CS000581	Install Feeder Position (Fusion Sol	Tunnel 12S - Install a new 23kV feeder (12S6) which will serve as an express feed to the new Fusion 20 MW Photovoltaic Distributed Generation. The new feeder will require the addition of one 23kV Tie breaker, three group-operated disconnect switches, PTs and one feeder recloser.	Material-M00	107010	1
CS000691	Maple 24-Remove Substation	Maple 24 - Remvoe all equipment, foundations, fence and trap rocks. All equipment will be scrapped except for the transformers (24-1X and 24-2X). Both transformers will be evaluated for possible use as system spare, otherwise they should both be scrapped. The substation site should be cleared and turned over to Real Estate for sale.	Material-M00	108030	1
CS000841	Replace 3X Transformer	Manchester 3A - Replace the 3A-3X transformer. The existing 115kV Wye to 22kV Delta 45 MVA transformer will be replaced with a new 115kV Delta to 23kV Wye 60 MVA transformer. The existing 3A-3X power transformer as well as the associated 3A-3Y grounding transformer will be removed and scrapped.	Material-M00	107010	1
CS001081	Moosup 19Y-Remove Substation	Moosup 19Y - Remove the substation. All of the equipment will need to be removed, including the foundations and the 19Y-1X transformer will be scrapped. The fence wnd trap rock will remain and the site will be kept because a pole line crosses the small site.	Material-M00	108030	1
CS001421	Battery Upgrades	South Windsor 14L - UPgrade the existing battery set to include capacity for the additional Cip v5 equipment.	Material-M00	107010	1
CS001524	Recloser Automation	East Bantam 19U - Install new station FORM 6 Reclosers on Eversource CT feeders to address Recloser Automation. This project also includes installation of a DSCADA communications system that will allow the SOC to remotely apply the control fast-trip feature prior to commencing any live-line feeder work. The overall project includes complete installation of all necessary protection settings, control and communications devices.	Material-M00	107010	1
CS001526	Recloser Automation	Cornwall 37J - Install new station FORM 6 Reclosers on Eversource CT feeders to address Recloser Automation. This project also includes installation of a DSCADA communications system that will allow the SOC to remotely apply the control fast-trip feature prior to commencing any live-line feeder work. The overall project includes complete installation of all necessary protection settings, control and communications devices. Furnish necessary engineering and design to create a 23kV source at Mansfield 12J substation to replace the existing 27.6kV transformer and associated feeders. Work includes the following installation: •One 69-115/23kV 62.5MVA (12J-4X) transformer •One new lineup of 23kV Double Bus Metaclad Switchgear •Three 115kV circuit switchers •One 115kV Motor Operated Disconnect Switch •Replacement of existing electromechanical relays for the 12J-1X, 12J-2X transformers with new microprocessor based SEL relays •Installation of l 12J-3S, 12J-4S, 12J-3H, 12J-4H transformers •Installation of six 115kV cable potheads [(2) cable pothead structures] and arresters •Approximately 1500 ft. total 115kV XLPE cable 500 ft. per phase •Install new ground grid to cover the expended fenced area •25kV power cables between switchgear and riser poles (located outside of the substation fence)t •Required conduits and foundations for new equipment	Material-M00	107010	1
CS001661	Mansfield 12J Install 12J-4X transf		Material-M00	107010	1
CS001751	Install New Feeder (DG)	Tracy 14M - Establish a new feeder position 14M13 for a DG project associated with the RES Americas' 20MW PV DG project. The new 14M13 overhead feeder position will be between 14M-14T-6 and 14M-15T-6 bus switches. A new vacuum 23kV circuit breaker 14M13-2 will be installed using steel spans on the existing foundation, a new group operated disconnec twwitch14M13-5, a new set of PTs and arresters will also be installed.	Material-M00	107010	1
CS001951	South MeaSpare Transformer Assembly	Spare Transformer Assembly - Purchase, assemble, fill and test a system spare transformer for storage at the South Meadow Storage Facility in Hartford, CT. The new system spare will be 60 MVA, 115-23kV, 14.2% impedance. Catalog ID 465287. This new spare will take the place of the existing spare (Catalog 443766) which will be moved from the SOuth Meadow Storage Facility to Tracy 14M substation in September.	Material-M00	107010	1
CS002816	DC Battery Voltage Monitoring	Bloomfield 3B - Implement station DC Battery Voltage Monitoring as a backup system to the AT10 charger internal alarm system.	Material-M00	107010	1
CS005951	PI Vision Transformer Monitor Repl	This project will replace transformer monitoring displays used by the substation technical engineering group to monitor and health and time by visualizing data collected using outdoor equipment monitors. An external monitor will be loaded to create these displays in PI Vision, an existing visualization tool on the Eversource network. A new PI Asset Framework database will be developed. The structure of the dashboard includes an Overview page and nine sub pages. The objective of the Overview page is to provide users a quick look at the health of each transformer and to highlight via color coding the potential issues to be investigated further. CS001341	Danielson Turbine 15C-Remove Deener	This project is seeking a partial funding of $725K to complete equipment removals and environmental testing for the deenergized substation Danielson Turbine 15C substation located at 75 Athol St, Dayville CT. The substation was deenergized in 2017 following Distribution Line project CD00588. Substation equipment removals were not completed following the substation deenergization. There will no longer be an Eversource use for the property and Real Estate indicates the property will be evaluated for disposition.	Material-M00	108030	1

