80306781	Still River 55G New Distru substati	Still Rvr-1963. The initial funding request of $378K is to develop a new Bantrville 29F2-02-19AVA 13/4/33kV bulk station which will, in part, replace the existing Bantrville distribution station in Torrington,CT. The existing Bantrville 29F distribution station will then be decommissioned after completion of the new station. This project will include two (2) 115kV transmission circuits from Winsted Junction (3.7 miles south of existing the Bantrville 29F substation), proposed in an overhead (OH) design in an existing right-of-way (ROW) in the vicinity of the existing distribution station, depending on the location of the new substation. The transmission and distribution costs will be tracked separately at the work order level	Other Misc Acct-A01	107010	1
