Re: Application of The Connecticut Light and Power Company d/b/a Eversource Energy for Qualification of Residential Renewable Energy Solutions (RRES) Facilities as Class I Renewable Energy Sources – Q2 2026

Dear Mr. Gaudiosi,

Please accept the attached Class I Renewable Energy Source Certification ("RESC") Application for solar photovoltaic ("PV") energy generation facilities enrolled in the Residential Renewable Energy Solutions ("RRES") program administered by The Connecticut Light & Power Company d/b/a Eversource Energy ("Eversource" or "the Company"). Eversource is submitting this application consistent with the direction of the Authority in Docket No. 20-07-01.

Eversource respectfully requests the Authority determine that the RRES Facilities identified in this application qualify as Class I renewable energy sources, effective the later of April 1, 2026 or each facilities' commercial operation date. The Authority has sometimes found RRES Facilities included in prior Class I RESC applications of the Company to qualify as of the first date of the quarter following commercial operation. These findings have prevented Eversource from maximizing the reporting of renewable generation from qualified facilities participating in the RRES Program and resulting proceeds from the sale of renewable energy certificates credited to customers through the operation of the Revenue Adjustment Mechanism ("RAM").

Please note that this Class I Renewable Energy Source Certification Application does not include signatures of generation facility owners or property owners for the numerous facilities enrolled in the RRES program. Eversource requires completion of the Application Form and Customer Disclosure documents for all projects enrolling the RRES program. These forms were last filed with the Authority on January 22, 2026 in Docket No. 25-08-02 pursuant to Order No. 23 in the December 17, 2025 Decision in Docket No. 25-08-02. These forms contain requisite language indorsing agreement to the program Terms and Conditions, which include that Eversource has title to all Renewable Energy Certificates (RECs) and any other tradable energy or environmental-related commodity produced by or associated with the PV system.

In the event of any questions, please do not hesitate to contact the undersigned staff.

Respectfully submitted,

EVERSOURCE

Jonathan A. Harris
