer to where the

vacancy exists or exercise provision (2) of Section 2.(a) or elect to be laid off with recall privileges as outlined in Section 4.(b) of this Article. Any employee displaced by the application of provision (2) of Section 2.(a) will, if qualified, be required either to accept the promotional transfer or to be laid off with recall privileges as outlined under Section 4.(b). If an employee displaced by this procedure is not qualified for promotional transfer the employee will be subject to provision (3) of Section 2.(a).

3.(b) If at any time Company operations require permanent elimination of a job classification or permanent reduction of the number of employees or both in an operating area, under conditions not provided for under Sections 3. or 3.(a) of this Article, and requirement to fill existing or contemplated vacancies elsewhere can reasonably be coordinated with the elimination or reduction, the employees where the job elimination or reduction is to be made will be offered opportunities, consistent with their respective qualifications and seniority, either to remain in their present operating area in job classifications remaining available there or to be reassigned to fill available vacancies elsewhere. Under these circumstances offers for available jobs will be made in descending order of Company Seniority to (1) accept promotional transfer, or (2) remain in the present operating area, or (3) accept reassignment to a different job classification and operating area, or (4) in lieu of applying provisions (1), (2) or (3) of this Section 3.(b) be laid off with recall privileges as outlined under Section 4.(b) of this Article. If the application of provisions (1), (2) or (3) above would result in less favorable job placement for an employee than reassignment under Section 2.(a), then Section 2.(a) will be applicable for that employee. For the purpose of coordinating the permanent elimination of a job classification or the permanent reduction of the number of employees in an operating area with requirement to fill existing or contemplated vacancies elsewhere the provisions of Sections 1.(b) and 1.(c) of this Article will not be applicable and the Company will give written notice of intent to the Business Manager of the Local Union concerned.

3.(c) If an employee is reassigned under provisions (2) or (3) of Section 3.(b) of this Article to a job classification in which the employee is unskilled or inexperienced, the employee will be given training on the job and allowed a reasonable period of time to develop sufficient skill and ability to perform satisfactorily in the employee's new job classification. When by application of provisions (2) or (3) of Section 3.(b) an employee with five or more years of Company Seniority is reassigned to a job classification with a lower hourly rate of pay than the employee's former hourly rate a special basic rate of pay will be established for the employee by application of the formula set forth in Article VI, Section 3.(a) of this Agreement. Should such an employee subsequently be promoted to a job classification with a higher hourly rate of pay the employee's basic rate will be the starting rate for the higher job classification or the special basic rate as determined under Article VI, Section 3.(a), whichever is higher. When an employee with less than five years of Company Seniority is reassigned to a job classification with a lower hourly rate of pay by application of provision (2) or (3) of Section 3.(b) the employee will be paid the maximum hourly rate for the lower job classification.

3.(d) In situations when the application of the seniority principles of this Article V either involve groups of employees or involve two or more separate operating areas, the Company may, at its discretion, satisfy its obligation to contact affected employees by giving written notice. Such written notice shall contain information pertinent to the situation at hand and be posted on bulletin boards in the operating areas where the employees concerned are based. It shall remain posted for a period of not less than one calendar week before the Company takes action affecting the status of employees having direct and reasonable interest in the stated situation. A copy of any written notice under this Section 3.(d) will be forwarded to the Business Manager(s) of the Local(s) concerned and, when it appears desirable to the Company to insure adequate communication, copies may be forwarded to each employee having direct and reasonable interest in a stated situation.

3.(e) When, for reasons other than the employee's own request, an employee is transferred or reassigned under Sections 2.(a) or 2.(b) or Sections 3., 3.(a) or 3.(b) the employee will retain the employee's Classification Seniority in the employee's former operating area and job classification for purposes of reinstatement and promotion and, if reassigned to a lower job classification within the employee's normal sequence of progression, the employee's Classification Seniority in the lower job classification will be established in reverse sequence of normal progression. When an employee is required by the Company to transfer to another operating area, or is transferred to another operating area for the mutual convenience of the employee and the Company, and no change in job classification is

involved, the employee's Classification Seniority in the employee's former and new operating areas will be accumulative.

Employees reassigned since January 1, 1978 to another classification by the application of Section 2.(a) of this Article and who are later reinstated to their former classification, will have their Classification Seniority adjusted for a period up to the employee's recall rights had the employee elected layoff to reflect continuous former Classification Seniority.

3.(f) When an employee is transferred or reassigned from one operating area to another at the employee's own request, the employee's Classification Seniority in the employee's new assignment will begin on the effective date of the transfer and the employee will forfeit the employee's Classification Seniority in all job classifications the employee has held prior to the transfer.

3.(g) An employee who is transferred out of the bargaining unit and who is later transferred back into the bargaining unit will maintain continuous Company Seniority for the purposes of this Article and the employee's Classification Seniority will be determined in accordance with the provisions of this Article. Effective June 1, 1975 Company Seniority for purposes of layoff and transfer only will be the total length of time the employee has served in bargaining unit classifications.

Reinstatement and Recall

4.(a) Should opportunity for reinstatement to a higher job classification occur after an employee has been transferred or reassigned to a lower job classification for reasons other than the employee's own request or after demotion because of physical inability to perform the duties of the employee's assignment in accordance with provision (4) in Section 2.(f) of this Article, the employee involved will be reinstated in the higher job classification provided the employee is then able and willing to perform its duties. If more than one employee is involved, reinstatement to the higher job classification will be offered in reverse order to the previous reassignments.

4.(b) Employees with three or more years of continuous service who are laid off will be entitled to recall for a period of three years from the date of layoff. Employees laid off with less than three years but more than six months of continuous service will be entitled to recall for a period of one year from date of layoff. Employees with recall rights will be considered as regular bargaining unit employees for purposes of Article V, Section 1(d).

A certified letter to the Employees' last known address with a copy of the job posting and a reassignment application will be considered proper notification for purposes of this section. The completed reassignment application must be returned to the Company by certified mail within (10) calendar days from the date of the Company's mailing of the posting. In the event an employee is recalled the employee must be available, able, qualified to work and return to work within two weeks.

Laid off employees who are re-employed within their recall period will maintain continuous Company and Classification Seniority status during the period of layoff for the purpose of this Article and the starting rate of pay will be established according to the provisions of Section 2.(d) of this Article.

Adjustment of Classification Seniority

5. If a qualified employee is bypassed for a promotion in normal sequence to a higher job classification because of absence due to illness at the time the promotion is made and the employee is subsequently promoted to that higher job classification, the employee's Classification Seniority will be adjusted to place the employee in the relative status the employee would have attained in the higher job classification had the employee not been bypassed. If an employee is bypassed for promotion under these circumstances, the Company will advise the Business Manager of the Local Union concerned.

5.(a) In order to prevent an employee from being bypassed in the employee's normal sequence of promotion on or after June 1, 1972 within the operating area by (1) the lateral transferring of an employee from another seniority area; (2) an employee being accepted for a job posting at other than the starting rate; or (3) by the hiring of an employee at other than the starting rate or starting classification within the promotional sequence; an employee will retain the same Classification Seniority date the employee is assigned at the helper or starting classification within the sequence up through attaining

journeyman, but not including Lead or Chief Classifications where applicable. This will also apply to employees presently classified at the starting classification within the promotional sequence on June 1, 1972.

Employees who were classified journeyman prior to June 1, 1972 will have the number "2" immediately preceding their classification seniority date and will show primary seniority.

Employees in Military Service

6. The Company will reinstate without loss of Company Seniority employees, other than temporary, who have been granted leaves of absence for military service in accordance with federal statutes applicable thereto. In order to effect reinstatement it may be necessary to reassign, transfer or lay off other employees.

Probationary employees, who are reinstated, shall have their Company Seniority adjusted to the hiring date upon completion of their six-month probationary period. Service immediately preceding and immediately following the leave of absence shall be credited to the six-month probationary requirement.

Adjustment of Veteran's Seniority

7. If a regular employee is bypassed for a promotion in the employee's normal sequence of job progression because of military leave of absence and the employee is subsequently promoted to the higher job classification, the employee's Classification Seniority will be adjusted to place the employee in the relative status the employee would have attained in the higher job classification had the employee not been bypassed.

Seniority Lists

8. The Company will prepare and post on bulletin boards seniority lists showing the employee's name, job classification, date employed, Classification Seniority date and date classified. The seniority lists will show the relative Classification Seniority of employees in each job classification on an operating area or division basis.

ARTICLE VI
JOB CLASSIFICATIONS

1. Each employee will be assigned a job classification, the duties of which the employee is competent to perform and which generally reflect the employee's normal work. Such job classification shall not preclude assignment of the employee for limited periods on work other than that reflected by the employee's job classification in emergencies, for sickness or vacation relief, to meet the Company's service requirements, when the employee's normal work is slack or while the employee is being trained to better fit the employee for advancement in grade as vacancies occur.

2.(a) An employee performing the duties of a higher job classification than the employee's own within the bargaining unit shall be paid the maximum rate of the higher job classification for all hours so-assigned on one day, provided the employee works one or more hours in the higher job classification on that day. Temporary upgrades to Chief and Lead will be assigned according to the greater Classification Seniority among employees on duty in the job classification(s) affected. This provision will not apply to an employee who is performing the duties of a higher job classification while being trained under the direction of a qualified employee. Employees who are assigned to perform the duties of a higher job classification under this provision shall not acquire Classification Seniority in the higher job classification while so-assigned.

2.(b) When it is determined by the Company that an employee in a lower job classification who has been performing the duties of a Chief, Automotive Equipment Mechanic or Area Stockhandler job classification is qualified for promotion, the employee will upon promotion or upgrading be paid at the maximum rate for that classification. When an employee is promoted in accordance with the above, the one year probationary period will apply to the maximum rate.

When determination of qualifications has not been made prior to the promotion, the employee will upon promotion to such classification be credited with the amount of time served at the probationary wage rate of the job classification during the two year period immediately preceding the employee's promotion.

2.(c) If during a Supervisor's absence from work an employee in a Chief job classification is temporarily assigned to direct work forces normally directed by a Supervisor, the employee will be paid 7% of the applicable Chief's rate in addition to the employee's basic straight-time hourly rate for all hours so-assigned on one day provided the assignment is for one or more hours on that day. If a classification other than Chief is assigned, the employee will be paid the applicable Chief rate in addition to the 7% of the applicable Chief's rate for all hours so-assigned on one day provided the assignment is for one or more hours on that day.

2.(d) When crews headed by Chiefs are combined, and in the absence of a Supervisor, a single Chief is assigned to direct the work performance of the crews, the senior Chief will be upgraded to Supervisor, and the employee will be paid 7% of the applicable Chief's rate in addition to the employee's basic straight- time hourly rate for all hours so-assigned on one day provided the assignment is for one or more hours on that day.

2.(e) If during a Storekeeper's absence from work a Stockhandler at the maximum rate is temporarily assigned to conduct the work normally conducted by the Storekeeper, the employee will be paid 7% of the employee's basic straight-time hourly rate in addition to the employee's basic straight-time hourly rate for all hours so-assigned on one day provided the assignment is for one or more hours on that day.

2.(f) If during an Area Stockhandler's absence from work a Stockhandler at the maximum rate is temporarily assigned to conduct the work normally conducted by the Area Stockhandler, the employee will be paid the maximum rate of the Area Stockhandler classification for all hours so assigned on one day, provided the employee works one or more hours in that classification on that day.

2.(g) Meter readers may be temporarily assigned to perform the duties of a collector, as required. If this assignment exceeds a continuous period of one hour, then the employee is entitled for all hours so assigned on one day to be paid at the top of the rate of the collector's rate progression.

3. If it is definitely established (1) that a regular employee is incapable of performing the duties of the employee's job classification because of an injury sustained in the employ of the Company, or (2) that a regular employee having five or more years of continuous service is incapable of performing the duties of the employee's job classification because of a disability or infirmity arising from natural causes and the employee is assigned to a lower job classification within the employee's ability to perform, a special basic rate of pay will be established for the employee as follows:

3.(a) For an employee with less than twenty years of continuous service at the time of reassignment, the special basic rate will be determined by multiplying the difference between the employee's basic rate immediately preceding reassignment and the maximum basic rate for the lower job classification to which the employee is reassigned by the product of five percent times the employee's years of continuous service and adding the amount so-obtained to the maximum basic rate of the lower rated job classification. For an employee with twenty or more years of continuous service there will be no reduction in basic rate when reassigned to a lower rated job classification under this provision. Any special basic rate established under the terms of this provision will thereafter be subject to general wage adjustments made during the term of this Agreement.

3.(b) Should such an employee later qualify for and be promoted to a higher job classification, the employee's basic rate will be the starting rate for the higher job classification or the special rate as determined above, whichever is greater.

3.(c) The above Sections 3.(a) and 3.(b) apply to employees who may be reassigned to a lower rated job classification for reasons stated in Section 3. on or after June 1, 1973.

