CTFARM20	CT Meter Farm Project	This work order will capture charges related to the Connecticut Meter Farm being built by Tesco. The purchase order number is 10996182. Itron Riva AMI meters will be installed to test the communication attributes. This test will help decide which type of AMI system should be pursued. The 3 farms cost $94,290.00. All above information provided by George Townsend's e-mail dated 4/10/2020.	Fees + Payment - FP0	107010	1

81268353	Baldwin 13F – Remove 4.8kV Equipmen	site removal of the de-energized 4.8kV equipment and perform environmental waste characterization at Baldwin 13F substation, located in Waterbury, CT, in accordance with Eversource Procedure ESS56. The 4.8kV yard at Baldwin 13F was de-energized in August 2025 under Distribution Line project CD00781, after all 4.8kV load had been converted over to 13.8kV feeders. Eversource is required to remove the de-energized substation equipment, foundations, and potential environmental liabilities when retiring a portion of a substation. Eversource will not be retiring the full substation and will be performing environmental waste characterization and remediation activities only in the area pertaining to the de-energized 4.8kV equipment. </dev><>, BASE TEXT ... CTDSOC11	New Windsor SOC ITand AV Equipment	A project authorization for $19,994,000 is being requested to fund the IT Scope of Work to support the construction of a new CT Distribution System Operation Center (SOC) at the existing Windsor Facility. The new Windsor SOC will be designed like the Mass Ave Control Room to support a physical layout and system visualization tools that encourage communication and visibility between desks. This model has been identified as an industry best practice. Once constructed, the new Windsor SOC will improve our operational efficiency, meeting NERC-CIP best practices. The audio and video display systems will increase operational awareness and efficiencies to include a Human Performance centric design needed to operate the modern distribution system and the distribution grid of the future. Additionally, the video wall display boards will enhance overall awareness by leveraging current and new graphical user interfaces as they become available; this will enhance operations ability to assess and analyze system events. This PAF scope of work includes the purchase, installation, and configuration of Computer, Audio-Visual, and KVM (Keyboard, Video, and Mouse) equipment which must be purchased to outfit the SOC with technology needed for system operations. 		Berlin - ATC - Roof Railing Installation			
F2411023	Berlin - ATC - Roof Railing Install	Safety concerns have been raised about the existing railing system on the roof of the ATC Garage. This project will install a compliant railing system to mitigate the potential danger associated with working near the edge of the roof.	Fees + Payment - FP0	107010	1

		This work order was created to accept the charges for the Berlin Training Substation project to continue to modernize / upgrade for increased hands-on training opportunities for field workers and supervisors in a controlled enviroment that is not currently available. This training will simulate real-life experiences without the risk of energized equipment at primary or transmission voltages. The costs will be distributed per below: CT = 85% = $300,050			
24TSUBCT	Berlin Training Substation	WMA = 15% = $52,950	Fees + Payment - FP0	107010	1
