Dear PURA Commissioners,
I urge PURA to reject Eversource's proposed $727 million annual rate increase. Connecticut families already pay some of the highest electric bills in the country, and another $33 a month, or nearly $400 a year, is simply unaffordable for many households.
While asking Connecticut families to pay hundreds of dollars more each year, Eversource is also seeking permission to ***increase its allowed return on equity from 9.25% to 10.25%, well above the national average of approximately 9.7%.*** *That means Eversource wants customers to pay more while increasing the rate of profit it can earn on shareholder investments.*
As a regulated monopoly, Eversource should be held to the highest standards of transparency, accountability, and responsible spending. ***PURA must ensure ratepayers are not being asked to pay more simply to improve returns for investors.***
In addition, this egregious rate hike is unjustifiably detrimental to the health and well being of every family in our state as it makes it hard to pay our food, medical bills, and rents to survive. This gouging does not reflect the shared alues that we hold true in the state of CT.

I urge PURA to reject unjustified rate increases, scrutinize every dollar Eversource is requesting, and prioritize affordable, reliable electricity for Connecticut residents over corporate profits.
Sincerely,
Marianne and Clifford Schorer
Greenwich, CT 06831