4. In order that the Union may maintain its records of bargaining unit employees the Company will periodically notify the Union of job classification changes. Such notification will provide the name, job classification and location for each bargaining unit employee hired, reclassified, transferred or separated from the Company. The information will be directed to the Business Manager of the Local Union having

jurisdiction over the location involved. If an employee within the bargaining unit is discharged, the Company will notify the Business Manager and the Assistant Business Agent for that specific work group of the Local Union concerned as promptly as possible.

4.(a) If a regular bargaining unit employee is suspended or discharged the local management of the Company will notify the Local Union representative on the same day of occurrence. If requested by the Union, the matter shall be discussed on that day by management representatives and the Local Union in the area concerned.

ARTICLE VII

SCHEDULES, WORKING HOURS, OVERTIME, PREMIUM AND HOLIDAY RATES

1. The Company will prepare and post on bulletin boards schedules of normal work coverage for the employees in various operating areas and divisions of the Company. The purpose of the schedules is to inform the employee of the employee's normal hours of work which shall consist of not more than eight hours per day or forty hours per week. The workweek shall consist of five consecutive days except for shift or scheduled workers. All hours worked in excess of eight hours per day or the basic forty hours per week, or outside of the employee's normal schedule, will be paid for at one and one-half straight-time rates except when other overtime rates, premium rates or holiday rates are applicable as herein provided. The regular rate for purposes of computing overtime compensation shall include only those amounts required to be included under the applicable law.

2.(a) For the purpose of this Agreement, employees are composed of shift, day and scheduled workers. (1) A shift employee is defined as one who works at a seven day operation or service, on a rotating or shift schedule. (2) A day worker is one whose basic workweek is Monday through Friday, or Tuesday through Saturday between the hours of 6 a.m. and 6 p.m. for 8 hours a day. (3) A scheduled worker is an employee, other than a shift worker or day worker, who works according to a schedule of hours at different times of the day or night and/or on different days of the week including Saturdays and Sundays.

2.(b) The Company may establish a "J" schedule (hours other than between 6 a.m. and 6 p.m.) in each of its operating areas; except that two "J" schedules may be established in the Stamford portion of the Norwalk area.

2.(c) If the Company changes or modifies working schedules in an operating area or division of the Company, in a manner which the Union considers arbitrary or unnecessary, the new schedule shall be worked subject to adjustment through the grievance procedure up to and including arbitration.

3. When working conditions permit, regular active employees will be allowed time off at basic straight-time rates on recognized holidays falling on a day within their normal schedule. When a regular employee is required to work on a recognized holiday falling on a day within the employee's normal schedule, in addition to holiday pay at basic straight-time rates, one and one-half straight-time rates will be paid for time worked within the employee's normally scheduled hours and double straight-time rates will be paid for time worked outside the employee's normally scheduled hours.

4.(a) When a recognized holiday falls on a day outside of a regular active employee's normal schedule, the Company at its option will either designate a day off from the employee's normal schedule with basic straight-time pay or pay the employee for the holiday at basic straight-time. When the Company designates a day off from normal schedule, it shall fall within a calendar period of twenty-three days beginning with the second Saturday preceding the calendar week within which the recognized holiday falls. When designating a day off under this provision the Company will endeavor firstly to make such day off be contiguous to another day off or, secondly to occur on a Sunday or, thirdly to occur on a day other than contiguous to another day off or other than on a Sunday. Exceptions to the foregoing sequence may be made to accommodate an employee's request for a designated day off provided the

exception does not require a change of normal work schedule for another employee who objects to such schedule change.

4.(b) When a regular employee is required to work on a recognized holiday falling on a day outside the employee's normal schedule, in addition to either the time off or the straight-time pay provision of Section 4.(a), above, one and one-half straight-time rates will be paid for time worked up to eight hours and double straight-time rates will be paid for time worked in excess of eight hours.

5.(a) The schedules of normal work coverage for employees who are assigned as shift or scheduled workers are made to meet the continuous nature of the Company's operations. **The Company and Union shall meet and discuss any permanent schedule change for shift or scheduled workers prior to implementation. During the course of discussions with the Company, the Union may seek input and poll the membership regarding any schedule change.** The job classifications of employees who normally are assigned as shift or scheduled workers are identified by the prefix "S" in the Schedule of Job Classifications and Basic Straight-Time Hourly Rates Appendix "A" of this Agreement.

5.(a.1) A Shift or scheduled worker required to work sixteen consecutive hours that include the eight-hour period immediately preceding the employee's normal schedule and eight hours of the employee's normal schedule will be paid at the applicable premium rate for the sixteen-hour period. Article VII, Section 10(b) will not be applicable for purposes of this Section.

5.(b) Upon request from shift or scheduled workers, the Company may, at its discretion with respect to extended hours of work and the numbers of simultaneous requests or extended periods of exchange, permit such employees to exchange their scheduled hours of normal work coverage within a work week provided the shifts are adequately covered without involving payment of overtime or upgraded rates. When such exchanges of scheduled work hours are permitted, the advance notice requirements of Section 6. of this Article shall not be applicable. No other such exchanges of scheduled hours of normal work coverage will be permitted, except for employees on a Tuesday through Saturday schedule.

5.(c) When an employee in any job classification is assigned to work on an afternoon or night schedule of normal work coverage, a premium of 7% of the employee's basic straight-time rate or $2.00 whichever is greater will be added to the employee's basic straight-time rate for all hours worked within that schedule and including all hours worked contiguous to that schedule. For the purpose of this shift premium provision, afternoon and night schedules of normal work coverage are defined as those which include normal schedule hours of work preceding 6:00 a.m., or following 6:00 p.m. For LNG employees, afternoon and night schedules of normal work coverage are defined as those which include normal schedule hours of work preceding 6:00 a.m., or following 7:00 p.m. A Garage Mechanic regularly assigned to the second shift shall receive the shift adder for all paid time off.

5.(d) A premium of twenty-five percent of the basic straight-time rate per hour will be added to the basic straight-time rates for time worked on Sundays on a normal schedule by shift or scheduled workers. This Section 5.(d) will not be applicable to time worked at double straight-time rates under the provisions of Section 13. of this Article.

6.(a) When possible, employees will be given not less than seventy-two hours advance notice of changes in their normal work schedules. In any case of a change of normal work schedule, the employee(s) affected must be advised of the change in advance of the starting time of the new normal work schedule for the purposes of the premium rate and rest time provisions of this Article VII.

6.(b) When an employee's normal work schedule is changed with less than seventy-two hours' advance notice, any time worked within the new normal schedule which was not normal work time under the old schedule will be paid for at one and one-half straight-time rates until the advance-notice period has expired, except when other rates are applicable, and excepted further that when an employee's normal work schedule is changed to provide relief coverage because of sickness or other unexpected absences of employees, forty-eight hours shall be the advance-notice period for application of greater than straight-time rates. An employee may be returned to the employee's previous normal schedule without forty-eight hours' advance notice after serving a relief coverage assignment as described herein.

6.(c) When operating or maintenance requirements make it necessary to change the normal work schedule of a day work employee, (other than a shift or scheduled worker), to an afternoon or night normal schedule, for other than relief assignments to normal schedules of shift or scheduled workers, the

employee will be paid at one and one-half times the employee's straight-time hourly rate for all time worked on the afternoon or night normal schedule which was not normal work time on the employee's daytime schedule provided the period of assignment is for three or less consecutive workdays. When the period of assignment is more than three consecutive workdays, the change of normal work schedule will be made in accordance with 6.(b) above. This Section 6.(c) will not be used to change the normal work schedules of day work employees from daytime to afternoon or night normal schedules except when the work to be done is necessitated by operating or maintenance requirements which must be continued on at least a two-shift basis or when it cannot be performed during daytime normal schedule hours. A day work employee may be returned to a daytime normal work schedule without seventy-two hours' advance notice.

6.(d) Whenever possible, employees will request permission for planned absence at least seventy-two hours in advance of such absence.

7. When operating conditions make it necessary for employees to work during their normal schedule lunch period, an alternate lunch period of equivalent time will be designated by the Supervisor. The alternate lunch period normally will be designated to begin not more than one hour before or one hour after the starting time of the normal schedule lunch period and when so-designated, time worked during the normal schedule lunch period will be considered as a part of the normal schedule workday. When the alternate lunch period is designated to begin more than one hour before or after the starting time of the normal schedule lunch period, that time will be paid at straight time rates and time worked during the normal scheduled lunch period will be considered as outside of the normal scheduled work day and will be paid for at the applicable overtime rates.

8. Insofar as practicable overtime work will be equitably distributed among suitably qualified employees who are in the job classifications in the area in which the work is to be performed. Records of distribution of overtime work will be made available to designated Union representatives upon their request and also posted on a weekly basis.

8.(a) CLERICAL CLASSIFICATIONS

Overtime work will be equitably distributed among suitably qualified employees who are in the job classification in the department in which the work is being performed.

8.(b) TECHNICIANS A & B

Overtime work will be equitably distributed among suitably qualified employees who are in the job classification in the department in which the work is being performed. Assigned work will be completed by technician without regard to seniority.

8.(c) CONSTRUCTION TECHNICIANS

Overtime work will be equitably distributed among suitably qualified employees who are in the job classification in the department in which the work is being performed. Assigned work will be completed by technician without regard to seniority.

9.(a) Whenever possible at least seventy-two hours' notice will be given to employees who are required to work prearranged overtime. For the purposes of this Section 9., prearranged overtime is defined as that for which four or more hours of advance notice has been given. Employees who are unable to report for overtime work will notify the Company as promptly as possible in order that planned work will not be disrupted.

9.(b) Except when assigned to call duty under the provisions of Article X, an employee who reports for prearranged overtime work on a day outside of the employee's normal work schedule will be paid for a minimum of four hours at applicable overtime rates. If an employee assigned under this Section 9.(b) is required to report on the job two or more times on one day, the employee will be paid a minimum of two hours at applicable overtime rates for each time the employee reports and, in addition, the employee will be paid for two hours at basic straight-time rates. When an employee is advised on less than **fifteen** hours' advance notice not to report for such prearranged overtime work the employee will be paid for two hours at the employee's basic straight-time rate. When an employee is assigned to call under the provisions of Article X the employee will be paid for overtime work in accordance with Article X and the provisions of this Section 9.(b) will not be applicable.

9.(c) When an employee reports for prearranged overtime work on a day within the employee's normal schedule, the employee will be paid for a minimum of two hours' work except that when the prearranged overtime is less than two hours and immediately precedes or follows the employee's normal schedule, the employee will be paid for the actual overtime worked at the rate applicable. When an employee is advised on less than **fifteen** hours' notice not to report for such prearranged overtime, the employee will be paid for two hours at the employee's basic straight-time rate except that when the prearranged overtime immediately precedes or follows the employee's normal schedule hours and would amount to less than two hours, the employee will be paid at the employee's basic straight- time rate for the actual amount of prearranged overtime involved.

10.(a) If an employee is required to work outside of the employee's normal schedule for more than one hour during the eight-hour period immediately preceding the starting time of the employee's next normal daytime schedule, (starting between 6 a.m. and 10 a.m.), the employee will, whenever possible, be allowed rest time during that normal schedule without loss of normal wages. The rest time shall be equivalent to the sum of the time worked and any **meal** time taken in accordance with Article XII during the above eight-hour period, except that eight hours rest time will be provided if an employee is required to work six consecutive hours during the above 8-hour period and is dismissed before the start of the normal schedule. When service requirements will not permit allowing all of the earned rest time off during normal schedule, that part worked will, except for holidays, be paid for at double straight-time rates.

If an employee is called out to perform work outside of the employee's normal schedule for more than one hour during the eight-hour period immediately preceding the starting time of a daytime prearranged overtime period, (starting between 6 a.m. and 10 a.m.),the employee will, whenever possible, be allowed rest time during that prearranged overtime period for which the employee will be paid straight-time rates. The rest time shall be equivalent to the sum of the time worked and any meal time taken in accordance with Article XII during the above eight-hour period. When service requirements will not permit allowing all of the earned rest time off, that part worked will, except for holidays, be paid for at double and one-half straight-time rates.

10.(b) If an employee is required to work beyond sixteen consecutive hours the employee will, whenever possible, be allowed a period of eight hours time off before returning to work. Any part of such time off which extends into the employee's normal work schedule will be paid for at straight-time rates. Time allowed off for meals (meal time not taken) will be counted in determining sixteen consecutive hours for the purpose of this Section, but will not count towards rest time. When service requirements will not permit allowing as earned rest time off that part which may extend into normal schedule, that part worked during normal schedule will, except for holidays, be paid for at double straight-time rates.

11. If an employee is required to work beyond sixteen consecutive hours, the employee will be paid at double the employee's straight-time rate for those hours worked beyond sixteen, until the employee is allowed eight consecutive hours off. Time allowed off for meals (meal time not taken) will be counted in determining sixteen consecutive hours for the purpose of this Section, but will not count towards eight consecutive hours off.