		To purchase an add-on software package to PQView called FaultPoint Set up a database link to our exiting saved relay events thru IT that would enable the use of Synergy models to populate algorithms to calculate fault locations based on system parameters and protection relay event logs This proposal includes the cost to fund the purchase and set up the required support from IT and database storage space in order to store system data for software analysis. Project Objectives To identify, locate and repair underground faults within minimal time, limiting customer outage times. This will improve overall system response times and minimize repair times having a direct effect on SAIDI and CAIDI

CS002241	Sandbank 30F S/S – Remove Substatio	Permit necessary engineering and design to retire the Sandbank 30F substation. Remove all equipment including transformer, reclosers, switches, etc. Also remove the fence and stop sock. Remove all foundations to below grade or remove completely, if practical. Perform environmental remediation as required. Loam and seed the site for grass growth to minimize erosion. Turn the site over to the Real Estate Department for sale with the provision that an easement is obtained for an overhead line. The 30F-1X transformer will be put in inventory and then relocated to Judd Brook 22R for installation there (reference Project #201598). All other equipment will be scrapped.	Material-M00	108030	1

CS009048	DSCADA LTC Controls Upgrade	Furnish necessary engineering and design to replace existing cube-controlled Transformer Load Tap Changer (LTC) Voltage Reduction System with a DSCADA-controlled LTC Voltage Reduction System at various Eversource Connecticut substations. This system is used to lower the Distribution voltage (2% or 5%) during certain Transmission contingencies to help stabilize the system. The DSCADA signal will be transmitted via radio from the control house to the LTC receiver, to avoid the expense of adding additional conduit, if no conduit is available. If conduit is available, the devices will be connected via fiber cable.	Material-M00	107010	1

CS002841	Carmel Hill Add 2nd Xfmr + SWGR	This project proposes the addition of the second 115/23kV/42.5MVA transformer (116/20), with associated switchgear. Carmel Hill 101 in Woodbury, CT is a 115/23kV Substation with one (1) distribution transformer and one (1) switchgear that has three (3) feeders. A second distribution transformer and switchgear are required to improve reliability by increasing the contingency load carrying capability of the substation and feeders. Eversource's "EOS PLAN 0010 Bulk Distribution Substation Assessment Procedure" specifies the need for a second transformer to keep the substation loading below 75% of the existing transformer's nameplate rating. 		Project Scope: Oxford 26N Furnish necessary engineering and design to replace existing radio-controlled Transformer Load Tap Changer (LTC) Voltage Reduction System with a DSCADA controlled LTC Voltage Reduction System. This system is used to lower the Distribution voltage (2% or 5%) during certain Transmission contingencies to help stabilize the system. Provide additional LTC control capability for the new DSCADA system so the voltage of individual LTCs can be raised/lowered by the SOC to satisfy field conditions. Ability to provide the tap position of the LTC and to remotely turn off regulation so the LTC does not react during switching.

SUBFLOOD	SUB FLOODING & CLIMAGE CHANGE	EVALUATE SS VULNERABILITY OF FLOODING DURING CLIMATE CHANGE SCENARIOS. ASSET HYDROLOGICAL MAPPING, INUNDATION MODEL AND HYDROLOGICAL DAM ROF TOOL	Material-M00	107010	1
		This work order was created to accept the charges for the Substation curriculum development project which is a piece of the overall electric curriculum development project (CTMTRTRN) for Field Training.			
		Per Alex Chasson-Colebourn , the vendor (Index AR) quote is $1,400,000 and the vendor (Mosaic) quote is $1,566,000.			
		The internal labor cost is estimated to be $33,333 each month for 18 months.			
		The costs (direct and indirect) will be distributed according to the PAF $4,045,649. CT = 35% = $1,415,977 EMA = 35% = $1,415,977 NH = 20% = $809,130

