Mr. Calvert:

EPA is in receipt of your proposed modification to the Berlin Settling Basin as described in your letter of February 12, 2020. Specifically, you propose to shift the placement of the stormwater replacement system to the north of the original location. The modification was submitted in accordance with Conditions 1 and 16 to the June 27, 2019 EPA Approval for the settling basin. Additional information was submitted April 6, 2020.

Based on our discussion today you also clarified that subsequent to EPA's approval of the original plan, Eversource determined that a larger system was needed than what was originally proposed. In your letter, you also indicate that the change is preferred based on the topography of the Site and to minimize the limits of soil disturbance. Eversource also has proposed to construct the new system in non-PCB contaminated soil. Therefore, in your modification, additional PCB data was provided to delineate the extent of PCB contamination along with the proposed disposal of excavated soil.

Based on EPA's review of the information provided and our discussion with you today, and in accordance with 40 CFR § 761.61(a)(3)(ii) and Approval Condition 16, EPA has no further questions on the proposed modification as described.

Please ensure that this change is captured and described in the Completion Report to be submitted for this project.

Should you have any further questions, please feel free to contact me.

Respectfully,

Kim