12. When meals are furnished by the Company under the provisions of Article XII, Section 5., time allowed off for meals will be paid for at the applicable overtime rates except for the normal scheduled or designated (midday or midshift) lunch period. If a meal is furnished under this provision following the conclusion of the workday, one-half hour eating time at the applicable overtime rates will be paid.

13.(a) A Shift or scheduled worker will be paid double the straight-time rate for all hours worked on Sunday outside the employee's normal schedule.

13.(b) Employees with Sunday as a normal scheduled day off in any calendar week shall be paid double time for work on that Sunday, and at time and one-half for work on the other normal scheduled day off in that calendar week. Employees required to work on a Sunday within their normal schedule in any calendar week shall receive time and one-half for work on the first normal scheduled day off and double time for work on the second normal scheduled day off in that calendar week.

14. When two or more rates may be applicable, the higher rate shall be applied. There shall be no duplication in the application of regular, overtime or premium rates of pay for the same hours worked.

ARTICLE VIII

HOLIDAYS

1. New Year's Day, Martin Luther King Day, Presidents' Day, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day and Christmas Day shall be recognized as holidays. Whenever any of such holiday(s) occur upon Sunday, the Monday next following such day shall be recognized as the holiday, except that for those employees who are required to work that Sunday, as part of their normal schedule, the holiday will be observed on Sunday. Whenever any such holiday(s) occur upon Saturday, the Friday preceding such day shall be recognized as the holiday, except that, for those employees who are required to work that Saturday, as part of their normal schedule, the holiday will be observed on Saturday.

2. In addition to the 10 federal holidays above, employees will be granted two floating holidays during the calendar year based on operational requirements and supervisory approval. The two floating holidays can be used for any reason and are requested by the employee. In the event of a conflict between employees requesting the same date, seniority shall govern. These two floating holidays must be taken in full eight (8) hour increments.

ARTICLE IX

VACATIONS

1. Vacation Allowance: Regular employees will be allowed the following vacation periods annually with basic straight-time pay:

(a)(1) For employees with less than one year of service and hired between January 1 and March 31 of the current calendar year will be allowed three weeks of vacation.

(a)(2) For employees with less than one year of service and hired between April 1 and June 30 of the current calendar year will be allowed two weeks of vacation.

(a)(3) For employees with less than one year of service and hired between July 1 and September 30 of the current calendar year will be allowed one week of vacation.

(a)(4) For employees with less than one year of service and hired between October 1 and December 31 of the current calendar year will not be granted vacation for that period.

1.(b) Employees who are expected to complete at least one year of continuous service by December 31 of a calendar year will be allowed three weeks' vacation in that and each succeeding calendar year until eligible for four weeks' vacation under 1.(c) below.

1.(c) Employees who are expected to complete 10 years of continuous service by December 31 of a calendar year will be allowed four weeks' vacation in that and each succeeding calendar year until eligible for five weeks' vacation under 1.(d) below.

1.(d) Employees who are expected to complete 20 or more years of continuous service by December 31 of a calendar year will be allowed five weeks' vacation in that and each succeeding calendar year.

Less than one year of service	Start date January 1 through March 31 – 15 days
	Start date April 1 through June 30 – 10 days
	Start date July 1 through September 1 – 5 days
	Start date October 1 or later – no vacation accrued.

One year but less than 10 years	15 days per year
10 years but less than 20 years	20 days per year
20 years or more	25 days per year

2. Consistent with the Company's service obligations, vacation periods will be scheduled to meet and suit the convenience of employees. Insofar as practicable, employees will be granted preference in selecting vacation periods in descending order of Company Seniority on an operating area or departmental basis as involved. Such preference for selection will be granted in the following order: (1) for all vacation periods under 1(a), 1(b) above, (2) for all third week vacation periods, (3) for all fourth week vacation periods, (4) for all fifth week vacation periods, (5) for any additional vacation days granted because of recognized holidays falling within vacation periods. Each operating area will, not later than April 1st, prepare and post on appropriate bulletin boards schedules showing the time of vacation periods granted. In order that the Company will be able to prepare and post vacation schedules by April 1st, it will be necessary for employees to make their selections of vacation periods promptly. In the event an employee fails to make the employee's selection within a reasonable period of time, the employee will forfeit the employee's turn until all other employees involved have made their selections. Should any employee fail to make the employee's selection(s) by March 1st, the Company, at its discretion, may schedule that employee's vacation period. Changes in any scheduled vacation period may be made with mutual consent of employees involved and the Company. When choice of vacation period has been granted, it will not be interfered with except in emergencies.

3. When a recognized holiday falls within an employee's vacation period, an additional day of vacation with basic straight-time pay may be scheduled. Whenever possible the additional vacation day will be scheduled to either immediately precede or follow the vacation period during which the recognized holiday occurs or to be consecutive to other scheduled days off. When the Company cannot schedule or the employee does not desire such additional vacation day to be scheduled in the foregoing manner, it may be scheduled for some other available day. If it is determined by the Company that no additional day of vacation can be granted, the employee will be paid an additional day's pay at basic straight-time rate in lieu of the additional vacation day and such day's pay will be included with wages paid for the week during which the recognized holiday occurs.

4. Any employee with more than one year of continuous service who resigns and has given the Company at least two weeks' notice, or who is discharged by the Company, shall, at the time of the termination of the employee's employment, be credited with any vacation pay which the employee has earned but not received, prorated at one-fifth of the employee's total vacation allowance for each full month of full-time, active employment completed between January 1 and June 1 of that year. Any such employee who leaves after June 1 will be entitled to the employee's full vacation or pay for that calendar year.

Any employee who retires after January 1 of any calendar year will be credited with vacation time for any portion of the employee's total vacation allowance for that calendar year which the employee has not already received. However, in the normal case, such employee will be required to schedule the employee's entire vacation prior to the employee's retirement date. An employee retiring on any February 1 who is entitled to more than four weeks of vacation will schedule such vacation during January of that year and in the latter part of December of the preceding year.

ARTICLE X
CALL TIME

1. Employees whose job requirements include assignment to take trouble calls outside of normal scheduled hours will be required, during periods of such assignment, to make themselves available at their reporting base within approximately one-half hour.

Such employees shall upon request be excused from “On-Call”/Shift assignment for a period of not less than twelve months provided the employee has reached 45 years of age**,** has greater department/classification seniority, and the granting and/or continued compliance with the request does not subject the remaining employees on call in the operating area and department to a normal schedule call assignment frequency greater than one out of four.

Any employees so excused will be excluded from the provisions of Article VII, Section 8, but the Company will attempt to equalize scheduled overtime to the extent possible without keeping dual overtime records.

Employees who are excused from “On-Call” shall have 2000 hours added to their overtime hours on the overtime list.

For the purpose of unplanned overtime, the overtime list will be followed as per normal practice.

For the purpose of planned overtime, the administrative 2000 hours figure will be disregarded.

2. Employees who are assigned by the Company to take trouble calls outside their normal schedule hours will be paid (1) one and one-half hours at basic straight-time rates for each such 24 hour period assigned - Monday through Friday, (2) three hours at basic straight-time rates for each 24 hour period on a Saturday, Sunday, or recognized holiday so-assigned. If called upon to perform work, in addition to the call-time pay they will be paid for the time worked at the rate applicable but not less than two hours for each time called out, except they will be paid not less than three hours at the applicable rate for each time called out between 12:00 midnight and 6:00 a.m.

3. Time worked under Section 2 will be computed from the time of receipt of each call out, and unless the time extends into the employee’s scheduled work time, until return to place of receipt of the call out.

4. Employees not assigned to take trouble calls outside their normal schedule hours but who are called out to perform other than prearranged overtime work will be paid at a minimum of two hours the rate applicable for each time called out except they will be paid not less than three hours at the applicable rate for each time called out between the hours of 12:00 midnight and 6:00 a.m. Time worked will be computed as described in Section 3. Travel time will not be considered as time worked for purposes of Article VII, Section 10(a).

ARTICLE XI
SAFETY

1. In job assignments and in assignments to do specific pieces of work only such employees shall be assigned as have the necessary judgment, skill and ability, as generally reflected by their job classifications and normal assignments, to safely perform the work to be done.

2. The Company will issue a copy of its "Accident Prevention Manual" to each employee covered by this Agreement. Any changes in the rules in the "Accident Prevention Manual" shall be a matter of discussion between the Parties before becoming effective. Once the Company has made a decision on any such change in a safety regulation the grievance procedure up to and including arbitration may be initiated to determine if the Company acted reasonably in making such change.

3. The Company will furnish suitable protective equipment and take such other precautions in the interest of safety as conditions require.

4. Respirators, fire extinguishers and first-aid kits will be standard equipment on all trucks where conditions require.

5.(a) Protective equipment such as safety belts, rubber gloves with protectors and welder's equipment will be furnished by the Company. The Company will furnish coveralls or shirt and pants for painting of a nature where normal painting practices fail to prevent for all practical purposes destruction of the employee's clothing. Where required on the job the Company also will furnish for the use of employees, boots, raincoats, rainhats, heat-protective gloves, working gloves and other protective items which it has customarily furnished in the past. In addition, plastic raincoats will be furnished to collectors and rubbers to collectors and Meter Readers. Protective equipment furnished by the Company shall not be used by employees for purposes other than Company work. Such equipment shall normally be stored

on Company property or in other locations authorized by the Company where it will be readily available for use when required. Each employee to whom the foregoing equipment is issued will be expected to exercise reasonable care in its use and to guard it against unnecessary damage or loss.

The Company shall repair or replace an employee's clothes which have been damaged or destroyed through an unusual incident on the job related to the employee's work except where the employee has failed to use the protective clothing furnished by the Company. The foregoing shall not apply to an employee's clothes which are worn out, damaged or soiled through daily attrition.

5.(b) Each employee shall provide and own all ordinary hand tools commonly required in the employee's regular assignment. The Company shall provide and own all tools used by a gang or crew such as picks, shovels, crowbars, chain hoists and the like as required. The Company also shall provide and own uncommon and infrequently used equipment and tools such as those of larger size than ordinary hand tools or any special tools required for special purposes, including body belts. In addition, the Company shall provide those hand-tool items which are consumed in use such as files, bits, drills, hacksaw blades and the like.

5.(c) It shall be the responsibility of both the Company and the employees to maintain their respectively owned tools and equipment in good condition at all times and make replacements promptly when required for the safety of employees. The Company shall replace employees' personally owned hand tools if worn out or broken in normal use on the job. Worn out and broken tools replaced in accordance with this provision shall be turned over to and become the property of the Company.

6. No employee shall be required to perform any hazardous task, with which the employee is not familiar, without proper instruction and close supervision. When working on emergency service restoration, employees shall call the appropriate Company office or person designated by the Company to receive such calls for any assistance that may be required for compliance with safe work practices.

7. Except in emergency, no employee shall be required to do outdoor work when weather conditions might make such work unsafe. An emergency, as referred to in this Agreement, is any unforeseen circumstance which involves the safety of any person, loss of or damage to any property, or interruption of or interference with service or operation.

In case of construction or maintenance forces, who are normally engaged in outdoor work, extreme cold shall be considered as contributing to unsafe conditions. Such extreme cold shall be established when temperature is 10° or lower at the work location. However, they will be expected to do essential work to maintain operations such as outdoor switching and fuel handling.

It will be the policy of the Company to give reasonable consideration to limiting the outside work of Meter Readers, when extreme weather conditions exist, providing the nature of the work will permit postponement.

LNG employees, who are normally engaged in outdoor work, will be expected to perform essential functions including but not limited to snow removal, facility walkthroughs and maintenance in order to maintain operations in all weather conditions.

Employees excused from their normal duties due to this section may be assigned to other work as closely applicable to their work as is available, but need not be confined to work applicable to their specific job classifications.

8. Safety is a joint responsibility of supervisors and employees. The primary function of Supervision is to direct work in a safe manner at all times. Supervisors will endeavor to see that employees observe necessary safety precautions to protect against exposure to danger or in other situations of potential hazard and will direct operations in such a manner that safety precautions are observed. Supervisors will refrain from engaging in manual work when such engagement prevents them from giving adequate attention to their responsibilities as outlined in this Section.

9.(a) Representatives of the Company and the Union shall meet twice annually at the request of either party to discuss matters pertaining to safety. At such times as are mutually agreeable employee representatives designated by the Union, not to exceed a total of ten (10) union employees, five (5) from each Local, will be allowed time off from normal work schedule without loss of basic wages to meet and confer with designated representatives of the Company concerning matters of safety.

9.(b) In the month of November, Local Union Business Managers or Assistant Business Managers may, in their respective jurisdictional areas, nominate one regular bargaining unit employee for membership on each operating area safety committee. Appointment of nominees will be made by the Company with due consideration for safety- committee-membership rotation and cross-section representation of job classifications on each committee.

9.(b.1.) At the request of either party, meetings will take place on a monthly basis to discuss matters pertaining to safety.

