Date Filed: September 14, 2026

Witness: Warren R. Boutin
Request from: ALLCO

Question:

State the number of pending distribution interconnection applications in Connecticut that have been pending for more than one year, more than three years, and more than five years, respectively, as of the most recent date available, and for each application pending more than five years, identify the application number, application date, requested capacity (MW), substation and circuit, and current status.

Response:

CL&P objects to this request on the ground that it is an improper effort by Allco to use this rate case proceeding to obtain discovery for purposes of a lawsuit that it filed against the Company on August 10, 2026, in the United States District Court for the District of Connecticut (Civil Action No. 3:26-cv-1277), outside of and in contravention of the rules of procedure that govern discovery in that lawsuit.

Without waiving said objection, the Company maintains and publishes an active interconnection queue for generators greater than 25 kW. The published queue identifies, among other information, the applicable substation, circuit, queue date, and project capacity. The Company also publishes hosting capacity maps that provide location-specific information, including hosting capacity values and DER currently online or in the queue. The information requested regarding individual projects and the applicable substations and circuits is available through the Company's publicly available interconnection resources.[1]
