Subject: Public Comment Regarding Eversource Rate Request – Docket No. 26-05-10

Dear Public Utilities Regulatory Authority,

I am writing to formally express my strong concern regarding Eversource's proposed rate request, which could result in rate increases of up to 18% for Connecticut customers.

Many Connecticut residents are already struggling with high electricity bills and the rising cost of living. An increase of this magnitude would place an additional financial burden on households, seniors living on fixed incomes, working families, and small businesses.

I respectfully urge PURA to conduct a thorough and transparent review of Eversource's request before approving any additional charges. I ask that the Authority carefully examine the justification for the proposed increase, the reasonableness of the expenses being passed on to customers, and whether every reasonable effort has been made to control costs and protect ratepayers.

Electricity is an essential service, and Connecticut residents deserve rates that are fair, reasonable, and affordable. Customers should not be expected to bear substantial additional costs without clear evidence that the proposed charges are necessary, prudent, and in the public interest.

I respectfully request that PURA carefully consider the financial impact on Connecticut residents, require full accountability from Eversource, and reject or substantially reduce any portion of the proposed increase that is not adequately justified.

Please include my comments in the official record for Docket No. 26-05-10 and consider the concerns of residential ratepayers when making your determination.

Thank you for your time and consideration.

Sincerely,

Lakeisha Sease