ARTICLE XII
EXPENSE ALLOWANCES

1. When required to work distant from the base area, employees will be paid expense and travel allowances as follows:

1.(a) When the Company supplies transportation between the base and work, employees will be allowed travel time at the rate applicable and equal to the time spent en route.

1.(b) When requested to travel by means of specific public transportation, employees will receive the actual fare paid and will be allowed travel time at the rate applicable and equal to the time spent en route.

2. Except when Section 1 or Section 3 of this Article is applicable, an employee required to make the employee's own arrangements to report at a job location outside the employee's base area (except AMR satellite locations – Hartford and Waterbury) will be paid a daily expense allowance as provided under one of the following Plans:

Plan A - If the distance one way is twenty-five miles or less; $28.32 per day.

Plan B - If the distance one way is over twenty-five miles but not over forty miles; $50.18 per day.

Plan C - If the distance one way is over forty miles but not over sixty miles; $57.39 per day.

Plan D - If the distance one way is over sixty miles but not over ninety miles; $64.82 per day.
When the distance is beyond ninety miles, the employee will be paid mileage at the current NU mileage rate for each mile beyond ninety miles.

(a) If on any one day an employee travels one way to or returns one way from a job location under the provisions of Section 1. of this Article, the employee will be paid an expense allowance on that day under one of the following Plans:

Plan E - If the distance one way is thirty miles or less; $24.34 per day.

Plan F - If the distance one way is over thirty miles; $33.41 per day.

2.(b) For the purposes of the above Plans, distances shall be measured over highways which are reasonably passable and which provide the shortest routes between the employee's base area headquarters and the job locations involved.

2.(c) If an employee is required to report at two or more job locations outside of the employee's base area on one day the employee will be paid the daily expense allowance provided under the Plan

applicable to the job location which is the greatest distance from the employee's base area headquarters. In addition, the employee will be reimbursed at the current NU mileage rate one way for the actual distance traveled between the job locations involved on the day. This Section 2.(c) will not be applied to require an employee to report at two or more job locations on one day involving Plans B, C, D, or F except when it is necessary to do so to provide a full day's work or when emergency work is required. Whenever possible, employees will be advised not later than the day preceding requirement to report at a different job location.

3. An employee authorized to make occasional use of the employee's personally owned vehicle for Company business during working hours and for which the employee is not being paid a travel expense allowance under other provisions of this Article will be reimbursed at the current NU mileage rate.

The current NU mileage rate may be changed by the Company at its sole discretion without notice to, or negotiation with the union. Changes or modifications to the rate will also not be subject to the grievance and arbitration procedure.

4. If an employee is required to work overtime and is thereby put to additional expense to obtain a meal, the employee will, except when Section 5. of this Article is applicable, be paid a meal allowance of $10.00 for meals between midnight and 3:59 p.m. and $20.00 for meals between 4:00 p.m. and 11:59 p.m.

4.(a) When required to report for work starting one hour or more before the employee's next normal schedule starting time without having been given twelve or more hours' advance notice.

4.(b) When required with twelve or more hours' advance notice to report for prearranged overtime work an allowance will be paid for one meal if the reporting time is two or more hours: (1) before the employee's normal schedule starting time on a day within the employee's normal schedule; or (2) earlier in the day than the employee's starting time on a normal schedule workday if the work is on a day outside the employee's normal schedule; or (3) before the normal schedule starting time of a shift or scheduled worker.

Exception to the twelve hours' advance notice provisions of Sections 4.(a) and 4.(b) will be made when a shift or scheduled worker is required to report for prearranged overtime work on a shift starting at or between the hours of 12:00 Noon and 6:00 p.m. In such situations four or more hours' advance notice will be applicable. When advance notice to report for prearranged overtime work under the above conditions has not been given an allowance will be paid for a midday (midshift) meal also provided such meal is involved.

4.(c) When required to work one-and-one-half hours or more beyond the employee's normal schedule hours.

4.(d) When working a total of more than 15 minutes during the hour that starts at 7 AM, noon or 5 PM (an additional meal allowance will be provided for each additional five hours of overtime worked after 6 PM and before 7 AM).

4.(e) Under the conditions described in this section an employee will be allowed three quarter hour eating time for the first meal earned after working one-and-one-half hours beyond the employee's normal scheduled hours or after working one-and-one-half hours beyond eight hours of continuous prearranged overtime work and one-half hour for any other meals earned which the employee will be paid at the applicable overtime rate except for (1) the normal schedule or designated lunch period and, (2) meals eaten during working time. This eating time does not count toward the five hours required for an additional meal when the employees stop to eat.

5. During times of emergency when employees cannot be released long enough to make arrangements for their meals or lodgings, the Company at its expense will make suitable arrangements for same. Under such conditions the provisions of Section 4. of this Article shall not apply. For the purpose of this Section meals will be furnished at five-hour intervals unless a majority of the employees concerned in a work group agree to extend the five-hour interval. (See Article VII, Section 12., concerning time off for meals furnished under this Section 5.).

6.(a) When at the Company's request an employee is reassigned or transferred under the provisions of Article V and a change of residence is required, the employee will be reimbursed for mileage

between the employee's former reporting base and the new reporting base and will be reimbursed at the current NU mileage rate.

The following conditions apply to above temporary expense allowance:

(1) The expense allowance will be applied for each day the employee provides the employee's own transportation to travel to and/or from the employee's new reporting base.

(2) The amount of expense allowance will be based upon the actual distance in miles between the former and new reporting bases as measured over streets and highways that are reasonably passable and provide the most direct route.

6.(b) In lieu of the expense allowance outlined in Section 6.(a) the Company may either provide the employee with transportation or require the employee to live in the employee's new base area and make arrangements for the employee's meals and lodgings at Company expense.

6.(c) Payment of the expense allowance or provision of transportation or meals and lodging under this Section 6. will be limited to the first thirteen weeks from the effective date of assignment at the new reporting base or until the effective date of the employee's change of residence, whichever occurs earlier.

7. When in the judgment of the Company the expense allowances provided in this Article are insufficient to cover reasonable expenses it may, upon review of any particular case, make an additional allowance to cover expenses actually incurred.

8. If, during the term of this Agreement, the Company contemplates changing a current practice or privilege, not specifically covered in this Agreement, which, if changed, would result in a significant increase in employees' personal expenses, the Business Manager or an Assistant Business Manager of the Local Union concerned will be advised in advance of the change as soon as practicable. Upon request of either party, Union and Company representatives will meet for discussion of such change.

9. The Company will provide an annual tool upgrade allowance of up to **$800.00** per year for Garage Mechanics. The employee must furnish a receipt of purchase for reimbursement documenting the purchase of job specific tools.

Any Testing Equipment, Diagnostic Tools, Torque Wrenches, Specialty Tools or Socket Sets over ½ inch drive required by the Company for performance of any job will be **supplied by the Company as shop tools.** The employee will be responsible for any tools lost or damaged through the employee's own negligence.

Any repair and/or replacement of a cordless/battery operated tool, including batteries, shall be the responsibility of the employee.

New hires and transferees to the Garage Mechanic Classification shall provide and own all ordinary hand tools commonly required in the employee's regular assignment. The Company shall replace employees' personally owned hand tools **used on Company assigned work** if worn out or broken in normal use on the job **provided the tools are not covered under warranty at the time they are worn out or broken**. Worn out and broken tools replaced in accordance with this provision shall be turned over to and become the property of the Company.

If an employee's tools are stolen, **not lost, while they are on Company property,** they will be replaced by the Company, if, in the Company's opinion a valid and justifiable claim exists.

ARTICLE XIII
NOTICES

1. The Company will furnish suitably identified bulletin boards for use by the Union in such numbers and locations as mutually agreed upon. The purpose of these bulletin boards will be for the posting of notices pertaining to the Union and its members. All Union notices must be signed by an official of the Union and such notices shall contain nothing political, controversial or reflecting upon the Company, Union or any employees. Either the Union or the Company may remove from these bulletin boards any notices posted thereon which do not comply with this Section 1.

2. If a general notice to employees or the public is issued pertaining to a change made in this Agreement it shall be signed jointly by representatives of the Company and the Union.

ARTICLE XIV

STRIKES AND LOCKOUTS

During the term of this Agreement, the Company will not engage in any lockout and the Union will not take part in or cause, nor will its members take part in any strike, slowdown or stoppage of the Company's operations. All grievances arising under this Agreement shall be settled in the manner provided for in Article III.

ARTICLE XV

WAGES

Appendix “A” attached hereto and made a part hereof lists the job classifications covered by this Agreement. Appendix “A” is in **four** parts. The first part shows the basic straight time hourly rates of pay applicable to each job classification effective as of **December 1, 2022** for employees who are employed in the listed job classifications on the date this Agreement is signed by authorized representatives.

The second part of Appendix “A” shows the basic straight time hourly rates of pay applicable to the listed job classifications effective on **December 1, 2023.**

The third part of Appendix “A” shows the basic straight time hourly rates of pay applicable to the listed job classifications effective on **December 1, 2024.**

The fourth part of Appendix “A” shows the basic straight time hourly rates of pay applicable to the listed job classifications effective on **December 1, 2025.**

ARTICLE XVI

CONTRACT WORK

Work regularly performed by employees covered by this Agreement will not be contracted out if it would result in loss of continuity of employment or opportunities for permanent promotions to job classifications covered by this Agreement.

ARTICLE XVII

COMPLIANCE WITH LAW

No provision in this Agreement shall be deemed to require the Company or the Union to disregard existing or future laws affecting the relations of the Company, the Union and employees. All provisions of this Agreement are subject to all applicable laws now or hereafter in effect and to the lawful regulations, rulings and orders of regulatory bodies having jurisdiction. If any such laws, regulations, rulings or orders shall conflict with any provision of this Agreement, the Company and the Union shall confer to negotiate a lawful modification. The lawful invalidating of any provision shall not affect the remaining provisions of this Agreement and it shall not constitute a grievance for the purposes of Article III or Article IV.

ARTICLE XVIII

EMPLOYEE BENEFITS

1. It is the intention of the Company to continue its present practices with respect to benefits provided under group insurance plans and the plan provisions applicable to a “Yankee Participant” as such term is defined in the NUSCO Retirement Plan for the term of this 2008 Agreement as amended by the documents titled Yankee Gas Health Benefit Program – December 30, 1992, Long-Term Disability (LTD)

Plan Change – August 14, 1992, and 401(K) Plan Change – August 14, 1992 and as amended in the 1995, 1997, 2001, 2005 and 2008 Final Offers.

Beginning January 1, 2009, the Company will offer the K-Vantage Benefit to employees hired on or after January 1, 2009. K-Vantage will also be available to employees hired prior to January 1, 2009 who have chosen K-Vantage in lieu of additional service and earnings credits under the NUSCO Retirement Plan.

It is understood and agreed by the Union and Company that continuance of benefits provided under group insurance plans will, of necessity, be contingent upon the rules and regulations applicable thereto as established and administered by the insurance companies involved. It is further understood and agreed that application of these employee benefits shall not be subject to grievance procedure or arbitration.

2. If during the term of this Agreement a regular employee sustains an injury on a Company job which results in total incapacity and which prevents the employee from doing any work and which is compensable under the Worker's Compensation laws of the State of Connecticut, the employee shall be paid the difference between the employee's normal basic after-tax wages and Worker's Compensation benefits for the period of total incapacity not in excess of one year from the date of the injury. If it is established that the injury is caused by the negligence of a third party and that third party makes settlement with the injured employee, the Company shall be reimbursed for all wage payments made to the injured employee to the extent that such settlement covers the Company's payments made under the terms of this provision.

ARTICLE XIX
GENERAL

1. During negotiations for the amendment or replacement of this agreement, the Company will pay basic straight time wages to not more than 1 employee representative of the union from each operating area for time lost from their normal work schedules while attending meetings with Company representatives. There will be only 1 representative from each operating area. If any of these Union representatives is a shift or scheduled worker and the employee's schedule of normal work coverage includes shifts directly preceding and directly following the time during which a negotiation meeting with the Company takes place, the employee will be allowed time off with basic straight-time wages from either the shift directly preceding or the shift directly following, but not both, provided that the period of time elapsing between the end of the shift directly preceding and the beginning of the shift directly following does not exceed sixteen hours.

2. Upon written request from the Union, the Company will arrange for a leave of absence for up to two employees who are elected or appointed to the office of full-time Union representative for the Local Unions participating in this Agreement. Such arrangement will include a provision for the Local Union to pay all costs required to maintain the employee's benefits during the employee's leave of absence. The arrangement will also include provisions governing the seniority status of the full-time Union representative in such manner as may be mutually agreed upon by the Company and the Union.

3. It is recognized that the Company may occasionally assign employees covered by this Agreement to work in locations and upon facilities other than those owned or operated by the Company. On such occasions the employees involved, the Union and the Company shall be bound by the provisions of this Agreement. When providing emergency assistance to other utility companies not owned or operated by Northeast Utilities during major outages and/or major service restoration Section 2 of Article XII shall not be applicable, and all hours for travel or work time paid under the terms of this Agreement will be paid at double straight-time rates.

