Re: Eversource Energy Shared Clean Energy Facility Program - Class I Renewable Energy Source Certification Application

Dear Mr. Gaudiosi,

Please accept the attached Class I Renewable Energy Source Certification Application for solar photovoltaic ("PV") energy generation facilities enrolled in the Shared Clean Energy Facility ("SCEF") program administered by The Connecticut Light & Power Company d/b/a Eversource Energy ("Eversource"). Eversource is submitting this application consistent with the Program Rules approved by the Authority in Docket No. 19-07-01.

Please note that this Class I Renewable Energy Source Certification Application does not include signatures of generation facility owners or property owners for the numerous facilities enrolled in the SCEF program. Eversource requires completion of a Customer-Executed Tariff Terms Agreement for all projects enrolling the SCEF program. The Year 4 agreements were last filed with the Authority on May 16, 2023 in Docket. Nos. 19-07-01 and 22-08-04. These agreements contain requisite language indorsing that Eversource has title to all Renewable Energy Certificates (RECs) and any other tradable energy or environmental-related commodity produced by or associated with the PV systems. The assets will be self-reported in NEPOOL by Eversource.

In the event of any questions, please do not hesitate to contact the undersigned staff.

Respectfully submitted,

EVERSOURCE

Daniel Crisp
