I wish to make public my experience of Eversource mishandling of payments for amounts due FROM Eversource to small solar electric suppliers. I have a net metering system and a second "BUY ALL" solar system located at 184 Horse Hill Rd. Ashford Ct. 06278. The Buy All system is contracted with Eversource for quarterly payments. I received my first payment sometime in late May for the first quarter ending in early March.

This seems longer than appropriate to wait for payments.

The second quarter ended June 10. I called Eversource at 844-726-7573 on about August 15. I had to leave at least 20 messages after my original message was not returned after 6 business days. I was assured payments were "being processed" and I would be paid within 6 weeks after the end of the quarter. August 15 was already 8 weeks past. I pointed this out and was dismissed and hung up on.

I received payment on September 3. Remember this is for kwh given to Eversource for the 3 months April, May, and ending June 10. By then Eversuorce has already sold this energy to users, billed them and been paid. I only received payment after I spoke with Sara at DPUC and Eversource was contacted by her.

It seems with the technology today there is no good reason that an electric supplier like myself should have to wait almost 90 days for payment from Eversource.
If Eversource can charge a finance (late charge) after 30 days for their customers then it is appropriate for Eversource to pay a supplier like myself the same after 30 days.

Thank you for your help,
Walter Rudewicz
