PUBLIC COMMENT RE: EVERSOURCE'S APPLICATION FOR RATE INCREASE

It is actually alarming and pathetic that Eversource has filed an application to increase its rates for the residents of our State to make even more of a profit than they already do. We are already taxed to the hilt by our State government and it is extremely costly to survive living here. The rate of individuals moving out of this State is unbelievable and understandable.

The fact that Eversource already makes a HUGE profit off of us residents here in Connecticut and yet they are asking for more is insulting and despicable. Someone needs to tell that CEO (who has a base annual salary of $1,432,308!) to have mercy on those of us who work hard and actually pay their bills.

I am a single individual earning a middle class income and do have electric heat in my older, small condominium. Even on the budget I am already paying close to $300 per month. I neither keep my home very warm in the winter nor very cool in the summer. (Who can afford to with Eversource's rates??)

I hope PURA does the right thing and denies Eversource's reprehensible application for an increase no matter how long they are requesting it for.

Enough is enough already!!!
