Hello,

I am writing to voice that I am against the every source rate hike.
Eversource has repeatedly raised their rates citing the need to improve the infrastructure to deliver electricity. How many times will they be fixing the infrastructure to warrant repeated increases?
Additionally, why are the consumers forced to account for infrastructure improvements when the CEO of Eversource also gets a salary increase? The CEO of Eversource received almost 15 million dollars in salary including shares, meanwhile the company is saying the infrastructure needs to be improved.
Eversource has a monopoly as an electrical provider and we are forced to pay these rate hikes or we do not get power.
Now we have the ability to choose a different energy provider, but then Eversource just raises the rates for delivery - which we cannot change.
We are being robbed while the ceo is making 104 times more than the average Eversource worker.

Enough is enough.

Thank you,
Tiffany Lucas
