CS002391	Williams 9L – Network Monitoring Sy	This project is the substation component of installing the Digital Grid network remote monitoring system. This project in conjunction with CD00828 and CD00948 will prolong the useful life of the network protector and transformer by allowing the system to notify System Operators when conditions such as network protectors pumping or cycling, loss of protector pressure and the presence of water occurs. Overall, these projects are focused on enabling Eversource to increase network protector's reliability and defer network protector's major maintenance from a 2-year cycle to a 4-year cycle, thus reducing resource impact on Operations. This project involves the following work within the Williams 9L fence: installation of 4 coil sensors (one on the getaway cable of every network feeder), installing a receiver cabinet in the control house, installing a DNP interface, commissioning the system, 2 years of web portal access, and 2 years of engineering support. This project was approved on 11/17/2016 for $31,000 with an with an overall estimate of $306,255. Following detailed design, the total project request is $297,203.	Joint Line Billing-JL0	107010	1

80224074	BC - CD01576 - 47N3 Overload - Inst	Southwest Hartford 47Southwest Hartford 47N3 is a 23 kV circuit which supplies 3,530 customers in West Hartford. When 47N3 picks up the 47N7 under contingency, it exceeds its normal and emergency rating by 118% and 100% respectively. For loss of the 4A7, the 47N3 also exceeds the normal rating by 104%. Based on Eversource engineering standard, the 47N3 must remain at or below 100% of its normal rating under contingency. To address this issue, project CD01576 will reconductor the existing 500 PILC UG Cu getaway cable to 1000 KCMIL Cu from the substation breaker to riser pole 4754 on Merrill St. By upgrading the existing getaway to 1000 KCMIL Cu, the 47N3 load will remain at or below its normal rating for all contingency operations. This project received Initial Funding approval at the May 27, 2021, CTPAC meeting for $264K. The Full Funding request is for actual costs of $622K or an increase of 135%. A scope change was required to replace two additional sections of cable on New Park Ave. As part of replacing the cable a wye splice also needed replacement on New Park Ave. There was not enough room in the splicing bay of the existing manhole to make up the splice since the feed was PILC cable and would require a transition splice to hook up to the new wye splice. The wye splice was relocated to an adjacent manhole, which required one new section of 500 kcmil CU cable. This required replacing the final two pieces of 500 kcmil CU PILC going from New Park back to the switchgear in the substation driveway to eliminate all the PILC cable on this feeder. Outside services there was estimated at $100,649 for the Preliminary estimate versus $229,547 for the Final Estimate or a 128% increase. The biggest driver in this difference was the underground contractor cost for this project which was $228,900. Material was estimated at $55,283 for the ENG versus $200,100 for the ACT or a 262% increase. The scope change drove up material costs.	Joint Line Billing-JL0	108030	0.18291942

Based on Eversource engineering standard, the 47N3 must remain at or below 100% of its normal rating under contingency. To address this issue, project CD01576 will reconductor the existing 500 PILC UG Cu getaway cable to 1000 KCMIL Cu from the substation breaker to riser pole 4754 on Merrill St. By upgrading the existing getaway to 1000 KCMIL Cu, the 47N3 load will remain at or below its normal rating for all contingency operations. This project received Initial Funding approval at the May 27, 2021, CTPAC meeting for $264K. The Full Funding request is for actual costs of $622K or an increase of 135%. A scope change was required to replace two additional sections of cable on New Park Ave. As part of replacing the cable a wye splice also needed replacement on New Park Ave. There was not enough room in the splicing bay of the existing manhole to make up the splice since the feed was PILC cable and would require a transition splice to hook up to the new wye splice. The wye splice was relocated to an adjacent manhole, which required one new section of 500 kcmil CU cable. This required replacing the final two pieces of 500 kcmil CU PILC going from New Park back to the switchgear in the substation driveway to eliminate all the PILC cable on this feeder. Outside services there was estimated at $100,649 for the Preliminary estimate versus $229,547 for the Final Estimate or a 128% increase. The biggest driver in this difference was the underground contractor cost for this project which was $228,900.	Joint Line Billing-JL0	593050	0.00098323
80224074	BC - CD01576 - 47N3 Overload - Inst	Material was estimated at $55,283 for the ENG versus $200,100 for the ACT or a 262% increase. The scope change drove up material costs. Southwest Hartford 47Southwest Hartford 47N3 is a 23 kV circuit which supplies 3,530 customers in West Hartford. When 47N3 picks up the 47N7 under contingency, it exceeds its normal and emergency rating by 118% and 100% respectively. For loss of the 4A7, the 47N3 also exceeds the normal rating by 104%. Based on Eversource engineering standard, the 47N3 must remain at or below 100% of its normal rating under contingency. To address this issue, project CD01576 will reconductor the existing 500 PILC UG Cu getaway cable to 1000 KCMIL Cu from the substation breaker to riser pole 4754 on Merrill St. By upgrading the existing getaway to 1000 KCMIL Cu, the 47N3 load will remain at or below its normal rating for all contingency operations. 23CTCSCG	CT Apprentice Climbing Gear 2023	This work order is to purchase CT craft school apprentice climbing gear / tool kits budgeted in 1CS (CT craft school). Per Joe Chiappetta and Todd Lynch on 5-3-2023, 15 tool kits will be purchased for UG apprentice lineworkers. Per Dan Chambrello's e-mail dated 4/12/2022, there was a need for 60 kits in total for 2022. Hydron was able to deliver 37 kits for 2022 in 2021, therefore, the charges appeared in 2021. This work order is for the remaining 23 kits that are needed to make up the 60 in total. Unit price = $3,546.22 Quantity = 23 Estimated total = $81,563.06	Joint Line Billing-JL0	107010	1
23CTEHFT	East Hampton Tools and Equipment	This work order is to purchase CT craft school (AWC) tools and equipment for East Hampton. Per M. Greges' e-mail dated 10-24-2023, the following items will be purchased: Item # 521659 ($590.80) and item # 568629 ($2,475.00). Per M. Greges' e-mail dated 11-7-2023, a Milwaukee Transfer Pump Utility Kit will be purchased for $631.60.	Joint Line Billing-JL0	107010	1

80306781	Still River 55G New Distru substati	Still River #80 - The initial funding request of $574K is to develop a new Bucks Hill 29/12.5kV/3.15kV/12kV bulk station which will, in part, replace the existing Bucks Hill distribution station in Torrington, CT. The existing Bucks Hill 29/12.5kV/3.15kV/12kV bulk station which will, in part, replace the existing Bucks Hill distribution station in Torrington, CT. The existing Bucks Hill 29/12.5kV distribution station will then be decommissioned after completion of the new station. This project will include two (2) 115kV transmission circuits from Winsted Junction (2.7 miles south of existing the Bucks Hill 29/12.5kV substation), proposed in an overhead (OH) design in an existing right-of-way (ROW) in the vicinity of the existing distribution station, depending on the location of the new substation. The transmission and distribution costs will be tracked separately at the work order level.	Joint Line Billing-JL0	108030	0.46680009
