In looking at the percentage of increases to residential consumers, I see that the distribution charge is increasing by **152%**!!!!! I am on Social Security and my monthly payment is not increasing by 152%. How do you substantiate that much of an increase especially to seniors who are not employed and live on their SS income??

And the customer charge is increasing by 26% for a total increase of 19.3% to the consumers. My Social Security is not increasing by 19.3%.

If ordinary people have to cut back on what they spend for groceries, gas and day to day expenses, why can't Eversource cut back on what they pay to their executives to spare consumers such high increases? Why not have corporations pay more as they use more? We already have to pay enormous amounts for insurance, groceries, gas and other necessary expenses just to try to live day to day.

I find this increase incredibly outrageous and should be scaled back to no more that 10%. Even that won't be covered by my increase by Social Security. If we don't get a 20% increase why not share the expense and cut it in half to 10%.

Our state should be leading and not giving in to corporate pockets.

Have a blessed day,
Eileen Royce
