[1] Executive Summary

An approval of $8.000M in full funding is requested to support the replacement or removal of broken or failed equipment not identified specifically during the budget cycle but that was identified through monitoring the system throughout the year. Work materializes due to inspections, system events and weather emergencies.

This is an annual program request. Unlike a specific project request, an annual program request establishes a blanket program authorization under which separate, unique, small-scale, qualifying capital projects can be performed, using a child work order to track each separate small-scale project. The parent project number, DSEQ26, establishes the annual CT Distribution S/S Emergent Equipment program under which small-scale projects can be created at the work order level.

Capital work orders initiated against this blanket annual project must include total costs less than or equal to $500K. Any work order that exceeds this amount will require a separate Project Authorization Form (PAF) and Delegation of Authority (DOA) approval. Please refer to the Capital Project Approval Process Job Aid JA-AM-2001-A (Reference 1).
