80306781	Still River 55G New Distru substati	Still River 55G - The initial funding request of $570K is to develop a new Bantam (W 29 kV) 69/13.8 kV/12 kV/13.8 kV bulk station which will, in part, replace the existing Bantam distribution station in Torrington, CT. The existing Bantam (W 29) distribution station will then be decommissioned after completion of the new station. This project will include two (2) 115kV transmission line circuits from Winsted Junction (1.7 miles south of existing the Bantam (W 29) substation), proposed in an overhead (OH) design in an existing right-of-way (ROW) in the vicinity of the existing distribution station, depending on the location of the new substation. The transmission and distribution costs will be tracked separately at the work order level.	Other-O00	107010	1
