Rate increases per Eversource

Dear PURA
THERE IS A PROPOSED RATE INCREASE OF 18% ELECTRICITY COST IN CONNECTICUT. On average this will cost Connecticut residence $400 per year. Where is all this money going to, And why are we responsible for sources operational costs?
Vote No.

This will again impose a burden on the residents of Connecticut. For absolutely no reason.
Connecticut is currently unaffordable.. No one can afford a rent/mortgage and energy costs that are equal.

This is not a failure of the federal government. This is a failure of Connecticut government.

Your energy policy in Connecticut has failed. Residents are leaving the state in droves. When is enough enough?

Reverse course, open the energy lines through New York. Sue to get them open The pipeline should've never been shut down and we know who is to
blame, Lamont's administration and your board.

Sincerely
Dr. Linda Dalessio
