Dear People, I have lived in four “Golden Medallion" (all electric) houses over a span of over 50 years in three different states. In Hingham, MA your Town electric bill was discounted 15% if you had an all electric home.

The proposed Eversource increases for Distribution for Residential +109% and Residential Electric Heat +152% are absurd

I understand the cost of fuel has skyrocketed which is reflected in increased Customer Charges of Residential +28% and Residential Electric Heat +26% are usary.

The same percentage increases for Customer Charge should be applied to Distribution resulting in a rate of Residential $.074808 and Residential Electric Heat $.048422.

Please consider the people of the State of Connecticut, all of us who have incomes across the spectrum, before agreeing to these outragous increases in both Customer Charge and Distribution.

Thanking you in advance.