ARTICLE XX

DURATION

This Agreement supersedes all previous agreements and shall continue in force from the first day of **December 2022** until **December 1, 2026** and thereafter for periods of one year unless canceled by advance notice in writing by either party to the other, the advance notice to be given at any time during a thirty-day period, the beginning of which period is ninety days prior to **December 1, 2026** or December 1st of any year thereafter.

If either party desires to amend this Agreement on the **December 1, 2026** anniversary date or on December 1st of any year thereafter, a list of all proposed changes shall be submitted to the other party in writing prior to September 1st of the year involved. The party receiving the proposed changes shall have until September 10th to submit additional proposed changes to the other party. The Company and the Union agree to meet promptly thereafter in the period between the 90th and 61st day prior to the anniversary date of the Agreement to discuss the proposed changes and endeavor to reach an understanding on them. If all proposed changes are not thus disposed of in a mutually satisfactory manner, (1) the proposed changes remaining in dispute may, by mutual agreement, be submitted to arbitration or (2) either party prior to November 1st of that year may serve notice of cancellation of the Agreement if such action is deemed desirable. If all proposed changes are disposed of in a mutually satisfactory manner, the amendments mutually agreed upon shall take effect on the following December 1st, unless the parties agree upon a different effective date.

If notice is given as provided for above it shall be by registered mail addressed to, respectively:

Labor Relations

Footnotes:

Service Mechanic -

In locations where service requirements necessitate the scheduling of a Service Mechanic for normal work coverage on Sundays, the provisions of Article VII, Section 2. will not apply provided another Service Mechanic is assigned to call at the same time in the same location.

1 Location is "As Assigned" unless a specific location is designated.

I For incumbents only.

S Shift or Scheduled Workers.

X Monday - Friday: 3:00 PM to 11:30 PM Schedule

* Rate bands designated with "*" provide minimum rates which are probationary for one year and maximum rates which are paid after the probationary period to qualified workers who regularly perform the grade of work specified for the rate band.

y Rate bands designated with "y" provide for increases at approximately six-month intervals to employees who make satisfactory progress.

z Rate bands designated with "z" provide minimum and maximum rates and intermediate rates which will be based upon an employee's relative skill, efficiency and ability to perform the work assigned. After one year of satisfactory performance of the grade of work required for the job classification, employees will be paid the maximum rate of the band applicable to the job classification.

ø Rate bands designated by "ø" cover the range starting with the new employee or beginner and finishing with an experienced and fully qualified worker or helper in the respective job classifications. Increases within these bands are made at approximately six-month intervals to employees who make satisfactory progress. The hourly rate step increases applicable to the job classifications are as follows:

\# Rate bands designated with "#" provide for increases at approximately twelve-month intervals to employees who make satisfactory progress.

** Rate bands designated with "**" provide for increases at approximately six-month intervals from Step 1 to Step 2 and twelve-month intervals from Step 2 to Step 3 to employees who make satisfactory progress.

Footnotes:

Service Mechanic -

In locations where service requirements necessitate the scheduling of a Service Mechanic for normal work coverage on Sundays, the provisions of Article VII, Section 2. will not apply provided another Service Mechanic is assigned to call at the same time in the same location.

1 Location is "As Assigned" unless a specific location is designated.

I For incumbents only.

S Shift or Scheduled Workers.

X Monday - Friday: 3:00 PM to 11:30 PM Schedule

* Rate bands designated with "*" provide minimum rates which are probationary for one year and maximum rates which are paid after the probationary period to qualified workers who regularly perform the grade of work specified for the rate band.

y Rate bands designated with "y" provide for increases at approximately six-month intervals to employees who make satisfactory progress.

z Rate bands designated with "z" provide minimum and maximum rates and intermediate rates which will be based upon an employee's relative skill, efficiency and ability to perform the work assigned. After one year of satisfactory performance of the grade of work required for the job classification, employees will be paid the maximum rate of the band applicable to the job classification.

ø Rate bands designated by "ø" cover the range starting with the new employee or beginner and finishing with an experienced and fully qualified worker or helper in the respective job classifications. Increases within these bands are made at approximately six-month intervals to employees who make satisfactory progress. The hourly rate step increases applicable to the job classifications are as follows:

\# Rate bands designated with "#" provide for increases at approximately twelve-month intervals to employees who make satisfactory progress.

** Rate bands designated with “**” provide for increases at approximately six-month intervals from Step 1 to Step 2 and twelve-month intervals from Step 2 to Step 3 to employees who make satisfactory progress.

APPENDIX C

"LOCAL SENIORITY AREAS"

Operating Area

Division	(Local Seniority Areas)
Northern/Eastern	Danielson East Windsor Waterford
Southern	Danbury Norwalk Shelton
Western	Bristol Meriden Torrington Waterbury
Eastern Construction Group	Meriden
Western Construction Group	Shelton

PROVISIONS PERTAINING EXCLUSIVELY TO EMPLOYEES AT THE LNG PLANT

Schedules, Working Hours, Overtime, Premium and Holiday Rates

For the LNG facility, the hours of coverage will be twenty-four (24) hours daily and seven (7) days per week. Article VII, Section 1 shall not apply. All hours worked in excess of forty hours per week, or outside of the employee's normal scheduled shift, will be paid for at one and one-half straight-time rates except when other overtime rates, premium rates or holiday rates are applicable as herein provided. The regular rate for purposes of computing overtime compensation shall include only those amounts required to be included under the applicable law.

Call Out

Employees not assigned to take trouble calls outside of their normal scheduled hours but who are called out to perform other than prearranged overtime work will be paid at a minimum of two hours at the applicable rate for each time called out except they will be paid not less than three hours at the applicable rate for each time called out between the hours of 12:00 midnight and 6:00 a.m. Such pay shall be computed from the time the employee reports to work to the time of completion of the employee's work, to which time shall be added one-half hour for travel to work and one-half hour for travel from work. However, if an employee is called in for work which continues into the employee's regular working schedule, the employee shall be paid for the call out only for actual time worked and the half hour travel time to work.

Rest Time

LNG employees shall not be entitled to earn eight hours rest time if they are required to work six consecutive hours during the eight hour period immediately preceding the starting time of their next normal schedule.

Holidays

Pursuant to Article VIII, there shall be twelve (12) paid, eight (8) hour holidays per year. When an employee works a holiday, he or she will be paid at the applicable rates pursuant to Article VII. Lieu days will continue to be administered per the contract except that in addition to eight (8) hours of holiday pay, at the employee's option and when the employee uses a lieu day during a twelve (12) hour shift, he or she may elect to deduct twelve (12) hours from the balance of lieu time if available, four (4) hours of "no pay" or four (4) hours of vacation pay to equal a twelve (12) hour day.

APPENDIX D

TOPIC: Employee Benefits – Business Travel Accident/Basic Accidental Death Benefit

(A) It is the Company's intention to continue its past practices with respect to employee benefits. Should the Company contemplate any diminution of employee benefits affecting bargaining-unit employees, the matter will be discussed with the Union in advance of the change.

(B) In the event any bargaining-unit employee dies or becomes injured accidentally while traveling on Company business, he/she will receive a benefit equal to five times annual Base Earnings with a maximum coverage of $1,000,000 (subject to possible reduction in the event of a multi-employee accident). This coverage does not require participation in any other Life or Accident insurance program. In addition, if the employee is enrolled in Employee Life, a benefit equal to the Employee Life coverage amount, up to a maximum of $120,000, will be provided automatically.

TOPIC: Leave of Absence for Military Service

The Company will grant a military leave of absence as required by law and provide certain benefits to an employee granted such a leave. The Company service record for those who are granted a military leave of absence will continue without interruption.

Short-Term Leave of Absence for National Guard and Active Reserve

Any employee who is required to report for short military training periods will be granted a Short-Term Military Leave of Absence and must give a copy of the “Ordered Tour of Duty” as soon as possible to his or her supervisor so that arrangements can be made for work assignments in the employee’s absence.

Upon receipt of military documentation and the Compensation for Ordered Tour of Duty form, any regular employee will be compensated for the difference between his or her base wages and military pay for a maximum of fifteen working days per Federal fiscal year (October 1 through September 30 of the next calendar year) if the military pay (taxable income on the military pay voucher) is less than the employee’s base wages. Payment procedures are as follows:

An employee must complete and submit the Compensation for Ordered Tour of Duty form to the Leave Administration Department. If an employee does not submit the completed form prior to leave, the period of leave will remain unpaid until such time that the employee submits the form.

Requests for leave of absence to attend service schools or tours of duty for other than training will be considered on a case-by-case basis.

Company Benefit Plans will remain in force during short-term military leave of absence. When an employee active in the National Guard or Reserves is called for emergency duties, compensation for such a call will be considered at that time.

Long-Term Leave of Absence for Active Duty

Any employee who enlists, is drafted, or is called to active duty will be granted a Long-Term Military Leave of Absence in accordance with the Uniformed Services Employment and Reemployment Rights Act, 38 U.S.C. §§4301-4333. He/she must give a copy of the orders to his or her supervisor immediately. Employees on military leave for active duty may continue their health care benefits under COBRA, and for an additional six-month period subsequent to the 18-month COBRA period. Employees participating in the Retirement Plan will continue participation. Information on

benefits will be provided to employees by Human Resources when HR is notified of the leave. Upon return from military service, the employee will be reinstated, to the extent required by law, provided the employee:

- makes application for reinstatement within the required time following release from active duty;
- is still physically qualified or is able to become re-qualified with reasonable efforts; and
- if drafted, produces a certificate of satisfactory completion of training and service. An employee who enlisted must produce documentation of honorable discharge to qualify for reinstatement.
- for temporary employees, is released from military service prior to the end date of his or her temporary assignment or, for bargaining unit employees, prior to being released from the assignment.

  In the event the military leave continues for greater than 91 days, the Company will provide a job of like status and pay if an employee's former job is not available.

TOPIC: Grievance Procedure

1. Notifications required when grievances are concluded.

2. Designation of an alternate to act for the International Representative at Step Three grievance meetings.

3. Processing of discharge grievance.

   (1) In connection with Article III - Grievances, the Company will furnish written answers to the Union for grievances which are concluded with adjustment in either Step Two or Step Three. When grievances are concluded in either Step Two or Step Three without adjustment, the Union will so-notify the Company in writing.

   (2) In connection with Article III, Step Three, joint committee, an International Representative may designate an alternate representative to appear for the employee in Step Three grievance meetings with the Company, provided advance confirmation of this arrangement is set forth in letters to be exchanged by the International Vice-President of the International Brotherhood of Electrical Workers, second district, and Labor Relations, of the Company. Such letters shall confirm the status of the alternate representative, who shall be a bargaining-unit employee of the Company, as having authority to represent the International Union. The alternate representative will, at such times as are mutually convenient, be excused from the employee's normal work assignment without pay from the Company for the purpose of discussing Step Three grievances with Company representatives.

   (3) The Company agrees to expedite the processing of grievances involving discharge as rapidly as possible.

TOPIC: Use of Contractors - Operations Managers will advise Union of use of Contractors upon request.

Upon requests made at reasonable intervals by Local Union Business Managers to the Operations Managers, the Company will advise the Union of major plant maintenance, and gas pipeline construction contractors working on the Company's facilities and the estimated duration of such work. The Company will upon request also provide the Local ABA with a copy of the "YGS Construction Daily Work Schedule" provided to the CT PURA.

TOPIC: Understanding Concerning Article V, Section 1.(d)

1. When an employee with one year or more of satisfactory Company service is selected to fill a posted job opening, the employee will be transferred into the new position at the second rate step. If the employee has 18 months or more of satisfactory Company service, the employee will start at the third rate step.

   If additional training is required, the employee may remain at the step the employee started the employee's new position at up to one year or eighteen months whichever the case may be.

   If prior work experiences were directly related to the new duties, the employee may be accelerated through the pay rate steps.

2. Employees accepted for a job posting back to their former Local Seniority Area under Article V, Section 1(d) who have previously been transferred or reassigned under Sections 2(a), 3, 3(a) or 3(b) of Article V, will have their rates established in accordance with Article V, Section 2(d). Application of Article V, Section 2(d) under this Section 2, will be applied only to the initial job posting for which the employee was accepted back to the employee's former Local Seniority Area and also only to employees who at the time of transfer or reassignment were not offered an option to remain in their Local.

TOPIC: Motor Vehicle Use During Call Assignment

Employees who are assigned by the Company to take trouble calls outside their normal schedule will, whenever practical, be assigned a Company motor vehicle for all hours assigned to call, provided that there are no conflicts with local zoning regulations.

When an employee is assigned to call as a member of a crew, one member of the crew complement will be assigned a motor vehicle under the provisions outlined above.

The Company agrees that it will give consideration to valid reasons of an employee who requests that the employee be excused from taking an assigned Company vehicle home during hours of call.

TOPIC: "Open-Door" Policy - Management will discuss problems or potential problems with Business and Assistant Business Managers.

