GenConn Energy LLC **Witness: Devang Patel**

Docket No. 26-06-02 **Page 1 of 1**

Date Submitted: October 1, 2026

RRU-037 Q:

(REVISION CONSISTENCY) Application, Att. GenConn-11; 2026 AFRR Decision, p. 7, Table 2. Every addition placed in service on or after August 8, 2022, carries the revision flag except Devon Foam Fire Protection ($96,694.80, in service April 30, 2024, life 16.002778 years), while three Devon additions with the same in-service date are flagged. Four revision dates are after December 31, 2025, three are on the June 30, 2026, AFRR application filing date. Regarding the revision flags:

a. Explain why Foam Fire Protection is not flagged, state the criteria applied in selecting assets for revision, and provide the supporting working papers.
b. Reconcile the $96,694.80 Foam Fire Protection amount to the $98,547 allowed in the 2025 AFRR Decision and the $92,663 reported in the 2026 AFRR Application.
c. Explain why the Devon Chiller Heater revision is dated January 1, 2026, and the Middletown Chiller Heater revision June 30, 2026, and why four revision dates are post December 31, 2025.

RRU-037 A:

a. When the foam fire protection system was placed in service in the asset management system, the useful life was coincidently updated to the remaining life of the CfD.

b. As provided in the Company's 2025 AFRR filing (i.e., Docket 25-06-02, Exhibit GenConn-CP3), the difference between these three amounts is related to Sales/Use Taxes.

c. When the assets were placed in service in December 2025, they were defaulted to the asset class useful life (in corporate systems) and were updated in January 2026 to the remaining life of the CfD once identified.
