Subject: PURA Docket No. 26-06-10, Application of The Connecticut Light and Power Company d/b/a Eversource Energy to Amend its Rate Schedules

To Whom it May Concern:

The notice below was issued from the Office of Consumer Counsel on May 1, 2026 and contradicts the request for a 16% increases starting on January 1, 2027. According to this notice, Eversource customers were to see a reduction in rates from May 1, 2026 to April 30, 2027.

I am opposed to adjusting these rates when the public was notified to the contrary.

NOTICE

The Public Utilities Regulatory Authority (PURA) recently approved the 2026 Rate Adjustment Mechanism (RAM) in Docket No. 26-01-03 and 26-01-04, resulting in lower electric rates for Eversource and United Illuminating (UI) customers effective today, May 1, 2026 through April 30, 2027. Based on the decisions and available estimates:

- Eversource customers will see an overall reduction in total electric bills of roughly 15 percent, while UI customers are expected to see reductions in the range of approximately 13.8 percent. These percentages may vary depending on usage and customer-specific factors.
- Eversource customers should see the combined components in the Public Benefits charge change from approximately 4 cents per kWh change to a credit of about 1.5 cents per kWh.
- United Illuminating customers, the combined components in the Public Benefits charge change from approximately 4 cents per kWh change to a credit of about 1.3 cent per kWh.
- This means that customers will see a negative rate on electric bills under the Public Benefits category, which is actually a credit, not a charge.

Sincerely,
Kerry Wood
State Representative Serving Rocky Hill & Wethersfield
