Subject: Outrageous Proposed EVERSOURCE Rate INCREASE!!!!

Give or take .... Connecticut is in the TOP 6 most expensive electric rates for residential customers in these United States. WHY?????

Shareholders getting richer? Mismanagement? Government????

Does anyone listen to the people of Connecticut who can't put food on their table? Who struggle to put gas in their tanks to go to work (to pay for their electric bills). And the list goes on.

I'm aware there are resources to get assistance BUT not everyone qualifies. Just because some of us pay our bills (without any assistance) doesn't mean we haven't cut corners to do so. It's not like I have a choice other than Eversource for my electric company (I already choose the supplier on a regular basis to help decrease my all electric apartment).

I hope PURA comes to its senses (with some compassion) and realizes this massive increase is unfair. DO THE RIGHT THING!!! If there has to be an increase, drop the increase substantially.

A frustrated customer of Eversource and PURA.
