		A project authorization for $19,994,000 is being requested to fund the IT Scope of Work to support the construction of a new CT Distribution System Operation Center (SOC) at the existing Windsor Facility. The new Windsor SOC will be designed like the Mass Ave Control Room to support a physical layout and system visualization tools that encourage communication and visibility between desks. This model has been identified as an industry best practice. Once constructed, the new Windsor SOC will improve our operational efficiency, meeting NERC-CIP best practices. The audio and video display systems will increase operational awareness and efficiencies to include a Human Performance centric design needed to operate the modern distribution system and the distribution grid of the future. Additionally, the video wall display boards will enhance overall awareness by leveraging current and new graphical user interfaces as they become available; this will enhance operations ability to assess and analyze system events. This PAF scope of work includes the purchase, installation, and configuration of Computer, Audio-Visual, and KVM (Keyboard, Video, and Mouse) equipment which must be purchased to outfit the SOC with technology needed for system operations.

F2411023	Berlin - ATC - Roof Railing Install	Safety concerns have been raised about the existing railing system on the roof of the ATC Garage. This project will install a compliant railing system to mitigate the potential danger associated with working near the edge of the roof.	OS Svc-Contr Env-OS1	107010	1

		This work order was created to accept the charges for the Berlin Training Substation project to continue to modernize / upgrade for increased hands-on training opportunities for field workers and supervisors in a controlled enviroment that is not currently available. This training will simulate real-life experiences without the risk of energized equipment at primary or transmission voltages. The costs will be distributed per below: CT = 85% = $300,050 WMA = 15% = $52,950

GXT24010	Tools Outfit 4 New Trailers - 2EV	Substation Construction 2EV has received (4) tool new trailers from Transportation that will be utilized on our substation construction projects. Our Chiefs will be outfitting these trailers suited to their needs. This will mean the purchase of construction materials, toolboxes, tools, shelving and cabinetry etc. Each Chief will be outfitting the Tool Trailer to his individual needs and requirements.
