Exhibit B-4 – Electric Aggregation Program

(a-b) Our Electric Aggregation Program

M&L Service Providers LLC will help Connecticut commercial customers save money on their electric bills by finding the best generation price from licensed suppliers. We work only for the customer not for any supplier and our goal is to get the lowest and most stable electric rate available. Savings are not guaranteed but we try our hardest to beat the utility if possible.

(c) Marketing Methods

We will market our services in simple and transparent ways:

- Online marketing through our website.
- virtual meetings with interested customers.
- word of mouth, personal contacts, acquaintances

We will not do door-to-door sales or any aggressive or misleading advertising.

(d-e) Membership Fee Structure and Contracts

M&L Service Providers LLC does not charge any sign-up or monthly membership fee.

(f) Selecting Electric Suppliers

We collect price offers from several Connecticut-licensed electric suppliers. Then we compare their prices, contract terms, and reputation. We recommend the option that gives the customer the best total value and savings. The customer signs the final contract directly with the supplier.

(g) Compensation for Our Services

M&L Service Providers, LLC will be compensated through standard supplier-paid commissions for providing electric brokerage services. These commissions are paid when a customer voluntarily enrolls in a plan offered by a licensed retail electric supplier. No markups are added to customer electricity rates.

- **Compensation Structure**
  - Compensation is provided directly by licensed retail electric suppliers through broker–supplier agreements.
  - All compensation follows customary industry structures (e.g., per-kWh commissions, flat-rate broker fees, or monthly residuals), depending on the supplier agreement.
- **Customer Charges**
  M&L Service Providers LLC does not add any cost to the customer's electricity supply rate.

(h) Contracts with Suppliers

M&L Service Providers LLC will enter into standard broker supplier agreements with licensed retail electric suppliers authorized to operate in Connecticut. These agreements define the conditions under which the Applicant may present supplier offers, enroll customers, and receive compensation.

- Follow industry-standard terms and ensure full compliance with Connecticut PURA requirements.
- We do not obligate customers to any supplier.
- Clearly outline the responsibilities of both parties, including customer enrollment procedures, communication requirements, and commission structures.

The Applicant will only work with suppliers that hold valid Connecticut electric supplier licenses.

(i) Other Services

In addition to helping customers find the best electricity prices, we also:

- May review energy bills to check for savings opportunities
- Give customers as per needed regular market-price updates.
