Date Filed: October 21, 2026

Witness: Leanne M. Landry and John G. Griffin
Request from: Office of Education, Outreach, and Enforcement

Question:

(NON-CATASTROPHIC STORM EVENTS) Provide a listing of all storm events subject to a Storm Work Order for the years 2024 through present that did not exceed the $4 million catastrophic storm eligibility threshold. Additionally, provide a breakdown of the associated costs and the specific date range for each event (i.e., beginning and ending).

Revised Response:

Please refer to EOE-013-SP01, Attachment 1, which is a revision to EOE-013, Attachment 1, to reflect the correct storm dates for MN24F to be March 9, 2024, through March 10, 2024 In addition, the attachment reflects revisions to the calculations under the Direct labor and Payroll - related overheads.

Original Response:

Please refer to EOE-013, Attachment 1, for a listing of total cost for non-catastrophic storm events for 2024, 2025, and 2026. Storm Work Order SCMN2411, reflects multiple dates associated with the costs incurred. At the time, the Company maintained a single work order for non-catastrophic storm work, resulting in all related charges being captured under a single work order. More recently, the Company has changed that practice to initiate separate work orders.

All 2026 costs remain preliminary, as the year is still in progress. The dollar amount reflected represents charges recorded through June 30, 2026, and does not constitute final year-end total.
