I just read through the mailing from Eversource included with our most recent electrical bill. They are requesting a 50% increase in delivery service fee which would approximate about 18% increase in the total bill. This is unconscionable. This is tone deaf as to what is happening to consumers in this country. On a personal note, I am retired and on a fixed income. The social security COL adjustment will likely be in the 2-3% range. We can choose not to go on vacation or to eat expensive foods or drive expensive cars. What are we supposed to do, sit in a cold, dark house in the winter and a hot, humid house in the summer with no choice other than to go to a cooling center? I did not work my whole life to rely on public relief services. Perhaps the increase should be pegged to the social security COL adjustment. The current request is truly a cruel representation as to why we cannot turn on our TVs without seeing candidates talk about the cost of utilities in CT. This request, if enacted, will have real life consequences on the quality of life and the ability for constituents to continue to reside in CT. I hope this request will be rejected and less confiscatory proposal be considered.
Thanks
Steven Goldenberg
