Re: Docket No. 26-05-10

Executive Secretary of Pura,

As a retired citizen of the NW corner of CT, I am writing to say NO to approving Eversource's Application for Rate Review and increase of $727 million each year.

I strongly object to this for profit, publicly listed company making more profit or covering their losses on the backs of struggling citizens of CT. The combined electricity, oil and propane costs are already outrageous.

Some of what I have seen in the news while I understand 3rd Q profits are coming out today…

Eversource in the News:

"After year of skyrocketing utility bills, Eversource reports skyrocketing profits" WCVB Boston

"Profits increase at CT's largest utility amid electric bill sticker shock. See what is planned now" Hartford Courant

"Another tone-deaf insult to Connecticut families facing surging energy costs in the midst of a sweltering summer. We're going to scrutinize every padded profit, every bonus and every expense to fight for every penny of savings for Connecticut families," said Attorney General Tong.

Sincerely,

Julia Olff
Falls Village, CT
