Date Filed: September 14, 2026

Witness: Warren R. Boutin
Request from: ALLCO

Question:

State the average and maximum elapsed time, in each year 2019 through 2025, between the Company's receipt of an interconnection agreement executed by a Connecticut generator and the Company's countersignature and return of that agreement, and identify each instance exceeding 180 days, including project LEG-22708.

Response:

CL&P objects to this request on the ground that it is an improper effort by Allco to use this rate case proceeding to obtain discovery for purposes of a lawsuit that it filed against the Company on August 10, 2026, in the United States District Court for the District of Connecticut (Civil Action No. 3:26-cv-1277), outside of and in contravention of the rules of procedure that govern discovery in that lawsuit.

Without waiving said objection, the Company does not track information on the average and maximum elapsed time between the receipt of a partially-executed interconnection agreement ("IA") from a Generator and the Company's countersignature and return of the fully-executed IA to the Generator. Starting in early 2026, the IA execution process was enhanced to leverage automation available in PowerClerk; therefore, the execution dates are now recorded electronically in a software platform.
