Date Filed: November 06, 2026

Witness: Jessica B. Cain and Daniel M. Traynor
Request from: Office of Consumer Counsel

Question:

(AFFORDABILITY) For each residential rate class, assuming an average monthly usage of 750 kWh and assuming the remaining three components of the bill remain at current charges (i.e., standard service at current rate, transmission and public benefits at current rates), please provide an analysis showing the energy burden for each income threshold in $10,000 increments from $30,000 to $250,000 associated with the proposed rate increase.

Revised Response:

Upon review of OCC-957, the Company noticed an error in the calculation of the Rate 7 monthly average bill[1]. Please refer to OCC-957RV01, Attachment 1, for the corrected analysis.

Original Response:

Please refer to OCC-957, Attachment 1, for the requested analysis.

[1] The original OCC-957, response indicated the monthly average bill for a Rate 7 customer was $229.54, and the corrected average monthly bill is $227.82.