CS002731	Add 2nd Transformer & Switchgear	Furnish necessary engineering and design to install a new 45F-2X transformer, a 45F-2X1-2 high-side circuit switcher, 45F-2S pad-mounted station service and new double-bus 25kV switchgear. The new switchgear will contain PTs and pads to connect cable which will supply the new pad-mounted station service transformer. The pad-mounted station service transformer and PTs in the switchgear are proposed to fit the new switchgear within the existing yard.	Material-M00	107010	1

FRAD1D01	FRAD Installation CT	This project will be covering the installation of new FRAD equipment in Berlin and Mass Avenue Data Centers. The FRADs take RS-232 serial circuits and transports them in frame relay packets. Frame relay, combined with the RS-232 serial connection and the Multiprotocol Label Switching (MPLS) pseudo wires, are the chosen solution to transport SCADA to multiple data centers simultaneously. This project is in coordination with the eECS project	Material-M00	107010	1

		CT Electric Fleet Capital Tool Purchase Wheel Balancer Tire Lift, eliminates technicians lifting the tire onto the wheel balancer, 15T, 16027 for the Madison garage.			
TRAN2201	CT Elec Fleet Capital Tool Purchase		Material-M00	107010	1
		CT Electric Fleet Capital Tool Purchase Replacing a defective (Obsolete) Tire Balancer at the Waterbury Garage. This will allow Waterbury mechanics to balance tires instead of bringing tires to Berlin or using a vendor. The life of the machine is about 10 years. The tire machine will sae us $800 a year plus reduced down time for our users.

		This work order is to purchase CT Craft School Apprentices Climbing Gear / Toolkits budgeted in Field Training (1CS). Per Dan Chambrello's e-mail dated 4/12/2022, there was a need for 60 kits in total for 2022. Hydron was able to deliver 37 kits for 2022 in 2021, therefore, the charges appeared in 2021. This work order is for the remaining 23 kits that are needed to make up the 60 in total. Unit price = $3,546.22 Quantity = 23			
22CTFTCG	CT Apprentice Climbing Gear Toolkit	Estimated total = $81,563.06	Material-M00	107010	1
		This work order is to purchase CT Technical (Eletric) Training tools and equipment for the Berlin Training Yard and classroom facilities. Per Bridget Bentley's email dated 2/4/2022 - requesting the purchase of a pole holder base for the Berlin Training Yard approx $1,993.00. Per Bridget Bentley's e-mail dated 3/2/2022 - requesting to purchase 3 tower lanyards to be used in the Berlin Training Yard and they cost $604.44 each. Per Bridget Bentley's e-mail dated 4-4-2022 - requesting $47,754.58 for the purchase of upgrades to the AV equipment in one of the Berlin classrooms. Per Matthew Greges e-mails dated 4/5/2022 and 4/6/2022, requesting steel pole part # 593301 for $2,468.32 and steps part # 529994 @ $41.22 for each unit and 25 units are needed. Per e-mail from Matthew Greges dated 4/29/2022, 25 poles will be ordered. (5) 40/2 PENTA poles at $670.73 each and (20) 45/2 PENTA poles at $742.63 each. Per e-mail from Matt Greges on 5/17/2022, a ladder and v-rung will be purchased for the Berlin Training Yard. The cost per unit is approximately $550. Per 4 invoices being received for tools for TMP Hot Stick Training course for Technical (Electric) Training, $9,495.77 was spent. PO 11132408 (911115355619, 911115355615, 911115355623, 911115355621). Per Dan Chambrello's e-mail dated 7/26/2022, 3 crimper/cutter tools will be purchased costing $1,171.35 each for a total of $3,514.05. These will be used for UG apprentice and refresher training. Per Dan Chambrello's e-mail dated 11-1-2022, a new switch will be added to the Berlin Training Yard for a total estimated cost of $34,000. 580199 = G&W Trident Switch for $20,000 588540 = Trident Switch Bracket for $1,000 579688 = QEI Control (Complete) for $13,000

		This project is the substation component of installing the Digital Grid network remote monitoring system. This project in conjunction with CD00828 and CD00948 will prolong the useful life of the network protector and transformer by allowing the system to notify System Operators when conditions such as network protectors pumping or cycling, loss of protector pressure and the presence of water occurs. Overall, these projects are focused on enabling Eversource to increase network protector's reliability and defer network protector's major maintenance from a 2-year cycle to a 4-year cycle, thus reducing resource impact on Operations. This project involves the following work within the Williams 9L fence: installation of 4 coil sensors (one on the getaway cable of every network feeder), installing a receiver cabinet in the control house, installing a DNP interface, commissioning the system, 2 years of web portal access, and 2 years of engineering support. This project was approved on 11/17/2016 for $31,000 with an with an overall estimate of $306,255.			
CS002391	Williams 9L – Network Monitoring Sy	Following detailed design, the total project request is $297,203.	Material-M00	107010	1

