Re: LEP Opinion: Underground Storage Tank (UST) Release
Eversource Madison Area Work Center
135 New Road
Madison, CT
LUST ID #31668

Dear Ms. Weider:

Groundwater & Environmental Services, Inc. (GES) has prepared this Licensed Environmental Professional (LEP) opinion letter following completion of remedial activities associated with a historical UST release (Leaking Underground Storage Tank (LUST) Case #31668) at the Eversource Madison Area Work Center located at 135 New Road, Madison, Connecticut (the "site").

The following activities were completed between September 2022 through September 2025:

- Remedial action plan preparation and submittal to the Connecticut Department of Energy and Environmental Protection (CTDEEP) on September 30, 2022.
- Bid specification support and preparation, which was finalized on January 11, 2023.
- Planning and contractor oversight during execution of the specified remedial action, which included remedial system decommissioning, excavation of gasoline-impacted soil, compliance soil sampling, and backfill and restoration completed between June and September 2023.
- Remedial action report preparation and submittal to the CTDEEP on December 7, 2023.
- Installation of replacement monitoring wells in December 2023.
- Post-remedial monitoring consisting of quarterly groundwater sampling events completed between January and October of 2024.
- LUST closure report preparation and submittal to the CTDEEP on March 14, 2025.
- Decommissioning of the monitoring well network, consisting of 21 wells, by a Connecticut-licensed driller in September 2025.

Based on the data and information presented in Weston & Sampson's environmental subsurface investigation completed in August 2019 and the subsequent investigation and remedial activities

Environmental Reserve Closure
Eversource Energy Madison Area Work Center
135 New Road, Madison, CT

conducted by GES, it is the opinion of the LEP that the former USTs were closed properly, and that soil and groundwater associated with the historical gasoline release have been investigated and remediated in compliance with the Connecticut UST regulations and the CTDEEP's Remediation Standard Regulations. As such, a request for closure of LUST ID #31668 was submitted to the CTDEEP on March 14, 2025.

We appreciate the opportunity to work with you on this project. Please do not hesitate to contact the undersigned at 866-839-5195 ext. 3839, or extension 3534, respectively.

Sincerely,
Groundwater & Environmental Services, Inc.
