Technical Justification:

Project Need, Objective and Justification

As New England's clean energy catalyst, Eversource will lead by example and minimize the environmental footprint of its vehicle fleet. The Eversource CT Material Logistics group will be purchasing 6 Stake Body trucks in 2025. These will serve as replacements for vehicles that meet Eversource's replacement criteria based on age and mileage.

Project Scope

The Fleet Vehicle Capital Program strategically replaces vehicles to improve reliability and mitigate long term costs that would arise from vehicle breakdown and user down-time. Vehicle replacement, in conjunction with vehicle standardization, improves vehicle reliability, appearance, and lowers cost.

The FVCP is managed proactively with a standard approach across Operating Companies. Vehicles to be replaced are identified annually as a component to the program. Vehicle replacements are prioritized based on age, condition, and need across the fleet.

Background

Vehicle age, condition, and applicability to vehicle's use are reviewed to determine replacement need.
Potential vehicle purchase types are evaluated for cost and right size for work tasks.
Current fleet make-up is reviewed to determine vehicles that can be repurposed prior to purchasing new vehicles.
Standardized vehicles are purchased.