In a letter to the Local Union the Company stated it has always believed in an "open-door" policy regarding its treatment of employee problems and contemplates no change in that policy. Under such a policy, an employee or an employee's representative in the person of a Union Business Manager or Assistant Business Manager is welcome to discuss problems or potential problems with management at any reasonable time.

The Company agrees with the Union that it is mutually advantageous to avoid grievances whenever possible by prompt investigation and appropriate adjustment where indicated.

TOPIC: – Sick Leave Wage Payment Policy

Effective January 1, 1972, sick leave payments will be based on a calendar year January 1 to December 31 and will not be cumulative.

Continuation of Pay
Incumbent employees as of December 31, 2014 will keep their sick time allotment in accordance with the following:

Continuous Service – Weeks of Full Pay

From 6 months to 5 years - Up to 6 weeks
For 5 years to 10 years – Up to 10 weeks
For 10 years and upward – Up to 1 week for each year of continuous service

In case of a disability continuing from one calendar year into the succeeding calendar year, the employee is allowed for that disability only the amount of sick leave to the employee's credit as of the beginning of the disability. An employee whose disability is carried over into the succeeding year must return to work in order to establish sick leave benefits for that year.

The Company will notify the Local Union one week prior to the expiration of an employee's sick-leave payments.

Effective September 1, 1963, the Company amended its sick-leave wage payment policy for bargaining-unit employees to suspend the waiting period of one scheduled work day without pay.

In addition, they will have a one-time opportunity (by December 1, 2015; Effective January 1, 2016) to opt into the Sick Leave Wage Payment Policy for new hires. Furthermore, any absence over 5 consecutive work days will be managed by Liberty Mutual. The Company and Union agree to meet to review the Liberty management process within 90 days of ratification. All changes to the process will be effective January 1, 2015.

Employees hired on January 1, 2015 or after will be under the following Sick Leave Policy:

SICK LEAVE WAGE PAYMENT POLICY

- Non-occupational illness/injury disability lasting more than five days will be managed by Liberty Mutual
- A total of 10 sick days per year at 100% of pay
- In the case of illnesses that exceed five consecutive work days, qualifying employees will be eligible for short term disability
- The first twelve weeks of short term disability will be paid at 100% of base pay
- Up to thirteen additional weeks of short term disability will be paid at 67% of base pay
- Vacation time cannot be used in lieu of 67% pay to extend a short-term absence prior to transitioning to long-term disability (LTD)

Incumbent LNG employees as of the contract ratification date have the same sick leave wage payment benefits listed above as employees hired on or after January 1, 2015.

TOPIC: Training of Cadets

Company agrees to periodically meet with union to discuss training of cadets.

TOPIC: Patrolling Rights-of-Way

When necessary to patrol lines on foot through rights-of-way at night or during severe weather conditions, employees will be assigned in pairs.

TOPIC: Upgrading of and to Automotive Equipment Mechanic

When assigned to perform the duties of Chief Mechanic, the Automotive Equipment Mechanic will be upgraded to the maximum pay rate of the Chief Mechanic job classification.

When upgraded to perform the duties of Automotive Equipment Mechanic, a Garage Mechanic will be upgraded to the maximum pay rate of the Automotive Equipment Mechanic job classification.

TOPIC: Illness or Injury Immediately Preceding or During Scheduled Vacation

In the event that an employee becomes incapacitated immediately preceding or during the employee's scheduled vacation, due to illness or injury, and the employee notifies the employee's supervisor of such illness or injury as soon as possible, that portion of the employee's vacation period during which the employee is incapacitated may be rescheduled, at the option of the Company, to another time during the calendar year.
In determining whether the employee's vacation should be rescheduled due to illness or injury, occurring immediately preceding or during the employee's scheduled vacation, the Company may request from the employee verification from the attending physician.
In the event that vacation is not taken as scheduled due to accident, illness, or work requirements, and the Company determines that it cannot be rescheduled during the remainder of that calendar year, it will be scheduled in the following calendar year.

When a former employee of the Company is re-employed and completes five years of continuous service, such prior service will be included in the employee's total length of service for the purpose of determining the amount of vacation eligibility, provided such prior service had been for a period of six months or more and other than on a temporary basis.

Granting of credit for prior service for vacation eligibility will not change an employee's company or classification seniority date.

TOPIC: Replacement of Employee's tools when stolen.

If an employee's tools are stolen, they will be replaced by the Company, if, in the Company's opinion a valid and justifiable claim exists.

TOPIC: Overtime Lists

Overtime lists will be furnished to the Business Manager on a quarterly basis.

TOPIC: Credit Union

The Company will provide payroll deduction for employees desiring membership in the Dutch Point Credit Union.

TOPIC: Time-Merit Progression Programs in Effect

1. Letter of April 4, 1968
   Pressure Mechanic Helper to Pressure Mechanic (effective April 1, 1968, revised December 29, 2011).

2. Letter of January 2, 1969
   Meter Repairer Helper to Meter Repairer
   - (effective January 5, 1969 and revised March 19, 1986, revised 2003)

3. Stockhandler - (effective January 5, 1969 and revised June 1, 1986, revised April 5, 2010)

4. Letter of January 14, 1970
   Garage Mechanic Helper to Garage Mechanic - (effective January 4, 1970 and revised November 14, 1985)

5. Construction Technician (effective May 25, 2007)

6. Meter & Service Mechanic (effective 2002)

7. Distribution Mechanic (revised December 29, 2011)

8. Construction Technician (revised March 14, 2013)

9. Meter & Service Mechanic (revised December 5, 2013)

10. Meter Repairer (revised January 16, 2014)

11. Corrosion Technician (effective February 2, 2015)

12. LNG Operator (effective September 5, 2018)

13. Damage Prevention Specialist (effective April 9, 2019)

NOTE: The Construction Technician, Meter & Service Mechanic and Meter Repairer TMP's are presently being revised with agreement among the parties to have them completed by the end of year 2012.

TOPIC: Executive Instruction No. 18 - Uniforms: Customer Contact Personnel

Once a year the Company will arrange and pay for a complete overhaul and cleaning of all uniforms, at which time any replacements and repairs that may be necessary should be made. This overhaul and cleaning should be arranged for locally and performed without interfering with normal work assignments. In addition, the Company will provide for cleaning every week.

TOPIC: Safety Eyeglasses

The Company will pay the full cost of lenses, frames, side shields and carrying case, of clear and/or tinted prescription safety eyeglasses for operating department personnel who are required to wear them for their job. Employees will be limited to two (2) pairs of safety glasses (clear and/or tinted) every two years. Employees who opt for safety glasses with Photochromatic (photogray) lenses will not receive a second pair of clear or tinted safety glasses The Company will pay for the cost of Photochromatic (photogray).

The Company will also provide for the replacement of safety eyeglasses when damaged on the job. The employee will provide the Company with a current (not over two years old) prescription. The Company will also provide replacement lenses if the employee's prescription changes.

Employee will pay the cost of any eye examination and/or fitting required.

TOPIC: Establishment of New Schedules

The establishing of any new schedule for scheduled employees shall be discussed with the appropriate Local Business Manager in advance of making such schedule effective.

TOPIC: Jury Duty Wage Payments

The Company will facilitate wage differential payments to employees on jury duty.

TOPIC: Retrogressed Employees

If an employee is retrogressed, the Company will inform the Business Manager of the Local Union having jurisdiction over the location involved.

TOPIC: Employee Progress Reports

In the future Employees will be furnished with a copy of their progress reports.

TOPIC: Safety Shoes

The Company will provide each employee who is required to wear safety footwear an allowance (shown below) for the purchase of one or more pair(s) of heavy soled safety footwear containing a safety-toe box, that is specially designed and manufactured to the requirements of the ANSI standard Z41, or ASTM F2413-05 version, that is endorsed by the Occupational Safety and Health Administration. Additionally all safety shoes must be Electrical Hazard "EH" rated. **Effective January 1, 2023, the annual safety shoe allowance will be $300.**

The employee must furnish a receipt of purchase for reimbursement. This allowance will be limited to the allowed amount per calendar year. Damaged safety shoes can be replaced at applicable reimbursement.

TOPIC: Rate Step For Returning Veteran

A returning veteran will be given credit for time in service plus Company service prior to entering service to determine the employee's rate step. One year of continuous Company and military service will entitle the employee to return at the 2nd rate step and 18 months will entitle the employee to 3rd rate step. Eighteen months is the maximum credit allowed. This does not apply to any veterans returning prior to June 1, 1973.

TOPIC: Summer Employees Working Overtime

The Company will not assign temporary summer employees to prearranged overtime when other employees capable of performing the work are available.

TOPIC: Absence Due to Death in Family

Employees will be allowed time off with basic straight-time wages under the following conditions:

1. When the deceased is a member of an employee's immediate family, the employee will be allowed necessary time off to make arrangements and attend the funeral. Such time off should not exceed three normal schedule workdays following the date of death. In addition, the three day period may be increased up to a fourth day with basic straight-time wages due to the employee being called from work on the date of death, or to attend the out-of-state funeral of an immediate family member. The supervisor will work with the employee to accommodate special circumstances.

The immediate family is defined to include the following relatives of the employee or employee's spouse: spouse, son, daughter, father, father-in-law, mother, mother-in-law, grandfather, grandmother, grandchildren, sister, brother, step family, or one who is considered a member of the family and living in the employee's home.

2. When the deceased is an employee's brother-in-law, sister-in-law, aunt or uncle, niece or nephew, necessary time off up to eight hours will be allowed to attend the funeral.

3. If death occurs to a member of an employee's immediate family, during the employee's scheduled vacation period, that portion of the employee's scheduled vacation from the day of death up to and including the day of the funeral will be rescheduled, but not to exceed three days. The vacation will be rescheduled at the option of the Company to another time during the calendar year. In the event vacation to be rescheduled under this section cannot be rescheduled during the current calendar year, it will be rescheduled as promptly as possible within the following calendar year.

TOPIC: Vacation and Sick Leave Payment Entitlement Upon Recall from Layoff.

Employees who are recalled, for other than temporary assignments, under the provisions of Article V, Section 4(b) shall not have their eligibility interrupted for purposes of vacation and sick leave payment entitlement. The application of this topic will be effective retroactive to August 1, 1975.

TOPIC: Paging Device for Use During Call Assignments

When an employee is assigned to call, they will be provided with a paging device ("beeper"), when practicable, as an alternate means of contact during the normal call schedule. It will be the responsibility of that employee to ensure that they are within the signal range and the "beeper" is in operating order as indicated by the testing procedure or to provide other means to be contacted as is presently practiced.

TOPIC: Relative Policy

It is understood and agreed that notwithstanding the provisions of the collective bargaining agreement between the parties, relatives of employees will not be transferred or promoted into situations where the possibility of favoritism or conflicts of interest might exist. Employees will not be promoted or transferred into a position where a relative occupies a position in the supervisory chain of command under which the individual employee would work (no matter how far removed geographically).

Relatives are defined as:

Father	Daughter-in-law
Mother	Brother-in-law
Son	Sister-in-law
Daughter	Uncle
Brother	Aunt
Sister	Nephew
Husband	Niece
Wife	Grandfather
Father-in-law	Grandmother
Mother-in-law	Grandchild
Son-in-law	Step-relatives

TOPIC: Article XVI - Contract Work

The award of arbitrator, Eric J. Schmertz, dated and notarized on October 5, 1981, shall be recognized as the controlling interpretation with respect to Article XVI - Contract Work.

TOPIC: High Risk Locations

If any employee believes that they will be entering a location of high risk to themselves, their property, or the Company's property, they should contact supervision. Area supervision will request local law enforcement agencies to accompany any employees in dangerous locations.

TOPIC: Green Book Seniority

This letter confirms our understanding reached concerning the merging of the Blue and Green Books. Seniority will be Grandfathered separately for the purpose of promotion only. Any vacancy to be filled by promotion from a former Green Book employee leaving will be offered to the senior qualified former Green Book Employee. Any vacancy to be filled by promotion as a result of a former Blue Book employee leaving will be offered to the Senior Qualified Blue Book employee. Any vacancy to be filled by

promotion that cannot be identified as a former Blue/Green position will be offered to the senior qualified employee.

The former Green locations are Mystic, the Stamford portion of Norwalk, and the non-Winsted portion of Torrington.

TOPIC: Commercial Driver's License

The Company will pay applicable costs associated with obtaining a Commercial Driver's License required by the duties performed of the classification.

Applicable costs include:

a)endorsements
b)various test fees
c)issuance of permit

In addition, the Company will pay the cost difference between the employee's license fee and the license fee of the job-required CDL.

TOPIC: Out-of-Area Assignment

Yankee Gas management will make out-of-area straight time assignments on a voluntary senior to junior basis (forcing the junior qualified if necessary), except when this method of selection is inconsistent with good business judgment. Senior and junior refer to the relative amount of Departmental Seniority.

TOPIC: Weingarten

Employees have the right to have a union representative present during any investigatory interview/meeting which the employee reasonably believes may result in disciplinary action.

