We had to get a new electric service drop and a bunch of wiring done / installation of outlets for hybrid bucket truck charging / engine block heater outlets (winter) as well as a meter socket/disconnect for our show up site job trailer. This infrastructure was just installed at a site we leased at 400 Park Road in Watertown. We have a 3 year lease with options to renew for an additional 3 years.	Material-M00	107010	1

GXT25047	Phase ID Model 6000	Phase ID model 6000 will be used to determine phasing on distribution circuits throughout Connecticut. Phase identification is required to determine what phase loads are connected to in the field. This information will be utilized to perform load balancing within the distribution circuits. Balanced loads will help prevent circuit overloads, equipment damage, low voltage and stray voltage.	Material-M00	107010	1

		Eversource Open Sky data network support critical Distribution Automation applications in CT. These radios have now been manufacturer discontinued. In order to have mobile radios to continue supporting Distribution Automation in CT, a last time buy of radios is needed. A budget of $1.2M was set aside for this purpose as a short-term mitigation to keep the system in operation till a new replacement system is identified as part of the Field Area Network Strategy.
