Connecticut-only CESA

CT-2026-10-29-v3 | Initial customer communication | Customer completion fields

Customer: [Customer legal name]
Accounts: [Account numbers and electric utility]
Service addresses: [Connecticut service addresses]
Requested supply start: [Month/year], subject to existing commitments and utility meter reads.

Connecticut scope and authority

This Connecticut-only disclosure is an integral part of the attached four-page Cloudshadow Energy Services Agreement and Addendum A. It applies only to Connecticut commercial and industrial electricity accounts. Natural gas and residential accounts are excluded from this version. Cloudshadow is a registered electric aggregator acting as the customer's representative, not as a supplier nor as supplier's agent. Each account is priced and contracted individually; Cloudshadow does not combine customer loads or buy or resell electricity. The customer alone chooses the supplier, product, price and term and executes every supplier and utility document directly. Cloudshadow has no power of attorney or authority to sign or enroll for the customer.

Compensation disclosed before pricing

The customer authorizes a fee of **$[fee]/kWh ([fee in cents] cents or [fee in mills] mills/kWh)** for each account listed above and on Addendum A. The fee is included in the supplier's quoted customer supply price. The supplier collects this customer-authorized fee from the customer on actual billed usage and passes the entire fee directly to Cloudshadow, retaining no portion. Cloudshadow receives no additional supplier compensation, including bonuses, incentives or marketing payments. No separate enrollment or membership fee is charged.

Estimated combined annual usage is [annual usage] kWh; estimated annual compensation is $[annual compensation], with actual compensation varying with actual usage. The authorized per-unit fee is the same for every solicited supplier and term in this procurement. Any proposed fee increase will be disclosed in an updated offer and authorized by the customer in writing before proceeding. A reduction may be made without an additional notice. Existing default, pay-through and termination provisions remain subject to the attached agreement; they are not additional supplier compensation.

How prospective rates are obtained

After the customer signs this complete CESA and Addendum A, Cloudshadow reviews authorized account and usage data, current supplier commitments, objectives and the requested start date. For each account it solicits every PURA-licensed supplier with which it has an executed master brokerage agreement and that serves the customer's EDC territory, and solicits more than one supplier, unless a single supplier is specifically requested by the customer, or if an active supply contract is to be amended and extended. If a customer requests another PURA-licensed supplier, Cloudshadow will endeavor to obtain that supplier's offer. Cloudshadow compares the supplier's generation rate, its disclosed per-unit fee, the resulting customer rate, term, product, billing, adjustments and material conditions. Every solicited supplier and its response or non-response is disclosed in the bid comparison. The signed CESA and authorized fee schedule accompany supplier bid packages.

Current solicitation list for this procurement

Current contracted CT supplier panel: [Verified legal names and approximate count, as of date]
Suppliers to be solicited for this procurement: [Complete eligible supplier legal names]
Approximate number to be solicited: [Count]

The actual current supplier names and approximate count must be completed before the customer signs and before bids are solicited. A fictional or blank list is not used for live authorization.

Customer pricing authorization

I acknowledge the scope, pricing process, supplier names/count and compensation disclosures above and authorize Cloudshadow to obtain prospective electricity pricing for the listed accounts. This authorization is not acceptance of any supplier offer and grants no signing or enrollment authority. I will separately review, choose and sign any supplier contract I accept. This page, the attached agreement and completed Addendum A must be signed before solicitation; account rows and fee fields must agree.
