Re: Proposed rate increase

I understand that it has been nine years since a rate review was conducted.

I also understand the increased costs for maintenance and delivery rates.

I have NO confidence that any scrutiny, any attempt to find waste and related costs, or management in depth review has been sufficiently done.

An 18% increase is unacceptable. I conserve electricity as much as possible. My income does not increase to cover this cost.

Who is looking out for the consumer? We have no competition. What are the options?

Who is checking on political ties that may be part of this process?

An 18% increase is unacceptable.
