EVERSOURCE ENERGY

On July 14, 2026, we submitted a proposal to adjust electric delivery rates to the Connecticut Public Utilities Regulatory Authority (PURA). This proposal, also known as a rate review, is our first request for PURA to review these rates since 2017. Rate reviews provide the opportunity for us to demonstrate how we are managing costs to continue to deliver safe, reliable electric service, and our planned investments in the future, as we remain continuously focused on improving the service you have come to expect. The rate review process takes about one year and includes several steps, including the opportunity for public comment.

How will this proposed adjustment affect you?
This proposal focuses on the local delivery portion of your bill — the costs of maintaining and improving the poles, wires, substations and other infrastructure that delivers electricity to your home or business. This is one of four sections of the bill you receive each month. Over the past several years, you have experienced rate and cost fluctuations on other parts of your bill, like Supply, Public benefits and Transmission. By contrast, Local Delivery costs have been relatively stable over time, and we are proposing to continue that stability with a lens of affordability and providing higher quality service.

In this proposal, we are requesting a rate increase of $727 million annually. **On July 1, 2027, if approved as proposed, an average residential customer using 700 kWh will see their monthly bill ~~an~~ increase ~~of~~ by approximately $33 or 18% ~~or $33~~ per month on a total bill basis** ~~to their total electric bill~~**.** This represents an increase of approximately 50% to the Local Delivery component of your bill. Your actual bill impact may be higher or lower depending on your rate category and how much electricity you use. ~~This estimated bill increase is averaged across 12 months and will vary based on your usage and rate category.~~ A ~~full~~ complete listing of current electric rates and proposed increases are ~~listed~~ included in this notice. You can find your rate category in the Local Delivery section on page two of your bill.

Why are we requesting an increase in electric delivery rates?
It's been nine years since we last filed for a rate review, and Connecticut's energy needs are evolving. While maintaining the electrical system is what we do every day, the needs of the system continue to evolve and require additional attention. Severe storms are impacting the system more regularly than ever before, wires and poles are aging, demand is growing and the state is seeing continued expansion in housing, business, electrification and clean energy. At the same time, we know you want the most affordable and reliable service possible, fast restoration during a storm and continued investment in a stronger, smarter, more resilient electric system. We hear you. This is not just about rates — it's about our commitment to you and ensuring the electric system has what it needs to meet future demand and keep your life moving without interruption, with a laser focus on cost effectiveness to provide value.

~~**How will this proposed adjustment affect you?**~~
~~This proposal focuses on the local delivery portion of your bill — the costs of maintaining and improving the poles, wires, substations and other infrastructure that delivers electricity to your home or business. This is one of four sections of the bill you receive each month. Over the past several years, you have experienced rate and cost fluctuations on other parts of your bill, like supply, public benefits and transmission. By contrast, local delivery costs have been relatively stable over time, and we are proposing to continue that stability with a lens of affordability and providing higher quality service.~~

~~In this proposal, we are requesting a rate increase of $727 million annually.~~ ~~**On July 1, 2027, if approved as proposed, an average residential customer using 700 kWh will see**~~ **their monthly bill** ~~**an increase of by approximately $33 or 18% or $33 per month**~~ **on a total bill basis** ~~to their total electric bill.~~ ~~This represents an increase of approximately 50% to the Local Delivery component of your bill. Your actual bill impact may be higher or lower depending on your rate category and how much electricity you use. This estimated bill increase is averaged across 12 months and will vary based on your usage and rate category. A full~~ complete ~~listing of~~ current ~~electric rates and proposed increases are listed~~ included ~~in this notice. You can find your rate category in the Local Delivery section on page two of your bill.~~

Do customers and communities have a voice in the rate review process?

Yes. A vital part of a rate review includes public comment sessions. Customers and community representatives can attend these sessions to listen or share their opinions on the proposed rate adjustment. **Public comment hearings will take place on the following dates:**

- **TBD**
- **TBD**

You may also provide comments regarding this proposed rate adjustment online. Instructions for the web-filing system are available at https://portal.ct.gov/PURA/Consumer-Services/File-a-Public-Comment/File-a-Public-Comment. Electronic comment submission is preferred, but if electronic submission is not possible, comments may also be sent via U.S. Mail to PURA at 10 Franklin Square, New Britain, CT 06051 or via e-mail to PURA.ExecutiveSecretary@ct.gov. Please include Docket No. 26-05-10 in any written correspondence to PURA.

Get more information and updates.
For additional information, visit PURA's website at ct.gov/pura/site/default.asp. Search the Active Docket Database under Docket No. 26-05-10. For information on the schedule of hearings on this proposed rate increase, please contact PURA's Office of Education, Outreach and Enforcement at 800-382-4586. You may also find more information at **eversource.com/powering-ct-future**.
