Date Filed: November 13, 2026

Witness: Craig Dikeman, Matthew J. Correia, Leanne M. Landry, Christopher Colorio and Jeffrey D. Turano
Request from: Public Utilities Regulatory Authority

Question:

(Plant Additions) Application, CLP-Additions-4. Provide the following regarding the consoles for the Windsor System Operations Center (Project Nos. CD21730 or CTDSOCIT):

a. The project name and number under which the consoles were purchased;
b. The total amount included as plant additions related to the consoles; and
c. Whether the procurement of the Mauell consoles was conducted under a competitive bidding process. If yes, provide all documentation of the competitive bidding process, including all request for proposals (RFP), a list of all invited vendors, copies of all bids or proposals received, the bid evaluation criteria, the sole source justification, and documentation of the final vendor selection decision. If not, explain the process for selecting the vendor.

Response:

a. The consoles were purchased under project 21370 – Windsor SOC Renovation, Work Order F2311091.

b. The balance of work order F2311091 is currently in FERC Account 106 (Completed Construction Non-Unitized). It's not until the work order is closed and the final costs of the assets in FERC Account 106 are moved to FERC Account 101010 (Utility Plant in Service) and unitized/posted to the Continuing Property Records (CPR) that retirement units and quantities are determined and posted to the CPR. The total invoiced amount related to the consoles is $2,202,974, but final unitization will occur at a fully loaded cost including all applicable labor, minor items, and overheads.

c. The procurement of the Mauell was not conducted through a competitive bidding process. Mauell was selected through a sole-source procurement supported by an approved Sole Source Justification. Please refer to RSR-075, Attachment 1 CONFIDENTIAL, for the Sole Source Justification and the basis for the vendor selection.
