[1] Executive Summary

An approval of $4.000M in full funding is requested to improve customer reliability for planned capital distribution work not identified specifically during the budget cycle but as a result of monitoring the system throughout the year. This capital work allows for scheduled outages and the ability to monitor off-scheduled assets.

This is an annual program request. Unlike a specific project request, an annual program request establishes a blanket program authorization under which separate, unique, small-scale, qualifying capital projects can be performed, using a child work order to track each separate small-scale project. The parent project number, DSCN26, establishes the annual program under which small-scale projects can be created at the work order level.

Capital work orders initiated against this blanket annual project must include total costs less than or equal to $300K. Any work order that exceeds this amount will require a separate Project Authorization Form (PAF) and Delegation of Authority (DOA) approval. Please refer to the Capital Project Approval Process Job Aid JA-AM-2001-A (Reference 1).
