Re: Docket No. 26-05-10 – Application of the Connecticut Light and Power Company d/b/a Eversource Energy to Amend Its Rate Schedules – Redacted Bulk Material

Dear Mr. Gaudiosi:

On behalf of the Connecticut Light and Power Company d/b/a Eversource Energy (the "Company"), enclosed for filing in the above-referenced proceeding are the Company's redacted versions of materials previously submitted as bulk confidential exhibits on July 14, 2026. Specifically, the Company is filing redacted documents associated with Exhibit CLP-Additions-6, each broken down into subparts due to file size constraints.

As of this writing, Eversource has completed redactions for a large portion of the confidential documents originally submitted as part of Exhibit CLP-Additions-6. This set of redacted documents includes closing reports and project authorization forms for capital investment. As the Company explained during the August 11, 2026, procedural conference, the redaction process for these documents is a manual, labor-intensive process involving a cross-functional team of external vendors and Company personnel who are working as expeditiously as possible to generate accurate redactions. The Company will strive to complete redactions for the remainder of the confidential documents in this set as soon as reasonably practicable. If any party or intervenor needs a public, redacted copy of any confidential document sooner, the Company would be pleased to work with them to accommodate their request.

Please note that the Company is filing these materials through PURA's web filing system under a category labeled "Supplement for New App," consistent with directions from PURA's Docket Control. Pursuant to PURA's Procedural Order Regarding Submission of Filings, dated July 10, 2026, the Company is required to coordinate with PURA's Docket Control staff and

comply with any formatting or filing instructions for bulk materials that Docket Control staff may have, which the Company appreciates.[1]

Lastly, the Company notes that it intends to fully comply with PURA's September 17, 2026 Procedural Order, including the requirement to provide an index identifying the pages redacted. The Company has, however, completed redactions to thousands of pages of documents, and preparation of the required index will require additional time. The Company was not aware of the indexing requirement when it undertook and completed the redaction process for the documents being filed contemporaneously with this letter. In the interest of moving this matter forward without further delay, the Company respectfully requests that PURA permit the Company to file the completed redacted document at this time and allow the Company to submit the required index as soon as practicable thereafter. This approach will permit PURA and the parties to receive the redacted documents without waiting for the additional time necessary to compile the index, while ensuring the Company fulfills the Procedural Order's indexing requirement as expeditiously as practicable.

Please contact me if there are any questions with respect to this filing.

Very truly yours,

S. Pardee

Sarah A. Pardee

cc: Service List

[1] For preservation of legal rights, the Company does not agree that the redacted versions of previously filed confidential exhibits constitute a "supplement" to its original Application. Rather, the redacted versions are public versions of exhibits, information, and data already submitted to PURA on a confidential basis, as part of the Company's initial filing on July 14, 2026. The filing of these redacted materials is made in partial satisfaction of the Company's commitment in Motion No. 9 to provide public, redacted copies of previously filed bulk confidential material within a reasonable timeframe. To keep the redacted materials aligned with the initial filing, Docket Control has reasonably identified that submitting the materials as "supplemental" will assure that the redacted materials are in the appropriate location on PURA's website.
