## Part III: Class I or Class II Renewable Energy Source (continued)

| **Class I** - Check Generation Facility's fuel source(s). | **Required Documentation:** |
|---|---|
| ☐ Biomass Facility<br>**Statutory Requirements:**<br>*Uses sustainable biomass fuel that is "cultivated and harvested in a sustainable manner;<br>*Has an average emission rate of equal to or less than .075 pounds of nitrogen oxides per million BTU of heat input for the previous calendar quarter, or<br>*Has a capacity of less than five hundred kilowatts that began construction before July 1, 2003. | Attach a copy of most recent fuel plan, as filed with the state agency.<br>Provide facility's average emission rate per quarter: _____<br>Attach a copy of the facility's valid Air Permit or equivalent authorization indicating nitrogen oxides (NOx) emissions and provide page number demonstrating NOx emissions: _____<br>Regarding the biomass used by the facility, list each type, as well as the percentage used: _____<br>Did facility receive funding from the Clean Energy Fund prior to May 1, 2006? ☐ Yes ☐ No<br>Is the energy derived from the facility subject to a long-term power purchase contract? ☐ Yes ☐ No<br>Attach an explanation. |
| **Class II** - Check Generation Facility's fuel source(s). | **Required Documentation:** |
| ☐ Trash to Energy<br>**Statutory Requirements:**<br>***Must have a CT permit** | Attach a detailed description of the facility, as well as the trash used.<br>Attach a copy of the CT permit. |