		Southwest Hartford 47Southwest Hartford 47N3 is a 23 kV circuit which supplies 3,530 customers in West Hartford. When 47N3 picks up the 47N7 under contingency, it exceeds its normal and emergency rating by 118% and 100% respectively. For loss of the 4A7, the 47N3 also exceeds the normal rating by 104%. Based on Eversource engineering standard, the 47N3 must remain at or below 100% of its normal rating under contingency. To address this issue, project CD01576 will reconductor the existing 500 PILC UG Cu getaway cable to 1000 KCMIL Cu from the substation breaker to riser pole 4754 on Merrill St. By upgrading the existing getaway to 1000 KCMIL Cu, the 47N3 load will remain at or below its normal rating for all contingency operations. This project received Initial Funding approval at the May 27, 2021, CTPAC meeting for $264K. The Full Funding request is for actual costs of $622K or an increase of 135%. A scope change was required to replace two additional sections of cable on New Park Ave. As part of replacing the cable a wye splice also needed replacement on New Park Ave. There was not enough room in the splicing bay of the existing manhole to make up the splice since the feed was PILC cable and would require a transition splice to hook up to the new wye splice. The wye splice was relocated to an adjacent manhole, which required one new section of 500 kcmil CU cable. This required replacing the final two pieces of 500 kcmil CU PILC going from New Park back to the switchgear in the substation driveway to eliminate all the PILC cable on this feeder. Outside services there was estimated at $100,649 for the Preliminary estimate versus $229,547 for the Final Estimate or a 128% increase. The biggest driver in this difference was the underground contractor cost for this project which was $228,900.			
80224074	BC - CD01576 - 47N3 Overload - Inst	Material was estimated at $55,283 for the ENG versus $200,100 for the ACT or a 262% increase. The scope change drove up material costs.	Material-M00	107010	1

23CTCSCG	CT Apprentice Climbing Gear 2023	This work order is to purchase CT craft school apprentice climbing gear / tool kits budgeted in ICS (CT craft school). Per Joe Chiappetta and Todd Lynch on 5-3-2023, 15 tool kits will be purchased for UG apprentice lineworkers. Per Dan Chambrello's e-mail dated 4/12/2022, there was a need for 60 kits in total for 2022. Hydron was able to deliver 37 kits for 2022 in 2021, therefore, the charges appeared in 2021. This work order is for the remaining 23 kits that are needed to make up the 60 in total. Unit price = $3,546.22 Quantity = 23 Estimated total = $81,563.06	Material-M00	107010	1
23CTEHFT	East Hampton Tools and Equipment	This work order is to purchase CT craft school (AWC) tools and equipment for East Hampton. Per M. Greges' e-mail dated 10-24-2023, the following items will be purchased: Item # 521659 ($590.80) and item # 568629 ($2,475.00). Per M. Greges' e-mail dated 11-7-2023, a Milwaukee Transfer Pump Utility Kit will be purchased for $631.60.	Material-M00	107010	1

80306781	Still River 55G New Distru substati	Still River 55G - The initial funding request of $370K is to develop a new Bantville 29F2-42 FMVA 115kV/23kV bulk station which will, in part, replace the existing Bantville distribution station in Torrington, CT. The existing Bantville 29J distribution station will then be decommissioned after completion of the new station. This project will include two (2) 115kV transmission circuits from Wininger Junction (1.7 miles south of existing the Bantville 29J substation), proposed in an overhead (OH) design in an existing right-of-way (ROW) in the vicinity of the existing distribution station, depending on the location of the new substation. The transmission and distribution costs will be tracked separately at the work order level.	Material-M00	107010	1

CS002581	SW Hartford 47N Replace 9 OCBs	Scattered Hartford 47N substations in Hartford, CT (c.a. 115 kV/ 13kV substation built in 1957). While in the process of equipment has been replaced over the last 10 years, most equipment is original. There are also 20 OCB's of which Southern New Englad is the replacer, in addition to the circuit breaker isolation switches and electromechanical relays used for transformers, bus and feeder protection. Besides the need to replace aging equipment, multiple asbestos outages have highlighted the need to improve asbestos/PAH protection for reliability purposes. In addition to these equipment replacements, NYSEG Green Southern needs to be added for the two transformers to address contamination exceeding restrictive State guidelines, ranging in soil ranging from the two ASBESTOS transformers with the 13.8kV disconnect switches	Material-M00	107010	1
