Date Filed: October 05, 2026

Witness: Brendan J. O'Brien, Garrett J. Murray, Warren R. Boutin, Leanne M. Landry and Jeffrey D. Turano
Request from: ALLCO

Question:

For the $257,260.19 of net refunds computed in the December 2024 Final Accounting Reports, and separately for every other interconnection refund computed but unpaid at any time from 2017 through the present: (a) state the account in which each computed refund is or was recorded as a liability, the date recorded, and the current balance; (b) state whether and where those liabilities are reflected in the test year and rate year cost of service and balance sheet presented in this proceeding, including any offset to rate base; (c) state the amounts of interest or earnings the Company has realized on interconnection-related funds held in FERC Account 252500 or elsewhere, by year, and how those earnings are treated in the cost of service; and (d) provide, in native format, a schedule of every interconnection refund computed from 2017 through the present showing the customer (by anonymized identifier for non-Allco customers), the amount computed, the date computed, the date paid, and the amount outstanding.

Response:

CL&P objects to this request on the ground that it is an improper effort by ALLCO to use this rate case proceeding to obtain discovery for purposes of a lawsuit that it filed against the Company on August 10, 2026, in the United States District Court for the District of Connecticut (Civil Action No. 3:26-cv-1277), outside of and in contravention of the rules of procedure that govern discovery in that lawsuit.

CL&P further objects to this request on the ground that it is not within the scope of the proceeding to review the Company's application to amend its existing rates schedules because the interrogatory either seeks information specific to Allco projects or seeks information that Allco views as relevant to its specific projects.

Without waiving said objection, please refer to the Company's responses to ALLCO-001[i], ALLCO-002[ii], and ALLCO-004[iii].

Prior Referenced Responses:

[i] ALLCO-001 Question:

Identify each FERC account in which the Company records CIAC and other amounts collected from interconnection customers for interconnection studies, upgrades, and overheads, and state the balance in each such account at the end of each year 2018 through 2025 and as of the most recent month available.

ALLCO-001 Response:

CL&P objects to this request on the ground that it is an improper effort by Allco to use this rate case proceeding to obtain discovery for purposes of a lawsuit that it filed against the Company on August 10, 2026, in the United States District Court for the District of Connecticut (Civil Action No. 3:26-cv-1277), outside of and in contravention of the rules of procedure that govern discovery in that lawsuit.

Without waiving said objection, the Company records CIAC activity from interconnection customers to FERC Account No. 252500. The table below summarizes the end of year balance in FERC Account No. 252500 from 2018 through June 2026.

Year	Balance
December 2018	($5,569,769)
December 2019	($5,038,280)
December 2020	($9,076,090)
December 2021	($25,399,399)
December 2022	($11,263,859)
December 2023	($7,796,182)
December 2024	($10,334,276)
December 2025	($23,605,408)
June 2026	($28,277,769)

[ii] ALLCO-002 Question:

State the total dollar amount of CIAC and interconnection-related payments collected from DER and QF interconnection customers in each year 2018 through 2025, and explain precisely how those amounts are reflected in (a) rate base, (b) the Test Year revenue requirement, and (c) the Rate Year revenue requirement proposed in this docket, identifying the specific schedules and workpapers.

ALLCO-002 Response:

CL&P objects to this request on the ground that it is an improper effort by Allco to use this rate case proceeding to obtain discovery for purposes of a lawsuit that it filed against the Company on August 10, 2026, in the United States District Court for the District of Connecticut (Civil Action No. 3:26-cv-1277), outside of and in contravention of the rules of procedure that govern discovery in that lawsuit.

Without waiving said objection, please refer to the Company's response to ALLCO-001[i] for CIAC year-end balances from 2018 through 2025. CIAC and interconnection-related payments received by the Company reduce the cost of construction or plant placed in service. CIAC is recognized as an offset to the underlying capital project. CIAC would

not be considered a component of rate base until the underlying capital project is placed in service. At that time, the underlying capital project costs in rate base would be wholly offset by CIAC at the time of final project billing and reconciliation. In the Company's next cost of service update, the rate base and the Rate Year revenue requirement will reflect the CIAC and the underlying capital project cost for projects placed in service.

[iii] ALLCO-004 Question:

State whether refund obligations owed by the Company to interconnection customers following final accounting or reconciliation of interconnection projects — including the $257,260.19 in refunds identified in the Company's December 2024 Final Accounting Reports for the Fisk, Plainfield, Voluntown 1240, and Bilton clusters — are recorded as liabilities on the Company's books; identify the account(s), the total balance of such unpaid refund obligations at the end of each year 2022 through 2025, and state whether and how such balances are reflected in rate base, cash working capital, or the revenue requirement in this docket.

ALLCO-004 Response:

CL&P objects to this request on the ground that it is an improper effort by Allco to use this rate case proceeding to obtain discovery for purposes of a lawsuit that it filed against the Company on August 10, 2026, in the United States District Court for the District of Connecticut (Civil Action No. 3:26-cv-1277), outside of and in contravention of the rules of procedure that govern discovery in that lawsuit.

Without waiving said objection, please refer to the Company's response to ALLCO-002 for "whether and how such balances are reflected in rate base, cash working capital, or the revenue requirement in this docket." The Company confirms that when a refund obligation is owed to interconnection customers following final accounting or reconciliation of interconnection projects, the refund obligation is recorded as a liability on the Company's books until the payment is issued to the interconnection customer.
