Reference: **2018 Status of Site Controls**
Significant Environmental Hazard
Eversource Berlin Campus Settling Pond
Berlin, Connecticut

Dear Ms. Chen,

Eversource Energy (Eversource) has completed the inspection of the site controls at the Berlin Campus Settling Pond site located at 107 Selden Street in Berlin, Connecticut. The site inspection was completed on January 3, 2018 and consisted of a visual evaluation of the existing site controls in place as detailed in Part IV of the Significant Environmental Hazard (SEH) Report dated September 20, 2002.

The site continues to be located within a controlled secure area that is surrounded by a chain link fence with locking gates. The SEH signage posted on-site (area adjacent to SEH and at the entrance to the site) are still present and in good condition. A PCB Remediation Plan has been prepared and needs review and approval by DEEP and EPA. Refer to the attached photographs taken during the January 3, 2018 site inspection.

If you have any questions, please contact the undersigned at 860-665-3446.

Sincerely,

EVERSOURCE ENERGY

Matthew P. Calvert, LEP, LSP, CHMM, Environmental Specialist

cc: K. Feathers (CTDEEP)
G. Iadarola (Eversource Energy)
M. Beeler (Weston & Sampson)
G. Trombly (CTDEEP)
C. Fontanella (CTDEEP)

Site S.E.H. warning signage and chain link fencing (typical).

Fencing (typical) that surrounds areas where more SEH conditions existed outside of chain link fencing.
