Dear PURA Commissioners,

I am a ratepayer and CT resident. Today I ask that you reject Eversource's proposed $727 million ANNUAL rate hike, as they are reporting enormous profits. Clearly, from a financial perspective, this increase is not necessary.

What is necessary, in my opinion, is to weigh the cost to consumers of Eversource.
Far too many residents, are unable to make ends meet now. We live in a state, among states with the highest energy rates, and that is NOT something to be proud of. We are loosing businesses and residents due to this fact. CT should be an affordable place to live for all.

I urge you to seriously investigate all aspects of this rate increase request. I thought Eversource fell under a regulated monopoly? We should be sure this is not about more profit for Eversource investors! The rich are rich enough. Let this review be about complete transparency and protection of consumers.

Thank you for taking the time to read this. I sincerely hope you will take all comments and requests for a thorough rate review extremely serious. With all the current economic hardship citizens are forced to deal with in 2026, a lifeline such as electricity should NOT be another burden.

Respectfully,
Debra Bologna
