Date Filed: October 22, 2026

Witness: Christopher Leigh and Sean P. Noonan
Request from: ALLCO

Question:

(AI in the Application and in this proceeding.) State whether any AI Tool was used in the preparation of any part of the Application, its exhibits, workpapers, or testimony; of any response to an interrogatory in this docket; of the redactions applied to any confidential exhibit or attachment, including the redactions to Exhibit CLP-ADDITIONS-6 and CLP-ADDITIONS-6 Supplemental and the "redaction and e-discovery services" billed by TCDI (ALLCO-034, Attachment 1); or of the forecast of the Rate Year revenue requirement. For each such use identify the AI Tool, the task, the department or Contractor that performed it, whether confidential information, customer information, or CEII was entered into the tool, and the cost.

Response:

No, the Company did not use any type of AI system tool as part of its efforts to develop the Rate Application and no exhibit, workpaper or testimony was generated in that manner. Eversource has only recently begun to deploy AI across the enterprise and within the operating companies and these tools are not yet approved for this purpose.
