Hello.

For the last couple of years, Eversource has only improved the system by increasing different types of rates. The system is now much worse than before. 5 years ago, every month we had power outages for different reasons; when it's a storm, we are waiting for something to happen

We need improvement before an increase. Also, the calculation for the increase is completely wrong; the increase is not 18%, but almost 100%. The Weiss calculation is totally wrong.

We need to stop Eversource from increasing our rate.