TOPIC: Upgrading – Construction Technician

When a Construction Technician is directly assigned by a Supervisor to perform any of the following tasks, the employee shall be upgraded and will be paid one dollar and fifty cents ($1.50) per hour in addition to their basic straight-time rate for all hours so-assigned.

The definitions of specific tasks which qualify for an upgrade are shown below:

CDOT / Municipal Design:

- Analyze CDOT construction prints for potential conflicts with gas facilities
- Determine if test pits are required
- Re-analyze prints for conflicts based on test pit information
- Determine if designer can eliminate conflicts if possible
- Prepare final gas main and/or service relocation plans and project staging
- Obtain agreements from CDOT for PE, construction and/or revised agreements as needed

Regulator Stations (from inlet valve tie-in location to outlet tie-in):

- Select final location for station
- Determine final design parameters including pipe/regulator sizes
- Develop construction plans including piping layout, vault elevations, tie in details, etc.
- Develop start-up procedure

Bridge Crossing Design:

- Develop construction plans including pipe layout, pipe size, expansion loop locations if needed and type and location of pipe supports

Parking Garages with Extensive Aboveground Piping to Multiple Meter Locations:

- Determine regulator vent sizes when vent length exceeds 10'
- Determine location of supports and complete stress analysis of piping layout

Pressure Uprates:

- Determine areas to be uprated
- Determine general gas facility work scope in accordance with GO-180 Uprating Gas Mains and Services
- Write pressure uprate procedure
- Direct pressure uprate procedure

Meter Sets:

- Size, design and construct meter and regulator set greater than 16M meter

Propane Plants:

- Possible work at propane plants will be discussed as it occurs

TOPIC: Company Allowed Time Off Before Christmas Day.

The Company will allow four (4) hours off at the basic straight time rate to all employees who report for work on their last scheduled work day prior to Christmas Day. If it is determined that time off cannot be allowed, the employee in lieu of the time off, will receive an additional four (4) hours pay at the employee's basic straight time rate.

TOPIC : 4 /10 hour days as authorized by supervisor

The Company may utilize a four / ten schedule (four /10 hour day) with the following as outlined below:

- The determination as to whether a four ten schedule is offered rests with local supervision based on need and/or ability to support.
- The determination as to what days will be allowed to be worked as ten hour days rests with supervision within the bounds of the contract. Saturday is not intended to be one of the normal work days.
- All days of the work week must have coverage for at least the 8 1/2 hour normal work day.
- If there are not enough volunteers for four ten hour days, supervision shall withdraw the offer.
- The 4/10 work week schedule will be voluntary. Workers may opt out of the 4/10 schedule with appropriate advance notice (e.g., the company will not incur additional costs due to schedule changes).
- Holiday weeks will revert to eight hour days.
- Vacation, sick time and other non productive hours will be charged for the hours not at work (i.e., if someone on a 4/10 schedule is sick they will be charged 10 hours for each work day missed; if they take a vacation day, it will be 10 hours of vacation).
- The current contractual rest time rules remain in effect (i.e., 6 hours worked earn 8 hours rest time).

TOPIC: Holidays

1. New Year's Day, Martin Luther King Day, Presidents' Day, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day and Christmas Day shall be recognized as holidays. Whenever any of such holiday(s) occur upon Sunday, the Monday next following such day shall be recognized as the holiday, except that for those employees who are required to work that Sunday, as part of their normal schedule, the holiday will be observed on Sunday. Whenever any such holiday(s) occur upon Saturday, the Friday proceeding such day shall be recognized as the holiday, except that, for those employees who are required to work that Saturday, as part of their normal schedule, the holiday will be observed on Saturday.

2. In addition to the 10 federal holidays above, employees will be granted two floating holidays during the calendar year based on operational requirements and supervisory approval. The two floating holidays can be used for any reason and are requested by the employee. In the event of a conflict between employees requesting the same date, seniority shall govern. These two floating holidays must be taken in full eight (8) hour increments.

TOPIC: Agreement – Scheduling Vacation and On-Call

November 3, 2010
LR-10-162

Mr. Frank Cirillo, Assistant Business Manager
Local Union 420 – I.B.E.W.
550 Wolcott Street
Waterbury, CT 06708

Mr. Richard Sank, Business Manager
Local Union 457 – I.B.E.W.
1237 East Main Street, 1st Floor South
Meriden, CT 06450

Re: Agreement – Scheduling Vacation and On-Call

Dear Rich & Frank:

This letter documents our August 2, 2010 agreement in principle and my subsequent discussion with Frank Cirillo regarding the company's development, approval and posting of annual vacation and on-call schedules. This agreement applies to the CL&P Blue Book and Green Book union contracts, the Yankee Gas White Book Contract, and the CL&P Technical Contract and as applicable, modifies the language contained in these contracts on this subject and replaces any side agreements or practices currently in existence regarding this topic. This agreement also applies to the Transmission Group as applicable.

It is also agreed that neither the Union or the Company will use this agreement as part of Local 457's grievance 2010-014 (Company No. 2010-10-457), or the arbitration of that grievance.

Purpose: This agreement reflects an effort by the parties to eliminate unnecessary controversy surrounding conflict between the on-call schedule and the employee's vacation submittal. To date, the company has processed these schedules independently – leaving some employees in a position where their vacation preference has conflicted with their on-call schedule. These employees have often had to swap their on-call schedule with another employee or otherwise modify their vacation plans. This agreement is specific to this conflicting schedule issue. All other vacation requests will continue to be processed in accordance with the applicable union contract (Blue Book and Green Book)

This agreement also documents the company's intent to fill on-call schedule vacancies (e.g., for planned medical absences) as soon as they are made aware of such. To fill short notice vacancies (less than 30 days) the company will seek volunteers, and if none will use the overtime list effective the Monday prior to the vacancy. For longer notice vacancies, the company will use the established on-call schedule rotation and will assign the vacancy to one of the scheduled employees provided the employee does not get back to back on-call schedules.

It is understood that the company may decide not to fill vacancies (particularly short notice absences) if it determines that the existing on-call response resources are appropriate for the anticipated trouble call volume.

Company actions for 2010: Effective November 3, 2010, the company will review the existing on-call schedule to determine if there is a conflict between the approved vacation schedule and the on-call schedule. Identified conflicts will be resolved by filling the vacancy through the overtime list of employees – specifically those employees eligible for scheduled on-call assignment. The company is not obligated to take action on any other vacation request.

Concurrent with its actions on resolving the vacation/on-call scheduling conflicts, the company will extend the current on-call schedule rotation until April 24, 2011. Employees requesting vacation during the period of January 1, 2010 through April 24, 2010, will submit their requests in accordance with the applicable contract language.

Company Actions for 2011 [and Future Years]: Effective April 24, 2011, and every year thereafter, the company will post the on-call schedule by the last Sunday in April. The on-call schedule will be prepared using approved vacation schedules to ensure there is no conflict with the employees approved vacation. Company management will process the employee's vacation preference in accordance with Article IX of the Blue book and Article V of the Green book, Article IX White Book, and Article 22 of the Technical Contract as applicable. Once the vacation and on-call schedules are finalized by the Companies the employee (not the company) will be responsible for addressing any swapping or other schedule change, outside of those resulting from illness or disability.

Both parties understand and agree that this agreement will terminate with the expiration of each cited contract and this agreement will be incorporated into the next version of these contracts or will otherwise be dispositioned through the contract negotiations process. Additionally either party may request a revision to this agreement.

Agreed to by the Company: /s/ R. Lizotte

Agreed to by the Union: /s/ R. Sank

Agreed to by the Union: /s/ F. Cirillo

TOPIC: On-Call – Pressure Mechanic

Three Regional call areas will be established for the Pressure Management Department – East (East Windsor, Waterford, Danielson AWC's), Central (Waterbury, Meriden, Torrington AWC's) and West (Norwalk, Newtown, Ansonia AWC's). Each of three regions will operate on a 1 in 4 rotation and will have a single call person assigned, year round. If more workers are required, the regional call list will be utilized. If additional resources are still needed the next closest regional call list will be utilized, until resource needs are satisfied.

If a job requires a crew of three or more employees, the Chief upgrade will be applied to the senior most qualified employee on the crew in that region.

TOPIC: FR Clothing

The Company will increase the FR clothing allowance to **$1,450** for first time/new participants to the program, and whose jobs require FR clothing (Distribution Mechanics, Meter Service Mechanics, Pressure Management Mechanics **and effective January 1, 2023, Corrosion Technicians**). Thereafter it will be **$800**.

Effective January 1, 2023, Damage Prevention Specialist and Construction Technician employees will be included in the FR clothing allowance program. First time/new participants to the program will receive an allowance of $725. Thereafter, the annual allowance will be $400.

TOPIC: Establishment of a New Yankee Gas Construction Group

Scope of Work: The YG Construction Group will perform construction projects across Yankee Gas and CL&P Service territories as assigned. Typical work scope involves:

- New Business Services (conversions, new customers)
- New Business main extensions Development and Non-development work
- Service renewals associated with main renewals
- Selected main replacement projects
- Fitting Work, such as:
  - Periodic meter changes (both large and small)
  - Perform meter relocates from inside to out…
  - New Business meter set installations
  - OP1714 (meter set survey form) remediation work
- Other work as assigned by the company

Reporting Location: YG Construction Group with:

- Eastern Construction Group Meriden
- Western Construction Group Shelton

- The Company will establish a reporting base location in the Western part of the state and one in the Eastern part of the state.
- To the extent possible (e.g. resignation, open PVR, etc.), the company will attempt to balance the number of employees equally between the two reporting locations.
- Employees will mobilize and perform work anywhere in the Yankee Gas service territory.
- "Physical Worker" vacancies created associated with the new YG Construction Group will be filled in a timely manner. Postings for vacancies associated with the YG Construction Group will be at the helper/journeyman level.

Training & Qualifications: Employees assigned to the YG Construction Group must complete the requisite TMP's and pre-hire testing (new hires only) for their job classifications.

Schedule & Work Hours:

- Employees assigned to the YG Construction Group will be considered day workers and may be required to work 4-10 hour days (Monday through Thursday, or Tuesday through Friday schedule).
- A ½ hour unpaid lunch break for either schedule.
- 8 hour days during weeks with holidays
- Employees may be expected to be at their first work assignment at scheduled start time, and will be provided the appropriate expense plan per Article XII of the Contract, when required.

Work practices: Employees must comply with NU safety requirements, TMP Qualification and Operator Qualification requirements.

- The YG Construction Group will call the local areas in the event they encounter a gas leak during construction activities. The leak repairs will be done by the districts however consistent with the training provided to the workforce, the YG Construction Group will be responsible for "making the area safe."
- Taps and tie-ins normally will be arranged through district, unless scheduling or workforce prohibits. Otherwise the YG Construction Group will do the work.

When asking for volunteers to cover possible "storm duty" for NU system companies, the company will request volunteers from the districts first and then from the YG Construction Group.

Inclement Weather:

The YG construction Group personnel shall follow Article XI, Safety, and section #7 as it pertains to working in inclement weather.

Seniority/Overtime:

The YG Construction Group will have its own seniority and overtime distribution list for the Western part of the state and one in the Eastern part of the state, respectively.

- Overtime participation will be within each location (i.e., Eastern, Western) first and if necessary, then go to the other location within the YG Construction Group. If no volunteers, the Company will use the low overtime distribution process within the YG Construction Group.

Applicability of other contract provisions:

All other aspects of this contract are applicable to the YG Construction Group unless otherwise addressed by the provisions of this Topic.

TOPIC: Global Positioning System (GPS)

LR-12-064
April 20, 2012

Mr. Frank Cirillo, Business Manager
Local Union 420 – I.B.E.W.
550 Wolcott Street
Waterbury, CT 06708

Mr. Richard Sank, Business Manager
Local Union 457 – I.B.E.W.
1237 East Main Street, 1st Floor South
Meriden, CT 06450

Re: Global Positioning System (GPS)

The company, as part of the 2011 Yankee Gas Contract Negotiations, announces its intention to expand its use of current and any future GPS technology during the term of the new contract. This expanded use of GPS will in fact change any restrictions on GPS use that the company made or practiced in the past.

GPS technology has made significant strides in the past decade. While Yankee Gas has no intention of implementing a "big brother" environment (watching over the shoulders of employees), we do reserve the right to avail ourselves of all the operational efficiencies that current and new technology will provide, including improvement in employee safety and customer service, establishment of a necessary platform for future work management enhancements, and continued use of GPS for internal investigations.

Accordingly, the company's previous GPS letters, commitments or practices are superseded by this letter.

Sincerely,

/s/ Edward S. Hammett
Director-Labor and Employee Relations

TOPIC: Adoption Assistance Benefit

The adoption benefit is offered to help employees meet some of the expenses related to adopting a child.

