Date Filed: October 08, 2026

Witness: Warren R. Boutin, Leanne M. Landry and Jeffrey D. Turano
Request from: ALLCO

Question:

For each calendar year 2017 through 2025, state the number of distributed-generation interconnection projects for which construction was completed, and, of those, the number for which a final accounting or reconciliation of actual costs against amounts collected was performed and the number for which a final accounting report was issued to the interconnecting customer. Identify the written policy or procedure governing when a final accounting is performed and when a report is issued to the customer, including any standard interval after project completion, and produce it. If no written policy exists, state so and describe the practice and who administers it.

Response:

CL&P objects to this request on the ground that it is an improper effort by ALLCO to use this rate case proceeding to obtain discovery for purposes of a lawsuit that it filed against the Company on August 10, 2026, in the United States District Court for the District of Connecticut (Civil Action No. 3:26-cv-1277), outside of and in contravention of the rules of procedure that govern discovery in that lawsuit.

Without waiving said objection, the final accounting process is performed manually and is not tracked or maintained in PowerClerk. The data is entered and tracked across multiple systems. Accordingly, the requested information is inconsistent or not available in Power Clerk and would require a manual review of the underlying records.

Section 1.2 of the PURA-approved Interconnection Guidelines states, in part, "At the conclusion of the project, the EDC will reconcile actual vs. estimated cost and reimburse or bill the Generator accordingly. Cost estimates provided to applicants will be subject to a six-month true-up." Please also refer to the Company's response to ALLCO-005[i].

Prior Referenced Response:

[i] ALLCO-005 Question:

Provide an aging schedule of all unpaid interconnection-cost refunds owed to interconnection customers as of the most recent date available, showing for each: the project, the date the refund obligation was determined, the amount, and the reason payment has not been made; and describe the Company's policy, procedure, and standard timeline for paying such refunds.

ALLCO-005 Response:

CL&P objects to this request on the ground that it is an improper effort by Allco to use this rate case proceeding to obtain discovery for purposes of a lawsuit that it filed against the Company on August 10, 2026, in the United States District Court for the District of Connecticut (Civil Action No. 3:26-cv-1277), outside of and in contravention of the rules of procedure that govern discovery in that lawsuit.

Without waiving said objection, the standard timeline for paying interconnection-cost refunds is set forth in Section 5.3.2 of the PURA-approved form of Interconnection Agreement.
