Date Filed: September 14, 2026

Witness: Ned W. Allis
Request from: Office of Consumer Counsel

Question:

Regarding the placement and experience bands chosen for the analysis of each account, please explain why such bands were chosen and if any other bands were considered for conducting depreciation analysis.

Response:

The experience and placement bands were chosen based on the available historical analyses. The overall experience band for each account represents the transactional data available for that account. For some accounts, shorter or more recent experience bands were also analyzed to aid in determining if trends in more recent data were similar or different than the overall experience for the account. These shorter experience bands are included in the analysis provided in the depreciation study. Please refer to Part VII of the depreciation study, provided as Exhibit CLP-DEPRECIATION-3, for the service life analysis, including the bands given the most consideration in the analysis.
