MOTION OF CONSERVATION LAW FOUNDATION FOR INTERVENOR STATUS

Pursuant to Connecticut General Statutes § 4-177a, Conservation Law Foundation (CLF)[1] files this motion to be designated as an intervenor in the above-referenced contested proceeding before the Connecticut Public Utilities Regulatory Authority (PURA).

CLF seeks intervenor status in Docket No. 26-05-10 as a public interest environmental and clean energy stakeholder to ensure our organizational and member interests are adequately considered in this proceeding. CLF and its members are concerned about climate change and the pollution caused by fossil fuel energy resources, and part of the organization's mission is to advocate for a rapid and equitable transition to affordable clean energy and the electrification of heating and transportation. Regarding this docket, CLF and its members' interests include, but are not limited to, ensuring that the company's approved electric distribution system investments are consistent with state climate and energy policy priorities such as beneficial electrification and deployment of distributed energy resources, that the company's rates fairly allocate costs and do not discourage electrification by residential customers, and that appropriate cost-containment mechanisms are implemented to ensure ratepayers are not unfairly burdened by rising costs.

If granted intervenor status, CLF will furnish assistance to the commissioners in resolving the issues of this contested case by providing relevant expertise and stakeholder perspectives. CLF regularly engages in regulatory proceedings before PURA, including recent gas distribution rate cases and performance-based regulation for the electric distribution companies.[2] CLF intends to actively participate in the proceeding, including by engaging in discovery, filing interrogatories, filing expert testimony, participating in the evidentiary hearings and cross-examining witnesses, filing briefs, and presenting oral arguments.

---

[1] Founded in 1966, CLF is a nonprofit, member-supported, regional environmental organization that uses the law, science, and the market to conserve natural resources, promote thriving communities, and sustain a vibrant economy for all in the New England region. CLF members work and reside in Connecticut and are electric customers of Eversource. These members are directly impacted by the company's electric rates and investments that will be considered in Docket No. 26-05-10.

[2] *See, e.g.*, PURA Docket Nos. 21-05-15, 21-05-15RE01, 21-05-15RE02, 21-05-15RE03, 23-11-02, 24-12-02, and 25-02-14.

CLF's participation in Docket No. 26-05-10 "is in the interests of justice and will not impair the orderly conduct of the proceedings." Conn. Gen. Stat. § 4-177a(b). CLF's participation is in the interest of justice because CLF is a public interest organization and will represent stakeholder perspectives concerning the environment, clean energy, electrification, transparency, reliability, and affordability, which are core to CLF's organizational interests and have been identified as priorities by many of CLF's members and the public. CLF has expertise in utility regulation, rate design, and grid system investments. As an intervenor, CLF seeks to ensure that approved utility investments align with state clean energy and climate policy priorities and regulatory requirements, including the state's climate law and equitable modern grid framework, and that cost-containment and performance-based ratemaking mechanisms are implemented to further the state's climate and clean energy goals and limit the burden of rising electricity costs on Connecticut ratepayers. CLF will comply with all relevant requirements and procedures and will not impair the orderly conduct of this proceeding.

For the reasons enumerated in this Motion, CLF respectfully requests intervenor status in Docket No. 26-05-10. Please include the following individual on the service list for this proceeding as an authorized representative of CLF. Electronic service is requested.

Respectfully submitted,

Shannon Laun