The adoption benefit provides reimbursement of up to $5,000 of eligible expenses for the adoption of each child under the age of 18. Only the expenses you actually incur are eligible for reimbursement. The benefit is payable when the adoption is final (when a decree of adoption is entered by the court) and applies to expenses incurred on or after January 1, 2015.

Eligible expenses include: adoption agency fees, legal fees, court fees, travel expenses, the child's initial medical exam and certain out-of-pocket medical expenses for the natural mother.

Adoption Leave
You are eligible for company-paid adoption leave after you complete three months of employment with NU. Your pay during the duration of your adoption leave will be based on your base pay in effect on the day your leave starts.

You must give your supervisor at least three months written notice of the date your leave will start and when you expect to return to work. If you are also eligible for Family Medical Leave Act (FMLA) leave, time taken for adoption leave will also count as FMLA leave.

Duration of Leave
Adoption leave begins on the date the child is received into your home. The maximum duration of an adoption leave depends on the age of the adopted child according to the following schedule:

Age of Adopted Child	**Maximum Amount of Leave***
6 years old or younger	8 weeks
At least 7 years old but less than 13 years old	4 weeks
At least 13 years old but less than 18 years old	2 weeks

Topic: YG Floating Holiday Protocol -

Bargaining unit employees have the ability to choose two floating holidays during the calendar year based on operational requirements and supervisory approval. The two floating holidays can be used for any reason and are requested by the employee. In the event of a conflict between employees requesting the same date, Company seniority shall govern.

Process

- Employees will make their selection of vacation periods (A,B,C,D....., weeks) by March 1 and vacation schedule will be posted by April 1.
- If an employee wants to use their floating holiday for either – Good Friday and Day after Thanksgiving those days must be selected at the same time as vacation. The total number of bargaining unit employees off for those two days cannot exceed the limits designated by local management. Management will make best effort to be as flexible as possible when designating these local limits.
- On-Call schedule will be prepared using the approved vacation and floating holiday schedules and posted by the last Sunday in April.

Supervisors may require employees to complete a Flexible Holiday Preference form at the start of each year to avoid scheduling conflicts. When taking a flexible holiday, use earnings code 071 when completing time sheets.

Subject: Coverage for the Former Yankee Gas Shelton AWC

Dear Mr. Cirillo:

This is to confirm an agreement reached between Yankee Gas and IBEW Local 420 concerning coverage of the Shelton area and its effect on Meter Service Mechanics and Distribution Mechanics reporting out of the Waterbury area work center:

- The Shelton location will remain in the contract in the Southern division of Appendix C, for the purpose of Article V for Distribution and Meter Service classifications.
- The Company can utilize Distribution and Meter Service personnel covering the Shelton area in Waterbury during regular working hours.
- The Meter Service and Distribution Mechanics covering the Shelton area will have their own overtime list, on-call and vacation schedules.
- The Meter Service Mechanics assigned to Shelton will service the Town of Monroe.
- There will be a minimum of six Distribution Mechanics in the street department and six Meter Service Mechanics in the meter service department covering the Shelton area. The Union understands that there may be times when people will retire or post out. The Company will attempt to backfill employees in a timely manner.
- The displaced employees from the former Shelton AWC in the Meter Service and Distribution Mechanic classifications will have reinstatement rights.

Sincerely,

Joseph C. Picone,
Manager, Labor Relations

Agreed:

Frank Cirillo
Business Mgr., IBEW, Local 420

C: Kevin Kelley
Labor Relations File

Topic: Company to establish a 2nd shift for Distribution Mechanics as follows:
Shift (X)

2nd shift for Distribution Mechanics:

Meriden: **3**
Norwalk: **3**
Waterbury (does not include Derby, Ansonia, and Shelton): **3**

Hours: 3:00PM – 11:30PM
Work week: Monday – Friday

- Crew Size **3**
- Distribution Mechanics/Helpers who were in the Distribution Department on 12/1/14 are defined as incumbents.
    - If incumbents volunteer for shift (X), they will not be designated with an (X).
    - Employees in the ES Construction Department on 12/1/14 are not considered incumbents. However, the three Construction employees who previously worked in the Distribution Department prior to 12/1/14 are considered incumbents.
- All new hires and voluntary transfers into the Distribution Department are subject to shift (X) designation.
- Shift (X) positions will be awarded by order of seniority.
- If management elects to fill temporary shift vacancies, they will be filled first by (X) volunteers, then by volunteers based on seniority; absent volunteers, the junior (X) employee will be required to take the shift in their local seniority area.
    - Junior helper (X) employees will be required to take the shift in their local seniority area for no longer than one (1) month at a time as long as there are two qualified (X) mechanics on shift.
- Overtime – by area – no change in present practice. If second shift is collapsed, overtime rules will apply to all.
- Upgrade – no change in present practice.
- Shift (X) will normally operate with 3 Fully Qualified Individuals.
- When helper mechanic (X) becomes qualified, a shift Employee can elect to come off shift at that time.
    - On an annual basis, the second shift positions will be posted by March 1 for volunteers, and the shift will begin on the first full week of April to coincide with current practices spelled out in the White Book contract. Volunteers for shift (X) are required to work the second shift for a minimum of one (1) year or until there is a junior qualified (X) mechanic in the local seniority area to fill the second shift.
    - When a helper (X) mechanic reaches minimum qualified journeyman status, and an employee with greater seniority who is required to work the second shift assignment wishes to go back to first shift, that employee can do so at that time, but must provide management with notification in writing 60 days prior to his or her intended reassignment date.
- If Management elects to fill the shift during a scheduled vacancy such as vacations and other scheduled absences, and if no one volunteers, the opening will be filled by the junior mechanic or helper (X) in their local seniority area, provided that there are two other qualified (X) mechanics assigned to that shift. If there are no qualified (X) mechanics, the Company will decide if the shift will either be collapsed, or it will be run short.

- **Employees regularly assigned to the (X) shift can swap work shifts with other Distribution Mechanics in the department subject to supervisory approval and in accordance with Article VII, Section 5.(b). When such exchanges of scheduled work hours are permitted, the advance notice requirements and premiums in Article VII, Section 6 shall not apply.**
- The shift crew may relieve day crews working on a job that is expected to extend beyond the regular work hours.
- Shift Crews will not be required to be On-Call unless opting in.
    - When a helper (X) becomes fully qualified, that individual can opt in to joining in the on-call rotation when he or she volunteers or is assigned to shift (X).
    - By opting in to the on-call rotation, that employee is subject to Article X. Call Time. The opt in is binding subject to Article X, Section 1.
- **When an employee is regularly assigned to work the (X) shift, he or she shall have 1,000 hours added to the overtime list unless the employee opts into the on-call rotation.**
- Generally, when Christmas Eve or New Year's Eve occur during the work week, strong consideration will be given to moving the Shift workers to work days to avoid the inherent difficulties of doing work on these evenings. If business needs dictate, adjustments may need to be made.
- **If the Company elects to collapse the (X) shift, best efforts will be made to give the affected (X) shift employees at least 72 hours' notice.**
- If an employee who normally works the (X) shift is temporarily assigned to the day shift (i.e. training, OQ testing, temporary shift collapse), he or she shall receive the shift differential set forth in Article VII, Section 5.(c) for all hours worked within the day shift.
- When a job the Shift workers respond to requires a 3rd person, the 1st Call Man from the area would be the 3rd man.
- **The Company will make best efforts to include employees regularly assigned to the (X) shift at meetings or training events that cannot effectively be duplicated on the second shift.**

Job Duties:

All current Distribution Mechanic job functions including but not limited to:

1. Leak repairs
2. Leak investigation
3. Leak re-checks
4. CBYD tickets – (Emergency and tickets due to expire in 24 hours **only**)
5. Pre-marks (CBYD)
6. Box repairs
7. Critical valve inspection & repair
8. Paving inspections
9. Distribution shop cleaning
10. Equipment & tool repair
11. Corrosion inspections

<u>Topic: Company to Establish 24 Hour Coverage for Meter Services Department as follows:</u>

Areas initially affected:

- Meriden

- E. Windsor
- Waterbury
- Norwalk

- The Company will determine the required number of employees for each shift.
- An incumbent Meter Service Mechanic is one who is in the classification in the Meter Services Department as of the date of contract ratification (November 30, 2018).
- Incumbents are unaffected unless they volunteer.
- All employees who are hired or transferred into the Meter Services Department following the date of ratification **(November 30, 2018)** will be designated as “S” employees and are subject to shift.
- During the initial startup, shifts will be offered by departmental seniority. The Company will determine when to implement shifts.
- Shifts for the initial startup for incumbent volunteers will consist of five (5) consecutive days in accordance with Article VII, Section 2(a).
- Shifts may be filled on a rotational basis for a minimum of one (1) month at a time by incumbent volunteers until “S” Meter Service Mechanics are qualified.
- An incumbent Meter Service Mechanic who volunteers for 2nd or 3rd shift will be retained for a period of up to two (2) years from the date of transfer.
- If a Chief Meter Service Mechanic volunteers to work the second or third shift, he or she shall be reclassified as a Meter Service Mechanic for the term of the voluntary period. If he or she continues to work the second or third shift beyond the voluntary period, the employee shall be permanently reclassified as a Meter Service Mechanic.
- “S” Meter Service Mechanics in the affected areas will remain in the position for a minimum of three (3) years from the date of hire or transfer and will not be entitled to apply for posted open positions **outside of the Meter Services department** during this period.
- “S” Meter Service Mechanics may be subject to swing shifts.
- When the Company implements shifts for 24/7 coverage in a district, incumbent volunteers will be offered the option to return to first shift or be subject to the shift schedule. Such shift schedules may include swing shifts.
- Shifts shall be offered and filled by departmental seniority on an annual basis by February 1.
- If the Company elects to fill a temporary shift vacancy, it shall be offered to the call person, if available, or by the overtime list if no one is on call. If no one accepts the vacancy, it shall be filled by low overtime with a qualified employee.
- If the Company elects to fill a shift during a scheduled vacancy such as vacations or other scheduled absences, it shall be offered to the call person, if available, or by the overtime list if no one is on call. If no one accepts the vacancy, it shall be filled by low overtime with a qualified employee.
- Any shift may relieve another shift consistent with current practice.

- Meter Service Mechanics may be placed On-Call.

- **Once the shifts are implemented, the Company will limit the on-call period for Meter Service Mechanics in the affected areas to the third shift (12:00 a.m. – 8:00 a.m.) on Monday through Friday excluding recognized holidays. When the on-call period is limited to the third shift, the on-call payment shall be one (1) hour at basic straight time rates for each such period assigned. The on-call payment and length of assignment on a Saturday, Sunday or recognized holiday shall remain unchanged and be in accordance with Article X, Section 2.**

- When an "S" Meter Service Mechanic is required to work on a recognized holiday falling on a day within the employee's normal schedule, the employee will receive eight (8) hours of holiday pay at basic straight time rates or a day off in lieu to be used within the calendar year plus time and one-half for all hours worked within the employee's normally scheduled hours and double time for all hours worked outside the employee's normally scheduled hours.

- **The Company commits to maintain the schedule of "S" shifts as described below for the term of the contract.**

	Sun	Mon	Tue	Wed	Thu	Fri	Sat
1	**8a-4:30p**	**8a-4:30p**	**8a-4:30p**	**8a-4:30p**	**8a-4:30p**		*
2	**8a-4:30p**	**8a-4:30p**	**8a-4:30p**	**8a-4:30p**	**8a-4:30p**		*
3**	*		**8a-4:30p**	**8a-4:30p**	**8a-4:30p**	**8a-4:30p**	**8a-4:30p**
4**	*		**8a-4:30p**	**8a-4:30p**	**8a-4:30p**	**8a-4:30p**	**8a-4:30p**
5	**3:30p-12a**	**3:30p-12a**	**3:30p-12a**	**3:30p-12a**	**3:30p-12a**		*
6	*		**3:30p-12a**	**3:30p-12a**	**3:30p-12a**	**3:30p-12a**	**3:30p-12a**
7	*	**3:30p-12a**	**3:30p-12a**	**3:30p-12a**	**3:30p-12a**	**3:30p-12a**	
8**	*	**12:30p-9p**	**12:30p-9p**	**12:30p-9p**	**12:30p-9p**	**12:30p-9p**	

***Denotes Double Time Days**

****Incumbent employees and "S" Meter Service Mechanics may be required to work the designated shifts. Local seniority rules shall apply in assigning these shifts.**

Topic: Expanded Loading Duties for Stockhandlers

1. The Company will expand the current practice of loading by the Stockhandlers to include loading material and equipment onto Company vehicles.

2. It is not the intent of the Company to remove loading duties from any classification that presently performs these duties, nor is it the intent to give any classification exclusivity to the duties associated with loading and unloading.

3. The Company will train Stockhandlers on equipment necessary to perform the expanded loading duties.

4. Incumbent Stockhandlers will receive $1.00/hour added to the base wage rate for obtaining and maintaining CDL (B).

5. New hires and transfers must be able to obtain and maintain valid CDL (B) within six (6) months of hire or transfer into a Stockhandler position.
